Coracle Primitive fishing boat. Observed in British waters at Caesar's invasion, it was a portable, skin covered wicker frame, with thwart and paddle. Covered with tarred canvas, it is still seen on the Telfy and the Dee.

Coral Formation of carbonate of lime consisting of the skeletons of marine polyps. The principal species are found in tropical seas and shallow waters, mainly between the 28th N and 28th S parallels of latitude.

The formations include fringing reefs, which extend from the shore seawards only a short distance, barrier reefs, which are of similar structure, but on a much larger scale, and atolls, which are ring-shaped reefs often surrounded by islets.

Coram Thomas English philanthropist. Born in 1668 at Lyme Regis, he became a sailor. His interest in foundlings led to the opening of the Foundling Hospital in Hatton Garden, London. Later it was moved to Guildford St. and then into the country. He died March 29, 1751.

Cor Anglais (or English Horn) Wind instrument of the reed species. It has a gleuhular bell at the bottom, and its compass is two octaves and a fifth.

Corbett James John American pugilist. Born at San Francisco in 1866, he became a professional boxer. He defeated J. Choyinski in 1889, J. L. Sullivan in 1892, thereby gaining the world's championship, and Charles Mitchell in 1894, but was defeated by Robert Fitzsimmons in 1897. In 1891 he fought 61 rounds with Peter Jackson, the fight ending in a draw. He retired after Aug. 1903, when he was defeated in the 10th round by J. J. Jeffries.

Corbridge Town of Northumberland. It is situated on the north bank of the Tyne, 4 m. from Hexham on the L.N.E. Ry. The site of the Roman station of *Corstopitum* is near. Pop. 2415.

Corday Charlotte French revolutionary. Marie Anne Charlotte Corday d'Armont was born of good family, July 27, 1768, near Sées, Normandy. She conceived it her duty to rid France of Marat, and stabbed him in his bath. She was guillotined, July 17, 1793.

Cordelier Member of a political club that existed during the French Revolution called a Society of the Friends of the Rights of Man and of the Citizen and founded in the Cordeliers district Paris, 1790. It popularised the motto, "Liberty, Equality, Fraternity," and was influential in establishing the worship of Reason. The Convention decreed its extinction in 1795.

Cordillera Name first applied to the 8 American Andes, and then to their extension through Mexico. It is nowadays specifically used for the mountain systems between the Rocky Mts and the Sierra Nevada.

Cordite Smokeless propellant of the British forces. Originally devised by an Ordnance Committee, in 1891, it is nowadays the variety, cordite D, which comprises gun cotton, 65 per cent., nitro-glycerine, 30 per cent., mineral jelly, 5 per cent. Pressed into waterproof cylindrical rods, varying in thickness from 1 mm. upwards, it is used in rifle cartridges and heavier ammunition.

Córdoba City of Argentina. It is 435 m from Buenos Aires. It has a 17th century cathedral, a church built earlier by the Jesuits, a university founded in 1613 and an observatory. It is a railway junction and a prosperous commercial city, with manufacturing and other industries. Pop (1931) 253,182.

Cordon French word for line or cord. It denotes the sky blue scarves of certain orders of chivalry, and thence a person eminent in any profession, such as a *cordón bleu* in cookery. It denotes also a line of posts surrounding any area for preventing ingress or egress.

Cordova City of Spain, also called Córdoba, and standing on the Guadalquivir, 82 m from Seville. It was founded by the Carthaginians, but the Moors made it famous. The mosque, now a cathedral, is one of the chief examples of their art. There is an old bridge across the river as well as several colleges. Cordova is the capital of a province in which coal and copper are mined. Pop (1931) 106,045.

Cordwainer Maker of shoes of Cordova leather. The Cordwainers formed a company, now one of the London livery companies. The hall is at 7 Cannon Street, E.C., and the company supports a technical school at Bethnal Green.

Corduroy Stout cotton fustian made with a pile so cut as to leave a ridged surface in the direction of the warp. A corduroy road is a path made over swampy ground by fastening logs together. It is so called on account of its ridged appearance.

Corelli Marie English novelist. Born on May 1, 1864 from 1886 to 1917 she produced novels which were widely read because of their bearing on the religious and social questions of the day. For many years she lived at Stratford-on-Avon, and she died April 24, 1924. Her most popular books were *The Romance of Two Worlds*, *The Sorrows of Satan*, *The Mighty Atom*, *The Master Christian* and *God's Good Man*.

Corfe Castle Village of Dorset. It is 4 m from Wareham and 11½ m from London, on the S. Ry., and is in the district called the Isle of Purbeck. It is famous for its castle, now a ruin, the scene of the murder of King Edward the Martyr in 978. Pop 1400.

Corfu Northernmost of the greater Ionian Islands. Lying off the coast of Albania and Epirus, it is 40 m long and covers 270 sq m. It is mountainous in the north. Olives, pomegranates, figs and grapes are grown. Anciently called Coreira, it offered hospitality to the Serbian Government and troops during the Great War, the pact of Corfu, 1917 laid the foundations of Yugoslavia.

Corfu, the capital, on the east coast, has a fine harbour. Pop 32,221.

Corgi Welsh dog coming from Pembroke-shire and Cardiganshire. Those from Pembrokeshire have long tails and the others short ones. The Pembrokeshire variety are either red or red and white, whereas the Cardiganshire are any colour except white, and are slightly heavier. The weight of the corgi is from 18 to 25 lbs. The head and contour of body is foxy, but the limbs are of sturdier build than those of the fox. The coat is smooth but harsh. Corgis make excellent workers for sheep and are good tempered and hardy.

Coriander Fruit of an umbelliferous plant found in South Europe, Asia Minor and parts of England. The plant has pinkish flowers and its fruit, smooth and globular, is used in medicine, confectionery and liqueurs as a carminative and aromatic factor. Its tender leaves and shoots are useful in soups and salads.

Corinth City of Greece. Situated between the Gulf of Corinth and the Saronic Gulf, it was about 3 m from the sea, on which was its harbour. Founded about 1000 B.C., it was a great trading centre and naval power, and famous for its culture. The city's most famous building was the Acrocorinth, or citadel, on a hill 2000 ft high.

The rivalry between Athens and Corinth led to the Peloponnesian War in 431. In 146 B.C. the Romans destroyed the city, but Julius Caesar rebuilt it. Visited by S. Paul, and famous for its Christian church, it was wealthy and splendid, but was damaged by barbarian invaders. It existed under Byzantine and Turkish rule until destroyed by an earthquake in 1388. A new city, New Corinth, was erected on the gulf. Much excavation work has been done on the site of the old city.

The Gulf of Corinth divides the southern part of Greece from the mainland. Lepanto, as well as New Corinth stands on it and it is sometimes called the Gulf of Lepanto. The Isthmus of Corinth is the narrow strip of land that divides the gulf from the Gulf of Aegina. Its greatest breadth is only 8 m., and it is cut by the Corinth Canal, opened in 1893.

Corinthian Name used in the 18th century for a man of wealth and position who was also a patron of sport. There is a good picture of the Corinthian in Conan Doyle's *Rodney Stone*.

The Corinthian Football Club is a leading amateur club playing the association game. It was founded in 1882 and its members are drawn from the universities and public schools.

Corinthians Epistles to the Seventh and eighth books of the N.T. The Apostle Paul wrote the first from Ephesus, apparently in A.D. 57, to the church founded by him at Corinth. He reproved factious rivalries, offered counsel on moral questions, rebuked disorders at the eucharist, wrote an imperishable hymn of love, and established the doctrine of the Resurrection. The second letter, sent from Philippi in A.D. 58.

expounds the grandeur of the apostolic mission, warns against heathen dangers, and describes his life's martyrdom

Coriolanus *Gaius Marcius* Roman patrician hero Legend makes him a Roman who was exiled because of his unpopularity He then joined the Volscians and led their army to attack Rome, but spared the city on account of the entreaties of his wife and his mother On his return to the Volscian capital he was killed

Cork Evergreen oak of the Mediterranean region (*quercus suber*) It is cultivated in Spain, Portugal and parts of France, and the bark is very useful as it is impervious, compressible and elastic The trees can be stripped every 10 years or so for about 150 years The first stripping produces the virgin cork, useful for tanning Later stripplings are done carefully with curved knives The cork is then boiled or steamed, scraped and pressed before being cut into sheets

Cork County of the Irish Free State In the south of the country and the province of Munster, it covers 2890 sq m The coast is indented and includes Bantry Bay and the harbours of Cork and Kinsale Much of the area is mountainous, but the soil is very fertile and the country is noted for its dairy produce Oats, potatoes and barley are also grown Cork is the chief town, other places are Formoy, Youghal, Bandon, Mallow, Skibbereen, Clonakilty, Kinsale and Queens town (Cobh) The chief rivers are the Lee, the Bandon and the Blackwater The county is served by the Gt Southern Rlys Pop (1926) 287,267

Cork Seaport and city of the Irish Free State, also the capital of the province of Munster and of the county of Cork It stands on the Lee, 11 m. from its entrance into Cork Harbour and on the Gt Southern Rlys It is 166 m from Dublin The chief buildings are the Anglican and Roman Catholic cathedrals The city is the market for the produce of a large district and has a considerable import and export trade The city is well provided with quays There are several public parks and promenades including the Mardyke Brewing, distilling and bacon curing are industries and there are some manufactures The chief paper is *The Cork Examiner* Race meetings are held regularly The city's patron saint is S Finbar There were serious disturbances in Cork in 1919-20 Pop (1926) 78,490

Cork Harbour is 8 m. broad and a mile wide at the entrance The harbour has docks, dry docks and accommodation for liners at Queens town (Cobh) Other places on its shores are Passage West and Middleton

Cork Earl of Irish title held since 1620 by the family of Boyle Sir Richard Boyle, a Kentish man, was born, Oct 13, 1666, and educated at Cambridge About 1690 he went to Ireland, where he bought the estates of Sir Walter Raleigh, chiefly in County Cork In 1690 he was made an earl, and in 1691 became lord treasurer He helped to crush the Irish rebellion in 1641-42 He died Sept. 15, 1643

The title passed later to John Boyle, who was already Earl of Orrery Since then these two earldoms have been united The earl's eldest son is called Viscount Dungarvan

Cormorant Widespread genus of diving birds with all four toes webbed (*Phalacrocorax*) Of the 30

species the black cormorant (*p. corax*) known in Britain and all round the northern hemisphere, is 36 ins long with 14 tail feathers The green cormorant or shag (*p. graculus*), is somewhat smaller and has only 12 Cormorants have been trained to catch fish in the Far East from time immemorial, the fish being stored in the throat pouch This sport was introduced into Europe in the 17th century

Corn Cereals used as foodstuffs It has the special significance of wheat in Great Britain and of maize in North America.

CORN LAWS—Laws dealing with the supply of wheat, oats, barley and other cereals In Great Britain laws were passed early in the 19th century to protect the farmer by placing a duty on imported corn Later this was arranged on a sliding scale, varying with the price obtained at home If the price was low the duty was high, if the price rose the duty fell This policy made bread dear and there was soon an agitation to remove the duties The Anti-Corn Law League worked for this end, and in 1846 Sir Robert Peel abolished the duties as from 1849 For a further 20 years a small registration duty was charged

In 1917 a Corn Protection Act fixed minimum prices for wheat and oats, this being part of the plan to help agriculture and give the agricultural labourer a minimum wage of 25s a week The law was repealed in 1921

Corn (Latin, *cornu*, a horn) Thickening of the outer layers of skin which in time press upon the sensitive lower part. It is usually caused by friction and pressure of ill fitting shoes and can be relieved by salts, hot water, plastering and paring, and cured by removing its cause

Corn Cockle (*Agrostemma githago*) Herb of the carnation pink order A native of Europe and W Asia, it is perhaps a quasi cultivated variety of Anatolian origin It has been introduced into N America Common in British cornfields, it is hairy, with much divided leaves and long stalked, solitary pale purple flowers with woolly sepals.

Corncrake (*Crex pratensis*) Bird of the rail family, also called the landrail Essentially migratory, it spends the summer in the Arctic regions and the winter in Africa A timid bird, it only flies reluctantly Its plumage is tawny brown, and it utters an unmelodious cry

Corneille *Pierre* French dramatist. Born June 6, 1606, in 1629 his play, *Médée*, was successfully produced in Paris His greatness was seen in *Le Cid*, 1636 and in the four succeeding dramas, *Horace*, *Cinna*, *Polyeucte* and *La Mort de Pompée* His comedy, *Le Menteur*, was equally successful He died in Paris, Oct 1, 1684 Corneille is regarded as the first of the great French dramatists, preparing the way for Racine and Molière

Cornelia Name of a celebrated patrician clan in ancient Rome

Cornelia, the mother of the Gracchi was noted for her devotion to and pride in her sons She was a daughter of Scipio Africanus Another Cornelia was a wife of Julius Caesar

Cornelius Roman centurion of Caesars He was received by the Apostle Peter into the Christian Church A full account is given in Acts x

Cornell American University at Ithaca, New York, founded in 1865,

and named after Ezra Cornell, one of the chief subscribers. It was opened in 1868 and is for women as well as men. Physical training is compulsory during the first two years of a student's residence, and athletics form an important branch of the curriculum. Cornell has (1932) 6,056 students.

Cornet Brass musical instrument resembling the trumpet. It is fitted with pistons, and pitched in B flat.

Cornet Former rank of the British army. Before 1871 the junior officers of cavalry regiments were known as cornets. The Elder Pitt was in his early days "a cornet of horse". In the infantry the corresponding rank was ensign. The Boers used the word for officers when the Transvaal and Orange Free States were independent.

Cornflour Finely ground Indian corn. It is used with boiling milk and sugar for puddings, cakes and sweet sauces, and for thickening soups, gravies and sauces.

Cornflower Herb of the composite order (*Centaurea cyanus*). As developed by gardeners, it is a showy, hardy annual, with double blue, white, pink, double pink, terra-cotta or purple flowers. It grows to about 2 ft. high.

Cornhill London thoroughfare. It runs from the Poultry to Leadenhall St. In olden times it had a weigh house and a prison, and here was the standard used as a measure of distance. In Cornhill are the churches of St Michael and St Peter.

CORNHILL MAGAZINE A journal founded in 1860 by the publisher, George Smith, whose business was then at 65 Cornhill. Since 1917 it has been owned by John Murray, Ltd.

Cornice Moulded projection crowning or finishing the structure to which it is attached. In classical architecture, it is specifically the uppermost part of the entablature. Gothic cornices sometimes comprise rows of corbels, with or without arched supports to the parapet.

Corn Laws Name given to certain Parliamentary Statutes relating to the importation and exportation of corn. In 1773 Burke first introduced a duty on foreign corn, when the home price became high, and in 1815 corn had to be 80s. per quarter, before foreign corn could be imported, which caused great distress. Peel tried in 1836-1843 to right matters with a sliding scale, but was converted to Free Trade by Cobden and Bright in 1849, and corn laws were abolished. In 1903 a tax of 1s. per quarter was imposed and repealed, and then Chamberlain imposed 2s. with preferential duty for the colonies.

Cornucopia Latin word meaning horn of plenty. The story goes that it was given by Zeus to the goat Amalthaea who had nursed him. It could be filled with whatever its possessor wished.

Cornwall County of England. In the extreme south-west. It is a peninsula with the sea on three sides. It is 75 m. long and covers 1356 sq. m. Much of it is hilly, the highest point being Brown Willy. The coast, especially on the north, is extremely rugged and in it are many bays and headlands. The former include Plymouth Sound and Mount Bay, the latter the Lizard and Land's End. The Scilly Islands belong to the county, which sends five members to Parliament. The railways are the G.W.R. and the S.R. The rivers, all

short, include the Camel, Fowey, Tamar, Looe, Fal and Lynher. Bodmin is the county town and Truro the seat of the bishop. Other towns are Launceston, Redruth and Camborne. Watering places are Falmouth, Penzance, St. Ives and Newquay. The county contains also many small towns which once sent members to Parliament, such as Penryn, Grampond and St. Germans. Herein, too, are Looe, Helston and Newlyn. Tin and china clay are mined, as is some copper. Fishing is another industry. Owing to the mild climate, fruit, flowers and vegetables are extensively grown. The foliage is almost tropical in its beauty and variety.

Cornwall has a distinct life of its own, and at one time had its own language. It is full of traditions of the past and almost every place has its saints and legends. It was the land of King Arthur, and in modern times the scene of the stories of Sir A. Quiller-Couch. There are many remains of early man, as well as castles and ruins of later date at Tintagel, Launceston and elsewhere. As the Duchy of Cornwall, its duke being the heir to the throne, it retains some of its old privileges. Pop (1931) 317,951.

The county regiment is the Duke of Cornwall's Light Infantry. This was raised in 1702 and has a long and honourable record, notably during the Great War. The regimental depot is at Bodmin where is its war memorial.

Cornwall Town and river port of Ontario. It is 68 m. from Montreal near the rapids of the St. Lawrence which are avoided by the Cornwall canal. It is served by the Canadian Pacific, Canadian National and New York Central Ry's, and from here steamers go along the St. Lawrence and the Great Lakes. Pop (1931) 11,126.

Cornwall Barry. Pseudonym of Bryan Waller Procter, English poet and dramatist. He was born at Leeds, Nov. 21, 1787. In 1821 he produced a tragedy, *Mirandola*, which was performed at Covent Garden. Among his poems are *The Flood of Thessaly* and *English Songs*. He died Oct. 5, 1874.

Cornwall Duke of. Title borne by the Prince of Wales. It is given to him when he is made prince, and with it he becomes the owner of large estates in Cornwall, Devon and London. The estates include tin mines and property on and near Dartmoor. The London property is in Kennington and Lambeth. The estates are managed by a council of which the prince is president. In 1926 the revenue amounted to £246,000. The first duke, Edward, the Black Prince was created in 1337. As duke the Prince appoints the high sheriff of Cornwall. On the accession of Edward VIII in Jan., 1936, the title became vacant.

Cornwallis Earl. English title borne from 1753 to 1852 by the family of Cornwallis. In 1661, Sir F. Cornwallis was made a baron, and in 1753 Charles, the 6th baron, was made an earl. His son, Charles Cornwallis (1738-1805), was the soldier who was forced to surrender with his troops at Yorktown in 1781. From 1786 to 1793 he was Governor-General of India, and from 1798-1801 Lord Lieutenant of Ireland. In each country he put down a dangerous rising. In 1793 he was made a marquess and he had again become Governor-General of India when he died, Oct. 5, 1805. The marquessate became extinct when his son Charles died in 1823. The earldom passed to a kinsman James Cornwallis (1742-1824) Bishop of Lichfield, and became extinct on his son's death in 1852.

gives its name to a famous English hunt. This was started in the 17th century and now hunts a district in the counties of Leicester and Rutland. It has a long connection with the earls of Lonsdale, and at least three of the earls have been masters.

Cottingham Urban district of Yorkshire (E R.), 4 m. from Hull, on the L N E Ry Cottingham, once a market town, is now practically a suburb of Hull. Pop (1931) 6182

Cotton White fibrous material clothing the seeds of tropical shrubs of the mallow order (*Gossypium*). Generally bushy plants from 3 to 6 ft high, their capsular bolls comprise compartments containing from seven to nine seeds each. The outer seed coat bears one celled, flattened, twisted tubular hairs.

Cultivated in pre-Christian times, cotton grows anywhere between 43° N and 33° S. Separated from the seed by ginning, the lint, weighing about one third, is compressed hydraulically into bales averaging 500 lb., and as such reaches the cotton mills for conversion into yarn. The seed, weighing twice its cotton clothing, contains valuable oil, expressed as an olive oil substitute, or ground into meal for cattle food or fertilizer. The unspinnable fibres, pure cellulose, become paper. Cotton pests include boll weevils, boll worms and fungoid diseases.

The spinning and weaving of cotton has long been the staple industry of Lancashire, which provided much of the cotton materials for the whole world. Of late, however, it has met with severe competition, especially from India, Japan and other parts of the East.

The world's cotton is grown chiefly in the southern states of the U.S.A. The world's output is some 27,748,000 bales, of which 14,514,000 come from the States. It is grown, too, in Egypt, and also in the Sudan, E. Africa and other parts of the British Empire, and there is a British Empire Cotton Growing Association to foster this production. For its manufacture Great Britain has 57,000,000 spindles, the rest of the world over 100,000,000. In England the industry possesses strong trade unions of employed and equally strong associations of employers.

Cotton Charles English poet. A Staffordshire man, he was born April 28, 1830, and became a soldier. His interests are proved by his *Planters' Manual of Fruit Trees*, 1875, and his supplement on trout fishing to *The Compleat Angler* of his friend Walton. He is famed for his translation of Montaigne. He died Feb. 1887.

Cotton Cake Foodstuff for cattle. It is obtained by compressing cotton seeds after the expression of their oil. That made from decorticated seeds from which the hulls have been removed, is rich in nitrogenous substances, fat and carbohydrates. American cotton cake is usually ground into cotton seed meal. Qualities differing much waste fibre serve for manure.

Cotton Grass (*Eriophorum*) Genus of perennial, sedge-like herbs. Of about 12 species, spread over the north temperate regions, the common and the sheathing cotton sedges grow in bogs throughout Great Britain. The former bears tufts of white bristles which can be spun into thread and also used for stuffing pillows.

Cotton Wool Purified product of the cotton plant. Hairs of the cotton plant, when cleansed and pre-

pared in masses, form a fleecy wool of great absorbency and softness. Sterilised cotton wool is valuable in surgery.

Couch Grass Perennial grass with stony, creeping rootstock (*Agropyrum repens*). With stems growing to 4 ft high it is a troublesome weed on arable land. Introduced into N. America it sometimes serves there for forage. The root contains sugar. It somewhat resembles wheat and is also called quitch grass. A maritime ally, *A. junceum*, is a useful binder on sand dunes.

Coué Emile French chemist. Born at Troyes, Feb. 26, 1857, he became a chemist there. He devoted much time to studying how to cure illnesses by suggestion, his fundamental idea being that, if the patient believes himself to be getting better from an illness, he has taken an important step towards that end. Coué's ideas met with a good deal of success, and in 1910 he moved to Nancy, where he opened a clinic for their practice. He died at Nancy, July 2, 1926.

Cougar English spelling of Buffon's name for the American lion, *Felis concolor*. It is now usually known as the puma.

Cough A persistent cough should never be neglected, but its cause should be sought and treated. It may be an indication of serious ailments, such as bronchitis, tuberculous, pneumonia, etc. A cough from "cold on the chest" may be loosened by hot lemon drinks, ipacacuanha, etc. A throat cough will be soothed by glycerine and honey, but the throat condition itself should be seen to. (See under THROAT)

Patent cough mixtures should never be given to children nor to sufferers from indigestion.

COUGHING OF BLOOD—When bright red, frothy blood is coughed up in monthlies, consumption, heart disease, or laceration of the lungs from fractured ribs is indicated.

Treatment—Send for the doctor at once, and keep the patient on his side with the upper part of the body raised, maintain the utmost quiet, allow no talking, keep the windows open, give small pieces of ice to suck, loosen the collar, and place an ice bag on the chest with a thin layer of flannel beneath. Give no stimulants, but try to reassure the patient as much as possible.

Coulomb Charles Augustin De French physicist. Born at Angoulême 1736, he became a soldier, entering the engineers. In 1785 he published the result of his researches describing the torsion balance for verifying electrical and magnetic laws. He was appointed to revise the system of weights and measures at the Revolution and in 1802 he became an inspector of education. He died August 23, 1806.

His name is preserved in the coulomb, the unit used in describing quantities of electricity and equal to one tenth of the absolute electro-magnetic unit.

Coulsdon Village of Surrey. It is 15 m. from London, on the S. Ry. Near Earfthing Down and Cano Hill with its asylum. Coulsdon is part of the urban district of Purley.

Council (Latin *consilium*, consultation and counsel and *concilium*, effective action). Assemblies of persons selected to advise. A sovereign is advised by privy councils and cabinet councils. Associated with local government are county, city,

borough, district and parish councils, with education, the hohdomadal council at Oxford, the council of legal education, the medical council and many others. The word was used during and after the Great War for international meetings such as the supreme war council and the council of ambassadors. Today important councils are the council of the League of Nations and the Council of India.

Ecclesiastical councils for regulating matters of doctrine and discipline were held at Nicaea (325), Trent (1545-64), the Vatican (1869-70) and elsewhere. The free churches have councils on which all the bodies are represented.

Councillor Originally an alternative form of counsellor, one who gives counsel or advice. The use of the word has become restricted to the members of a town, county or district council elected by the ratepayers.

Countdown Town of Durham. It is 2 m from Bishop Auckland, on the L N E Ry. The chief industry is coal mining. Pop 6900.

Counsel Word used in England for a barrister when acting for a client. King's counsel are barristers who enjoy special privileges.

Counsellor Variant of the word councillor. Counsellors of state are appointed to carry on the government during the illness or absence of the sovereign. In Dec. 1929 when King George V. was seriously ill, six counsellors of state were appointed to act for him. They were the Queen, the Prince of Wales, the Duke of York, the Archbishop of Canterbury, the Prime Minister and the Lord Chancellor.

Count Title of nobility. Its Roman and early French use was for a companion or officer of a king. It was then used for large landholders and survives in the form comte in France and Italy. In Great Britain its equivalent is earl and in Germany graf. The wife of an earl is called a countess and the district over which he once ruled a county.

Counter In the sense of reckoning a round medallion used formerly in computation, now for keeping count in games. Tables for counting money or displaying and handing over goods are counters. So are apparatus recording revolutions or piston strokes in cotton factories, mining pumps or motor cars.

Counterpoint Art of adding one or more, independently interesting, to a given melodic part. Such added part is also styled a counterpoint to the given melody, which is called the *canto fermo*. Strict counterpoint requires the melodies to be combined without the use of unprepared discords.

Countersign Word, phrase or signal previously communicated to military guards as the password to be demanded of persons approaching legitimately. It is used to distinguish them from intruders or foes. In some armies the countersign is the sentry's response to the password.

Countess Title in the British peerage. Most of its holders are the wives of earls, but some are countesses in their own right. By customary law a Scottish earldom descends to a daughter if there are no sons, an English one only does so if such is laid down in the patent. In 1932 there were six countesses in their own right. See EARL.

Counting House Formerly the name of the department of a business house where the money taken and disbursed was counted in or counted out. It survives as the title of the department which keeps the ledgers.

Count-out Parliamentary term. Meetings of the House of Commons or of committees of the house need a quorum of 40. The speaker or chairman may at any time, on request, count the numbers of those present. Two minutes are allowed for additional members to assemble, if the second count reveals no quorum the sitting is adjourned.

Country Club Modern development of club life. They originated in the U S A and since the Great War several have been opened in England. They usually possess a golf course and facilities for tennis and other outdoor games. See CLUB.

Counts Term denoting in textile yarns and sewing thread the relation of weight to length. British cotton counts show the number of 840-yd hanks per lb, as marked on sewing thread reels. Weaving yarns from American and Egyptian cotton range normally from 32'-46' and 42'-62' respectively. Yorkshire woollen yarns count vds per oz. elsewhere drams per 1000 yd skein. Metric counts of fibre yarns and spun silk reckon on a metre-gramme unit, raw and thrown silk on weight in half-decigrammes of 450-metre skeins.

County Division of a country for purposes of local government. It means the country of a count, or in France, of a comte. The old English word is shire. England was divided into counties after the Norman Conquest and soon there were 40. Wales, Scotland and Ireland were divided later and the word was taken to the United States, Canada and other parts of the Empire. Wales has 12 counties, Scotland 33, and Ireland 32. Some counties, called counties palatine, had special privileges, Durham and Cheshire, for example.

County Council Body of persons established in every administrative county of England, Wales and Scotland by the Local Government Acts of 1888 and 1889. Each consists of councillors elected by the ratepayers who hold office for three years and of aldermen elected by the councillors for six years.

They are empowered to levy rates and to make by-laws. They have charge of education and main roads, and in 1930 they took over the duties formerly discharged by the Board of Guardians. County councils were set up in Ireland by an Act of 1898.

County Court In England and Wales a court of law for the trial of civil cases. County courts have nothing to do with the counties. In 1816 England and Wales, outside London, was divided into districts and in each of these a number of county courts were set up. A judge was appointed for each. He holds sittings in various towns in his district and hears cases in which £100 or less, is at stake. Most of them are cases of debt. He can also hear chancery cases in which the amount is not more than £500, and the examination and discharge of bankrupts is under his control.

For each court there is a registrar who hears minor cases, and a high bailiff to supervise the serving of writs, etc. The circuits are num-

bered and the judges are appointed by the Lord Chancellor. There is an appeal from their decisions to the high court. There are county courts in Northern Ireland.

Coupar Angus Burgh of Perthshire. It is on the River Isla, 16 m from Perth, on the L.N.E. Ry. It is a centre for visiting the beautiful district on the borders of Perthshire and Angus. Pop (1931) 1883.

Coup d'Etat Sudden change of government forcibly effected by ruler, army or populace. French examples occurred when Napoleon I suppressed the Directory, Nov 9, 1799, and Louis Napoleon, Prince President, broke up the National Assembly, Dec 2, 1851. Similar changes have characterised modern revolutions in Brazil, Germany, Portugal, Russia, Serbia, Spain and Spanish America.

Couperus Louis Marie Anne Dutch novelist. Born at The Hague, Jan 10, 1863, he made his reputation with a novel, *Eline Vere*. Other works followed, the titles under which they have been translated into English being *The Footsteps of Fate*, *The Mountain of Light*, *The Comedian* and, more important, the four books published as *Old People* and *The Things that Pass*, 1919. He died July 16, 1923.

Couplet Two lines of verse, rhymed together and expressing a complete thought, as

*Rebellion in this land shall lose his sway
Meeting the check of such another day*

Elizabethan dramatists often used the couplet to secure a pointed finish to a long period of blank verse. Dryden and Pope composed excellent couplets.

Courcelette Village of France. It is on the road from Bapaume to Albert and was the scene of fierce fighting during the latter stages of the Battle of the Somme. On Sept. 16, 1916, the Canadian troops attacked and took it. It was lost in March, 1918, when the Germans advanced, and not recovered until the following August. There is a memorial here to the Canadian dead.

Courier Messenger sent to carry and fetch letters or despatches. Postal services were organised by the Persians. King Cyrus in the 6th century, B.C. Augustus and Charlemagne made similar arrangements. Royal and diplomatic messages are conveyed by special couriers, called in Great Britain king's or foreign office messengers. Professional attendants who conduct tourists are called couriers.

Courland District of Latvia. It covers 10,435 sq m and its capital is Mitau. It has a coastline on the Gulf of Riga and here are its ports, Windau, Libau and others. Agriculture and fishing are the chief occupations. At the Reformation it began to be ruled by dukes, subject to the kings of Poland. This lasted until 1795, when Russia seized the land. In 1906 a revolt broke out.

Coursing Pursuit of hares by grey hounds. It is a very ancient pastime and a popular one in England. In each event two dogs, each held by a man called a slipper, compete against one another. When released they pursue the hare and earn points according to their skill in catching and

killing it. A modern development is the use of the electric hare.

There are many coursing clubs, notably that named after Altcar, in Lancashire, where the Waterloo Cup is decided every year. The controlling body in England is the National Coursing Club. Scotland has a club and there are similar bodies in Australia, New Zealand and elsewhere. The pedigrees of the dogs are in the greyhound stud book. See GREYHOUND RACING.

Court Word originally meaning a house, especially the king's house. It came to mean his followers and, as he was the nation's judge, was used for the place where law cases were tried. The court means the king and queen and their attendants, and so it is described as being wherever they are residing. Courts are ceremonies held by the king and queen several times during the London season. At these men and women are presented, and this is the accepted way of entering society. Each person must be presented by someone already presented and all must be approved by the Lord Chamberlain.

There are several kinds of law courts. The Supreme Court of the United States, the High Court of England, the Court of Session of Scotland, as well as county courts, police courts, courts of record, and others. Parliament is the High Court of Parliament. The Court of Arches is an ecclesiastical court.

Courtauld English family. Its founder was George Courtauld, an American who began business as a silk thrower at Braintree in Essex. The business grew under the direction of his son Samuel and the firm of S. Courtauld and Co. became known as manufacturers of crepe. Samuel Courtauld died March 21, 1881, and his descendants have since controlled the business. In the 20th century the firm added artificial silk to its activities, and soon became much the largest producer in the country. Known as Courtauld's Ltd., it became a limited company in 1913, and has factories in Manchester, Coventry, Braintree and elsewhere, as well as large interests in the United States and other foreign countries.

Court Circular Term used for the official record of the daily doings of the king and the other members of the royal family. It is prepared by a member of the staff of the lord chamberlain's department and is issued to the press every evening. In *The Times* and other papers it appears at the head of the social news.

Courtenay Name of a famous family. Of French origin, it took its name from the town of this name. A son of Louis VI married the heiress of the Courtenays, and from them descended Peter of Courtenay and other rulers of the Latin Empire of Constantinople. Another branch of the Courtenays settled in England and one of them married a daughter of the Earl of Devon. A later one, Hugh Courtenay, became Earl of Devon in 1336. The title is still held by the family, although before its revival in 1831 it was unused for nearly 300 years. More than once the Courtenays married into the royal family. William Courtenay, a son of the 2nd Earl of Devon was made Bishop of Hereford in 1370, Bishop of London in 1376 and Archbishop of Canterbury in 1381. He died July 31, 1396.

Courtesy Politeness, civility, consideration for the feelings of others, and literally behaviour suitable for a court.

COURTESY TITLES are titles which are only used by courtesy, not by right, by members of the families of peers. Their holders are not peers, nor do they sit in the House of Lords. The eldest son of a duke bears by courtesy his father's second title and the eldest son of a marquess likewise bears his father's second title, earl or viscount, as the case may be. Thus, the eldest son of the Duke of Marlborough is the Marquess of Blandford. The other sons and the daughters of a duke or marquess are known as lord or lady before the Christian name and family surname. The eldest son of an earl bears his father's second title viscount or baron, and the daughters use the word lady before the name. The younger sons of earls, viscounts and barons and the daughters of viscounts and barons use the word Hon (honourable) before the Christian name.

Court Martial Court for trying soldiers, sailors and airmen, both officers and men, for offences incidental to their profession. A court is composed of officers and the procedure is much more direct than in the civil courts. There is no jury and no appeal from the decisions. Military courts martial are either regimental, district or general. Officers can only be tried by a general court martial, which can inflict sentence of death. The others deal with minor offences. The accused can be represented by an officer or a barrister, the prosecution is usually entrusted to another officer. In the army courts martial are controlled by the Judge Advocate-General, in the navy by the Judge Advocate of the Fleet, the former also acts for the air force.

Courtrai Town of Belgium. It is situated on the Lys, 26 m from Ghent. It has some buildings reminiscent of the time when it was one of the country's great industrial centres. These include the Hotel de Ville, the belfry and the bridge across the river with two massive towers. S. Margaret's, S. Michael's and Notre Dame are the chief churches. The town has some textile manufactures. Pop (1931) 38,979.

The Battle of Courtrai was fought July 11, 1302. The Flemings defeated the French Army and after the battle collected the spurs of the dead knights, 700 in number, and hung them in the church.

Cousin Relative who is the son or daughter of an uncle or aunt. Such are called first cousins. Second cousins are the children of first cousins. Consins once removed are the sons or daughters of a consin. At one time cousin was used in a general sense for any relative more distant than a brother or sister.

Coutts Thomas. British banker. Born Sept 7 1735, he became wealthy and was elected Lord Provost of Edinburgh. He went to London and worked for a goldsmith. Later he became a partner and the firm became known as Coutts and Co. Thomas Coutts married Harriot Mellon, the actress. She inherited his great wealth and from her it passed to the Baroness Burdett-Coutts. He died Feb 24, 1822.

Covenant Mutual compact. Agreements, sometimes made binding by ritual oaths, occur in the Bible between men or nations, and between God and His chosen people, the Old and New Covenants being called in English and other versions the Old and New Testaments. The National Covenant of 1551 maintaining the Presbyterian doctrine and the

Solemn League and Covenant, 1643, concern the Scottish Covenanters. In the Treaty of Versailles, 1919, the covenant created the League of Nations.

In English law covenants are agreements under seal between two or more covenanters such as a covenant to keep a house in repair or to refrain from starting in business within a certain area. Verbal stipulations are not legal covenants, no action for breach lies.

Covenanters Name given in Scotland to those who signed the National Covenant to uphold the Presbyterian religion in 1581, and the Solemn League and Covenant of 1643. In 1660, when the Established Church was restored, many of the Covenanters refused to accept its authority and formed congregations of their own. These are the Covenanters of history. Their meetings were broken up by soldiers and there was something like civil war in Galloway, their stronghold. Directed by John Graham of Claverhouse, the harrying of the Covenanters continued until the fall of the Stuarts in 1688. Galloway is full of memories and stories of the Covenanters.

Covent Garden District of London. It lies north of the Strand and east of Trafalgar Square. In olden times it was the convent garden, the convent being the Abbey of Westminster. After the monasteries were dissolved it was given to the Earl of Bedford, and the Russells retained it until 1913, when the Duke of Bedford sold it.

The principal building on the estate is the market, the chief London market for fruit and vegetables. It was opened in 1661. Near is Covent Garden Theatre, the leading English opera house. Twice burned down, the existing building dates from 1858.

Coventry City and market town of Warwickshire. It is 94 m from London on the LMS Ry. From the 12th century to 1661 it had a bishop. The bishopric was re-founded in 1918. The city is associated with Lady Godiva. To send a person to Coventry, or to ignore him, refers to the harsh way in which prisoners here were treated by the Parliamentarians during the Civil War. In the 14th century Coventry was one of the richest places in England, and several parliaments were held here, after a period of decline it became in the 19th century a busy manufacturing centre. Motor-cars, cycles, sewing machines, watches and artificial silk are among its products and there are engineering works and dyeworks.

The chief buildings are the three old churches, called the three spires. S. Michael's, now the cathedral, S. John's and Holy Trinity. The Guildhall is an interesting old building, the Council House is a modern one. Ford's, Bond's and Bablake's are three old hospitals and two gates are remains of the city's fortifications. Pop (1931) 167,046.

Coventry Earl of. English title borne by the family of Coventry since 1697. In 1628 Sir Thomas Coventry, the Lord Keeper, was made a baron. The title passed to his descendants, and in 1697 the 5th baron was made an earl. In 1797 the title passed to another branch of the family, and in 1843 it came to George William Coventry. (1838-1930) as the 9th earl. He held the title until his death in March, 1930. The earl's seat is Croome Court, Worcester. His eldest son is called Viscount Deerhurst.

Coverdale Milos English divine Born in Yorkshire, he was ordained in 1514 and joined a religious order in Cambridge. He became a Lutheran and went abroad, where he worked at translating the Bible into English. This was printed in Zürich and was the first English translation. Coverdale then superintended the printing of another translation in Paris and London, and was largely responsible for both the English Bibles associated with the name of Crammer. He died in Feb 1568.

Coverley Sir Roger de Fictitious character created by Richard Steele. He belonged to the club professing to write the *Spectator*, which appeared every week day for 515 days in 1711-12. Steele contributed 231 and Joseph Addison 274 numbers. Addison developed the character into an amiable English gentleman. The name denotes also a country dance.

Cowal Mountainous district in Argyllshire, Scotland. Bounded by Loch Long and the Firth of Clyde and by Loch Tyne, it is 40 m long and 14 m broad, and encloses Lochs Esk and Goll. It is a favourite holiday resort, containing the town of Dunoon.

Coward Noel British dramatist. Born at Teddington, Dec 16, 1899, he was educated privately. In 1910 he first appeared on the stage. Later he began to write and in a few years was regarded as one of the foremost of English dramatists. Among his plays are *The Young Idea*, *Easy Virtue*, *Home Chat*, *Savoca*, *Bitter Sweet*, *Cavalcade*, *Words and Music* and *Theatre Royal*.

Cowbane Perennial umbelliferous herb. With a poisonous rootstock it is native to the northern hemisphere. The European *Oxycula virosa*, common in watery places in Britain, has stout, furrowed stems, much divided leaves and compound many rayed umbels with minute white flowers. The American *O. maculata* is the spotted cowbane. It is also called the water hemlock.

Cowberry Evergreen shrub of the natural order *Ericaceae*. It is a native of N Europe, N America and N Africa. Its stems are wiry and twisted with leathery leaves and pink bell-shaped flowers. Its berries are red and acid in flavour.

Cow Bird American bird which lives on insects, particularly parasites found on cows. Its habits resemble those of the cuckoo. The females, who are far outnumbered by the males, lay their eggs in other birds' nests.

Cowbit Village of Lincolnshire. It is 3 m from Spalding and has an old church, St Mary's. Near is Cowbit Wash, a stretch of fenland, about 10 m long and a mile wide. During the winter it is usually frozen over and races for the skating championships take place on it.

Cowbridge Borough and market town of Glamorganshire. An old town, it stands on the River Thaw, 12 m from Cardiff and 169 m from London on the G W Rly. Pop (1931) 1018.

Cow Catcher Triangular frame shaped like a wedge and attached to railway locomotives to remove animals and other obstacles from the track.

Cowdenbeath Burgh of Fife. It is 23 m from Edinburgh on the L M S Rly. Coal mining is the chief industry. Pop (1931) 12 731.

Cowdray Viscount English title borne by the family of Pearson. Weetman Dickinson Pearson was born July 15, 1856, and entered business at an early age. He was soon at the head of the firm of S Pearson & Son, which undertook large contracts in England and S America. He was Liberal M P for Colchester, 1895-1910, being made a baron on his retirement. He had been a baronet since 1894. In 1917, when he was chairman of the air board, he was made a Viscount. He died May 1, 1927.

Cowdray was succeeded as 2nd viscount by his son Weetman Harold Millor Pearson (1882-1933), who had been Liberal M P for the Eye division of Suffolk, 1906-18. The third viscount, son of the last named, succeeded in 1933.

Cowen Joseph English journalist and politician. Born July 9, 1831, at Blaydon-on-Tyne, in 1874 he succeeded his father as M P for Newcastle. He combined advanced democratic opinions with a belief in a strong foreign policy and was soon at variance with the radicals. In 1886 he left Parliament, editing the papers he had founded or acquired, the *Northern Tribune* and the *Newcastle Chronicle* until his death on Feb 18, 1900.

Cowen Sir Frederic Hymen English conductor and composer. He was born at Kingston, Jamaica, Jan 28, 1852, and came to England at the age of four. He studied music in London and Leipzig. The success of his first symphony and piano concerto in London in 1869 began his career as a prolific and popular composer. Cowen has composed music of every kind and has conducted the principal British orchestras. He was knighted in 1911. He died Oct. 3, 1935.

Cowes Seaport and urban district of the Isle of Wight. It stands on the Medina River, which divides it into two parts, East and West, and is on the S Rly. It is 92 m from London and has regular steamer services with Portsmouth. Cowes is the headquarters of the Royal Yacht Squadron and its regatta, held every August, is the chief event in the yachting world. Its industries include ship building, and it has become a centre of the aircraft industry. Pop (1931) 10,179.

East Cowes is a separate urban district. Pop (1931) 4595.

Cowl Monastic garment fastened behind the neck and capable of being drawn over the head or thrown back. The term also denotes chimney coverings turning with the wind to regulate the smoke, the coverings of soil pipes and ventilating shafts and aero-engine metal casings.

Cowley District of Oxford. It is separated by Cowley Marsh from the villages of Church Cowley and Temple Cowley, which are outside the city. Here are the extensive motor works erected by Sir W R Morris. An interesting building is the Chapel of St Bartholomew's Hospital, once a home for lepers.

The COWLEY FATHERS or the Society of St John the Evangelist is a missionary order in the Church of England. Founded in 1865, its headquarters are at Cowley. Its London house at 22 Great College St., Westminster, and it has branches abroad.

Cowley Abraham English poet and essayist. Born in 1618 in London, he was educated at Westminster School and Trinity College Cambridge. In 1656 he became a doctor of medicine. He died at

wrote *Poetical Blossoms*. In 1647 he published his love poems, *The Mistress*, and in 1656 his *Pindaric Odes*. His treatise, *A Proposition for the Advancement of Experimental Philosophy*, led to the formation of the Royal Society.

Cow Parsnip (*Heracleum*) Biennial or perennial herb of the umbelliferous order. It is native to the north temperate zone. The British species, *H. sphondylium*, has stout, hollow stems, with broadly sheathed stalks to the leaves. Large compound umbels bear white or pink flowers and round, flattened seeds.

Cowper Earl. English title borne from 1718 to 1905 by the family of Cowper. The founder of the family was Sir William Cowper, a Kentish baronet, whose son, another William Cowper, became an M.P. and in 1705 was made Lord Keeper. In 1706 he was created a baron, and in 1707 he became the first Lord Chancellor of Great Britain. He remained in office until 1710 and was again Lord Chancellor, 1714-18. In 1718 he was made an earl and he died Oct. 10, 1723.

The 5th earl married a daughter of Lord Melbourne. He died in 1837 and his widow married Lord Palmerston. The earl left two sons, the elder became the 6th earl and the younger was the politician, W. F. Cowper-Temple. Francis Thomas, the 7th earl, was Lord Lieutenant of Ireland, 1880-82. The earldom became extinct on his death, but his baronies passed to his nephew, Auberon T. Herbert, who became Baron Lucas and inherited his seat, Panshanger, in Hertfordshire.

Cowper William. English poet. He was born at Great Berkhamsted, Nov. 15, 1731, he became a harrister. For a time (1763-65) he was an inmate of an asylum at St. Albans and his recovery was never complete. He lived at Huntingdon with the Unwin family and then at Olney, where he became intimate with Rev. John Newton. Later he received a pension from the State and his last years were passed at Weston and East Dereham where he died April 25, 1800.

Cowper's literary work began with the hymns he wrote with Newton. Mrs. Unwin persuaded him to write poems to occupy his tormented mind and a volume of them appeared in 1782. Another friend, Lady Austen told him the story of John Gilpin, the subject of one of his most popular poems, and influenced him to write his greatest work, *The Task*. Nearly all his poems are marked by deep religious feeling and in them is a genuine love of nature.

Cowper Temple Clause

Clause in the Education Act of 1870. It permitted parents to withdraw their children from school during religious instruction, if they wished to do so. It was named after W. F. Cowper-Temple, later Lord Mount-Temple.

Cowry Shell of a univalve mollusc of the family *Cypræidae*. There are about 200 species. One (*Cypræa moneta*) is abundant in the Indian and Pacific Oceans and is used for money and decoration in parts of Asia and Africa. The cowry was an object of veneration in the Aegean Islands, about 2000 B.C., and then used in trading. It was used for the same purpose in China.

Cowslip Perennial herb of the primrose order (*Primula veris*). It is native to Europe and W. Asia, and is widespread in Britain, but rare in Scotland. It bears stalked umbels of drooping flowers with buff-

yellow funnel-shaped corolla, and is thus distinguished from the yellow primrose, an intermediate form is called the oxlip.

Cox David. English painter. Born in Birmingham, April 29, 1783, he began his career by painting scenes for the theatres. He died June 7, 1859. Cox painted both in oils and water colours, and some of his best works were done when on tour in N. Wales. He produced a great number of sketches and some are in the Victoria and Albert Museum, London.

Coyote N. American prairie wolf (*Canis latrans*). Ranging from Canada to Guatemala, it is smaller than the gray or timber wolf, with a hairier coat and a bushier tail. Its length averages 40 in. It burrows in the plains, hunting jack rabbits and chipmunks.

Coypu S. American aquatic rodent (*Myopotamus coypus*). It is one of the largest members of the order, being about 2 ft. long. Its stiff, harsh fur is now used under the name nutria for women's fur garments.

Crab Popular name for all stalk-eyed, ten-footed, short-tailed crustaceans. They are distinguished from the long-tailed sub-order, such as lobsters, by having the abdomen, or tail, tucked under the thorax. The first pair of limbs have pincer-like claws, the others have joints permitting progression sideways. The common European edible crab is *Cancer pagurus*, the American Atlantic hino crab, *Callinectes hastatus*, is called the soft-shelled crab when moulting. Hermit crabs live in discarded molluscan shells, sometimes in the tropics far inland.

Crab Apple Small tree of the rose order. A native of Europe and W. Asia (*Pyrus malus*), its few pink-tinged white flowers bear yellow fruit, acid in taste, but used in jellies and preserves. It is an ancestor of the cultivated varieties of apple.

Crabbe George. English poet. Born at Aldeburgh, Dec. 24, 1754, he took up surgery, but abandoned it. With the publication of *The Library*, 1781, Crabbe's worst days were over. He was ordained and became chaplain to the Duke of Rutland at Belvoir. In 1783 he married his old love, Sarah Elm. Leaving Belvoir in 1785, he held various livings, and in 1813 became Rector of Trowbridge. There he died Feb. 3, 1832.

Besides *The Library* Crabbe's poems include *The Village*, 1783, *The Newspaper*, 1785, *Tales*, 1812, and *Tales of the Hall*, 1819. They show his sympathy with poverty and want, as well as his love of nature.

Cracow Former republic of Europe. It was created in 1815 and consisted of the city of Cracow and its suburbs. The Poles, for whom it was made, regarded it as too small and after two risings it was suppressed in 1846. It then became, as it had been before 1815, part of Austria.

Cracow City of Poland. It stands on the Vistula, 186 m. from Warsaw, and is a railway junction. It has many interesting buildings, some dating from the time when it was the country's capital. Among these are the cathedral, where the kings were crowned, and the castle, now a national museum. The cloth hall is one of several museums. The university dates from 1364.

Cracow was the capital of Poland from about 1300 to 1610. From 1846 to 1918 it was an Austrian city, as it had been from the partition of Poland to 1815. Owing to its situation it has long been a fortress, and since

1919 the Poles have made it a military centre. It was attacked by the Russians in Dec., 1914, but the attack failed. Pop (1931) 221,260

Cradley Heath District of Staffordshire. It is in the Black Country, 121 m from London and 10 from Birmingham, on the G.W. Ry. The making of chains is the principal industry. Pop 10,400

Cradoock Town of Cape Province S. Africa. It stands on the Fish River, 180 m by railway from Port Elizabeth. It is a business centre and has a town hall, and several churches, as well as a hospital, training college and public park. Pop 7000

Cradoock Sir Christopher George Francis Maurice. British sailor. A Yorkshireman, he was born July 2, 1862 and entered the navy in 1876. He was in the Sudan in 1881 and with the naval brigade in China in 1900. He was knighted in 1912. When the Great War broke out he was sent with a small squadron to S. American waters. On Nov. 1, 1914, this was destroyed by the Germans and Cradoock was among the killed, going down in his flagship, the *Good Hope*.

Craig Edward Gordon. English actor. A son of Ellen Terry, he was born Jan. 16, 1872, and educated at Bradford College and in Germany. He acted under Henry Irving and then became a producer and made his reputation by improving the stage and its scenery. In 1913 he made his home in Florence where he founded a school for studying the art of the theatre, and issued a paper *The Mask*. His ideas are set out in *The Art of the Theatre*, 1905 and 1911, *Towards a New Theatre*, 1913, *The Theatre Advancing*, 1921, *Scene*, 1923, and *A Production*, 1930. His *Life of Irving* appeared in 1930, and his tribute to *Ellen Terry—the Actress and the Mother* in 1932.

Craigavon Viscount. Irish statesman. Born Jan. 8, 1871, James Craig had a successful business career in Belfast before becoming a Unionist M.P. in 1906. He served in the S. African War and the Great War. In 1910 he was made Treasurer of the Household, in 1919 Secretary to the Ministry of Pensions, in 1920, Financial Secretary to the Admiralty. He left British politics to lead the Ulster Unionists and in 1921 became the first prime minister of N. Ireland. Made a baronet in 1918 and a viscount in 1927, he was still Prime Minister in 1936.

Craigmyle Baron. Scottish lawyer and politician. Thomas Shaw was born at Dunfermline May 23, 1850, and after a distinguished career at the University of Edinburgh became an advocate. In 1892 he entered the House of Commons as Liberal M.P. for the Hawick district, and in 1894-95 he was Solicitor General for Scotland. In 1905 he was made Lord Advocate, but in 1909 he left politics to become a Lord of Appeal and a life peer as Lord Shaw of Dunfermline. He retired in 1929 when he was made an ordinary peer as Baron Craigmyle, the name of his Aberdeen-shire home. His writings include *Letters to Isabel Darnley A Historie* and *Leicester A Historic* (1931).

His son, Alexander Shaw (born 1883) was in Parliament as a Liberal from 1915 to 1923. He then became prominent in the shipping world, becoming a director of the P. and O. and in 1927 President of the Chamber of Shipping. He is also a director of the Bank of England.

In 1932 he succeeded his father in law, the Earl of Incheape, as head of the P. and O.

Craik Mrs. English novelist. Dinah Maria Mulock was born at Stoke on Trent, April 29, 1832. After writing various stories for children, she published her first novel, *The Orlines*, in 1849. This was followed by others, including *Oliver*, *The Head of the Family* and *Agatha's Husband*, but the publication of *John Halifax, Gentleman*, in 1856, established her reputation. Other writings included *Sermons out of Church*, essays, juvenile fiction, and a collection of poems. In 1864 she became the wife of Mr. G. L. Craik, a partner in the publishing firm of Macmillan and Co. She died at Shortlands, Kent, Oct. 12, 1887.

Crake Various species of short-hilled stout bodied birds of the rail family. The spotted crake, *Porzana porzana*, breeds throughout Britain, laying red spotted greenish brown eggs in nests among the reeds. Two other species, the Little Crake and Ballon's Crake, are rare stragglers from N. Africa, where all crakes winter. See CORNORAKE.

Cramlington Urban district of Northumberland. It is 10 m from Newcastle on the L.N.E. Ry. Coal mining is the chief industry. The Newcastle Aero Club has an aerodrome here. Pop (1931) 8238.

Cramp Painful spasmodic muscular contraction. Usually occurring in the legs, it is caused by stomachic derangement, rheumatism, cold, fatigue and pregnancy.

Stretch the muscles affected as much as possible in a contrary direction, and rub the part vigorously with the hand or with a rough towel. If this fails, apply external heat as well. Sufferers from cramp should be very careful when sea-bathing, as a sudden attack is often dangerous to life. Since the condition is usually of rheumatic origin, exposure to damp and chill should be avoided.

For long it was believed that cramp could be cured by touching a cramp ring, a ring which had been blessed by the king. Edward the Confessor had such a ring. It was brought from Jerusalem and was given by him to the Abbot of Westminster. Each Good Friday until Mary's reign, the English sovereigns blessed and distributed cramp rings to the people.

Cran Measure by which herrings are sold. It consists of 37½ imperial gallons and usually about 750 fish. It is the usual measure in Scotland, and must be used in those parts in England and Wales to which the Cran Measures Act of 1908 applies.

Cranberry (*Oxycoccus*) Genus of creeping evergreen shrubs of the heath order. They are native to the north temperate regions. The European *O. palustris* common in British peat bogs, has rose-coloured flowers bearing dark red berries. They are exported from Sweden. The larger American *O. macrocarpus*, cultivated in Massachusetts and New Jersey, is exported to Great Britain and Europe.

Cranborne Village of Dorset. In the north of the county, it is 37 m from Dorchester. There is a fine old church. The manor house is the property of the Marquess of Salisbury, whose oldest son is called Viscount Cranborne.

Cranborne Chase which has now disappeared, was at one time one of the largest forests in England.

Cranbrook Town of Kent. It stands on the Cran, 45 m from London, on the S Rly. There is a fine parish church with a detached baptistery and an old grammar school. At one time Cranbrook was a centre of the cloth manufacture and there is in the town an old building called the cloth hall. Pop (1931), 3829.

The title of Earl of Cranbrook has been borne since 1892 by the family of Gathorne Hardy. Gathorne Hardy (1814-1906), son of a wealthy ironmaster, entered Parliament as a Conservative in 1856. He was Home Secretary in 1867, Secretary for War, 1874-78, Secretary for India, 1878-80, and Lord President of the Council 1885 and 1886-92. In 1878 he was made a viscount, and in 1892 an earl. He died Oct. 30, 1906, and was succeeded by his son. In 1915 the title came to John David Gathorne-Hardy as 4th earl.

Crane Family of birds. They are found everywhere except in S. America. With long necks and short tails, they utter trumpeting calls in flight and at rest. The European *grus canerea* was formerly bred in England, but is now a rarity. The white crane winters in India. Two African species are crested. The birds appear to walk on stilts, so long and slender are their legs.

Crane Machine for lifting weights. They are rotary, non-rotary, fixed or locomotive, and may be actuated by hand or worked by steam, hydraulic, pneumatic or electric power. They may comprise jibs movable on central pivots, depositing weights at any point within range. Bridge cranes, or horizontal girders bearing travelling carriages, are supported on wheeled trucks.

Crane Walter. English artist. Born in Liverpool, Aug. 15, 1845, he was the son of Thomas Crane, a portrait painter. He studied art and made his name by the illustrations, imaginative in a distinctive way which he drew for books. Some of these were written by himself, one being *The Baby's Opera*. He also painted, and his "Renaissance of Venus" is in the Tate Gallery, London. A keen craftsman, Crane became associated with William Morris, designed decorations for the home and helped to found the Arts and Crafts Society. In 1892 he was made Art Director at Manchester, and in 1898 principal of the Royal College of Art at South Kensington. In later life he became an active Socialist, and he died at Horsham, March 14, 1915.

Crane's Bill Popular name of eleven species of *geranium*. Natives of Britain, they are distributed throughout the north temperate regions. They are distinguishable from the *pelargonium* in having regular flowers and no spurred sepals, and from the three British species of stork's-bill, *erodium*, in having ten, instead of five, fertile stamens.

Craniometry Measurement of skulls especially in man and anthropoid apes. In conjunction with other parts of the skeleton, craniometric statistics are important for studying ancient and modern racial types and relationships, as well as the comparative anatomy of anthropoids.

Crank In mechanics, a bent or vertical arm attached to or projecting from an axis for changing rectilinear, reciprocating motion into rotary motion.

Cranleigh Town of Surrey. It is 36 m from London on the S. Rly.

There is a public school for 360 boys, founded in 1863, also an old church. Pop. 3750.

Cranmer Thomas. English prelate. Born at Aslockton, Nottinghamshire, July 2, 1489, he was educated at Jesus College, Cambridge. In 1509 he attracted the notice of Henry VIII by suggesting that the case of his marriage with Catharine should be referred to the universities of Europe. In 1533 he was made Archbishop of Canterbury. He did all that the king required in securing his successive divorces and marriages, and in rejecting the authority of the Pope, at the same time he was instrumental in the burning of heretics and in introducing into England the ideas of the reformers.

During the reign of Edward VI Cranmer introduced the two prayer books and made other changes. With Mary's accession in 1553 his power ended. He had favoured the cause of Lady Jane Grey, but his hostile attitude towards the queen's mother was also remembered. He was accused of treason, sentenced to death and burned, March 21, 1556.

Cranmere Pool Small sheet of water in the centre of Dartmoor. Reputed to be the loneliest spot in England, it can be reached from Chagford. In dry seasons it almost disappears. The River Dart rises here.

Cranwell Village of Lincolnshire. It is 4 m from Sleaford and has an old and interesting church. During the Great War there was an aerodrome here, and the cadet college of the Royal Air Force was founded here in 1920.

Crape (French *crêpe*, from Latin *crispus*, curling). Silk gauze fabric of crimped appearance. The soft Oriental crape, either white or coloured, is used for trimmings and shawls. It is made of raw silk (silk in the gum) with a twisted weft. When boiled the gum is freed and the weft untwists. This gives the wave or crimp.

Crashaw Richard. English poet. Born about 1613, he was educated at Charterhouse and Cambridge. He went to France, became a Roman Catholic and died in 1649. Crashaw wrote poems both in Latin and English, the latter in a volume called *Steps to the Temple*.

Crassus Marcus Licinius. Roman general and statesman. He was surnamed Dives, from the wealth acquired by Sulla's favour and the proscriptions. He was consul with Pompey, and in 60, with him and Caesar, he formed the so-called first triumvirate. In 54 B.C. he obtained the province of Syria, and was appointed to conduct a campaign against the Parthians. In 53 he was completely defeated in Mesopotamia by the Parthian generals, and treacherously murdered.

Crater Basin-shaped orifice of a volcanic duct. It is so called because of its resemblance to a cup. Through it erupted material reaches the surface. In some instances ancient craters have been filled with water, forming crater lakes. That of the dormant Mexican Popocatepetl, 17,900 ft high, is 2000 ft. by 1300 ft., and 1700 ft. deep.

Cratinus Athenian comic poet. His vigorous satiro, directed against Pericles and others, founded a new poetical style. Of 21 comedies attributed to him he gained the prize for nine. *The Wine Flask* was regarded as superior to *The Clouds* of Aristophanes. Cratinus lived in the 5th century B.C., dying in 423, when 97.

Cravat Kind of neckerchief worn by men In the 17th century Louis XIV of France had a regiment of cravats in his service These men wore scarves of a peculiar shape These scarves, made of linen or muslin, became fashionable in France and then in England Later the word was used for any kind of neckerchief

Craven District of Yorkshire In the West Riding, it is a moorland area around Skipton, where there is a Craven Museum The Craven Hunt is in Berkshire

The title of Earl of Craven has been borne since 1633, except during the years 1697 to 1801, by the family of Craven Sir William Craven won some reputation by the services he rendered to Elizabeth, Queen of Bohemia, the daughter of James I In 1633 he was made an earl, but the title became extinct on his death, April 9, 1697 The barony, however, created in 1627, passed to a relation In 1801 William, the 7th baron, was made an earl The earl's seat is Coombe Abbey, Warwickshire, and his eldest son is called Viscount Uffington

Elizabeth, wife of the 6th Baron Craven, was a lady of note Born in 1750, a daughter of the Earl of Berkeley, she married Lord Craven in 1767, and after his death a German margrave She wrote some plays and acted in one or two of them She died at Naples, Jan 13, 1828, leaving some *Memoirs*

Craven Arms Village of Shropshire It is 182 m from London The lines of the LMS and GWR Rlys meet here

Crawford Earl of Scottish title borne by the family of Lindsay Sir David Lindsay, who married a daughter of Robert II, was made earl in 1398 Most of the first 22 earls took some part, often a prominent one, in the affairs of Scotland In 1808 on the death of the 22nd earl, the title was unused for 40 years, but in 1848 it was given by the House of Lords to James Lindsay, Earl of Balcarres, a title dating from 1651 He and his successors have been known as Earls of Crawford and Balcarres

In 1913 David Alexander Lindsay became 27th Earl of Crawford and 9th Earl of Balcarres As Lord Balcarres he had been a Unionist M.P. since 1895, and between then and 1922 he was Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works and Minister of Transport He is known also as a writer on art. The earl ranks as the premier earl of Scotland His seat is Haigh Hall, Wigan, and his eldest son is called Lord Balmiel

Crawford Francis Marion American novelist. Born in Italy, Aug 2 1854, the son of an American sculptor, Thomas Crawford (1814-57), he was educated at Concord, Cambridge and Heidelberg His first novel was *Mr Isaacs*, 1882, and other successes were *A Roman Singer*, 1884, *Saracinesca*, 1887, *Mario's Crucifix*, 1887, *A Cigarette Maker's Romance*, 1890, *The Ralstones*, 1895, and *The Heart of Rome*, 1903 He died at Serranto April 9, 1909

Crawley Town of Sussex It is 7 m from Horsham and 31 from London on the S Rly It is a noted stopping place on the road from London to Brighton and its inn, the George, is one of the most famous in England Pop 4400

Another Crawley is a village of Hampshire It is 5 m from Winchester and is famous as the original of the Queen's Crawley of the *Anty Fair* Crawley Court is the principal

residence There is an old church and the Dover House is a picturesque building

Cray River of Kent A tributary of the Darent, it is 8 m. long It gives its name to a series of Kentish villages, now residential suburbs of London They are Feets Cray, St Paul Cray, and St Mary Cray

Crayfish Name of several long tailed freshwater crustaceans allied to lobsters Those of the northern and southern hemispheres represent different families The British *astacus pallipes* is long, greenish brown above and yellowish brown beneath They are night feeders, burrowing under stone during the day The larger *A. fluminalis*, extending from France to Russia, is the most esteemed for the table

Crayford Town of Kent It stands on the Cray, 16 m from London, on the S Rly There is a beautiful old church Here in 457 Hengist and Horsa defeated the Britons in a battle in which Horsa was slain Pop 6200

Cream Rich surface of milk which has been allowed to stand for a time Its chief constituents are water and butter fat. It can be raised by standing the milk in shallow vessels, or by the use of separators It abounds in vitamins and is therefore highly nutritious

DEVONSHIRE CREAM, or clotted cream, is prepared in a special way, so as to cause the fat to rise quickly and completely It may contain as much as 75 per cent. of fat, but has much less sugar than ordinary cream, making it suitable for sufferers from diabetes

In 1929 an Act was passed making it necessary to mark artificial cream when offered for sale in order that it should not be confused with natural cream. In 1931 the courts decided that the fillings of cakes, not made from dairy cream, may lawfully be described as cream, as to such foods the Act does not apply

Cream of Tartar Acid tartrate of potassium It is expressed by the formula $\text{KHC}_2\text{H}_3\text{O}_6$. A deposit of argol, it is used in the making of ginger beer and baking powder

Creasy Sir Edward Shepherd English historian. Born at Bexley, Sept. 12, 1812, he was educated at Eton and King's College, Cambridge In 1830 he became a barrister and in 1840 Professor of Modern History in the University of London He died Jan. 27, 1878 Creasy is known by his book, *Fifteen Decisive Battles of the World*, first published in 1851

Crèche Institution where working mothers and others may leave little children The first crèche was instituted in Paris in 1844 and was so successful in checking infantile mortality and disease that other towns, German, English, and French, established similar nurseries Some are conducted by local authorities others by churches and philanthropic agencies

Crécy Village of France in the department of Somme 12 m from Abbeville The wooded district called the Forest of Crécy is famous for the battle fought on Aug 26 1346, between the English and the French Edward III, and his son, the Black Prince, were attacked by the French, whose repeated assaults failed The losses were heavy, but the exact totals are unknown The story of the fight is told by Froissart

Credence (Lat *credentia*, a sideboard) In churches a small table placed near the altar It is used for the vessels

that hold the water and other accessories for use at the celebration of the Mass or Holy Communion

Credit Generally, a reliance on the truth or good faith of a statement or deed. Commercially the word is applied to the time given for payment of money owed, and its use has widened to connote that system of borrowing and lending which depends upon the lender's faith in the borrower's honesty, and is the basis of modern commerce. Credit functions chiefly through the use of credit instruments, *e.g.*, cheques, bills and notes, which pass from hand to hand for value, and facilitate trade.

Credit banks are banks which exist to advance money to suitable clients, often on the security of agricultural produce.

Crediton Market town and urban district of Devonshire. It stands on the Creedy, 8 m from Exeter and 179 from London, on the S. Ry. For a short time in the 11th century it was the seat of a bishop, and it now gives its name to a suffragan bishop in the Diocese of Exeter. Pop (1931) 3490.

Cree Canadian-Indian tribe of Algonkin stock. Formerly ranging the forests of Athabasca, and the prairies of Saskatchewan, they are now peaceable fur traders, with much white admixture, especially in Saskatchewan. They number under 18,000.

Creed Concise expression of a religious faith. The chief creed of Christendom is the Apostles' Creed, which is accepted by the Roman, Greek and Anglican Churches. The Nicene, also accepted by some churches, is an elaboration of the Apostles' Creed. Both are in the Anglican Prayer Book and the Apostles' Creed is said at both morning and evening prayer. The Athanasian Creed, less generally accepted, but also in the Prayer Book, was the work of S. Athanasius.

Crefeld Town of Germany. It stands near the Rhine, 32 m from Cologne. Its importance dates from the 17th century, when religious persecution drove to it Calvinists from Berg and Julich who introduced the manufacture of linen. With the introduction from Holland of the silk industry in the next century, the town rapidly became prosperous, and it is now famous for its silk and velvet manufactures. It also produces a great quantity of engineering products and chemicals. Crefeld is an important railway junction. Pop (1930) 159,000.

Creighton Mandell. English prelate. Born at Carlisle July 5, 1813, he was educated at Durham School and at Merton College, Oxford. After working as a tutor at Oxford, he became, in 1875, Vicar of Embleton, Northumberland, and there he began to write his *History of the Papacy*. In 1885 he went to Cambridge as Professor of Ecclesiastical History, and in 1886 he became editor of the *English Historical Review*. In 1891 Creighton was made Bishop of Peterborough, and in 1897 was transferred to London. He remained there until his death, Jan 14, 1901. Creighton was one of the most prominent prelates of the day. His fame rests, however, upon his *History of the Papacy* during the Reformation and afterwards, altogether eleven volumes, his *Queen Elizabeth* and other writings. His *Life and Letters* appeared in 1904.

Cremation Burning of human corpses as an alternative to burial. It was practised by many ancient peoples in

Asia and Europe, but was forbidden by the Christian Church owing to the belief in the resurrection of the body. In the 19th century it was revived in Europe, and in 1874 a cremation society was formed in England. Sir Henry Thompson did a good deal to discover a satisfactory method of disposing of dead bodies, and in 1885 the first cremation took place at Woking. Before a body can be cremated, two medical certificates must be obtained and other formalities complied with.

CREMATORIA, or places for burning the bodies, have been erected at Woking, Golder's Green, Ilford, Norwood, Manchester, Leicester, Ipswich, Glasgow, Sheffield, Leeds, Hull and other places. There are many crematoria in Germany, the United States and other countries. About 40,000 bodies have been cremated in Great Britain. Attached to a crematorium is a columbarium where the ashes, having been placed in urns, are kept.

Cremona City of Italy. It stands on the Po, 55 m from Milan, and is famous for its cathedral which has beautiful internal decoration, and a marble front. Near are the baptistery and a bell tower, nearly 400 ft high. Some of the city's fortifications still stand. Pop (1931), 60,634.

Cremona was the home of the great violin makers, Amati and Stradivarius, and violins made here are sometimes called *cremonas*.

Cremorne Gardens Former London pleasure resort. It was at Chelsea and was named after Viscount Cremorne who owned it. In 1845 it was sold and made a public resort, which it remained until 1877.

Creole Term used in the W. Indies and the neighbouring mainland for the descendants of white immigrants, who have been born in the country, but not for immigrants themselves. Creoles are chiefly of French, British, Spanish or Portuguese descent, and are found in the W. Indies, Louisiana, Mexico and elsewhere. In some places the descendants of negroes are called *Creoles*.

Creosote Product derived from the distillation of wood, coal, and shale. The wood tar creosote of commerce is obtained from beechwood. Its principal constituents are guaiacol and cresol. Wood tar creosote is medicinally useful in bronchial complaints and for the relief of toothache.

Creosote Oil, used to preserve timber, is that part of coal tar distillate which boils between 200° and 300° C.

Crescent The waxing or waning moon. The popularity of the crescent as a symbol, as on Bronze Age personal ornaments, arose partly from lunar association, partly from its resemblance to the cow's horns. Brzantium adopted the symbol and the Turks used it as a rival emblem to the cross.

Crescograph Apparatus devised by Sir J. C. Bose for recording electrically the response of living matter to various kinds of stimuli. It has been used by him for displaying upon a screen, by enormously magnifying small movements, the growth of plant tissues, besides showing the effect of manures in stimulating or retarding growth.

Cress Name denoting various salad vegetables of the cruciferous order. Of garden cress, *Lepidium sativum*, introduced from Persia, only the seed leaves are eaten, usually with those of white mustard. Curled or

Normandy cress is *barbarea praecox*, water cress is *nasturtium officinale*, rock cress is *arabis*

Cresset (Old French *carisse*, grease) Cage or bowl of iron containing inflammable burning material. It is either stationary or mounted on a pole for purposes of illumination. It is used by watchmen, on docks and in fogs, and in the making of beacons.

Crest (Latin *crista*, a plume or tuft) Comb of a bird, the feather, cone or top of a helmet, or the helmet itself. Hence by association crest means the top of anything. A heraldic crest is a device to show identity, worn on a knight's helmet. In armorial bearings it is placed on a wreath above the helmet and shield. It is also used as a seal.

Cresta Run Artificial snow-covered track at St. Moritz, Switzerland. Constructed in 1884, it is reconditioned annually for winter sports. About 1350 yds long, its steeper curves are hanked up. Steel hobsleighs and skeletons are used on it and it is a famous sporting track.

Creswell Crags Caves in Derbyshire, famous for their antiquarian remains. They are about 9 m from Chesterfield. In them implements used by primitive man and some of his drawings have been found. Excavations here were begun in 1924, and in 1930 31 important remains of early man were found in the Pin Hole cave.

Creswick Town of Victoria, Australia. 10 m from Ballarat and 96 from Melbourne. It is the centre of an agricultural and mining district. Pop 2400.

Cretaceous Geological system of rocks forming the uppermost of the Mesozoic division, and so called from its most important member, the chalk formation. These rocks are divided into two sections, the Upper and Lower Cretaceous. The lower series, or Neocomian, consists of the Wealden, a group of sands and clays, and the Lower Greensand of yellow, grey or greenish sands with ironstone bands. The Upper Cretaceous consists of the gault, a stiff blue clay, the upper greensand and the chalk.

Crete Island of the Mediterranean, also called Candia. At the south end of the Aegean Sea it covers 3120 sq m. It is long and narrow, being 165 m in length, and the interior is mountainous, Ida being one of its peaks. In the valleys fruit is grown and cattle are reared. Candia, the capital, and Canea, both on the north coast, are the chief towns. Suda Bay is the best harbour.

Crete is famous as the home of one of the oldest and most elaborate of the world's civilisations. Earlier than 2000 B.C. the people were living in a state of order and comfort and had attained a high degree of artistic achievement. Cretan civilisation is called Minoan, after Minos, one of the kings, and is usually divided into three periods—early (3000 to 2200 B.C.), middle (2200 B.C. to 1600 B.C.), and late (1600 to 1100 B.C.). The chief centre of this Cretan civilisation was Knossos, and here, as elsewhere, much excavating work has been done since about 1900.

This civilisation declined when the cities of Greece rose to importance. Later Crete formed part of the Roman Empire and then belonged to Venice, in 1669 it was taken by the Turks, who retained it until 1913, when it was given to Greece. This was the result of a long struggle against Turkish misrule. The people speak a Greek dialect. Pop 336 000.

Cretnism Chronic disease affecting mental and physical development in childhood. It is due to absent, imperfectly developed, or diseased thyroid gland including the enlarged condition producing goitre. The result is stunted growth, mental capacity inferior to that of normal young children, and life seldom exceeding 30 years. Good results have attended treatment with thyroid gland extracts and iodine salts.

Creusot Town of France also called Le Creusot. It is 55 m from Dijon, on a rich coalfield and near the Canal du Centre. Great armament works were established here by Adolphe and Eugène Schneider in 1830 and they provided the French armies with much material in the Crimean, Franco-Prussian and especially the Great War. The original ironworks have developed into works for producing arms and armaments of all kinds, for the navy as well as for the army, as well as motor cars, locomotives and machinery for electrical and engineering plants. Pop 30,000.

Crevasse Fissure or crack. In glaciers deep chasms may form in the ice substance when traversing uneven beds. The open top may be concealed by ice or snow bridges, mountain climbers should always be roped to at least one companion when traversing glaciers.

Crewe Borough and market town of Cheshire. It is 158 m from London, on the L.M.S. Rly. The chief buildings are the town hall, school of art, technical school and several churches. The modern Crewe Hall, formerly a seat of the Marquess of Crewe, is near here. Here are the great railway repair shops and locomotive works of the London Midland and Scottish Railway, on which system Crewe is an important junction. Pop (1931) 46,061.

Crewe Marquess of English title borne by the politician and diplomatist, Robert Offley Ashburton Crewe Milnes. Born in London, Jan 12, 1856, the son of Lord Houghton, he was educated at Harrow and Trinity College, Cambridge. In 1886 he became Lord Houghton and as a Liberal was Lord Lieutenant of Ireland, 1892-96, when he was made Earl of Crewe. In 1905 he became Lord President of the Council, and in 1908 leader of the Government in the House of Lords. From 1908-10 he was Colonial Secretary and from 1910-15 Indian Secretary. In 1915-16 he was again Lord President, but he left office in Dec, 1916. In 1917 he was chairman of the London County Council and from 1922-28 ambassador in Paris. In 1911 he was made a marquess and he married, as his second wife, Lord Rosebery's younger daughter. His eldest son is the Earl of Madeley. Lord Crewe, a graceful writer and something of a poet, wrote the biography of his father-in-law.

Crewkerne Market town and urban district of Somerset, 7 m from Yeovil, on the S. Rly. The chief buildings are the beautiful church and the old grammar school. Pop (1931) 3509.

Cribb Tom, English pugilist. Born July 8, 1781, he settled in London in 1794 and soon became a noted fighter. In a series of fights he beat James Belcher and other leading pugilists and in 1809 won the championship of England. He kept the title until his death at Woolwich, May 11, 1848.

Cribbage Card game which may be played by two or more people.

ix cards are dealt to each player, two h hand being set aside for the crib 't is to make pairs, fifteens, sequences, -one. The cards are laid down one e face upwards and when thirty-one reached, or all the cards laid down, s are counted, and scores are marked s of pegs in holes on a board.

Ieth Urban district and watering place of Caernarvonshire, beautuated on an opening off Cardigan Bay, mountains behind it. It is 4 m from e Pop (1931) 1449

iton James Schoiar, known as the Admirable Crichton. The son e Crichton, Lord Advocate of Scotland, born Aug. 19, 1860. He had great s a linguist, much ability as a verse and a prodigious memory. His life was spent in France, where he served in r and in Italy. His scholarship was oy his arguments on philosophy and matters. In Paris he is said to have i twelve languages. He was killed in rrawl at Mantua, July 3, 1882.

et Family of leaping orthopterous insects allied to grasshoppers e chirps by rubbing together the two ngs the bearing organs being in the ritish species are the house cricket, *omesticus*, field cricket, *G. campestris*, wood cricket, *Nemobius sylvestris*, mole cricket *Gryllotalpa vulgaris*, with adapted for burrowing.

set Outdoor game popular in Eng-land Australia and elsewhere nly played by teams of eleven a side. Elements are bat, ball and wickets, or The wickets, three together, are opposite each other and 22 yds apart, defended by a batsman. Engaged in o get these batsmen out are the eleven s of the other side.

in of the batsman is to keep the bowler tting his wicket and to hit the ball so can run to the other wicket once or ilie. It is being chased, or to hit it to ndary and score an agreed number of the hit. He can be out by hitting the a fieldman who catches it before it hed the ground, or allowing the bowler is wicket with it. He can also be l or run out, i.e., by being out of his which is marked by a line of white- ben the wicket is hit with the ball also be out for stopping the ball with if the umpire thinks he has broken the so doing.

tsman stays at the wicket until out wler bowls six balls and then gives another bowler who bowls from the d. The six balls are called an over, if are scored off them it is a maiden over. alia eight balls to an over is the rule. a players who are not bowling are standing in various positions. One is let keeper. He stands behind the prevent him from making runs, called

es are decided by the number of runs It may be the number in a single or it may be the total of two innings and school cricket it is usually the in test matches and county cricket, he matches take three days, it is the

chief matches are the test matches and

those for the county championship. The test matches, five in number, are played every two or three years between England and Australia in the two countries alternately. Matches with S. Africa are also called test matches. Tho ashes, as the imaginary trophy contested for by England and Australia is called, were won by England in Australia in 1928-29 and recovered by Australia in England in 1930.

County cricket is played by teams representing most of the English counties. Seven-teen counties, including one in Wales, Glamor-ganshire, are first class and these contend for the county championship, which is awarded to the one gaining the most points. A new method of awarding points was introduced in 1930, 15 points being given for a win. There is also a championship for the second class counties. Professionals take a large part in the game and every year matches are played between teams of amateurs, or gentlemen, and professionals. Cricket is played by clubs all over the country, at the universities, by every boys' school, and since the war by an increasing number of girls' schools. The governing body of the game is the Marylebone Cricket Club, called the M.C.C. W. G. Grace is the greatest name in the history of cricket, but J. B. Hobbs has beaten some of his records. Other great names are Alfred Mynn, Ranjit-sinhji, C. B. Fry, T. Hayward, W. Rhodes, G. Hirst and among bowlers Alfred Shaw, S. F. Barnes and C. Blythe, but many others, including the Australians, Trumper and Noble, are equally noteworthy.

Since 1901 the county champions have been

Crickhowell Market town of Breck-nockshire. It is 14 m from Brecon and stands on the Usk. There is a fine bridge across the Usk, also ruins of a castle. Tho name means the rock of Howell. Pop. 1200.

Cricklade Market town of Wiltshire, on the Thames, 8 m from Swindon and 95 m from London. It has a fine old church and was at one time a borough sending members to Parliament. Pop. 1520.

Cricklewood District of London, in the urban district of Willesden, about 6 m from the city, on the L.M.S. Ry.

Crieff Burgh of Perthshire, on the Earn, 18 m from Perth, on the L.M.S. Ry. It is much visited by invalids as the climate is unusually mild. Crieff is the chief town of the district of Strathearn. Pop. (1931) 5544.

Crimea District of Russia forming a Soviet republic. It is a peninsula on the north side of the Black Sea, a narrow isthmus connecting it with the mainland, and covers 23,300 sq m. It was part of Turkey until 1792, when it became Russian. In 1921 it became an autonomous republic in union with the Soviet at Moscow. Simferopol is the capital, other towns are Kerch, Yalta and Eupatoria. Pop. 2,000,000.

THE CRIMEAN WAR, carried on chiefly in

the Crimea, was fought between Great Britain and France, as allies of Turkey, against Russia. Later the allies were joined by Sardinia. In March, 1854, the allied fleets sailed into the Black Sea and bombarded Odessa. In Sept. an army was landed at Eupatoria and the first battle was fought on the banks of the Alma, where the Russians tried in vain to stop the allied advance. The rest of the campaign consisted in attempts to take the strong fortress of Sevastopol. The siege began in Oct., when the fortress was bombarded by land and sea. In Oct. the British made their famous cavalry charges at Balaklava and on Nov. 5 their camp at Inkermann was attacked by the Russian army that was assisting to defend Sevastopol. The British infantry stood their ground and the attack was beaten back.

More terrible, however, was the cold, and with sickness rife among the troops, due partly to mismanagement, the siege was for a time abandoned. Reinforcements and medical and nursing assistance were sent out and in April the fortress was again assaulted, but without success, owing partly to lack of unity between the two commands.

Two other assaults delivered in June also failed but partial success attended one made in August, when the French seized the formidable Malakoff works. The Russians then abandoned the fortress which was destroyed by the allies. Other events of the war included the bombardment of the Aaland Islands and the destruction of Kimburn, a fortress opposite Odessa, by the French. Peace was signed March 30, 1856, without advantage to either side. The British lost 19,600 in dead, chiefly from disease and privation.

Criminal Appeal English court of law. It was set up in 1907. Before that date a convicted criminal could not appeal against his sentence, but now he can do so. The court consists usually of three judges of the king's bench division, in addition to upsetting the verdict they can increase or reduce the amount of a sentence. In 1926 a similar court was set up for Scotland.

Criminology Study of criminals with a view to dealing with them on scientific lines. In England criminals were first considered from the humanitarian point of view in the 18th century, but their study began in Italy with Cesare Beccaria. In his book *On Crimes and Punishments*, 1764. More than a century later Cesare Lombroso published *The Male Offender*, another landmark, and since then a great deal has been done. Criminals have been classified according to their physical and other characteristics and much effort has been spent in plans to prevent young offenders from becoming habitual criminals. As a result of this study criminals are carefully graded and inducements offered to lead the less vicious to adopt a crimeless life. This has taken the form in Great Britain of special courts for children, detention in Borstal institutions instead of in prisons and a careful system of probation. See BORSTAL.

Crinan Sea loch of Scotland. A branch of the Sound of Jura it penetrates for about 15 m. into the Peninsula of Kintyre. From it the Crinan Canal has been cut to Loch Gilp, an opening of Loch Fyne. This canal 9 m. long, was opened in 1801 to save the long journey round the Mull of Kintyre.

Crinoline Stiff horsehair fabric formerly used to distend women's skirts. A wired structure worn beneath the gown to widen the garment at the hem was also called a crinoline. The name is frequently applied alike to the Elizabethan farthingale, the later hooped petticoat, and to the 19th century bustle with a petticoat four to five yards wide at the hem. In millinery a material made of cotton gauze dressed with glue and used for manufacturing hats, is known as crinoline.

Crispi Francesco Italian statesman. Born in Sicily Oct. 4, 1819. He joined the revolutionary movement of 1848 and was exiled from Italy and then from France. He was a leader in the struggle of 1859-60 and helped Garibaldi to become master of Sicily. In 1861 he entered the Chamber of Deputies, in which he sat for 40 years. Then a convinced republican, later he altered his views. He was prominent in all the movements between 1861 and 1871 and in 1876 was elected President of the Chamber. In 1877-78 he was Minister of the Interior, a post to which he returned early in 1887. Later in 1887 he became Premier, but resigned in 1890. He was again Premier from 1894 until the disaster at Adowa led to his fall in 1896. He died in Naples, Aug. 12, 1901.

Crispin One of the two patron saints of shoemakers, the other being Crispinian. Their festival, which is on Oct. 25, was formerly celebrated with processions in which the shoemakers' guilds took a leading part.

Criticism Passing judgment, specifically on a literary or artistic work. Each age has sought to establish standards of right judgment in literature and the fine arts. Biblical criticism at the Reformation found fruitful fields in comparing textual variants in MSS. and considering their authenticity and origination as distinct works. Later criticism was directed more to the literary contents of the Bible, and the literal accuracy of many of the statements especially in the Old Testament, was questioned. Traditional beliefs about the authorship of the various books were critically examined, and the result was to cast doubt upon many matters that had hitherto been implicitly accepted as true. This work, begun by German and continued by British scholars, was known as the higher criticism and was distinguished from textual or lower criticism.

Other forms of criticism are literary and artistic. In both fields there is a great output of writing both in the form of articles in the press and of books. William Hazlitt was one of the greatest of English literary critics.

Croatia District of Yugoslavia formerly north of Hungary. It is in the north of the country, stretching to the shores of the Adriatic Sea. Its capital is Zagreb or Agram. When part of Hungary, it formed with Slavonia a province, sometimes called a kingdom which had its own parliament and other privileges. The Croats however were never happy under the rule of the Magyars, even though the vote was a light one. They are more akin in race to the Serbs and they agitated continually for the establishment of a Croatian kingdom or for union with Serbia. After the Great War the province was included in the kingdom of the Serbs, Croats and Slovenes called Yugoslavia and four Croats sit in its legislative council. The total number of Croats is estimated at about

4,000,000 The area of the province of Croatia-Slavonia is 16,200 sq m

Crocket In architecture an ornament placed on the sloping edge of a gable. It often takes the form of curved foliage, but occasionally represents an animal

Crockett Samuel Rutherford Scottish novelist Born Sept 24, 1860, he was educated at Edinburgh and was ordained a minister of the Free Church of Scotland. From 1886 to 1895 he was minister at Penicuik, near Edinburgh. In 1893 he made a success with a book of short stories, *The Stickler Minister*. Soon, therefore, he gave up the ministry and produced a number of novels, stories of Scottish life and character, some being historical, which became very popular indeed. They include *The Lilac Sunbonnet*, *The Black Douglas* and *The Raiders*. He died April 19, 1914

Crocodile Family of large reptiles. True crocodiles differ from caymans and alligators by their interlocked upper and lower teeth, the fourth lower tooth usually hitting into an upper notch like an exposed tusk, and from gharials by their rounder snouts. Some have broad, short snouts like alligators, e.g. the Indian mugger, *crocodilus palustris*, others have narrow, long ones like gharials, e.g. the estuarine, *C. porosus*, of India and N. Australia, and the W. African *C. cataphractus*. The Nile *C. niloticus*, survives only in its upper waters. There are two true crocodiles in America.

All the crocodiles are flesh eaters. They can swim rapidly, but pass most of their time resting in the water or by its edges. The largest, the estuarine crocodile, has been known to be 33 ft long. Crocodiles lay their eggs in the sand, where they are covered up until incubated. The skin is tanned and used for making bags, etc. Owing to the nature of their oves, crocodiles seem to weep when they are killing an animal, hence the phrase, crocodile tears.

Crocus Genus of hardy perennial herbs of the iris order. They are native to Europe and W. Asia. The scaly remains of last season's leaves form a bulb like corn from which the new leaves and flowers shoot. The subterranean ovaries are surmounted by long-tubed perianths of six petaloid leaves. *C. vernus* and *C. versicolor* yield white, purple and striped garden varieties, the yellow blooms are Dutch developments from *C. aureus*. The British *C. nudiflorus* which grows wild in the meadows of the midland counties of England, is bright purple. All make beautiful flowers for the garden. *C. sativus* yields saffron.

Croesus Last king of Lydia. Solon, having been shown his treasure, is reported to have said, "Count no man happy before his death." Deceived by an ambiguous oracle, Croesus made war upon Cyrus, King of Persia, was defeated near Sardis, and condemned to be burnt alive. Remembering Solon's words he cried out "Solon, Solon," and when Cyrus heard the story, he spared his life. The name of Croesus is proverbial for a man of great wealth. He lived in the 6th century B.C.

Crofter Word meaning an enclosed field and used for those who rent small farms in the highlands and islands of Scotland. By law they are defined as the tenants of holdings not more than 20 acres in size and not exceeding £30 a year in rental value.

For several reasons, one being the extension

of the amount of land devoted to deer forests, the condition of the crofters became very bad, and in 1883 a commission enquired into their grievances. The result was that a permanent commission was set up in 1886 to secure for them fair rents and security of tenure. This applied to 200,000 crofters in the counties of Ross and Cromarty, Caithness, Sutherland, Inverness and Argyll, as well as in the Orkney and Shetland Islands. Legislation at a later date was passed to assist them in other ways. In 1911 the crofters' commission was replaced by a land court which has power over the whole country.

Croker John Wilson Irish writer and politician. Born in Galway, Dec. 20, 1780, he was M.P. from 1807 to 1832, and from 1809 to 1820 Secretary of the Admiralty. He wrote several books and was one of the founders of *The Quarterly Review* and the Athenaeum Club, but is better known owing to Macaulay's savage attack on his edition of Boswell's *Life of Johnson*. Croker died Aug. 10, 1857. He appears as Rigby in Disraeli's *Coningsby*.

Croker Land Name given by Robert E. Peary to a region northward of Axel Heiberg Island where he thought he saw distant land during his polar expedition, 1906. As, later, Dr. Macmillan found ice-floes only at the supposed spot it may have been a mirage.

Cromagnon Man Primeval European race which entered Europe in the upper palaeolithic age. The name was given by Paul Broca to five skeletons discovered in 1868 in the Cromagnon grotto at Les Eyzies, Dordogne. Others were found elsewhere. Tall and long-headed, they introduced the Aurignacian civilisation and became part of modern man's direct ancestry.

Cromarty Formerly a county of Scotland. It consisted partly of a stretch of land on Cromarty Firth and partly of pieces scattered throughout Ross-shire. In 1889 the two counties were united as Ross and Cromarty.

Cromarty Firth is a branch of Moray Firth. On the east coast of Scotland, it cuts into the land for about 19 m. and forms a good harbour.

There is an Earldom of Cromarty dating from 1861. Since 1895 the title has been borne by Sibell Lillian Blunt-Maokenzie. Her son and heir is known as Viscount Tarbat.

Cromarty Burgh and seaport of Ross and Cromarty. It stands on Cromarty Firth, 20 m. from Inverness and has a little shipping. Pop. (1931) 837.

Crome John British artist. Called Old Crome, he founded the Norwich School of Painting. Born Dec. 22, 1768, he started life as a coach painter, but in his spare time practised sketching. Later he taught drawing. His paintings, of which "Mousehold Heath" is in the National Gallery, reveal a sense of atmosphere and a love of nature. He died at Norwich, April 22, 1821.

Crome's son John Bernay Crome, called Young Crome (1794-1842), painted pictures in his father's style.

Cromer Urban district and watering place of Norfolk. It stands on Cromer Bay, 24 m. from Norwich and 140 from London, on the L.N.E. Rly. It is beautifully situated on cliffs, which, however, are crumbling, and the attractions include good sands and golf links. The parish church is a magnificent building. In the neighbourhood are the Garden

of Sleep Felbrig Woods and other beauty spots Pop (1931) 4177

Cromer Earl of Tithe held since 1901 by the family of Baring Evelyn Baring the first earl was born at Cromer Hall Norfolk, Feb 26 1841 In 1877 he was made Commissioner of Debt in Egypt, and from 1880-83 was in India as financial member of the viceroy's council In 1883 he became British agent in Egypt and there he did a great work until his retirement in 1907 He was made a baron in 1892 a viscount in 1890 and an earl in 1901 He wrote *Modern Egypt*, 1908, and died Jan 29, 1917

His son Rowland Thomas, the 2nd earl (born 1877) was appointed Lord Chamberlain in 1922 Until he succeeded to the title he was known as Viscount Errington

Cromford Market town of Derbyshire It is 15 m from Dorby and 14½ from London on the L.M.S. Rly It is also served by a canal Here in 1771 Sir Richard Arkwright built his first cotton mill and cotton has since been manufactured here Pop 1823

Cromlech Term applied to certain prehistoric structures In Britain the word generally denotes a rudely constructed chamber of three or more upright stones capped by a large stone slab Kilt Coty House near Aylesford in Kent, is an example of a British cromlech

Crompton Samuel English inventor He was born near Bolton, in Lancashire Dec 3 1753 His family spun wool for their own use, and, after doing this for some time, Crompton, in 1779 invented a new kind of spinning jenny A combination of the ideas of Hargreaves and Arkwright It was called the mule He died at Bolton, June 26 1827

Cromwell Oliver English soldier Born at Huntingdon, April 25, 1599, of good family, he was educated at the local grammar school and at Sidney Sussex College, Cambridge In 1628 he was chosen M.P. for Huntingdon and in 1640 for Cambridge, which he represented also in the Long Parliament

In 1642 he became captain of a troop of horse which he led at Edgehill Next he raised his Ironsides men from his own district and became a leader on the parliamentary side He was largely responsible for the victory of Marston Moor, and having organised the new Model Army led it to a great triumph at Naseby He crushed the Royalists at Preston and elsewhere and signed the warrant for the execution of Charles I

Next came his ruthless suppression of rebellion in Ireland and his victory at Dunbr The final overthrow of Charles II at Worcester followed In April 1653 he dismissed the Long Parliament and later in the year he was made Lord Protector He ruled England more successfully in his foreign than in his domestic policy until his death Sept 3 1658, a little while after he had refused to accept the crown He was buried in Westminster Abbey but in 1660 his body was disinterred and banished to Tyburn

Cromwell left two sons Richard, who became protector, and Henry and four daughters one of whom married Ireton and then Fleetwood His male line is extinct but his female line has many representatives

Cromwell Richard Second Lord Protector of England Born

Oct 4, 1626, son of Oliver Cromwell, he was educated at Felsted, and in 1651 became an M.P. He was a member of the council of state in 1657, and in 1658 succeeded his father as Lord Protector In May 1659 he gave up the office and as John Clark went to France About 1680 he returned to England and lived at Cheshunt until his death, July 12, 1712

Cromwell Thomas. English politician He was born about 1485, and practised as a lawyer, and this may have led to his acquaintance with Wolsey In 1523 he entered Parliament and as Wolsey's secretary helped to suppress the smaller monasteries to endow Wolsey's colleges at Ipswich and Oxford

On Wolsey's fall Cromwell was for eleven years Henry VIII's chief adviser He was instrumental in carrying through the measures that finally separated England from Rome and as Vicar General was the chief author of the suppression of the monasteries To this he owes his nickname of *malleus monachorum*, the hammer of the monks Numerous honours and much wealth came to him He was Chancellor of the Exchequer and Secretary of State Lord Privy Seal and Lord Great Chamberlain and was created a baron and then Earl of Essex His fall followed the marriage he brought about between Henry and Anne of Cleves Cromwell was charged with high treason and was beheaded, July 28, 1540

Cronje Piet Arnoldus Boer soldier Born about 1840 he became a farmer in the Transvaal In the war against the British in 1881 he was in command of a detachment of Boers and won reputation as a soldier He was in charge of the force sent against the Jameson raiders in 1896 and was chosen to command one division of the Transvaal forces when war broke out in 1899 He led them at the Modder and at Paardeberg where he surrendered He was in St Helena until 1902 and then in the United States but he died in S Africa Feb 4 1911

Cronos In Greek mythology, one of the Titans the son of Uranus and Gaia

Crook Urban district of Durham It is 15 m. from Durham, on the L.N.E. Rly Coal mining is the chief industry Pop (1931) 11 600

Crookes Sir William English scientist. Born in London June 17 1832, he was trained at the Royal College of Chemistry He became an assistant there, and later in the Radcliffe Observatory Oxford His original work soon made him known and in 1863 he was elected F.R.S. His researches and discoveries cover a wide field in physics and chemistry, and among his inventions are the Crookes tube a special form of vacuum tube and the radiometer He discovered thallium, enlarged our knowledge of radium and gave attention to the world's wheat supply, and to problems connected with diving He was also interested in psychical research He died April 4 1919 Knighted in 1897, he was President of the Royal Society and the British Association and in 1910 was given the O.M. He edited *The Chemical News* and *The Quarterly Journal of Science*

Crops Term used for the produce of cultivated plants when gathered for food The cereal crops are wheat rye maize barley and oats In addition there are crops of rice, fruit and potatoes

Crops are grown in rotation to allow the soil time to recover from the loss of a particular ingredient. There are several systems in use, cereals alternating with root crops and vegetables. See BARLEY, WHEAT, etc.

Croquet Outdoor game. It is played by two or four persons with balls and mallets, each player having a ball and mallet of a distinctive colour, red, blue, yellow or black. The ground should measure 35 yards by 28, and on it, at stated intervals, are six hoops and two posts. The aim of each player is to send his own ball and that of his partner, if he has one, through the hoops and to hit the posts in regular order, and to prevent his opponents from so doing. The rules of the game are supervised by the Croquet Association, 4 Southampton Row, London, W.C., and championship meetings are held annually.

Crore Hindia word for 10,000,000. It refers especially to 10,000,000 rupees.

Crosby Name of two urban districts in Lancashire. Great Crosby is a watering place on the Mersey. It is 6 m from Liverpool, on the L.M.S. Rly. The chief buildings are St Luke's Church and the Merchant Taylors' School. This was founded in 1618, and the present buildings erected in 1878. Pop. (1931) 18,283. Little Crosby (1931) 1096.

Crosby Hall Famous London building. A fine example of Tudor domestic architecture, it stood in Crosby Place, Bishopsgate, where it was built in the 15th century by Sir John Crosby. In 1638 it passed to the East India Co., after which it was a meeting house. Restored in 1936, in 1910 it was re-erected at the corner of Cheyne Walk and Danvers St., Chelsea, where it serves as a hall of residence for women students.

Cross River of W. Africa. It rises in the French Cameroons and, flowing into Nigeria, turns south and enters the Gulf of Guinea by an estuary, near Calabar. It is over 500 m long. The estuary is always navigable.

Cross Two pieces of wood, one fixed crosswise on the other. It was used as a gibbet for malefactors and, because Jesus Christ was put to death on one, the cross became the symbol of the Christian faith. There are several kinds of cross. In the Greek cross the crossed pieces are of equal length, in the Latin cross, the one used for malefactors, the upright piece is longer than the transverse one. St Andrew's Cross represents the letter X and St Anthony's the letter T. The Celtic cross is the Latin cross with a circle round the head, the Maltese cross has bifurcated limbs.

Market crosses and preaching crosses were at one time numerous, and crosses are seen in villages and churchyards. The crusaders took the cross as their symbol, and it is used in wartime to distinguish the great Red Cross organisation.

It is used in heraldry and as a military distinction, e.g., the Victoria Cross, Military Cross, Distinguished Flying Cross, and others. The festival called the Invention of the Cross commemorates the finding of the true cross by St Helena. It is held on May 3.

Crossbill Name given to a genus of birds of the finch type. They are characterised by a peculiar bill, the two sheaths of which are crossed obliquely. This

formation enables the birds to extract from fruit and fir cones the seeds which are their usual food. About the size of a skylark, but of stronger build, the crossbill has a plumage of rich colours, the hen's being of yellowish green and the cock's displaying orange, yellow and crimson feathers.

Crossbow Weapon used in the Middle Ages. It consisted of a strong wooden stock to which a bow was fixed crosswise. The cord of the bow was stretched and fixed in a notch, being released by a trigger to propel an iron bolt.

Cross-Examination Method of questioning witnesses to produce evidence in a court of law. Each witness is examined by counsel on behalf of the party for whom he is called, this being the examination in chief. He may then be cross-examined by the counsel for the opposing side and finally re-examined by his own counsel.

Cross Fell Mountain of Cumberland. One of the highest points of the Pennine Chain, it is 10 m from Penrith, and 2930 ft in height.

Crossword Form of word puzzle introduced into England about 1923. It consists of a series of numbered squares, with clues correspondingly numbered, down and across. When rightly solved, the solutions provide words reading downwards and across which completely fill the vacant squares. The crossword may take any form, but the most usual contain black squares acting as stops between words, usually arranged in a conventional design. Many daily and weekly publications contain a crossword and many regularly offer prizes for solutions. Some of these contain ambiguous clues, affording various solutions, which make the solution a matter of luck rather than skill. Other crosswords require a high degree of skill and considerable knowledge for their solution.

Crouch River of Essex. It rises near Brentwood and after a course of 24 miles enters the North Sea at Foulness. The estuary is a favourite yachting centre, Burnham-on-Crouch being the headquarters. There are oyster beds in the river.

Crouch End District of London. It is 4 m north of the city, on the L.N.E. Rly., and mainly in the borough of Hornsey. The chief building is Christ Church.

Croup This chest complaint, which is accompanied by high temperature and difficulty of breathing, develops very suddenly in young children.

Symptoms—The child holds the breath and then breathes in with a typical crouching sound. He may then struggle for breath and become livid with dilated pupils.

Treatment—Try anything that serves to stimulate the breathing—a hot sponge to the throat, immersion in a hot bath (105° F.), a cold sponge to the chest or head etc., after which put the child to bed and keep him warm with a steam kettle in the room.

Crow Name of a family of birds. They are usually black and found all over the world. They include the raven, jackdaw, chough, magpie and rook, as well as the hooded crow and the carrion crow.

Crowberry Dwarf shrub. It grows on bogs or moors and is found in Great Britain. Its wiry trailing branches bear leathery leaves rolled into closed tubes.

The herries, black, purple or red, are eaten, and from them a dye is prepared.

Crowborough Village and pleasure resort of Sussex. It is 39 m from London and 7 from Tunbridge Wells, on the S Rly.

Crowborough Beacon (800 ft. high) commands very fine views.

Crowland Town of Lincolnshire. It stands on the Welland, 7 m from Peterborough. It is visited for the ruins of the abbey, at one time one of the largest in England. The ruins include the belfry tower. The north aisle is used as a church. There is an interesting bridge in the centre of the town. Pop 2700.

Crown English coin representing five shillings. Henry VIII introduced gold crowns in 1522, Edward VI silver crowns and half-crowns in 1553. Down to the time of Charles II double crowns sometimes appeared in both gold and silver, but since then they have only been coined in silver. There are only a few crowns in circulation, but the half crown is a common coin.

Crown Headgear worn by kings and queens as a sign of sovereignty, also by emperors and empresses. Usually of precious metals and adorned with precious stones, crowns are only worn to-day on ceremonial occasions. The English kings have had crowns since Anglo-Saxon days, but all the older ones have perished. The present imperial crown was made for Queen Victoria. The act of placing it on the sovereign's head is called the coronation.

Crown Order of the Name of several orders of chivalry. In the British Empire there is the Imperial Order of the Crown of India, for women only, established in 1878, and in Italy, the Order of the Crown of Italy, founded in 1868. Other European orders of this name disappeared in 1919.

Crown Agents Officials appointed by the Colonial Secretary. With headquarters in London they act as advisers for crown colonies and protectorates. Concerned with the commercial and economic interests of the countries they represent, their chief duties are financial, and through them the colonies make purchases.

Crown Colony Land acquired by cession or conquest, and without power of self government. The British Government is responsible for the legislation of its crown colonies, which are ruled by governors appointed by the king, aided by councils which include members representative of the colony. All enactments must be approved by the Colonial Secretary.

Crown Lands In Great Britain the land which is the property of the crown, the remains of the vast estates once owned by the kings. In 1707 the sovereign was forbidden to make gifts of crown lands to individuals, which William III and other kings had done freely. George III surrendered his interest in the crown lands in return for an annual income from the civil list, and later sovereigns have done the same.

The crown lands are now managed by commissioners with offices at 55 Whitehall, London, SW 1. They include valuable London property in Regent St and elsewhere. In 1930-31 they produced a net income of £1 280 000.

Crown Office Department of the supreme court of justice in England. Its chief official is called the Master of the Crown Office, and its functions include the issue of indictments, writs of habeas corpus, informations and proceedings for attachment.

Crown Prince Title borne in monarchial countries by the heir to the throne. His position is comparable to that of the Prince of Wales.

Crow's Nest Pass through the Rocky Mountains of Canada. It is traversed at a height of 5500 feet by the southern branch of the C.P.R. The pass crosses great coalfields whose natural gas is of considerable economic worth.

Crow's Nest Small platform with an overhanging protection on a ship's mast. It is used as a position for a look-out man in warships and such vessels as whalers. Modern signalling methods have now made the crow's nest unnecessary on many ships.

Croxteth Park Lancashire seat of the Earl of Selton. It is 6 m from Prescot and 3 from Liverpool. The house, built early in the 18th century, stands in a park covering 960 acres. Races are held in the park.

Croydon County borough market town and airport of Surrey. It is 10 m from London by the S Rly. The picturesque hospital, really an almshouse, in the High St. and the grammar school are associated with the name of Archbishop Whitgift. For the grammar school new buildings at Haling Park have been erected. Industries include hosiery and engineering. Addington Hills is one of several open spaces. The borough which sends two members to Parliament, includes Norbury, Addiscombe, Solihurst, Thornton Heath and parts of Norwood. Croydon is the main English airport and at Waddon are extensive buildings and landing grounds. Pop (1931) 233,115.

There is a mining centre of this name in Queensland.

Crozier Pastoral staff of a bishop or archbishop. It is shaped like a shepherd's crook. Croziers have been used for hundreds of years and some are beautiful works of art. An example is the staff of William of Wykeham, Bishop of Winchester, in New College, Oxford.

Crucible Vessel in which ores are smelted or metals melted or mixed at a great heat. Crucibles are still used in metal refining and in the manufacture of bronze, steel and brass.

Crucifix Cross bearing an image of Christ. The earliest known crucifix was an insulting Roman caricature. Christians did not openly show the cross as an emblem until Constantine's time. From the 6th to the 12th centuries crucifixes showed Jesus triumphant and clothed, with four nails in the feet. Later they became more realistic.

Cruden Bay Watering place of Aberdeenshire. It is 30 m from Aberdeen, on the L.N.E. Rly. Here are fine golf links.

Cruelty Willful infliction of pain on animals or children. Its practice has been considerably curtailed by the increase in humanitarian ideals and by the consequent legislation. Owing to the activities of the Royal Society for the Prevention of

Cruelty to Animals, 105 Jermyn St., London, S W 1, various Acts of Parliament have been passed to make the perpetrators of cruelty liable to prosecution and fine

The National Society for the Prevention of Cruelty to Children has done similar work on behalf of children. Its offices are 40 Leicester Square, London, W C 2

Cruft's Abbreviation for Cruft's Great International Dog Show Society. Founded in 1884 by Charles Cruft, the show is held in the second week of each February at the Royal Agricultural Hall, Islington, London. Prizes are awarded for all classes of dogs

Cruikshank George English artist. Born in London, Sept 27, 1792, his father, Isaac Cruikshank (d. 1811) was known as a caricaturist. The son followed in his father's steps but with greater power and success. He illustrated the works of Fielding and Dickens and Grimm's *Fairy Stories*, and did a great deal of work for magazines such as *Bentley's Miscellany*. To further the cause of temperance he painted a series called "The Bottle" and a cartoon "The Worship of Bacchus," which are in the National Gallery, London. Other works by him are in the British and South Kensington Museums. He died Feb 1, 1878. His brother, Isaac Robert Cruikshank (1789-1856), was also an artist.

Cruiser Warship designed primarily for speed. To-day all cruisers are armoured, and divided into battle cruisers and light cruisers. Battle cruisers are battleships, but with rather lighter armour and greater speed than the battleship proper. Such were the *Leon*, *Tiger* and the newer *Hood*. Light cruisers are smaller vessels, designed to act as the eyes of the fleet. In the British Navy they are usually named after towns and counties, e.g. *London* and *Norfolk*. The Washington Treaty of 1922 limited the size of cruisers to 10,000 tons and the Naval Treaty of 1930 provided for a limitation of their number and strength. In 1931, excluding battle cruisers, Great Britain had 53 cruisers; Japan 37, the United States 19 and France 10

Crummock Lake of Cumberland. It is 2½ m long and is 7 m from Keswick and

Crusade Military expedition sent out under the banner of the cross, especially those sent out from Europe to recover Palestine for the Christians. Palestine was overrun by the Saracens in the 7th century, but Christians were permitted to make pilgrimages to the Holy Places at Jerusalem. In the 11th century, however, the Turks occupied the country and pilgrims were maltreated

This gave rise to the first crusade which was preached by Peter the Hermit and ordered by Pope Urban II at Clermont in 1095. Some European princes raised an army in 1097 and this, with members of the great military orders, the Templars and the Hospitaliers, in its ranks, took Antioch, Edessa and other places, and in 1099 captured Jerusalem, where a kingdom was set up under Godfrey of Bouillon

In 1147 Edessa was retaken by the Turks and under Louis VII of France, the second crusade went to the Holy Land. This was an utter failure. In 1187 Jerusalem was retaken by Saladin and the third crusade was organised. In this Richard I, Frederick Barbarossa and Philip Augustus of France took part, and it was the most spectacular of all. It ended in

1192 in a treaty allowing the pilgrims to visit the Holy Places

There were several other crusades in the 13th century, but they all failed to achieve their object

Crustacea Large division of invertebrate animals. They have the body segmented and provided with jointed limbs, the head, however, is fused with some of the thoracic segments. The rest of the body segments are usually divided into two sections, the thorax and abdomen, and the whole animal is covered with a chitinous cuticle which may be hardened by lime salts. The head bears a pair of stalked eyes and appendages, which are either masticatory or sensory

Crutched Friars Religious order. The crutched, or crossed, friars first appeared in the 12th century in Italy and received their rule from Pope Alexander III. In 1169 they were a mendicant order and the name was given them because they had the sign of the cross on their staves and habits. The habit, at first black, was later blue. They had several houses in England, one at Colchester and another near the Tower of London, at the place still called Crutched Friars

Crypt Vaulted chamber wholly or partly underground, especially beneath churches. Growing out of the confessor or martyr's tomb, it often enshrined other memorials. England's largest Norman crypt is Canterbury, the one at St Paul's, London, is coterminous with the surface area. In secular buildings, 15th century crypts survive in the guildhalls at London and Coventry

Cryptogamia Old term used to denote the lower division of the plant kingdom, as their reproductive processes were thought to be concealed. The term is used still, but in a general sense, for the thallophyta, which include the bacteria, algae and fungi, the bryophyta or mosses and liverworts, and the pteridophyta or ferns, horsetails and clubmosses

Cryptography Art of secret writing by means of ciphers, code words or other devices. Cryptography was practised among the Greeks and Romans and in more recent times in business and diplomacy. With the wide use of telegraphy, ciphers and codes have become of use in reducing the length of messages transmitted

Crystal Solid body of regular shape bounded by symmetrically disposed plane surfaces, and possessing definite internal structure and properties. Crystals arise from solidification of chemical elements or compounds, either by gradual cooling of fused substances, evaporation of their fluid solvents, or condensation of sublimated vapour, as snow crystals condense from atmospheric water vapour

Crystal Gazing Practice of staring into a crystal or other clear substance in the hope of inducing hallucinatory visions

Crystallisation Process by which certain liquids, when passing to the solid state form crystals or solid regular geometric shapes. The molecules of the liquid, when near solidifying point, tend to arrange themselves in some definite pattern or lattice, these lattices being formed of unit cells or minute groups of particles. Crystallisation is usually brought about by evaporation and cooling of a solution, or by cooling a fused substance

Crystallography Study of the geometric forms of matter known as crystals. The science involves the consideration of the relation between crystal faces and their axes, the measurement of the interfacial angles, the identification of similar faces, and the classification into different grades of symmetry. The fundamental laws of crystallography are, first, the constancy of corresponding interfacial angles of crystals of the same substance, second, a simple ratio between the co-ordinates of all planes on crystals of the same substance, and third, the definite symmetry of crystals. There are seven systems and 32 subdivisions of crystals, each characterised by its special symmetry.

Crystal Palace Pleasure resort at Sydenham, London. It was designed by Sir Joseph Paxton and erected in 1854. Constructed of an iron frame work filled in with glass, the materials were chiefly furnished from a huge hall set up in Hyde Park for the Great Exhibition in 1851. It has two towers flanking a large hall, and is visible from many parts of the metropolis. The grounds, covering 200 acres, are used for dirt track and speed boat racing, festivals of various kinds, fireworks displays, etc. The Handel festival is held in the great hall. There is a fine organ, also a collection of statuary. Before the Great War the final matches for the Association Football Cup were played here. The palace became public property in 1920.

Ctesiphon Ancient city of Mesopotamia (Iraq). Situated on the Tigris, 25 m S.E. of Bagdad, opposite Seleucia, it became the winter quarters of the Parthian kings, who captured Seleucia, A.D. 43. After Roman expeditions against it Ctesiphon with Seleucia became the capital of the Sassanian kingdom in A.D. 226. Chosroes I. about 550, built a brick palace of which a huge hall still stands. The city was captured by the Arabs in 637 and became a ruin. It is now only a village.

The Battle of Ctesiphon was fought between the British and the Turks, Nov. 22, 1915. The British force, under Sir O. Townshend, was inadequate in numbers, and ammunition falling short, had to retreat to Knt with a loss of 4500 men, but it inflicted heavy losses on the enemy. Ctesiphon was occupied by the British in March, 1917.

Cuba Island and republic of the West Indies. It covers 41,634 sq m. Attached to it are other islands the chief being the Isle of Pines, which cover a further 2530 sq m. Havana is the capital and much the largest town, others are Santiago, Camaguey, Cienfuegos, Cardenas, Santa Clara, Sancti Spiritus and Manzanillo.

The island is long and narrow with the Atlantic on one side and the Caribbean on the other. The interior is mountainous and the coast contains some fine harbours. The main product is sugar, but tobacco is extensively grown. Fruit is cultivated and much timber is cut. Iron ore is mined and exported.

Cuba was a Spanish possession until 1898, when it became nominally independent. The United States looked after its affairs until 1901 when a republican constitution was adopted and the island became independent. Owing to unrest in 1906 the United States again interfered and formed a provisional government. In 1909 the country again retained its liberty. Congress consists of a Senate of 36

members and a House of Representatives of 126 with a president and a small cabinet. Before 1933 members were elected for six years but since then for nine years. In 1928 there were constitutional changes and the vote was given to women. There were risings in the island in 1931 and 1933, the latter leading to the resignation of the cabinet. There is a small army and navy. Cuba is a member of the League of Nations. Pop. (1930) 3,638,174.

Cube In geometry, a term for a solid with six sides each being a square. In arithmetic, a cube is a number multiplied by itself twice, thus the cube of 6 is 216.

Cubism Form of art originating in the modern French School. It is characterised by depicting objects by a rectangular or geometrical treatment of forms. According to the Spanish artist, Picasso, "Cubism is neither the seed nor the germination of a new art, it represents a stage in the development of original pictorial forms." This tendency to geometrical forms is fore shadowed in the famous picture 'The Ront of San Remo,' by Paolo Uccello (1307-1475).

Cubit Ancient measure of length. It is equal to the length of the forearm from the elbow to the end of the middle finger and varies from 18 to 22 in. in various countries. The old English cubit was 18 in., the Talmudic Hebrew cubit 21.9 in., while the Egyptian measure varied from 18.24 to 20.64 in.

Cuckmere River of Sussex. It rises near Heathfield and enters the English Channel about 4 m. west of Beachy Head. At its mouth is Cuckmere Haven.

Cuckoo (*Cuculidae*) Family of birds of widespread distribution. The common cuckoo, (*cuculus canorus*) is one of the earliest spring visitors to the British Isles. It has sombre plumage and feeds chiefly on hairy caterpillars. Its eggs are laid singly and deposited in the nests of smaller birds such as the hedge sparrow and others. The young cuckoo will often, by superior strength, eject its weaker companions from the nest, thus securing exclusive attention for itself. The name cuckoo is taken from the cry of the male bird.

The great spotted breasted cuckoo of N. Africa and the American yellow billed and black billed nest building tree cuckoos are rare visitors to Britain.

The cuckoo flower is a name sometimes given to the lady's smock.

Cuckoo Pint (*Arum maculatum*) Familiar British wild flower. Found in spring in woods and hedge banks, it has tuberous roots and arrow shaped leaves, often marked with black or dull purple spots. The flower stalk bears a large green rolled up leaf which gradually unfolds, disclosing a purple column with minute flowers round the lower section. The leaf withers, leaving in autumn a spike of scarlet berries. The leaves and berries are poisonous, though a species of starch known as Portland arrowroot was at one time manufactured from the roots.

Cuckoo Spit Froth like spume ob servable in summertime on grass and low herbs. It is produced by green plant lice which are the larval forms of several genera of homopterous bugs called froghoppers. The larve suck out the plant sap render it viscous with secretions and for protective purposes accrete it by abdominal movements.

Cucumber Cultivated trailing herb of the gourd order (*Cucumis sativus*). Reaching Britain from Holland about 1538, it is raised in glass frames at temperatures over 70°F, or in open air ridges. Male and female flowers are distinct, the ovaries become cucumbers without fertilisation. In Britain it is usually eaten uncooked as a salad, but small ones and also gherkins from the West Indies are pickled.

Cud Bolus of hastily-swallowed fodder. It is received temporarily into the first of the four cavities of the stomach of ruminant mammals, such as sheep and oxen. It is returned at will into the mouth for leisurely mastication, the semi-fluid mass then reaching the true stomach, where it is digested. This is called *chewing the cud*.

Cudbear Name given to a purplish dye stuff, or colouring matter, obtained from a parmeliaceous lichen (*Lecanora tartarea*). The lichen is a greyish encrustation found on rocks. Formerly used in Scotland for the dyeing of homespun fabrics, it is also prepared in Norway and Sweden for export. The name is a corruption of Cuthbert, after Dr Cuthbert Brown, who first brought it into prominence.

Cuddesdon Village of Oxfordshire. It is 6 m to the S.E. of Oxford. Here is the palace of the Bishops of Oxford, who have lived here since the 17th century. Other buildings are the church and the college for the training of candidates for ordination.

Cudweed Popular name of several species of composite herbs (*Gnaphalium*). Of this widespread genus the commonest British form is *G. sylvaticum*. This is densely cottony, with narrow leaves and small flower heads enclosed by chaffy-coloured scales which usually persist, giving them sometimes the name everlasting. *G. supinum* grows in the Highlands of Scotland, *G. uliginosum* in damp situations.

Cudworth Urban district of Yorkshire (W.R.), 4 m from Barnsley, on the L.M.S. Rly. It is a centre of mining, quarrying and woollen industries. Pop (1931) 9380.

Cudworth Ralph, English philosopher and divine. Born at Allor, Somerset, in 1617, he was educated at Emmanuel College, Cambridge, and became a tutor there. In 1645 he was made Master of Clare Hall and in 1654 of Christ's College. He was also Professor of Hebrew. Having been ordained, he was made rector of North Cadbury, Somerset, in 1650, and of Ashwell, Hertfordshire, in 1662. He died July 26, 1683.

Cudworth's philosophy, contained in his *True Intellectual System of the Universe*, 1678, sets out to prove the reality of the divine intelligence and of moral ideas which are accompanied by moral freedom and responsibility.

Cue Tapering rod for striking the ball in billiards and bagatelle. Usually of seasoned ash, the butt being spliced with heavier wood. It is about 57 in long and is tipped with leather.

Cuffey Village of Hertfordshire, 13 m from London, on the L.N.F. Rly. On Sept. 3, 1916, a zeppelin, destroyed by Lieut. W. L. Robinson, fell here. It was the first to be brought down in England. Pop 650.

Cuinchy Village of France. It is situated between Béthune and La Bassée. Here the Germans, violently attacking Haig's 1st corps, drove them back for about 800 yards with heavy loss on Jan. 25, 1915. There was further fighting for the redoubts and on Feb. 1 the Guards recovered the lost ground.

Cuirass Body armour protecting the breast and back. It consists either of a single piece of metal, back and front, or smaller pieces joined. It succeeded the coat of mail in the 14th century and still persists in the uniform of the British Household Cavalry and some foreign regiments.

Culdees Monastic order. In the 8th century they started in Ireland and the earliest Culdees were hermits. Later they took vows and became an order under a modified Benedictine rule. They spread to England and Scotland, where they existed until the 14th century.

Culebra Town of Panama. It is 15 m N of the Canal's Pacific end, and became the constructional headquarters and health resort. Pop 1020.

Cullen Burgh and market town of Banffshire, Scotland. A watering place and small fishing port, it is situated at the mouth of the River Cullen, 21 m from Elgin, on the L.N.E. Rly. It stands above the sea with a beautifully wooded background surmounted by the Blinn Hill, commanding a view of ten counties. Cullen House, built about 1600, has extensive grounds, which are opened to visitors. Cullen is the Portliss of George MacDonald's novel, *Malcolm*. Pop (1931) 1688.

Cullercoats Watering place of Northumberland. It stands near the mouth of the Tyne, not far from Tynemouth, on the L.N.E. Rly, being connected with Newcastle by an electric service. Here Armstrong College, Newcastle, has a marine biological laboratory.

Cullinan Diamond. Largest known diamond. It weighed 3025½ carats, (14½ lbs) and was discovered in 1905 at the Premier Mine in the Transvaal on ground belonging to T. Cullinan. In 1907 it was presented to King Edward VII. It was cut into two stones, one, the Star of Africa, being set in the king's sceptre and the other in his crown.

Culloden Tract of moorland about 7 m from Inverness. Here, on April 16, 1746, British troops under the Duke of Cumberland defeated the Jacobites under Charles Edward and put an end to his hope of recovering the throne. Each side was about 8000 strong, the Jacobites having a few French and Irish with them. They were utterly routed, about 1000 being killed and many massacred after the battle. A cairn marks the site. In 1928 the estate, long the property of the Forbes family, was sold. In Culloden House *The Culloden Papers* were found.

Culm Jointed stem of plants of the grass order. Usually cylindrical and hollow between the joints, it is herbaceous, e.g., wheat, occasionally woody, e.g., bamboo. Culm also describes rocks of Carboniferous age, comprising slates, sandstones and inferior coal beds found notably in S.W. England.

Culross Burgh and seaport of Fifeshire. It is on the north side of the Firth of Forth, 7 m from Dunfermline, on the

L N E Rly There are ruins of the abbey At one time girdle plates were made here Pop (1931) 495

Culter Town of Aberdeenshire, 8 m from Aberdeen, on the L N E Rly The chief industry is the manufacture of paper Pop 6600

Cultivator Implement for loosening earth, uprooting weeds or breaking up land All-metal grubbers, introduced about 1820, later acquired vibratory spring actions

Culture Term denoting the promotion of growth of organic beings or their attributes. It may mean tillage of plants for food by regular or intensive culture, production of improved varieties, or artificial growth in a nutrient medium of specific micro-organisms for research or preparation of vaccines

In anthropology it denotes a stage of civilisation, in sociology, the improvement of knowledge and outlook effected by education in the individual mind

Culverin Primitive light cannon made of bronze or leather much used in ancient wars Culverins varied in weight from 15 to 40 cwts. and propelled shots weighing from 2 to 18 lb each

Culvert Tunnel or subterranean pipe for the conducting of water under neath roads, railways or canals

Cumae Ancient town of Campania, Italy. The first Greek colony in Italy. It was founded by the Chalcidians of Euboea First taken by the Campanians and then by the Romans it became a municipal town in 330 B C Cumae founded two colonies Neapolis (Naples) and Puteoli (Pozzuoli)

Cumberland County of England It has a long coast line on the Solway Firth and the Irish Sea Landwards it touches Scotland In the north are peaks of the Pennine range in the south are the mountains of the Lake District, Scafell Helvellyn and Skiddaw the three highest in England In this region, too, are many lakes including Derwentwater, Thirlmere, Bassenthwaite Crummock and Wastwater The rivers are the Eden Derwent and Esk There is fertile soil in the dales and many sheep are reared on the hills Around Whitehaven is a coalfield and the fisheries are valuable Carlisle is the county town Other places are Whitehaven, Workington Keswick, Maryport, Millom Egremont, Cockermouth and Penrith The railways are the L M S and the L N E Cumberland sends four members to Parliament Its area is 1630 sq m Pop (1931) 262 807

Cumberland Peninsula of Canada It is part of Baffin Land and is surrounded on three sides by Baffin Bay, Davis Strait and Cumberland Sound

A river of the United States is called the Cumberland It is a tributary of the Ohio and flows through Kentucky and Tennessee Its length is 650 m In the same region is the Cumberland Plateau, one of the main divisions of the Appalachian Mts A city of Maryland on the Potomac is also called Cumberland Pop (9 0) 37 747

Cumberland Duke of English title held by several members of the royal family The family of Clifford were earls of Cumberland from 1525 to 1643 Prince Rupert was Duke of Cumberland from 1644 to 1682 and Prince George of Denmark, the husband of Queen Anne, from 1680 to 1708

In 1721 William Augustus (1721-65), a son of George II was made Duke of Cumberland He was the duke who routed the Jacobites at Culloden, and cruelly suppressed the risings He died, Oct 31, 1765 In 1766 Henry Fredorlok a brother of George III, was made duke He died childless in 1700

In 1799 the dukedom was revived for Ernest Augustus, a son of George III In 1837 he became King of Hanover and was succeeded by his son, George In 1866 George lost his kingdom and, consequently, his son, Ernest Augustus (1843-1923) was known as the Duke of Cumberland He married a sister of Queen Alexandra In 1917, as an enemy prince, he was deprived of his dukedom and he died, Nov 14, 1923

Cumberland Richard English author Born, Feb 19, 1732 He went to Westminster School and Trinity College, Cambridge The most successful of his plays are *The West Indian*, *The Brothers* and *The Fashionable Lover* He died, May 7, 1811 He is Sheridan's Sir Fretful Plagiary

Cumbernauld Town of Dumfriesshire, a mining district, 16 m from Glasgow, on the L M S (1931) Pop 5100

Cumbrae Two islands off the west coast of Scotland Great Cumbrae is in the Firth of Clyde between Bute and the mainland and covers about 5 sq m. Little Cumbrae lies to the south Both are part of the county of Bute

Cumbrian Mountains A mountain group in Cumberland and Westmorland They are the mountains of the Lake District. The highest point is Scafell (3210 ft) Helvellyn is only a little lower The group, which just enters Lancashire, covers about 1000 sq m

Cummin Herbaceous annual (*cuminum cyminum*) of the *umbelliferae* It is cultivated in the east and around the Mediterranean for its fruit which contains an essential oil It is used in veterinary medicine

Cumnock Name of two towns in Ayrshire, Old and New Old Cumnock stands on the Lugar, 34 m from Glasgow and 16 m from Ayr It has some manufactures New Cumnock is 5 m away being 21 m from Kilmarnock and is a coal mining centre Both are on the L M S Rly Theburgh is Cumnock and Holmhead Pop (1931) 3653

Cumnor Village of Berkshire It is 4 m from Oxford, on the G W Rly Amy Robsart, the wife of Robert Dudley, Earl of Leicester lived here Cumnor Place has been pulled down but the old church remains Pop 1100

Cunard Sir Samuel English shipowner Born at Halifax, Nova Scotia, Nov 21, 1787, the son of an American, he set up in business at Halifax as the owner of some fishing boats In 1831 he settled in England and in 1839 established a line of ships between Liverpool and Boston In 1878 these lines and another were united as the Cunard Steamship Co which became one of the largest in the world, with headquarters in Liverpool Cunard who was made a baronet in 1850, died April 28, 1865

Cuneiform Name given to written characters which resemble a series of wedges or arrow heads, usually seen in Ninevite sculptures Sir Henry Rawlinson

deciphered three forms, Babylonian, Median and Persian. It contains only two elements—the wedge and the rectangle. The cuneiform characters are supposed to have been invented by people who used a Ural-Altaic (Turanian) language, differing from the Semitic languages of the Assyrians and Babylonians.

Cunningham Allan Scottish poet. A Dumfriesshire man, he was born Dec 7, 1784. He wrote for *The London Magazine* and was the author of several books, including *Lives of British Painters*, *Sculptors and Architects* and *A Life of Wilkie*. He is best known by his song *A Wet Sheet and a Flowing Sea*. He died Oct 30, 1842. One of his sons, Peter (1816-69), compiled a notable Handbook of London.

Cunninghame-Graham Robert Bontine Scottish writer and traveller. Born in 1852, he was educated at Harrow and spent some years as a rancher in Mexico and S. America. He developed strong Socialist sympathies and from 1886-92 was M.P. for North Lanarkshire. His books include volumes of short stories, lives of several Spanish adventurers and descriptions of his travels.

Cup Drinking vessel. Usually like a half-sphere, it was sometimes provided with a handle. Cups range from communion chalices to the tea cups of the home. Ornamental and commemorative cups have served for a century as sports trophies, e.g., America, Ascot, Association, Calcutta and other cups.

Another kind of cup is a cool drink. It is made of wine or other beverage and flavoured with fruit or other ingredient, to which ice may be added. Sometimes a liqueur is added. Claret cup is a popular drink in hot weather.

Cupping means drawing blood, as a remedy for various complaints, a special kind of cup being employed for the purpose.

Cupar Burgh and county town of Fife-shire. It stands on the E. don, 44 m. from Edinburgh, on the L.N.E. Rly. The town has a trade in corn and flax and other manufactures. Pop. (1931) 4596.

Cupel Shallow cup shaped vessel made of bone ash. It is used in metallurgical assaying for the separation of base metals from gold or silver or other unoxidisable metals.

Cupid God of love in classical mythology. He is identical with the Eros and Amor of Greek and Latin writers. Cupid was the son of Venus (Aphrodite).

Cupola Term used in architecture for a dome or arched roof like an inverted cup at the summit of a building or tower. The cupola, or dome, is one of the distinctive features of Byzantine architecture. It is also characteristic of the mosque.

Curaçao Island of the Dutch West Indies. Situated in the Caribbean Sea, 40 m. from the Venezuelan coast, it covers 212 sq. m. It raises sugar and tobacco and exports also salt and guano phosphates. Willemstad is the capital and St. Anne's Bay is a good harbour. Pop. (1931), 45,191.

The liqueur curaçao owes its flavour to orange peel, to which rum or brandy is added. It was first made in Curaçao.

Curara Arrow poison used by the South American Indians. It is prepared from various plants principally species of *Strychnos*, and used to some extent in medicine in cases of tetanus and hydrophobia. From it is obtained the active principle, curarine, in

the form of a yellowish-brown powder, which, though said to have no physiological action when swallowed, paralyses the muscles if injected beneath the skin.

Curassow Game bird found in South America. These birds are nearly as big as turkeys and have black, purple or dark green plumage. The crested curassow is the best known. They can be tamed.

Curator In Roman times the guardian of a person under full age, i.e., 25 years, who took charge of his property. The word is still used in that sense in Scots law. It is now chiefly used for the official at the head of a museum, art gallery or similar institution, and also for an official or member of a governing board at a university.

Curfew Bell rung throughout Europe to warn people immediately to extinguish fires and lights. It was precautionary against fire, as ancient wooden buildings were inflammable, and aided in preventing sedition. The curfew is still rung at several places in England.

Curia Name denoting one of the 30 divisions of the Roman people. They were formed traditionally by Romulus, each having a vote in the comitia. Later it was applied to the senate house.

The word was introduced into England where the *curia regis*, or king's court, became the parent of the modern judicial courts, and especially of the privy council. It also designates the *curia Romana*, the judicial and administrative institutions whereby the Vatican governs the Roman Catholic Church. They comprise the congregations of the sacred college, tribunals, chancery, secretariat and so on.

Curie Pierre French scientist. Born in Paris, May 15, 1859, he was educated at the Sorbonne. He became Professor of Physics at the Sorbonne, and married a Polish lady, Marie Sklodowski, who assisted him in his researches. They subjected large quantities of pitchblende to fractionation, and so discovered polonium and radium in 1898. For this they were awarded a Nobel prize in 1903. Curie was interested, also, in electricity, and with his brother, who was Professor of Mineralogy at Montpellier, did valuable work in this field. He was accidentally killed in Paris, April 19, 1906.

Madame Curie succeeded her husband as professor at the Sorbonne. In 1911 she received a Nobel prize for chemistry, and in 1919 she became Professor of Radiology at Warsaw, where a radium hospital was built in her honour. She died on 4th July, 1934.

Curius Manius Roman Consul. Of plebeian birth, he was called Dentatus, from having been born with teeth already grown. During his first consulship he ended the Samnite War, and gave restricted citizenship to some Sabine towns. Again consul, after defeating Pyrrhus at Beneventum, he inaugurated the exhibition of captive elephants in public triumphs, 275 B.C. He died in 270 B.C.

Curlew Genus of shore birds of the plover family (*Numenius*). Their long crescent-shaped beaks have knobbed upper mandibles. The common (*N. arquatus*), breeds in Britain. The jack curlew, or whimbrel (*N. phaeopus*) only in the North of Scotland and the Eskimo curlew (*N. borealis*), is a rare straggler. The stone curlew, or Norfolk plover, is of another family.

Curling Game popular in Scotland. It is played on the ice with large stones and an implement called a granite for pushing them, usually by four persons a side. The aim is to place the stones within three concentric circles as near the centre of the inner one as possible. The field of play is from 32 to 42 yds long, and the stones weigh something under 40 lb.

Curragh Tract of land in Kildare, Irish Free State. It is about 32 m from Dublin, and covers nearly 10 sq m. Race meetings have been held here for 100 years, the beautiful turf being a great attraction.

Curran John Philpot. Irish lawyer. Born at Newmarket, Co. Cork. July 24, 1750, he went to Trinity College, Dublin. In 1783 he was elected to the Irish House of Commons where he was one of Grattan's ablest followers. His reputation rests upon his oratorical efforts on behalf of those taken prisoner in 1798, and upon his speeches against the Union of 1800. From 1806 to 1814 he was Master of the Rolls in Ireland, and he died in London, Oct. 14, 1817. One of his daughters was the heroine of Moore's ballad *She is Far from the Land*.

Currant Fruit of various shrubs of the saxifrage order *Ribes rubrum* yields cultivated red currants and, in another variety, white currants. *R. nigrum* yields black currants. The American red flowered *R. sanguineum* is a shrubby plant.

Another kind of currant is the dried seedless fruit of a grape grown especially in the Ionian Islands. This came originally from Corinth hence the name.

Currency Term used for the money that passes current in a country. It may consist of coins of gold, silver, bronze or nickel, or may be paper money, of which, since the Great War, a great proportion of the world's currency has been composed. The name currency notes is used sometimes for the notes for £1 and 10s issued in Great Britain since the Great War. At first issued by the Treasury, since 1928 they have been issued by the Bank of England.

Current In electricity, a movement of electrical energy from points of high to points of low potential. It is galvanic when battery generated, induced when dynamo generated. When flowing uniformly in one direction currents are continuous or direct (CC or DC) when reversing direction at intervals, alternating (AC). When the to and fro cycle is repeated during a specified time it is periodic the number of cycles per second being the frequency.

Current Movement of a fluid in a determined direction. Air currents, occasioned primarily by the earth's rotation, are affected by differences of density and temperature. Every prevalent wind causes oceanic drift currents which generate surface stream currents. Thus the Atlantic equatorial currents drifted westward by the trade winds, unite in the Gulf of Mexico, creating the Gulf Stream which flows northward. To assist mariners the British Admiralty publishes monthly *Wind and Current Charts*.

Currie Sir Arthur William. Canadian soldier. Born in Ontario Dec. 5, 1875, he became an estate agent at Victoria, British Columbia. As an officer in the Canadian militia, he commanded a brigade in

Europe in 1915, fighting at Ypres in April of that year. Later he was appointed to a division. In 1917 he became Commander of the Canadian Corps, which he led to the end of the war. Knighted in 1917. In 1919 he was made Inspector General of the Canadian Forces, and in 1920 Principal of McGill University, Montreal. He died in 1933.

Currie Sir Donald. Scottish shipowner. Born in Greenock, Sept. 17, 1825, he became a clerk in a shipping firm there. In 1868 he started in business himself, and soon had boats sailing to and from S. Africa. He called his firm the Castle Line, and later the Union Castle Line, all the ships being named after castles. In 1877, Currie was knighted, and in 1880 he became a Liberal M.P. He remained in Parliament until 1900, but separated himself from Gladstone, a personal friend, on the home rule question. He died April 13, 1909.

Currier Dresser of leather. He prepares tanned hides by soaking, skiving, shaving, scoring and colouring.

The Curriers' Company is a London city livery company which existed as a guild in 1367, and built a hall in 1516. The present hall is at 6 London Wall, London, E.C.

Curry Dish seasoned and made with boiled rice. The ingredients include coriander, cumin, pepper, garlic, ginger, coconut, spices, turmeric and tamarind. Freshly ground daily, it is poured as a mixed sauce on eggs, fish and meat. Curry is eaten in India and other parts of the East. English made curries are ordinary stews flavoured with curry powder.

Curtsey In English and Scots law, the life interest of a husband in his wife's lands after her decease. It becomes consummated only after the wife's decease and if, except with gavelkind lands, there has been issue competent to inherit. In cases of intestacy the right was unaffected by the Married Women's Property Act, 1882. Similar rules of law exist in France and Germany. Some of the United States recognise in their own laws tenancy by the courtesy of England.

Curtius Marcus. Roman legendary hero. According to one legend a large gulf opened in the middle of the Forum, and, an oracle having declared that it would not be filled up until Rome had thrown her most precious possession into it, Curtius mounted his horse and jumped into the abyss which immediately closed, being afterwards called the Laus Curtius.

Curwen John. English musician. Born at Heckmondwike, Yorkshire, Nov. 14, 1816, he was trained for the Congregational ministry. In 1844 he took charge of a church at Plaistow, was attracted by the tonic solfa system then in its infancy, and in 1853 helped to found the Tonic Solfa Association. In 1864 he left the ministry and in 1869 became first principal of the Tonic Solfa College in London. He wrote books on music and to publish them set up the business of J. Curwen & Son. He died May 26, 1880 and was succeeded as principal of the college and head of the business by his son.

Curzon of Kedleston Marquess. English statesman. Born Jan. 11, 1859. George Nathaniel Curzon was the eldest son of Lord Scarsdale, an Irish peer, whose ancestors had lived at Kedleston Derbyshire, for 800

years At Eton as at Balliol College, Oxford, he showed unusual powers, and became a fellow of All Souls. He spent some time travelling in the East, and his books soon made him an authority on that region. In 1886 he entered Parliament as Unionist M.P. for Southport. In 1891-92 he was Under Secretary for India, and in 1895-98 for Foreign Affairs. From 1898, when he was made an Irish peer, to 1905 he was Viceroy of India. He presided over the Durbar of 1903 and resigned owing to disagreements with Lord Kitchener. In 1911 he was made an earl.

Closely associated with Lloyd George during the Great War, he was Lord Privy Seal, 1915-16, President of the Air Board, 1916, and Lord President of the Council, 1916-19, and from 1919-24 was Secretary for Foreign Affairs. Made a marquess in 1921, he died March 20, 1925. He was Chancellor of the University of Oxford from 1907, and held many other high positions.

Curzon was twice married, firstly to Miss Mary Loft of Chicago and secondly to Mrs Grace Duggan. He had three daughters. The eldest became Baroness Ravensdale, another, Cynthia, married Sir Oswald Mosley.

Custard Apple Fruit of a small W Indian tree (*Annona reticulata*). Widely cultivated in the tropics, its compact heart shaped, dark-brown berries with quilt like reticulation contain a soft, sweetish reddish-yellow pulp.

Custom House Institution set up to collect the duties imposed on imports. Its functions also include the declaring of free goods, and the entering and clearing of vessels. The London Custom House is at the north end of London Bridge, and there are custom houses at the various sea ports, also at Croydon and other airports.

Customs Taxes levied on imported goods since the reign of Richard I. In 1801 there were 1500 specific rates of customs duty, but hundreds of these were cancelled in 1845-46, and in 1860 Gladstone still further reduced their number. Customs duties are levied on many articles imported into Great Britain, some, like those on tobacco and wine, being old duties, while others were introduced when the principle of a general tariff was adopted in 1931-32. Dutiable articles include sugar, tobacco, wines and spirits, the McKenna Duties and the safe guarding duties are also customs duties. Their collection is controlled by the Board of Customs and Excise.

Cutch Native state of India. It is on the north-west coast of Bombay. The Gulf of Cutch on the south is an arm of the Arabian Sea. Cutch covers 7600 sq m. Its capital is Bhuj. Its ruler, the Maharaja, is entitled to a salute of 19 guns. Pop. 481,500.

The Runn of Cutch is a district to the north of the state. In the wet season it is a water area, in the dry season it is a salt-covered desert. It covers 9000 sq m.

Cuthbert British saint. He was born about 635, and became a shepherd. After spending some time at Molesey Abbey and in missionary travel, he became a hermit in Farne, or Holy Isle, and in 685 was made Bishop of Lindisfarne. In 687 he went back to Farne where he died on March 20 the same year. His body was placed in Durham Cathedral, which is dedicated to him, and his shrine was very popular with pilgrims.

Cutler One who deals in cutlery or instruments for cutting and eating. In England the trade is centred in Sheffield where there is a cutler's company with a master cutler at its head. Another Cutlers' Company is one of the London livery companies. Its offices are at 4 Warwick Lane, E.C.4.

Cutter Single masted sailing vessel. It has the mainsail, fore-staysails, and jib set to the bowsprit and. Cutter yachts are sloop-rigged vessels of considerable draught and slight beam. Armed revenue cutters for enforcing customs regulations, especially in the U.S.A., were originally cutter rigged, then schooner-rigged. Nowadays steamships are used. Ships' cutters are double banked boats with dipping lug-sails used for shoregoing.

Cuttlefish Genus of marine molluscs with internal shell of calcareous bone (*sepia*). Unlike the eight-armed octopods, they and the squids have two long, additional tentacles with sucker-shod ends and ink-sacs for darkening water as a protection. Three species inhabit British waters. Southern Asia and the Mediterranean region use cuttlefish and squids for food. See CEPHALOPODA.

Cutty Sark Sailing ship of the type known as clipper, the most famous of the kind. She was built in 1869, and engaged in the Australian wool trade, sailed from Sydney to London in 75 days, a remarkable feat in those days. She is now in Falmouth Harbour.

Cuvier Georges. Name taken by the French naturalist and anatomist, Georges Léopold Chrétien Frédéric Dagobert, Baron de Cuvier. Of Huguenot family, he was born Aug. 24, 1769, and educated at Stuttgart. In 1795 he was made assistant Professor of Comparative Anatomy at the Jardin des Plantes, Paris. Later he was Professor of Natural History at the Collège de France, and in 1803 was made Secretary of the Academy of Sciences. In 1819 he was appointed Minister of the Interior. He died May 13, 1832. Cuvier was the greatest anatomist of his time. His work, *The Animal Kingdom Distributed according to its Organisation* was long a standard book.

Cuxhaven Seaport of Germany, at the mouth of the Elbe, 70 m from Hamburg, to which it belongs. After 1875 it was converted from a village into a seaport, and it has accommodation for the largest vessels. It was used by the German navy up to 1918. On Dec. 25, 1914, British forces bombarded it. Pop. 15,000.

Cuzco City of Peru. It stands in a small valley 11,400 ft above the sea. It has some industries and is connected by railway with La Paz and the coast. Once a great Inca centre, it was taken by the Spaniards in 1533. There are many remains of Inca architecture. Pop. 40,000.

Cyanamide White crystalline solid (NH_2CN), melting at 40°C . It forms metallic derivatives, in which the two hydrogen atoms are replaced by an atom of a metal. The chief metallic derivative is calcium cyanamide, which is black, and contains 29 per cent nitrogen which is liberated as ammonia on contact with water. This is why it is largely used as a fertiliser as the bacterial soil flora convert the ammonia into the nitrates necessary for plant growth.

Cyanic Acid Chemical substance (HCNO) It is obtained by heating cyanuric acid and condensing the acid evolved by a freezing mixture Its salts are formed when cyanogen gas is led into alkalis Applied to the skin the acid causes a blister

CYANOGEN is a poisonous gas which has a smell like that of peach kernels It is obtained by heating dry cyanide of mercury in a tube and collecting the gas cooled over mercury It is easily liquefied and burns with a blue flame

Cyanide Compound of cyanogen with an element or radical also a salt of hydrocyanic acid, especially potassium cyanide

In metallurgy, the cyanide process is a method of extracting gold and silver from their ores Devised and patented in 1890, it was developed especially in S Africa The ore, finely ground, is transferred to leaching vats in which an alkaline cyanide in solution forms a cyanogen compound with the precious and the alkali metal, and is afterwards precipitated by zinc turnings, zinc dust, or electrolysis The process, employing potassium cyanide, was first confined to the treatment of tailings left after extraction by amalgamation. Nowadays sodium cyanide, even impure calcium cyanide, are largely used, and the process is applied to virgin ore

Cybele Greek nature goddess of fertility Her worship, which originated in Crete, spread over Greece She was also called Rhea, or the great mother

Cyclades Group of Aegean islands Numbering 24 larger and about 200 smaller islands they form a horse shoe S E of Attica and Euboea The highest land is Mt. Ozia 3290 ft They supply lime stones, marbles, sulphur, obsidian, millstones and clays, Naxos emery is a government monopoly Hermoupolis on Syra is the capital They cover 1040 sq m and belong to Greece

Cycling Riding a bicycle or tricycle sport Towards the end of the 19th century, when the ordinary bicycle was being developed it was very popular, but now has a formidable rival in the motor cycle The interests of cyclists are looked after by the Cyclists' Touring Club at 3 Craven Hill, London, W 3 For the sport the controlling authority is the National Cyclists Union, which holds championship meetings Several of the world's cycling records are held by L Vanderstuyft who has done 76 miles, 504 yds in an hour The record for one mile is 61 $\frac{1}{4}$ secs with a flying start

Cyclone Atmospheric system in which equal barometric pressures form concentric circles or ovals with the lowest pressure at the centre The axis is usually inclined The steepness of gradient governs the strength of wind Because of terrestrial rotation, cyclone winds move anti-clockwise in the northern hemisphere, but clockwise in the southern The movement of translation is generally eastward.

Cyclopes In Greek fable, one-eyed giants Homer made them shepherds living in Sicily Hesiod made them the Titan sons of Heaven and Earth who forged Jove's thunderbolts, Pluto's shield and Neptune's trident, later they worked for Vulcan in Etna.

Cyclops Genus of minute freshwater crustaceans of the copepod order They have enlarged feelers which they use as oars A dark beady spot in front makes them look one-eyed, hence the name, which means one-eyed The female carries two oval eggs sacs externally, the larvae pass through the nauplius stage Scores of species inhabit lakes and ditches

Cylinder Solid traced by revolving a rectangle about one of its sides, which form the axis, the adjacent sides forming the circular bases Specifically in a right cylinder, the volume equals the height multiplied by the diameter-squared multiplied by $\frac{1}{4}$ When hollow, cylinders may serve as gun barrels the chambers in which pistons operate, as in engines and pumps, or the glass barrels of electrical machines Thus we hear of three, four and six cylinder engines They may be rollers, metallic or otherwise, in printing and other machines including anodized clay and stone cylinder seals

Cymbal Musical instrument made of metal Cymbals are plate shaped and of indefinite pitch. They are played in pairs, one being slid against the other More rarely they are clashed together Modern orchestration frequently requires one to be suspended, then struck with a drum stick This gives an impressive, unique sound Anodized cymbals were much smaller and cup shaped, emitting distinct bell-like notes

Cymbeline British king supposed to have been the son of Cassivelaunus He was frequently confused with Cynobellinus, a mythical king of the Silurians He was the chief ruler of Britain In fact, he is called by Suetonius king of the British Augustus, thinking him dangerous, contemplated an invasion of Britain which was stopped by the submission of Cynobellinus The plot of Shakespeare's *Cymbeline*, taken partly from Holinshed's *Chronicles* is devoid of historical truth

Cymmrodorion Society for preserving Welsh literature and nationality Established for instructing the ignorant and relieving the distressed in 1751, it ceased in 1781 It was revived for promoting literary study in 1820 and published two volumes of transactions down to 1813 Reconstituted, largely through Sir Hugh Owen, as the Honourable Society of Cymmrodorion of London in 1877 it publishes annual transactions and ancient MS records The offices are at 64 Chancery Lane, London W C A similar society established in 1792 which published various MSS led to the revival of the national Eisteddfod

Cymry Celtic word used by the Welsh as a name for themselves It is also used to denote the group of languages comprising Welsh Breton and Cornish

Cynics Sect of Greek philosophers founded by Antisthenes According to them virtue was the only good consisting in avoiding evil and wanting nothing From the cynics sprang the Stoics (q v)

Cypress Genus of evergreen shrubs and trees of the coniferous order They are natives of S Europe, Asia and N America (*Cupressus*) The common cypress *C sempervirens* grown in the Mediterranean region in antiquity, and used for domestic carpentry, musical instruments and mummy cases was regarded as a symbol of the dead

One variety of it, *C. fastigiata*, grows like the Lombardy poplar to a height of 90 ft., but in Britain it is seldom over 40 ft. Another, *C. horizontalis*, has spreading branches resembling the cedar.

Cyprian Saint and martyr. He was probably born at Carthage in A.D. 200. At first a teacher of rhetoric, he was converted to Christianity in 246 and became Bishop of Carthage in 249, when persecution was causing apostasy among timid Christians. Cyprian rallied and encouraged his flock, and, by his sympathetic understanding of their fears, encouraged the return of many lapsed Christians. Renewed persecution by Valerian caused first Cyprian's banishment and finally his execution on September 14, 258.

Cyprus Island of the Mediterranean Sea. It is 44 miles from the coast of Asia Minor and covers 3584 sq miles. Nicosia is the capital. Other towns are Larnaca, Limasol and Famagusta. There are two mountain ranges with a plain between them. Fruit and vegetables are grown and exported. Other crops are cotton and tobacco. Asbestos and copper are mined. Sheep and goats are kept. There are about 64,000 Turks in the population of 347,959. The others are Cypriotes, who form a Christian church of their own.

At an early date Greek and Phœnician colonies were planted in Cyprus. It was a Persian possession and then part of the Roman and Byzantine Empires before it passed to Venice. From 1571-1878 it was Turkish. In 1878 its government was taken over by the British, who annexed the island in 1914. Cyprus is governed by an executive and a legislative council and/or a governor. Of the 24 members of the legislation, 15 are elected. In 1930 the inhabitants petitioned Great Britain for independence, and in 1931 there was serious trouble in the island, largely due to religious discord.

Cyrano de Bergerac Savinien, French romance writer and dramatist. He was born in Paris, March 16th, 1620, and studied with a country priest, and in Paris. He served in the army in 1639-40, when he began the exploits for which he is famous, such as his single-handed adventure against 100 enemies. He began to write in 1642, mostly classical tragedies, but his most famous works are romances, *L'Histoire comique des Etats du soleil* (1662) and *L'Histoire comique des Etats de la lune* (1656?). He died in Sept., 1655.

Cyrus Names of two rulers of Persia. Cyrus, the elder, called the Great, was the founder of the Persian Empire. He attacked Croesus, King of Lydia, captured Sardis and took the king prisoner. Later he captured Babylon, united the Medes and Persians and made Susa his capital. In 529 B.C., according to Herodotus, he was killed by the Scythians, according to Xenophon he died peacefully in bed. Xenophon's *Cyropaedia*, purporting to describe the life of Cyrus as an ideal ruler, is really a didactic romance.

Cyrus the Younger was a son of Darius Nottus, King of Persia. He revolted against his brother, Artaxerxes, and led an army of Greeks from Asia Minor into Persia, where, at the Battle of Cunaxa, he was killed in 401 B.C. This expedition is the subject of Xenophon's *Anabasis*.

Cyst Cavity in the body containing fluid. It is usually enclosed by a tough fibrous layer. Retention cysts, formed by the blockage of ducts through inflammation or disease, may occur in breasts, kidneys, tongue, sinews or skin. Dermoid cysts, containing sebaceous matter, sometimes develop teeth. Dog tapeworms, living as larvae in man, form hydatid cysts.

Cytology Study of the structure and functions of cells, the living units of cytoplasm, of which all animals and plants consist. It seeks to elucidate the history of cell formation and development, whether concerned with reproduction or growth, and the methods by which cells discharge their generalised or specialised duties. It is of special moment in tracing out the relationships of micro organisms to normal life processes, as well as to the causation and avoidance of disease. See CELL.

Czech People of Slavic stock mostly inhabiting the western region of Czechoslovakia. They form, with Poles, Wends and Slovaks, the western branch of the Slavs. Apparently migrating westward from the Upper Vistula in the 5th century, their speech became differentiated and was kept alive by John Hus and afterwards by the Moravian Brethren. The Czech University, founded at Prague in 1882, has fostered new and virile developments in their literature and culture. They number about 8,000,000.

Czechoslovakia Republic of Europe. It consists of five districts in central Europe, all before 1919 part of Austria-Hungary. These are Bohemia, Moravia, Slovakia, part of Silesia and Ruthenia. Its area is 54,000 sq. m. and its population (1930) 14,720,158, most of whom are Czechs and Slovaks. Prague is the capital, Brno, Ostrava, Bratislava and Pilsen are the next largest places. The country is very productive. Coal and iron are mined. The chief crops are sugar beet, potatoes, rye, barley and wheat. There are extensive forests. Hops are grown and beer is made and exported. Other exports are glassware and cotton and woollen goods. The chief ports are Bratislava (Pressburg) on the Danube and Aussig and Teschen on the Elbe, and the country has certain rights in Stettin and Hamburg. The railways are mainly owned by the state.

Czechoslovakia became a state in Oct., 1918. A national assembly met and Professor T. G. Masaryk was chosen president. The republic was recognised by a treaty of Sept., 1919, and in 1920 a constitution was framed. Masaryk remained president until Dec., 1935, when, at the age of 85, he resigned. Dr. Benes was appointed to succeed him. There is a parliament of two houses, both elected by proportional representation, and to them the ministry is responsible. There is an army of about 150,000 men raised by universal service. The unit of currency is the krone, equal to about 14d.

Czernowitz or Cernautzi. City of Rumania, the capital of Bukovina. It is 164 miles from Lemberg, and is an important railway centre. During the Great War the city was several times taken and retaken by Russians and Austrians, while from Aug., 1917, to the end of the war it was in German hands. Pop. 111,122.

DAB Fish of the flat fish family (*Pleuronectes limanda*) inhabiting British coast waters and brackish estuaries. It is about 12 in long with rough skin, light brown above and white beneath.

Dabchick Popular name of the little grebe (*Podiceps minor*). It has a greenish black back and red breast, and dives with its young beneath its wings, or on its back. The Caroline, or pied billed dabchick (*Podilymbus podiceps*) is occasionally seen in Britain.

D'Abernon Viscount. English diplomatist. Edgar Vincent was born at Slinfold, Sussex, Aug 10, 1857, and educated at Eton. He began his diplomatic career in Turkey. From 1883-80 he was Financial Advisor to the Egyptian Government and from 1889-07 Chairman of the Imperial Ottoman Bank. From 1890 to 1906 he was Unionist M.P. for Exeter and in 1914 he was made a baron. He was Chairman of the Royal Commission on the resources of the Dominions, and from 1915-20 of the Central Liquor Control Board. From 1920 to 1926, when he was made a viscount, D'Abernon was British ambassador in Berlin. His *Diary* appeared in three volumes in 1929-30.

Dacca City of Bengal. It stands on the Bhuri Ganga in the east of the presidency and is an important centre. From 1905 to 1912 it was the capital of East Bengal and Assam, a province now abolished. It has a number of industries, and here is the university opened in 1921, for Bengal. Pop (1931) 138,518.

Dace Freshwater fish of the carp family (*Leuciscus vulgaris*). Black brown, with silvery sides, it is 8 to 9 in in length, and up to 1 lb in weight. It swims in shoals in running streams in France, Germany and southern England, but not in Scotland or Ireland.

Dachshund Breed of dog. It is a distorted hound with short crooked legs, and is employed in Germany in badger hunting. In Britain it is a favourite domestic dog. It has a cylindrical body, about 8 in high at the shoulder, and weighs from 15 to 21 lb. The ears are long and pendulous and the tail tapering. The dog is rough or smooth haired.

Dacia Classical name for the region between the Danube and Carpathians, now part of Rumania and Hungary. Long occupied by independent Thracian tribes, it was subdued in A.D. 107 by Trajan, who created the Roman province of Dacia, separated from Moesia by the Danube. Under pressure from the Goths, Aurelian withdrew southwards into Moesia about A.D. 275, and formed a new province, Dacia Aureliana.

Dacoits Gangs of armed robbers in India. Dacoitry was especially rife in the 18th century, and also for many years after the annexation of Upper Burma in 1886, but was at length suppressed.

Dado In classical architecture, the plane faced portion usually rectangular, of the pedestal between base and cornice. Nowadays it is also the lower portion of wall interiors, with or without a separate capping,

when contrasted in material or design with the wall area above. It developed out of the panelled wainscoting which preceded it.

Daedalus Mythical Athenian sculptor. His name personified the most ancient achievements of sculpture and architecture. He is said to have entered the service of Minos, ruler of Crete, and made the labyrinth which housed the Minotaur. Displeasing Minos, he was imprisoned, but escaped by making wings for himself and Icarus. His son Icarus flew too near the sun and when the wax fastenings melted, he fell into the sea. Daedalus reached Sicily.

Daffodil Hardy bulbous plant of various species of narcissus of the amaryllid order. They are native to parts of Europe. The British lent lily (*Narcissus pseudo-narcissus*), whose solitary nodding flowers have crimped trumpet-shaped coronas, comprises many varieties, including the Tonby daffodil and the robust Spanish daffodil. Gardeners have hybridised hundreds of varieties, but the daffodil still grows wild in some parts of England.

Dagenham Urban district of Essex. It is 3 m from Barking and 11 from London, on the north side of the Thames and includes Becontree. Here are the English works of the Ford Motor Co. begun in 1928, and docks. Pop (1931) 89,365.

Daghestan Soviet republic. Lying west of the Caspian Sea, it was set up in 1921 and covers about 13,500 sq m. Its capital is Makhach-Kala. Pop 787,000.

Dago Name applied, more or less contemptuously, to Spaniards, Portuguese and Italians in general in the United States. Corrupted from the Spanish name Diego, James, it was used primarily of seamen in mixed crews, but has since been extended ashore to the poorer Italian immigrants.

Dagon National deity of the Philistines. He is referred to in the Old Testament (Judges xvi, 21, 23; I Samuel v 1), and was worshipped at Ashdod and Gaza. Possibly he is identifiable with Dagan or Babylonian god of agriculture.

Daguerre Louis Jacques Mandé. French inventor jointly with J. N. Niepce of the daguerreotype, and thus a pioneer of the art of photography. Born at Cormelles, Nov. 18, 1789, he took to operative scene painting and opened a diorama in Paris in 1822. Collaborating with Niepce, 1829-33 he continued after the latter's death to elaborate the process which bears his name and which was communicated to the Academy of Sciences through Arago in 1839, actually 11 days after the publication of the Talbot type process.

Dahlia Genus of herbaceous plants of the composite order. In 1781 specimens were brought to Europe from Mexico and cultivated by Dahl, a Swedish botanist whence its name. One species *D. variabilis* with yellow discs and dull scarlet rays, has yielded most garden varieties. Cultivated single dahlias derive from *D. coccinea* and cactus varieties from another species. The new dwarf hybrids are invaluable for borders, as they bloom freely, are sturdy in growth, and do not require supports.

Dahomey French colony in W' Africa. Adjoining Nigeria's western boundary, it runs from the coast northward to other French colonies. Westward lies French Togoland. Its coastline is only 70 m long, the total area is 41,302 sq m. Porto Novo is the capital. The chief products are cocconuts, kola nuts, oil palms and cotton. Roads and railways have been made. The kingdom was annexed by France in 1894. Pop (1931) 1,134,247.

Dail Eireann House of the legislature of the Irish Free State. The name was given by Sinn Féin members of parliament to the assembly they set up in Dublin in 1919. When the Irish Free State was created by treaty in 1922 the name was given to the Chamber of Deputies which with the Seanad Éireann, or Senate, constitutes the state legislature. It has a speaker, deputy speaker and clerk of the House. It consists of 153 members, elected by the constituencies of the Free State.

Daimler Gottlieb German engineer. Born March 19, 1834, he was responsible for some of the inventions that have made the modern motor car and its engine possible, and a well-known make of car is named after him. He also helped to invent the Otto gas engine. Daimler died March 6, 1900.

Dairen Seaport of Manchuria. It stands on the Liaotung peninsula 20 m E-N-E of Port Arthur. It has a good harbour and is the terminus of the S. Manchurian Rly, which has its headquarters here. It was handed over to Japan in 1905, and has since been the capital of the territory of Kwantung. The port does a considerable trade. Pop 282,665.

Dairy Place for collecting milk and preparing butter and cheese. In England dairying is supervised by a dairy commissioner under the Minister of Agriculture. The British Dairy Farmers' Association, founded in 1876, holds annual shows, and promoted a world dairy congress in 1928. Its Aviesbury school became the British Dairy Institute which, with the National Dairy Research Institute, is associated with Reading University. Dairy science studies the physiology of milk secretion, bacterial organisms, the food value of forage plants and the improvement of cattle.

DAIRYING AS A CAREER—See AGRICULTURE.

Dais Platform, particularly the one on which a table stands. In the dining halls of the colleges at Oxford, Cambridge and the Inns of Court, one table, called the high table, stands on a dais.

Daisy (*Bellis perennis*) Genus of hardy herbaceous perennial plants of the composite order. They are native to Britain and most parts of Europe. Cultivated garden varieties produce pink, red, and white giant double blooms. Marguerites, or ox-eye daisies, are *chrysanthemum leucanthemum* while the so-called Michaelmas daisies belong to the aster family.

Dakota Name of two states of the United States north and south. Both are in the north central part of the country, and are agricultural areas with a good deal of mountainous land. Each was admitted as a state in 1889, and each sends two senators and three representatives to Congress. North Dakota covers 70,837 sq m, and South Dakota 77,615 sq m. Bismarck is the capital

of N. Dakota, which has a population (1930) of 680,845. Pierre is the capital of S. Dakota, which has (1930) 692,849 inhabitants. The Dakotas are a branch of the Sioux Indians.

Dalai Lama Chief pope of Lamaism, the form of Buddhism prevalent in Tibet and Mongolia. Its hierarchy has two heads. One is called Dalai Lama, and lives at Potala, a hill near Lhasa. The other, called Tashi Lama, resides in the convent at Toshi-lun-po. Their powers, religious and civil, are identical, but the Dalai Lama possesses the greater territory.

Dalbeattie Burgh and market town of Kirkcudbrightshire. It is situated on Dalbeattie Burn, 5 m from Castle Douglas and 14½ from Dumfries, and its quarries have supplied the granite from which the docks at Liverpool and the Thames Embankment have been constructed. Other industries include concrete works, granite polishing, and dyeing. Pop (1931) 3011.

Dalgely Town of New South Wales. Situated on the Snowy River, it is in an agricultural district. It was proposed as a site for the Federal capital, which was, however, built at Canberra. Pop 4077.

Dalhousie Earl of. Scottish title borne by the family of Ramsay. In 1633 Lord Ramsay was made Earl of Dalhousie, and the title descended to James Andrew, the 9th earl. He succeeded in 1838, and in 1847 was made Governor-General of India, a post he filled until 1856 with great distinction. In 1849 he was made a marquis and he died Dec 19, 1860. The marquessate became extinct, but the earldom passed to a kinsman.

John William, the 13th earl, was secretary for Scotland in 1880. His elder son became the 14th earl in 1887, and his younger son Alexander Robert Maule Ramsay, married Patricia, daughter of the Duke of Connaught, in 1918. Dalhousie Castle, the earl's seat, is in Midlothian. His eldest son is called Lord Ramsay George, the 8th earl (1770-1838), was governor of Nova Scotia, the university at Halifax, founded in 1818, is called Dalhousie University.

Dalkeith Burgh and market town of Midlothian. It is 3 m to the south-east of Edinburgh, on the L.N.E. Rly. It has a corn market and is a coal mining centre. Pop (1931) 7502.

Here is Dalkeith Palace, a seat of the Duke of Buccleuch. Built about 1700 it stands in a large park. An earlier castle was one of the seats of the Douglas family. The eldest son of the Duke of Buccleuch is called the Earl of Dalkeith.

Dalmatia Province of Yugoslavia. It forms a narrow coastal region, 200 m long, on the Adriatic between Bosnia-Herzegovina and the sea, and is faced by innumerable islands with extensive fisheries. Occupying 4900 sq m, it is mostly mountainous. There are some good harbours. The chief towns are, Sebenico, Braza, Cattaro, Spalato and Ragusa. Until 1918 Dalmatia was Austrian territory. In 1920 it was given by treaty to Yugoslavia, except the capital, Zara, which was handed over to Italy. Pop 623,000.

Dalmatian Breed of dog. It is a lightly built pointer, perhaps with original bull terrier crossing, with unwrinkled head and smooth, glossy white coat with

evenly sprinkled black spots. It averages 50 55 lb in weight

Dalmatic Liturgical vestment A wide sleeved tunic became fashionable in Rome and Pope Silvester I (314-335) had his clergy wear this instead of the sleeveless garment. In its present embroidered form it is worn by deacons in the Roman Catholic Church and by bishops under the chasuble at mass

Dalmellington Village of Ayrshire. It is situated on the River Doon, 15 m. from Ayr on the L.M.S. Rly. A Roman road once passed through the parish towards Ayr. Iron working and coal mining are the chief industries in the neighbourhood. Pop 6183

Dalmeny Village of Linlithgowshire. It is on the Forth, 10 m. from Edinburgh, on the L.N.E. Rly. There is an old church here and also Dalmeny House, the seat of the Earl of Rosebery, whose eldest son is called Lord Dalmeny

Dalmuir District on the Clyde, part of the burgh of Clydebank. It stands where Dalmuir Burn falls into the Clyde, and has a station on the L.M.S. line. The important shipbuilding yard here was closed in 1930

Dalry Town of Ayrshire. It is 23 m. from Glasgow, on the L.M.S. line. In the neighbourhood are iron works and coal mines and there are textile manufactures in the town. Pop 7400

Dalston Suburb of London. To the east of the city, it is in the borough of Hackney. Another Dalston is a village in Cumberland, 4 m. from Carlisle

Dalton John. English scientist, and one of the greatest of chemists. Born Sept. 6, 1766, he became a schoolmaster at Kendal. In 1793 he became a lecturer at the New College, Manchester, and in 1822 an F.R.S. He died in Manchester July 27, 1844

In 1794 Dalton, himself colour blind, published the first scientific account of that defect often called Daltonism. He is better known, however, for his statement of the Atomic Theory of Matter which postulates that the elements unite in definite proportions by weight, the proportions being determined by the "atomic number." Thus the atomic weight of oxygen being 16, oxygen always combines in units of 16 or multiples of 16

Dalton laid down also two important laws. (1) The pressure exerted by and the quantity of a vapour which saturates a given space are the same for the same temperatures whether the space is a vacuum or is filled with gas. (2) (Dalton's Law) The pressure of a mixture of gases is the sum of the pressures which would be exerted separately by the several constituents if each alone were present.

Dalton-in-Furness Market town and urban district of Lancashire. It is 3 m. from Burrow. Furness Abbey remains are near. In the market place is an old building called Dalton tower. Pop (1931) 10,338

Dalton System Educational experiment. It was started in America in 1920 by Miss Helen Parkhurst at the Dalton High School, Massachusetts, and the Children's University School, New York. The system, which aims at a less artificial relationship between the child and its work, is based on the three principles of Freedom, Interaction of Groups, and Individual

Work. The work to be done is assigned to the child, who then attacks it independently of his schoolfellows, being supervised, and assisted if need be, by the teacher. The system has been adopted in some of the British Secondary Schools and experimented with in certain Elementary Schools

Dalziel George. British engraver. Born Dec. 1, 1815, he settled in London in 1835, and with his brothers started in business as an engraver. They provided the woodcut illustrations for an edition of *The Waverley Novels*, and did a great deal of work for *Punch*, *The Illustrated London News*, *The Cornhill Magazine* and other periodicals. Later Dalziel became a publisher. He died Aug. 4, 1902

Dam Term applied to an embankment or barrier of wood or masonry built across a river or lake. It serves to prevent or regulate the flow of water for purposes of irrigation, or for providing water power for generating electricity. Notable dams are those on the Nile at Aswan and Asyut, the Great Senaar dam in the Sudan, and the Lloyd dam in India

Damages Sum of money awarded to a plaintiff in a civil suit. If a person has been libelled, or injured or suffered loss on a contract, he brings an action stating the amount of the loss he has suffered. Damages are sometimes claimed in cases of divorce and seduction

Damascening Term applied to several processes for ornamenting metallic surfaces. The pattern may be deeply engraved with undressed grooves filled with gold or silver thread, and smoothed. Such work, highly developed in the East, was introduced by the Crusaders to Western Europe

Damascus Capital of Syria. Situated 57 m. S.E. of its port Beirut, it stands in the Anti-Lebanon foothills. It is a great commercial centre and through the Gate of God pilgrims go on their way to Mecca. Features of the city are the enormous mosque, the huge bazaar and 'the street that is called straight' in the Christian quarter

Damascus belonged in turn to Assyria, Persia and Rome, and from 661-750 was the capital of the Caliphate. In 1516 the Turks captured it and in Oct., 1918 the British entered it. Later, it became part of the new republic of Syria. Pop 193,912

Dame Title of honour also the legal designation of the wife or widow of a baronet or knight, prefixed to her Christian name and surname. The Order of the British Empire has dames grand cross (G.B.E.), and dames commanders (D.B.E.)

Damien Father. Belgian missionary. Born Jan. 3, 1810, he joined a French religious order having missions in the Pacific, was ordained priest at Honolulu in 1864, and in 1873 volunteered to take spiritual charge of the leper settlement. Though himself stricken with leprosy in 1885 he continued his work until his death, March 28, 1888. State-ments made by Dr. Hyde, a Presbyterian minister in Honolulu, after his death evoked R. L. Stevenson's celebrated letter to Dr. Hyde in defence of Father Damien

Damietta Town and port of Lower Egypt. Situated on a spit of land between Lake Manzala and the eastern branch of the Nile, about 10 m. from its mouth,

it surpassed Rosetta until the siting of its harbour diverted trade to Port Said and Alexandria. It is served by railway. Damietta was taken by the Crusaders several times. Pop 34,907.

Dammar Hindn name applied to various resins, specifically from coniferous trees. *Dammara orientalis* yields East Indian dammar, *D. australis*, the New Zealand kanri pine, yields Australian dammar. Both, dissolved in turpentine oil, make transparent varnishes. Black and white dammars are Indian resins from non-coniferous trees.

Damocles Favoured courtier of Dionysius the elder, tyrant of Syracuse. Having declared his patron to be the happiest of mortals, he was invited to a banquet and seated in the place of Dionysius where he observed above his own head a sword hanging by a single hair. The parable was effectively utilised by Cicero and Horace.

Damon Greek hero. Damon and Pythias were two friends. Dionysius of Syracuse condemned the latter to death. Damon took his place and remained imprisoned while Pythias settled his affairs. Pythias honourably returned in time for execution and Dionysius, impressed by their friendship, liberated both.

Damp Humidity. In mining phraseology "firedamp" is marsh gas, mixed with air and exploded, it produces "choke damp" (carbon dioxide). "Black damp"—an accumulation of irrespirable gases, causes lights to burn dimly, while "white damp" is used of carbon monoxide.

In Building—To avoid the upward passage from the soil of atmospheric vapour through porous building materials such as timber and bricks, a damp course is formed not less than 6 in above the ground level by horizontal, waterproof bands. These may be of slate, glazed stoneware slabs, sheet lead, asphalt, bituminised felt or similar impervious materials.

Damper Device for moderating the vibration of strings in keyboard instruments. Felt pad damper heads which press upon the strings by springs are connected to damper lifters. All dampers are released simultaneously when the loud, or right, pedal is depressed. This prolongs the vibration of the strings after the release of the keys, and excites others, harmonically related.

A damper is also a door or valve, arranged to diminish the aperture of an air-line or chimney, thus checking the combustion.

Dampier William English navigator, buccancer and hydrographer. Born in Somerset, 1652, he served ashore in the Caribbean, 1674-76. He buccanered in S. American waters, 1679-80, reached Guam in 1686, sighted Australia in 1688, and was, after a dispute with his comrades, marooned on the Nicobar Islands, reaching England in 1691. He explored the Australian coast from Shark's Bay to Dampier Archipelago and discovered New Britain off Dampier Strait. After two privateering expeditions in 1703-07, he piloted Woodes Rogers's circumnavigation voyage in 1708-11. He died in March 1715, leaving two books, *Voyages and Descriptions*, 1690, and *A New Voyage Round the World*, 1697.

Dampier Archipelago, off the N.W. coast of Australia, was a German possession until 1914. It is now governed by Australia under mandate from the League of Nations. Dampier Land is a peninsula of Western Australia.

Damson Fruit of a variety of the cultivated plumtree (*prunus domestica*). Mostly propagated by suckers, they are grown largely in Shropshire, Cheshire, Worcestershire and Kent. Smaller than the plum, and oval shaped like it, the damson is usually dark blue in colour, but yellow and other colours are grown.

Dan (Signifies Judge) Israelitish tribe named after Jacob's son Dan. Allotted the coastal region W. of Jerusalem, they could not resist the Ammonites without help from Ephraim and Judah. Part of the tribe accordingly migrated N. to Jordan's headwaters, where the ancient city Laish was renamed Dan. This became Palestine's northern limit. Hence the phrase "from Dan to Beersheba," in the South.

Danae In Greek legend, the daughter of Acrisius, King of Argos. She was the mother of Perseus by Zeus, who visited her in a golden shower when, for safety, concealed by Acrisius in a brazen tower. Mother and babe were sent adrift in a sea chest. In classical tragedies and on vase paintings, Danae personifies the thirsty earth fertilised by rain.

Danaides In Greek legend, 50 daughters of Danaus, King of Argos. Promised in marriage to the 50 sons of Aegyptus, they were bidden by their father to slay their husbands on the wedding night, all obeyed except Hypermnestra, who spared her husband, Lynceus. The guilty ones were condemned in Hades to the endless task of pouring water into bottomless pitchers.

Danbury Village of Essex. It is 4 m. from Chelmsford. Danbury Place was the residence of the Bishop of Rochester. On Danbury Hill, one of the highest points in the county, are remains of a Danish encampment. The name means Danes town. Pop 1200.

Another Danbury is a city of S.W. Connecticut, 65 m. N.N.E. of New York, famous for the Danbury Hatter's Case (1902) arising out of a trade union boycott.

Dancing Rhythmic steps and movements of the body. Primarily it is a spontaneous expression of strong emotion, religious or social, and is illustrated in the art of the Stone Age. Primitive peoples manifest it variously, as Australian corroborees, Iroquois corn dances, Hawaiian hulas and Asiatic posturings. The sound for measuring the rhythm enhances the emotional appeal, even if it is only mere hand clapping or drum-tapping.

Musio advanced with dancing to stimulate the sense of rhythm. The Morris dance round a maypole, brought by John of Gaunt from Spain, typifies the homely measures of Tudor England, and survives in the games of modern children. From Spain came the pavana, fandango, bolero and sarahand. France besides elaborating the gavotte, minuet and quadrille, remodelled the central European polka, schottische and waltz.

Dances comprise step dances, by individual performers, as jigs and hornpipes, rounds by pairs, with or without bodily contact, squares by even pairs, as reels and mazurkas, country dances, contre-dances, by indefinite pairs, and cotillions or Germans. American barn dances of negro origin, governed by jazz band syncopation, came to Europe and developed into the two step, the one step, and the fox trot. Stage dancing elaborated the latter, both French and Russian.

Dandelion Perennial herb of the compositae order (*taraxacum officinale*) It is native to all temperate and cold regions The lobed leaves resemble lions' teeth, *dents-de lion* Its long black tap root bears numerous hollow flower stalks with soil tary heads of yellow strap-shaped florets The seeds radiate white pappus hairs The cultivated dandelion is blanched for salads Phar macists prepare taraxacum extract from the dandelion, and its bitter juice forms a rustic remedy for warts

Dandie Dinmont Breed of dog Introduced in Teviotdale, largely through a farmer who was a character in *Guy Mannering*, it is a long backed, short legged border terrier With deep muzzle and hazel eyes, the dog is muscular and plucky, averaging 18 lb The silky coat is slate blue, pepper or mustard in colour

Dandolo Enrico A famous doge of Venice Born in 1108 he belonged to one of the leading families of the republic He visited Constantinople as an envoy to the emperor in 1173, but the story that he was blinded is not now believed In 1192 he was chosen doge He is chiefly remembered for his heroism in joining the Fourth Crusade in 1201 He added Crete and other districts to Venice and helped to found the Latin Kingdom of Constantinople He died there, June 23, 1205

Dandruff Excessive dandruff—dead, flaky skin—indicates an infectious disease of the scalp (*Seborrhoea*) very difficult to cure and liable to result in baldness

Treatment consists in frequent washing of the scalp with bland, pure soap, the removal of all dead, scaly matter, mild antiseptic and oily dressings and massage Olive oil rubbed into the scalp before washing is helpful in removing the dandruff Ultra violet ray treatment is effective, and attention to the general health is of the greatest importance

Another type of seborrhoea is accompanied by excessive greasiness, but the same general treatment is indicated.

Danegeld Tax imposed in England to provide money to buy off the Danes For about 60 years, from 991, it was paid from time to time by all landholders to keep the invaders away William I revived it in 1084, but it was used for other purposes

Danelagh Portion of N and N-E England handed over to the Danes In 878 by the Treaty of Wedmore, or perhaps in 886, the Danes obtained the E portion of Mercia, in which many of them had settled, called the Danelagh, and divided from the English section by a line running from London along the Lea to Bedford, then along the Ouse to Watling Street It included East Anglia, Northumbria, and a part of Mercia Early in the 10th century it was recovered by the English king

Danes Name given to the rovers from the Scandinavian countries who raided England before 1066 They are also called Northmen From 790 to 851 raids were fairly frequent and great damage was done by the invaders, who sailed up the rivers and landed in search of plunder

In 851 the Danes began to settle in England and Alfred the Great handed over the Danelagh to them

About 982 the Danish ravages began again Ethelred the Unready raised money, the Danegeld, to buy them off, and in 1002 he

instigated a massacre In 1013 Sweyn, King of Denmark, arrived and conquered the N of England, and in 1016 his son, Canute, became King of England He reigned until 1035, and his sons, Harold and Hardicnutte, until 1042, when the Danish rule ended Danish settlements may be recognised by the ending *by*, *e g*, Grimsby and Formby

Danewort Popular name for the dwarf elder (*Sambucus ebulus*) It is supposed to have reached Britain with the Danes. A native of Europe, W Asia, and N Africa It is a many stemmed herb, with pink tipped white bell shaped flowers in flat topped clusters They bear small, black globular berries The whole plant is distinctly purgative

Daniel Biblical character He was a Jew, one of the prisoners taken by Nebuchadnezzar to Babylon where he interpreted the king's dreams This made the Chaldean magicians very angry and Daniel by hostile strategy, was put into a den of lions from which he came out unhurt Daniel is mentioned by the prophet Ezekiel as a man of great wisdom

The Book of Daniel In the Hebrew Scriptures between Ezra and Esther External to the Law and the Prophets, it comprises six narrative and six apocalyptic chapters The original Hebrew, partly lost in antiquity, depends, from 11 4 to 11 27, upon contemporary Aramaic versions. From its minute familiarity with the events of the second century, modern scholarship dates its production to Antiochus Epiphanes reign (76 164 B.C.) The anonymous author presumably utilised oral traditions of a Jewish Babylonian captive to hearten his Maccabean countrymen

Dante Italian poet Dante Alighieri, the son of a lawyer, was born in Florence in May, 1265 In 1289 he served with the Florentine army in the field and in 1300 he was one of the city magistrates In 1301 he was sent on an errand to the Pope and, during his absence his party lost power, and he was banished He died at Ravenna, Sept. 14, 1321, where he is buried

Through life Dante dreamed of a great empire that would bring unity and peace to Italy and Europe When a child and once or twice later, Dante met a certain Beatrice, also a child He never married her but she became for him the personification of love and inspired his muse In 1292 he married Gemma Donati by whom he had four children

Dante's immortal work *La Commedia*, called, in an edition printed 250 years afterwards, *La Divina Commedia*, occupied eighteen years of his life It describes an imaginary pilgrimage of the human soul guided by Virgil (natural philosophy) and Beatrice (revealed religion) They descend through hell's three divisions, climb a seven terraced purgatory into the earthly paradise where Virgil leaves Beatrice to guide the pilgrims through the heavenly spheres to the Empyrean the intuitive vision of the Godhead *The Vita Nuova* completed in 1300, describes his love for the earthly Beatrice *De Vulgari Eloquentia* and *De Monarchia* are Latin treatises on Italian poetry and political relations respectively The London Dante Society was founded in 1899

Danton Georges Jacques French revolutionary leader Born at Arcis sur Aube, Oct. 26, 1759 he became a lawyer in Paris In 1789 he was President of the Cordeliers Club and he commanded the National Guard in 1790 He became adminis

trator of Paris in 1791 and Minister of Justice in 1792. He advocated resistance to the Prussians, using his famous phrase "De l'audace, encore de l'audace, et toujours de l'audace," and became one of the leaders of the revolutionary movement. He sat in the convention as a leader of the Mountain voted for the king's death, was a member of the Committee of Public Safety and of the revolutionary tribunal, but was not willing to follow Robespierre further. Consequently he was arrested and sent to the guillotine, April 6, 1794, after he had made a speech of remarkable power and eloquence to his judges.

Danube The most important river of S Europe. It rises at Donaueschingen in Baden and flows for 1740 m through Württemberg, Bavaria, Austria, Hungary, Czechoslovakia and Yugoslavia marking the Bulgo-Rumanian frontier, and crossing Rumania to the Black Sea. It has over 300 tributaries, and on it are three great capitals, Vienna, Budapest and Belgrade, where it is over 1 m wide, also Ulm, Regensburg, Passau and other historic towns, Bratislava, the port of Czechoslovakia and Orsova with the Iron Gates. It is navigable by large vessels to Braila and by river barges to Ulm, and is connected with the Rhine by the Main and a system of canals.

The Danube is an international river, passing through six countries, and is governed by an international commission set up in 1919, which meets in Vienna, and looks after the river between Ulm and Braila. For the rest of the river, from Braila to its mouth, a smaller commission was set up in 1956 with members from Great Britain, France, Italy and Rumania.

Danzig City and free state under the League of Nations. It stands on the Vistula, about 4 m from its mouth, at its junction with the Mottlau 280 m NE of Berlin. The territory included covers about 754 sq m. The older parts of the city retain their mediaeval aspect, and the town hall is a magnificent Gothic edifice of the 14th century. There is a good harbour for trade in timber, corn, etc. Poland has the right to use the port.

The free state is governed by a president, a senate and a diet of 72 members elected for 4 years, and there is a commissioner representing the League of Nations. In 1924 the Bank of Danzig was founded and a currency introduced with 25 gulden to the pound sterling. Until 1919 it was the capital of West Prussia. Earlier it was an important member of the Hansatic League. It has a broadcasting station (453.2 M, 0.5 kw.) Pop. (1929) 407,517.

Daphne In Greek mythology, the daughter of a river god. Her lover, Lencippus, who pursued her in woman's clothing, was slain by her attendant nymphs at Apollo's behest and she was changed by her mother into a laurel tree. The sanctuary and grove of Daphne, near Antioch, in Syria, was sacred to Apollo.

Dardanelles Strait between Europe and Asia. It united the Sea of Marmora with the Aegean. The classical Hellespont it is 47 m long and 3 or 4 m broad. At the Marmora end Gallipoli confronts Lapsaki, at the Aegean, Cape Helles confronts Kum Kale. Above its broad outlet the channel narrows, and is protected by castles on both sides. Between Sestos and Abydos, the channel 1300 yd wide, was crossed on boat bridges by the armies of Xerxes, 480 B.C., and Alexander, 334 B.C. There, too, it was

swum in legend by Leander, and, in fact, by Byron. The passage was forced by a British fleet in 1807, by Admiral Duckworth. In 1856 the peace of Paris confirmed the right of Turkey to the sole use of the straits by warships.

Dardanelles Campaign During the Great War, in 1914 and again early in 1915 the forts were bombarded by British and French warships and an attempt to force the straits failed with considerable loss. These operations preceded the landing on the peninsula of Gallipoli. The Treaty of Lausanne of 1923 placed the straits under an international commission. See GALLIOLI.

Dardanus Mythical ancestor of the Trojans. A son of Zeus and Electra, he was born in Arcadia. He crossed over into Asia Minor where he married a daughter of Teneos and founded Troy. From him the Trojans are called Dardanides. He is connected with Rome through the legend of Aeneas. Another story transferred the ancestors of Dardanus to Italy.

Darent River of Kent. It rises near Westerham and flows to the Thames which it enters near Erith. It is 20 m long and is navigable to Dartford.

Darent is a village on the river 2 m from Dartford. Here a Roman villa and an Anglo-Saxon cemetery have been unearthed. The village has paper mills.

Dar-es-Salaam Seaport of Tanganyika Territory. It has a sheltered harbour which accommodates ocean-going vessels. There are railways to Kiguma on Lake Tanganyika, 772 m away, and a branch from Tabora to Mwanza on Lake Victoria, 235 m away. With Bagamoyo it is the terminus of caravans from the interior, and handles a growing export trade of sisal hemp, coffee, cotton and minerals. It has a wireless transmitting station. Dar-es-Salaam was the capital of German East Africa before it surrendered to the British in Sept. 1916. Pop. (1930), 33,147.

Darfur Province of the Anglo-Egyptian Sudan, and semi-independent kingdom. The greater part of the country is a plateau for two to three thousand feet above sea level. Bordered westward by French Equatorial Africa (Chad colony), the frontier of which was delimited in 1924, southward by the Sudanese province of Bahr-el-Ghazal, and eastward by Kordofan, it occupies 175,000 sq m. Mostly arid, it is traversed by the Jehel Marra ridge, the watershed between the Chad and Nile basins. The negro and Arab population raises cattle and cereals. Copper and iron are mined. El Fasher is the capital. Pop. 1,500,000.

Dargai Station on the Indian frontier. On the Afghan border of the N.W. province, its railway station, the most northerly in India, terminates a branch from Narsabara. It is on a hill range dominating the Malakand Pass into the Swat valley, and in the Tirah campaign of 1897-98, British troops were forced to abandon it from lack of water, but it was retaken after an unsuccessful first attack, by the Gordon Highlanders, supported by the 2nd Gurkhas and the 3rd Sikhs, Oct. 20 1897.

Darien Name formerly applied to the neck of land joining Central and S. America now called the Isthmus of Panama. It was "silent upon a peak in Darien" that Balboa—not Cortez—looked down upon the Pacific in the Gulf of San Miguel in 1513. The

Darien River is now the **Tuira**. The **Sorranla** del **Darien** is an Andean range on the Colombian frontier.

The **Darien Scheme** was a plan to start a company in Scotland to trade with the **W Indies**. It was founded by **William Paterson** and authorised in 1605 by the parliament in Scotland. In 1698 settlers were sent out to **Darien**, but they found it impossible to remain there. The climate was bad and the Spaniards hostile. The scheme was disliked in England and its failure was attributed to this attitude, and there was much bitterness between the two countries for some years.

Darius Name of three Persian kings. **Darius I**, **Hystaspis** (521-485 B.C.) a son of **Hystaspes** established himself as successor to **Cambyses** after suppressing various rebellions. He made **Thrace** and **Macedonia** Persian, and undertook two expeditions into Greece, the second being over come at **Marathon**, 490 B.C. He organised the taxes, coinage, postal service, and maritime trade, dug a ship canal from the Nile to **Suez** and permitted **Zerubbabel** to build **Jerusalem's** second temple (**Ezra** vi).

Darius II, **Ochus** (424-404 B.C.), had a disturbed reign. Under **Darius III**, **Codomanus** (336-331 B.C.), **Philip** of **Macedon** and **Alexander**, victorious at the **Granicus**, **Issus** and **Arctia**, terminated **Achæmenian** rule in **Persia**.

Darjeeling Town and district of **Bengal**. The town, 7000 ft above sea level is a military and civilian health station, the summer quarters of the provincial government and an educational centre. It is 360 m from **Calcutta**, connected by railway. Tea and rice are grown in the province in which are some of the foothills of the **Himalayas**. Pop. 22,258.

Darlaston Urban district of **S Stafford** shire in the **Black Country**, about 2 m from **Wednesbury** on the **L.M.S. Rly**. The chief industries are coal mining and iron working. Pop. (1931) 19,736.

Darling River of **Australia**. It rises in the **Great Dividing Range** in **Queensland** and flows right across **Now South Wales** until it joins the **Murray** at **Wentworth**. The **Warrego** is its most notable tributary. On it are **Bourke**, **Louth**, **Menindie** and other places. Its volume of water varies very much, in a wet season steamers can ascend it beyond **Bourke**. Its length is 1160 m.

Darling Downs is a great grazing area in **Queensland**. It is famous for its sheep and contains coal mines. **Warwick** and **Toowoomba** are the chief towns.

Darling Grace English heroine. Born at **Bamborough**, Nov. 24, 1816, she was the daughter of **William Darling**, keeper of the lighthouse on the **Longstone**, one of the **Farne Islands**. On Sept. 7, 1838, the steamer **Forfarshire** was driven on the rocks about a mile from the **Longstone**. The **Bamborough** boatmen refused to put out through the wild sea. **hnt** Grace **Darling** persuaded her father to help her in taking a boat to their rescue. They reached the wreck and returned to the lighthouse safely with nine survivors, whom they tended for two days before they could be taken to the coast where the gale subsided. She received a purse of £700 raised by public subscription and many gifts and testimonials. She died of consumption at **Bamborough**, Oct. 20, 1842.

Darling Lord English lawyer. **Charles John Darling** was born Dec.

6, 1849, and became a barrister. In 1888 he was elected **Conservative M.P.** for **Deptford** a seat he retained until made a judge in 1897. He retired in 1923 and in 1934 was made a baron. His reputation as a wit was maintained by the volumes of verse he published, including *On the Oxford Circuit*.

Darlington Borough and market town of **S Durham** on the **Skerne**, a tributary of the **Tees**, 230 m from **London** and 18½ from **Durham**, on the **L.N.E. Rly**. It has been an important railway centre since the opening of the **Stockton and Darlington Rly** in 1825. The industries include railway locomotive shops, engineering works, iron works, and woollen mills. It is associated with the famous **Quaker** families of **Pease** and **Fry**. Pop. (1931) 72,003.

Darmstadt City of **Germany**. The capital of the republic of **Hesse**. 21 m from **Mainz**, it is an important railway junction. Manufactures include chemicals and beer. In the 16th century **Darmstadt** became the residence of the family ruling over the part of **Hesse** called **Hesse Darmstadt**. Pop. 90,000.

Darnel (*Lolium temulentum*) Annual grass related to rye grass. It is a native of Europe, temperate Asia and N. Africa. It differs from rye grass by its longer empty glumes and more turgid flowering glumes.

Darnley Lord Scottish noble. **Henry Stuart** was born at **Temple Newsam** Dec. 7, 1546, being the eldest son of the **Earl of Lennox**. Through his mother, a **Douglas**, he was descended from **Henry VII**. On July 29, 1565 he was married to **Mary**, **Queen of Scots** and their only child was the boy who later became **James I**. **Darnley's** short married life, marked by his share in the murder of **Rizzio**, was ended when he was blown up and killed whilst living in a house called **Kirk o' Field**, **Edinburgh**, Feb. 10, 1567. The share of **Mary** in this crime is still a riddle of history.

The Irish title of **Earl of Darnley** has been borne by the family of **Bligh** since 1725. The family seat is **Cobham Hall**, **Kent** and the earl's eldest son is **Lord Clifton**. The 8th **Earl** when **Hon. Ivo Bligh** was a noted cricketer.

Dart River of **Devon**. It is formed by the **E Dart** and the **W Dart**. Both rise on **Dartmoor** and unite at **Dartmeet**, whence the river flows past **Dartmouth** to the **English Channel**. On account of the beauty of the scenery through which it flows it has been called the **English Rhine**. It is navigable to **Totnes** and is 46 m long.

Dartford Market town and urban district of **Kent**. It stands on the **Darent**, a tributary of the **Thames** and 15 m from **London** on the **S Rly**. There are ruins of a priory, once a famous pilgrim resort. Cement and paper are made, and there are engineering works and flour mills. It is proposed to build a tunnel from here to **Purfleet**. **Wat Tyler** started his rebellion here (1381). Pop. (1931) 23,928.

Dartmoor Moorland district in **Devon** shire. It covers about 300 sq. m. and is about 2½ m at its widest extent. N. to **S** and **E** to **W**. It stretches from **Okehampton** almost to **Plymouth** and from **Tavistock** to **Newton Abbot**. It is practically useless for agriculture, though there is a little grazing. **High Willhays** and **Yes Tor** are the highest peaks, both just over 2000 ft. **Prince town**, with its convict prison is on the moor.

and on its edge are Lydford, Chagford and other places. The Dart, Tavy, Tolen and Okoment use on the moor. In the N it is used as an artillery range. The prison was built in 1808 to hold French prisoners of war. For some time after 1815 it was unused, but in 1830 it was made the chief convict prison for the country. In 1911 there was serious trouble among the prisoners.

The Dartmoor Terrier is a variety of fox terrier, bred to dig out foxes on the moor.

Dartmouth Borough, seaport and market town of Devon. It stands on the W bank of the Dart, 30 m from Exeter. Its station (G W R) is at Kingswear on the other side of the river. A good harbour is formed by the river and it is a yachting centre. Pop. (1931) 6707.

Dartmouth Royal Naval College was opened in 1905 to train officers for the navy. They enter the college after passing a competitive examination and remain there as naval cadets for nearly 4 years. The building is on Mt Boone and holds about 500 boys.

The title of Earl of Dartmouth was given to William Legge, a Secretary of State, in 1711. The earl's seat is Patsbury House, Wolverhampton. His oldest son is called Viscount Lewisham, in which district he owns a good deal of land.

Dartmouth City of Nova Scotia. On the E side of Halifax Harbour, it has engineering works and sawmills and a ferry crosses the harbour. It is the terminus of a railway line now part of the national system. Pop. (1931) 9,100.

Darton Urban district of Yorkshire (W R) on the Dearne, 4 m from Barnsley, on the L M S Rly. Coal mines and engineering works are the chief employments. Pop. (1931) 12,505.

Darwen Borough and market town of Lancashire, 20 m from Manchester, on the L M S Rly. The industries are the making of cotton and paper, coal mining and stone quarrying, and public baths were erected in memory of Sir Robt Peel. Pop. (1931) 36,010.

Darwin Port and town of N. Australia. It stands on a gulf in the extreme N., and is connected with the interior by railway. There is a good harbour. Its earlier name was Palmerston.

Another Darwin is a settlement in the Falkland Islands.

Darwin Charles Robert, English naturalist. The son of Dr Robert W. Darwin, F.R.S., he was born at Shrewsbury, Feb. 12, 1809, and educated there and at Edinburgh and Cambridge. From 1831 to 1836 he served as naturalist on board the *Beagle* in its survey of the Atlantic and Pacific Oceans, and the knowledge gained on this voyage laid the foundations of his later researches. In 1839 he married Emma Wedgwood and the next 20 years were spent in scientific researches, chiefly at Down in Kent. The results were published in *The Origin of Species* in 1859, a landmark in the history of science, and in 1871 appeared *The Descent of Man*. He died April 19, 1882.

The theories of Darwin were fiercely assailed and aroused bitter controversy. He believed that man is related to the lower animals and that in animal life there is a continuous struggle for existence which leads to the natural selection of those qualities that are most useful to preserve and continue the life of the species.

This is the doctrine of the survival of the fittest, or natural selection. Darwin gives many examples of the selective process, which he studied very intently. His theory that man is descended from the lower animals is now a truism of science. His theory of natural selection is accepted, with certain modifications due to the influence of environment, which he ignored or rejected. His bones at Down, Kent, is now the property of the British Association.

Darwin's sons inherited his gifts. Sir George Howard Darwin (1845-1912) was professor of astronomy at Cambridge 1883-1912. Charles Galton Darwin became professor of natural philosophy at Edinburgh in 1923. Sir Francis Darwin (1848-1925) was reader in botany at Cambridge and was responsible for his father's *Life and Letters*. Bernard Darwin won fame as a golfer and a writer on golf. Leonard Darwin (born 1850), the scientist's fourth son, became a soldier in the Royal Engineers. He went on several scientific expeditions and later became president of the Eugenics Society, and a writer on that subject. Sir Horace Darwin (1851-1928) became the head of a firm, at Cambridge, making scientific instruments.

Darwin Erasmus, English scientist. He was born at Elston, Nottinghamshire, Dec. 12, 1731, studied at Cambridge and Edinburgh, and became a doctor. His poem, *The Botanic Garden* (1792), shows a great love of nature, although the style is stilted and artificial. His most noted scientific work was his *Zoonomia*, 1794, in which he treats of pathology and generation. In this latter work he anticipated much of the Lamarckian idea of evolution. He was the grandfather of Charles Darwin and of Francis Galton. He died April 18, 1802.

Datchet Village of Buckinghamshire, on the S. Rly. It stands on the Thames, 2 m from Windsor. Datchet Mead is the scene of Falstaff's tribulation in *The Merry Wives of Windsor*. There are remains of a monastery near the bridge. Pop. 2056.

Date Fruit of a tree of the palm order. A native of N. Africa and S.W. Asia (*Phoenix dactylifera*), it is widely cultivated in India. Mediterranean Europe grows it for Palm Sunday foliage. It is straight-stemmed and crowned with feather-like leaves, the male and female flowers being found on separate trees. It grows to a height of 100 ft and bears dates in bunches of 200 or so. The natives of N. Africa use the date-palms for building huts, for fibre cloth, ropes and brooms.

The fruit of the date palm is very rich in sugar, and is largely exported to Great Britain.

The date plum is a tree that bears fruit about the size of a small orange. The plums are dried and eaten as a dessert fruit.

Daudet Alphonse, French novelist. Born at Nîmes, May 13, 1810, the son of a silk manufacturer, he was educated at Lyons and became a secretary in Paris. His studies of his early life in Provence, e.g. *Lettres de mon Moulin*, 1866, *Le Petit Chose*, 1868, appeared first in the newspapers but a wider fame came with the wonderful adventures of the imaginary Tartarin de Tarascon, *Tromont Jeune et Ruelier Aîné*, *Trente ans de Paris*, 1888, and *Souvenirs d'un Homme de Lettres*, 1888, are autobiographical. *L'Immortel* is a satire on the Académie. Daudet died in Paris, Dec. 17, 1897.

His son, Léon Daudet, born Nov. 16, 1867, became a journalist and editor of *L'Action Française*. He is better known, perhaps, as a

royalist, and his advocacy of that cause led to his imprisonment.

Dauphin Title borne by the eldest son of the kings of France. It means dolphin and was the title of certain princes in the 13th century or earlier. One of these, the Dauphin of Vienne, sold his lands to the prince who, in 1364, became King Charles V. He gave these lands to his son, and from that time the eldest son was called the Dauphin, just as in England he was called the Prince of Wales. His inheritance, the district round Grenoble, became known as Dauphiné.

Davenant Sir William English poet. The son of an innkeeper at Oxford, he was born in Feb. 1606, and was a godson of Shakespeare. In 1629 he was made poet laureate and became manager of a London theatre. In the Civil War he fought for Charles I. and was knighted, but later he was imprisoned as a royalist. He died April 7, 1663. Davenant wrote *The Cruel Brother* and other plays but is best known as the author of "The lark now leaves its watery nest."

Daventry Borough and market town of Northamptonshire. It is 74 m. from London and 12 m. from Northampton, on the L.M.S. Rly. The chief industry is the making of boots and shoes. Here the B.B.C. has erected two high power stations (5 XX and 5 GB) for the transmission of the Daventry National programme (1554.4 M 30 kW), and the Midland Regional (398.9 M 25 kW). Pop. (1931) 3608.

Davey Lord English lawyer. Horace Davey was born Aug. 30, 1833, and educated at Rugby and University College Oxford. In 1861 he became a barrister, and in 1880 Liberal M.P. for Christchurch. In 1886 and in 1892-93 he was Solicitor General. From 1888 to 1892 he was M.P. for Stockton. In 1893 he was made a Lord Justice, and in 1894 a Lord of Appeal and a life peer as Lord Davey of Fernhurst. He died Feb. 20, 1907.

David Biblical character. The youngest son of Jesse, a man of Jerusalem, he became a shepherd and famed for his skill on the harp. Samuel, the prophet, anointed him as Saul's successor in the kingship, and he became armour bearer to the king. Having killed the giant Goliath, he became the bosom friend of Saul's son, Jonathan, but Saul's enmity soon drove him into the wilderness where he became the leader of a body of discontented men who lived in the cave of Adullam. The death of Saul and Jonathan, in battle against the Philistines followed, and David became King of Judah but his reign was passed in warfare mainly against his rebellious son, Absalom, and others.

David is regarded as the founder of the royal line to which Jesus Christ belonged. His story is told in the books of Samuel, Kings, and Chronicles. He stands out as a national hero, remarkable for strength and skill, a great leader of men, but capable of dastardly deeds in pursuance of his ends. His statue by Michelangelo at Florence is one of the world's masterpieces.

David Name of two kings of Scotland. David I., a son of Malcolm Canmore, passed his youth in England. In 1124 his brother, Alexander I., died, and he became king. His chief work was to establish bishoprics and monasteries. He died May 21, 1153.

David II was a son of Robert Bruce. He became king in 1329, but passed many years as a prisoner, first in France and then, after

his defeat at Neville's Cross, in England. He died in Edinburgh, Feb. 22, 1371.

David Patron saint of Wales. According to legend he was a grandson of King Ceredig, uncle of King Arthur and a great miracle worker, and his mother was Non, a Cymric saint. Historically, he was born early in the 6th century and became Bishop of Mennevia, now S. David's. As the head of the church in Wales he moved the seat of ecclesiastical government from Caerleon to Mennevia. He founded many churches. He died about A.D. 501 and was canonised by Callixtus II in 1120. S. David's Day is March 1.

David Jacques Louis, French historical painter. Born in Paris, Aug. 31, 1748. His father was an architect. Under Napoleon he was given official recognition, but was afterwards exiled and died in Brussels, Dec. 29, 1825.

Among David's best pictures are "Madame Récamier" and "The Coronation". "The Rape of the Sabines" (1799) is usually no counted his masterpiece. He was also a politician, and as a member of the convention voted for the death of Louis XVI. later following Robespierre.

Gerard David was a Flemish painter who lived between 1450 and 1523. Some of his work is in the National Gallery, London.

Davidson Baron English archbishop. Randall Thomas Davidson was born April 7, 1848, near Edinburgh and was educated at Harrow and Trinity College, Oxford. In 1874 he was ordained and for 3 years was a curate at Dartford. In 1877 he was made domestic chaplain to the Archbishop of Canterbury, whom he served for 6 years. In 1883 he was appointed Dean of Windsor, in 1891 Bishop of Rochester, and in 1895 Bishop of Winchester. In 1903 he was chosen Archbishop of Canterbury, and for 25 years held that post, a longer period than most of his predecessors. He resigned in 1928 and was made a baron. He died May 25, 1930.

Davidson John Scottish poet. Born April 11, 1857, at Barrhead. His father was a minister. He was educated at Edinburgh and was for twelve years a schoolmaster. In 1890 he settled in London where the rest of his days were devoted to poetry, and his volumes, *Fleet Street Eclogues* and *Ballads and Songs* won for him a high place amongst the poets of his day. He drowned himself at Penzance, March 23, 1909.

Davidson John Colin Campbell British politician. Born in Aberdeen, Feb. 23, 1880, he was the son of Sir J. M. Davidson, a noted physician there. Educated at Westminster School and Pembroke College, Cambridge, he entered political life and between 1910-20 was private secretary to a succession of ministers. In 1920 he was elected Unionist M.P. for the Home Hempstead division and in 1923 was Chancellor of the Duchy of Lancaster. From 1924-26 he was Parliamentary Secretary to the Admiralty and was chairman of the Unionist party organisation from 1926 to June 1930. In 1928 he was made a Privy Councillor.

Davies Benjamin Grey Welsh vocalist known as Ben Davies. Born in Glamorganshire, Jan. 6, 1858, he studied music in London. For many years he was with the Carl Rosa Opera Co. and his tenor voice was also heard to great advantage in *Tranholme* and other operas at Covent Garden Theatre, London.

Davies Sir Henry Walford British organist and composer Born at Oswestry, Sept 6, 1869, he was a chorister at Windsor and took up music as a career After studying in London, he was appointed organist of Christ Church, Hampstead, in 1891, and in 1898 organist of the Temple Church, London He was (1903-07) conductor of the Bach Choir In 1923 he became professor of music at University College, Aberystwyth In 1924 he was chosen Gresham Professor of Music, and from 1927 to 1932 was organist of St George's Chapel, Windsor In 1922 he was knighted Davies is known for his cantatas and other music, and for his popular broadcasting talks, which were, however, discontinued for a year from June, 1934, to give him time for his literary and other activities He succeeded Elgar as Master of the King's Musick, April, 1934

Davies William Henry English poet Born at Newport, April 20, 1871, he lived a wandering life in America and Britain, chiefly as tramp and pedlar All the time he was writing poetry, and in 1906 his volume, *The Soul's Destroyer*, attracted a good deal of attention Other volumes followed, all showing a love of nature expressed in beautiful language These include *The Song of Love*, 1926 His prose writings include *The Autobiography of a Super-Tramp*, *A Poet's Pilgrimage* and *The Adventures of Johnny Walker*, *Tramp*

Davis Jefferson American statesman Born in Kentucky, Jan 3, 1808, he was in the army from 1828 to 1835 In 1845 he was elected to Congress by Mississippi, and served in the Mexican War (1846-47) In 1847 he became a member of the Senate From 1851 to 1855 he was Secretary for War, and in 1855 he returned to the Senate In 1861, when the southern states seceded from the union, Davis was elected their president and remained president during the war When it was over he was accused of treason, and passed some time in prison, but in 1869 he was released He died Dec 6, 1889, and was buried at Richmond, Virginia

Davis John English sailor, sometimes called John Davys (Not to be confounded with John Davys of Limehouse, also a navigator, who lived several decades later) Born in Devonshire about 1555, he went to sea, and in 1585 tried to find the North-West Passage After voyages to the Arctic Ocean, he went S and discovered the Falkland Islands in 1592, and then E to the Indies In 1604, Dec 29 or 30, he was killed during a fight with pirates in the eastern seas

Davis Strait, the channel connecting Baffin Bay with the Atlantic is named after him It is 200 m wide at the entrance and separates Baffin Island from Greenland Davis Sea, part of the Antarctic Ocean, is named after a later explorer, James Davis, who explored it in 1914

Davis Cup Trophy contended for by international lawn tennis teams It owes its name to Dwight Davis, an American politician Each team consists of four men From 1920 to 1926 it was won by the United States, from 1927 to 1932 by France and in 1933 by Great Britain

Davit Projection on a ship's side or stern for heaving a boat. Usually pairs of straight or curved wood or metal arms, they can be shipped or unshipped at will They commonly turn on their axes, enabling the boat to swing inboard for storage, or outboard for lowering by pulleys Cat davits are

similar forecastle cranes for catting anchors

Davitt Michael Irish politician Born in Mayo, March 25, 1846, he was the son of a peasant who was evicted from his holding and went to Lancashire in 1851 There Michael began to work in a cotton mill at Haslingden, and a few years later lost his right arm through a machinery accident He soon became an active Fenian, and was one of the band that attacked the castle at Chester in 1870, for trafficking in arms, he was sentenced to a long term of imprisonment, but was released in 1877 In 1879 he founded the Land League, but his activities led to his return to prison, while there he was elected M P for Meath, but as a convict was unable to take his seat He sat in the Commons as M P for South Mayo, 1895-99, but until Parnell's death he was one of his opponents In 1898 he helped to found the United Irish League He died May 31, 1906 Davitt's writings include *Lessons from a Prison Diary*

Davos Platz Winter and health resort of Switzerland It is in the Davos valley, which stands 5000 ft high It is famous as a resort for consumptives, and for its organised winter sports, including skating, ski-ing, ice hockey and bobsleighing

Davout Louis Nicolas French soldier, brilliant, but a despot Born in Burgundy, May 10, 1770, he became a marshal in 1804, and held commands at Austerlitz and elsewhere He was with Napoleon in Russia in 1812 and was then in Germany where, in 1814, he surrendered He joined Napoleon during the Hundred Days, and after Waterloo remained with the army to the last He was pardoned in 1817, when he regained his title of Duke of Angers, and took part in public life until his death, June 1, 1823

Davy Sir Humphry English chemist He was born at Penzance, Dec. 17, 1778, educated at the grammar school there, and apprenticed to a doctor In his early studies in chemistry he investigated the properties of gases, and discovered laughing gas After his appointment as professor of chemistry at the Royal Institution, London, in 1802, his work was concerned with agricultural and electro chemistry In 1810 Davy demonstrated the true nature of chlorine, and his discovery by electrolytic methods of the metals sodium and potassium was followed by the isolation of boron, proof of the combustibility of the diamond and the invention of the Davy safety lamp He was knighted in 1812 and received a baronetcy in 1818 In 1820 he was made President of the Royal Society He died at Geneva, May 29, 1829

Davy Lamp Miner's safety lamp It was invented by Sir Humphry Davy in 1815 An oil lamp is enclosed in a cylinder of metal wire gauze through which the flame cannot be communicated even in an atmosphere which contains sufficient coal gas to be explosive

Dawes Charles Gates American diplomatist Born in Ohio, Aug 27, 1865, he became a lawyer and practised at Lincoln, Nebraska Later he turned to business life, and in 1917 was appointed chairman of the purchasing board of the American army In 1923 he represented his country when the question of German Reparations was considered The scheme drawn up at that time was called the Dawes Plan, and provided for the payment by Germany of certain sums yearly the total amount to be fixed later It was operative until superseded by the Young Plan in 1929 In

1924 he was elected Vice President of the United States on the republican ticket. When he vacated that office in 1929 he was sent as ambassador to London. He retired in 1932 to take charge of the Reconstruction Corporation, but soon returned to business life in Chicago.

Dawlish Urban district and seaside resort in Devonshire. It is 12 m from Exeter and 3 m from Looe, on the G.W. J. The sea front is attractive with extensive sands. Pop (1931) 4578.

Dawson City Capital of the Yukon territory, Canada. A river port. It stands at the junction of the Rivers Klondike and Yukon, about 1500 m from the sea. Founded at the end of the 19th century, it became prosperous owing to the discovery of gold in the Klondike district. As the mines became less productive the city declined in importance. Pop 1000.

Dawson River of Queensland. It rises in the Carnarvon range and joins the Fitzroy River below Boulburra. The two rivers have a combined length of 350 m. Coal of good quality is found in the river valley, but not much mining has been done.

Dawson of Penna, Lord Bertrand Edward Dawson, the first baron, studied at University College and the London Hospital. He has done much research on gastric trouble and has published treatises on paratyphoid and infective jaundice on which he worked during the war. He became a peer in 1920, is Physician in Ordinary to the king, and was with King George V in his last illness.

Dawson Sir John William, Canadian geologist and naturalist. Born in Nova Scotia, Oct. 30, 1820, he went to Edinburgh to complete his education. In 1842 he started to survey Nova Scotia and in 1850 he was superintendent of education for the province. From 1855 to 1893, he was principal of McGill University, Montreal, and professor of geology there. In 1884 he was knighted, and in 1886 was President of the British Association. He died Nov. 20, 1899.

His son, George Mercer Dawson (1849-1901), was director of the geological survey of Canada. Dawson City is named after him.

Day John, English dramatist. Born at Newston, Norfolk, about 1574, he went to Cambridge. He is known as the author of a dramatic allegory, *The Parliament of Bees and Humour out of Breath*. He wrote plays in association with Henry Chettle and Thomas Dekker before his death in 1640.

Daybrook Village of Nottinghamshire. It is 3 m from Nottingham on the L.N.E. Rly. Lace and hosiery are manufactured and there are laundries and a large brewery. Bestwood Lodge is near.

Daylesford Town of Victoria, about 75 m N.W. of Melbourne. In an agricultural district, it is a mining centre and there is a school of mining. Pop 3846.

The original Daylesford is a village in Worcestershire. Warren Hastings, the Indian administrator, bought back the estate, which had for centuries been in his family, and rebuilt the house. He is buried in the churchyard.

Daylight Saving Scheme for giving extra hours of daylight in the summer. It was first brought forward by William Willett in an article published in *The Daily Telegraph* in 1907. The idea

was to advance the clock one hour during the summer so as to increase the daylight in the evening, thereby benefiting the general health and welfare of the community and reducing the consumption of artificial light.

For many years Willett faced great opposition but in 1916 a year after his death Summer Time became law by Act of Parliament, and by a further Act in 1925 the change was made permanent. This provides that on the morning of the day following the third Saturday in April or the second Saturday if the third is Easter eve, the clock shall be advanced by one hour. It is put back one hour on the day following the first Saturday in October. This applies to Great Britain and Northern Ireland, while France, Belgium and other countries have adopted a similar scheme.

Dayton City of Ohio. It is 50 m from Cincinnati, at the junction of the Great Miami River with three of its tributaries. It is an important railway junction with a network of electric lines. A busy manufacturing place, here are the works of the National Cash Register Co. and other large concerns. The city is a station of the U.S.A. air service. Pop (1930) 200,982.

Daytona Seaside resort of Florida. It is on E. coast about 50 m south of St. Augustine. It is famous for its beach on which motor races are run.

Deacon In the Anglican and Roman Churches, a member of a clerical order. The word in Greek means servant and the first deacons, of whom Stephen, the first Christian martyr, was one, were appointed soon after the death of Jesus Christ (Acts vi).

In the Church of England a man cannot be ordained deacon until he is 23 years of age. After serving as a deacon for a year, he is usually ordained priest. A deacon can conduct the services but is not permitted to consecrate the elements at the Communion service, or to pronounce the absolution. In certain Nonconformist churches deacons are laymen elected to manage the affairs of the church.

The office of deaconess existed in the early church, but after some centuries, owing to the growth of religious houses for women they disappeared. They were revived in the 19th century and are now found in the Church of England and various Nonconformist churches, as well as in Germany and the United States. In the Church of England since 1897 they have carried on social work after being licensed by a bishop, and have been ordained for work as missionaries abroad.

Dead Letter Office In Great Britain a department of the General Post Office. Letters which cannot be delivered because of being insufficiently addressed, the departure of the addressee, or any other reason are opened here and returned to the sender.

Deadly Nightshade Plant found in Great Britain and elsewhere. It grows in shady spots and bears reddish flowers and small black berries. The root, leaves and berries are very poisonous. Atropine and belladonna are prepared from the leaves and root. The plant is sometimes called the belladonna.

Dead Men's Fingers Popular name for a coral zoophyte *Aleporium dactylum*. It is frequently cast up on British coasts. The pink

spongy-looking masses are studded with tentacled polyps, which do not harden into solid skeletons. The word also refers to the spotted orchids, *O. maculata*, or marsh orchis, *O. latifolia*, with pale hand-like tufters. Shakespeare mentions them in *Hamlet* iv 7.

Dead Nettle Genus of annual perennial hairy herbs of the labiate order. It is native to temperate Europe, Asia and N Africa. The botanical name is *lamiaceae*. The commonest British species are the red flowered *L. purpureum*, white flowered *L. album*, yellow flowered *L. galeobdolon*, the imperfect flowered henbit, *L. amplexicaule*, and the spotted *L. maculata*, with white striped leaves and spotted flowers.

Dead Sea Lake of Palestine. It is 47 m long and covers 340 sq m. It receives the waters of the Jordan and lies 1300 ft below the level of the Mediterranean. The Arabs call it Birkat-Lut, or the Lake of Lot and it is supposed to occupy the site of the cities of the plains, Sodom and Gomorrah. Its waters, reduced by evaporation, contain 25 per cent. of alkaline salts, and asphalt is found near. Fish cannot live in the sea, but the human body floats easily on it. Steps have been taken of recent years to extract the salt.

Dead's Part In Scot's law the part of a person's estate which he can leave to whom he will. It is one-third for a married man with children, in other cases it may be half or even all. Like Roman law Scot's law does not allow a person to leave all his money away from his family.

Deaf Mute Person, who, unable to hear from birth or infancy, has never learned to speak. For teaching such persons to understand the thoughts of others, gestures were at first employed, but in time these gave way to a regular alphabet, in which there is a finger position for each letter. In Great Britain both hands are used, in the United States only one. Lip reading is also employed, but this is less satisfactory.

In Scotland the education of deaf mutes was made compulsory in 1890, and in England and Wales three years later. There are several societies for them in Great Britain. The Royal Deaf and Dumb Association, numbering about 60 local welfare societies, maintains churches for them. The National College of Teachers of the Deaf promoted an international conference on the subject in London in 1925. The National Institute for the Deaf at 2 Bloomsbury Street, London, W C 1, is concerned with their industrial training. In the United Kingdom there are about 40,000 deaf mutes.

Deafness Lack of hearing. Deafness from atrophied auditory nerves is permanent. It may result, in any degree, partial or transient, from imperfect conduction to the nerves of sound vibrations from the outside. It is due to inflamed external meatus, the presence of foreign body or hardened wax usually remediable, or a diseased or injured diaphragm of the middle ear or inner ear. Occupational deafness affects boiler-makers, artillerymen and others who hear constant noises. Nerve deafness, sometimes partial, frequently attends old age. Middle-ear deafness may be due to scarlatina, adenoids or nasal catarrh. Word deafness prevents sufferers from attributing meanings to words that they hear.

Deakin Alfred Australian politician. Born at Melbourne, Aug 3, 1857, he

was educated there and became a lawyer. In 1878 he was elected to the legislature of Victoria and from 1883 to 1886 he was minister of public works and Solicitor-General. From 1886-90 he was State Secretary. He worked for the federation of Australia and in 1900 became Attorney-General and a leading member of the first federal cabinet. In 1903 he followed Barton as prime minister, a post to which he returned in 1905. He resigned in 1903, but was again premier for a short time in 1909. He died Oct. 7, 1919.

Deal Borough and watering place of E Kent, and one of the Cinque ports. It is 9 m from Dover and 91 from London on the S Rly. Once Deal was a prosperous port, but the sea has encroached. It is now known as a pleasure resort. Pop (1931) 13,680.

Deal Trade name for sawn fir timber. It covers yellow Scottish *pinus sylvestris*, white American *p. strobus*, and silver fir, *abies excelsa*, besides allied building timbers. English deals are 7-9 ins by 3 ins or 6 ft. and over, those under 7 ins are battens, over 10 ins are planks, thinner are boards, shorter are deal ends. American deals are 11 ins by 2½ ins by 12 ft. A standard hundred of deals contains 120 pieces.

Dean (Lat. *decanus*) Ecclesiastical and collegiate official. It referred at one time to the judge of ten districts, and came to be used for the senior member of a society. Most of the English cathedrals and also Westminster Abbey and St George's Chapel, Windsor, each have a dean who is the head of the body called the chapter which is responsible for looking after its affairs. In the Oxford and Cambridge Colleges, the dean is responsible for all matters of discipline. Other deans are the Dean of the Arches, or Judge of the Court of Arches, and the Dean of Guild, an official in some Scottish burghs. A rural dean is a clergyman who looks after a part of a diocese.

Dean Forest of District of SW Gloucestershire. It lies between the Severn and the Wye, and covers about 80 sq m. It is largely crown property. Much of it is still forest land, where oaks and beeches grow, but elsewhere are coal mines. Cinderford and Coleford are the chief towns, the court of speech, now part of the Speech House Hotel, is the old capital. A railway line crosses the forest from Lydney to Lydbrook. Ruardean Hill (930 ft) is the highest point. St Briavel's is famous for its castle and church.

Death End of life. It may be natural or violent. In England and Wales if a medical man is unable to give a certificate saying that the death was from natural causes, an inquest must be held by a coroner, in Scotland an inquiry by a procurator-fiscal. Every death must be registered with the registrar of births, marriages and deaths, otherwise the burial cannot take place.

Death Duties are the duties charged on the property left by a dead person. In Great Britain they consist of estate duty and legacy duty. See ESTATE, EXECUTOR, LEGACY.

Death Rate Number of deaths occurring annually per thousand members of a country's population. Statistics are collected by the Government to show the increase or decrease between one period of years and another to compare the mortality of the sexes at different ages, and the incidence of death in one district or occupa-

tion with that in another Death rates are higher in tropical countries

Owing to improved methods of sanitation, greater medical skill scientific discoveries humanitarian ideas, etc., the death rate in all civilised countries has decreased greatly in recent years In 1876 the rate for England and Wales was 20.9 per 1000 Later figures for Great Britain and Northern Ireland are —

1930	11.7	1935	19.6
1931	12.6	1934	11.9
1932	12.3		

Death Watch Beetle Popular name applied to a small beetle (*xestobium rufohilum*) which lives in wood, and makes a ticking noise, wrongly supposed to foretell death The noise is really a mating call The ravages of this insect in furniture and old buildings are extensive, necessitating regular architectural surveys and often wholesale reconstruction

Deauville Watering place of France It is on the English Channel 10 m. from Havre and is separated from Trouville by the little River Touques The place, which has good hotels, golf links and other attractions, is much visited by Britons A race meeting is held in August Pop 3000

Debenture Bond issued by a company or other legal corporation as evidence of a loan of money raised The document states the amount of the loan, the rate of interest, the security (if any) and the terms of issue, including the lender's rights in default of payment of interest or principal Debentures, like shares, are often issued in series by companies who raise huge loans by this means, and can be transferred like stocks and shares on payment of a stamp duty

Sometimes second debentures are issued, in which case the others are known as first or prior lien debentures Debenture holders are not members of a company, but are creditors of it Debentures must be registered at Somerset House, London, W C

Deborah Prophetess of Old Testament history She encouraged the Hebrews to victory over Sisera in Canaan The Song of Deborah (Judges v.), one of the oldest specimens of Hebrew literature, describes the battle and the killing of Sisera by Jael

Debrecen Town of Hungary, 130 m. E of Budapest It is an important railway junction, and a market for horses cattle and agricultural produce The university was founded in 1912 and the area under the municipal authorities covers 650 sq m It was once a fortress and noted as a stronghold of the Calvinists Pop 117,275

Debrett John English publisher Born about 1752 In 1781 he took over the business carried on in Piccadilly London by John Almon Almon had retired in 1764 as a *New Peerage*, and this was turned by Debrett into *Debrett's Peerage and Baronetage* He died Nov 15, 1822

Debt Sum of money owing by one person to another If a person cannot get his debt paid he usually turns it over to a solicitor or a debt collecting agency In English law the process is to issue a writ or a summons for the amount If this is £100 or less the case comes on in a county court

if more than that amount in the high court. Unless the debtor is able to prove that he does not owe the money, the judge will order it to be paid and, if this is not done, a distress can be levied on his goods If there are no goods on which to levy a distress, the creditor should apply for a judgment summons In this case the judge usually orders payment by instalments, and if the debtor then fails to pay he can be imprisoned for contempt of court In Scotland the process is somewhat different.

An ordinary debt cannot be claimed if it is more than 6 years old, under the Statutes of Limitation, unless it has been acknowledged in writing since that date In the case of a debt expressed in a deed, called a specialty debt, the period is 20 years The limitation of debts does not operate in the case of money due to the crown

Debussy Claude Achille French musician He was born at St Germain-en-Laye Aug 22, 1862 and after studying at the Paris Conservatoire, won the Grand Prix de Rome with a cantata *L'enfant prodigue* in 1884 Debussy then became a pioneer of Impressionism, seeking to distil into musical terms the sights, sounds and atmospheres of nature His orchestral work, *L'après-midi d'un Faune* (1894), his opera *Pelléas et Mélisande* (1902), and his lovely piano-forte music are proofs of his success He died March 25, 1918

Decalogue (Gr *deka*, ten, *logos*, words, speech) The ten commandments According to the account related in Exodus, they were given by God to Moses on Mount Sinai, and were originally written on two tables of stone They were first introduced into the liturgy of the Church of England in the prayer book of Edward VI in 1552 They are not to be regarded merely as definitions of different crimes, but as ethical and spiritual precepts

Decameron Collection of tales written by Boccaccio The idea is much the same as that of Chaucer's *Canterbury Tales*, some of which are borrowed from Boccaccio, who in turn, borrowed from other writers During the plague in Florence in 1348 certain persons left the city and stayed for 10 days in an inn Here they told the stories Boccaccio wrote the book about 1350 The first English translation was made in 1620

Decapolis (Gr *deka*, ten, *polis*, city) District of the Roman Empire occupied by a league of 10 cities They enjoyed various privileges, struck their own coins and were liable to military service The decapolis of Palestine probably formed during Pompey's campaigns in the East is well known Gadara was one of its cities

Deccan District of India A Sanskrit word which means "southern," the Deccan is a great plain lying to the S. of the Vindhya Hills, with the Ghats, E and W, on either side In it are Bombay and Madras, as well as the Central Provinces Some believe that it was part of a continent now mainly under the sea Much has been done since the Great War to irrigate the district now named Gundwanaland

Decimal In arithmetic, a term applied to a fraction having ten or some power of ten as a denominator It is represented by a point, thus 4 means four tenths

and 62 5 means 62½ To divide or multiply by ten and multiples of ten the point is moved in one way or the other, and if necessary noughts are added, thus, 33 412 divided by 1000 is 033412

The decimal system of coinage has been adopted in most civilised countries except Great Britain and India A standard unit is taken for reference, such as the franc in France and the dollar in the United States In the metric or decimal system of weights and measures the metre is the standard unit of length, the gramme of weight and the litre of capacity The other measures are this unit multiplied or divided by ten or a multiple of ten, e.g., a kilogram is a thousand grammes

Decimation Selection by lot of every tenth man It was a Roman military punishment, adopted to avoid undue weakening when large numbers of troops merited death for mutiny It occasionally applied also to captured prisoners The term nowadays incorrectly designates wholesale destruction, such as decimation by fever or enemy fire

Decius Caius Messius Trajanus Roman emperor Of obscure birth he rose to be governor of Moesia, whither he was sent to pacify the revolting army His soldiers forced him to assume the purple and he was also recognised in Rome He was finally defeated and slain by the Goths in a battle on the Danube His brief reign, from 249 to 251, is especially notorious for a cruel persecution of the Christians

Declaration Formal statement of any kind Outstanding examples are the Declaration of Indulgence of 1687, the Declaration of Rights of 1689, the American Declaration of Independence in 1776, the Declaration of Paris, concerning maritime warfare in 1856, and the Declaration of London on similar subjects in 1908-9 In English law, solemn declarations before authorised persons sometimes replace affidavits A deathbed declaration respecting cause of death may be valid evidence Declarations of trust must be in writing and signed In Scots law prisoners may make signed declarations before magistrates within 48 hours of arrest, parties appearing before a court after ascertainment of facts, such as marriage, are entitled to a declaration Declarations of war nowadays usually follow initial acts of hostility

De Clifford Baron English title, one of the oldest in the peerage It was given in 1299 to Robert de Clifford His family became extinct in 1605, and the barony was in abeyance until 1691 In 1721, having been held by the Tuftons, it again fell into abeyance, as it did in 1775 and 1832 In 1832 it came to Sophia, wife of John Russell, a descendant of the Southwells who held it from 1776 to 1832 and in that family it has since remained

Declinator Instrument used in astronomy for determining the declination of a star or place in the heavens This is the angular distance from the celestial equator as seen from the earth, thus corresponding with terrestrial latitude, just as right ascension corresponds with longitude

Decomposition As generally applied, the decay or separation of the constituents of a substance As regards organic matter this process is expedited by the action of bacteria, fungi and various insects as well as by rain, frost,

etc, and the acids set free from decaying matter act as agents in the decomposition of rocks In the case of granite the solvent action of carbonated waters resolves the rock into its constituents to form beds of sand and Kaolin

Decorated Period Style of Gothic architecture intervening between Early English and Perpendicular It covers approximately the reigns of the first three Edwards, 1272-1377 Dog tooth passed into ball flower moulding, foliage became more naturalistic, and ogee curves developed A geometric style, e.g., as in the angel choir at Lincoln and the nave at Lichfield, became, by eliminating circle tracery, flowing and curvilinear The choir stalls at Westminster and Ely and Aymer de Valence's tomb in Westminster Abbey illustrate other forms Other fine examples of decorated work are the spires of the cathedral at Salisbury, of St Mary the Virgin, Oxford, and of the cathedral towers at Hereford and Wells

Decoy Contrivance for luring wildfowl into snares or within reach of guns The term, denoting in Tudor England a sharper and a card game, was perhaps transferred to Dutch duck cages In Stuart times Charles II made one in St James's Park in 1685 Channels are made from an estuary into a pool Archod with nets gradually narrowed, and the wild fowl lured therein by trained decoy ducks In America artificial birds float in suitable spots Some sportsmen hang caged partridges in trees as decoys

Decree Authoritative decision having the force of law The term designates such decisions by Roman emperors, and subsequently by ecclesiastical councils, e.g., Trent. Formerly denoting equity decisions, decrees are now usually called judgments, except notably in the divorce court, which makes decrees for restitution of conjugal rights, judicial separation or divorce Those for separation or divorce, at first conditional, or decrees nisi (unless) become absolute after six months

Decretal Letters and official acts of the popes, which had the force of law and were unreservedly accepted The first collection of these were sent by Innocent III in 1210 to the University of Bologna, additions being made by later popes. Apocryphal decretals soon became common, the most celebrated collection appeared in the 9th century in the Frankish Empire, under the name of S Isidore It was received as authentic by the councils and popes

Dedham Town of Essex It is 7 m from Colchester and about 2 m from its station Ardleigh on the L N E Ry It was once a centre of the cloth trade and had a market The Stour flows by the town and on it is a picturesque mill Dedham has association with Constable, the artist

Deduction In mathematics the act of subtraction Accountants deduct losses from gross receipts, agents deduct commissions before making payments In logic deduction is the act of deducing from general principles particular results Deductive reasoning is followed in making weather forecasts Thus, if for many years it has been wet on the 40 days following 8 Swifthis day, it can be deducted that it will be wet during that period in the future The

opposite, though similar process from the particular to the general, is induction

Dee Name of several British rivers The Welsh Dee rises in Bala Lake and flows to Chester where its estuary begins It is 70 m long, but its commercial importance has been destroyed by the accumulation of sand in the estuary

Another Dee is in Aherdeenshire 90 m long and passes Balmoral on its way through Dee-side to the sea at Aberdeen It is famous for its salmon A shorter Dee, in the county of Kirkcudbright, is 45 m. long and rises in a loch of the same name

Dee John English alchemist Born in London, July 13, 1527, he was educated at Cambridge He claimed to foretell the future by means of the stars and crystals He was put in prison in the time of Mary, but Edward VI gave him two livings in the church, and Elizabeth believed in him and visited him for advice He died at Mortlake in Dec 1608 Dee claimed to be able to transmute gold and suggested a reform of the calendar He wrote books on mathematical subjects His son Arthur Dee (1579-1651) was physician to the tsar of Russia and to Charles I

Deed In law a document given under seal more binding than an ordinary agreement It must be stamped, the value of the stamp varying according to the amount of property dealt with by deed It should be signed by each party to it and the signatures witnessed Deeds are executed where houses and land are sold or mortgages are granted Settlements of money on marriages are often executed by deed

Another deed is a deed of arrangement by which an insolvent person hands over his property to his creditors and so avoids bankruptcy A deed made by one person is called a deed poll Examples are where a man changes his name or gives a power of attorney to some one

Deemster Judge in the Isle of Man There are two deemsters who hold courts, one in the N and the other in the S division of the island for the trial of offenders The name, formerly used also in Scotland means one who pronounces a doom or judgment The late Sir Hall Caine published a novel called *The Deemster* in 1887

Deeping George Warwick English novelist Born at Southend-on-Sea, in 1877, he was educated at the Merchant Taylors School, London and at Trinity College, Cambridge He took a medical degree in 1902 and practised for a short time In 1903 he published a novel and henceforward, except during the Great War when he saw active service with the R.A.M.C., he devoted his time to writing, his reputation rising steadily with each work They include *Bertrand of Brittany* 1908, *Martin Valiant*, *The Prophetic Marriage* 1920, *Sorrill and Son* 1925, *Old Pybus*, 1928, *Isop's Pow* 1929, *The Exiles* 1930, *The Road* 1931, *New Wine and Old* 1932, *Two Black Sheep* 1933 and *Sackcloth into Silk*, 1935

Deer Family of solid horned ruminants They are found all over the world except in S Africa and Australia Their horns or antlers which are shed and renewed every year are borne by all the stags or male deer except the musk deer They are also borne by the females of the reindeer

Three varieties are found in Great Britain

the red, the roe, and the fallow deer The roe deer is found wild in the Scottish Highlands and on Exmoor There are also tame herds in various deer parks, where the fallow deer is also seen The flesh of the deer called venison can be eaten At one time it was an important article of diet especially among the rich hence every large house had its deer park

To day deerstalking is a popular sport in the Scottish Highlands where over 3 000 000 acres are given up to deer forests The season is from Aug. 12 to Sept. 12 for stags, and from Nov. 10 to March 31 for hinds, as the females are called

Deerhound Breed of dog A rough haired, stoutly-built variety of Scottish greyhound, it is used especially in deerstalking Brindled, fawn or blue, it has long tapering head and stern and well-arched loins. Quick running and keen-scented, it averages 90 lbs in weight. The almost extinct Irish deerhound has reappeared by careful breeding

Default In law a failure to do some thing It is used when a person fails to defend an action brought against him In such cases judgment is usually given for the other party

Defence Protection against attack In the United Kingdom the defence of the country from foreign enemies is in the hands of the navy army and air force, each with its own organisation It has been proposed that these should be combined into a single ministry of defence To consider the defence problems of the British Empire there is a Committee of Imperial Defence with a secretariat at 2 Whitehall Gardens, London, S W 2 There is an Imperial Defence College at 9 Buckingham Gate S W 1

Several warships have borne the name *Defence* One was the armoured cruiser that was sunk in the Battle of Jutland

Defence of the Realm Form of martial law established in Great Britain by the Defence of the Realm Act Aug 8, 1914 Collectively called D O R A. It was consolidated, Nov 27 1915 and amended Mar 16 1916 Under this legislation the King in council proclaimed during the Great War a multitude of regulations affecting every aspect of the national life They concerned factories railways lights bells, information, censorship, shop hours, enemy trading and food control When the act lapsed an Emergency Powers Act, 1920, enabled the Government departments to keep many of its provisions in force especially those concerned with the sale of food and drink

Defender of the Faith Title, in Latin *defensor* conferred on Henry VIII in 1521 It was a recognition by Pope Leo X of the King's treatise defending the seven sacraments Withdrawn after the breach with Rome Parliament reaffirmed it in 1534 and it remains part of the official designation of the British crown Inscriptions on coins usually show *F D* or *fid def*

Deflation Removal of the contents of a gas bag thus reducing its volume. By analogy it denotes a reduction in the amount of paper money in circulation from 1914 to 1920 the volume of paper money increased enormously especially in France and Germany causing a great rise in price

To check this the amount of paper money was gradually reduced, bringing prices down, and this was known as deflation. See REFLATION

Defoe Daniel English writer Born in London about 1659, he was the son of a butcher, James Foe. He studied at Stoke Newington to become a Nonconformist minister, but instead entered business life in London. In 1613 he married and in 1685 took part in Monmouth's rebellion. He was in the army of William III and soon after the revolution of 1688 began to write first as a supporter of the King. In 1702 he wrote the ironical *The Shortest Day with the Dissenters*, to whom he still belonged, and for this he was put in the pillory and imprisoned. While in prison he started *The Review* a landmark in the history of English journalism. At first a weekly, after a time it was issued three times a week until it ceased in 1713.

In 1703 Defoe was released and for the next 25 years he was busy writing, though he found time to travel in Europe and to serve the government as a secret agent in Scotland and elsewhere. His many political writings have no permanent importance, but through them he exercised a potent influence on English journalism, of which he was one of the founders. But great as is his title to fame, it is overshadowed by that of the author of *Robinson Crusoe*, the first part of which appeared in 1719. Some of Defoe's other books include, *The Journal of the Plague Year*, *The Political History of the Devil*, *The History of Colonel Jack*, and *A Tour through Great Britain*. His novels include *Moll Flanders*. Defoe lived at Tooting, where he was associated with a dissenting congregation, and then at Stoke Newington. He died at Moorfields, April 26, 1731, and was buried in Bunhill Fields. In 1931 the bi-centenary of his death was celebrated.

Degas Hilaire Germaine Edgar French artist Born in Paris, July 19, 1831, he studied there. He soon won a reputation by his paintings of dancing girls and was especially remarkable for his draughtsmanship. He died in Paris, Sept. 27, 1917.

Degeneration In biology a term used for modifications in certain organisms representing changes from a higher to a lower type of structure. It often accompanies parasitism. This is seen well in the crustacean family of the fish louse where in some the appendages are reduced, the eyes absent and the antennae represented by hooks, in others the body is vermiform and other parts are correspondingly reduced. In one type which is parasitic on crabs, the adult stage has the form of a large sac without mouth or appendages.

Dehra Town of British India. In the United Provinces, it is 70 m from Aithala, and is a railway junction. It takes its name from the River Dehra and the district of which it is the capital is called Dehra Dun. Pop. 36,000.

Deira One of the early English kingdoms. It consisted of the land between the Tees and the Humber, and came into existence about 500, or later. A century or so later it was united with Bernicia and the two were called Northumbria. The boys seen by Pope Gregory in the slave market at Rome came from Deira.

Deism Belief in a personal God, detached from the world and recognised

by the light of reason. This current of rationalistic thought, denying Christianity and the supernatural authority of the Scriptures was incipient at the Reformation. It emerged in England through the teachings of Lord Herbert of Cherbury, who in the 17th century laid down its 5 ruling principles, and of Blount, Pindal, Coland, Woolston, Middleton, the 3rd Earl of Shaftesbury, Collins and Bolingbroke. Their influence reached Voltaire, Rousseau and Diderot in France, Eberhard, Reimarus and Lessing in Germany. English deism encountered the strength of the evangelical revival provoked Butler's *Analogy of Religion*, passed into the scepticism of Hume and precluded later developments of free thought. Deism is distinguished from theism, which regards God as in touch with His creation.

Dekker Thomas English dramatist. He was born in London about 1570 and passed his life there, but little else is known about him. He was more than once in prison for debt, and died about 1632. Dekker wrote a number of plays some of them with Ben Jonson, Webster, Massinger, Middleton and other dramatists. His own include *The Shoemaker's Holiday* and *The Pleasant Comedy of Old Fortunatus*. With Middleton he wrote *The Rearing Girl* and with Ford and Rowley *The Witch of Edmonton*. He also wrote *The Gulls' Handbook*.

Delagoa Bay Opening of the Indian Ocean. It consists of an inner and an outer bay and the two form a wonderful harbour. It is on the E coast of Africa in Portuguese territory, and on it is Lorenzo Marques. A railway runs from there to Pretoria, 350 m away, and Delagoa Bay is the obvious outlet for the produce of the Transvaal. The ownership of the bay was a matter of dispute until 1875, when arbitration gave it to Portugal.

De la Mare Walter John English poet and novelist. He was born at Charlton, Kent, April 25, 1873, and educated at the choir school of St. Paul's Cathedral. From 1889 to 1908 he was employed by a business firm in London but during this time he became known as a writer. His novels include *Henry Brocken*, *Memoirs of a Midget* and *The Return*, which won a literary prize. He is best known, however, for his poems, *Songs of Childhood*, *The Listeners* and other poems, and further volumes. A collected edition appeared in 1920. He also wrote *Crossings*, a fairy play, and some volumes of stories. In 1933 appeared *The Lord Fish*, a collection of tales.

Delamere Village and forest of Cheshire. The station is on the Cheshire Lines Rly. between Chester and Northwich. Of the forest much has been put to agricultural uses, but some of it remains. The title of Baron Delamere has been borne since 1821 by the family of Cholmondeley.

Delane John Thaddeus English journalist. The son of a barrister, W. F. A. Delane, he was born in London Oct. 11, 1817. He went to King's College, London thence to Magdalen Hall, Oxford. In 1840 he joined the staff of *The Times*, and in 1841 was made editor. He had then become a barrister. He retired in Nov. 1877, and died. Nov. 22, 1879.

Delane did much to make *The Times* the foremost paper in the land. For nearly 40

years he dictated its policy and in so doing set an example of fearlessness and independence

Delaroche Hippolyte, often known as Paul French painter He was born in Paris, July 17, 1797 He studied under Baron Gros and exhibited in the Salon from 1822 onwards The most popular of his paintings are, "The Death of Queen Elizabeth" and "The Children of Edward IV," but one of the greatest is the "Hemicycle," which decorates the amphitheatre of the Ecole des Beaux Arts, Paris He is represented in the Wallace Collection, London He died Dec 11, 1856

Delaware One of the Atlantic states of the U.S.A. This stretch of land along Delaware Bay covers only 2370 sq m Dover is the capital, but Wilmington is the largest town Two senators and one representative are sent to Congress, and there is a general assembly of two houses to manage state affairs Delaware became British in the 17th century, and was one of the 13 original states of the union Pop (1930) 238,380

Delaware River of the United States It rises in New York State in the Catskill Mts, and separates that state from Pennsylvania and later, Pennsylvania from New Jersey It is 400 m. long and the chief town on its banks is Philadelphia It is navigable to Trenton and is much used commercially It falls into Delaware Bay, an opening of the Atlantic

De la Warr Baron English title It dates from 1299, when Roger de la Warr, a landholder in Sussex, became a baron In 1426 it was inherited by Reginald West, a descendant in the female line His descendant Thomas, the 12th baron (1577-1618), was the first governor of Virginia The state and River of Delaware were named after him John, the 16th baron, was made an earl in 1761 The 5th earl married a daughter of the Duke of Dorset, and since then the family name has been Sackville West Herbert Edward Sackville who became the 9th earl in 1915, was a member of the Labour ministry in 1924 and again in 1929-31, and joined the National Government as Under Secretary for Agriculture

Delcassé Theophile French statesman Born at Pamiers, Mar 1, 1852, he became a journalist In 1889 he entered the Chamber of Deputies, and in 1892 was made under secretary for the colonies In 1894 he was made colonial minister and, after three years out of office he was chosen foreign minister in 1898 He retained that post for 7 critical years until the dislike felt by Germany for his policy compelled him to resign in 1905 He then became minister of marine which position he left in 1913 to become ambassador to Russia In 1914 he again became foreign minister, but he resigned in Oct 1915 Delcassé, who died Feb 21, 1924, had a good deal to do with bringing about the informal understanding between Great Britain, Russia and his own country, which materialised at the outbreak of war in 1914 In foreign affairs he was the outstanding figure of the Third Republic

Delft Town of South Holland It is 5 m from the Hague on the little river Schie and is connected with the capital by river rail and tram The so called "new" church is dedicated to S

Ursula, and contains the burial place of the Orange family and a memorial to William the Silent The house in which William was killed is now a museum Agneta Park is an industrial quarter The town has some manufactures and a trade in agricultural produce Pop (1932), 51,286

In the 17th century Delft was famous for its porcelain This became a flourishing industry and early pieces are very valuable They are usually in blue with scenes from Dutch life crowded on to them

Delhi City of India, the capital of the Empire since 1911 It stands on the Jumna, 954 m N.W. of Calcutta Until 1911 it was in the Punjab but when it became the capital it was, with the surrounding district of 593 sq m placed directly under the Government and ruled by a Chief Commissioner

There have been several cities on or near the site The present one was built by Shah Johan in the 17th century and his work is seen in the palace, or fort, and the grand mosque, both unique buildings, the fort being entered by the famous Lahore Gate The tomb of Humayun is also notable Its native industries include metalwork, ivory carving, weaving etc The modern ones include flour milling and cotton spinning

About 5 m to the S.W. is the new city of Delhi This has wide roads and large open spaces, all laid out on a definite plan to give unity and beauty to the place A vast circular block of buildings with halls for the various parts of the legislature, a large library, and the viceroy's house was formally opened in 1930 A university was opened in 1922 Pop (1931) 365,883

Delilah Philistine woman beloved of Samson He revealed to her that his strength lay in his hair, so she treacherously cut this off and betrayed him to his enemies The story is told in Judges xvi, 4-31

Delirium Condition of mental disorder generally accompanying a specific bodily disease More or less temporary, it is a symptom of disease and treatment should be directed to its predisposing cause It may display incoherence, vivid hallucinations, violent maniacal acts and coma Delirium tremens, a acute disorder supervening on chronic alcoholism, is marked by trembling especially in the early stages Raving delirium may accompany acute fevers and alcoholism and induce attempts at suicide

Delius Frederick British composer He was born of German parents Jan 29, 1863 in Bradford, Yorkshire, and in 1883 he went to Florida as manager of an orange plantation He gave up business for music, to which he had hitherto devoted his leisure, and in 1886 went to Leipzig where he studied composition In 1890 he settled in Paris His important works include concertos for violin, violoncello, piano and violin and 'cello combined *Appalachia, Sea Drift, Requiem*, and other choral works *Paris, Brigg Fair, On Hearing the First Cuckoo in Spring* and other orchestral works In 1932 he produced an opera *Koango* 1 *Village Romeo and Juliet* is his best known musical drama He was made a Companion of Honour in 1929 and six festival concerts were held in his honour in London He died in June 1931

Della Robbia Family of Florentine artists which gave its

name to a famous ware Luca della Robbia (1399-1482) brought to perfection the art of enamelling terra cotta His nephew, Andrea (1435-1525) produced fine examples of enamelled reliefs adapted to friezes and medallions He died in 1525, leaving five sons, three of whom were notable artists There are examples of Della Robbia ware in the museum at South Kensington

Delorainé District of Selkirkshire Scotland, long associated with the Scott family The title of Earl of Delorainé was given in 1700 to Henry Scott, a son of the Duke of Monmouth It became extinct in 1807 when the 4th earl died Delorainé is the name of a town of Tasmania It is 32 m from Launceston and is an agricultural centre

Delos Smallest of the Cyclades Islands in the Aegean Sea A floating island, Zeus made it stable, to provide a refuge for Latona, who there gave birth to Apollo and Artemis On it there was a magnificent temple of Apollo, now being excavated by the French Made a free port by the Romans, it prospered greatly A league formed by Athens and other cities in 477 was called the Delian League, and its treasury was for a time at Delos

Delphi In ancient geography, a town in Phocis, on the slope of Parnassus It was the seat of the oracle of the Pythian Apollo, and was supposed to be the centre of the earth Greek cities and foreign princes sent rich presents to Delphi, and placed their treasures under the protection of the god The modern name is Kastri

Delphinium Genus of hardy ranunculoid plants, both biennial and perennial Delphiniums bear tall spikes of blue, mauve, or purple blooms, in many beautiful varieties They are grown from seed planted in April, and the seedlings transplanted for blooming the following year

Delta Fourth letter of the Greek alphabet The word is used for the mouths of rivers which bring down a great deal of alluvial deposit forming a mass round which the stream flows in two or more branches The delta of the Nile is the most famous The delta of the Ganges—Brahmaputra covers 50,000 sq m, and that of the Mississippi 12,000 Other rivers with deltas are the Danube and the Rhône

Delta Metal Class of brass alloys which contain iron in addition to copper and zinc, but extended now to brasses containing manganese, tin and aluminium as well as iron Iron increases the strength of the alloy, and the other additional metals impart particular properties Delta metal is very fluid when melted producing fine-grained sound castings, and it can be worked either hot or cold

Deluge Great flood, pre-eminently that described in Genesis as overwhelming all living beings except Noah, his family and the animals which accompanied them in the ark The Biblical story is paralleled in early Babylonian literature and in folklore all over the world Excavations at Ur and Kish (q.v.) have revealed deluge floors and antediluvian remains supporting the view that the story concerned local floods in the Euphrates valley

Delville Wood Small wood in France. It covers about 160 acres and is between Longueval

and Ginchy On July 15, 1916, it was taken from the Germans, after terrible fighting, by the S Africans The Germans retook it in March, 1918, but lost it again in August In 1920 the wood was bought by the S African Government, and a memorial to the S Africans erected there

Dementia Mental feebleness It may follow mania and other acute mental diseases There is a specific form of dementia called dementia paralytica—or general paralysis of the insane—in which there is marked physical deterioration as well as mental It is a fatal disease, though recently it has been treated with induced malaria, with good results Senile dementia, the general enfeeblement attending advanced life, accompanies arterial degeneration Dementia praecox is a form occurring at puberty Dementia affects a mind that is previously formed, amentia is mental deficiency from birth

Demerara River of British Guiana It rises in the highlands of the colony and enters the sea at Georgetown Its length is 180 m. and it is navigable for 90

Demerara is also the name of a district between this river and the Berbice River It gives its name to the brown sugar which was first produced here

Demeter In Greek mythology, one of the Olympians She was the goddess of the products of the fields and the protectress of marriage She is best known for the rape of her daughter Persephoné (Proserpina) by Pluto, god of the underworld, and her wanderings to find the lost child

Democracy Term used for the rule of the people A democracy is a state in which the people, either directly or indirectly through representatives, decide their own affairs

The earliest democracies were the Greek states, but these were small and every citizen could take a personal part in the deliberations Something of this kind was the custom among the Anglo-Saxons and other Teutonic tribes and through these the idea of self government was kept alive

Partly through the influence of the Church, the representative system was evolved upon which the great modern democracies work In all of them, whether kingdom as Britain, or republic, as France, the will of the people, as expressed in voting for their representatives, is the ultimate authority The people, long considered as being only the adult males, have come in the 20th century to include also the adult females

At the same time a certain impatience with democracy, once regarded as an ideal system, has manifested itself In some countries a dictator has superseded assemblies elected by the people In Italy this movement against democracy has taken the form of Fascism

Democratic Party Political party in the US

It arose soon after the formation of the Republic, and the presidents from 1801 to 1861 were nearly all Democrats Since then only Grover Cleveland in 1884 and 1892, and Woodrow Wilson in 1912 and 1916 have secured election Its candidate at the election of 1928 was Alfred Smith, Governor of New York, who was defeated by Mr Hoover In 1932 Franklin Roosevelt was selected as candidate

Democritus Greek philosopher, called the "father of physics"

Born at Abdera, in Thrace, about 480 B.C., he died about 370 B.C. Following Leucippus he propounded an atomic theory of the universe, wherein all is movement in space. The soul is material, there is no Deltv, and the *summum bonum* is pleasure without pain.

Demonology Study of supernatural beings below divine rank, conceived as influencing mankind. The generalised animistic spirit world became specialised into evil demons, disease demons and others. Such spirits, all nameless, were recruited from disembodied spirits, departed human and animal souls, and its offspring of *incubi* and other obsessions. The attribution of personal names converted polydemonism into polytheism, the unnamed spirits becoming agents of divine powers. The idea of moral dualism separating benignant angels from malignant demons, is a belief which characterises much popular superstition.

Demosthenes Greek orator. Born in Athens in 384 B.C. he began his career as a speaker by pleading against the guardians who had robbed him of his property. When addressing the people he failed through faulty pronunciation so he went into retirement in order to overcome this defect. He then reappeared in Athens and made successful speeches in the courts.

Turning to political life Demosthenes employed all his energies in opposing the designs of Philip of Macedonia on Greece. He fought in the Athenian army at Chaeronea in 338, but fled from the field in the disastrous defeat. After the death of Philip in 336 he took the lead in opposing his son Alexander. In 324 he was imprisoned for laxity in safeguarding the public funds entrusted to him, but he escaped and lived for a time in exile. In 322 he was recalled to Athens and he led an expedition against Antipater of Macedonia. This was beaten at Crannon and Demosthenes committed suicide on the island of Calauria. Many of his speeches have survived. The greatest are *De Corona* (on the crown), delivered after some Athenians had proposed to give him a golden crown, and the *Philippics*, against Philip of Macedonia.

Dempsey Jack Irish American pugilist. Born in 1895 his real name is Wm. Harrison. He was a lumberjack before taking up pugilism and came into prominence when he defeated the world's heavyweight champion Jess Willard at Toledo in 1919. He remained champion until 1926, when he was beaten by Gene Tunney. After his defeat by Tunney, Dempsey became a film actor.

Demurrage Shipping term. When goods are shipped the charter of the vessel signs a document known as a charter party, setting out the conditions of the transaction including the number of days allowed for loading and unloading. If the stipulated time is exceeded a charge, known as demurrage, is made for each day in excess.

Denarius Principal silver coin of republican and Imperial Rome. It was originally of the value of ten asses (about 9d.). The *denarius* of the reign of Vespasian is the penny of the New Testament. About A.D. 215 it was so debased that it contained only 40 per cent of pure silver.

Denbigh Borough and market town of Denbighshire also the county town 30 m. from Chester, on the L.M.S. Ry. There are ruins of a castle and a priory some

manufactures and a trade in agricultural produce. Pop. (1931) 7249.

The title of Earl of Denbigh has been held by the family of Keiligh since 1622. The Earl's oldest son is called Viscount Kildare. His seat is Nownham Paddox, Warwickshire.

Denbighshire County of N. Wales. It has a short coast line on the Irish Sea, beautiful scenery, and, in the E., lead and coal mines. Denbigh is the county town. Other towns are Wrexham, Ruthin and Conway. In the county are Colwyn Bay, Llangollen and other pleasure resorts. The rivers include the Dee, Conway and Clwyd. The area is 665 sq. m. Pop. (1931) 157,646.

Dendrite Crystalline structure in certain minerals. In it the crystals diverge from one another and from a common axis so as to resemble a leaf or tree like growth. This is seen in native copper and pyrolusite occurring in sandstone.

Dene-hole Ancient excavation chiefly found in Essex and Kent, S.E. England. At Grays, Essex scores of them lie closely together. They are bowl-shaped chambers sometimes with apses in corners and are reached by vertical shafts, 3 ft. across sunk through the sand for a distance up to 60 ft. The chambers were from 16 to 20 ft. high. Sometimes utilised subsequently for refuges the Britons perhaps sank them as silos for storing wheat.

Denham Village of Buckinghamshire. It is 2 m. from Uxbridge and 14 from London, on a joint railway. Denham Court and Denham Place are noteworthy houses. Denham has become an outer suburb of London.

Denis French saint. He was born in Italy and sent into Gaul as a missionary in the time of the Emperor Decius. He became Bishop of Paris, but about 276 he was beheaded by the Roman governor at Catullacus (now St. Denis), and his tomb became the site of a priory. In 625 Dagobert founded a monastery there and many French kings were buried therein. Later, a Denis or Denys was made the patron saint of France. His day is Oct. 9.

Denman Lord English lawyer. Born in London July 23, 1779. Thomas Denman was educated at Eton and St. John's College, Cambridge. In 1806 he became a barrister and made a reputation by defending Queen Caroline in 1820. In 1830 Denman was made Attorney General and in 1832 Lord Chief Justice. He died Sept. 22, 1854.

Denman's title, created in 1834, came to 1891 to a great grandson, another Thomas Denman. He, the 4th baron, married a daughter of Viscount Cowdray and was Governor General of Australia, 1911-14.

Denmark Country of Europe. It consists of a piece of land on the mainland and several islands among them Zealand, Lügen, Falster and Bornholm. It includes part of Slesvig, which was restored to Denmark in 1919. The total area is 16,576 sq. m. and the pop. (1932) 3,590,000. In addition Denmark owns Greenland and the Faroe Islands. Iceland is independent but is under the same king. Copenhagen is the capital and the largest town. Other centres are Aarhus, Odense, Aalborg, Hørsens and Randers.

The borders of the country are the sea except where in the south Denmark touches Germany. Much of it is very fertile and in

Intensive methods of cultivation its production of butter, eggs and bacon is very large, something like £50 000,000 being sent into the United Kingdom in a year. The fisheries are valuable. The unit of currency is the krone, worth about 1s 1d, and the metric system of weights and measures is in use.

Denmark's early history is very closely connected with that of the other Scandinavian countries, and at one time all were under the same ruler. The union was dissolved in 1448 when Denmark chose a king of the house of Oldenburg, but Norway and Denmark were united until 1815. In 1863 there was a crisis on the extinction of the ruling family Christian IX of Schleswig-Holstein was chosen king and Schleswig and Holstein were taken by Prussia after a short war. In 1912 Christian X succeeded his father, Frederick VIII as king.

The parliament, or Rigsdag, consists of two houses and the actual control of affairs is in the hands of a council or cabinet. There is an army raised by universal service and a small navy. Lutheranism is the state religion. The socialists are very strong in the country and formed the largest party in Parliament after the election of 1932.

Denmark Hill Suburb of London. It is in the borough of Camberwell, on the south side of the river. There is King's College Hospital.

Denotation In logic, all that is included in a term. Its opposite is connotation, which means the properties of a thing. Thus, man denotes all human beings, whether white, yellow, black or red. Man connotes certain possessions such as a brain, two arms and two legs.

Density Property of matter. It is defined as the amount or mass or matter in a unit of volume of a substance. The unit of density for solids and liquids is taken as that of distilled water, and the ratio of density of a substance to that of water is termed specific gravity.

Denstone Village of Staffordshire. It is 5 m. from Uttoxeter, on the L.M.S. Rly. It is chiefly known for its Church of England school for 300 boys, founded in 1873.

Dent Word of twofold origin. As a variant of O.E. *dint*, it denotes a hollow produced by blow or pressure. Maize, because each kernel is depressed, is called dent corn. When denoting a notch it is confused with the Latin word for tooth (*dens*). The French form often designates tooth-like Alpine peaks, e.g. the Dent du Midi.

Dentist Specialist practitioner concerned with diseases of the teeth and their treatment. In Great Britain dental practice was systematised by the Dentists Act 1878, which instituted a register in the charge of the General Medical Council. Unregistered persons were forbidden to use the term dentist or dental practitioner.

Since 1921 no person can be registered unless he or she has passed through a course of training in the medical and dental schools in London or elsewhere. The usual degree is L.D.S. or licentiate in dental surgery, given by the Dental Board at 44 Hallam Street, London, W.1. The interests of the profession are looked after by the British Dental Association at 23 Russell Square, London, W.C.1.

Dentistry Department of curative practice for diseases of the teeth, their conservation, extraction and arti-

ficial replacement. It studies the therapeutics of the mouth applying operative surgery for conserving, and prosthetic surgery for substituting. Dental practice arose in antiquity. Filling appeared in the 9th century, gold-foil treatment in the 16th century, gold-capping shortly after.

Fauchard who wrote *Le Chirurgien dentiste*, 1728, the father of modern dentistry, introduced specialised training, the bow and drill—precursor of modern dental engines—porcelain instead of ivory for artificial teeth, and the retention of upper dentures, as false teeth began to be called, by suction. Great advances were the invention of metallic and vulcanite bases for dentures, and the introduction of anaesthetics by gas administration or local injection. Nowadays systematic attention is given to mouth hygiene in early years, the correction of badly grown teeth, and the inculcation of cleanly habits. There are organised services in elementary schools, and other institutions, dental hospitals, and an army dental corps. The Royal Dental Hospital of London is in Leicester Square, and in 1930 the Eastman Dental Clinic, said to be then the finest in the world, was opened at the Royal Free Hospital, London, W.C.

DENTISTRY AS A CAREER—There is a growing demand for properly qualified dentists and good monetary rewards can be obtained both from private practice and from public appointments. The extension of school and clinic dentistry provides more and more promising openings for women in the profession.

Before he is legally entitled to practise, a student must have his name entered on the Dentists' Register, and to qualify for this he must have obtained one of certain recognised Diplomas or Degrees. The majority of the universities and some outside bodies grant a Diploma and at a number of the universities degrees in Dental subjects may also be taken. Information is obtainable in the first instance from The Registrar, Dental Board of the United Kingdom, 44 Hallam Street, London, W.1.

At many hospitals and schools special arrangements are made for women students. Communications should be addressed to the Deans of the schools or the Registrars of the universities.

The fees payable for the Diploma Course vary considerably but the following may be taken as an example.

	£	s.	d.
Pre-registration subjects	24	10	0
Total tuition fees (payable in instalments)	250	0	0
Books, instruments, etc.	75	5	0
Club subscriptions, admission fees, etc.	20	5	0
Examination fees	11	0	0
Total	£426	15	0

Scholarships are frequently available.

Dentition Arrangement of the teeth in vertebrate animals. Absent from birds, they are supplemented in reptiles and fishes by accessory teeth on the palate. Their conformation and number vary in different orders. In mammals, those in the foremost jawbones usually one-rooted, are incisors, those in the jaw proper generally include on each side a long pointed one-rooted canine and several grinding teeth, usually with two or more roots, those being premolars and the hindmost molars. In most mammals the permanent teeth are preceded by a set called the "milk teeth."

Denton Market town and urban district of Lancashire. It is 7 m from Manchester on the L.M.S. Rly. Hat making is the main industry. Pop (1931) 17,383.

Denton Park, near Otley in Yorkshire, was long the seat of the Fairfax family.

Denudation Action of the weather, rivers and sea upon rocks. It causes the disintegration of rock masses and the transport of the loosened material to lower levels. Subaerial denudation is due to frost, glaciers, changes of temperature, wind rain and the chemical action of solvent waters of rivers. By denudation, a granite may be decomposed into micaceous sands and china clay, while sedimentary rocks are built up from the debris of older ones.

Denver City and capital of Colorado, U.S.A. It stands on the South Platte River, near the Rocky Mts with university, zoological and botanical gardens and an observatory. Denver is an important railway junction and the market centre for the produce of Colorado. There are some manufactures. Pop (1930) 287,861.

Deodar Coniferous evergreen tree, similar to the cedar. It forms extensive forests in the Himalayas at an altitude above 7000 ft., and also grows in Baluchistan and Afghanistan. It sometimes reaches a height of 200 ft. The timber, which is light red in colour and very durable, is valuable in cabinet making.

Deportation System of punishing criminals by transporting them to penal settlements outside the country they inhabit. The system is no longer practised in England, although undesirable aliens can be expelled. Criminals were at one time transported to Virginia, and later to Australia, but the practice was abolished in 1856. In France and certain other countries the system of deportation is still maintained for the worst type of criminals.

Deposit Name applied to anything separated or laid down, e.g., in chemistry the sediment of a liquid, and in geology a bed of material accumulated by natural means.

The word is also widely used for an initial payment as an earnest of good faith against which goods are delivered in a business transaction, and for a sum of money paid into a deposit account in a bank, withdrawal being subject to notice and interest being allowed.

Deposition Evidence given on oath in a court of law. It is particularly used for an affidavit, i.e., a statement, taken down in writing to the truth of which the deponent afterwards swears.

Deposition Process by which strata are formed by the action of water. These strata represent the sediment deposited by streams, lakes or the sea. At a river mouth transported material will be sorted into gravel and sand near the shore with clay and mud farther seaward. Marine deposits are represented by organic oolites and in the greatest depths by a fine red clay.

Depôt French word meaning laid down, and used in England specifically for a place where goods are stored, e.g., a furniture depôt. In America the word is used for a railway station for goods or passengers but in England it is used in this connection only for a goods station. In military matters, a depôt is

a centre where recruits are received and trained. Each regiment has its depôt.

A **depôt ship** is a ship that carries stores for a fleet at sea.

Depreciation Term used to denote a fall in value. In particular it is applied to the percentage written off the book value of assets to reduce them to their market value. The Companies Act permits a company to pay dividends only out of profits, and to arrive at an accurate computation of depreciation must be allowed for. Income tax legislation allows certain deductions on account of depreciation from profit for tax purposes.

Deptford Borough of the County of London. It is on the south side of the Thames between Bermondsey, Camberwell, Lewisham and Greenwich, with a short frontage on the river. The parish church is an interesting building. It includes much of the New Cross district. Deptford is chiefly famous for its associations with the navy. It had a dockyard and a victualling yard in the 16th century or earlier. John Evelyn's home, Sayes Court, was in Deptford. Peter the Great of Russia (q.v.) worked in the dockyards as a craftsman. Pop (1931) 106,886.

Depth Charge Form of submarine mine first used in the Great War. It consists of a charge of explosive so arranged as to explode at a given depth. The mine consists of a steel case provided with rings at either end for handling and enclosing a charge of explosive. At the centre is a primer or detonator above which is placed the timing apparatus or "pistol".

Deputy Name applied in France and elsewhere to the members elected to the chamber of deputies. A clerk of the peace, a recorder, or a county court judge may appoint a deputy, but judges of the supreme court cannot do so. In the City of London each of the aldermen has a deputy for his ward.

De Quincey Thomas, English writer. Born in Manchester, Aug. 15, 1785, he was educated at Worcester College, Oxford, and afterwards lived in the Lake District, where Wordsworth and Coleridge were among his friends. He married Margaret Simpson, and earned a living writing for the magazines. In 1828 he moved to Edinburgh and he died there, Dec. 8, 1859.

A man of powerful intellect, a wide reader and a real student, with an extensive knowledge of Greek, German and other languages, De Quincey's career was marred by his addiction to opium. Nevertheless he ranks as one of the great writers of imaginative prose. His *Confessions of an English Opium Eater* first appeared in *The London Magazine*. Notable too are his essays *On Murder Considered as One of the Fine Arts*. His essays show that he possessed considerable critical ability. They deal with philosophy, literature and history. A delightful piece is *The English Mail Coach*. He also wrote on political economy and produced one novel.

Derating Term used in Great Britain for the system of relieving property from rates. By the important Local Government Act of 1929, agricultural land was entirely relieved of rates and premises devoted to productive industry, including railways, from three quarters of their rates. The loss to the local authorities is made good from the national exchequer.

Derby City of England, the county town of Derbyshire. It stands on the

Derwent, 129 m from London, on the L.M.S. and L.N.E. Rlys

Derby's chief industry is the manufacture of rolling stock for the L.M.S. Rly. Until 1921 it was the headquarters of the Midland Rly. There are motor-car and other engineering works. Other products are lace, boslery, silk, chemicals and chinaware. The diocese of Derby covers the county and was created in 1927. The city has a famous Association football club, Derby County. Pop. (1931) 142,406.

Derby gave its name to a famous kind of porcelain known as Crown Derby. This was first made in 1740 and is still produced, although not by the original firm. There is a fine collection in the museum.

Derby The Most famous horse race in the world. It was founded in 1780 by the 12th Earl of Derby and is run at Epsom on a Wednesday in May or June. The course is 1½ m long, and the race is confined to three-year-old horses. Since 1900, except during 1915-18, when the race was not run, the winners and owners have been

1900	DIAMOND JEWELL	Prince of Wales.
1901	VOLODYOTSKI	W. G. Whitney
1902	AND PATRICK	J. Gubbins
1903	ROCK SAND	Sir J. Miller
1904	ST. ASHANT	L. de Rothschild
1905	CICERO	Earl of Rosebery
1906	SPEARMINT	Major F. Loder
1907	ORBY	R. Croker
1908	SIGNORISSETTA	Cher. Ginstreth
1909	MINORU	King Edward VII.
1910	LEWISBO	Sir Fairlie
1911	SUNSTAR	J. B. Joel
1912	TAJALIT	W. Raphael
1913	ANOTER	A. P. Ounille
1914	DUKBAR II.	H. D. Durren
1915	GRAND PARADE	Lord Glancly
1916	BRION KOP	Capt. G. Loder
1917	HUMORIST	J. B. Joel
1918	CAPTAIN OTTILE	Lord Woolavington
1919	PATTE	B. Irish
1920	BANOVITO	Earl of Derby
1921	MANNA	H. E. Morris
1922	COROVACHI	Lord Woolavington
1923	CALL BOY	F. Curzon
1924	FELSTEAD	Sir H. Cunliffe-Owen
1925	TRIGO	W. Barnett
1926	BLENHEIM	The Aga Khan
1927	CAMEROMAN	J. A. Dewar
1928	APEN THE FIFTH	Tom Wall
1929	HYPHON	Lord Derby
1930	WINDSOR LAD	Maharajah of Pulpit
1931	BARHAM	The Aga Khan

Derby Earl of English title borne by the family of Stanley since 1485. Earlier it had been held by the family of Ferrers. Thomas, Lord Stanley (died 1504) was made an earl by Henry VII., whose mother he had married as his second wife. James, the 7th earl, was Lord of the Isle of Man, and his wife, Charlotte, was famous for her defiance of Latham House during the Civil War. The direct line died out in 1736, when Sir Edward Stanley, a descendant of the 1st earl, became the 11th earl. Latham House is the old seat of the family, but the earl's chief seat is now Knowsley, near Liverpool.

Derby Earl of English statesman. Born at Knowsley, March 29, 1799, he was educated at Eton and Christchurch, Oxford. He entered the House of Commons in 1820, and sat for a succession of constituencies until he was made a peer in 1844, seven years before he succeeded to the earldom. At first a Whig, he was Under Secretary for the Colonies in 1827, and in 1830 Chief Secretary for Ireland. In 1833, having supported the Reform Bill, he was made Secretary for War and the Colonies, but, having freed the slaves in the West Indies, he resigned in 1834. In 1841 he became Colonial Secretary under Peel, and after 1846

came out as the leader of the Conservative party. In 1852 Derby became Prime Minister, and he held that office again in 1858-59 and 1866-68. He died at Knowsley, Oct. 23, 1869. Derby, who declined to become King of Greece in 1863, was known as the "Rupert of Debate."

Two of Lord Derby's sons succeeded in turn to the earldom and both were prominent in public life. Edward Henry Smith Stanley (1826-93), who became the 15th earl, sat in the House of Commons from 1848 to 1869. In 1858-59, as President of the Board of Control, he became the first Secretary for India. In 1866-68 he was Foreign Secretary as he was from 1874-78, but he resigned in 1878 because he disliked Disraeli's foreign policy. He then became a Liberal and was Secretary for the Colonies, 1882-85. He died April 21, 1893.

Frederick Arthur Stanley (1841-1908), who became the 16th earl, was a soldier. Having sat in Parliament from 1865 to 1886, he was made Baron Stanley of Preston in 1886. He was Secretary for War, 1878-80, and Colonial Secretary, 1885-86. He was President of the Board of Trade, 1886-88, and Governor-General of Canada, 1888-93. He died June 14, 1908.

Derby Earl of. English nobleman. Edward George Villiers Stanley was born April 4, 1865. After service in the Grenadier Guards, he entered the House of Commons in 1892 and sat therein until 1906. In 1895 he was made a Lord of the Treasury, in 1900 Financial Secretary to the War Office, and he was Postmaster General, 1903-05. He was Press Censor during the S. African War, and in 1908 became Earl of Derby. In 1915 he was made Director General of Recruiting and was responsible for the Derby Scheme, the last effort to obtain men for the army by voluntary means. It added about 850,000 to the forces. In 1916 Derby was made Under Secretary for War, and a little later he became Secretary. From 1918-20 he was ambassador in Paris, and from 1922-24 he was again Secretary for War. He was known as an owner of racehorses until his stables were closed in 1930. Lord Derby's two sons, Lord Stanley and Hon. Oliver Stanley, were both elected to Parliament in 1924 and 1929, and the latter made a name as a speaker. In 1931 he was made Under-Secretary to the Home Office.

Derbyshire Inland county of England. It is divided geographically into two distinct portions. In the north is a mountainous and picturesque region called the Peak, in the south is a level region where coal is mined. The chief rivers are the Derwent and the Dove. Derby is the county town. Industrial centres include Alfreton, Bolger, Chesterfield, Glossop and Ilkeston. Buxton, Bakewell and Matlock are pleasure resorts, and the county contains Chatsworth, Haddon, Hardwick and many beauty spots in the Peak district, including Castleton with its caves. Its area is 1016 sq. m. Pop. (1931) 757,332.

Dereham Urban district and market town of Norfolk, in full East Dereham. It is 102 m from London, and 16 from Norwich on the L.N.E. Rly. The place has an agricultural trade. Pop. (1931) 5641.

Derelict Property abandoned by the owner in a manner which indicates that he disclaims all right to it. More particularly it is used for ships abandoned at sea by their crews. Derelict ships, picked up and brought to British ports are kept by the

receiver until the owner can be found, but not for a longer period than a year and a day

Derg Name of two loughs or lakes of Ireland. One is in the south of Donegal and covers 25 sq. m. On it are several islands, one of which is a cave called St. Patrick's Purgatory, once a popular place for pilgrims. The river Derg flows from here to the Moyie, 17 m. away.

The other Lough Derg is a widening of the Shannon between Killaloe and Portumna. It is 24 m. long.

Dermatitis Inflammation of the skin. The term usefully comprehends all such affections, whatever their cause. Some types arise from local irritation, sunburn, frostbite, X-ray exposure, vegetable toxins such as poison ivy, animal parasites and ringworm fungi. Blastomycotic dermatitis is due to a yeast. Occupational dermatitis, arising from external irritants, such as tars and dyes, usually develops eczema-like forms.

De Ros Baron. English title. It dates from 1264 and is one of the oldest in the peerage. Its first holder was Robert de Ros and it was held by his descendants until 1508. It passed to the Manners and then to the Villiers family, and from 1687 to 1806 was in abeyance. In 1806 it was given to the Fitzgerald family, and in 1907 it came to a daughter of the 24th baron, who became also Countess of Dartrey. It passed in 1920 to her son Anthony Lucius Dawson.

De Rougemont Name taken by Henri Louis Grin. Born in Switzerland Nov. 9, 1847, he travelled in Australia, and later, in London, described the wonderful adventures he had met with among the Australian aborigines. His narrative was published in *The Wide World Magazine*, and he lectured before the British Association at Bristol. Later it was discovered that Grin's stories were almost wholly imaginary. He died in the infirmary at Kensington June 9, 1921.

Derrick Stationary crane used in constructing buildings. In it the inclination of the projecting arm or rib can be altered by letting out, or hauling in the stay or supporting chain. A derrick can be rotated through part of a circle and may be mounted on a tower to increase the height of the lift.

Derry Old name for the city and county in Northern Ireland now known as Londonderry (q.v.). Its bishop is still called the Bishop of Derry.

Dervish Moslem devotee. Throughout in Turkey and Persia a wandering mendicant called in Arabic-speaking countries a fakir. There is a loose relationship with Hindu fakirs. Thirty fraternities, with innumerable sub-orders, include the Kalandaris, order of the familiar calendars of the *Arabian Nights*, Khalife, or howling dervishes, Mevriite, or dancing dervishes, and the modern Semaai. Each fraternity has its directing sheikh, garb, rule and ritual.

Derwent Name of several English rivers. One is in Derbyshire, a tributary of the Trent. It rises in the Pennines and flows past Matlock and Derby, being 60 m. long. Its water is used to supply Sheffield, Nottingham, Leicester and Derby.

Another Derwent is in Yorkshire. This is a tributary of the Ouse and is navigable to Malton. It is 70 m. long and is united by canal with the Humber.

Another Derwent, 35 m. long, is in Cumberland. It passes through Derwentwater and Bassenthwaite on its way to the Solway.

A river between Northumberland and Durham is a fourth Derwent. A tributary of the Tyne, it is 30 m. long.

There is a Derwent in Tasmania. This flows for 130 m., from Lake St. Clare to Hohart.

Derwentwater Lake of Cumberland. It is beautifully situated near Keswick and is formed by the river Derwent. It is 3 m. long and about a mile wide. In it are several islands. Friar's Crag, now the property of the National Trust, is one of several beauty spots. At the head of the lake are the Lodore Falls.

The title of Earl of Derwentwater was borne by the family of Radclyffe from 1688 to 1716. James Radclyffe, the 3rd earl, joined the Jacobites in 1716 and was captured and executed in London, Feb. 24, 1716. He figures in the ballads of the times. The male line of this family died out in 1814. The Aurora Borealis is called in Cumberland "Lord Derwentwater's Lights."

Desborough Lord. English nobleman. William Henry Grosvenor was born Oct. 30, 1855, and educated at Harrow and Balliol College, Oxford. At the university he was famous as an oarsman and a runner. From 1880-85 he was a Liberal M.P. for Salford. In 1895 he was made a baron. Two of Lord Desborough's sons, Julian and Gerald, were killed in the Great War, the remaining one was killed in a motor accident. His residence is Taplow Court near Henley, Bucks.

Descartes René. French philosopher and mathematician. Born in Touraine, March 31, 1596, he was educated by the Jesuits, but never accepted their teaching. He saw a certain amount of military service in France and Germany, and in 1628 settled in Holland. In 1649 he went to Stockholm, where he died, Feb. 1, 1650.

The founder of the Cartesian system of philosophy. Descartes is one of the world's great thinkers. His fundamental principle is the dominance of thought, expressed as "I think, therefore I am." His ideas are set out in his *Discours de la Méthode*, and more fully in *Méditations de Prima Philosophia* and *Principia Philosophiae*. Equally eminent as a mathematician, Descartes is regarded as the founder of analytical geometry.

Deschanel Paul Eugène Louis. French politician. He was born in Bolzoin Feb. 13, 1856. He received his education in Paris and entered the public service in 1876. In 1885 he entered the Chamber of Deputies, and in 1898 was elected its president; he held the post until 1904 and was again president from 1912 to 1920. In 1920 he was chosen President of the Republic in succession to Poincaré. A little later he became an invalid, resigned office in Sept. 1920 and died April 28, 1922.

Deschanel won fame as an orator and a writer. His books include one on Gambetta. In 1899 he was elected to the Academy. His duel with Clemenceau in 1893 was a notable event.

Desert Region where, on account of intense cold or insufficient rain, forms of life and little or no vegetation can exist. Where the mean annual rainfall is less than 10 inches, desert conditions usually

prevall Deserts are characterised by intense heat, as in the Sahara, or by great cold, as in the Arctic and Antarctic wastes. Notable deserts are the Sahara and Kalahari in Africa, the Gobi in Asia, the Atacama in S. America, and some in Australia.

Desertion Word meaning to leave surreptitiously and without permission, particularly to the neglect of a duty. Desertion from the army is a military offence punishable by death if the deserter is on active service. Desertion of a wife by a husband is a ground for a judicial separation in English law, and, if accompanied by adultery, for divorce.

Desiccation Process of drying substances by various methods such as by heat, dry air or chemicals having an affinity for water. Desiccation enters into many economic and commercial processes, such as the drying of timbers, fruit, rubber, textiles, etc. Among the chemicals used are quicklime fused chloride of calcium, and sulphuric acid.

Desmid Group of minute green unicellular conjugate algae occurring in fresh water. They show a great diversity of form, some being canoe shaped, others rounded, oval or trigonal. Their cells consist of two symmetrical halves usually joined by an isthmus, and the cell wall is marked with delicate patterns like the diatoms.

Desmond Earl of. Irish title borne by the family of Fitzgerald and then by the family of Feilding. It was given in 1329 to Maurice Fitzgerald and was held by the family until the 15th earl died. In 1619 the title was given to Richard Preston, Lord Dingwall, and in 1628 passed to George Feilding. In 1674 George became Earl of Denbigh, and since then the two earldoms have been held together by the Feildings.

Desmoulins Camille French revolutionist. Born at Guise, March 2, 1760, he became a lawyer and a writer. He is famous as the man, who, on July 12, 1789, just after Necker had been dismissed, urged the crowd, "Aux armes!" and so started the revolution. He then conducted a weekly paper to further the cause and had a share in destroying the Girondists. He himself shared Danton's ideas and was guillotined, April 5, 1794.

Despotism Arbitrary government. In ancient Greece a despot, the master of the household, was the ruler of slaves. The title, applied to the absolute monarchs encountered in Western Asia, was given to the emperors at Constantinople. Nowadays despotism describes an arbitrary government, whether benevolent or malevolent, which is uncontrolled by constitutional restrictions.

Destroyer Short name for torpedo boat destroyer, a warship evolved as an answer to the torpedo boat. In the British navy the first was launched in 1893. Their uses were extended and during the Great War they acted as scouts and screens for the fleets of battleships and battle cruisers. In 1914 the largest British destroyer displaced 965 tons and steamed 32 knots. Larger ones were built and by the end of the war they displaced 1300 tons and steamed 34 knots. In 1932 the British navy had 132 destroyers and a further 23 were building. The largest of these were the A class, the largest of which displaced 1500 tons, steamed 37 knots and

carried four 4.7 in guns. Destroyers are organised in flotillas of eight, each under a captain or commodore.

Destructor Form of high temperature furnace, designed for the destruction of town or household refuse. It is used especially in thickly populated districts where other means of disposal of waste is not available. In some towns the refuse is used as a fuel for steam production, and in a modern installation there may be, as accessories, electro-magnetic separators for iron, clincher crushers and screens, slab-making mills and presses, and also asphalt-making machinery.

Detaille Jean Baptiste Edouard French artist. Born in Paris, Oct 5, 1848, he studied under Meissonnier and first exhibited at the Salon in 1867. Three years later he joined the army, finding in his military experiences subjects for his most famous pictures. His paintings include the "Saint aux blessés," 1877, "The Dream," 1888, and portraits of several royal personages. He died Dec 23, 1912.

Detective Member of a police force not in uniform. His task is to discover information concerning wrongdoers, investigate specific cases, watch individuals or classes of offenders, guard royalties and other prominent personages, and the like.

The Criminal Investigation Department (CID) at New Scotland Yard, London, is the chief detective force in the country. The Metropolitan police also aids, on request, provincial police forces, which have their own detective organisations. Private detectives are persons engaged unofficially in obtaining information for, or guarding, their employers.

Stories about the detection of crime form a very popular class of fiction, and at least one imaginary detective, Sherlock Holmes, has become immortal. The real founder of this class of fiction was Edgar Allan Poe. For a full study of the detective novel see *Masters of Mystery* by H. Douglas Thomson.

Detonator Percussion cap or detonating powder used to fire a charge of explosive, either in firearms or in mining charges. The explosive compound, or fulminate, best known and used in percussion caps and detonators is fulminate of mercury, a greyish crystalline substance which explodes violently when dry. This fulminate is made by the action of a mixture of nitric and sulphuric acids upon metallic mercury. A fulminate of silver explodes more readily and is used for some purposes.

Detroit City of Michigan, U.S.A. It stands on the western side of the Detroit River, and owes its prosperity partly to its position near Lake Erie. There is a good harbour on the river and the city is well served by railways. Detroit is one of the largest cities in the country. Here are the Ford works, and factories for making machinery of almost every description. There is an enormous trade along the river and with Canada where many of the workers live. At first a French trading station Detroit was at one time a British possession. Pop. (1930) 1,568,662.

The Detroit River flows from Lake St. Clair into Lake Erie. It is 27 m long and carries an enormous quantity of shipping. A tunnel beneath it connects the United States and Canada.

Dettingen Village of Bavaria. Situated on the Main. It was the

scene of the Battle of Dettingen (June 27, 1743), between the English, the Austrians and the Hanoverians on the one side and the French on the other. In the end the main body of the allied infantry put the French to flight. In honour of the victory, Handel composed his Dettingen *Te Deum*.

Deucalion In Greek legend, a son of Prometheus, King of Phthia. When Zeus resolved to destroy mankind by a flood, Deucalion entered an ark with his wife, Pyrrha, drifted for nine days and landed on Mount Parnassus. Receiving an oracle which bade them cast behind them the bones of the great mother, they interpreted this to mean stones. Those cast by Deucalion became men, those by Pyrrha women. Their son, Hellen, was the supposed founder of the Hellenic race.

Deuteronomy Fifth book of the Old Testament. The title, "second law," is a Septuagint mistranslation of a Hebrew word meaning copy of the law. It comprises an historical introduction, I iv, an exposition of the law, v xxvi, the renewal of the Covenant, xxvii xxx, the delivery of the law to the Levites, xxxi, the song of Moses, a psalm embodying his blessing and the account of his death, xxxii xxxiv. Apparently reaching its present form in Manasseh's reign, it inspired the reforms of his grandson, Josiah.

Deutschland German name for their own country, as in the song "Deutschland über Alles".

The *Deutschland* is the name of a German submarine which made a voyage to the United States in 1916 in order to carry cargo. In 1918 she was surrendered to Great Britain.

De Valera Eamon Irish republican. Born in New York Oct. 14, 1882, his father a Spaniard and his mother Irish, he was educated in Ireland and soon became active in the Sinn Féin movement. He was chosen President of the Gaelic League, and in 1918 was elected M.P. for E. Clare, but did not take his seat.

When the Irish republic was proclaimed he was chosen President. He refused to accept the treaty of 1921, and as the leader of the republicans made war upon the Free State. For a year he was in prison and on his release he entered the Dáil, where he led the republican party. In the General Election of 1932, Mr. de Valera's party were victorious, and he became President. He broke the good relations with Great Britain by wishing to abolish the oath of allegiance and refusing to pay the interest on money borrowed for land purchase. On Dec. 12, 1935, De Valera urged the Dáil to carry a bill to abolish the Senate. This took effect in 1936.

Developer Chemical substance used to develop the latent image formed by the action of light upon silver salts in a film of sensitive emulsion. The process consists of the reduction to a metallic state of the silver salts acted upon by the light.

Development Commission

Department of the British Government. It was set up in 1909 to assist the economic development of the country. It consists of paid and unpaid commissioners, and its offices are at 61 Dean's Yard, Westminster S.W. With money granted by Parliament the Commission assists schemes for benefiting agriculture and fisheries, improving harbours, afforestation, reclaiming and draining land. In fact any

proposal which cannot be carried out by business men in the ordinary way.

Deventer Town of the Netherlands. It is at the anion of the Yssel and the Schipbeek, 66 m. from Amsterdam. Some of the buildings are of great historic interest. Thomas à Kempis and Erasmus were educated at Deventer. At one time it had a famous school the Athenaeum. There are some manufactures and a trade in agricultural produce. Pop. (1932) 36,930.

Devi Hindu goddess. The wife of Shiva, she is shown as a woman with a countenance streaming with blood. Round her are snakes and skulls. Sometimes she is shown riding on a tiger. Human sacrifices were offered to placate the goddess.

Devil Evil spirit, pre-eminently the Hobbler, chief of the powers of darkness. Apart from the personification of forces hostile to God observable in the Eden story, the doctrine of a personal devil does not emerge clearly in Hebrew thought until after the Exile, when a personality called Satan, sometimes—under Philistine influence—Beelzebub, was conceived. He was in some measure subservient to the Almighty. This conception, passing into Christian philosophy, became very powerful in the Middle Ages. The doctrine of a malignant personality whose temptations must be withstood is officially recognised by Roman Catholicism. Some Protestants accept the same doctrine, although in very varying forms, but others reject it.

Devil's Bridge Beauty spot of Wales. It is in Cardigan shire, 11 m. from Aberystwyth, on the Vale of Rheidol Rly. Here two bridges cross the Mynach, one above the other. The lower one was built in the 11th century by the monks of Strata Florida.

Another Devil's Bridge is in Switzerland. This was built across the River Rous in 1830. It is near Andermatt on the way to Italy and is nearly 5000 ft. high.

The word devil is much used in place names. There are Devil's Dykes in Sussex, Norfolk and Cambridgeshire. The one in Sussex, 5 m. from Brighton, is the property of that borough. The Devil's Jumps are three hills near Hindhead in Surrey, and there also is the depression called the Devil's Punchbowl. Another Devil's Punchbowl is near the top of Mangerton, Kerry. A Roman road in Northumberland, about 60 m. long, is called the Devil's Causeway.

The term "devil's advocate" is used in the Roman Catholic Church for one who is deputed to bring forward objections to a person whom it is proposed to canonise.

The devil's coach horse is a name given to a black beetle found in Great Britain. It is also known as the cocktail beetle.

The Devil's Own is a name given to the Inns of Court Officers' Training Corps.

Devizes Borough and market town of Wiltshire. It is 86 m. from London by the G.W. Rly. and is also on the Kennet and Avon Canal. It is an agricultural centre, with important markets. Bacon curing and brewing are its industries. Pop. (1931) 6058.

Devlin Joseph Irish politician. Born in Belfast in 1872, he was educated by the Christian Brothers. In 1902 he was elected M.P. as a nationalist for N. Kilkenny, and from 1906 to 1922 he represented W. Belfast. He was again returned in 1923 and in 1929 was elected for Fermanagh and Tyrone.

From 1921-25 he sat in the Parliament of Northern Ireland. Died Jan 1934

Devolution (Lat *devolvere*, to roll down) Act of handing over something. It is used for a kind of home rule suggested in 1904 as a settlement of the Irish difficulty, namely, the establishment of a parliament or council to manage local affairs under the supreme authority of the Parliament at Westminster. The war of 1667-68 between France and the Netherlands is called the War of Devolution.

Devon Earl of. English title held by the family of Courtenay. There was an Earl of Devon soon after 1066, a member of the De Redvers family. About 1335 the title was given to Hugh de Courtenay. More than once his successors forfeited it, but it was again bestowed upon a Courtenay in 1485 and in 1553. In 1556 it fell into abeyance and was not revived until 1831. The earl's seat is Powderham Castle, Exeter.

Devonian System of rocks forming part of the Upper Palaeozoic division and including the Old Red Sandstone. These rocks are found in Devon and Cornwall forming deposits of marine origin, and in South Wales, Herefordshire and Scotland, forming a series of lacustrine or estuarine origin (Old Red Sandstone). The Devonian rocks are divided into Upper, Middle and Lower, and consist of grits, sandstones, slates and limestones with numerous fossils. The Old Red Sandstone in Scotland is rich in fish remains.

Devonport District of Plymouth, at one time a separate borough. It stands on the estuary of the Tamar, called the Hamoaze, and is 221 m from London. Devonport is one of the chief stations of the British Navy. At Keyham is the training college for engineer officers. A dockyard was opened here in 1691, and until 1824 the place was called Plymouth Dock. In 1914 it was united with Plymouth (q.v.).

Also town and port of Tasmania. It stands at the mouth of the River Mersey, 80 m from Launceston, on the north side of the island. It is connected by railway with Hobart and other towns, and from here steamers go to Melbourne. Pop 4950.

Devonport Viscount. English merchant and politician. Hudson Ewbank Kearley was born Sept 1, 1856, and soon entered business life. He built up the business of Kearley and Tonge and became also the head of the International Stores, both firms dealing in provisions. In 1892 he was elected Liberal M.P. for Devonport, and from 1905-09 was Secretary to the Board of Trade. He left office to become Chairman of the Port of London Authority and in 1916-17 was Food Controller. In 1908 he was made a baronet, in 1910 a baron, and in 1917 a viscount. He died in Sept., 1934.

Devonshire Western and maritime county of England, the third largest in the country. Lying between the Bristol and the English Channels, it has a long and irregular coastline on both sides and is famous for its beauty. It covers 2610 sq m and is separated from Cornwall by the Tamar. Exeter is the county town, but Plymouth is the largest city. Other places are historic seaports, such as Bideford, Brixham, Barnstaple and Dartmouth, and there are picturesque inland towns such as Tiverton, Honiton, and Tavistock, and watering places such as Torquay,

Iffracombe, Paignton, Dawlish, Sidmouth and Teignmouth.

The county has such famous beauty spots as Clovelly and Lynton. In it is Dartmoor and part of Exmoor. The rivers are the Dart and the Teign, the Exe and Tavy, the Tamar and the Plym. Lundy Island is part of the county. It is an agricultural county, famous for its cream while fishing is an important industry. Devon sends seven members to Parliament and is in the Diocese of Exeter. It is the background of novels by Charles Kingsley, Eden Phillpotts and R. D. Blackmore and is the subject of extensive literature. Pop (1931) 732,869.

Devonshire gives its name to a famous regiment, formerly the 11th foot. This was raised in 1685 and has a fine record of service including South Africa, 1900, and the Great War. Its depot is at Exeter and its motto is *semper fidelis*.

The Devonshire was the nameship of six cruisers built between 1903-05. The other five were *Antrim*, *Argyll*, *Caernarvon*, *Hampshire* and *Roxburgh*. In 1929, the earlier ship having been scrapped, a new *Devonshire* was completed. This is a cruiser of the London class and displaces 14,000 tons.

A breed of cattle is known as the Devon. These are famous both for their beef and for their milk. They are deep red in colour and have been bred in Devonshire for at least two centuries.

Devonshire Duke of. English title borne since 1694 by the family of Cavendish. Sir William Cavendish and his wife, Bess of Hardwick, had a son, William, who inherited large estates in Devonshire. In 1618 he was made an earl and in 1694 his descendant, William, the 4th earl (1640-1707), one of the supporters of William III, was made Duke of Devonshire. William, the 4th duke, was Prime Minister, in name at least, in 1756-57. The wife of the 5th duke, Georgiana, a daughter of Earl Spencer, was the famous and witty lady who was painted by Gainsborough and Reynolds. In 1858 the 6th duke died unmarried, and the title passed to a cousin, until then known as the Earl of Burlington. Another William Cavendish, he became the 7th duke, and was known for his interest in science and education generally.

The duke has large estates in Derbyshire. He also owns valuable land in Eastbourne and around Barrow-in-Furness. His chief seat is Chatsworth, others are Hardwick Hall, Bolton Abbey and Lismore Castle, Waterford. His eldest son is called the Marquess of Hartington.

Devonshire House, Piccadilly, long the London residence of the duke, was sold in 1919 and later pulled down. The site is now occupied by shops and flats. The Devonshire Club, at 50 St James's Street, London, is a social club founded in 1875.

Spencer Compton Cavendish, born July 23, 1833, the eldest son of the 7th duke, was educated at Trinity College, Cambridge. In 1857 he became Liberal M.P. for N. Lancashire, and as the Marquess of Hartington he remained in the House of Commons until he became the 8th duke in 1891. In 1863 he was made a Lord of the Admiralty and then Under-Secretary for War. In 1866 he became Secretary for War, in the Gladstone ministry of 1868-74 he was Postmaster General, and from 1871-74 Chief Secretary for Ireland. From 1875-80, Gladstone being in retirement he led the Liberal party in the Commons. In 1880 he became Secretary for India, and in 1883 Secretary for War.

In 1886 Lord Hartington separated himself from Gladstone on the question of Home Rule, and became one of the Liberal Unionist leaders. He was out of office until 1895, when he joined the Unionist ministry as Lord President of the Council. He held this post until 1903, when he resigned rather than abandon his Free Trade principles. He died without sons March, 24, 1908.

Victor Christian William Cavendish was born May 31, 1838, a son of Lord Edward Cavendish and a grandson of the 7th Duke of Devonshire. He went to Eton and Trinity College, Cambridge, and in 1891 was elected Unionist M.P. for West Derbyshire. In 1900 he joined the Unionist Government, in which he held office as Treasurer of the Household and then Financial Secretary to the Treasury (1903-05). In 1908 he succeeded his uncle in the dukedom and estates. From 1916-21 the Duke was Governor General of Canada, and in 1922-24 Secretary for the Colonies. He is a K.C., and his public positions include Chancellor of Leeds University and High Steward of Cambridge University.

Dew Term used to denote the deposition of drops of water upon the ground or objects near the ground. It is due to the fall of the night temperature to that point at which saturation of water vapour occurs (dew point) and moisture is extracted from the air. Dew is deposited on a clear night upon objects cooled by radiation and causes a liberation of heat thus checking a further fall in temperature. See **Dew Pond**.

Dewar Baron. Scottish merchant. Thomas Robert Dewar was born, Jan. 6, 1864, and joined his father who was in business as a distiller. The firm, John Dewar and Sons, grew enormously, Thomas becoming the managing director. From 1900-06 he was Unionist M.P. for St. George's Tower Hamlets. In 1917 he was made a baronet and in 1919 a peer. Lord Dewar won a reputation as one of the wittiest speakers of the day and was a racehorse owner. He died, April 11, 1930, and his title became extinct. His nephew and heir, Capt. J. A. Dewar, is known as an owner of racehorses.

Dewar's brother, **Arthur Dewar** (died 1917) was Solicitor General 1909-10, being then made a law lord, when he took the title of Lord Dewar.

Dewar Sir James. Scottish scientist. Born at Kincardine Sept. 20, 1842, and educated at Edinburgh, he soon began the experimental work which brought him fame, the chief of these being to find methods of liquefying and freezing hydrogen and other gases. His inventions made the vacuum or thermos flask possible and he helped Sir F. Abel to discover cordite. In 1875 Dewar was made Jacksonian professor of experimental philosophy at Cambridge and in 1877 Fullerian professor at the Royal Institution, London. He was president of the British Association in 1902, was knighted in 1904 and died, March 27, 1923.

Dewberry (*Rubus caesius*) Species of bramble of low growth with fruit resembling that of a blackberry. The drupes of the berry which are larger and considerably less in number than those of the blackberry, are covered with a bluish bloom while the flavour is somewhat acid. In America the species *rubus villosus*, is cultivated extensively, as are others.

De Wet Christian Rudolf. Boer soldier. Born in the Orange Free State.

Oct. 7, 1854, he became a farmer there. In 1880 he served with the Boer army, and from 1885 to 1897 he was a member of the legislature of the Free State. In 1899, when war broke out, he was one of the Boer leaders and in 1900 he was made Commander-in-Chief of the Free State army. His extraordinary skill in the guerrilla warfare of 1900-02 made his name widely known. In 1907 De Wet entered the legislature of the Orange River Colony, and was made minister of agriculture. In 1914 he joined the rebels and met with some success, until taken on Dec. 1, 1914. He suffered a short imprisonment and was fined. He died Feb. 3, 1922. He wrote an account of the war of 1899-1902.

Dew Pond Name given to small ponds found on the high ground of the chalk downs of southern England. They are supplied with water by condensation of the thick mists and heavy dews frequent upon the downs in the summer. In making a dew pond the excavation is lined with straw, over which puddled clay is placed, and above this a layer of stones. When the pond is properly made the supply of water is perennial and is a great boon to farmers.

Dewsbury County borough of Yorkshire (W.R.). It is 182 m. from London and 8 m. from Leeds, on the L.M.S. and L.N.E. Rlys. It is also served by the Aire and Calder navigation system. Dewsbury is famous as the centre of the manufacture of blankets and shoddy. It sends one member to Parliament. Pop. (1931) 54,303.

Dextrin Colourless tasteless powder obtained by carefully heating starch alone, or with acids or by the action of diastase upon starch. It is known also as British gum. The commercial product often contains soluble starch and probably unaltered starch and glucose and varies in its properties according to the mode of preparation. Dextrin is used for many purposes as a substitute for gum arabic, for the stiffening and finishing of fabrics, for thickening inks and as an adhesive for postage stamps.

Dextrose Alternative name for glucose or grape sugar. It is so called from the action of the sugar upon polarised light which it turns to the right (dexter). It is found naturally in grapes and other fruits and is prepared from the starch of maize, potatoes, etc., by boiling with dilute sulphuric acid and is obtained in the form of a syrup or as hard masses. It is used as a sweetening agent in brewing and in confectionery.

Dhak E. Indian tree of the leguminous order (*Butea frondosa*). Abundant throughout India it has bright orange red flowers which yield a fugitive yellow dye, and seeds which furnish moodoega oil. It exudes a latex hardening into a brittle, ruby tinted gum called Bengal kino. The fibre serves for cordage, the wood, leaves and flowers are used in religious ceremonies.

Dhole Wild Indian dog. It chiefly inhabits the jungles of the Deccan and is somewhat larger than the jackal and differs from true dogs in lacking the last lower molar. In colour it is bay with darker mottlings. It hunts in packs of 50 or 60, almost silently, and is capable of running down elephants and occasionally tigers.

Dhow Vessel of about 150 or 200 tons burden, generally with one mast and a lateen sail. It is much used in the Arabian

Sea and along the coast of E. Africa (sometimes as a sliver)

Diabase Name somewhat loosely applied to some types of greenstone, and in particular to an altered basic rock. Originally containing plagioclase feldspar and augite, this has become chloritised. The diabases form intrusive masses among other rocks in N and S Wales, the Lake District, N. Scotland and Ireland.

Diabetes Disease characterised by habitual excessive discharge of urine. Two forms occur: *diabetes mellitus* or persistent glycosuria, in which the urine contains more or less grape sugar, and *diabetes insipidus* or polyuria, involving no abnormal ingredient. The cause of *diabetes mellitus* is a failure of the insulin-secreting endocrine gland of the pancreas, and treatment is by replacing the deficient insulin by injections of this substance and by careful regulation of the dietary. Starchy foods should be avoided as far as possible.

Diaghileff Serge Pavlovich, Russian artist. Born March 19, 1872, he studied art and organised exhibitions of art in St. Petersburg. About 1907 he went to Paris where he produced operas and plays which attracted much attention by the beauty and novelty of their staging, while his ballets were a landmark in the history of stage dancing. Soon he carried his ideas to London, Berlin and New York, and in these and other cities sustained his reputation as a producer of rare and original genius. He died Aug. 19, 1929.

Diagnosis Term denoting the act of distinguishing a disease by its symptoms. The branch of medicine concerned with the observation and interpretation of the signs of disease, called diagnostics, may involve studying the patient's past medical history, noting the temperature and pulse and making laboratory tests.

Diala River of Persia and Iraq. Rising in the Persian highlands it runs south and west, forms part of the boundary between the two countries and, entering Iraq, joins the Tigris just below Bagdad. There was some fighting along the river during the British advance to Bagdad in March 1917.

Dialect Local variant of a language. The word denotes the collective variations in pronunciation, vocabulary and syntax that are due to geographical conditions. When these variations become unintelligible to those in related communities the dialect becomes a language. Thus the primitive Arvan speech passed through dialectic variations into the separate languages of Greek, Sanskrit, Latin and others; Greece has its Ionic, Doric, Aeolic, Attic and other dialects; the peasant dialect of Tuscany became the literary language of Italy.

In England there are many dialects. Dictionaries of these have been published and societies exist to keep the dialects alive.

Dialysis Method (invented by Thomas Graham) of separation of colloid and crystalloid substances from a solution. First elaborated in 1861 it is found that colloidal substances such as gum and gelatin will not pass through a parchment membrane, which crystalloids readily diffuse through. The apparatus used consists of a glass vessel (dialyser) with a parchment bottom, containing a solution of both types of substances. The dialyser is suspended in a vessel of water, and the crystalloids slowly diffuse into the water, leaving the colloids in the upper vessel.

Diameter In geometry a straight line passing through the centre of a circle and terminated both ways by the circumference. Mathematically its length is the length of the circumference divided by $3\frac{1}{2}$, this being the nearest fraction to the exact decimal.

Diamond Crystalline form of carbon. It is found in nature as water-worn pebbles, or grains, in river gravels and other alluvial deposits, also in conglomerates and sandstones in S. Africa, India, Brazil, Borneo and elsewhere. The crystals belong to the cubic system and occur in octahedra and dodecahedra often with curved faces. They are usually white, but yellow, red and other colours also occur. The diamond is one of the most popular of gem stones, owing chiefly to its lustre. It is the hardest substance known and therefore is used as an abrasive.

More than half the world's supply is produced in S. Africa, but the Borneo and Australian diamonds are preferred for abrasive purposes. The S. African output in 1931 was valued at over £1,182,523. Two of the finest diamonds ever found are the Koh-i-Nor and the Cullinan, both among the British crown jewels.

Diamond Sculls One of the chief races at Henlow. It was first rowed in 1844 and is confined to amateurs. The course is 1 m. 550 yds. long. It is for single scullers.

Diana Roman divinity identified with the Greek Artemis. She appears as the goddess of light, as mistress of the groves and as Hecate. She is represented as a huntress bearing a torch, and was regarded as possessing the virtue of chastity. Probably on this account she was worshipped as the goddess of women and childbirth. Many temples were erected in her honour, the most famous being the one at Ephesus.

Dianthus Genus of herbs of the carnation-pink order. They are native to the N. temperate regions and to S. Africa. Of 70 species, several grow wild in Britain, notably the Maiden, Deptford and Cheddar pinks. The Mediterranean clove pink, originated all the garden varieties of carnation, from the phoeasant's eye come many garden pinks, the bearded pink and the sweetwilliams.

Diapason Musical term used in acoustics. Diapason normal signifies the pitch standard of 435 vibrations per second for the production of middle A. Fixed in 1859 by the French Academy this is known as the French or international pitch.

Diapason signifies also a series of organ stops of eight and sixteen feet. It is poetically synonymous with the range of compass of a voice or instrument.

Diaper Textile fabric usually of linen or cotton, with simple geometrical or conventional woven pattern uniformly repeated.

Diaper patterns, geometrical and floral, mostly derived from Byzantine textiles, are also seen on mural surfaces, sculptured in low relief, painted, or gilded, and in backgrounds and fillings of illuminated manuscripts, on stained glass, tiles, incised brasses and heraldic compositions.

Diaphragm In men and some animals, a dome-shaped muscular membrane separating the chest from the abdominal cavity. Attached continuously to the chest's lower margin it comprises muscular fibres surrounding a trefoil-shaped tendon. It is pierced by the gullet, aorta, inferior vena

cava, certain nerves and small vessels. It is lined beneath by the peritoneum enclosing the abdominal organs, and above by membranes enclosing heart and lungs. It contracts and relaxes with breathing, and plays the chief part in respiratory motion.

Diary Daily record of events or transactions. The words diary and journal have the same ultimate origin. When the diarist notes all matters within his personal experience and observation, or those communicated by others, his record sometimes makes valuable contributions to historical or scientific knowledge. Some of the greatest, as Pepys's and Wesley's, were kept in cipher, with no thought of ultimate publication. Some, as Evelyn's, bear traces of subsequent elaboration. Greville's and Creevey's are diaries of great historic interest.

Diaz Armando. Italian marshal. Born in Naples, Dec 5, 1861, he entered the army in 1881 and rose to be a general. Commander of an army corps in 1916, in Nov., 1917, after Caporetto, he was made Commander in Chief, and in 1921 received a dukedom. He died Feb 29, 1928.

Diaz José de la Cruz Porfirio. Mexican President. Born at Oaxaca, Sept 15, 1830, he became a lawyer. In 1854 he was a leader in an insurrection, and his military talents brought him to the front. He led the Mexican Army in the struggle against the Emperor Maximilian and in 1877 was elected President. He was re-elected every succeeding four years until 1910. Under his rule order was restored and Mexico enjoyed considerable prosperity, although he had many enemies. In 1911 a rising forced him to resign and he left the country to die in Paris, July 2, 1915.

Dibdin Charles. English song writer. Born in Southampton, March 4, 1745, he settled in London and in 1762 his operetta *The Shepherd's Artifice* was produced at Covent Garden. Of his many songs "Tom Bowling" and "Poor Jack" are the best known. He also wrote novels and an *Autobiography*. Dibdin died July 25, 1814.

Dibon City of Palestine. It lay to the east of the Dead Sea and was one of the cities of the Amorites. Here in 1868 the Voahito Stone now in the British Museum was discovered. The village called Dhihan stands on the site.

Dicey Albert Venn. English jurist. A son of T. E. Dicey, he was born in 1835 and educated at Balliol College, Oxford. He became a barrister, and in 1882 Vinerian Professor of English Law at Oxford. He resigned in 1909, and died April 7, 1922.

Dicey's most famous work is his *Law of the Constitution*, 1885, whilst his *Case Against Home Rule* helped to defeat Gladstone's bill. His *Essay on the Privy Council* is a valuable text book.

Dicey's brother Edward (1832-1911), a Cambridge man, was also a forceful and able writer. From 1870-89 he was editor of the *Observer*. He died July 7, 1911.

Dick William Reid. Scottish sculptor. Born in Glasgow in 1879, he was educated there and in London and soon made a name for his figures in stone and bronze. His work may be seen in the Kitchener Memorial Chapel in St Paul's Cathedral, London, on the Menin Gate at Ypres and elsewhere. "Femina Viatrix" is in the public galleries of Sydney. Dick was elected A.R.A. in 1921 and R.A. in 1929.

Dickens Charles. English novelist. Born at Landport, Portsea, Feb 7, 1812, he was the son of a clerk in the navy, and his full name was Charles John Huffam Dickens. In 1814 the family moved to London. The father fell on evil days and was imprisoned for debt so Charles worked as a child in a factory, before obtaining a little schooling at Camden Town. Later he entered a solicitor's office, learned shorthand and became a fairly successful reporter. In 1836 he married Catherine Hogarth, from whom he separated in 1858. They had a family of seven sons and three daughters. One son, Henry Fielding Dickens, became a successful barrister and a K.C.

In 1833 Dickens began to write fiction and, calling himself "Boz," published some sketches of London life in the *Evening Chronicle*. In 1836 the first part of *The Pickwick Papers* appeared in serial form. This was a great success and its author's fame was assured. He left his reporting work and became editor of *Bentley's Miscellany* in 1837. In this *Oliver Twist* appeared, and then came *Nicholas Nickleby*, *The Old Curiosity Shop* and *Barnaby Rudge*. After a visit to America he wrote *Martin Chuzzlewit* and then followed *A Christmas Carol*, and others of *The Christmas Tales*. In 1846 he was for three weeks the first editor of the *Daily News*.

For the next 17 years Dickens was busy writing and giving public readings from his works in both Britain and America, these being very popular in both countries. *Domby and Son* appeared in 1848, and *David Copperfield* in 1850. *A Tale of Two Cities* was published first in *All the Year Round*, as was *Great Expectations*. *Our Mutual Friend* appeared in 1864. In 1865 Dickens broke down in health, but he continued his readings and began to write *The Mystery of Edwin Drood*. Before it was finished he died at Gad's Hill, near Rochester, a house he had bought in 1856, on Jan 9, 1870.

In one respect Dickens is much the greatest of English novelists. No one has approached him in the creation of characters whose names are household words: Pickwick, Sam Weller, Micawber, Stiggins, Little Nell, Bill Sykes and Mark Tapley are a few out of many. He possessed, too, remarkable gifts of humour and pathos and unrivalled powers of description.

The memory of Dickens is kept alive by the Dickens Fellowship, which has branches all over the country. Its headquarters are at 48 Doughty St. London, W.C.1, where a Dickens Museum has been opened. There are several lives of Dickens including a critical one, *This Side Idolatry*, by C. E. Bechofer Roberts, 1928.

Dicksee Sir Francis Bernard. English artist. He was born in London, Nov. 27, 1853, and first exhibited at the Royal Academy in 1875. He was elected R.A. in 1891 and chosen president in 1924. He was one of the leaders of the older academic school expressing art in sentimental or poetic form combined with realistic though somewhat mechanical technique. His numerous paintings include "Harmony" and "The Two Crowns" in the Tate Gallery, London, and "Reverie" in the Liverpool Art Gallery. In 1924 he was knighted, and died Oct. 17, 1928.

Dictaphone Modification of the phonograph used to save time in the dictation of letters, etc. The letter or message is spoken into the mouthpiece of an instrument having a revolving wax cylinder upon which a record is made. The cylinder is then taken by the typist and placed in a transcribing machine and, by means of a pair

of receivers placed over the ears, the message can be heard and typed

Dictator Originally the name of an office under the Roman Republic. Its holder was a magistrate appointed in times of great difficulty and invested with wide powers. The office was abolished by Antony in the year 44 B.C. The name is now generally applied to any official exercising supreme power in any country or office.

The S. American States have had dictators at various times and after the Great War they arose in several European countries. Mussolini in Italy and Hitler in Germany are the most prominent examples of the modern dictator.

Dictionary Primarily a book giving in alphabetical order the meanings of words and their correct spellings. More elaborate dictionaries give full and detailed etymologies with quotations showing the use of the word in question. Of English dictionaries one of the first was compiled by Samuel Johnson, the most elaborate is the *New English Dictionary*, edited by J. A. H. Murray. There were, however, dictionaries compiled by Jewish and Arabic scholars in the 9th century or earlier.

The word is used sometimes for a book which gives the English meanings of the words in a foreign language, e.g. Greek or French, but these are more correctly called lexicons. Books containing biographies, quotations, etc., arranged in alphabetical order are also called dictionaries.

Didcot Town of Berkshire. It is 7 m. from Abingdon and is an important junction on the G.W. Rly. which has works here. Pop. 2160.

Diderot Denis, French writer. Born at Langres, Oct. 5, 1713, he was educated by the Jesuits, but refused to accept their teaching. The great work of his life was the preparation of the *Encyclopédie*, which appeared in 17 volumes between 1751 and 1765. Diderot also wrote novels and plays, some volumes of criticism, artistic and literary, and a book on acting. He died July 30, 1784.

Dido Princess of Tyre. Her brother Pygmalion having killed her husband Sichaecus, who fled to Africa and founded Carthage. To escape wedding Iarbus the Gaetulian, she erected a pyre and stabbed herself upon it. Virgil makes Dido contemporary with Aeneas, at whose departure she kills herself for love of him. Her real name was Elissa, but she became confused with Dido, a name of Astarte, the moon goddess.

Didymium One of the very rare metallic elements. Its atomic weight is 141 and its symbol D. It occurs in certain minerals, such as monazite and parisite, along with other rare metals, cerium, thorium and lanthanum. The presence of didymium in a mineral is recognised by a simple inspection by transmitted light with the spectroscope, as the element shows two broad black bands enclosing a bright space. One in the yellow part of the spectrum and the other in the green section.

Die Term having the primary significance of a small cube used for gaming, dice being the plural form. It is applied also in architecture to the square base of a column and in engineering to various stamping contrivances and for tools used in impressing coins. Dies for power presses in sheet metal work are of two kinds: cutting dies which cut out or punch flat blanks and shaping dies which shape the

form of the blank. Dies are used also for drawing fine wire.

Dieppe Seaport and pleasure resort of Northern France. It stands on the English Channel at the mouth of the little River Arques, 105 m. from Paris and 38 from Rouen. There is an old town with a castle. The port has a good harbour and a considerable export of produce. There is a large fish market. Pop. 25,117.

Diesel Engine Type of internal combustion engine. In it air is drawn into the cylinder and compressed to about 500 to 600 lb. per square inch with the result that the air becomes greatly heated. The heat of the air charge then ignites the liquid fuel which has been sprayed by means of a powerful pump through a jet into the cylinder. The result of the ignition is a detonation which causes a downward movement of the piston. It was invented by Rudolf Diesel (1858-1913).

Diet Food and drink. Nutrient substances absorbed into the body are utilised in forming tissue, repairing waste and producing energy. Essential constituents are flesh-forming proteins, heat-producing fats and carbohydrates, mineral matters, minute quantities of vitamins, and water.

For studying dietetic problems food's potential energy is measured by the heat evolved in complete oxidation, that needed to raise the temperature of a kilogram of water 1°C being called a calorie. Proteins 3½ oz., carbohydrates 18 oz., fat 2 oz. yield 5300 calories.

Diet (Lat. *dies*, a day) Name used for the representative body of the Holy Roman Empire, and of similar bodies elsewhere. It was so called because a particular day was fixed for the meeting, the Germans retain this use of the word *day* (*tag*) in Reichstag, Landtag, etc.

The diet, or Reichstag, of the Holy Roman Empire consisted of three colleges or houses: (1) the electors, (2) the princes, and (3) the free cities. Never very powerful, its power grew less and less, and after 1648 little was heard of it. The word was also used for the parliaments of the Germanic Federation, and other states and provinces of Central Europe, e.g. Poland.

Diffraction Phenomenon observed during the study of Light. Monochromatic rays from a distant point falling upon a narrow slit produce a pattern of light and shadow bands due to the interference of waves travelling slightly different paths.

A Diffraction Grating, or glass plate ruled with very fine lines, produces similarly a series of spectra of white or coloured light of uniform distribution and is much used, therefore, in spectroscopy.

Diffusion Term used in physics for the phenomenon of the gradual mixing of two different substances which are in contact. Diffusion in liquid takes place more rapidly at high temperatures and under agitation.

Digestion Process of preparing food after entering the mouth for absorption into the blood vessels. It comprises three stages, salivary, gastric and intestinal. Food mixes during chewing with a ferment contained in the alkaline saliva which converts the starch into forms of sugar. This activity continues in the stomach, gradually superseded by that of the gastric juice which, in the presence of free hydrochloric acid, operates through several active principles. When gastric digestion is completed the semi-fluid chyme

passes into the bowels, where intestinal activities elaborate a creamy fluid chyle, whence the lymphatics extract the emulsified fats. Sugar salts and soluble proteins reach the small blood vessels direct.

Digitalis Genus of plants belonging to the natural order *scrophulariaceae*. They are natives of Britain, Europe, N Africa and Asia. The foxglove *D. purpurea* is a well known species. Its leaves yield the poisonous alkaloid digitalin, as well as several other poisonous glucosides. The leaves are gathered from wild plants of the second year's growth and carefully dried. Both the leaves themselves and various preparations are used in certain forms of heart disease, and dropsy.

Dijon City of France. It is picturesquely placed amid the mountains in the south-east of the country 210 m. from Paris, and is at the junction of the rivers Ouche and Saône. There is a university founded in 1722 and several colleges. Dijon was at one time the capital of the Duchy of Burgundy. To-day it has some manufactures and a trade in wine and agricultural produce. Pop (1931) 90,869.

Dilapidation Word meaning a falling into decay. Legally, in the plural form, dilapidations, it means the disposal of property for which tenants, who bind themselves to keep buildings in good repair and to hand them back in that condition to the owner are liable. The holders of benefices in the Church of England are often called upon to find money for dilapidations when they leave a rectory or vicarage.

Dilemma (Gr *di* twofold, *lemma*, proposition). Argument in which an opponent is caught between two difficulties, when he has two alternatives to choose from each of which would be fatal to his cause. A modern example of a dilemma is the argument used by opponents against a tariff. If it succeeds in keeping out foreign goods it will produce no revenue, if it fails to do so it will not protect the home market.

Diligence Form of stage coach. It was popular in France until superseded by steam trains, and lingered throughout the 19th century in Switzerland and other mountain regions.

Dilke Sir Charles Wentworth English politician. Born in London Sept 4, 1843, he was the son of Sir C. W. Dilke Bart. and the grandson of Charles Wentworth Dilke (1789-1864) who owned and edited the *Athenaeum*. He was educated at Trinity Hall, Cambridge and in 1869 succeeded to the baronetcy created in 1862 and the ownership of the *Athenaeum*. Elected M.P. for Chelsea in 1868, he was made Under Secretary for Foreign Affairs in 1880, and in 1882 President of the Local Government Board. Dill married Emilia Frances, widow of Mark Pattison and died childless Jan 26 1911. His books include *Problems of Greater Britain*.

Dill (*anethum graveolens*). Annual umbelliferous plant found in Asia and S. Europe. It has small yellow flowers and flat brown fruits or seeds. From these is prepared dill water, a carminative used medicinally for infants, and the leaves are also used for flavouring. It is identical with the anise mentioned in the Scriptures.

Dillon John Irish politician. A son of John Dillon M.P. he was born in 1851 and educated for the medical profession in Dublin. In 1880 he entered Parliament, became

one of the most active of the nationalists, and was more than once in prison. In 1896, after the split in the nationalist party, he was elected leader of the section opposed to Parnell, and in 1918, on the death of J. E. Redmond, he was chosen as his successor in the leadership of the united party. The rise of Sinn Féin, however, left his party almost powerless. Dillon died Aug 4, 1927.

Dillon's brother Emile Joseph Dillon, won a reputation as a foreign correspondent, especially for the *Daily Telegraph*.

Dilution Term used for the process of lowering the strength of a liquid by mixing it with water or other fluids. In medicine distilled water is used for reducing concentrated extracts to the required strength for dosage and in some extracts, such as nuxvomica and straphanthus milk sugar is the diluting agent. Dilution plays an important part in the preparation of homeopathic medicines which are given in infinitesimal doses.

Dime Silver coin current in the United States. The tenth part of a dollar, it is worth about 5d. in English money.

Dimorphism Term applied to the phenomenon where two different forms occur in a species of animal. An example is the case of certain insects where winged and wingless individuals occur in the same species. In other types the male and female may differ strongly in colour, size, etc. (sexual dimorphism).

Dinan Town of Brittany. It stands on both sides of the River Rance, 15 m. from St. Malo. The chief buildings are the Church of S. Sauveur, once a cathedral and the castle. There is a small harbour and a little shipping trade. Pop 10,100.

Dinant Town of Belgium. It stands on both sides of the Meuse 17 m. from Namur. At one time Dinant was a great commercial city with 60,000 people protected by walls and a castle. The Germans captured the town and burned some of the houses in Aug. 1914. Pop 6900.

Dinar Standard monetary unit of Yugoslavia. It has a nominal value of about 9d. in English money. Coins of 1 and 2 dinars, and notes of 5, 10, 100 and 1000 dinars are current.

Dinard Watering place of Brittany. It stands at the mouth of the Rance, opposite St. Malo. There is a casino and other attractions for visitors. Pop 8000.

Dindings District of the Straits Settlements. It consists of a piece of land on the coast together with Paungor and other islands. It covers about 200 sq. m. Lumat is the capital. Pop 18,331.

Dingle Seaport and market town of Kerry, Irish Free State. It is on the railway 30 m. from Tralee, and is a fishing centre. There is a harbour. Pop 2000.

Dingle Bay is an arm of the Atlantic. It is 24 m. long and at its entrance are Bray and Dunmore Head.

Another Dingle is a part of Liverpool. In it is Diago Point, a prominent mark on the Mersey.

Dingo Native Australian dog or warrigal. It is stoutly built and sandy coloured, short legged, with bushy tail. Notwithstanding fossil remains of pleistocene age, it is commonly regarded as having been introduced by man and related to the S. Asian

pariah dogs. It is nowadays entirely wild and very destructive to flocks, being systematically destroyed under government encouragement.

Dingwall Burgh of Scotland, the county town of Ross and Cromarty. It stands on the Cromarty Firth, 18 m from Inverness, on the L.M.S. Rly. Pop (1931) 2554.

Dinkelsbühl Town of Bavaria, famed for its picturesque appearance. It was founded in 928, was long a free city, and in 1802 became part of Bavaria. In 1928 the town celebrated its thousandth anniversary. Pop 5500.

Dinnington Village of Yorkshire (W.R.). It is on the S. Yorkshire coal field 14 m from Doncaster, on the L.N.E. Rly. Pop 4900.

There are towns of the same name in Northumberland and Somerset.

Dinosaur Order of extinct four-footed reptiles of the mesozoic era. Mostly small-brained, they dominated by bulk, some laid eggs, while some produced living young. They form four sub-orders: (1) Lizard-footed herbivores, as the *atlantosaurus*, 100 ft, *diplodocus*, 80 ft, *cetiosaurus* and *brontosaurus*, 60 ft; (2) Armour-plated herbivores, as the *stegosaurus*, 25 ft, and three-horned *triceratops*, with 6 ft head; (3) Bird-footed herbivores as the *Iguanodon*, 30 ft; (4) Beast-footed carnivores, as the *megalosaurus* and *dryptosaurus*, 20 ft, and the *tyrannosaurus*, 40 ft.

Dinotherium Genus of extinct proboscidean mammals of great size preceding the mastodons and the elephants. Perhaps originating in Miocene N. Africa, fossil remains of several species are found in Miocene and Pliocene rocks in France, Germany, Greece and N. India. Lacking upper incisors and canine teeth, their lower jaw, sharply bent downward, bore two massive tusk-like incisors. Apparently they were more or less aquatic, and the skull indicates a length of 18 ft.

Diocese District under the authority of a bishop. The whole of Great Britain is divided into dioceses and there are dioceses also in the British Dominions and in other lands where the Anglican Church works. The Roman Catholic Church is also divided into dioceses. A group of dioceses forms a province which is usually under an archbishop.

There are now 43 dioceses in England, 30 in the province of Canterbury and 13 in the province of York. Wales has six dioceses. Each diocese has a cathedral and usually takes its name from the cathedral city. In one or two cases a diocese has a double name, e.g., St. Edmundsbury and Ipswich.

Diocletian Roman emperor. Born at Diocla in Dalmatia in A.D. 245, his full name was *Gaius Aurelius Valerius Diocletianus*. Said to have been the son of a slave, he became a soldier, held various commands, and in 284 was proclaimed emperor. He divided the empire with his colleague, Maximilian, and later, in 292, with Galerius and Constantius Chlorus as well. Nicomedia was his capital.

Diocletian's reign was marked by a strong tendency towards absolute rule. He subjected the Christians to much persecution by an edict of 303. In 305 he abdicated and died at Spalatro in 313.

Diogenes Greek cynic philosopher. Born at Sinope, according to tradition, he early emigrated to Athens, became

a pupil of Antisthenes, the founder of the Cynics, and lived in a tub. Taken prisoner by pirates and sold as a slave, he was bought by a wealthy Corinthian, Xenocrates, who gave him his freedom. Little is really known of his life and doctrines. The countless anecdotes that are told of him by ancient authors cannot lay claim to authenticity. Under his name we have some spurious letters. He lived from 412 to 323 B.C.

Diomedes Greek legendary hero. King of Argos, the bravest of the heroes next to Achilles, and the favourite of Pallas Athena, he was present at the siege of Troy. Fighting against the gods who sided with the Trojans he wounded Ares and Aphrodite. His cult, starting from Argos, spread through all the Greek lands.

Dionysia Greek festivals in honour of Dionysus. These consisted of the lesser or rural Dionysia, celebrated in the country, and the greater or city Dionysia, celebrated at Athens. On the first day of the latter there was a grand procession to the altar of the god, a feast, and a choral dance; on the second day dithyrambs were sung, and on the last three, contests of tragedy and comedy were held in the great theatre of Dionysus.

Dionysius Name of two rulers of Syracuse, known as tyrants. Dionysius the Elder was born at Syracuse in 430 B.C. He won renown in the campaign against Carthage and was made commander of the army in 405. Soon he was proclaimed king, ruling over a good part of Sicily, as well as the city of Syracuse. His rule was oppressive and conspiracies were formed against him, but he kept his state and position until his death in 367. Dionysius erected beautiful buildings in Syracuse, won a prize with a play and was visited by Plato.

His successor, Dionysius the Younger, passed most of his reign in warfare with a rival, Dion. He was driven away in 356, but returned ten years later. In 343 he again left Sicily and passed his remaining days as a teacher in Corinth.

Two other persons of this name are known. Dionysius the Areopagite was one of St. Paul's converts. He was evidently an Athenian (Acts xvii). Dionysius of Halicarnassus was a Greek who passed much of his life in Rome. He wrote, in Latin, a book on the history of the Roman people.

Dionysus Greek name for the god known usually as Bacchus (*q.v.*).

Diopside Somewhat rare mineral allied to augite and belonging to the monoclinic pyroxene group. It consists of a silicate of calcium and magnesium, and occurs as green or colourless crystals in veins in serpentine, granular limestones and garnet rock in Sweden, Italy, the United States and other localities.

Diopase Rare mineral. It consists of a silicate of copper and occurs as green transparent crystals which resemble those of the emerald. It was first found lining cavities in the limestone at Altyn Tübe in the Khirgiz Steppes and later in Chile and the French Congo. In its chemical composition it is allied to the commoner copper ore *chrysocolla*. It sometimes serves as a gemstone.

Diphthong (*Gr. di* double, *phthongos*, sound). Union of two vowel sounds which follow each other so closely that when pronounced they form only one syllable.

Thus, in the word *ou*, *ou* is really a compound of the sound of a heard in *father* and the sound of *u* heard in *put*

Diplodocus Genus of extinct land reptiles. They lived in Wyoming and Colorado in Jurassic times. They had smooth skins, slender necks and long tails with diminutive heads and tiny brains. Walking on all fours, with nostrils overhead for breathing, they browsed on succulent aquatic weeds, submerged in wide estuarine shallows at the foot of the Rocky Mts. Their length ranged from 50 to 85 ft.

Diphtheria Infectious disease. A germ or bacillus sets up an inflammation in the throat or adjacent areas where a fibrinous membrane is formed. The temperature rises and is accompanied by pains, headaches and general lassitude. Sometimes the glands are swollen. Diphtheria chiefly attacks young children, but others are by no means immune. It is highly infectious. Many cases are due to drinking impure water, and it is often conveyed in milk. It can also be conveyed by carriers, persons who are themselves free from it, but who can infect others. In its severe form diphtheria is very dangerous. Breathing is impeded and the closing of the air passages brings on death.

Formerly almost one in two cases was fatal, but the use of anti toxin has greatly reduced the mortality. In Great Britain cases of diphtheria must be notified to the medical officer of health. The word is a Greek one meaning leather, because the membrane formed in the throat resembles leather.

Diploma Mark of proficiency, usually in a branch of learning. Examining bodies who cannot give degrees give diplomas to those who have fulfilled certain tests. They are also given to dispensers, opticians and traders of other kinds to show that a certain degree of skill has been attained. Strictly speaking the diploma is the document on which the qualifications are set out.

The Diploma Gallery is at Burlington House, London. It contains the works sent to the Academy by those who have been elected R.A. The rule is that each R.A. presents a work to this gallery.

Diplomacy Art of negotiation, especially between countries. To-day each country possesses a diplomatic service whose members called diplomatists carry on negotiations with foreign countries. Some of these, ambassadors, ministers, envoys etc go abroad and live in a foreign capital to keep in close touch with its rulers. Their business is to watch over the interests of their country and to send regular reports upon all that concerns it. The position is a highly confidential one.

The service originated when emperors and kings sent men on business to foreign countries. About the end of the Middle Ages the practice began of sending a representative to reside in a foreign land. The Tudor sovereigns had a number of such diplomatists and much of our knowledge of foreign affairs comes from studying their reports.

In the United Kingdom the diplomatic service is part of the foreign office staff. Most of the ambassadors and ministers are drawn from members of the service but occasionally an outsider of eminence is appointed, as when Lord Derby and then Lord Crewe were sent as ambassadors to Paris. Diplomats in a foreign capital enjoy special privileges. They cannot be arrested and their residences are free

from rates and taxes. All the diplomatists in a capital form the diplomatic corps which takes precedence on State occasions. Its etiquette is very strict.

Diplomatics Critical study of its torical and other documents. It comes from the word diploma and is only concerned to find whether or not the documents are genuine. The study arose at a time when many forgeries of charters, etc., were in existence. There is a reader in diplomatics at Oxford.

Dipper Semi aquatic songster allied to the thrush (*cinclus aquaticus*), also called the water ouzel. Brownish, white breasted, with short rounded wings, it haunts mountain streams, into which it plunges noiselessly. It clings to the bed of the river and uses its wings to help its progress under the water. The bird lays five eggs at a time.

Dipsomania Morbid craving for alcoholic stimulants. It is the result of mental instability, assisted in many cases by an hereditary tendency to drink. Dipsomaniacs are treated in homes for inebriates and the law allows them to be put under restraint.

Diptera Order of insects. Characterised by two membranous wings, usually transparent, not folded at rest, the posterior pair present in other insect orders is reduced to drum-stick balancers or halteres. With short antennae and two large compound eyes, the mouth parts form a proboscis for piercing and sucking. Upwards of 40,000 species have been named, but far larger numbers remain unnamed. Nearly 3000 are recognised as British, they include crane flies, mosquitos, house flies, tsetses and bot flies. Many species walk upside down by means of foot suckers.

Diptych Form of writing tablet used by the Romans. It consists of two wooden or ivory leaves which fold over like a book. In time it became customary to present consuls with a diptych carved on the outside in bas relief. The early Christian diptych is distinguished by the principal illustration being on the inside.

Dirce In Greek legend the wife of the King of Thebes, Lycus. She is known for her harsh treatment of Antiope, a former wife of the king. To avenge their mother, Antiope's sons, Amphion and Zethus, killed Lycus and tied Dirce to a wild hilt which dragged her about till she died.

Directoire Form of architecture and furniture developed during the French Directory, which was in power 1795-99. It marked a gradual abandonment of the restrained classical grace in vogue under Louis XVI, passing into an enthusiasm for the heavier Roman motives. Its influence upon contemporary taste in England was slight.

Director One holding a directing or responsible position. Under the company law of England every limited liability company must have a board of directors who are responsible for its affairs. They are elected by the shareholders. One of them is chosen to act as chairman, and one or more are called managing directors and give their whole time to the business. The directors are responsible for the statements made in a prospectus and can be prosecuted for neglect in the supervision of the company's affairs. A board of directors must keep minutes of its

proceedings and issue reports to the shareholders

The word is also used for certain high officials in the civil service, especially the War Office and the Admiralty, and for those responsible for the control of education in counties and county boroughs. Another director is the director of public prosecutions.

Directory Committee of five men who governed France from Oct., 1795, to 1799. The convention framed a constitution and entrusted the executive power to the Directoire. Its first members were Barras, Carnet, Lépiaux, Letourneau and Rewbel. Under the Directory Napoleon conducted campaigns in Italy, Egypt and Germany. French influence increased in Italy and Switzerland, and a treaty with Austria was concluded. Napoleon ended the Directory Nov. 9, 1799, and made himself first consul.

Dirge Funeral song or hymn. The word is a corruption of the opening word in the Roman Catholic office for the dead, *Dirige, Domine*, etc.

Dirigible Term applied to navigable balloons and non-rigid airships. The earliest type was a slightly elongated balloon propelled by ears or propellers and worked by hand power. The modern non-rigid type, the result of many experiments, is spindle-shaped, giving less resistance than the globular form, and is directed by horizontal and vertical planes.

Dirk Highland dagger or poignard. It has a short, sharp-pointed blade from 15 to 20 in. in length, and a handle of wood or horn, or of brass with ornamental mountings. In the British Navy it was worn as a side arm by midshipmen and cadets.

Dirt Track Course of dirt or cinders on which motor cycles race. Dirt track racing originated in Australia and was brought to England in 1928. Matches take place regularly between teams of six, much on the principle of the leagues in association football. There are tracks at Lea Bridge, Crystal Palace, Stamford Bridge, Wembley and elsewhere in the London area, also in Manchester, Birmingham, Liverpool and other large cities.

Discharge In law, the bringing to an end of a contract, e.g., by performance, breach or mutual agreement. In bankruptcy, discharge means the release of a bankrupt from his liabilities, which may be granted, unconditionally or subject to a condition, e.g., after the lapse of a period of time, or the payment of a specified sum as dividend to the creditors.

The term is also used when a soldier or sailor leaves the army or navy. He is discharged at the end of the time for which he enlisted, but he can buy his discharge at an earlier date.

Disco Ball game introduced into London in 1928. It resembles badminton, but the play is faster. Underhand service is compulsory and modern racquets are used. The court is 40 ft. long and 16 ft. wide, divided by a net, 4 ft. high. The service lines are marked between two posts 14 ft. back from the net. On each post is a disc, 20 in. across. If the ball fails to clear the net or goes out of the court one point is lost, but if it hits a disc five points are gained. Games are for 15 points, and a set is the best out of five games.

Disco Island off the west coast of Greenland, of which it forms part. It covers 3000 sq. m. and on it are coal mines

and stone quarries. Gedhavn is the chief settlement.

Discobolus Copy in the Vatican of a famous statue by Myron. There is also a marble copy in the British Museum.

Discount Percentage allowance from the price of an article or the amount of a debt. Cash discount is allowed by traders for prompt payment, while trade discount is an allowance made by wholesalers from the retail prices of articles bought in large quantities.

Banker's Discount is a commission charged for discounting, i.e., cashing a bill of exchange. The firms engaged in this business in London form what is called the discount market.

Discovery Name of several English ships. One was commanded by William Baffin when he went to the Arctic Ocean early in the 17th century. Captain Cook and George Vancouver sailed in ships of this name and there were others. In 1901 Capt. R. F. Scott went to the Antarctic in a new *Discovery*, and this vessel, having been refitted, was used by Sir D. Mawson in 1929.

Discus Round or oval piece of stone or wood or metal used in athletic contests. Throwing the discus was one of the competitions in the games of ancient Greece. It has been revived in modern times and is an event at many athletic meetings. The discus weighs 4½ lbs. The world's record of 157 ft. 1½ in. was made at San Francisco in 1925. In 1930 a British record (126 ft. 8 in.) was made at Brighton by A. R. Edwards.

Disease Definite ailment or complaint. It may be physical or mental, acute or chronic, curable or incurable, affect any part of the organism, and directly or indirectly conduce to death. Its study is called pathology. Physicians and surgeons are either general practitioners or specialists in limited fields of practice, such as diseases of the eye or the lungs. Diseases may be constitutional, localised, congenital, infectious, endemic, or epidemic. Some infectious diseases must be notified to the local medical officer of health.

For the study of tropical diseases there are institutes in London, Liverpool, Hamburg and elsewhere.

Disendowment Sequestration by the State of property belonging to the Church. It usually accompanies disestablishment. By Acts of Parliament passed in 1869 and 1914, the Irish and Welsh Churches were disendowed, the clergy receiving life interests in their benefices. Proposals have been put forward for disendowing the Church of England, but its advocates maintain that property definitely left to the Church within recent years should not be appropriated by the State.

Disestablishment Act of separating Church and State. The Roman Catholic Church has been disestablished in France, Spain and other countries, and the Anglican Church in Ireland (1871) and in Wales (1920). The separation thus effected means that the church becomes self-governing, no longer are its bishops and other clergy appointed by the king and his ministers, but by the Church itself.

In the 19th century there was a strong agitation for the disestablishment of the Church of England, and in 1844 the Liberation Society was formed, countered by the Church Defence Institution. In the 20th century,

especially after the rejection by Parliament of the Revised Prayer Book in 1927 and 1928, there was a new movement for disestablishment, but this time it came from within the Church

Disfranchisement Act of depriving people of the right to vote or to be represented on an elected body Parliamentary constituencies have been disfranchised by Act of Parliament from time to time, chiefly because of their small size This was done in 1832, 1867, 1884 and 1918 The electors, however, retain their right to vote, doing so in a larger constituency which includes the disfranchised one

The disfranchisement of individuals is now a rare event, but conscientious objectors were so treated for a limited period after the Great War At one time ex-convicts in Great Britain were not allowed to vote

Disinfection Term applied to the process of destruction of the causes of infection by disease, and often loosely used to include deodorants and antiseptics They act by destroying germ or bacterial life A deodorant merely covers or destroys offensive odours

Disinfection may be carried out in various ways, by burning, or the use of hot air, steam or boiling water, by the use of oxidising agents, such as sulphurous acid, chlorine, permanganate of potash, etc by the use of substances which coagulate albumen, such as corrosive sublimate and copper sulphate, or by the use of poisonous agents such as phenol

Disley Village of Cheshire It is 6 m from Stockport and 175 from London on the L.M.S. Ry Pop 2960

Dislocation Displacement of the ends of opposed bones in a joint It may be congenital, when due to a malformation at birth, spontaneous, when caused by disease of the joint tissues, or accidental, when resulting from violence Besides displaced bones there may be bruised tissues and torn ligaments Compound dislocations, attended by wounds communicating externally with the air, are sometimes accompanied by fractures Unqualified surgeons who treat dislocations and fractures are colloquially called bone setters

Dispatch Official communication sent away promptly or regularly The term especially denotes the communications of ambassadors and military or naval commanders Detailed accounts of naval and military operations, sometimes prepared leisurely, and preceded by condensed urgent *communiqués* rank as dispatches, and units or men named in them as meriting special commendation are said to be mentioned in dispatches

The use of dispatch riders for conveying messages between headquarters and units has marked military operations in all ages The American Civil War utilised horsed riders the S. African War cyclists, and the Great War motor cyclists

Dispenser In Great Britain a person qualified under the Pharmacy Acts to compound medicines from physicians' prescriptions A dispenser is qualified also to trade as a chemist and druggist The examinations prescribed for dispensers are conducted by the Pharmaceutical Society of Great Britain 17 Bloomsbury Square London, W.C. There is also a Pharmaceutical Society in Dublin and a College of Pharmacy in Leeds

The diploma of M.P.S. is given to successful candidates

Pharmaceutical chemists, hospitals and general practitioners employ dispensers for compounding their medicines Many women have now entered the profession

Dispensing requires, in addition to a good general education, a knowledge of chemistry and *materia medica* and of the British Pharmacopoeia and other recognised formularies, a practical acquaintance with the weighing and measuring of drugs and the system of dosage, and the ability to decipher the written prescription with its symbols and abbreviations

Dispensing Power In England a power claimed by certain sovereigns of allowing individuals to break the law without being punished It was claimed and exercised by James I. and other Stuart Kings especially by James II. In the Bill of Rights passed in 1689 it was declared illegal

Dispersion Term used in optics for the separation of white light into its constituent colours by refraction through a prism The rays having the longest wave length are refracted least, whilst those with the shortest wave length undergo most deviation Sunlight is dispersed by refractions through rain drops, to form the rainbow Dispersion also occurs when light is refracted through a lens, giving rise to colours on the edges of the image focussed on a screen

Displacement Term used of ships It is the weight of water which a vessel displaces, and is usually expressed in tons See TONNAGE

D'Israeli Isaac English writer Born at Enfield, May 11, 1760, he was the son of Benjamin D'Israeli a Jewish trader in London He was educated in Amsterdam and began to write, his best known work being *The Curiosities of Literature*, published in six volumes He also wrote *Calamities of Authors* and other books D'Israeli became a Christian in 1817 He died at Bradenham Bnks, Jan. 19, 1848, leaving one son, later the Earl of Beaconsfield (q.v.)

Disruption Term used for the secession of 420 members from the Church of Scotland in 1843 They differed from the others on the question of patronage and, led by Dr Thomas Chalmers, they formed the Free Church of Scotland

Diss Market town and urban district of Norfolk It is on the Waveney, 19 m from Norwich, on the L.N.E. Ry John Skelton poet and satirist was rector here There is a trade in agricultural produce Pop (1931) 3422

Dissenter In Great Britain one who separates from the Established Church for reasons of doctrine discipline or ritual The word was applied to those who declined to accept the Act of Uniformity of 1662, but it denotes more particularly the Protestant dissenters referred to in the Toleration Act of 1689 In the Relief Act 1791 English Roman Catholics were originally styled Protestant Catholic Dissenters Members of the Episcopal Church of Scotland are technically dissenters from the Established Church of Scotland Modern usage tends to prefer the epithet Nonconformist or Free Church

The Dissenting Deputies is a body of laymen representing the three denominations Congregationalist Presbyterian and Baptist

Founded in 1732 it has the right of offering an address to the sovereign at his accession and at other times

Dissecting Operation of cutting upon or separating into parts, specifically the complete or partial cutting of animals or plants into component organs or tissues for examination and study. The provision of human bodies for anatomical study is governed by the laws of 1832 and 1871 before which they were obtained by illegal means, such as those adopted by Burke and Hare. Dissecting is part of the training of all medical students

Dissertation Formal discourse or treatise. The word especially denotes a written essay or thesis required of candidates for university degrees independent of set examinations. Such theses are offered for the degrees of Doctor of Literature, D Litt., at London University, docteurs ès lettres at the Paris Sorbonne, and Doctor of Philosophy, Ph D., at some German universities

Dissolution Act of reducing to constituent parts an organised association. The term may denote the termination of a partnership, by effluxion of time or mutual agreement, duly notifiable in the *London Gazette*

A Dissolution of Parliament precedes a General Election. It takes place on the advice of the Prime Minister unless the parliament comes to an end because its period, in Great Britain five years, has expired

Distaff Cleft stick for holding fibre in hand spinning. Usually of wood, the cotton, wool or flax was wound loosely upon it in readiness for the spinning. It was held under the left arm. The lower end rested upon the ground or the ground, and the right hand drew out the fibre and twisted it on its way to the weighted spindle. It disappeared when large spinning wheels were introduced. Distaffs were in use in very early times. Their length was about 36 in.

Distemper Method of painting with pigments mixed with glutinous material, preferably egg yolk, soluble in water. Surfaces, usually wood or canvas, are coated with gum—mixed plaster. Such tempera which was continued until oil painting developed, still serves for scene painting and similar work.

In house decoration pigments mixed with size and body white are spread upon plastered walls. Called distempers, these often take the place of paper. They are easy to keep clean and can be obtained in a variety of colours

Distemper Specific infectious and contagious fever attacking young dogs. Primarily catarrhal, it affects the mucous membrane of the eyes and nostrils. The running discharge impairs vision, the cornea may become ulcerated. Rigor, sneezing, loss of appetite, increased temperature and pulse, cough and diarrhoea may lead to other complications. Chorea frequently supervenes. Careful nursing, nourishing food and frequent bathing of the affected parts are essential. High bred and pet dogs are peculiarly liable to distemper

Distilling Converting a substance or its volatile constituents into vapour condensable into liquid drops. It extracts essential or volatile oils from plants, mineral oils from coal tar, fresh water and salt and alcoholic spirit from fermented saccharine liquids.

The apparatus comprises stills containing the substance whose heating drives into their upper part vapour which passes through spiral tubes, or worms surrounded by condensing water. The liquid drops fall into receivers. Stills are fire-heated pot stills, steam-heated patent, or Coffey stills, and rectifying stills

Several substances are used for distilling. Brandy is distilled from wine. Rum is distilled from sugar cane and its molasses, also from beet. Whisky is distilled from starchy materials, chiefly grain, such as barley, rye, oats, wheat and maize. In these the starch is first fermented into sugar and the sugar then fermented for alcohol. Industrial alcohol is distilled from beet and molasses, also from potatoes and sawdust

Distilling is a considerable industry in Scotland, where much of the world's whisky is made. A distiller must take out a licence, which varies according to the number of gallons distilled. For 50,000 gallons or under it is £10.

The Distillers Company is a London livery company. It dates from 1638 and its offices are in the Guildhall

Distinguished Conduct

Medal British military decoration. Instituted in 1862, it is conferred on non-commissioned officers and men for 'individual acts of distinguished conduct in the field.' It is now awarded for services in action only. The ribbon has three stripes of equal width, the centre stripe being blue and the others red. It is called the D C M.

Distinguished Flying Cross

British decoration. It was instituted in 1918 solely for officers and warrant officers of the Royal Air Force, to whom it is awarded for conspicuous gallantry in action. It is a small cross with a purple and white ribbon, striped horizontally and is called the D F C.

The Distinguished Flying Medal, also awarded for gallantry in action, is given to non-commissioned officers and men of the Royal Air Force. The ribbon is purple and white striped horizontally. It is called the D F M.

Distinguished Service Cross

Naval decoration. It is given to officers of the navy below the rank of lieutenant-commander, including warrant officers and is called the D S C. It was founded in 1901 as the Conspicuous Service Cross. The ribbon is three equal stripes, two blue with a white stripe in the centre.

The corresponding decoration for the lower ranks of the navy and marines is the Distinguished Service Medal. This dates from 1914. The ribbon is purple and white and it is called the D S M.

Another Distinguished Service Medal is given to the men of the Indian army. It dates from 1907. The ribbon is violet with blue borders.

Distinguished Service Order

Naval and military decoration. It dates from 1886 and is called the D S O. It is given to officers of the army and air force for distinguished service in the field. Members are called Companions and have precedence before the 4th class Royal Victoria Order. A bar is awarded for an additional act of gallantry. The ribbon is red with blue edges and the badge is a Maltese cross. Over 8500 awards were made during the Great War.

Distrain Method of enforcing payment of a debt. The usual method

is for the creditor to sue the debtor, and, having proved his debt, to obtain an order calling upon the debtor to pay, if he fails to do this the creditor can send the bailiffs to his house, or business, and sell his goods. At one time the goods of a lodger could be seized for the debts of his landlord, but this was forbidden by law in 1908.

Arrears of rent are often obtained by a distress. Before the passing of the Rent Restriction Act during the war period, a landlord could distress without applying to the court. Under the Rent Restriction Acts an order of the court is necessary before this can be done. If a tenant removes his goods the landlord can distress upon them wherever they are within 30 days.

Distributor Flat or columnar switch board for distributing electrical energy derived from a main supply through the various circuits comprised in a building or other system. In multiplex telegraphy, by cable or wireless, a rotating arm making in sequence contacts with levers controlled by selecting pins enables several messages to be transmitted and received simultaneously in connection with a single wire or aerial. Similar devices enable multi-cylindrical internal combustion engines to operate from a single source of energy.

District Defined portion of territory. Such is the district of Columbia which includes Washington, in the United States. In England there are two kinds of district, urban and rural, each with an elected council, and controlled to some extent by the county councils. Urban councils, especially those with over 20,000 inhabitants, have much more extensive powers than the rural ones. The councils were set up in 1894.

Ireland had councils on the same plan. In Scotland the counties are divided into districts and district councils were set up by a law passed in 1929.

A district registry is an office where wills can be proved. There are about 40 of them in the large towns of England and Wales.

Ditchling Beacon Hill in Sussex. It is about 7 m. from Brighton and one of the highest points of the South Downs. It is now the property of the borough of Brighton.

Diuretic Medicinal agent tending to increase the flow of urine. Such agents, by increasing the flow, assist in eliminating morbid products or dropsical fluids. They may pass direct to the kidneys, diminish kidney congestion and relieve the heart.

Divan Persian word meaning a tribunal also its registers its place of meeting and the low raised seats round its walls. In the first meaning it denotes a state council, specifically Ottoman, the second passed into French as *douane* a custom house the third came to mean a smoking café or tobacco divan. A combination of seat and bed, suitable for flats, is called a divan.

Diver Genus of diving birds (*Colymbus*). Of the four species, three the great northern (*C. glaucus*) with glossy black head and neck, the red throated (*C. septentrionalis*), with reddish-grey throat patch, and very rarely, the white billed (*C. adamsi*), are winter visitors to Britain, but breed inland in more northern regions. The black throated (*C. arcticus*), breeds in the Hebrides.

Divide Term used in the United States for an elevated water parting

between valleys. The Continental Divide is in Wyoming. Between Idaho and Montana rises Divide Peak. Queensland has a Great Dividing Range, and Victoria a Dividing Range.

Dividend (Lat. *dividendum*, something to be divided) Word used in mathematics for a sum to be divided by a divisor to obtain the quotient.

In law a dividend is a sum of money set aside out of a company's profits for distribution among the shareholders usually by a percentage on their share holdings. The declaration of a dividend creates a specialty debt (i.e. a debt not barred for 20 years), due from the company.

By English law a dividend cannot be paid out of capital. Dividends on preference shares are cumulative or non-cumulative. If the former, any dividend that is not paid must be carried forward and paid before the ordinary shareholders receive anything.

Divination Quest or discovery of the unknown by non-rational methods. The processes observed are subjective, as in dreams, crystal gazing, trance speaking, dowsing and necromancy, or objective, depending upon inference from observed facts. Their interpretation developed schools of empirical deduction, traceable among Chaldean soothsayers and prevalent in ancient Rome. They observed live things such as birds and hands, dead things such as entrails, inanimate objects as in astrology and geomancy, mechanisms such as suspended keys and rings, and cast lots.

Divine Right Idea that kingship and other forms of authority are of divine sanction and cannot lawfully be set aside. It was strong in England in the 16th and 17th centuries, and especially held in connection with the Stuart kings. The idea, which is historically unsound, gradually lost favour, but societies still exist which regard it as an article of faith. Its supporters call themselves legitimists and believe that a member of the late ruling family of Bavaria, as being descended from Charles I., is the rightful king of Great Britain. See JACOBITES.

Diving Act of plunging into water. Diving has been adopted as the means of obtaining pearls and sponges from the sea bed in shallow waters. A diver can remain for only two to three minutes under water and in many of the pearl and sponge fisheries diving apparatus is coming into general use.

For recovery of treasure and other purposes in deeper waters the diving dress consists essentially of a flexible waterproof or metal garment and copper helmet provided with air tubes, signal line, telephone and outlet air valves.

Diving is also a pastime and competitions are held. The record for the longest time under water is 6 min. 29½ sec., held by a Frenchman.

Divining Rod Fork twig used in searching for something hidden. This method of divination, of great antiquity, is still employed by professional dowsers. In searching for metalliferous deposits or water springs. Timber twigs usually hazel or metal wires and springs are held between the extended hands and give notice of the proximity of the object sought by more or less violent contortions. The frequent success of this method is sometimes attributed to the dowsers' capacity for perceiving obscure

indications which are communicated to the rod automatically

Divinity Term for the godhead In polytheistic religions the term denotes all gods and demigods

It is also used synonymously with theology for the science of divine things In Scotland divinity halls are theological colleges or university departments Doctors of Divinity (D.D.) hold degrees, usually honorary, conferred by universities under varying conditions There are regius professors of divinity at both Oxford and Cambridge and professors of divinity at the universities of London and Durham, the Scottish universities and Trinity College, Dublin

Division In the United Kingdom a district that sends a member to Parliament Each of the larger counties and boroughs is divided into several divisions

In both houses of parliament the taking of votes is called a division Members pass into one of two lobbies, the "ayes" in one and the "noes" in another There they are counted and the result announced to the House by two members called tellers

In military matters a division is the unit between an army corps and a brigade It consists of three brigades of infantry, about 10,000 men, with appropriate artillery, engineers and other auxiliaries It is usually commanded by a major general

Divorce Legal ending of the marriage tie This branch of the law was long under the control of the church, which regarded divorce with great disfavour As, however, the influence of the church weakened divorces became easier to obtain

Divorce was allowed on very slender grounds by the Romans, but became much more difficult to obtain when Christianity was established in Europe At the time of the Reformation some countries, Scotland for instance, began to allow it in cases of adultery

In England the history of the law falls into three periods Until 1857 a divorce could only be obtained by a special Act of Parliament, which meant that it was confined to the rich In 1857 a law was passed which allowed a husband to apply for a divorce if his wife had committed adultery A wife could only obtain a divorce if adultery was coupled with desertion or cruelty Divorce could also be obtained for bigamy A divorce court was set up and is now part of the probate, divorce and admiralty division of the high court

In 1923 a law was passed which made the sexes equal in this matter Adultery is now a ground for divorce by both husband and wife if the case is proved the court grants a decree nisi (unless) If, at the end of six months, the parties concerned have not broken the law, the decree is made absolute, and they are free to marry again Poor persons desiring a divorce on good grounds can obtain assistance from the Law Society, Chancery Lane, London, W.C.2

There is a movement to make divorce still easier to obtain, in cases of insanity or serious mental trouble for instance and a Divorce Law Reform Union exists at 55-56 Chancery Lane, London W.C., to urge such reforms

In other countries the law varies greatly In the United States each state has its own divorce laws, and divorce is very easy to obtain In France it is allowed In general it is most difficult to obtain in countries where the Roman Catholic church is strongest

Dixmude Town of Belgium It stands on the Yser, 12 m. from Ypres.

The town was much damaged during the Great War Taken by the Germans, it was recovered by the Belgians in Sept., 1918

Dnepropetrovsk Town and river port of Ukraine It stands on the Dnieper, 250 m. from Odessa and is the fourth largest town in the republic. It is an important trading centre, as the Dnieper is navigable by large vessels, and has a number of manufactures It occupies the site of a Polish fortress, where later a residence was built in 1787 for the Empress Catherine II This was called in her honour Ekaterinoslav and round it the town grew In April, 1918, it was taken by the Germans, later the Soviet authorities changed its name Pop 233,801

Dnieper River of the Ukraine It rises in the Valdai Hills and enters the Black Sea, just below Kherson It is navigable and is used for bringing down corn for shipment at Odessa, artificial channels having been cut to avoid the rapids It is over 1300 m. long and is linked by canals with other rivers

Dniester River of Europe It rises in Poland and passes through the Ukraine and Rumania to the Black Sea, which it enters near Odessa It is used for bringing down grain for export from the Black Sea ports Its length is 750 m. and canals unite it with other waterways

Dobell Sydney Thompson English poet and critic Son of a wine merchant, he was born at Cranbrook, Kent, April 5th, 1824 Though he assisted his father in business at an early age he wrote verse and studied continuously In 1850 the publication of *The Roman* brought him instant success *Balder*, published in 1854, was followed by *England in Time of War*, 1856, and many other poems Dobell died at Nailsworth, Gloucestershire, Aug 22nd, 1874

Dobrudja District of Rumania It covers about 8000 sq. m. and lies between the Black Sea, Bulgaria and the Danube Constantza is the chief town A good deal of it is marshland, but other parts are fertile soil Dobrudja was taken from Turkey and given to Rumania in 1878 In 1916 it was conquered by the Austro-German armies and in 1918 was handed over to Bulgaria It became Rumanian again by the treaty of 1919

Dobson Frank English sculptor Born in London, Nov 18, 1887, he studied art in London and in Cornwall At first he worked both as a painter and a sculptor, and his pieces attracted a good deal of attention when exhibited in 1909 Afterwards he gave his time almost entirely to sculpture and produced some notable work, including busts of Lord Oxford and Asquith and Lydia Lopokova

Dobson Henry Austin English writer and poet Born at Plymouth, Jan 18, 1840, he became a civil servant, entering the Board of Trade in 1856 In 1873 he published *Figures in Rhyme* and from that time onwards was known as a graceful writer in both prose and verse and a discerning critic, with a wide knowledge of modern literature He wrote lives of Steele, Goldsmith, Horace Walpole, Fanny Burney and others, volumes of verse and many articles and reviews, as well as essays and introductions Dobson died Sept 2 1921

Dock Enclosure, usually in a port, for the reception of vessels It is made by

enclosing some part of a harbour or river with strong walls. Where the tide rises and falls considerably, gates are necessary. Gateless docks are called tidal basins.

The usual division of docks is into wet and dry. The former are docks in which vessels can lie while being loaded or unloaded. The latter are docks from which the water can be excluded so that ships can be cleaned or repaired. Dry docks are divided into graving docks, slip docks and floating docks. All serve the same purpose. The slip dock is a graving or repairing dock with a slipway leading out of it. The floating dock is a movable repairing dock.

The steady increase in the size of ships has led to a corresponding increase in the size of docks and in all the great ports the tendency is to build larger ones. Each dock is fitted with machinery and apparatus for dealing with cargo, and warehouses for storing it.

In the large ports, such as London, certain docks are set aside for certain classes of merchandise. In one dock coal is handled, in another oil, and so on. The King George V dock, opened in 1921, one of the largest in the world, covers 186 acres. The total area of the Port of London docks is 4203 acres, including 676 at Tilbury. The governing body is the Port of London Authority. In other places docks are controlled by a dock and harbour board, as at Liverpool, or a railway company as at Southampton, or by the local council.

A dock warrant, which must be stamped, is a document shewing to whom the goods in a dock belong. It can be used as security for a bank loan.

Dock Genus of biennial and perennial herbs of the polygonum family (*Rumex*). They are native to all temperate climates. They have tapering rootstocks, alternate leaves, and whorled clusters of small greenish flowers bearing leathery three-sided fruits. A dozen British species, sometimes troublesome weeds, include the bitter or broad leaved fiddle, golden, water, and sour dock, or sorrel.

Dockyard Any place where docks are, but in practice confined to a place maintained by a government as a base for warships. It contains facilities for docking and repairing the ships for victualling them and preparing them for sea, sometimes for building them. The chief English dockyards are Portsmouth, Devonport and Chatham. Since the Great War Pembroke has been closed and Rosyth partly closed. The Admiralty also maintains dockyards at Gibraltar, Bermuda, Hong Kong and elsewhere.

Doctor Term for a man of learning. There are doctors in all branches of learning: men who have received from a university the degree of doctor, whether in law, divinity, philosophy, science, music or medicine. These degrees are usually given after the writing of a thesis or sometimes without any test.

The word is most generally used, however, for a qualified medical practitioner, whether or not he or she has obtained a doctor's degree.

Doctors' Commons District of London. It is near St Paul's Cathedral and is named after a college of lawyers which had its headquarters here from 1763 to 1857. Its members were chiefly concerned with ecclesiastical cases, which then included divorce and probate matters.

Doctrinaire In politics, economics, science or art, a theorist who follows one narrow principle or group of principles regardless of practical considerations. After Louis XVIII's second restoration in 1815 the name was applied derisively to the statesman philosopher Royer-Collard, and his royalist following, who advocated a constitution on historical principles, opposed to absolutist and revolutionary ideas.

Dodd Francis. British artist. Born at Holyhead, Nov. 29 1874, son of a Wesleyan minister, he studied art in Glasgow and Paris, and made his reputation with his sketches of generals and admirals during the Great War when he was an official artist. In 1927 he was elected A.R.A.

Doddridge Philip. English divine. Born in London, June 26, 1702, he spent most of his adult life in Northampton where he was minister of a Nonconformist church and founder of a college for training ministers. He is best known for his hymns, which include "O God of Bethel" and "Hark, the glad sound," and as an early believer in shorthand. He died in Lisbon, Oct. 26, 1751.

Dodecanese Name of twelve islands in the Aegean Sea. They lie between Crete and Asia Minor and include the Island of Patmos. For long they belonged to Turkey. In 1912 they were seized by Italy, but they were not formally ceded to that power until 1924. Since the Italian occupation the name has been applied to the Thirteen Southern Sporades.

Dodman The Point on the coast of Cornwall. It is 8 m. from St Austell on the south coast and stands 270 ft high. Sir A. Quiller Couch refers to it as Dead Man's Rock. It is the property of the National Trust.

Dodo Large flightless bird of the pigeon order (*Didus unctus*). Found inhabiting Mauritius when discovered by the Portuguese in 1507. It is known to have survived to 1681, but is now extinct. Several almost complete skeletons have been constructed from abundant finds of bones. It was clumsy and defenceless with stout bill, short legs, stumpy tail and downy feathers.

Dodworth Urban district of Yorkshire (W.R.), 3 m. from Barnsley on the L.N.E.R. It is in a coal-mining district. Pop. (1931) 4218.

Doe John. One of two fictitious names once used in legal procedure for the sake of convenience. The other was Richard Roe. When a litigant could more conveniently bring an action in a fictitious name than in his own or against a fictitious person one of these names was used. The practice was abolished in 1852.

Dog Domesticated quadruped. It is derived from one or more species of the canine genus of flesh-eating mammals. The systematic name, *canis familiaris*, is a conventional not a zoological classification. Its nearest congener is the wolf, their crossing producing fertile offspring, but some breeds suggest other ancestral relationships as the jackal and the hyena.

Dogs may have domesticated themselves in mesolithic times, ten thousand years of human associations have developed mutual trust and affection.

Dogs are classed as sporting and non-sporting. There are many kinds widely

different in size and other qualities and new breeds are evolved from time to time. The Sealyham terrier and the Corgi are recent breeds. They range from large dogs such as the Alsatian wolfhound and the bloodhound, to tiny pet dogs. The terriers form one large group and the spaniels another. The foxhound, the greyhound and the harrier are the chief sporting dogs.

Dogs are chiefly kept for companionship, but they are still useful for guarding houses and property, especially in country districts. In the Arctic regions they are used to some extent for drawing sledges.

The breeding of dogs is a considerable industry. The first dog show was held in 1859, and in 1873 the Kennel Club was founded. There are now over 520 shows, Crufts being the chief. Another organisation is the Tail-waggers' Club at Temple Avenue, London, E.C. In Great Britain a licence of 7s 6d a year must be taken out for a dog unless it is kept by a shepherd or a blind person. The owner of a dog is liable for any damage or injury done by it.

Dog Days Period beginning between July 3rd and August 15th, and lasting for 30 to 54 days. The heat and unhealthiness of these days in ancient Egypt were held to be due to the rising of the dog star. Now the period is generally considered to last from July 3rd to August 11th.

Doge Title of the chief magistrate in the Venetian and Genoese republics. In Venice in the 8th century city tribunals were replaced by a single *duz*, or leader. He was chosen for life and the office lasted until the overthrow of the republic in 1797. In Genoa the doge first appeared in the 16th century. He was elected for life, later for two years.

Dog-fish Several species of small sharks. They are found in packs in temperate and tropical waters. British species include the large spotted nursehound (*Squalus caluylus*) and the small spotted roughhound (*S. canicula*). They are marketed as rock salmon and their rough shagreen skin is used for polishing wood. The more abundant dogfish (*Acanthias vulgaris*) produces the young alive, the other species produce them from eggs. The fish is from 3 to 5 ft. in length.

Dogger Bank Sandbank in the North Sea. It is between Britain and Denmark, covers about 1200 sq. m. and is famous for its cod. Here on Oct. 21, 1904 during the Russo-Japanese War, a Russian fleet inadvertently fired on some British trawlers and did some damage for which compensation was paid.

On Aug. 5, 1781, there was a sea fight here between the English and the Dutch, but neither side gained any advantage.

BATTLE OF DOGGER BANK. On Jan. 24, 1915 the German cruisers crossing to attack the British coast were met on the Dogger Bank by some British cruisers under Sir D. Beatty. The Germans retreated followed by the British, and a fight took place. Beatty's ship, *Leon*, was hit and, while he was out of action, the fight was broken off about 90 m. from Heligoland. The British losses were slight. Of the German ships *Blücher* was sunk and *Seydlitz* and *Derfflinger* damaged.

Doggett Thomas. Irish actor. Born in Dublin, he appeared on the London stage in 1691 and soon became one of the leading actors of the day. He acted in some of Congreve's comedies and died in 1721.

In 1715 Doggett gave some money for a race for watermen on the Thames. The course is from London Bridge to Chelsea, and the prize is known as Doggett's Coat and Badge. The race is rowed annually on Aug. 1.

Dogma Opinion, stated positively, and supposed to have been previously shown to be true, as opposed to one deduced from experience or demonstration. In theology it was intended to mean a doctrine defined by the church, and put forward, not to be discussed, but simply believed. But as this method of stating truth often comes to mean the assertion of unfounded opinions, *dogma* has come to be used in English for an assertion without any proof, hence dogmatism, meaning uncritical acceptance of beliefs or principles.

Dog Rose Prickly bush of the rose order. It is a native of Europe, Siberia and N. Africa (*Rosa canina*). Britain's largest wild rose, it grows in thickets and hedgerows. It has hooked prickles scattered uniformly on long arching branches, and white or red flowers bearing crimson hips. About 30 varieties are found.

Dogs Isle of. District of London. Formerly a peninsula jutting out into the Thames, opposite Greenwich, it was made into an island when the docks were built. From it there is a tunnel under the river to Greenwich. The name is said to be due to the fact that the king's kennels connected with the palace at Greenwich were here.

Dog Star Alternative name for Sirius, the brightest star in the heavens. It is found in the constellation Canis Major. It was regarded by the ancients as herald of the hot season, hence the term "Dog days."

Dog Watch Period of time on board ship. It lasts from 4 p.m. to 8 p.m. and is divided into the first and second dog.

Dogwood Genus of shrubs and small trees of the cornaceous order. They are native of temperate and subtropical regions. The common *Cornus sanguinea* has egg-shaped leaves, reddening autumnally, and clustered cream-white flowers bearing black-purple berries. The tough wood serves for ladder spokes and skewers. The berry-bearing alder (*Rhamnus frangula*) is sometimes called black dogwood.

Dolcoath Village of Cornwall. It is near Camborne and is famous for its copper mine, one of the richest in England.

Doldrums Name given by sailors to a belt of low pressure in the equatorial regions where the N.E. and S.E. trade winds meet. In the days of sailing ships vessels were often becalmed in this region, which is characterised by heavy rains and violent thunderstorms.

Dole See UNEMPLOYMENT.

Dolgelley Market town and urban district of Merionethshire, also the county town. It is on the G.W. Ry. 230 m. from London and stands amid beautiful scenery, Cader Idris being near. Pop. (1931) 2261.

Doll Puppet representing the human figure. Its use as a plaything is traceable in very early times and examples exist from 18th dynasty Egypt, western Asia, Greece and Rome. Cortes found Montezuma and his court

playing with elaborate dolls, some encountered in negro Africa apparently have a magical significance. American Indians and Eskimos also use them.

Dolls are very popular toys and making of dolls, dolls' houses and dolls' paraphernalia is an important branch of the toy industry.

Dollar Burgh of Clackmannanshire. It is 6 m from Alloa, on the L.N.E. Rly. It is famous for its school, Dollar Academy, built in 1819. Near are the ruins of Castle Campbell. Pop. (1931) 1485.

Dollar Silver coin. The word is a variant of thaler, and the first dollars were the Spanish pieces of eight. To day the dollar is the monetary unit of the United States, Canada and Newfoundland. It is worth 48 1/2 d and is divided into 100 cents. It circulates chiefly in the form of paper money, but silver dollars are coined. Adopted in 1792, the American dollar is based on a gold standard and its par value is normally 4/86 to the £ sterling.

The Mexican dollar and the dollar that circulates in the Malay States is a coin of 2s 0 1/2 d, or just about half the American dollar. The Mexican dollar is also called the peso.

Dollfuss Dr. Engelbert Austrian Chancellor and Dictator. Born in 1892, he joined the Christian Social party, and was successively Secretary of the Lower Agricultural Chamber, Director of the Chamber, President of the Railways, and, in 1931, Minister for Agriculture and Forestry. As Chancellor in 1933 he stood out against Nazi intrusion in Austria, banned Nazi flags, uniforms and meetings, closed the Nazi headquarters and was largely instrumental in saving Austria from Nazi domination. Later in the year he became dictator, but in July was assassinated by Nazis in the Chancellery at Vienna.

Dolmen Megalithic chamber. It consists of an unknown capstone poised on two or more unknown uprights. They originated under neolithic conditions as sepulchres for eminent persons and were covered with earth or stone. They are some times mistakenly called cromlechs or druid altars.

Dolomite Magnesian limestone. It is composed of carbonate of lime and carbonate of magnesia in almost equal proportions. Brittle and lustrous it is used in the production of steel and for building purposes. It is found in England and Scotland and in the Alps, also in Canada and the Transvaal. Dolomite is named after a French geologist, D. G. de Dolomieu (1750-1801).

A division of the Alps is called the Dolomites. This is in the Trentino and stretches north from Trent. A district of the Transvaal is known as the Dolomite region.

Dolphin Cetacean mammal (*Delphinus delphis*). It inhabits the Mediterranean and temperate Atlantic waters. Black with yellowish stains, it follows ships in large herds, being often entangled in mackerel nets in the English Channel. With sharp snouts they are about 7 ft long. The dolphin family includes the bottle-nosed, white-beaked and white-sided varieties. Several freshwater dolphins of another family occur in the Ganges, Amazon and La Plata rivers. British fishermen improperly call the coloured fish *Coryphaena* the Portuguese dorado a dolphin.

Dome Hemispherical structure forming the roof of large buildings and supported on arches, triangular vaulting, low

walls or corbels. The dome is characteristic of Coptic, Byzantine and Mohammedan architecture. The Copts used it for churches of the basilica type, the Byzantine architects roofed large spaces with groups of domes and semi domes, while in Mohammedan architecture the dome, first used for burial places, became the distinctive feature of mosques. The great central dome of the Pantheon at Rome is a fine example.

In England, famous domes are those of St Paul's Cathedral, strengthened in 1929 by a massive chain, and the British Museum. The dome of St Peter's, Rome, is 139 ft in diameter, that of St Sophia, at Constantinople, is 115 ft or a little larger than that of St Paul's, London.

Domesday Book Survey of England. It was drawn up by order of William the Conqueror in 1086 and gives an account of England as it then was. It states for each county except those in the north, who are the holders of the land and what each holding is worth, also what it was worth in the time of Edward the Confessor. Other details given are the names of the landholders, the numbers of villeins, cottars and others on each holding, the numbers of oxen, pigs etc. and a good deal of miscellaneous information. A careful study of the book has thrown a vast amount of light upon the social and economic conditions of the time. The original is in the Public Record Office, London, facsimiles have been printed.

Domestication Process of acclimating animals and plants to live and propagate under human control. It comprises controlled mating, food provision, shelter and training for specialised services. Dogs were perhaps self domesticated before they were bred for herding and hunting in Asia and Egypt in neolithic times. Tamed horses, asses and camels were milled before man broke them in for riding and transport. Domesticated cattle, goats and other animals may have been tamed by milking them for sacrificial purposes.

Domestic Science Practice of conducting the work of the home. It includes cooking and the various cleaning processes. Of late years much attention has been paid to training in housecraft, many schools for girls have classes for the various subjects and there are training colleges in the large towns as well as schools for cookery. Some of them, as in Manchester are under municipal control.

For Teachers of Domestic Subjects, courses are provided at King's College, London, National Training School of Cookery, Buckingham Palace Road S.W. 1, Training College of Domestic Subjects, Berridge House, Fortune Green Road N.W. 0, Battersea Polytechnic, Domestic Science Training College S.W. 11 and in the provinces there are several Training Colleges of Domestic Science—Gloucester, Bath, Leeds, Leicester, Liverpool, Manchester, and Newcastle-on-Tyne.

Domestic Servant Person employed in a house for work therein. In 1921 there were over 1,200,000 domestic servants in Great Britain so it is now one of the largest occupations at least for women. The domestic servant of the 19th century usually lived in the house, but to day a large proportion go daily to their work and live at home. Domestic servants must be insured by their employers under the national health scheme. The total

weekly premium is 1s 1d and includes a payment towards the Old Age pension. They are not insured against unemployment, but the employer is liable if accidents happen to them in the course of their work.

Domicile In English law the place of a man's permanent abode. It begins with a domicile of origin, that of his parents at his nativity. On reaching his majority he may acquire a domicile of choice in another state, if he intends to remain there. A married woman's domicile is that of her husband.

Dominic Spanish saint. He was born of good family in 1170 at Calaroga, in Spain, was ordained in 1195, and, as an Augustinian canon, was sent by Innocent III to fight the Albigensian heresy. Succeeding as a persuasive missionary, he was permitted to found the order of preaching friars in 1218 and lived to see it flourishing in Toulouse and elsewhere. He died on Aug 6, 1221, and was canonised in 1234.

Dominica Island of the West Indies, one of the Leeward Islands. A British possession, it is 29 m long and covers about 300 sq m. It lies between Guadeloupe and Martinique. Roseau is the capital and the chief seaport. The island is mountainous, but much of the soil is fertile and tropical fruits are grown, including limes, used for making lime juice. It is governed by an elective council. Pop (1931) 43,098.

Dominican Order of preaching friars. It was founded by S. Dominic at Toulouse in 1215. Based upon S. Augustine's monastic rule, it received papal sanction in 1218. The Dominicans came to England in 1221 and were called the Black Friars because they wore a black mantle and scapular over a white habit. They established 57 British friaries and one nunnery before the dissolution of the monasteries. Their English province was reorganised in 1850.

Dominican Republic Name sometimes used for the West Indian republic of Santo Domingo (q.v.).

Dominion Word denoting lordship or authority. It was chosen from Ps. lxxii to designate Canada when its provinces were federated by the British N. America Act, 1867. The union, proclaimed July 1, is celebrated annually as a national holiday called Dominion Day. The name, taken by New Zealand, 1907, also embraces other parts of the British Empire which have attained Dominion status. There are six of these Dominions: Canada, Australia, New Zealand, Newfoundland, the Union of South Africa and the Irish Free State. The Dominions Office, created in 1925, transacts business with the Dominions, previously transacted by the Colonial Office.

Domino Originally a priestly hood worn by clerics. It came to be used for a hooded cloak with wide sleeves worn with a half mask to conceal the features at a masked ball. The half mask itself is called a domino, as is the person who wears it.

Domitian Roman emperor. A son of the Emperor Vespasian, his full name was Titus Flavius Domitianus Augustus. Having been proclaimed emperor by the soldiers in A.D. 81 in succession to his brother Titus, he ruled badly, had to buy peace on disgraceful terms from Decabalus King of Dacia, and through jealousy recalled Agricola from Britain. At last his cruelty

made him so hated that a conspiracy was formed and he was murdered by a freedman in A.D. 96.

Domodossola Town of Italy. It is on the French frontier, on the railway line through the Mont Cenis pass to Turin. Here the customs officials examine the luggage of travellers.

Don Spanish title. Equivalent to the English Sir, it was once used solely by the nobility, but is now used in all classes. The term is also used for members of the teaching staffs at the universities of Oxford and Cambridge, and to some extent in other universities.

Two famous dons of fiction are Don Quixote, the hero of Cervantes' great novel, and Don Juan, the hero of Byron's poem. In real life there were several dons in Spanish history. Don John, the victor of Lepanto, was a natural son of Charles V. Another Don John, immortalised in Schiller's poem, was the unfortunate son of Philip II of Spain.

Don River of Ayrshire. It rises on the borders of Banffshire and flows E and enters the North Sea at Aberdeen. It is 82 m long and the district through which it flows is called Donside. There are paper mills on its banks.

Don River of Yorkshire (W.R.). It rises in the Pennines and flows SE past Sheffield and Doncaster and enters the Ouse at Goole. It is 70 m in length.

Don River of Russia. It rises in Lake Ivan and flows in a southerly direction until it falls into the Sea of Azov. It is 1325 m long and is much used, except in winter, for the transport of grain and cattle. The chief of its many tributaries is the Donetz, which is 670 m long and flows through a rich coalfield.

The Cossacks of the Don territory were famous and a territory of Russia was named after them. For a short time after 1919 this was the Don Republic, but it is now part of Ukraine.

Don Kaye British racing motorist. Born in 1894, he entered the Air Force. In 1924 he made a record at Brooklands, but failed to beat Sir H. Segrave's record. In 1931 he made a world record in a motor boat of 89.9 nautical miles per hour in Miss England II on the Parana river. Later, on Lake Garda, he established a record of 110 m.p.h. and on July 18, 1932, on Loch Lomond, Don broke the world's record in Lord Wakefield's Miss England III with a speed of 119.81 m.p.h.—a speed later exceeded by the American, Gar Wood.

Donaghadee Port and market town of Co. Down, Northern Ireland. It is 25 m from Belfast, and is situated on the south side of Belfast Lough. Dairy produce and cattle are exported and some coal is imported. A mail service was formerly operated from here to Portpatrick in Scotland. Pop 2220.

Donatello Italian sculptor and painter. Born in Florence about 1386, his name was Donato di Niccolò di Betto Bardi. He executed many fine statues in marble and bronze, his work being distinguished by a close adherence to nature and keen sense of proportion. His masterpiece, "David," is at the Bargello, Florence, and at Padua there is an admirable equestrian statue. For Cosimo de' Medici he executed, partly in relief and partly in painting, "The History of the Evangelists," for the church of San Lorenzo, Florence. His "Judith" is also in Florence. He died in Florence, Dec. 13, 1466.

Doncaster Borough and market town of Yorkshire (W R) It stands on the River Don, 156 m from London, with stations on the L N E and L M S Ryrs Its population has grown a good deal in the 20th century owing to the opening of coal mines in the neighbourhood There are engineering works, railway shops and manufactures of glass artificial silk, etc The town is a famous racing centre, and on Town Moor the St. Leger is run. Pop (1931) 63,308

Donegal County of the Irish Free State In the province of Ulster, it occupies the N W corner of the country and covers 1860 sq m It has a long coastline of 165 m on the Atlantic Ocean where there are many inlets, Lough Swilly being the chief The scenery both on the coast and inland is remarkably fine, being wild and mountainous Erigal is the highest peak and Derg the largest lake The Foyle is the longest river The people are chiefly engaged in keeping cattle and pigs, and in fishing The county is served by a system of light railways Lifford is the county town Other places are Letterkenny, Ballyshannon, Bundoran, Raphoe and Donegal Moville and Rosapenna are popular watering places Aran Island belongs to the county Pop (1926) 152,508

The title of Marquess of Donegal has been borne since 1791 by the family of Chichester In 1612 Sir Edward Chichester, Lord Deputy of Ireland, was made a baron. In 1647 a later baron was made Earl of Donegal The family estates were in counties Donegal and Antrim

Donegal Market town of Co Donegal, Irish Free State It stands on Donegal Bay, an opening of the Atlantic between the counties of Donegal and Sligo The bay is 35 m long and at the entrance 30 m wide The town is connected by railway with Londonderry Pop 1100

Doneraile Market town of Co Cork, Irish Free State It has a station on the G S Ryrs 7 m from Mallow Here Spenser wrote *The Faerie Queen*

The title of Viscount Doneraile has been borne by the family of St. Leger since 1785

Dongola Town of the Sudan. It is on the left bank of the Nile, about 600 m N of Khartoum, and is a prosperous trading centre It was the British base in the campaign against the Mahdi in 1884-85 Pop 20,000

Dongola is called New Dongola to distinguish it from Old Dongola, a town on the right bank of the Nile, some 75 m to the S This was once the capital of a kingdom which was named after it, but is now an unimportant place

Don Juan Legendary character, appearing in the folk tales of many countries He is first found in written literature in a Spanish play of about 1630, and became the type of the blasphemous sensualist. His popularity is largely due to the musical settings of his adventures, notably those of Purcell, Glück and Mozart

Donkey Engine Small type of steam engine It is used for working a crane or hoist or for pumping water into a boiler or tank, and is attached to a larger engine or to a special boiler In this type the piston, driven by steam from the boiler, acts directly on a plunger in a pump cylinder, the action being controlled by a fly wheel

Donne John English divine and writer Born in London in 1573 the son of a merchant, he was educated at Oxford and Cambridge He served as a soldier and travelled, later becoming a secretary to Lord Egerton, the Lord Keeper He was already a barrister and he became friendly with many eminent men He was married secretly in 1601 to a daughter of Sir George More, the lady being also related to the Lord Keeper This cost him his position and brought a spell of imprisonment. In 1614 Donne was ordained The king made him one of his chaplains, he became vicar of Keynton, Hunts, and of Sevenoaks and in 1621 was appointed Dean of St Paul's, London He died March 31, 1631

Donne's works include many poems and sermons, including the great *Death's Duel*, the work of a scholar and a thinker, who also possessed a graceful style of writing His poems were not published until after his death

Donnybrook Suburb of Dublin It is famed for the fair which was held here each year from 1204 until 1855 It was then a village outside the capital, and its fair won a reputation as the most rowdy of all the Irish fairs

Donoghue Stephen English jockey Born in 1884, he rode his first important winner in 1910, when he won the Cambridgeshire Other successes followed, and after the Great War he was the leading English jockey, a position he retained for some years, riding 143 winners in 1920 On six occasions he rode the winner of the Derby Donoghue also became known as a painter, having a picture hung in the Academy in 1925

Donoughmore Village of Cork, Irish Free State It is 13 m from Cork and from it the family of Hely-Hutchinson takes the title of earl This was given to Richard Hely-Hutchinson in 1801 and has since been held by members of the family The earl's eldest son is called Viscount Salsdale

Doom Term for the Last Judgment. This theme frequently inspired mural paintings in mediaeval churches and dooms were usually represented on the chancel arch The crude realism of weighing the souls in the scales and immersing the doomed in burning cauldrons offered a perpetual warning to worshippers Once almost universal, many were destroyed at the Reformation, but more than 100 English dooms survive Examples are at Chaldon, Surrey and Shorthampton, Oxon, and there is a fine one in the cathedral at Gloucester

Doon Lake and river of Ayrshire The loch 5½ m long, is in the south of the county on the borders of Kirkcudbright, and contains five small islands The river runs from the loch to the Firth of Clyde near Ayr It is 36 m long and is the stream immortalised in Burns poem "Ye banks and braes o' bonnie Doon"

Doone Name of a famous Exmoor family The Doones are chiefly known because of R D Blackmore's romance, *Lorna Doone* but they had a real existence They appear to have been a band of robbers who in the 17th century, lived in the valley of the Bagworthy About 1700, soldiers were sent to root them out, after which little more was heard of them

Dope Term used for certain poisonous drugs Such are cocaine, heroin and opium and their continued use causes a

drug habit in its victims. The sale of these drugs is strictly regulated by law in Great Britain, and international efforts are being made to stop the traffic in dope in various countries.

Doppler Effect Apparent change in frequency of vibration due to relative motion of the observer. The sound of a locomotive whistle alters in pitch on approaching or receding from an observer. In 1842 Doppler suggested a similar effect in light waves which has since been demonstrated and usefully applied in astronomical spectroscopy to the investigation of double stars.

"Dora" Popular name for the Defence of the Realm Act, passed in Aug., 1914, at the beginning of the Great War. Some of the regulations made under it were still in force in 1932. See DEFENCE.

Dorcas Society of women who make clothes for the poor. It is called after Dorcas (Tabitha), the charitable woman mentioned in Acts ix 36-42.

Dorchester Borough and county town of Dorset. It is 135 m. from London, on the G.W. and S. Rlys. St Peter's church, in the perpendicular style, has a fine tower. There is an interesting county museum. The town has an agricultural trade and there are breweries. Dorchester is interesting because of the extensive early British and Roman remains in and near the town, and for its connection with Thomas Hardy, the writer (q.v.). Near by is a wireless transmitting station. Pop. (1931) 10,030.

The title of Baron Dorchester was borne by the family of Carleton from 1786 to 1897. The first baron was Guy Carleton, Governor of Quebec, 1775-78, and Governor-General, 1786-94. He died Nov. 10, 1808. The title was recreated in 1899 for Henrietta Anne, daughter of the 3rd baron.

Dorchester Village of Oxfordshire. It is on the River Thames, 9 m. from Oxford. It is famous for its church, once the church of an abber, and for its other ecclesiastical associations, as it was the headquarters of a bishopric from 635 to about 1080.

Dorchester House Residence in Park Lane, London, now demolished. Built in 1851-53 for Sir George Holford, it was one of the finest residences in London, with a wonderful collection of pictures, books and works of art. In 1926 it passed to the Earl of Morley, who afterwards sold it. An earlier mansion was the residence of the earls of Dorchester. The site is now occupied by a hotel called the Dorchester.

Dordogne River of France. It rises in the Puy de Dôme mountains and flows for some 300 m. mainly in a westerly direction until it joins the Garonne. The two form the estuary of the Gironde. Its chief tributaries are the Cère, Isle and Vézère.

An inland department of France is named after the river. Its extent is 3550 sq. m. In the rocks of the valley of the lower Vézère are prehistoric caves, important for the study of Palaeolithic man. Périgueux is the capital.

Dordrecht (or Dort) Town of the Netherlands. It stands on an island in the Meuse, 12 m. from Rotterdam, a prosperous river port with a number of manufacturing industries. Much of its trade goes by canal or along the Meuse and the

Mervede, which flow through the town. The chief buildings are the 14th century church, with a lofty tower, and the restored town hall. Pop. (1932), 57,959.

Here in 1618-19 the Synod of Dort met. Its aim was to settle the points at issue between the Calvinists and the Arminians. In the end the teaching of Arminius was condemned.

Doré Paul Gustave, French artist. He was born at Strasbourg, Jan. 6, 1832. Coming to Paris in 1848, he painted many religious and historical works and achieved some success as a sculptor. His fame, however, rests upon his remarkable skill as a draughtsman and illustrator. Doré illustrated a great number of standard books including the Bible, *Paradise Lost*, Dante's *Inferno*, the works of Rabelais and Balzac, and *Don Quixote*. His work was very popular in England, and a Doré Gallery was opened in London. He died in Paris, Jan. 23, 1883.

Dorian One of the four great divisions of the Hellenic race, the others being the Aeolian, Ionian and Achaean (q.v.). After considerable wandering, they finally migrated to the Peloponnese, where they became the governing class and reduced the old inhabitants to slavery. Their mythical ancestor was supposed to be Dorus, a son of Hellen.

Doric Order One of the principal orders of Greek architecture. It represents the earliest and simplest type of composition. The column, which has 20 flutes meeting in sharp edges, has a plain capital, but no base, and varies in height from four to six times the diameter.

Dorking Market town and urban district of Surrey. It is on the River Mole, 26 m. from London and is served by two branches of the S. Ry. Dorking stands in the midst of some of the most beautiful of the Surrey scenery, Box Hill, Ranmore Common and other beauty spots being near. The Glorv Woods are public property. The place has many literary associations, Malthus, Meredith, Fanny Burney and others having lived here. Pop. (1931) 10,109.

The Dorking is the name given to a breed of domestic poultry, once extensively raised in the Surrey town. It is a valuable table bird, especially when crossed with the English or Asiatic game fowl. The cocks may weigh 14 lb. The hens lay freely.

Dormer Architectural term for a vertical window in a projection from a steeply sloping roof of a building designed to give light to the interior. In some buildings rows of simple dormers were placed in the roof but in many of the Gothic and Renaissance style richly decorated dormers of masonry are seen.

Dormouse Family of small arboreal rodents (*Myomidae*). They are widely distributed from Britain to Japan. Unlike the squirrels, they hibernate half the year in nests in which nuts are stored. The graceful English dormouse (*Myomyscus eulaniensis*) has a hairy tail, prominent eyes and tufted ears. It consumes insects as well as hazel nuts and corn. The continent of Europe possesses larger edible and garden forms, there is also a N. African genus.

Dornoch Royal burgh and watering place of Sutherlandshire, also the county town. In the south of the county it is on Dornoch Firth 58 m. from Inverness, on the L.M.S. Ry. Once the seat of a bishop,

it had a cathedral, restored in 1837 There is a fine castle Pop 725

Dornoch Firth is an inlet of the North Sea between the counties of Sutherland and Ross and Cromarty It is 22 m long and is a noted fishing area

Doronicum Genus of asteraceous plants of the order compositae The garden doronicum (*Arnica montana*), or leopard's bane, is a hardy perennial two or three feet in height, with large golden daisy-like blooms It is easy of cultivation in any soil, preferably in a shady position Plants should be cut down after flowering and increased by division in the autumn

Dorset County of England In the south of the country, it covers 987 sq m and has a coastline of 75 m on the English Channel Portland Bill is a feature of the coast It is almost wholly an agricultural and rural area, although it is famous for its stone, especially Portland and Purbeck, fishing is an industry Dorchester (q.v.) is the county town. Poole and Weymouth are sea ports, Swanage and Lyme Regis are watering places Spots of historic and other interest are Bridport, Sherborne, Shaftsbury, Gillingham and Blandford The county contains Corfe Castle and many other antiquarian remains, and in modern times is celebrated as the scene of Thomas Hardy's novels The dialect, in which William Barnes wrote his poems, is preserved The county is served by the G W and S Ryds It is in the diocese of Salisbury Pop (1931) 239,347

The Dorset Regiment, formerly the 39th and 54th foot, is recruited in the county It was raised in 1702 Its motto is *Primus in Indis*, the depot is at Dorchester

Dorset Earl of English title borne by the family of Sackville from 1604 to 1843 There was a Marquess of Dorset before this time the title being held by the family of Beaufort and then by the Greys

Thomas Sackville (1536 1608) the 1st earl, was a poet, but is better known as a politician and ambassador in the time of Elizabeth His descendant Charles Sackville (1638 1706), the 6th earl, was also a poet who took part in public life His son, Lionel, the 7th earl, was made Duke of Dorset in 1720, and there were dukes of Dorset until the main line of the family died out in 1843

Dortmund Town of Germany It stands on the River Ems in Westphalia 50 m from Düsseldorf It is served by a good railway system and is the terminus of a canal to the Ems Most of the town is modern, but some streets and houses in the older part date from the time when it was a free city and a flourishing member of the Hansatic League Dortmund's industries are due to its position on the coal field Among them are the manufactures of iron and steel goods, including machinery and railway stock Its transport trade is also considerable Pop 525 837

Dory (*Zeus faber*) Edible, marine spiny finned fish also called John Dory Found in British, Mediterranean and Australian waters, it is olive brown in colour, with dark spotted yellowish sides and few or no scales, and is valued for the table

Dostoevsky Feodor Mikhailovitch Russian novelist Born in Moscow, Oct 30, 1821 he was educated as an engineer, but soon began to write His first work, translated as *Poor Folk*, was

published in 1846 In 1846 his political activities led to his arrest and he was sent to Siberia where he remained for four years, after which he spent three in the army The rest of his days were spent in writing and travelling He died in St Petersburg, Jan 28, 1881

Dostoevsky was the first and one of the greatest of the Russian realists His works have been translated into English and include *Crime and Punishment*, his masterpiece, the autobiographical *House of the Dead*, *The Idiot*, *A Raw Youth* and *The Brothers Karamazov* He also began *An Author's Diary*

Dotterel Bird of the plover family It still breeds in Scotland It is about 9 in long, its plumage being brown with black and white markings Its eggs, usually four in number, are pear shaped, of stone colour, and laid in a slight hollow It is found in mountainous areas and feeds on insects and grubs

Douai Town of France It stands on the Scarpe, 20 m from Lille The buildings include the churches of St Peter and Notre Dame The ancient fortifications are represented by two massive gateways and other remains During the Great War Douai was occupied by the Germans Pop 41 598

Douai was one of the chief towns of Flanders in the Middle Ages and bore the Parliament of Flanders met It is best known however, as an educational centre From 1562 to 1793 it had a university and from 1818 to 1903 a college for the training of Roman Catholic priests for work in England The translation called the Douai Bible was issued here in 1610

Douaumont Village of France It stands on the right bank of the Meuse, 3 m from Verdun, and was the scene of some terrible fighting between the French and the Germans in 1916 The fort here was taken and retaken several times between Feb and Oct, the last time by the French

Double Bass Largest instrument of the string variety Shaped like its ancestor, the bass viol, the double bass, sometimes called contra bass, has four strings and corresponds in pitch to a sixteen foot organ pipe

Doublet Male close fitting outer garment. Of two thicknesses It was worn in Europe from the 14th to the 17th century Originally leather belted, it became carefully blocked and oven padded, with fixed or detachable sleeves In Stuart times it became a sleeveless undergarment, the precursor of the modern waistcoat Feminine fashions some times simulated it

Doubling Folding or plaiting It may be the doubled edge of sails or skirts or in heraldry the ermine lining of mantles It may also be the doubled course of roofing slates at the eaves or an extra layer of ship's planking Another form of doubling is the formation of yarns, cotton or woolen, from single strands, an important operation in the textile industries

Doubloon Gold coin of Spain It also circulated in Spanish America can states In the 17th 18th centuries it was worth about 36s A new type, the Isabel doubloon, representing 100 reals, and worth 20s 8d, was issued in 1848, but was discontinued after 1868

Douche Term applied in medical treatment to a jet or column of water directed upon a part of the body It is used in

heumatic affections such as lumbago and certain conditions of the joints due to inflammatory exudations, also in internal complaints

Doughty Charles Montagu English traveller and writer Born Aug 19, 1813, the son of a clergyman, he was educated at Cambridge, where he took a science degree Later he travelled extensively in three continents, Europe, Asia and Africa His most remarkable journey was begun in 1876 when he made his way through parts of Arabia then quite unknown to Europeans He wrote an account of this as *Arabia Deserta*, a masterpiece of English style Doughty wrote *The Dawn in Britain*, *The Cliffs*, *The Clouds* and other volumes of poems He died at Sissinghurst, Jan 20, 1926

Douglas Capital of the Isle of Man and a watering place It stands on Douglas Bay, on the east side of the island, where two streams fall into the sea, is connected by steamer with Liverpool, Barrow-in-Furness, Belfast, Glasgow and Fleetwood, and is one of the most popular pleasure resorts in the country On Prospect Hill are the buildings of the government of the island, including the House of Keys The course for the motor cycle races starts and finishes in the town Pop (1931) 20,326 Douglas Head is a promontory to the south

Douglas Village of Lanarkshire It is 11 m from Lanark, on the LMS Rly, and is famous for its associations with the great family of Douglas which took its name from here There are remains of their castle and also of St Bride's church in which many of them were buried The word means "dark water"

Douglas Scottish family It takes its name from Douglas in Lanarkshire, but its chief power was in Galloway, around Castle Douglas The family became powerful about 1200, or a little later Sir James Douglas, called the Black Douglas, was one of the most famous fighters of his time He was one of the associates of Robert Bruce and is the Douglas immortalised by Scott He was killed fighting in Spain in 1330

A later Douglas, Archibald, was made Earl of Douglas in 1358 and he and his successors were great men in the border fights of these days One is mentioned in the *Ballad of Chevy Chase* Archibald, the 4th earl, was made a duke of Franco and was killed at Vernoull in 1424 In Scotland the power of the Douglases became almost equal to that of the king, so in 1440 William, the 6th earl, was put to death This weakened their position, but William, the 8th earl, was a powerful person until he was murdered by King James II at Stirling in 1452 The great age of the family may be said to have ended when the last earl died, after a long exile, in 1488

A Douglas became Earl of Angus in 1389, and in 1633 the 11th earl was made Marquess of Douglas In 1703 the 3rd marquess was made a duke and there was a Duke of Douglas until 1761 Another Douglas was made Marquess of Queensberry in 1681 and the dukes of Queensberry were Douglases In addition to the marquess, the family is represented in Scotland to day by the Duke of Buccleuch, the Duke of Hamilton, who bears the title of Marquess of Douglas, the Earl of Morton and Lord Torphichen who is the heir general of the house The Earl of Home is a Douglas in the female line

Douglas Stephen Arnold American politician. Born in Vermont, April

23, 1813, he was a member of the state legislature of Illinois, 1836-40, and was State Secretary for part of that time From 1843-47 he was in the House of Representatives at Washington and from 1847-1861 was a member of the Senate He is chiefly known as the opponent of Lincoln from whom, in 1858, he won a seat in the Senate The contest was renewed when both stood for the presidency in 1860 On this occasion Lincoln was the victor Douglas died in Chicago, June 3, 1861

Douglas Pine N American evergreen tree of the cone bearing order (*Pseudotsuga douglasii*) Also called Oregon pine, it forms great forests from British Columbia to Mexico The most valued timber tree of the Pacific region, its hard, heavy, durable wood serves for all kinds of constructions, masts, spars and railway sleepers Red and yellow fir varieties occur It grows to a height of 300 ft.

Doukhobors Religious sect. They arose in Russia in the 18th century Their beliefs are not unlike those of the Quakers They object to the use of icons or images and put a mystical interpretation on the facts of the Bible Their refusal to serve as soldiers, another article of their faith, has involved them in persecution There are small colonies of them in Canada

Doullens Town of France It is 17 m from Arras with a railway station Its position made it important during the Great War and here, in March, 1918, a conference was held at which Marshal Foch was made Commander of all the Allied armies There is a British cemetery near the town

Doulton Name of a brand of ware made at the Doulton Pottery Works, Lambeth The founder of the firm, Sir Henry Doulton (1820-1897) entered his father's potteries in 1835, and as the result of his experiments introduced the use of a good enamel glaze Eleven years later, the manufacture of sanitary and drainage ware was started, and in 1870 Doulton turned his attention to the production of art pottery, employing for this purpose a number of artists whose work has become famous Knighted in 1878, he died Nov 17, 1897.

Doumer Paul French politician Born at Aurillac, March 22, 1857, he became a journalist In 1888 he was elected to the Chamber of Deputies In 1895-96 he was Minister of Finance, and from 1897 to 1902 was Governor General of Indo China In 1905-06 he was President of the Chamber of Deputies, and in 1912 he was elected to the Senate In 1917 he was a member of the Poincaré Cabinet and in 1921-22, and again in 1925-26, he was finance minister In 1927 Doumer was chosen president of the Senate, and in May, 1931, was elected President of the Republic defeating M Briand In May, 1932, he was shot by a foreigner when at a crowded social function, and died a few hours later

Doumergue Gaston French statesman Born Aug 1, 1863, he became a lawyer and entered the public service Having served abroad he was elected to the Chamber of Deputies in 1893 From 1902-05 he was Minister for the Colonies, from 1906-08 Minister of Commerce, and from 1908-10 Minister of Education In 1910 he entered the Senate and in 1913-14 was for a short time Prime Minister and Minister for Foreign

Affairs, from 1914-17 he was Minister for the Colonies. In 1923 Doumergue became President of the Senate, and in 1924 he was elected President of the Republic, the first Protestant to hold that position. His term ended in 1931.

Doune Borough of Perthshire. It is on the Teith, 45 m. from Edinburgh, on the LMS Rly. The chief object of interest is the ruined castle. Having held out for the Jacobites this was dismantled in 1746. Restoration work has been recently done. Pop (1931) 822.

Douro River of Spain and Portugal. It rises in Spain, and, having passed Valladolid and Zamora, reaches the frontier. For about 60 m. it forms the boundary between the two countries, after which it crosses Portugal to enter the sea near Oporto. Owing to rapids it is not of great value commercially, although it is used by the Portuguese to some extent. There are many fish in its waters and its length is 485 m. The eldest son of the Duke of Wellington bears the courtesy title of Marquess of Douro.

Dove Name denoting indiscriminately any bird of the pigeon family. In popular usage it generally designates the best known smallest species, such as the ring dove or wood pigeon, stock dove, rock dove, whence all our domestic pigeons are derived—and the turtle dove.

Dove River of England. It rises on Axo Edge and flows S and SE between the counties of Derby and Stafford. After a course of 45 m. it joins the Trent at Newton Solney.

Dovedale, the pass through which it flows, is a famous beauty spot noted also for its association with Isaac Walton. It has been proposed to make it into a national park.

Dove Flower Central American orchid (*Peristera elata*). It is a robust plant living parasitically upon others, with a flower stalk upon whose uppermost third cluster fragrant creamy white flowers with lilac specks at the lip base. Its resemblance to a dove with expanded wings led the Spaniards to term it the Holy Ghost flower.

Dover Borough, seaport and market town of Kent. It stands on the Straits of Dover, 77 m. from London and is the chief port for communication with France. It has stations on the S Rly., and from it steamers go regularly to Boulogne, Calais, Ostend and elsewhere. The chief building is the castle with a Norman keep and here also are some of the oldest buildings in England.

The port has two harbours. One was a naval harbour until the dockyard was closed in 1920. Both have been improved to accommodate large vessels. There are good sands, a promenade and other attractions of a popular watering place.

Dover was one of the Cinque Ports (*q.v.*) and has been an important place from Roman times. Kings and armies have landed here and off the town sea fights have taken place. By the secret Treaty of Dover, 1670, Charles II. agreed to become a Roman Catholic and to help Louis XIV. in return for an annual payment. In the Great War Dover was the headquarters of the patrol responsible for guarding the straits and a base for the troops overseas. Pop (1931) 41,095.

Dover Strait of. Stretch of water connecting the North Sea and the English Channel. It is 21 m. across from Dover to Calais. The Strait was swum by Capt.

Matthew Webb in 1875, and the feat of "swimming the Channel," achieved several times since the Great War, means swimming the Strait. The proposed Channel Tunnel is planned to go under the Strait.

Dovercourt Seaside resort of Essex. It is part of the Borough of Harwich and is situated on the Stour estuary, 70 m. from London on the LNE Rly. The beach is smooth and sandy, and the attractions include golf courses. Here Captain Fryatt is buried.

Dovey River of Wales. About 30 m. long, it rises on Aran Mawddwy, and flows SW into Cardigan Bay. For some distance it forms the boundary between Cardiganshire and Merionethshire. It has a considerable estuary, upon which stands Aberdovey.

Dow Gerard Dutch painter. Born at Leyden in 1613, he studied painting under Rembrandt and became one of his most famous pupils. His many works, including a number of portraits, are in the great European galleries. Notable are "The Poulterer's Shop," in the National Gallery, London, and "The Dropsical Woman" in the Louvre, Paris. He died in 1675.

Dowager Really a widow with a dower. It is used for the widow of the holder of a title which has passed to another. Thus, the widow of a duke is the dowager duchess, to distinguish her from the wife of the present duke. Of late years the use of the word in this sense has been to some extent dropped for the Christian name which precedes the title, thus Clarice, Countess of Dorking.

Dower In law the amount allowed to a widow out of her husband's estate. By English law a husband can leave whatever he likes to his widow as a dower, by Scottish law the dower is one third of the real property left by a dead man. The dower house, found on many landed estates, was the residence of the dowager or widow with a dower.

Dowlais District of Merthyr Tydfil. It is 172 m. from London by the GW Rly. and there are collieries and iron and steel works in the neighbourhood.

Down County of N Ireland. In the east of the country, it has a long coastline on the Irish Sea. Stroudford Lough penetrates the county and Belfast Lough is to the north. Downpatrick is the county town. Other places are Lisburn, Comber, Dromore, Newry, Banbridge, Dundrum, Newtownards and Bangor. There are a number of watering places on the coast, including Newcastle and Donaghadee, and in the county are some of the suburbs of Belfast. The rivers are the Bann, Lagan and Newry. The soil is fairly fertile although hilly, in the south are the Mourne Mts. Its area is 857 sq. m. Agriculture is the main industry, but a good deal of fine linen is manufactured. Down is well served with railways radiating from Belfast and by canals. Down is one of the dioceses of the Church of Ireland. Pop (1926) 209,228.

Downe Village of Kent. It is 6 m. from Bromley and 2 m. from Farnborough. Here Charles Darwin lived for many years and his home is now the property of the British Association.

The Irish title of Viscount Downe has been borne by the family of Downay since 1680. The estates are in Yorkshire.

Downham District of London. It is partly in the Borough of

Lewisham and partly in that of Bromley, being 9 m to the S.E. of the city. Here the London County Council has laid out a housing estate.

William Hayes Fisher, a politician, took the title of Baron Downham in 1918 and the estate was named after him, as in 1919 he was chairman of the London County Council. He was in Parliament in 1885-1906 and again 1910-1918, and in 1917-18 was president of the Local Government Board. He died July 2, 1920.

Downham Market Urban district and market town of Norfolk. It is on the Ouse, 10 m from King's Lynn, on the L.N.E. Ry. There is a trade in agricultural produce. Pop. (1931) 2463.

Downing Street London street. It is a short street leading from Whitehall and in it are the official residences of the Prime Minister, and the Chancellor of the Exchequer and the offices of the chief whip of the party. These form three connected houses, Nos. 10, 11 and 12. On the other side of the street is the Foreign Office. The street owes its name to Sir George Downing, Secretary to the Treasury, 1667. All the Prime Ministers since Sir Robert Walpole have lived here.

Downing College, Cambridge, was founded in 1800, with money left by a grandson of Sir George Downing.

Downpatrick City and county town of Co. Down, N. Ireland. It is 27 m from Belfast and stands near Strangford Lough, on the Belfast and Co. Down Ry. The chief building is the cathedral. There are some manufactures. St. Patrick is said to have been buried here. Pop. 3200.

Downs Two ranges of chalk hills in S. England. They are called the North and the South Downs, and sometimes sections are called the Hampshire and the Marlborough Downs. The North Downs are in Kent and Surrey, the highest point being Leith Hill. The South Downs are in Kent and Sussex, and between the two ranges is the district called the Weald. The Downs run also into Hampshire, Berkshire and Wiltshire.

The Downs is also the name given to the roadstead off the coast of Kent between Deal and the Goodwin Sands. It is about 8 m long and 6 wide. There were several fights here between the English and Dutch fleets in the 17th century.

Downside Monastery near Bath. It was established as a house for Benedictines in 1814, having previously been in Shropshire. The house has a fine range of buildings and the monks maintain a school, one of the leading Roman Catholic public schools in England.

Doyle Family of artists. John Doyle, born in 1797, was an Irishman who settled in London in 1821. He made a reputation by his caricatures of politicians and others signed H. B. Many of them are in the British Museum. He died Jan. 2, 1868.

His son, Richard Doyle, inherited his father's gifts. For many years he was a contributor to *Punch* and he designed the cover which was used from 1849 to recent times. He also illustrated books painted in water colours and wrote for the *Cornhill Magazine*. He resigned from *Punch* in 1850 because it criticised the Roman Catholic Church, and died Dec. 11, 1883.

Doyle Sir Arthur Conan. English novelist. Born in Edinburgh, May 22, 1859,

he was educated there and became a doctor. He practised medicine for a time, but soon proved he had a distinct gift for writing. From 1887, when *A Study in Scarlet* appeared, he wrote incessantly and on a variety of subjects, and although he does not stand in the first rank of novelists some of his work is of very high quality indeed.

The chief of many claims to fame is the creation of the detective Sherlock Holmes, whose adventures are related in a number of volumes. His historical novels, notably *The White Company*, *Michael Clarke* and *Rodney Stone*, are among the best in the language. His power of telling a story is well seen in the delightful series dealing with Brigadier Gerard, and in his volumes of short stories. Doyle wrote a popular history of the Boer War, in which he served as a doctor, and one of the Great War. In later life he gave much time to spiritualism, in which he strongly believed. Knighted in 1902, he died July 7, 1930.

Drachenfels Hill of German. It overlooks the Rhine, 8 m. from Bonn. Magnificent views are obtained from the top, which can be reached by a railway from Königswinter. It is 1065 ft high and on it are the ruins of a castle. The name means dragon's rock and the legend is that in a cavern in the hill lived the dragon that was slain by Siegfried.

Drachm Unit of weight. It is one-sixteenth of an ounce avoirdupois, or one eighth of an ounce in the old apothecaries' weight. Drugs are still compounded and prescriptions made up by apothecaries' weight, except in the British Pharmacopoeia, where avoirdupois weight is used. The word is often abbreviated to dram.

Drachma Standard monetary unit (silver coin) used in the Republic of Greece.

Draco Magistrate at Athens. He lived about 600 B.C. and was responsible for putting the laws in writing. These laws were severe, although not more so than others of that age, and since then the word draconian has been used for severity.

Drace is also a Latin word for a dragon. As such it is given to a constellation between the two bears, and to a genus of lizards found in India and thereabouts.

Draft Word used in several senses. One draft is an order to a banker to pay a sum of money to a certain person. Such are used when cheques cannot be employed, in foreign business, for instance. Another draft is a rough copy of a document.

In military speech a draft is a body of soldiers sent to join a unit perhaps from the depot to a battalion in India. During the American Civil War the word was used for conscription. In 1863 a law gave power to the president to draft all men between 20 and 45 into the army. The riots which followed were called the Draft Riots.

Dragon Fabulous monster typical of evil in Christian lore. It was a huge reptilian quadruped breathing fire and probably evolved from vague memories and imaginings of prehistoric saurians. It is chiefly known as the monster killed by St. George.

The dragon is a good deal used in heraldry where it is usually represented with wings. It is one of the national emblems of Wales. It also appears in the heraldry of China and Japan. An old kind of musket was called a dragon.

Dragonet Genus of brilliantly coloured spiny finned fishes (*calhony mus*) They inhabit temperate and tropical waters The British *C. lyra*, orange blue with lilac and red markings, was previously called the yellow gurnard It is smooth skinned, with pointed mouth and upturned eyes, and is the male of the coast dweller formerly called the dusky skulpin

Dragon Fish Genus of small spiny-finned fishes Allied to flying gurnards, they inhabit Indian, Chinese and Australian waters Their broad, flattened bodies, with stiffened tails, are covered with movable bony plates, the long rays of the breast fins, sometimes spinous, resembling wings They lack teeth and air bladders The Indian *P. draco* is typical of the species

Dragon Fly Group of winged insects Nowadays considered a distinct order (*odonata*), it is of world wide temperate and tropical distribution, and includes 2200 species Only 50 are British Large headed, and strong jawed, with two enormous compound eyes and short antennae it is slender bodied, with four large, transparent, membranous wings The eggs are deposited in water The larva preys on other water organisms, and reaches a nymphal stage of continued activity, instead of becoming a resting pupa, before completing its metamorphosis

Dragon's Blood Resinous exudation from the scaly fruits of a climbing palm This is a native of Borneo and Sumatra The resin is formed into rough sticks or irregular pieces and when powdered is carmine red in colour It is soluble in oils and spirit and is used for colouring varnishes, wood, horn, marble, etc

Dragon Tree Genus of trees of the lily order A native of the warmer parts of Africa, Asia and Polynesia, it has long leaves, usually lance shaped Its small whitish flowers bear berries Various species are ornamental foliage plants, some bearing this name helong to the allied genus *cordylone* The dragon tree (*D. draco*) of the Canary Islands attains great size and age One, 70 ft high at Orotava, Teneriffe, destroyed by a hurricane in 1807, was reputedly 6000 years old It was then over 42 ft. in girth

Dragoon To day a kind of cavalry soldier The first dragoons were infantrymen, being so called because their weapon was a musket called a dragon Later they were mounted and were called horse dragoons They were found in the French and other armies as well as in the English one

In the British Army to day there are dragoons and dragoon guards The dragoons consist of two famous regiments, the First or Royal Dragoons and the Second or Scots Greys A third regiment of dragoons, equally famous, the Royal Inniskillings, was disbanded after the Great War There are five regiments of dragoon guards, two others having been disbanded They are the 1st, 2nd, 3rd/6th, 4th/7th and 5th

Drainage Term used for the draining off of water from land by rivers, canals or other means Drainage is adopted for the protection of low lying lands from flooding by encroachments of the sea or river inundations, and marshes or areas liable to be flooded at high tide have been reclaimed in many instances by a system of dykes and drainage One third of the area of Holland

represents such reclaimed land (polders) and the canal system of drainage is supplemented by pumps worked by wind, steam and electric power Considerable areas in the eastern counties of England have been drained, the Bedford Level being the largest, and it has been suggested that part of the Wash could be drained

Drains Short name for the system by which refuse is carried from a house or other building In towns the drains are connected with a system maintained by the public authorities, in country districts a cesspool or a septic tank is often used

Great attention to day is paid to drains, as evil drains or no drains are a serious menace to health In every building that is erected they must be approved by the surveyor or the local authority, and kept in good order The most usual test for defective drains is the smoke test

Drake Sir Francis English seaman Born near Tavistock about 1545, he went to sea as a boy In 1567 he sailed with his cousin, John Hawkins, to America, and in 1570 he again crossed the Atlantic and attacked Spanish settlements and ships He repeated the exploit in 1572, when he crossed the Isthmus of Panama. He then passed a period fighting in Ireland In 1577, with five ships, Drake set out upon a voyage round the world He was away for three years and lost all his vessels except *The Golden Hind*, but he fulfilled his purpose and in Oct., 1580, sailed into the Thames laden with spoil The first English man to circumnavigate the globe, he was knighted by Elizabeth in 1581 In 1585 he again harried the Spanish settlements in the New World

In 1587 Drake led an expedition to Cadiz, where he burned many Spanish ships and delayed the proposed invasion of England In the *Revenge* he took part in defeating the Armada, himself capturing the *Rosario* In 1589 he led another expedition to the coasts of Spain and Portugal, but this ended in the loss of thousands of English lives from disease In 1595 Drake left Plymouth on his last voyage He reached the West Indies where he was taken ill with dysentery and died, Jan. 28, 1596 He was buried at sea Between his voyages Drake lived in Devonshire He was elected MP for Plymouth and provided that city with a water supply from Dartmoor

A British cruiser was called the *Drake* She displaced 14,100 tons and was 520 ft. long She was sunk by a torpedo, Oct. 2, 1917

Drakenberg Mountain range in S Cape Province from the Orange Free State and Natal The highest point is 11,000 ft and the general height is about 7000 ft Majuba Hill is in this range The name is sometimes but wrongly called, Drakensberg, an alternative is Quathlambra

Drama Acted story Dramatic art om simulate real or fictitious personalities They represent their gesture, dumb or spoken, and by dress and scenic accessories aid the illusion

Represented in Attica on travelling wagons in the 6th century, B.C., the classical drama quickly established the unities of time, space and action which have governed all later developments The story's unfolding, from opening to climax, should be inevitable or at least probable Interwoven subsidiary incidents should never distract attention from

the main action. Sometimes utilising national myths and legends, historic events or outstanding persons, the dramatist's skill, working within the literary conventions of his age, lies in creating characters whose delineation makes an individual appeal.

The early church discountenanced the travelling companies of masked comedians who perpetuated classical Roman models. Mystery and morality plays, which provided popular instruction and diversion, preluded the revival of the secular drama under Renaissance influences and the creative outburst typified by Shakespeare, Lope de Vega, Corneille and Racine. This modern drama encountered new influences in Ibsen's realism and Maeterlinck's symbolism.

Drama includes tragedy, comedy, melodrama and farce. It may be lyrical, expressed in prose or verse, associated with music in opera, or speechless as in pantomime.

Draper (Fr. *drapier*) Trader in textile and other goods. The name was originally given to a maker of cloth and was then extended to linen. The name now applies to sellers of all kinds of silks, woollens, cottons and other manufactured goods. The Drapers' Company, whose hall is in Throgmorton Street, is the third of the twelve great livery companies of London. Its great wealth has done much for education, especially at Bancroft's School, Woodford, and the People's Palace, Mile End Road, London, E. *The Drapers' Record*, published weekly, is the chief trade journal.

Drapier Name taken by Jonathan Swift when he wrote *The Drapier's Letters* in 1724. A certain William Wood had been given a monopoly for supplying Ireland with copper coins. This privilege was disliked in Ireland and Swift denounced the transaction and helped materially to bring about the cancellation of the contract.

Draughts Indoor game. It is played with 24 pieces, or draughts-men, on a board divided into squares. The pieces are twelve black and twelve white, and the squares on the board are likewise black and white alternately. There are 64 squares and either the black or the white ones can be used. 32 therefore are used and on 24 of them the players place their pieces, leaving eight blank squares between them.

The object of the game is to move the pieces forward and to capture the enemy pieces, which can be done by passing over one to a vacant square behind it. When a piece has reached the back row of enemy country it becomes a king and can move either backwards or forwards. If a piece is not taken when it is vulnerable, the piece that fails to take it is buffed or removed from the board. In the United States draughts is called checkers.

Draughtsman One who draws plans and designs for buildings, machinery and the like. Draughtsmanship is a branch of drawing and is taught at schools of art and technical colleges. Draughtsmen are employed by the Admiralty on warship design, and by engineering firms of all kinds, as well as by architects. Draughtsmen are also employed in some of the textile industries and to draw maps; in the latter case they are also called cartographers.

Drave River of Europe. It rises in the Tyrol, flows through Austria into Yugoslavia and when near Belgrade it joins

the Danube. It is navigable to where it is joined by the Mur, and by small craft to Villach. Its length is 450 m.

Dravidian Name denoting collectively non-Aryan peoples in S India and Ceylon. Their speech pertains to a distinctive language family of agglutinative form. Numbering nearly 60,000,000, they are dark-skinned curly-haired, long-headed, broad-nosed and thick-lipped. In N India Dravidian has been more or less displaced by Aryan forms of speech, but in Baluchistan olive-skinned, brown-haired Eranian Brahmins speak a Dravidian dialect. The principal languages are Telugu, Tamil, Malayalam and Kanarese. A distinctive S Indian style of architecture is often called Dravidian.

Drawback Repayment of money paid on customs or excise duties. It is usually given in cases where goods, having been imported and paid the necessary duties, are then exported.

Drayton Michael. English poet. Born in Warwickshire in 1563, his early life is rather obscure. He was associated with Shakespeare and wrote a good deal. In 1593 appeared his *Idea, the Shepherd's Garland* and in 1598 *England's Heroical Epistles*. His longest work is *Polyolbion*, a description of England, 30,000 lines in length, and his best is contained in *The Ballad of Agincourt* and his sonnets. His *Nymphidia* or *The Court of Faery* is delightful, and his last work, *The Muses' Elysium*, deserves mention. He died Dec 23, 1631, and is buried in Westminster Abbey.

Dreadnought British warship. There have been several warships of this name. One fought against the Spanish Armada and another at Trafalgar. The latter was long used as an hospital, being moored off Greenwich. The name is perpetuated in the Dreadnought Hospital there.

The ninth Dreadnought was an entirely new type of battleship and gave her name to a large class. She was laid down in 1906 and was armed with ten 12 in guns, earlier ships having only four. Her only other guns were small ones for dealing with torpedo boats. There were no guns of intermediate size as there had been in earlier warships. The Dreadnought was 526 ft. long and displaced 17,900 tons. Her ten guns were so arranged that eight of them could fire on either side. The idea of the Dreadnought was taken up by other navies and their strength was calculated in Dreadnoughts. After a time ships carrying still larger guns were built. These are classed as super-Dreadnoughts.

Dream Manifestation of the unconscious mind during sleep. Dreams normally attend the state between sleeping and waking when the imaginative faculty is regaining its conscious power after submergence in the unconsciousness of normal sleep. They concern material already present in the mind, and never the inconceivable, being interpreted by Freud as the fulfilment of unsatisfied desires. The images presented, being uncoordinated, lack the coherence of reverie, or day dream.

Dredging Process of removing mud or other material under water for purposes of deepening a river, canal or harbour, or for the reclamation of swampy ground. Dredging is used also in mining for the removal of alluvial deposits containing gold, platinum, tin and other valuable ores, and for building purposes in the excavation of

sand, gravel and clay. The machines used are known as dredgers and of these there are many types. The bucket dredger is a common type and consists of a series of buckets linked together to form a ladder, at the top of which is the receiving hopper.

Dreiser Theodore. American writer. Born Aug. 27, 1871, in Indiana. He was educated there. In 1892 he joined the staff of a newspaper at St. Louis but soon became an editor in New York. In 1907 he was made editor-in-chief of the *Butterick Publications*. In 1900 Dreiser published *Sister Carrie* and then followed novels, short stories and essays in quick succession. These include *The Financier*, *A Hoosier Holiday*, *Twelve Men Accented and Declamed*, and *A Gallery of Women*. His best known work is *An American Tragedy*. In *A Book about Myself and Dawn* he relates his own life story.

Dresden City of Germany and the capital of the republic of Saxony. It stands on the Elbe, 110 m. from Berlin. Dresden is chiefly famous as an art centre. Its unrivalled collection of pictures, including the *Sistine Madonna*, is in the museum, part of a huge building called the *Zwinger*. The palace, in which the kings of Saxony lived until 1918, also contains some wonderful treasures. There is a magnificent theatre and also an opera house. The *Altmarkt* is the centre of the old town. Noble bridges cross the Elbe and there are promenades along its banks.

Dresden is a great industrial town. It is an important railway junction with a great central railway station and there is a good deal of trade along the river. It is an important banking and distributing centre, and there are a number of manufactures. Dresden became the capital of Saxony in 1485 and in the 16th century it was rebuilt. It has a broadcasting station, (319 M. 0.251 W.) Pop. 619,000.

Dresden chinaware was first made in the palace at Dresden in 1709. It is noted for the delicacy of its colouring and its most valuable pieces are small figures of shepherdesses and the mark is a crown and two crossed swords. The china has been made since 1710 at Meissen.

The Battle of Dresden was fought Aug. 26 and 27, 1813. In it Napoleon defeated the Austrians, Russians and Prussians who were attacking the city, then in the possession of the French. The *Dresden*, a German light cruiser was sunk by British cruisers near Juan Fernandez March 14, 1915.

Dressing Materials used to protect a wound or injury. These are made of cotton wool, lint and other material usually treated with iodoform, boric acid or another chemical to prevent germ infection. In war, wounds are first treated at dressing stations which are established as near the fighting zone as possible.

Other forms of dressing are manure applied to land, and the process used to prepare ores before the metal is extracted from them. Another kind of dressing is the preparation of birds etc., for the table.

Dressing Table Table for toilet use. As a distinct piece of furniture it dates from about 1700 before which time a mirror placed on a chest of drawers served the purpose. Early in the 18th century some beautiful pieces were made in walnut and other woods, and these have been extensively copied. Later they were

designed by Sheraton & Chippendale. In some cases a dressing table and secretaire were combined.

Dreyfus Alfred. French soldier. Born in Alsace in Oct., 1859, the son of a Jewish manufacturer at Mulhausen, he entered the army in 1894, then a captain on the general staff, he was charged with selling documents of value to the German Government. He was tried by court-martial, found guilty and sent into exile on Devil's Island, off the coast of Guiana. Later, he was re-tried by court-martial at Rennes, and sentenced to prison for ten years. He was, however, pardoned by the president and in 1906 a higher court declared him innocent. He was restored to the army and later made an officer of the Legion of Honour. He died July, 1935.

Driffield Market town and urban district of Yorkshire (E.R.). It is 20 m. from Hull on the L.N.E. Ry., and is an agricultural centre. It is connected by canal with Hull. Pop. (1931) 5916.

Driffield is called Great Driffield to distinguish it from the neighbouring village of Little Driffield.

Drift In geology term applied to the deposits of loose material forming superficial beds of varying thickness. Found in Northern Europe, Great Britain and North America, these beds are the result of glacial action and consist of sands, gravels and clays with scattered ice-borne boulders. The pebbles and rock fragments and also the underlying rocks are scratched and polished by the movements of ancient glaciers dating from the earlier part of the Quaternary period.

Drifter Small vessel engaged in fishing with the aid of drift nets. Normally about 100 ft. long, they are much used in the herring fisheries. During the Great War hundreds of them were engaged in patrolling the narrow seas, maintaining barrages and netting channels for submarines. On the Dover Patrol 256 drifters and trawlers did constant duty.

Drift nets are fastened to drifters and moved through the waters to catch herring, mackerel and other fish that are found in shoals. Cork keeps them in position at the top and weights at the bottom. Some are 120 yds. long.

Drill Corruption of drilling, a stout twilled fabric of cotton or linen used for suiting in tropical climates. It is also used for summer clothing for little boys, for corset making and various other purposes. Khaki drill is used for army wear in hot countries.

Drill Exercise to encourage discipline and to maintain health. It began with soldiers at a very early date and by it they were taught to move together at the word of command and in general to act as a body of trained men. In all armies recruits go through a period of drill, and drilling is a recognised part of naval and military routine. There is a regular system of drill for the British Army and there are text books giving details of the various movements.

From armies drill was carried into schools and boys were drilled usually by retired soldiers. Later it spread to schools for girls. As education became wider drill became merged into physical exercises. Swedish drill, as it is called, is a system of physical exercises which has attained much popularity.

Drill Tool used for boring holes in metal or other substances. It is rotated rapidly by hand or machinery. The ordinary

form of drill consists of a short, highly tempered steel rod with specially shaped cutting facets and is used for boring either by percussion or by constant pressure during rotation. Rock drills are used for making holes for the insertion of explosives. For sinking artesian wells, oil wells, etc., a tubular diamond drill is employed.

Drina River of Yugoslavia. It rises in the mountains of Montenegro and flows through that country until it joins the Sava about 60 m to the west of Belgrade. It is 160 m long.

Drinkwater John. English writer. Born, June 1, 1882, the son of an actor, he became a clerk. He soon began to write poetry and his first volume was issued in 1908. He was the promoter, and for a time, manager of the Repertory Theatre, Birmingham, after which he settled down to a literary life. In addition to poetry, Drinkwater has written essays and criticisms. He is best known, however, for his plays, *Abraham Lincoln*, *Oliver Cromwell*, *Mary Stuart* and *Robert E Lee*. In 1928 he published a biography of Charles James Fox and in 1930 a book on Pepys. He began his autobiography in 1931 and produced *A Man's House* in 1934.

Dripstone The projecting moulding over an arch or doorway. It is also used for the stalagmite or calcareous deposit formed on the floor of caverns.

Driver Samuel Rolles. English divine and scholar. Born at Sonthampton Oct. 2, 1846, he was educated at Winchester and New College, Oxford. His life was passed in Oxford, first as tutor at New College and then as Professor of Hebrew and canon of Christ Church. He was a member of the company that revised the Old Testament. Driver was a great Hebrew scholar and one of the leading exponents of the higher criticism of the Bible. On those subjects he wrote much, a notable book being *The Introduction to the Literature of the Old Testament*. He died Feb. 26, 1914.

Driving Guiding or controlling a vehicle on the road. At one time it referred almost solely to the guidance of horses.

Another form of driving is controlling a motor-car. Before doing this it is necessary to take out a driving licence which costs 5s a year. By the Roads Act of 1930 the Ministry of Transport has power to make prospective drivers pass certain tests.

In London drivers of taxicabs and coaches must pass an examination before they can obtain a licence to drive. This includes a knowledge of London, its streets and principal buildings as well as the ability to drive. In Great Britain a driver always keeps to the left of the road, in the United States and in France he keeps to the right. Other vehicles should be passed on the right.

Drogheda Borough seaport and market town of Co. Louth, Irish Free State. It stands on the Boyne, 4 m from the sea and 32 from Dublin, on the G. N. of I. Rly. S. Lawrence Gate is a massive relic of the city's fortifications and there are ruins of two abbeys. There is a good harbour and considerable trade in cattle etc. passes through the port. It is also a fishing centre.

The town is notable for its capture by Cromwell in 1649 when he put its garrison to the sword and its surrender to William III the day following the Battle of the Boyne. For long it was one of the most important

places in the country and the residence of the archbishops of Armagh. Pop. 12,700.

The title of Earl of Drogheda has been held by the family of Moore since 1661. The earl's seat is Moore Abbey, Co. Kildare. His eldest son is called Viscount Moore.

Droitwich Borough, watering place and market town of Worcestershire. It is 6 m from Worcester and 126 from London and is reached by the G. W. and L. M. S. Rlys. A small river, the Salwarpe, flows through the town which is linked by canal with the Severn. Droitwich is chiefly famous for its brine baths and for its powerful long-wave wireless transmitter. Pop. (1931) 4553.

Dromedary Name applied to racing breeds of camel, as distinguished from baggage animals. They are thoroughbreds expressly raised for riding purposes, and differ from the heavier breeds as race horses do from dray horses. They are mostly of the one-humped Arabian species, but two-humped Bactrian camels also have breeds of superior speed. See CAMEL.

Dromore Urban district and market town of Co. Down, Northern Ireland. It was once the seat of a bishop, but the diocese is now united with Down and Connor. Linen is made here. Pop. 2460.

Drone Name for the male of the honey bee. In size it is intermediate between the workers and the queen bee. It does not work and is stingless. At the beginning of autumn the workers turn out all the drones from the hive.

Dronfield Urban district of Derbyshire. It is 6 m from Chesterfield, on the L. M. S. Rly. The chief industry is coal mining. Pop. (1931) 4520.

Dropmore Residence in Buckinghamshire. It is 4 m from Maidenhead, its station being Bourne End, on the G. W. Rly. It is famous for its gardens which were laid out by Lord Grenville. Later the estate passed to the Fortescue family. *The Dropmore Papers*, which have been published, deal with events of Grenville's day.

Dropsy Morbid accumulation of watery fluid beneath the skin or in body cavities. It arises from weakening of the walls of the minute blood vessels, excessive blood pressure in the veins or a too watery consistency of the blood. Beneath the skin it is called *oedema* when localised and *anasarca* when widespread. In the abdomen it is *ascites*, in the head *hydrocephalus*. In kidney affections it occurs after rest. In heart disease after exertion. Treatment should attack the cause. In severe accumulations tapping may be required.

Dropwort Perennial herb (*Spiraea filipendula*) of the rose order. It is a native of Europe, N. Asia and N. Africa, and has smooth leaves and an erect stem, with panicles of small flowers, white or rosy outside. These distinguish it from the taller willow-leaved dropwort (*S. salicifolia*), a favourite cultivated shrub.

The water dropwort, (*Oenanthe crocata*), is a marsh growing umbelliferous herb, resembling celeriac, but is poisonous.

Drought Condition of dryness of an area due to a lack of rainfall, insufficient irrigation, or other cause. Where this condition is of a permanent character, deserts occur, such as the Sahara in Africa.

sand, gravel and clay. The machines used are known as dredgers and of these there are many types. The bucket dredger is a common type and consists of a series of buckets, linked together to form a ladder, at the top of which is the receiving hopper.

Dreiser Theodore American writer. Born Aug 27, 1871, in Indiana, he was educated there. In 1892 he joined the staff of a newspaper at St. Louis but soon became an editor in New York. In 1907 he was made editor in chief of the *Butterick Publications*. In 1900 Dreiser published *Sister Carrie* and then followed novels, short stories and essays in quick succession. Dromore Urban district and market town of Co. Down, Northern Ireland. It was once the seat of a bishop, but the diocese is now united with Down and Connor. Linen is made here. Pop. 2460.

Drone Name for the male of the honey bee. In size it is intermediate between the workers and the queen bee. It does not work and is stingless. At the beginning of autumn the workers turn out all the drones from the hive.

Dronfield Urban district of Derbyshire. It is 6 m from Chesterfield, on the L. M. S. Rly. The chief industry is coal mining. Pop. (1931) 4520.

Dropmore Residence in Buckinghamshire. It is 4 m from Maidenhead, its station being Bourne End, on the G. W. Rly. It is famous for its gardens which were laid out by Lord Grenville. Later the estate passed to the Fortescue family. *The Dropmore Papers*, which have been published, deal with events of Grenville's day.

Dropsy Morbid accumulation of watery fluid beneath the skin or in body cavities. It arises from weakening of the walls of the minute blood vessels, excessive blood pressure in the veins, or a too watery consistency of the blood. Beneath the skin it is called *oedema* when localised and *anasarca* when widespread. In the abdomen it is *ascites* in the head *hydrocephalus*. In kidney affections it occurs after rest in heart disease after exertion. Treatment should attack the cause. In severe accumulations tapping may be required.

Dropwort Perennial herb (*Spiraea filipendula*) of the rose order. It is a native of Europe, N. Asia and N. Africa and has smooth leaves and an erect stem, with panicles of small flowers, white or rose outside. These distinguish it from the taller willow-leaved dropwort (*S. salicifolia*), a favourite cultivated shrub.

The water dropwort, (*Oenanthe crocata*), is a marsh growing umbelliferous herb, resembling celery, but is poisonous.

Drought Condition of dryness of an area due to a lack of rainfall, insufficient irrigation, or other cause. Where this condition is of a permanent character, deserts occur, such as the Sahara in Africa.

and the Gobi in Asia, although many such areas were formerly fertile tracts. Australia is subject to periodical drought, the crops suffering in consequence, but this is being overcome by the sinking of artesian wells, the harrage system of conserving water, and irrigation.

Drowning Submersion in water or other liquid. Death from asphyxia follows a stoppage of the air supply, which is sometimes accelerated by heart failure from shock or syncope. The face is pale or slightly livid, with fine froth about the mouth and nostrils.

The Royal Life Saving Society promulgates approved methods for release, resone and resuscitation by artificial respiration. The Royal Humane Society awards medals to persons who rescue others from drowning.

Treatment—Artificial respiration should be tried perseveringly in all cases of apparent drowning, as it is frequently successful even after prolonged immersion. Send for a doctor and proceed with artificial respiration at once as follows.

Lay the patient face downwards with arms extended and face turned to one side, kneel across his body with your hands flat over the lowest ribs, then throw the weight of your body slowly, removing the pressure without removing your hand. Repeat the movement twelve times a minute without pause. In severe cases two hours' work or more may be necessary.

During this procedure an assistant should rub the lower limbs vigorously towards the heart to help to restore circulation and as soon as the patient begins to breathe again he must be kept warm with coverings and hot water bottles.

Droylsden Urban district of Lancashire. It is 5 m. from Manchester, on the L.M.S. Ry. It is also connected by canal with Manchester. The industries are associated with the cotton trade. There are also chemical works. Pop. 14,250.

Drug Substance of organic or inorganic origin used in medicine on account of some curative properties it possesses. Many drugs are derived from plants and may represent the entire dried plant, others the dried leaves, roots, bark, flowers or seeds. Examples of these are chiretta (plant), senna (leaves), rhuahar (root), cinchona (bark), canahis (flowers), nux vomica (seeds). Many extractives, alkaloids and oils from plants are used as drugs, such as cascara, croton oil, strychnine, morphia etc. Inorganic drugs are represented by iodine and compounds of arsenic, lead, zinc and other metals while a large number of synthetic drugs are in common use.

In Great Britain certain drugs such as cocaine and others classed as dangerous, can only be sold under strict supervision. Acts passed in 1920 and 1923 aimed at controlling the trade in these drugs and the Home Office has an inspector to watch it. For dealing in these drugs without authority heavy fines and imprisonment can be imposed.

Druggist Term applied to one who sells drugs. As, however, such a person must be a duly registered pharmaceutical chemist, the term *chemist* and *druggist* is generally used. Only those persons who have passed the examinations of the Pharmaceutical Society are entitled to be registered. Stringent regulations are made with regard to the sale of poisonous drugs. They must be labelled poison and the date

and particulars of the sale must be entered in a special register.

Druid Priest of the Celts of Gaul, Britain and Ireland. The chief Druid was elected by a majority of votes from the body of priests and retained his office for life. The ordinary people were completely under the control of the Druids, who looked after their morals and religion and acted as judges. The oak was regarded by them as the supreme god and oak groves were their places of worship, where they offered human sacrifices.

One of the largest of the friendly societies is known as the Ancient Order of Druids. It has many members in the United States as well as in Great Britain.

Drum Percussion instrument of music. There are several kinds. One is a single skin stretched on a frame open at the bottom e.g., the tambourine. Another consists of two skins enclosing a cylinder e.g., the slide drum. A third is a single skin stretched on a closed frame e.g., tympani or kettle drums.

Kettle drums are hemispheres of copper or brass, over which the head of parchment skin is stretched and secured by screws the tightening or loosening of which raises or lowers the pitch of the sound. Kettle drums alone emit a definite musical note, other drums merely a noise.

Drumclog Moorland hamlet in Lanarkshire. It is about 2½ m. from Loudon Hill on the Ayrshire border. Here, on Sunday, June 1st, 1679, a small band of Covenanters gained a victory over Viscount Dundee (Graham of Claverhouse) and his troops.

Drumlanrig Castle in Dumfriesshire, built about 1700. A seat of the Duke of Buccleuch, it stands on the Nith, 17 m. from Dumfries.

Drummond Scottish family. It is now represented by the Earl of Ancaster who owns Drummond Castle, in Perthshire. It is famous for its gardens.

One member of the Drummond family founded, in 1712, the bank now at 49 Charing Cross Road, London, still known as Drummonds. In this Henry Drummond (1786 1863) was a partner. He was an M.P. for many years, but is best known as an Irvingite. He built the Catholio Apostollo Church at Albury, Surrey. His daughter married the Duke of Northumberland and inherited Albury Park. He died Feb. 20, 1860. The bank is now a branch of the Royal Bank of Scotland.

Drummond Henry Scottish scientist. Born at Stirling, Aug. 17, 1851, he died March 11, 1897. He was educated at Edinburgh and Tübingen where he studied science. Trained for the ministry at New College, Edinburgh he abandoned that career, not, however, on grounds of faith for he was associated with the evangelistic work of Moody and Sankey. In 1877 he was made lecturer in natural science in the Free Church College, Glasgow, and in 1884 he became professor. While there he wrote *Natural Law in the Spiritual World*, an attempt to reconcile science and religion which had an extraordinary success and made its author known. It was followed by *The Ascent of Man*. Meanwhile Drummond had travelled much in Africa, Asia and America which led to the writing of *Tropical Africa* and other books. His addresses on religion in London and elsewhere, notably *The Greatest Thing in the World*, were very popular.

Drummond Sir James Eric British diplomatist Second son of the Earl of Perth, he was born Aug 17, 1876. Educated at Eton, he entered the diplomatic service in 1900. In 1916 he was knighted and in 1919 he was appointed the first secretary general of the League of Nations. In 1933 he was appointed Ambassador to Rome.

Drummond William Scottish poet, called Drummond of Hawthornden. Born at Hawthornden, near Edinburgh, Dec. 13, 1585, he studied law in Edinburgh and Paris. His life, however, was spent on his estate at Hawthornden, where he wrote a number of poems, described as "amorous, funeral, divine, pastoral, in sonnets, songs, sextains, madrigals." In prose he wrote *Cypress Grove*. Among his friends were Ben Jonson and Montrose. A staunch royalist, he died Dec 4, 1649.

Drummondville Town of Quebec, Canada, on the St Francis River, 62 m from Montreal. Pop 6669.

Drunkenness Condition of being intoxicated. In English law, merely to be drunk is not an offence. It is, however, an offence to be drunk and disorderly, or to be drunk on a highway or in a public place, which includes licensed premises. The usual penalty is a small fine or imprisonment. It is a more serious offence to be drunk while in charge of a motor car or other vehicle, or while in possession of loaded firearms. Drunkenness is not a defence to a criminal charge, save in exceptional cases.

Drury Edward Alfred Briscoe English sculptor. Born in London, he went to school at Oxford and then studied art. Later he studied at South Kensington and in Paris and in 1885 exhibited "The Triumph of Silenus." During the next 46 years he turned out an enormous amount of work, including decorative pieces, statues and war memorials, some being in bronze. In 1913 he was elected R.A., having been an A.R.A. since 1900.

Drury Lane Thoroughfare of London. It extends from Aldwych to Broad St., St Giles', and High Holborn. It is called after Drury Place, a 15th century mansion of the Drury family. In this house Essex planned the rebellion of 1600 and on its site, in 1805, Astley built the Olympia Pavilion.

Drury Lane, with its theatre, has many historic connections. From here a serving man first gave notice of the outbreak of the plague in 1665. Nell Gwynn was born in Drury Court, and plied her trade by Drury Lane Theatre. Lamb, Donne, Campbell, Elliston all frequented the district which, in the 18th century, sank into ill repute.

The theatre, one of the most famous in London, dates from 1661. In 1672, and again in 1809, it was burned down. The present building was opened in 1812 and is famous for the annual pantomimes held here under the management of Sir Augustus Harris and Arthur Collins. In 1917 it was used by Sir Thomas Beecham for opera.

Druses Syrian people professing an esoteric unitarianism. Numbering 160,000, more or less, they inhabit three isolated regions: Transjordan, Jebel Hauran or Jebel Druz, Lebanon, where Maronite rivals outnumber them, and Anti-Lebanon and Hermon. They hold that God appeared in successive incarnations culminating in the sixth Fatimite

calliph, Hakim (996-1021), whose claims were advocated by one, Darazi, whence their name.

Drusilla Livia Roman lady. The wife of Tiberius Claudius Nero, by him she had a son, Tiberius, the future emperor and another son, Nero Claudius Drusus. She then became the wife of Augustus, who made her husband divorce her. Their union was childless, but Drusilla retained his affection until his death. For some time after Tiberius became emperor, she had very great influence, but they soon quarrelled. She died in A.D. 29.

Drusus Nero Claudius Roman soldier. He was a son of Drusilla by her first husband. As a general he won successes in Germany in the reign of his stepfather, Augustus. He was the father of the Emperor Claudius.

Earlier bearers of this name were two men called Marcus Livius Drusus. The father was tribune in 122 B.C. and the son in 91 B.C. The Emperor Tiberius had a son named Drusus.

Dryad Nymph of Greek mythology. They were tutelary minor deities of trees in which they lived, perishing at their death or destruction.

Dryburgh Ruined abbey of Scotland. It is in Berwickshire on the Tweed, 4 m from Melrose. It was destroyed in the 16th century, but some beautiful ruins remain, including an aisle of the church in which Sir Walter Scott, his son-in-law Lockhart and Earl Haig are buried. The ruins are national property.

Dryden John English poet. Born at Aldwinkle, Northamptonshire, Aug 9, 1631, he was educated at Westminster School and Trinity College, Cambridge. He began his literary career by writing plays, but was more successful with his poems. The first of these appeared in 1659 and for the rest of his days Dryden was busy with his pen. Unlike many other writers, he was in comfortable circumstances and his private life, mainly passed in London, was uneventful. In 1670 he was appointed poet laureate, but he lost that position in 1688. He married the elder daughter of the Earl of Berkshire and before his death became a Roman Catholic. He died May 1, 1700, and was buried in Westminster Abbey.

Dryden's plays are nearly all forgotten, *Marriage à la Mode* and *All for Love* being perhaps, exceptions, but it is otherwise with his poems. The chief of these are his satires notably *Absalom and Achitophel*, an attack on Shaftesbury. Other poems are *Annus Mirabilis*, written on the year 1660, *The Hind and the Panther*, written to defend the Church of Rome, *The Ode for St Cecilia's Day* and *Alexander's Feast*. He translated Virgil and Juvenal. In his own line, that of a satirist in poetry, Dryden is unrivalled.

Dry Farming Method of farming adopted in some parts of the United States, South Africa and other countries where the rainfall is inadequate. It consists essentially of the conservation of rain water in the ground by tillage, thus keeping the soil loose and thereby checking evaporation. Part of the land may be in cultivation, while the rest is kept in a loose condition to retain moisture for the following year's crop. This method is adopted for growing hard or macaroni wheats in America.

Dry-Point Method of engraving on metal. It is allied to etching.

and used for reproduction of designs or drawings. As in line engraving the lines are cut into the copper by means of a pointed steel tool without the aid of an acid as in etching, where the design is scratched through the superficial film and hollowed out by chemical action. The burr, or raised edge, of metal, formed by the engraving tool, gives the soft effect so characteristic of dry point engravings.

Dryptosaur Genus of extinct land reptiles of the dinosaurian order (*dryptosaurus* or *laelaps*). A sharp toothed, carnivorous creature, it was strong, active and predaceous, walking on its hind legs like a kangaroo. Closely allied to, and perhaps identical with, English megalosaurs, it inhabited New Jersey, Montana and other N American regions in Cretaceous times. It was about 20 ft long.

Dry Rot Condition of decay in timber. It is due to the attacks of fungi causing the wood to become a dry brittle mass. The commonest fungus causing dry rot is *merulius lacrymans*, which attacks deal timbers in damp houses forming white felted masses spreading over boards, beams, and even masonry, and giving rise to a peculiar and disagreeable odour. To prevent dry rot occurring good ventilation and the use of well seasoned timber is necessary.

Drysalter One who deals in preserved pickles, etc. He also deals in heavy chemicals, such as sulphur, soda, salt, borax, sal ammoniac and commercial acids, crude drugs, such as medicinal salts, senna, rhubarb, etc., gums and resins including shellac, gum arabic, mastic and turpentine oils such as the various essential oils, linseed, rape and cotton seed oils, paraffin etc.

Duala Town of French Cameroons. The chief seaport of the colony, it stands on the Cameroons River, about 18 m from its mouth. It consists of a European quarter, a native quarter and the port quarter. It is an important railway junction and has a large export trade. Duala was captured from Germany by a British and French force in Sept 1914.

Dualism System of philosophy that seeks to explain the world by the assumption that there are in it two independent and absolute elements. The dualist may believe in the entire separation of spirit and matter or in permanent opposition of good and evil. Dualism is opposed to both idealism and materialism. The philosophy of Benjamin Kidd is an example of dualism.

Dual Control is the control of a country's affairs by two outside powers. For some years after 1882 Egypt was under the dual control of Britain and France.

Dual Monarchy Term used for the Empire of Austria-Hungary during the period 1867-1919.

Du Barry Marie Jeanne Bécu, French adventuress. Born Aug 19, 1746, she married Jean, Comte du Barry to act as his gambling decoy, and in 1769 became mistress of Louis XV. She was banished in 1774, and guillotined Dec 7, 1793.

Dubawnt River and lake of Canada. The river rises on the borders of Saskatchewan and flows mainly north until it falls into Chesterfield Inlet on Hudson Bay. It passes through the lake which covers about 1050 sq m. The chief tributary is the Thelon. Its length is about 600 miles.

Dublin County of the Irish Free State. It is in the province of Leinster and has a coastline of 72 m. on the Irish Sea, covers 354 sq m and is served by the G S and G N of I. Rlys. Dublin is the chief town. Other places are Balbriggan, Skerries, Kings town (Dun Laoghaire) and Howth. The county includes Lambay and other islands. The soil is fertile although there are mountains in the south. Dublin Bay is an opening of the Irish Sea. It extends from Howth to Kingstown and the Liffey flows into it.

Dublin Capital and seaport of the Irish Free State. It stands at the mouth of the Liffey on Dublin Bay and is 61 m. from Holyhead and 6 from Kingstown (now known as Dun Laoghaire and pronounced as though written Dnnicary) its outport.

Dublin has a harbour along the river and a considerable trade with British ports in cattle and other commodities. The chief industry is the manufacture of stout but there are many others, including biscuits and whisky. It is also a banking and distributing centre and the headquarters of the G. S. Rlys. The G.N. (Ireland) Rly also serves the city, which is connected with the interior by the Grand and Royal Canals.

The buildings include the castle, long the residence of the lord lieutenant, the mansion house, the art galleries, the national museum, the city hall, the fine cathedral of S Patrick and Christ Church. The Four Courts is where the courts of law sit, the meeting place of the old Irish Parliament on College Green is now occupied by the Bank of Ireland. Charleville House a beautiful specimen of 18th century architecture, has been bought for an art gallery.

Phoenix Park is a magnificent open space and contains the zoological garden. O'Connell St., formerly Sackville St. is the chief thoroughfare and O'Connell Bridge one of the many bridges across the Liffey. Butt Bridge was opened in 1931. A circular road runs round the city. At Ball's Bridge the annual horse show is held.

Dublin is also an educational, literary, and artistic centre. In it are the historic university called Trinity College with fine buildings on College Green, and University College, belonging to the newer national university. Here are the headquarters of the Royal Irish Academy and the Royal Dublin Society. The Abbey Theatre is notable. It has a broadcasting station (413 M, 1.2 kW). Pop 400,126.

The Royal Dublin Fusiliers was the name of a regiment of the British Army. It was formed in 1881 by a union of the 101st and 102nd regiments of the line and was disbanded in 1922. It had a brilliant record of service in South Africa and the Great War.

Dubois Guillaume, French cardinal and statesman. Born Sept 6, 1856, the son of an apothecary, he became a monk. Having gone to Paris, he was selected as tutor to Philip, afterwards the Regent Orleans, over whom he obtained great influence. He became the secretary to the Duke, who on becoming regent made Dubois his chief adviser. For eight years he was responsible for the affairs of France. He pursued a policy of peace badly needed after the exhausting wars of Louis XIV, and, forsaking the traditional friendship with Spain, made an alliance with Britain and Holland. Having been elected Archbishop of Cambrai, he was created a cardinal in 1921. He died Aug 10, 1923.

Ducat Mediaeval coin, generally of gold. First minted about 1140 by Roger II of Sicily for his duchy, it was therefore called *ducalus*. Adopted by Florence in 1252, and Venice in 1283, which afterwards called it the sequin, it was issued in other states and survived in Austria-Hungary down to 1914. George I and III issued Hanoverian ducats.

Duck Aquatic bird of the family *Anatidae*. It includes all birds of that family other than swans and geese. The male is called the drake, and in one species the mallard. There are 40 genera and 160 species of freshwater ducks found all over the world. All British domesticated breeds, including the Aylesbury, are descended from the common wild duck. Flat-billed and short-legged, usually with three front toes completely webbed, they include gadwalls, shovellers, widgeons, pintails, shieldrakes, teal and mandarin ducks. Sea ducks or diving ducks include scaups, pochards, canvas-backed and elder ducks. The whistling teal are tree ducks.

Duck shooting is practised, especially in the East Anglian Broads and the inlets of the east coast of England, either from punts with fixed or hand-carried guns, or afoot from the sides of streams, sometimes with decoys.

Duckbill Egg-laying mammal (*Ornithorhynchus anatinus*). Peculiar to Australia and Tasmania, it is also called the duck-billed platypus. With toothless, horny, duck-like beak, inconspicuous eyes and glossy dark-brown fur, it burrows in river banks and stores its food, which consists of insects, molluscs and worms, in the pouches of its cheeks. The eggs have white flexible shells.

Ducking Stool Punitive instrument for the public correction of scolds. The scold was fastened in a chair so fixed to a beam that it could be projected over water and raised and lowered at will. The ducking was proportionate to the scold's shrewishness. The last recorded case of ducking in England occurred at Leominster in 1809.

Duckweed Order of minute, annual, floating, green, scale-like, flowering plants. They are allied to the arum order and grow in all standing waters. Eaten by ducks and geese, they comprise oval structures called fronds with or without thread-like roots. In Britain they rarely develop their sample flowers, being usually propagated by budding or by bulbils, which hibernates in the autumn.

Du Cros William Harvey. British manufacturer. Born June, 19, 1846, in Dublin, he belonged to a Huguenot family. He became a doctor, but soon left that profession to become associated with the making of tyres by the Dunlop process. This led to his connection with other branches of the motor industry in which he was a leading figure. He was M.P. for Hastings, 1906-08, and died Dec. 21, 1915. His son, Arthur Philip Du Cros, succeeded him as M.P. for Hastings, and in 1915 was made a baronet.

Ductility Property in many metals of being permanently elongated by a tensile stress or of being drawn into wire. Ductility is influenced largely by the tenacity of the metal. It is associated with malleability, but the most malleable metals are not necessarily the most ductile. The commoner

metals, arranged in their order of ductility, are gold, silver, platinum, iron, copper, aluminium, zinc, tin and lead. Gold is so ductile that one grain in weight can be drawn out into 500 ft. of wire.

Ductless Glands See GLAND

Dudley County borough of Worcestershire. It is 8 m. from Birmingham and 121 from London, in the centre of the Black Country, and is served by the L.M.S. and G.W.R. lines. There are ruins of the castle, these and the grounds are now public property. The industries are connected with the iron and steel trades, being chiefly engineering works and iron and brass foundries. Motor cars and cycles are also made here. Pop. (1931) 59,579.

Dudley Earl of English title held since 1860 by the family of Ward. Earlier a famous family had taken its name from Dudley. To this belonged Edmund Dudley, the extortionate minister of Henry VII, who was put to death in 1510, and Robert Dudley, Earl of Leicester, and several who bore the title of Baron Dudley.

When in 1643 the last Baron Dudley died his estates passed by marriage to the Ward family. The earliest of the Wards was a goldsmith, Humble Ward. In 1763 one of his descendants was made Viscount Dudley. John William Ward, the 4th viscount, was Foreign Secretary, 1827-28, and was made Earl of Dudley in 1827. The title became extinct in 1833, but in 1860 it was given to William Ward, another descendant of Humble Ward. His wife, Georgiana, was a prominent social figure. William Humble Ward, the 2nd earl, was Parliamentary Secretary to the Board of Trade, 1895-1902, Lord-Lieutenant of Ireland, 1902-06, and Governor-General of Australia, 1908-11. He died June 29, 1932. Witley Court, now sold, was the earl's chief seat, and his estates include coal mines in Worcestershire and Staffordshire. His eldest son is called Viscount Ednam, and his seat is Himley Hall, Staffordshire.

Duel Single combat. It was usually arranged by challenge and fought with deadly weapons under conventional rules, to settle a personal quarrel, or decide a point of honour.

The first duels were fought with swords or rapiers, but later the pistol became the favourite weapon. They were very common in France, Italy and other countries during the 16th and 17th centuries and thousands of men were killed in them, but efforts to stop them failed. Duels are occasionally fought to-day in those countries, as they are in E. Europe and S. America but rarely with fatal results. However, in 1930 a duel with revolvers led to the death of a former president of Paraguay as well as of his opponent. In Germany duels among army officers were fairly common before the Great War, and duels of students are a feature of university life there.

In England, as elsewhere, duelling was a development of the old combats of the knights. It began in the 16th century, and duels were fairly frequent in the 17th and 18th centuries. Many prominent men went out to fight, including the younger Pitt, the dukes of York and Wellington, Canning and Castlereagh. The Irish gentry were noted for their propensity to fight duels. In the case of a fatal termination the survivor was guilty of murder,

and a duellist was executed in 1808. Notable duels were those between Lord Byron and Mr Chavorth, between Lord Mohun and the Duke of Hamilton, described in *Edmond*, and the one in which Aaron Burr killed Alexander Hamilton. The last duel in England was fought in 1843.

Dufferin and Ava Marquess of Temple Hamilton-Temple Blackwood was born in Florence, June, 21, 1826. His father was Baron Dufferin and his mother a grand daughter of R. B. Sheridan, she was known for her songs, especially *The Emigrant's Farewell*. He became baron in 1841, and, having passed through Eton and Christ Church, Oxford, entered public life. He held positions in the Liberal ministry in 1864-66, and in 1872, having just been made an earl, he was appointed Governor-General of Canada. From 1884-88 he was Viceroy of India, and he was Ambassador in Rome, 1888-91, and in Paris, 1892-96. In his later years he was associated with Whitaker Wright's companies, a proceeding which involved him in considerable loss. He died Feb. 12, 1902, at the family seat, Glendohoy, Co. Down.

In 1888 Dufferin was made a marquess. His eldest son, the Earl of Ava, was killed in S. Africa in 1902. The title passed, therefore, to a younger son, Terence, who became the 2nd marquess. He was succeeded in 1918 by a brother, Frederick, who became the 3rd marquess. He was made speaker of the Senate of N. Ireland in 1921, and in 1930 was killed whilst flying from France.

Dugdale Sir William. English scholar. A member of a Warwickshire family of some note, he was born Sept. 12, 1605. In 1638 he was given an official appointment in the Office of Heraldry, and in 1677 he was made Garter King at Arms. Knighted in 1677, he died Feb. 10, 1686. Dugdale gave his life to the study of the past, and his works still have value. The chief are *Antiquities of Warwickshire*, *Monasticon Anglicanum*, an account of the religious houses in England, and *The Baronage of England*.

Dugong (Halicore). Genus of aquatic mammals found in the Indian Ocean and along the coasts of Australia. The dugong is from 7 to 9 ft. long with flippers and a tail resembling that of the whale. It is allied to the manatee, with which it constitutes the mammalian order Sirenia, or sea cows. The appearance of the dugong, which raises its head and body from the water while supporting its young, is supposed to have originated the stories of mermaids.

Duisburg Town and river port of Germany. It stands on the Rhine, near where that river is joined by the Ruhr. It is one of Germany's great industrial centres, and said to be the largest river port in the world. Pop. 421,217.

Duke English title. A variant of the Latin *dux*, the word was first given to a military leader. Later it was used in Germany for the ruler of a large district, such as Swabia and Franconia, and was introduced into France and England. In England, Edward, the Black Prince was made a duke in 1337. The first Scottish duke dates from 1398.

Duke is the highest rank in the British peerage, and the coronet contains eight strawberry leaves. The younger sons of the sovereign are usually made dukes. The Duke of

Norfolk is the premier duke of England, and the Duke of Hamilton the premier duke of Scotland. A duke's daughter and his younger sons bear the courtesy title of lady or lord before the Christian name. His heir is a marquis. The duke and duchess are addressed as "your Grace," and occasionally a lady is a duchess in her own right, the Duchess of Fife being an example.

Dukeries District in the NW of Nottinghamshire. It includes the existing part of Sherwood Forest, and covers about 100 sq. m. It stretches from near Mansfield almost to Worksop. Edwinstone is its centre, and it is crossed by the L.N.E. Ry. Coal mines have been opened in the district but much of it is still beautiful woodland. The name is due to the fact that at one time four dukes lived here. The Duke of Kingston was at Thoresby, now the residence of Earl Mansvers, the Duke of Norfolk was at Worksop, Clumber is still the seat of the Duke of Newcastle, and Welbeck of the Duke of Portland.

Dukinfield Borough of Cheshire. It stands on the Tame, 6 m. from Manchester. Here are cotton mills, engineering works and coal mines. Pop. (1931) 19,309.

Dulac Edmond. French artist. Born at Toulouse in 1882, he studied art in Paris under Larrens, and in 1905 settled in London where he has achieved success by his paintings and skill in illustrating and caricature. His exhibition in 1907 of water colours on subjects from *The Arabian Nights* brought him recognition as an artist of ability. Among the works he has illustrated are Shakespeare's *Tempest*, Andersen's *Fairy Tales*, and books of a similar character.

Dulcimer Musical instrument. Of Eastern origin and great antiquity, it was possibly brought to Europe by Crusaders. It consists of a trapezoidal sounding board over which are stretched metal strings. These are struck by a pair of leather-headed hammers with flexible stems. Hobon strett's pantaleon, an enormous dulcimer perfected in 1706, directly influenced piano forte making.

Dulcin Organic substance occurring as minute white needles. It is soluble in water, alcohol and ether, and is 200 times sweeter than sugar. It is said to be absolutely harmless to man and animals and has the advantage over saccharine in that it has no bitter aftertaste and does not mask flavours.

Dulse Fleishy seaweed of the floridaceous order (*Rhodomenia palmata*). It has purplish red fronds irregularly cleft or otherwise divided, and serves in parts of Scotland, Ireland, Iceland and elsewhere as a food relish, either stewed or dried, and chowder instead of tobacco.

Duluth City and port of Minnesota, U.S.A., and capital of St. Louis county. It stands at the western end of Lake Superior, and is an important railway terminus. There are iron and steel works, flour mills and other industries, but it is chiefly a shipping centre. It has a fine harbour and an enormous quantity of wheat is shipped to be carried down the Great Lakes and along the St. Lawrence. Pop. (1930) 101,463.

Dulverton Town of Somerset, and a fishing and hunting centre.

It stands on the Barle, 20 m from Taunton, on the G W Rly Pop., 1500

Dulwich Suburb of London It is mainly in the borough of Camberwell to the S E of the city, and on the S Rly which has several stations here A pleasant residential area Its oldest part is still known as Dulwich Village At one time it possessed a spa

In Dulwich is the large public school called Dulwich College This was founded by Edward Alleyn, the actor, in 1619, and has a fine range of buildings with room for about 700 boys surrounded by extensive grounds The old buildings of the college still stand In 1857 another school called Alleyn's School was established here

The picture gallery, founded in 1807, contains some very fine pictures by the Dutch masters, as well as by Gainsborough, Reynolds and others

Duma Name of a representative body in Russia. It was set up in 1905, but disappeared towards the end of the Great War It consisted of 442 members elected for five years. Election was indirect. Delegates were sent from the different towns and districts to a general assembly, which chose the members of the Duma

Dumas Alexandre French novelist Born July, 24, 1802, his full name was Alexandre Davy de la Pailleterie, his father being an illegitimate son of a marquis of that family His grandmother was a negress named Dumas He left his home at Villers Cotterets about 1823 to become a clerk in Paris, where he soon entered upon a literary life He found time also to fight for Garibaldi in Italy, to live magnificently, spending freely the huge sums he earned, to have matrimonial and other adventures and to mix in politics He died at Dieppe, Dec. 5, 1870

Dumas was responsible for over 1000 books, on a great variety of subjects Many of these were written by collaborators and assistants, and many more were accepted and signed by him without any share whatever in their authorship The plays, however, with which he began his literary career and the books on his early travels, are undoubtedly his own, except in those plays where collaboration is openly acknowledged The plays include *Henry III and his Court*, which first made him famous in 1829 His sketches include books on travels in Switzerland, Russia, Italy and elsewhere The reputation of Dumas, however, rests upon his historical romances a field in which he is without a rival They attained immense popularity and have been translated into English and other languages. The chief of them are the trilogy, to give them their English titles, *The Three Musketeers*, *Twenty Years After*, and *The Vicomte de Bragelonne*. The Count of Monte Cristo, *Chicot the Jester*, *The Black Tulip* and *Queen Margaret* may be mentioned, but there are many others He also wrote *Memoires* in ten volumes, but his chief title to fame, in England at least, is as the creator of Porthos, Athos, Aramis and D'Artagnan

Dumas Alexandre French writer known as Dumas fils Born July 27, 1824 he was a natural son of Alexandre Dumas pere whose name he took on being made legitimate He made his reputation with a novel *La Dame aux Camélias*, 1848, and wrote others including *L'Affaire*

Clémenceau, but it is as a dramatist that his name endures *La Dame*, a great success when it was adapted for the stage, was followed by *La Question d'Argent*, *Une Visite de Noces*, *Denise* and a number of others, mainly problem plays He also wrote essays and helped George Sand to prepare her work for the stage He was elected to the Academy in 1874 and died Nov 27, 1895

Du Maurier George Louis Palmella Busson British artist and author Born in Paris, March 6, 1834, his grandparents were French refugees domiciled in England during the French Revolution At the age of seventeen he went to London and studied chemistry at University College, but later became an art student in Paris After further studies in Antwerp and Düsseldorf, he returned to England where his artistic reputation was rapidly established He contributed illustrations to many publications including *Once a Week*, *The Cornhill* and *Punch* In 1865 he became a member of the staff of *Punch*, and for years his pictorial satires of social life were a feature in its pages Owing to failing eyesight, in later years he took to writing, his first novel, *Peter Ibbetson*, appearing in *Harper's Magazine* in 1891, with his own illustrations This was followed by *Trilby*, 1904, which attained instant popularity and was eventually dramatised *The Martian* his third novel, was published after his death He died in London, Oct 6, 1896

Du Maurier Sir Gerald English actor A son of George Du Maurier, he was born in London, March 26, 1873, and educated at Harrow He made his first appearance on the stage in 1894, and soon won a reputation In 1910 he became manager of Wyndham's Theatre, London In 1922 he was knighted His many successes include *Captain Hook*, in *Peter Pan*, and the part of Bulldog Drummond on the stage and in a talking film He died in April, 1934

Du Maurier's elder brother, Guy, wrote a popular play, *The Englishman's Home*. He was killed in action, March 11, 1915

Dumbarton Burgh, seaport and market town of Dumbartonshire, also the county town It is 15 m from Glasgow on the LMS and LNE Rlys The River Leven flows through it on its way to the Clyde, on one side is the town proper and on the other the suburb of Bridgend A castle stands on the famous Rock of Dumbarton There are shipbuilding yards and engineering works and also some shipping Pop (1931) 21,546

Dumbartonshire County of Scotland In the west of the country, it has a coast line on the Firth of Clyde On its borders are Loch Lomond and Loch Long Dumbarton is the county town, other towns are Clydebank, Kirkintilloch and Helensburgh The Leven and the Kelvin are the chief rivers. Districts of the county are the Vale of Leven and the peninsula called Roseneath. The area is 276 sq m Officially the name is Dumbartonshire Pop (1931) 147,751

Dumb Bell Term applied to a double-headed weight used in athletic training Dumb bells are made of wood, or iron, and consist of a short bar bearing a rounded knot at each end The name is derived from the fact that the early form was in the shape of a wooden bar with bell-shaped leaden ends

Dumbness Inability to utter articulate sounds. It affects approximately one per 1000 in Great Britain, mostly persons deaf from birth or early infancy, but with the voice mechanism unimpaired. Sometimes dumbness results from brain defect, especially in children born of the unions of near relatives. It may result, too, from brain disease, as when due to war hysteria or syphilis, disease or paralysis of the vocal cords and the presence of tumours, whose removal may involve inserting an artificial larynx. Structural defects, such as tongue tie or enlarged tonsils and adenoids in the throat, may impede proper word formation. Lipping, stammering and stuttering are slight forms of dumbness due to the voice mechanism being ineffectively controlled.

Dum-Dum Town of India. It is in Bengal, 7 m from Calcutta, and consists of two distinct municipalities, north and south. It is chiefly known because it gives its name to a bullet first made at the government ammunition factory here. This was invented for use against the tribesmen of the frontier whose advances could not be stopped by ordinary bullets. The dum dum bullet has a soft nose which causes it to flatten or expand on entering the body, thus causing a very ugly wound.

Dumfries Royal burgh of Dumfries shire, also the county town. It stands on the Nith, 82 m from Glasgow on the LMS Rly. On the other side of the river is the suburb of Maxwelltown. The manufactures include cloth and hosiery, and there is an agricultural trade and also a trade along the river, which is navigable. There is a monument to Robert Burns who lived here the last few years of his life (1791-96) and who is buried here. Pop (1931) 22,795.

Dumfriesshire County of Scotland. In the south west, it has a coastline on the Solway Firth. It covers 1100 sq m, and is chiefly given up to the rearing of cattle and sheep. Dumfries is the county town, other places are Moffat, Sanguhar, Annan, Lockerbie and Langholm. On the southern border is Greta Green. The chief rivers are the Annan the Nith and the Esk, which divide the county into three districts or dales. The scenery is very beautiful, especially in the hilly regions of the north and west, and around Lochmaben in the centre. In the east are moors. Locher Moss is a tract of reclaimed land in the south. The chief hills are the Lowthers. The county has associations with Burns and Carlyle. It sends one member to the House of Commons. Pop (1931) 81,000.

Dumping Throwing down rubbish in a heap. The term is also used for piling ammunition into a heap, and for a similar process with other materials.

In economics it refers to the action of exporting goods and selling at prices lower than those prevailing for home consumption in order to undercut the producer in the importing country and gain control of the market. Legislation against dumping has been passed by the United States, Great Britain and the Dominions. The Safeguarding of Industries Act of 1921 was an anti-dumping measure. The value of dumping to an industry is said to be that it enables it to maintain a high level of output, by means of mass production, and thus reduces overhead charges.

Dunbar Burgh and watering place of Haddingtonshire (East Lothian). It is situated at the mouth of the Firth of Forth, 29 m from Edinburgh. It is served by the LNE Rly., and with two harbours is a fishing port. The ruins of the castle are of interest as is the tolbooth. Pop (1931) 3751.

The Battle of Dunbar was fought between the English and the Scots, Sept., 3, 1650. Cromwell invaded Scotland, and with 16,000 men moved to Dunbar to be in touch with his ships. The Scots, under David Leslie, followed and took up a position on the hills. They moved down to attack the English and the battle began at daybreak. It ended quickly in a decided English victory, about 3000 Scots being killed.

The Scottish title of Earl of Dunbar existed in the 13th century or earlier. It became extinct in 1611.

Dunbar William Scottish poet. Born about 1460 in Haddingtonshire, he became a friar and went about the country preaching. Later he entered the king's service and discharged secretarial duties at home and abroad for some years. He was probably killed at Flodden in 1513. Dunbar's most famous poem is *The Thistle and the Rose*, written to celebrate the marriage of King James IV and Margaret, daughter of Henry VII. He also wrote *The Dance of the Seven Deadly Sins* and other satires, and *Lament for the Makaris*.

Dunblane Burgh and market town of Perthshire. It is 5 m from Stirling and 41 from Edinburgh, on the LMS Rly. The church, once a cathedral, was built in the 12th century and restored in the 19th. The town has a spa, and its chief industry is the woollen manufacture. Here is the Queen Victoria Military School. Pop (1931) 2692.

Duncan King of the Scots. He is chiefly known because of Shakespeare's mention of him in *Macbeth*. He became king in 1034 and was killed by Macbeth, probably in 1040.

Duncan Isadora. American dancer. She was born in San Francisco, May, 27, 1878, and appeared first on the stage in 1890. After a few years she crossed to Europe where she won a great reputation by the originality and grace of her dancing. She appeared in London, Paris and other capitals, and opened a training school near Berlin. She died as the result of a motor car accident, Sept. 14, 1927, and in 1928 her *Autobiography* appeared.

Duncan Viscount. British sailor. Adam Duncan was born in Dundee, July 1, 1731, and in 1746 entered the navy. He was in several sea fights and became commander of a ship. In 1782 he was made First Lord of the Admiralty, and in 1795 was appointed to command the fleet in the North Sea. He blockaded the Dutch fleet in the Texel, and met and defeated it off Camperdown, Oct. 11, 1797. He was made a viscount and died Aug. 4, 1804. The Earl of Camperdown is his direct descendant.

Duncansby Head Promontory of Scotland. It is in Caithness and is the most northerly point of the country. Off it are three rocks called the Stacks.

Duncombe Park Former residence of the Earl of Faversham. It is just outside Helmsley

Yorkshire The house was built early in the 13th century, and after the Great War became a school for girls. In the grounds are the ruins of Helmsley Castle.

Dundalk Market town and urban district of Louth, Irish Free State; also the county town. It stands on Castle-town River, near where it enters Dundalk Bay and is 54 m from Dublin. The chief industry is the railway works, there is also an agricultural trade. Pop 14 000

Dundalk Bay Is an opening of the Irish Sea. It is about 6 m long and 7 wide at the entrance

Dundee City and seaport of Angus or Forfarshire. It is situated on the north side of the Firth of Tay, here crossed by the Tay Bridge, 60 m from Edinburgh by rail and 42 by road. It is served by the L.M.S. and L.N.E. Rlys. The buildings include the town churches, three under one roof, (St Mary's, St Paul's and St Clement's), the cathedral of the see of Brechin, and the Roman Catholic pro-cathedral, and several other fine churches. Caird Hall is the gift of Sir James Caird. University College is part of the University of St Andrews. There are technical schools and a high school. The city has several public parks, including the Caird. Baxter and Bakray. Dundee Law, a hill behind the town, is public property.

Dundee is a centre of the jute, linen and hemp manufacture. Other industries are engineering, shipbuilding, dyeing and printing. It is famed for its marmalade and is a publishing centre. There is a good harbour along the river and the port has a large trade in timber. It is also headquarters of the whaling industry. The city includes the watering place of Broughty Ferry. Pop (1931) 175,583

Dundee is the name of a small town in Natal. It is on the railway, 6 m from Glencoe, and is a coal mining centre. Pop, 3000

Dundee Viscount. Scottish soldier, also called Graham of Claverhouse. A son of Sir William Graham of Claverhouse. John Graham was born about 1649 and went to the University of St Andrews. He became a soldier and saw a good deal of fighting in France and the Netherlands. He served under William of Orange, whose life he saved on one occasion. In 1678 he was sent to Scotland to put down the Covenanters, a work he did with great thoroughness. In 1688 he was made a viscount, and was killed at Killbuckranke July 27, 1689 whilst fighting at the head of the force he had raised for the Stuarts against William III. Sir Walter Scott refers to him as *Bonnie Dundee*.

Dundonald Earl of Scottish title borne since 1669 by the family of Cochrane. The first earl was Sir William Cochrane, a royalist, and the title passed from one to another until it came to Thomas Cochrane, who became the 10th earl in 1831. Born Dec 14, 1775, he entered the navy and saw a good deal of service against France. He then entered the House of Commons, and in 1814, probably on a false charge, was expelled from the navy and Parliament.

He entered the service of Chile, and commanded that country's navy during the war of liberation winning several successes. He commanded the Brazilian navy (1823-25), and then the Greek navy. In 1832, having returned to England, he succeeded to the earldom, and was pardoned. From 1848-51

he was Commander in-Chief of the Fleet in N America. He died Oct. 31, 1860

Douglas Cochrane (b 1852), who became the 12th earl in 1885, was a soldier. He saw a good deal of service in Egypt and elsewhere, and led the cavalry force that entered Ladysmith in 1900. From 1902-04 he was in command of the Canadian militia. His eldest son, Lord Cochrane, succeeded on his father's death in April, 1935

Dune Term applied to slowly moving sandhills formed on the seashore or in deserts by the agency of the wind. Sand dunes on the English coast may rise to the height of 40 to 50 ft., and in the Sahara to over 600 ft. On the Cornish coast the dunes have overwhelmed much cultivated ground, and similar conditions prevail on the Lancashire and E Anglian coasts. In Holland the dunes, partially strengthened, serve to protect the low lying country in the vicinity of the Zuider Zee.

The Battle of the Dunes was fought on the dunes outside Dunkirk between the French and the Spanish on June 4, 1658. The French were besieging the town, then a Spanish possession. On the Spanish side were some English volunteers under James, Duke of York, and on the French side some regiments of Cromwell's Ironsides. Owing largely to the fighting qualities of the Ironsides, France gained a complete victory and captured Dunkirk.

Dunedin City and seaport of New Zealand. In South Island it stands on Otago Harbour, and is connected by railway with the interior. From it steamers go to Sydney, Melbourne and elsewhere, although the larger ones only come up to Port Chalmers, 8 m away. Here is a university which is part of the University of New Zealand. The industries include refrigerating works, and the manufacture of woollen goods, boots, etc. Dunedin was founded by Scottish Presbyterians in 1848, and developed owing to the opening of the Otago gold mines. The name Dunedin is sometimes used poetically for Edinburgh. Pop. (1932), 87,400

Dunedin Viscount. Scottish lawyer. Born in Perthshire, Nov 21, 1849, Andrew Graham Murray was the son of a lawyer. He went to Harrow and Trinity College, Cambridge, and in 1874 became an advocate. In 1891 he entered Parliament as Unionist M.P. for Bute-shire, and he was made Solicitor General for Scotland, 1891-92. Again in 1895-96 he held that position, and from 1896 to 1903 was Lord Advocate. From 1903-05 he was Secretary for Scotland, and from 1905 to 1913 President of the Court of Session, becoming a Lord of Appeal in 1913. He was made a viscount in 1926 and retired in 1931.

Dunfermline Royal burgh of Fifeshire. It stands on the Firth of Forth, 17 m from Edinburgh on the L.N.E. Rly. The burgh was a residence of the kings of Scotland. Here Charles II signed the Solemn League and Covenant. The chief industry is the manufacture of fine linen damask. The burgh includes Rosyth, and a garden city. It was the birthplace of Andrew Carnegie and is the headquarters of the Carnegie Trusts. One of these provides a large annual sum to be spent on improving the burgh. Pittencrieff Glen is public property. Pop (1931) 34,951

DUNGANNON

Dungannon Market town and urban district of Tyrone, N Ireland. It is 40 m to the west of Belfast, on the G N (Ireland) Rly. Pop, 3830.

Dungarvan Market town, urban district and watering place of Waterford, Irish Free State. It stands on Waterford Bay, 28 m from Colligan River. 120 from Dublin where the Colligan enters the sea. It is a fishing centre and has an export trade. Across the river is Abbey side, with a castle now used as a barracks. Pop, 5300.

Dungeness Promontory on the south coast of Kent. It juts out into the English Channel not far from Rye. On it are a lighthouse and a coast guard station. In 1652 there was a sea fight near here between the English and the Dutch fleets.

Also, port of Queensland. Situated on the Hinchinbrook Channel, it exports sugar which is brought down the river Herbert. It is about 940 m north of Brisbane.

Dunkeld Town of Perthshire. It stands on the Tay, 15 m from Perth, on the LMS Rly. The chief building is the church, once the choir of the cathedral, which was destroyed at the Reformation. Other parts of the building are in ruins and are national property. Near is Birnam. Dunkeld House is a seat of the Duke of Atholl. Pop, 1050.

Dunkirk Beacon or hill of Somerset from Porlock. It is on Exmoor, about 5 m. It is 1700 ft high and about 12 m round, and is the highest point on Exmoor.

Dunkirk Seaport of France, near the Straits of Dover, on the frontier of Belgium. It has two harbours, well equipped with docks and quays, and there is a constant service of steamers with London, on, and elsewhere. Shipbuilding is carried on, and there are some manufactures. The name means the Church in the Dunes and in 1658 the Battle of the Dunes took place just outside it. See DUNE.

Dunkirk was long part of the Spanish Netherlands, afterwards passing to France. It was bombarded during the Great War by the Germans. Its modern prosperity is due to its nearness to the great industrial area of Belgium and N E France. Pop 39,000.

Dunlin Name sometimes given to the red backed sandpiper.

Dunlop John Boyd, British inventor, born, Ayrshire, and for many years practised as a veterinary surgeon in Belfast. In 1887 he devised a pneumatic tyre which he patented in the following year, although an earlier form of pneumatic tyre had been the subject of a patent in 1840. In 1890 Dunlop sold his patent to William Harvey Du Cros (q.v.) and a company was formed for its commercial exploitation. The successor of this still bears his name and Dunlop tyres are known all over the world. He died Oct. 23, 1921.

Dunmore Earl of Scottish title borne since 1686 by Lord Charles Murray. The 1st earl was a Marquess of Atholl, who took his title from a village in Strirlingshire. The 3rd earl, fought for the Jacobites in 1745. Alexander, the 8th earl, won the V C in 1897, when Viscount Fincastle, a title borne by the eldest son of the earl.

416

Dunmow

Two places in Essex. Great Dunmow is a market town on the Chelmer, 8 m from Braintree and 40 from London. It is on the L N E Rly, and is a hunting centre. Near is Easton Lodge, the residence of the Countess of Warwick. Pop 2800.

Little Dunmow, also on the Chelmer, is about 2 m away. It is noted for the custom, paralleled elsewhere, and long observed here, of giving a fitch of bacon to any married couple who can publicly prove, having been married for a year and a day, they have not regretted the union. The examination is now held at Ilford.

Dunne

Finley Peter American humorist, known as the creator of *Horn* in Chicago in 1867. He became a journalist. He made his name by contributing to *The Chicago Times* sketches of a humorous kind under the name of Martin Dooley. He represented Dooley as an Irish American who commented, in his own vivacious way, on the happenings of the day. The sketches have been published as *Mr Dooley's Philosophy*, and under other titles.

Dunnottar

Town of Kincardineshire. It is about a mile from Stonehaven and is famous for the ruins of its castle. One of the strongest in the country, it was besieged several times before it was dismantled in 1715. The ruins, which overlook the sea, are extensive and picturesque. Pop 2250.

Dunois

Jean French soldier. Born in Paris, Nov 23, 1402, he was a natural son of Louis, Duke of Orleans, a brother of Charles VI, and was known as the Bastard of Orleans. He became a soldier, was given a high command and soon made himself famous. He defended Orleans until it was relieved by Joan of Arc, and then entered upon a career of conquest. Gradually he drove out the English, a landmark in the campaign being the taking of Chartres in 1432. In 1450 he finally expelled them from Normandy and later from Guienne. His exploits made the Bastard a national hero before he died, Nov 24, 1408.

Dunoon

Burgh and seaside resort of Argyllshire. Situated on the Firth of Clyde. The burgh incloses Kilmartin and Hunter's Quay, the latter, situated at the entrance to the Holy Loch, is a fashionable yachting centre. There is a regular steamer service from Greenock and other places along the Clyde. Highland Mary was born here. Pop (1931) 8780.

Dunraven

Earl of Irish title held since 1822 by the family of Wyndham Quin. It began with Valentine R Quin an Irish landowner who was made a baron in 1800 and an earl in 1822. Henry, the title of Dunraven because his son, Henry, was married to the heiress of Giamorganshire ham of Dunraven Castle, in 1824. His son Henry became the 2nd earl in 1850, Edwin, who became a spiritualist. Windham Thomas, who became the 4th earl in 1871, was a soldier and a war correspondent. Later he was prominent as a politician especially in Irish affairs but he is best known as a yachtsman as he built yachts to compete for the America Cup. He died in 1926, and was succeeded by a cousin. The

DUNRAVEN

earl's eldest son is called Viscount Adare and his seats are Adare Manor, Limerick, and Dunraven Castle, beautifully placed overlooking the sea near Porthcawl

Dunrobin Castle in Sutherlandshire, the chief seat of the Duke of Sutherland. It stands on the coast of Dornoch Firth, not far from Golspie. A magnificent modern building, it occupies the site of an older castle. There are two brochs, or round towers, and a museum in the grounds

Duns Burch and market town of Berwickshire also the county town. It is 55 m from Edinburgh, on the L N E Rly. Near is Duns Law, a hill 700 ft high. Pop (1931) 1788

Dunsany Baron. Irish title held since 1439 by the family of Plunkett. Sir Christopher Plunkett, a landowner in Co Meath, was the first holder, and it passed from one to another of his descendants until it came to Edward John Plunkett as the 18th baron. He was born July 24, 1878, and became a soldier, but is better known as a writer. His works include many novels and stories, and some successful plays including *The Glittering Gate* and *A Night at an Inn*. The family seat is Dunsany Castle in Co Meath

Dunsinane One of the Sldlaw Hills, Perthshire. It is 8 m from Perth, and is famous for its mention in *Macbeth*. Here the king is supposed to have been defeated by Earl Shward. An ancient fort on it is called *Macbeth's Castle*

Dunsink Village of Co Dublin, Irish Free State. It is 4 m to the NW of Dublin and is the site of the observatory of Trinity College, Dublin, which dates from 1785

Duns Scotus Friar, and one of the most influential of the mediaeval schoolmen. He was born probably at Duns, Berwickshire, and became a teacher at Oxford, where he was connected with Merton College. He became a Franciscan and went to Paris, where his skill in controversy gained for him the title of Doctor Subtilis. He died in Cologne Nov 8, 1308. Scotus was the founder of Scotism, metaphysical doctrines which long struggled for the mastery against Thomism, the theological doctrines of S Thomas Aquinas. The word dunce was first applied to his followers because of their resistance to the "new learning"

Dunstable Borough and market town of Bedfordshire. It is 37 m from London, on the L M S and L N E Rlys. In S Peter's Church, Cranmer pronounced the divorce of Catherine of Aragon. The hills near are called Dunstable Downs. Pop (1931) 8972

Dunstaffnage Castle of Argyllshire. It is 3½ m from Oban overlooking Loch Etive. The ruins are those of a building of the 15th century, but there was a castle here at a much earlier date. In it the early kings of the Scots lived and the Stone of Destiny was kept. The castle was long a seat of the Stewarts of Appin

Dunstan English saint and prelate. Born at Glastonbury in 909 he went to the abbey school there and then to the court of King Athelstan. Later he returned to the abbey and became a monk. In 947 he was chosen abbot and soon became the chief adviser to King Edred. On Edred's

death in 955 he was exiled, but returned when Edgar became king of part of England in 957. The King made him bishop of Worcester and in 959 of London also, and he remained the principal minister of Edgar and also served his son Edward. In 979 he retired, and on May 19, 988, he died at Canterbury. He was made a saint, many churches are dedicated to him

Dunster Market town of Somerset. It is 23 m from Taunton and 2 from Minehead, on the G W Rly. Dunster Castle, long the seat of the Luttrells, stands on a hill above the town in large grounds. The chief buildings are the church, the barn market and the Luttrell Arms. Pop 1380

Dunsterville Lionel Charles English soldier. Born Nov 9, 1865, he was educated at Westward Ho College and entered the army in 1884. Later he transferred to the Indian Army and saw active service on the frontier and in China. In 1918 he was in command of the force that went from Mesopotamia to Baku to save the oil wells there. He wrote an account of this called *The Adventures of Dunsterforce*. Dunsterville, who is the hero of Kipling's *Stalky & Co*, wrote also *Stalky's Reminiscences*

Dunwich Village of Suffolk. On the North Sea, 4 m. from Southwold, it was in Anglo Saxon days an important seaport and the seat of a bishop. The harbor and buildings have been destroyed by the inroads of the sea

Duodecimal Method of computation of a scale into twelve equal parts. It is used in building and engineering calculations. Thus a foot is divided into twelve inches or primes, these into twelve parts or seconds, and similarly into thirds or fourths. A distinction is made between square and cubic feet by using the terms superficial and cubic primes, etc

Dupleix Joseph François French colonial statesman. Born at Landrecies, Jan 1, 1697, he was the son of a merchant and in early life went to India for purposes of trade. About 1720 he settled there and soon became an official of the French E India Co. He rose in the service, and in 1742, as Governor of Pondicherry, became the head of French India. Here he aimed at making France supreme in India. The war that broke out with Britain in 1744 gave him an opportunity. He prevented the English from obtaining Madras and held Pondicherry against them

Although peace was made in 1748 the struggle between the Powers continued unofficially, and by controlling the native rulers he greatly extended his power. Clive however, checked him and in 1751 he was recalled and disgraced. He died Nov 10, 1763

Duquesne Marquis French sailor. Abraham Duquesne was born at Dieppe in 1610 and became a sailor, like his father, who was killed in fighting the Spaniards. He himself made his reputation in sea fights against the same foe. In 1643 he took a command in the Swedish navy which he led against the Danes. Again in the French service he forced Bordeaux, which had been seized by rebels, to surrender in 1650. His services were again in demand in 1672 when war broke out with the Dutch. He won several fights, the greatest being in April,

1676, when he defeated the combined Dutch and Spanish fleets off Sicily, in an action in which De Ruyter fell. For this he was made a marquis. Before his retirement in 1684, he led a fleet to bombard Algiers. Duquesne died Feb 2, 1688.

Dura Buried city of Syria. It is on the Euphrates and was discovered by some British soldiers in 1920. Traces of Greek and Roman civilisation have been found, including some fine sculptures. The excavation of the site has been undertaken by an expedition from the University of Yale.

Duralumin Trade name for a series of alloys of aluminium, copper, magnesium and manganese. It is used largely in aircraft work on account of its lightness, strength and hardness. In compound duralumin zinc and nickel are added, and this alloy has age hardening properties, becoming harder when allowed to stand for a few days after heat treatment.

Durazzo Town and seaport of Albania. It stands on the Adriatic Sea, 60 m from Scutari. A very ancient place, it is connected with Tirana by road and railway. Durazzo, called Dyrrhachium by the Romans, was an important port when part of their empire. In 1601 it passed to the Turks under whom its decay was hastened. In 1913 it became part of Albania, and was for a short time the country's capital. It was occupied by the Italians and then by the Austrians during the Great War. Pop (1930) 8 739.

Durban Seaport of Natal, Union of S Africa. It stands on Durban Bay, 812 m by sea from Capetown and 509 m by rail from Pretoria, and is the terminus of a railway line that runs through Natal into the Transvaal. The city is well supplied with parks and open spaces and has zoological and botanic gardens. There is a harbour adapted to the needs of modern shipping and Durban is the only port of consequence between Delagoa Bay and E London. The chief industries are connected with the shipping and distributing trades. It is the commercial capital of Natal and also a whaling centre. Durban is a popular watering place, Ocean Beach being the quarter devoted to this purpose. The city was founded in 1824 and is named after Sir B D Urban, its first governor. Pop, 151,000.

A small town of Cape Province 6 m from Capetown is called Durbanville.

Durbar In India a state ceremony. The word really means an audience chamber. Later it came to be used for the council of a prince or for his officials collectively. It was also used for receptions held by the princes or by the viceroy, and finally for the ceremony held to proclaim a new emperor. Magnificent durbars were held in 1903 and 1911 to proclaim King Edward VII and King George V as Emperors of India.

Durer Albrecht German artist. Born at Nuremberg, May, 21, 1471, he assisted his father, a goldsmith, but soon forsook that calling to study under Michael Wöhlgemut, the foremost artist in the city. Afterwards he spent some years in travel, visiting Venice and meeting Raphael. In his earlier years he devoted much of his attention to engraving on wood and copper, but after a second visit to Venice he concentrated on painting. Towards the end of his life he went to the Netherlands where Charles

V made him a court painter. He died in Nuremberg, April 6, 1528. His home there is now a Dürer Museum.

Dürer's engravings on copper reveal a remarkable power of drawing in detail and richness of invention, seen especially in *The Knight, Death and the Devil*, *The Great Horse and the Little Horse* and *The Arms of Death*. His woodcuts, which include a series on the Apocalypse, and some done for the Emperor Maximilian, are scarcely less notable, but his portrait paintings, while showing great skill in technique, are somewhat hard and severe. His paintings include *Adam and Eve*. The British Museum has a fine collection of Dürer's work.

Durfey Thomas English sign writer and dramatist. Born at Exeter in 1633 of a Huguenot family he soon began to write. He made a name with some comedies notably *The Fond Husband*, *Madame Fickle* and *Sir Burnaby Whig*. Durfey also wrote many songs, collections of which were published, one as *Wit and Mirth or Pills to Purge Melancholy*. He died Feb 26, 1723.

Durham County of England. In the north of the country, it is between the Tyne and the Tees, with a coastline of 33 m on the North Sea. In the west it is hilly and has much beautiful scenery, in the centre and east it is a densely populated industrial area with rich coal mines. The chief rivers are the Tees and the Wear. Durham is the county town, but several others are larger, these being chiefly in the industrial area along the Tyne and the Tees such as Gateshead, S Shields and Stockton. Sunderland and the Hartlepoons are large seaports. Other places are Jarrow and Darlington. Bishop Auckland and Barnard Castle are among the places with historic associations. The county has many populous urban districts. The L N E Rly serves the county. Ten members are returned to Parliament. It is in the diocese of Durham and covers 1013 sq m.

Durham, owing to its position, was long a county palatine, its ruler being the bishop. He had his own courts and enjoyed great authority, a title of which was retained as late as 1836. Pop (1931) 924 050.

Durham City, market town and the county town of Durham. It is on both sides of the Wear, 254 m from London and 14 from Newcastle and is reached by the L N E Rly. The chief buildings are the cathedral and the castle, both standing high on land almost surrounded by the river. The cathedral, one of the most magnificent in England, has many features of interest, including the Galilee Chapel, the towers, the cloisters and the relics of S Cuthbert. The castle, now used by the university, was once the residence of the prince bishops of Durham. Extensive restoration work was undertaken in 1937. Near it on Palace Green, are other buildings erected for the university. The city has some old and interesting churches one being S Oswald's. The bridges across the Wear, especially Framwellgate, Prebend's and Elvet, are worthy of notice. Durham has some manufactures, but its chief trade comes from its position as a county cathedral and university town. Pop (1931) 16 223.

The University of Durham was founded in 1832. It consists of two parts. The older is at Durham, where it is closely associated with the Church of England, and consists of

University College and several halls. The system is residential and there are hostels for women students. At Newcastle there is Armstrong College and the College of Medicine. The university has a marine biological station at Cullercoats, agricultural research stations and an observatory.

The Durham Light Infantry is a regiment of the British Army. It consists of the 68th and 106th regiments of foot, the former of which dates from 1756. The regiment has a fine record of service and its battalions did splendid work in the Great War. The depot is at Newcastle-on-Tyne.

Durham Earl of English title held by the family of Lambton. The 1st earl was John George Lambton, a member of a family that had held land in Durham for centuries. He was born April 12, 1792, and succeeded to his father's estates when young. In 1813 he entered Parliament as M.P. for Durham and his advanced opinions made him known as "Radical Jack." In 1830, having been created a peer he was made Lord Privy Seal, and as such he had a good deal to do with the passing of the Reform Bill. In 1833 he left office and was made Earl of Durham. In 1835 he went as Ambassador to St Petersburg and in 1837 as Governor-General of Canada. He soon resigned, but his term of office is memorable because of the *Report* which he prepared. This recommended the union of the two Canadas, and other measures, which were subsequently carried out. He died July 28, 1840.

The earl was succeeded by his son, George, and in 1879 by his grandson, John George, born in 1855. He was Lord Lieutenant of Durham and Chancellor of the University. He died in Oct., 1928. His twin brother F. W. Lambton, then succeeded to the title and estates but died a few weeks later. His son, John then became the 5th earl. The earl's seat is Lambton Castle, Durham, and his eldest son is Viscount Lambton.

Durian Tree of the mallow order. It is a native of the islands and the archipelago of Malaya, where it is widely cultivated for its fruit. This contains a delicious, almond flavoured, custardy pulp which is highly esteemed by the natives, although when unrefreshed it emits offensive odours. The chestnut-like seeds are eaten roasted or pounded. The fruit is prickly and about the size of a coconut, the tree grows to about 90 ft.

Dursley Town of Gloucestershire. It is 22 m. from Gloucester and 129 from London, on the L.M.S. Riv. Agricultural implements are made here. Pop. 2601.

Duse Eleonora Italian actress. She was born Oct. 3, 1859, near Venice, and after juvenile successes made her mark in 1879. In 1883 she achieved international fame in *La Dame aux Camélias*. She was intellectual, influenced by Arrigo Boito, and a sincere helper of Italian drama as exemplified by Gabriele D'Annunzio. Her successes in England include "Paula" in *The Second Mrs. Langueur*, and "Nora" in *A Doll's House*, and many others in France and Italy. She retired in 1909, but reappeared in 1921, and died in America, April 21, 1924.

Dusseldorf City and river port of Germany. It stands on the Westphalian coalfield where the Düsselbach

falls into the Rhine. It is 24 m. from Cologne and is an important railway junction. Its many fine buildings include the former palace of the electors palatine, the law courts, the exhibition halls and the library. The city is well provided with parks, squares and promenades. Two bridges cross the Rhine here. One, opened in 1929, connects Düsseldorf with Neuss.

The city is famous as an art centre. The chief collections of pictures are in the academy of art and the municipal art gallery. There is a zoological garden and a stadium that will hold 50,000 people. Düsseldorf has a harbour but of greater importance are its manufacturing industries. These include iron and steel goods and chemicals. It is also a banking centre. Some of the buildings erected for business purposes are fine examples of modern architecture. Pop. 460,000.

Dust Particles of solid matter. They are present in the atmosphere from various causes. Dust of terrestrial origin is carried into the atmosphere by ascending air currents and consists of particles of soil or rocks, minute organisms, pollen of plants, particles from burning fuel, factories, etc. Some dust is of volcanic origin—that from the eruption of Krakatoa, near Java in 1883 coloured the sunsets for a couple of years—whilst cosmic dust is derived from meteorites. The formation of rain, mist and fog depend upon dust particles acting as nuclei around which moisture condenses.

Dutch Auction Form of auction in which the sales man at first offers objects at prices higher than he is prepared to accept. He lowers the price gradually until reaching one which a purchaser accepts, the object being knocked down to the first bidder at that price. Should no bid result on reaching his minimum the object is withdrawn.

Dutch Metal Brass alloy containing a larger proportion (about 92 to 97 per cent) of copper than ordinary brasses and having a gold colour and high malleability. Dutch metal may be hammered out into thin sheets or leaves of less than $\frac{1}{32}$ of an inch in thickness and consequently is used as a substitute for gold leaf for gilding cheap articles. It is, however, liable to blacken with moisture or from atmospheric impurities. The varying shades of colour in Dutch metal are due to different proportions of copper in the alloy.

Dutch Reformed Church

Protestant body in the Netherlands, S. Africa and the United States. It is an offshoot of the National Church of the Netherlands founded by early Dutch settlers in the United States when they first became independent of the mother church. It is Calvinistic in doctrine and Presbyterian in church government. There is a Dutch Reformed Church at Austin Friars, London, E.C.

Dutch Wars Naval wars between England and the United Provinces. The first war broke out in 1652, ostensibly because of Holland's diplomatic refusal to England, really because of the intense commercial rivalry between the two countries, especially in the North Sea and the East Indies. The First and Second Dutch Wars, 1652-1654 and 1664-1667, were purely trade wars. In the first, Admiral Tromp considerably injured English naval prestige, until Admiral Blake

defeated him in 1653. The war ended with the Treaty of Westminster (1654) and the Peace of Breda (1667) respectively. The Third War (1672-74) was bound up with continental politics, and the Dutch, under William of Orange, eventually forced England to make peace.

Duty A form of tax. The taxes on beer or whisky and on certain imports, such as tobacco, watches, motor cars and matches, are called duties. Those on beer and whisky, being collected on goods made in the country, are called excise duties. The others, being on imports, are called customs duties. See CUSTOMS, EXCISE.

Duval Claude. Famous highwayman. Born in Normandy in 1643, he settled in England about 1680, and was at first a servant of the Duke of Richmond. Later he became a highwayman and his exploits on the road made him feared and renowned. He evaded capture for some years, but in 1670 he was taken when drunk in a London inn, and was hanged at Tyburn.

Duveen Sir Joseph Joel. English art dealer. By birth a Dutchman, he was born in 1843. Having settled in England, he became a dealer in antiques in Hull, and a naturalised Englishman. In 1877, with his brother Henry, he founded the firm of Duveen Brothers and they were soon among the leading picture dealers in London and New York. Duveen was knighted just before his death, Nov. 9, 1908. He presented a Turner annex to the Tate Gallery and several pictures to the nation.

His son, Joseph, born in 1889, entered his father's business. He built additions to the Tate and National Galleries, and was made a baronet in 1926. In 1930 he assisted Mr S. Courtauld to establish a national institute of art.

Dux (Latin, a leader). Word meaning a leader or chief. It is used in this sense in some schools for the head of the school, or of a form or class.

Dvina Name of two rivers of European Russia. The Northern Dvina flows north for about 360 m. It passes Archangel and empties itself into the White Sea by five mouths. It is navigable during the summer months.

The Western Dvina rises in Russia and passes into Latvia, falling into the Gulf of Riga, 9 m. from the city of that name. It is navigable and is part of the continuous waterway, helped by a canal between the Baltic and the Black Seas. There was a good deal of fighting along this river between the Germans and the Russians during the Great War.

Dvinsk Town and river port of Latvia. It stands on the W. Dvina and is an important railway junction. It began as a post of the Tentonic Order, later becoming part of Poland. In 1773 it was taken by Russia, and in 1920 was given to Latvia. There is a trade in grain and other commodities, but this is much less considerable than it was before 1914 and the population has declined by more than half. Its other names are Dünaburg and Dangavpils. Pop. (1930) 43,226.

Dvořák Antonín. Bohemian composer. Born Sept. 8, 1841, he studied music at Prague and won recognition as a composer with his Slavonic dances. In 1892 he became head of the National Conservatoire of Music at New York, and in 1901 head of the conservatoire at Prago. He died May 1, 1904. Dvořák wrote a good deal of music in

which he interpreted the spirit of his own people. This included the *Stabat Mater* and a cantata.

Dwarf Term applied to man and to animals and plants when below the normal height. Certain races of mankind are of short stature, as for example, the Bushmen of South Africa, with an average height of 4 ft. 7 in., and the Akkas or Pigmies, of Central Africa, about 4 ft. 10 in. in height.

Dwarf Trees which may bear flowers and fruit are cultivated in China and Japan by a system of root pruning and reduction of the water supply.

Dyak Aboriginal people of Borneo. Some of them still live in pile huts made of bamboo and use blow guns. They were chiefly known as head hunters, but this practice has now been suppressed.

Dyarchy Term meaning government by two elements in the state. It came into use in the 20th century when changes in the government of India were under discussion. Dyarchy was introduced when the constitution was altered so as to allow Indians to share the government with the British.

Dyeing Art of imparting colour to textile and other materials. It is therefore an important auxiliary to certain manufacturing industries, notably cotton. Various substances of vegetable origin have been used, and still are to a limited extent, as dyestuffs for fabrics, but although brilliant in colour these are more or less fugitive in character. Within recent years, however, the introduction of coal tar derivatives as dyestuffs has led to the disuse of most natural dyes except for special purposes, as the synthetic products give a wider range of tints and great permanency.

The chief vegetable dyes are indigo, fustic, logwood, archil and annatto, some of these being used for staining wood as well as textiles, and others like annatto and turmeric for colouring foodstuffs. Substantive dyes are those which unite directly with a fabric while adjective dyes require a mordant—a metallic salt which unites with the dyo to form an insoluble pigment or "lake".

To protect the industry an Act was passed in 1921, forbidding the import of dyestuffs into Great Britain except under licence. It was to last for ten years and under it a virile and progressive dye industry has been established in Britain. The Board of Trade has a Dyestuffs Industry Development Committee, and there is an advisory licensing committee in Manchester.

Dyer's Greenweed Common name of *Genista tinctoria*, a leguminous plant common in England and Central Europe. It was used formerly as a dye producing plant. The flowers yield a bright yellow dyo which, when mixed with a solution of wood, gives a green colour known as Kandal green. It is now superseded by more permanent coal tar dyes.

Dyke Term applied to an embankment erected on a river bank or on the sea shore to prevent the flooding of the adjacent land. These are seen in low lying countries, such as Holland, the fen districts of England and the Mississippi region in N. America. In Holland the sea dykes are of great size and length, and are strengthened by blocks of granite and basalt, while the river dykes of lesser size are supported in places by piles or masonry. Often a dyke, a dyke of

another kind, was built probably by Offa, King of Mercia, to keep out the Welsh

Dymchurch Village and seaside resort of Kent. It is 4 m from New Romney and was once famed for its smugglers. Dymchurch Wall is an embankment built to keep the sea from Romney Marsh. Pop 700

Dymoke English family which holds the office of king's champion. John Dymoke champion at the coronation of Richard II, held the office as Lord of the Manor of Scrivelsby, Lincolnshire. Since then the championship has remained in the family, but it is now an honour only.

Dynamics Branch of physical science dealing with the nature of motion and the laws governing movement. It has its foundation in Newton's laws of motion, which state that force is necessary to change a state of rest or uniform motion, that change of momentum is proportional to the force applied, and that there is an equal and opposite reaction to every action.

Dynamite Powerful explosive. Used chiefly for blasting purposes, it consists of 75 per cent of nitro-glycerine and 25 per cent of kieselguhr, the latter substance (a siliceous diatomaceous earth) being used as an absorbent. The mixture, after being kneaded and passed through a sieve, forms a reddish-brown grainy powder, which can be burned without danger, but explodes violently with a detonator. To a large extent the original formula has been replaced by gelatin dynamites in which gun cotton takes the place of kieselguhr.

Dynamo Generator of electric current in which mechanical energy is converted into electrical energy. The essential parts of a dynamo are the magnets and the armature with which are connected the commutator, and stationary brushes. The armature consists of a series of wires or conductors arranged around an iron core mounted on a shaft. It is rotated near the poles of a powerful magnet, and the current generated as the conductors cut the magnetic field carried from the armature by brushes of copper wire, or carbons rubbing on the commutator, to be used for lighting purposes or power.

Dyne Term used in physics. It is the unit of force, which, acting upon a mass of one gramme, will produce an acceleration of one centimetre per second every second. The erg or unit of work represents the work done in overcoming a force of one dyne through a distance of one centimetre.

Dysart Royal burgh and watering place of Fife-shire. It is on the Firth of Forth, 28 m from Edinburgh on the L N E Ry. At one time coal was shipped from here but in 1928 the harbour was closed. Pop 4600.

The title of Earl of Dysart is borne by the family of Tollemache. It was given in 1643 to William Murray, whose daughter married Lionel Tollemache. She became Countess of Dysart on her father's death and the title has since remained with their descendants. The earl's seat is Ham House, Petersham, and his eldest son is called Viscount Huntingtower.

Dysentery Infectious disease. It is associated with inflammatory irritation of the lower bowels, sometimes with ulceration. It may arise from a specific bacillus, entering the body in food or drinking water and occasionally presenting malarial or scorbutic complications. Tropical conditions emphasize it, great epidemics sometimes ravage armies or closely-settled communities. Ipecacuanha is sometimes efficacious, with frequent irrigation and saline administrations. Death may supervene in a few days, or the disease may recur chronically for years.

Dyson Sir Frank Watson, English astronomer. Born, Jan 8, 1866, the son of a Baptist minister, he was educated at the grammar school, Bradford and Trinity College, Cambridge, where he was second wrangler. In 1894 he became assistant at the Royal Observatory, Greenwich, and in 1905 he was made astronomer royal for Scotland. After five years in Edinburgh, he returned to Greenwich as astronomer royal. In 1901 Dyson was elected F R S, in 1915 he was knighted, and in 1928 received the K B E.

Dyson William Henry ('Will Dyson'), Australian cartoonist. Born at Ballarat in 1883, he was educated at Melbourne. He settled in London, and made a reputation by his cartoons in *The Daily Herald*.

Dyspepsia Word meaning indigestion. It vaguely denotes a group of symptoms involving impaired power of digestion and various forms of gastric derangement, not necessarily limited to the discomfort occasioned by food remaining in the stomach. It is sometimes definitely diagnosable as acute or chronic gastritis, gastric ulcer or as symptomatic of a general disease. Functional or nervous dyspepsia, due to abnormal activity, retardation or modification of the digestive processes, may occur in heavy drinkers or persons subject to constant exhaustion or mental depression. Acute dyspepsia may be due to single serious errors of diet, as eating unripe fruit, unripe or excessive food, or indulging in alcoholic excess.

Dysprosium Very rare metallic element. It was discovered in 1866 by spectroscopic examination of certain rare earths. Its symbol is Dy and it has an atomic weight of 162.5. It is found in the minerals gadolinite and euxenite associated with other rare elements, and its compounds show a strong absorption spectrum.

EAGLE Heraldic symbol. It dates from Persian, Egyptian and Roman times, and was used by Charlemagne, remaining on the imperial arms until the dissolution of the Holy Roman Empire in 1806. Russia, as the successor of the Greek Empire, and Austria used a double-headed eagle. Germany, which took the symbol in 1871, used a single-headed one.

As an American emblem the eagle was used by the Indians, and adopted by the United States as a national emblem, with a single head and in its talons arrows and an olive branch. The republic of Mexico has placed the eagle on its arms.

The eagle is the name of a gold coin of the United States. It is worth ten dollars.

Eagle Large bird of prey. Its feathered head, short sharply-hooked bill and habit of preferably killing its own prey distinguish it from the unfeathered head and longer bill of the vulture. The golden eagle, rarely seen in England, comes from Scotland or Ireland, where it builds its nest in inaccessible cliffs. It is about a yard long and will attack lambs, though usually it feeds on rabbits and hares. The orme, or sea eagle, formerly bred in Scotland. There are many varieties in other parts of the world. A large owl occasionally seen in Great Britain is called the eagle owl. It is about 2 ft long and will attack rabbits and fawns.

Ealing Borough of Middlesex. It is 6 miles from Paddington by the G.W. District, and Central London Rly. Ealing Common and two parks, Walpole Park, and Petrolia Park, provide open spaces, and Gunnersbury Park, the old residence of Leopold de Rothschild, is shared with Acton. In 1901 Ealing was made a borough and Hanwell and Greenford were incorporated in 1926. Pop. (1931) 117,688.

Ear Organ of hearing. The human ear consists of three parts: outer, middle and inner. The outer ear, which consists of the pinna or auricle and the meatus, is of little importance, at least in man. In the meatus, the wax, which is dried excretion accumulates and may impede hearing. The middle ear, separated by the ear drum from the outer ear, has a close relationship with the brain and the throat. Any inflammation of this part of the ear may therefore be highly dangerous. The inner ear, separated by a membrane from the middle ear, is filled with fluid and in it is the cochlea, where the nerve of hearing ends.

The ear is subject to a number of diseases and complaints. Somewhat affect the hearing, which usually becomes a little harder with advancing years, or may be impaired in the case of artillerymen and others who experience loud noises. Others are of an inflammatory nature and may be dangerous to life. The Royal Ear Hospital is in Hantley Street, London W 1. See DEAFNESS.

Earache This may generally be relieved by external heat, or a few drops of warm glycerine may be dropped into the ear passage which is then closed with cotton wool. If the pain is severe, use a few drops of a mixture of glycerine of carbolic and pure glycerine (1 in 7), properly mixed by the chemist.

Persistent earache or earache accompanied by a discharge or tenderness behind the ear should have immediate medical attention.

Earl Title in the British peerage. It ranks third, but historically is the oldest of all. Its equivalent in some countries is count, and an earl's wife is called a countess. An earl's eldest son bears his father's second title, the other sons use the word honourable and the daughters lady before the Christian name. The Earl of Arundel, a title of the Duke of Norfolk, is the premier English earl, the Earl of Crawford and Balcarres is the premier Scottish one.

The first earls appeared in Anglo-Saxon times. Soon they were rulers of parts of the country, e.g., Earl Godwin. The office continued in Norman times and each county had its earl, who was entitled to a third part of its revenues. Soon the office became hereditary, but after a time the connection between earl and county was broken and it became simply a title of honour.

Earlestown Market town of Lancashire. It is 187 m from London and 5 from St. Helens and is a junction on the L.M.S. Rly. The industries include railway works. Its early name was Newton Junction. Pop. 9000.

Earl Marshal English officer of state. He is the head of the College of Heralds and his duties are chiefly concerned with the arrangements for coronations and other state ceremonies. The office is an old one and since 1672 has been held by Dukes of Norfolk. There were formerly Earl Marshals of Scotland and Ireland. In Scotland, till 1716, the office of Earl Marshal was held by the family of Keith.

Earl's Court District of London. In the borough of Kensington. It is famous for the exhibitions held here from 1884 until 1914. During the war period the place was used for refugees.

Earlsfield Suburb of London. It forms part of the metropolitan borough of Wandsworth, and is on the S. Rly.

Earlston Market town of Berwickshire. It is on Leader Water, 72 m from Edinburgh, on the L.N.E. Rly. Fairs are held and there are small manufactures. Thomas the Rhymer, who is buried here, called it Ereldoune. Pop. 1750.

Earlswood District of Surrey. It is 22 m from London, on the S. Rly. Here is a large institution for the mentally defective.

Early Closing Term chiefly used in connection with shops. Acts were passed limiting the number of hours during which shop assistants could be employed, one being the Shops Act of 1912, providing a weekly half holiday, but earlier closing in the evenings was not made compulsory until 1928. In Great Britain shops must close not later than 8 p.m., except one evening in the week, when they may remain open until 9. Exceptions are where tobacco, sweets and certain foodstuffs are sold. There is an Early Closing Association at 34-40 Ludgate Hill, London, E.C. 4.

Early English Style of Gothic architecture following upon Romanesque or Norman and succeeded by the Decorated. It covers approximately the period 1189-1272. In it wide, round arches became slim, steeply-pointed lancets. Simple four-part vaulting, often ribbed, slender-clustered columns and deeply-hollowed mouldings, filled with dog tooth ornament and conventional foliage, are exemplified in the transepts of Westminster Abbey, the cathedrals at York and Ely and on the west fronts of the cathedrals at Salisbury and Ripon and the Minster at Beverley. In literature, Early English is approximately a contemporary period marking the passage of Old English, or Anglo-Saxon, into Middle English.

Earn Loch and river of Perthshire. The loch, which lies 317 ft. above sea level, is 6½ m. in length. The temperature is so low that the water is said never to freeze. Ardvorlich House, which figures in Scott's *Legend of Montrose* as Darlinvarach, stands on the shore.

The River Earn flows from the foot of the loch and runs eastward, entering the Tay near Abernethy. Bridge of Earn, a village and watering place, is situated on the river about 6 m. from Perth.

Earsdon Urban district of Northumberland. It is 4 m. from N. Shields and coal mining is the chief industry. Pop. (1931) 13,080.

Earth One of the planets. It is between Venus and Mars in the solar system and has one satellite, the moon. It rotates on its axis, causing day and night in 24 hrs., and takes a year to go round the sun from which it is 93,000,000 miles away. Its diameter at the equator is 7,900 m. and its circumference 24,900. Its area is 106,500,000 sq. m. of which only 55,500,000 are land. Its age has been estimated at 2000 million years.

Earth Term applied to the early chemists to certain metallic oxides which were regarded as basic. The alkaline earths were the oxides of calcium, barium and strontium. In relation to pigments used as the basis of oil and water colours, the term earth is used for the ochres, umbers, siennas and terre verte.

In electricity earth is used for some form of conducting apparatus in contact with the ground, the uniform potential of which forms a steady background to electrical changes. In a wireless installation the earthing device may take the form of a metal plate, copper tube or wire mat buried in the soil, or the conducting wire may be attached to a water pipe.

Earthenware Non-translucent pottery, glazed or unglazed. The wares called stoneware, semi-porcelain, faience, stone and granite are earthenware, likewise Roman and Greek tiling and building blocks.

Earth House Primitive underground dwelling of the early prehistoric age. Plentifully distributed between the Tay and Moray Firth, they are sometimes called Picts' houses. Round or rectangular walls of flag- or undressed dry stones converge beehive fashion to capstone roofs beneath artificial mounds. They are sometimes approached by stone paved corridors some 80 ft. long. It is suggested that they were refuges or store-houses connected with timbered surface dwellings. They were occupied during the

Roman occupation of Britain. Similar structures are found in Ireland and Cornwall.

Earth Pillar Isolated column of soft rock capped by a harder mass. It is due to the mechanical action of rain upon beds such as conglomerates, where the rain has washed away the softer material except where protected by an overlying stone. Earth pillars occur in moraines and glacial drifts in the Alps, Scotland and North America.

Earthquake Earth movements. Earthquakes vary from a mere tremor to a violent upheaval and dislocation of the earth's crust. The collapse of underground caverns, powerful stresses set up in strata causing the beds to snap suddenly under the strain, the infiltration of sea water into the deeper parts of the earth's crust, causing explosions in the heated rocks or volcanic action, are among the causes. Most shocks originate along the lower regions adjacent to the great mountain ridges. It is estimated that in an area between Lima in Peru and Valparaiso in Chile there is an average of 15 earthquakes yearly. There was a destructive volcanic disturbance here in 1932.

Two terrible earthquakes of recent years were those in Sicily in 1908, when Messina was destroyed and more than 70,000 persons perished, and in Japan in 1923, when the casualties numbered 200,000. In 1906 there was one at San Francisco. In June, 1931 a distinct earthquake shock was felt in Great Britain. Serious damage was done by earthquakes in China and Italy (1933) and in Quetta (1935).

Earthwork General term for the mounds constructed by early man and marking the site of megalithic settlements. Associated with the larger earthworks are the great stone circles such as Avebury and Stonehenge, and in North America the mound dwellings of Ohio, Wisconsin and Illinois. Some earthworks, such as the barrows, are sepulchral in origin, others were fortifications or underground dwellings. The word is also used for a fortification made of earth.

Earthworm Family of worms living in the soil. The common British species is *Lumbricus terrestris*. Their cylindrical bodies tapering at both ends, comprise segmented rings each bearing recurved hooks with which they burrow in the soil. They swallow this for its organic contents and void the mineral matter as worm cast. Reproduction is hermaphroditic.

Earwig Family of insects. They have short, horny beetle-like forewings which protect thin, membranous underwings folded fanwise and crosswise. The pincer-like appendages, popularly fabled to pierce the ear, are quite innocuous. The female sits on her eggs, watching over the young until their final moulting.

Easement Legal term for a right or a right of light. Another is the right of support, as given by one building to another. In Scots law the equivalent is called servitude.

Easingwold Market town of Yorkshire (E.P.). Here Laurence Sterne wrote the early part of *Tristram Shandy*. Pop. 2030.

East Sir Alfred English artist. Born at Kettering Dec. 15 1849, he studied at the Glasgow School of Art and in Paris. In 1889 he visited Japan where some of his best landscape work was done. His paintings

EAST AFRICA

include "A Passing Storm," in the Luxembourg, Paris, "The Nene Valley," in Venice, and "The Golden Valley," at Leeds. Knighted in 1910, he was elected A.R.A. in 1899 and R.A. in 1913. He died in London, Sept. 28, 1913.

East Africa General term for the eastern part of the continent. It includes three British protectorates, Uganda, Zanzibar and Kenya, as well as the mandated territory of Tanganyika (q.v.), formerly German East Africa. It also includes a large Portuguese possession known sometimes as Mozambique.

German E. Africa was conquered by the British and their Allies during the Great War. Operations began in 1914, but for some time they were not very successful, although the coast was controlled by British ships. In Feb., 1916, General Smuts took command, and the country was gradually subdued, but the last of its German defenders did not surrender until Nov., 1918.

East Anglia District in the east of England. It includes the counties of Norfolk, Suffolk, Cambridge and Huntingdon and sometimes Essex. About 620 A.D. it became a kingdom and there were kings of East Anglia for about 300 years, although most of them were only vassal kings. The most famous was Edmund, who was killed by the Danes in 870.

Eastbourne County borough and watering place of Sussex. It stands on the English Channel, 66 m. from London, and is reached by the Southern Rly. To the west is Beachy Head. The attractions include a parade along the sea front with gardens called the Meads, and a pier. The open spaces include Devonshire, Hampden and Gildredge Parks, as well as the Redoubt. Compton Place is a seat of the Duke of Devonshire who owns much of the land. Pop. (1931) 57,435. Eastbourne College is a public school with accommodation for about 500 boys.

Eastchurch Village of Sheppey, Kent. It is 5 m. from Queenborough, on the S. Rly. It is chiefly known as an aircraft centre. There was an important air station here during the Great War, which later became a gunnery school for the R.A.F.

Easter Ecclesiastical festival commemorating the resurrection of Jesus Christ. The name is derived from the Anglo-Saxon goddess of spring, Celebrated since the 2nd century and depending upon the lunar calendar, Easter Day has varied through the ages. Now it is, briefly, the first Sunday after the full moon following the vernal equinox falling between 22nd March and 25th April both inclusive. A League of Nations committee in 1923 investigated the question of the calendar generally, and in 1928 a law was passed fixing Easter on the first Sunday after the second Saturday in April. In spite of parliamentary support, however, the Act met with considerable opposition, and there is little prospect of its adoption.

Easter Island of the Pacific Ocean. It covers only 60 sq. m. and belongs to Chile, from which it is 2300 m. away. It was discovered on Easter Day, 1722, by a Dutch sailor. It is chiefly famous for a remarkable collection of stone monuments, on which are carvings of human faces and other figures, doubtless the work of prehistoric man. The island, which has a few native inhabitants, is used as a convict station.

Eastern Church Shortened name of the Holy Orthodox Catholic Apostolic Eastern Church. Representing the Christendom established by Constantine in the East Roman Empire, it accepts the general church councils down to the Great Schism and comprises pre-eminently the Greek and Russian, besides the Armenian and Coptic Churches. Its highest dignitaries are the patriarchs at Stamboul, Alexandria, Jerusalem and Moscow.

Eastern Question Name given to political difficulties arising out of the government of areas in south eastern Europe. The conquests of the Turks put large areas, occupied in part by Christians, under the rule of the sultan. In 1774 Russia appeared as the protector of these peoples and gradually they were freed.

In the 19th century the eastern question continually occupied the attention of European statesmen. Greece was freed and in 1878 the Congress of Berlin recognised the independence of Bulgaria, Rumania and Servia. In 1907 Austria annexed Bosnia and Herzegovina, and then came the Great War. After this the Turkish dominion in Europe was reduced to small proportions.

East Grinstead See GRINSTAD.

East Ham Borough of Essex, part of Greater London. It is 6 m. to the east of the city on the L.M.S. and L.N.E. Rlys. The chief industries are engineering and the manufacture of chemicals. Pop. (1931) 142,480.

East India Co. British company formed to trade with India and the East Indies. It was given a charter in 1600 and trading stations were established at Surat, Fort St. George, Madras and Hooghly. From these grew the three presidencies of Calcutta, Madras and Bombay. The company ruled British India until 1784 when its powers were shared with the crown, which set up a board of control. In 1857 its power was wholly transferred to the crown, and in 1858 it was abolished. The company had a house in London in which Charles Lamb worked.

In 1602 Holland established an East India Co. but this came to an end in 1798. France had a company from 1664 to 1794 and Denmark had one from 1729 to 1801.

East Indies Name used for India, Malaya, Indo-China, the islands of Borneo, New Guinea, Java and the lands adjacent thereto. Sumatra, Java and many smaller islands belong to the Netherlands, as do parts of New Guinea and Borneo. These, known collectively as the Dutch East Indies, are under a governor general and since 1925 have had a certain amount of self government in the form of an elected Volksraad. The total area is 733,000 sq. m. and the pop. 52,000,000.

For men who have served in the East Indies there is the East India United Service Club at 16 St. James's Square, London, S.W.

Eastlake Sir Charles Lock, English artist. Born in Plymouth Nov. 17, 1793, he studied in London and Paris and for some years resided in Rome. Elected A.R.A. in 1827, R.A. in 1829, and P.R.A. in 1850 he became the first director of the National Gallery, in which is his great work, "Christ Weeping over Jerusalem." He published a number of books on art. He died at Pisa, Dec. 24, 1865.

A BURNING GHAT AT BENARES

Eastleigh Urban district of Hampshire It is 6 m from Southampton and is an important junction on the S Ry. The main industry is the manufacture of railway stock Pop (1931) 18,333

East London City, seaport and watering place of South Africa In the Cape Province, it stands at the mouth of the Buffalo River and is connected with Capetown 890 m away, by railway The chief industry is shipping Pop 23,200

East Lothian Alternative name for Haddingtonshire (q.v.)

Eastman George American inventor Born at Waterville, New York, July 12, 1854, he was educated at Rochester In 1880 he perfected a process for making sensitive gelatine dry plates In 1884 he patented a photographic roll film and in 1888 a Kodak camera On these and other inventions Eastman built up an enormous photographic business at Rochester His gifts for charitable purposes are estimated at £15,000,000 Rochester received many of these, but they also include a dental clinic in London He shot himself on March 14, 1932

Easton Lodge Residence in Essex It is 8 m from Bishop's Stortford, on the L N E Ry The estate belonged to the Maynard family of which the Countess of Warwick was heiress The house is used by Labour and Socialist politicians for conferences

Eastwood Market town and urban district of Nottinghamshire It is 137½ m from London by the L N E Ry, and a coal mining centre Pop (1931) 5360

Eaton Hall Residence of the Duke of Westminster It stands on the Dee, 4 m from Chester Built in the Gothic style in the 19th century on the site of an earlier hall it contains some remarkable treasures and stands in a park of 400 acres

Eau de Cologne Celebrated perfume It was prepared in the first place by Johann Maria Farina at Cologne soon after 1700 Manufactured at first by a secret process, the perfume is now made in England and other countries, the essential oils of citron, orange, bergamot, neroli, rosemary and sometimes geranium entering into its preparation

Ebbisham Baron English politician George Powland Blades was born April 15, 1868, and entered the family printing business He was elected to the city corporation of London and in 1926-27 was lord mayor From 1918 to 1928 he was Unionist M.P. for the Fpsom division In 1918 he was knighted and in 1922 made a baronet In 1928 he became a peer, as Baron Ebbisham

Ebbfleet Hamlet on the coast of Kent It is 3½ miles from Ramsgate Tradition has it that here Hengist and Horsa landed in 419 and S Augustine in 597 on his mission to convert the Saxons

Ebbw Vale Urban district of Monmouthshire It is 162 m from London by the G W Ry and is situated on a tributary of the Ebbw River It is in a coal mining area but its large steel works were closed in 1930 Pop (1931) 31,695

Ebert Friedrich German politician Born in Heidelberg, Feb 4, 1870, he became a trader there In 1892 he was made editor of a socialist paper at Bremen and he

gradually became one of the leaders of the social democratic party In Nov, 1918, he was one of the small group of socialists who took charge of affairs on the flight of the emperor, signed the armistice and declared the country a republic As provisional president, he called a national assembly which, in Feb, 1920, elected him first president, a position he held till his death in Berlin, Feb 28 1925

Ebonite Hard vulcanised rubber It is made by strongly heating a mixture of crude rubber and 20 to 30 per cent. of sulphur, the product being pressed and polished It is a black, horny substance which is a good non-conductor of electricity and is unaffected by acids or alkalis

Ebony Tree of the natural order *ebenaceae* There are several varieties and in some the fruit is edible The tree grows only in tropical areas, notably in India, Ceylon and parts of Africa Its wood is extraordinarily hard and it is in various colours but the black is the most useful It takes a fine polish and is used for mathematical instruments, walking sticks and sometimes for furniture

Eboracum Roman name of York A legionary fort of 52 acres was established here about A.D. 75 A civil settlement arose and in the 4th century became an episcopal see The Archbishop of York still signs himself Ebor Sec YORK

Ebro River of Spain It rises in the mountains in the north of the country and, flowing mainly east enters the Mediterranean just below Tortosa Saragosa and Toledo are on its banks It is 465 m long and its tributaries include the Huerva, Gallego and Guadalepe

Ecarté Card game It originated in France early in the 16th century It is played by two players with 32 cards those between two and six being discarded Five cards are then dealt to each player and the last turned up as a trump The rules allow the players to discard cards and take up others Play is as at whist and a game consists of five points The ace ranks below the jack, leaving the king as the highest card.

Ecclefechan Village of Dumfriesshire It is 13 m from Dumfries and is portrayed as Entepull in *Sartor Resartus* by Thomas Carlyle, who was born and buried here Pop 670

Eccles Borough of Lancashire It is near Manchester on the Irwell, and is 187½ m from London by the L M S Ry The cakes originally made here have become generally noted The industries are the same as those of Manchester Pop (1931) 44 115

Ecclesfield Town of Yorkshire (W R) It is 5 m from Sheffield, on the L M S and L N E Rlys The parish church of S Mary built in the Perpendicular style was formerly known as the minster, and formed part of a priory The industries include iron and steel works, collieries and paper mills

Ecclesiastes Book of the Old Testament It comprises the discourses and aphorisms of a dependent sage, Koheleth represented as the instructor of a body of disciples His reflections upon nature's eternal routine and the transitoriness of man's life culminate in the assertion "all is vanity."

ECCLESIASTICAL

Ecclesiastical Commission

Body appointed to manage the property of the Church of England. The commissioners include the archbishops, bishops and other prominent men, but the acting commissioners are only three in number. The commission was set up in 1836 and its offices are at 1 Millbank, Westminster, London, S W 1. In 1931 the income managed amounted to over £3,392,000. Of this over £2,403,000 was paid to the clergy, including the archbishops and bishops, and about £615,000 was given to improve the value of livings. The property of the Church of Scotland is also managed by an ecclesiastical commission at 22 Hanover St., Edinburgh.

Ecclesiastical Jurisdiction

Exercise of jurisdiction by ecclesiastics over fellow ecclesiastics and laymen in England. The powers of jurisdiction are now somewhat limited, matrimonial and testamentary jurisdiction, to name only two, having passed from Church to State. The chief ecclesiastical courts in England are (a) the Court of the Vicar General whose function it is to correct manners and confirm bishops, (b) the Court of Faculties which deals with marriage licences, (c) the Chancery Court of York, (d) the Consistory Courts of the various Diocesan bishops situated in their cathedral cities and (e) the Court of Arches, the Ecclesiastical Court of Appeal. Appeal from a judgment of the Court of Arches can only be made to the judicial committee of the Privy Council.

Ecclesiastical Law

The rules governing the rights and obligations of a Church established by law. English ecclesiastical law is derived from common law, canon law, and statute law. Its jurisdiction, formerly exercised over such matters as probate and divorce, has been removed and it now deals only with ecclesiastical matters.

Ecclesiasticus

Alternative title of an apocryphal Old Testament book, *The Wisdom of Jesus the Son of Sirach*. Written originally in Hebrew by the author's grandson made a Greek version after reaching Egypt, 132 B.C. It welds together aphorisms pertaining to practical morality, praises of wisdom, nature and mighty men. Fragments of the Hebrew version, rediscovered from 1896 onwards, have restored much of the original text.

Echelon

Military term. It refers to an arrangement of troops in which each division is a little to the side either right or left and to the rear of the one nearest to it. In a like sense it is used of warships. An echelon lens is one in which the plates of glass are arranged so that the edges resemble a flight of steps.

Echidna

Family of spiny ant eaters are mammals and are found in Australia and New Guinea. Their two eggs are hatched in a pouch beneath the body. There are five-toed and three-toed forms. The head and body bear stiff hairs and short, thick spines. The long, slender, nostril-tipped beak encloses a worm-like, extensible tongue.

Echo

Mountain nymph. She passed her time in diverting the attention of Hera from the amours of Zeus. Hera made her speechless, except that she could repeat the last words of others. Echo fell in love with

Narcissus, and, failing to awaken a like passion in him, pined away.

Echo

Reflection of a sound after an interval of time from a wall or similar surface. It is produced by waves of compression or rarefaction in the air. The sound is reflected at right angles to the surface and consequently an echo from the walls at different angles and distances gives rise to multiple or repeating echoes.

The echo sounder is an instrument which has been used on trawlers to keep in touch with shoals of fish.

Echo Organ

Musical instrument, a novelty of the Restoration period. It consists of a repetition of the treble portion and chief steps of a church organ softly voiced placed distantly in a box and played from an individual manual. It is now connected by electricity. Purcell and Handel used echo organs. Examples are in Norwich and Westminster Cathedrals.

Echuca

Town of Victoria, Australia, stands at the junction of the rivers Murray and Campaspe. It is about 155 m. by railway from Melbourne, and is a centre for the timber wool and wine trades. It also attracts trade from the Riverina district. Pop. 4137.

Eckener

Hugo German aviator. Born Aug. 10, 1868, he was a pupil of Count Zeppelin. He piloted the Graf Zeppelin across the Atlantic with 57 people on board in Oct. 1928, in 1929 he flew round the world, and in July, 1931, to the North Pole. He has made flights to South America and other places to demonstrate the possibility of the airship as a regular means of transport.

Eckington

Market town of Derbyshire. It is 152 m. from London by the L.N.E. Ry., and has coal mines and iron and steel works.

Eclecticism

Practice of selecting from different systems. Thus Cicero, influenced by Platonic scepticism, philosophy Athens and professed a composite philosophy embodying Peripatetic, Stoic and even Epicurean elements. Leibnitz mingled principles were derived from Aristotle and Descartes. Schelling welded idealist pantheist and mystical beliefs.

Eclipse

Darkening of one of the heavenly bodies by the interposition of another, either between it and the spectator or between it and the sun. The term is generally used for the eclipses of the sun and the moon, which afford valuable astronomical information.

An eclipse of the sun is caused by the moon passing between it and the earth. It may be passing total or partial. An eclipse of the moon is caused by the earth's shadow passing over it. There may be as many as seven eclipses in a year but the usual number is four. Only occasionally are they visible in Great Britain. In 1930 there were two eclipses of the sun and two of the moon. In 1931 there were three of the sun and two of the moon. None of these eclipses of the sun were visible at Greenwich but both eclipses of the moon, April 2 and Sept. 26, were total eclipses and visible from Greenwich. Eclipses caused by the moons of Jupiter are also of great interest to astronomers.

Eclipse

Name of a racehorse regarded as the greatest of its kind. He was born May 3, 1764, and raced in 1769 and

1770, without ever being beaten. He was then used for stud purposes and from him most of the English racehorses are descended. The horse's skeleton is in the Royal Veterinary College, at Camden Town, London. The Eclipse Stakes is a race run at Sandown Park since 1884.

Ecliptic Apparent annual path of the sun in the heavens, but really the orbit of the earth round the sun. The plane of the ecliptic forms a standard level for comparison of all other directions. The ecliptic is inclined about $23\frac{1}{2}^\circ$ from the perpendicular, but this inclination is liable to a slight increase or decrease over long periods.

Eclogue Short pastoral poem. The best known examples are those of Virgil.

Ecology Section of botany and zoology dealing with the relation of plants and animals to their environment. It involves a knowledge of both the form and structure as well as physiology. The factors of environment include altitude and degree of exposure; temperature, light and rainfall; physical and chemical nature of the soil, and the influence of other plants, animals and man. These conditions have a marked effect on distribution.

Economics Originally the science of household management. Much later the term political economy came into use to denote the production, distribution and consumption of wealth. This was first discussed in France early in the 17th century and from there its study spread to England. The foundation of the science is usually attributed to Adam Smith who, in 1776 published *The Wealth of Nations*. This was followed by the writings of John Stuart Mill, David Ricardo, and many French and German economists.

These early economists regarded political economy as free from all social and ethical considerations. They imagined an economic man, a being who had only material wants and who was satisfied when these were supplied. Towards the close of the 19th century economists began to take account of education and housing, even pleasure and recreation, and gradually the word political was dropped. Political economy became economics and its scope was not merely land, capital and labour, rent, interest and wages, but everything that goes to make a full life possible.

Economics is a subject of study at all the universities and examinations therein are part of some of the degree courses. There are professors and lecturers in economics at almost all centres of higher education as at the London School of Economics and Political Science in Houghton St., Aldwych, London, W.C. and for economists the principal publication is *The Economic Review*.

Ecuador Republic of South America. In the north of the continent, it lies between Colombia and Peru with a coastline of about 500 m. on the Pacific. The area is put at 276 600 sq. m. and the population at about 2 000 000 of whom some 500 000 are Indians. Quito is the capital, Guayaquil the largest town and chief seaport. The two are connected by railway, but, in general, communications are bad. Much of the country is covered by the Andes, with several peaks 20 000 ft., or thereabouts in height. There are vast and valuable supplies of timber. In the cultivated area cocoa, coffee and cotton are grown. Oil is found and the land is rich in iron, copper, lead and other minerals.

Ecuador, which derives its name from the fact that the equator passes through it, became an independent state in 1830. It is governed by a president and a congress of two houses on the United States model. There is a small army recruited by universal service. The unit of currency is the gold sucre of 100 centavos, 5 sures go to the U.S. dollar.

Eczema Properly speaking this term covers a wide range of skin diseases, as most of them exhibit some characteristic feature of eczema at times. It is spoken of as acute and chronic, dry and moist, infective and non infective. Normally it is non-contagious, but it is attended by more or less discharge and itching. Besides reddened skin, blisters or vesicles may form, discharging a watery or purulent serum and producing crusts or scales. A non-weeping form, dry eczema, leaves the skin, though irritable, dry and scaly. Either form may be acute, vanishing after a few weeks or last for years with intervals of partial recovery. For Moist Eczema use calamine, boracic or zinc oxide powder, and protect from the atmosphere. For Dry Eczema, which is a scaly skin eruption with irritation, use greasy applications such as boracic ointment, cold cream, or lanoline. Do not use soap. Attention should be paid to the diet and general health, and if the condition is at all serious a doctor should be consulted as drug treatment may be necessary.

Edam Town of the Netherlands. It is situated near the shore of the Zuider Zee, with which it is connected by a canal. Its name is derived from the dam built on the small River Ye. The round red Edam cheese is one of the chief dairy products of the district.

Edda Norse name for two collections of Icelandic literature; the elder poetic, and the younger prose. Brynjolf Sveinsson, an Icelandic bishop, discovered the elder in 1643. It is known as the *Sæmund Edda*, as it is ascribed to the historian Sæmund Sigfusson (1055-1132), but it is considered by some authorities to belong to an earlier date.

The younger, in three parts was compiled by Snorri Sturluson (1178-1241). The first part contains legends and stories of mythology. The second is a treatise on the poetic art, and the third treats of Norse prosody.

Eddington Sir Arthur Stanley, English astronomer. Born at Kendal Dec. 25, 1882, he was educated at Owens College, Manchester, and Trinity College, Cambridge, where he was senior wrangler (1904). He became chief assistant at the Royal Observatory, Greenwich, and was made Plumian Professor of Astronomy at Cambridge in 1913. Eddington, who was knighted in 1930, has written much on astronomy and kindred subjects.

Eddy Mary Baker (1821-1910) Discoverer and founder of the religion (theology and practice) which she named Christian Science, and founder of the Church of Christ, Scientist, which was organised in Boston, Massachusetts, U.S.A. in 1879. It consists of the mother church, the First Church of Christ, Scientist, in Boston, and branches thereof throughout the world.

Mrs Eddy wrote numerous works, the principal of which is *Science and Health with Key to the Scriptures*, the Christian Science textbook, first published in 1875.

Eddystone Rock in the English Channel. It is 14 m. from Plymouth breakwater. The first lighthouse

EDELWEISS

finished in 1700, was destroyed in 1703. The second was burned down in 1755. The third of stone, which was finished in 1750, was taken down about 1880 and has been re-erected on the Hoe at Plymouth. The present lighthouse was completed in 1882.

Edelweiss (*Leontopodium alpinum*)

Hardy perennial plant of the order Compositae native to mountainous regions and found largely in Switzerland, it is easy of cultivation as a garden or rocky plant. The hairy leaves have a whitish woolly appearance and the flowers are greyish white.

Eden

Name of two British rivers. The English Eden rises in Westmorland and flows north into the Solway Firth. It is about 65 m in length and is a salmon stream. The Scottish Eden, which is 30 m long, flows from the junction of two little streams in Kinross shire and enters the North Sea by an estuary, after passing through Fife.

Eden

Garden of Locality planted by Jehovah for man's first earthly abode (Gen ii). It was watered by a river, the names of whose fourfold branches have occasioned much research, one being commonly identified with the Euphrates. Scholars have variously located Eden in S Mesopotamia, Arabia and the Nile Delta.

Eden

Anthony British statesman. Born in 1897, he entered Parliament in 1923, became Parliamentary Private Secretary to Sir Austen Chamberlain, and was successively Under Secretary for Foreign Affairs, Lord Privy Seal and Minister without Portfolio for League of Nations affairs (June, 1935). In Dec, 1935, following the resignation of Sir Samuel Hoare, he was appointed Foreign Secretary in Mr Baldwin's government, an appointment amply justified by his skill and diplomacy in the handling of international problems.

Edenbridge

Market town of Kent. It is situated on the Southern Rly, 25 m from London. There is a trade in agricultural produce. Pop 2093.

Edentata

Order of mammals lacking incisor teeth, and sometimes cheek teeth also. It comprises the S American anteaters which have worm like tongues, scale covered burrowing creatures classed as edentates, the herbivorous tree-dwelling sloths, the armadillos, which are short tongued, and the gigantic mylodon and megatherium, which the scaly anteaters, occur in a fossil state. The scaly anteaters, or pangolins, of Asia and Africa and the Cape anteater or aardvark belong to this class.

Edessa

Ancient city of Syria. At one time the capital of a little kingdom in Roman times. The Romans made it a military station and gave it the name of Edessa. In the 7th century it was taken by the Mohammedans and there was much fighting for it during the Crusades.

Edgar

King of the English. A son of King Edmund, he was born in 914 and was only two years old when his father died in 957, on the death of his uncle, King Edred, he was given the land north of the Thames and he became King of the south. He reigned until 975 and won the name of the Peaceful, his chief adviser being

Dunstan. He was recognised as overlord by other rulers and was crowned at Glastonbury or eight of these lesser kings. He died, July 9, 975, and was buried in the Aetho.

Edgar

ling. He was born in Hungary, son of Edward, the exile, and grandson of Edmund Ironside. In 1066, being then in England, he was proclaimed king in the north in opposition to William I. The risings in his favour, however, were without success and he made his peace with the Conqueror. He lived in Normandy for many years, helped to reseat his nephew, Edgar, on the Scottish throne, went on a Crusade and was last heard of as a prisoner after the Battle of Tinchebrai in 1106.

Edgehill

Hill of Warwickshire. It is about 3 m from Kington, on the border of Oxfordshire and is noted for the indecisive battle fought here, the first in the Civil War, Oct 23, 1642.

Edgeworth

Born at Black Bourton, Oxfordshire, Jan 1, 1767. She helped her father to write the stories of Irish life on which her fame depends. *Castle Rackrent*, *The Absentee* and *Ormond*. She also wrote *Moral Tales for Young People* and other books and finished her father's *Memoirs*. She died May 22, 1849.

Edgware

11 m from London and served by the L N E Rly, a tube railway and trams and buses. The chief building is S Margaret's Church, a modern structure with an old tower. Near is Canons Park, where the Duke of Chandos built a palatial residence, and here was the forge of William Powell, Handal's harmonious blacksmith, who is buried at the adjoining Whitechurch.

Edict

Something proclaimed by a king or lawgiver. The first edicts were those issued by the praetor for laws dealing with word was specially used for laws dealing with religious matters, as the Edict of Nantes.

Edinburgh

Capital of Scotland and county town of Midlothian or Edinburghshire. It stands on the south side of the Firth of Forth, 303 m from London and is served by both the L M S and L N E Rlys. Since 1920 when its boundaries were greatly enlarged it has included Leith, Portobello, Corstorphine, Colinton and other districts. It is governed by a council under a Lord Provost, and sends six members to Parliament. Its area is 32,000 acres. Pop (1931) 478,988.

Edinburgh is rich in historic buildings and associations. Prominent are its castle, with S Margaret's Chapel and the Holyrood War Memorial, the Palace of Holyrood and the Cathedral of S Giles, with the Chapel of the Order of the Thistle. An earlier notable memorial is finely placed on Calton Hill, overlooking the city proper. The Church of eminence is Arthur's Seat. S Mary's Scotland has many places of worship, including S Andrew's and S George's. S Mary's Cathedral belongs to the Roman Catholics and have a bishop here. The Roman Catholics have also a fine cathedral and an archbishop. The old Parliament House is now used as a law courts, the Advocates' Library therein having been made into the national library of Scotland, is being removed to a fine new building. The city possesses the Scottish National Gallery, National Portrait Gallery and National Museum. The observatory

is on Blackford Hill. The Infirmary and the Royal Scottish Academy occupy fine buildings. There are zoological and botanical gardens, and the city has some 60 parks and open spaces, including the Braid Hills. In the old part, called Auld Reekie, are the historic thoroughfares of High St., Canongate, the Grassmarket and the Lawnmarket.

Notable houses include the one occupied by John Knox and the one in the Lawnmarket given to the city by Lord Rosebery. Other landmarks are the Mercat Cross, the Tolbooth, the Tron Church and the Greyfriars Churchyard. Princes St., with its gardens, is one of the finest thoroughfares in Europe and there are some noble squares. The city has memorials to Scott, Burns and other eminent Scotsmen.

Apart from the university, Edinburgh has colleges of art, agriculture and veterinary science, and several for theological students. The Heriot Watt Technical College is another centre of higher education. Edinburgh Academy, founded in 1825, the Royal High School, Fettes College and Merchiston Castle School are among Scotland's leading public schools. S. Bride's and S. George's are public schools for girls.

Edinburgh is a banking and insurance centre, while much business comes from its official, legal and educational interests. Printing and publishing are leading industries. Others are brewing, distilling, the making of chemicals and biscuits, and the preparing of rubber. Race meetings are held, and the Scottish Rugby Union has a fine ground at Murrayfield.

In the 18th century Edinburgh was a great intellectual centre, and this tradition has never been lost. In 1802 *The Edinburgh Review* was started here, Sydney Smith being the first editor, and it was an influential organ until it ceased publication in 1929.

The University of Edinburgh dates from 1583. The main buildings occupy the site of Kirk o' Field, but others have been erected elsewhere for medical, scientific and other activities. The medical school has a very high reputation.

Edinburghshire Alternative name for the Scottish county of Midlothian (q.v.)

Edison Thomas Alva. American electrician and inventor. Born at Milan, Ohio, U.S.A., Feb. 11, 1847, of mixed Dutch and Scottish descent. In early life he was a telegraph operator. From 1871-76 he was Superintendent of the Law Gold Indicator Co. His inventive genius soon showed itself in the series of experiments he made with regard to the improvement of electrical transmission. His inventions include an automatic telegraph system, the quadruplex and septuplex telegraph, the micro-tactimeter and many others, covering over a thousand patents. He improved the phonograph and kinetograph, and introduced the aerophone and megaphone for amplifying sounds. Incandescent lamps, electric lighting and electric railways owe much to him. He died Oct. 18, 1931.

Edmonton Urban district of Middlesex. It is 8 m. from the centre of London, and has two stations on the L.N.E. Ry. Upper Edmonton and Silver Street. The River Lea passes through the district. Charles and Mary Lamb are buried in the parish church. Cowper and Keats both lived here, the former celebrating the Bell Inn in *John Bull*. Pop. (1931) 77,652.

Edmonton City and capital of Alberta, Canada. An important point on the transcontinental railway system, and the banking and distributing centre for a large district, it stands on the N. Saskatchewan River, 793 m. from Winnipeg and 958 from Prince Rupert. The city now includes Strathcona. It has huge meat packing plants and some manufactures. Pop. (1931) 78,829.

Edmund English saint and king. In A.D. 855 he became King of E. Anglia. In 870 he was taken prisoner by the Danes and, refusing to abandon the Christian faith, was put to death at Hoxne, Suffolk. Later his remains were buried at Bury, which city grew up round his shrine and was named after him. Bury St. Edmunds. He was made a saint, his day being Nov. 20.

Edmund English saint, known as Edmund Rich. He was born at Abingdon and became a priest. In 1234 he was appointed Archbishop of Canterbury, and for seven years worked to free the land from the rapacious favourites of Henry III. In 1240 he left the country and died in France, Nov. 16 of that year. He was canonised in 1246 and his day is Nov. 16. He is commemorated by S. Edmund's College at Ware.

Edmund King of the English. Born about 922, a son of Edward the Elder and a grandson of Alfred the Great. In 940 he became king, and reigned for six years, defeating the Danes and conquering Cumbria. He was murdered at Pucklechurch, Gloucestershire, May 26, 946.

Edmund King of the English, called Ironside. A son of Ethelred the Unready, he was born about 981, and succeeded his father in 1016, but only reigned seven months, dying or being murdered on Nov. 30, 1016. He won some fame by fighting against the Danes, but, beaten at Assandun in Essex, agreed to divide the kingdom with Canute.

Edom District in the south of Palestine. Between the Dead Sea and the Akabah Gulf, it is a narrow, mountainous strip, 100 m. long. Its inhabitants, traditionally related to Esau, resisted the passage of the Israelites to Canaan, and were often at feud with Saul and his successors. Romanised as Idumaea, it accepted Judaism under the Maccabees. The Herods were Edomites.

Education Term in general use for physical training, especially of the young. It comes from a Latin word meaning to draw out. There was some education in the ancient civilisations but it was never general and was almost certainly under priestly direction. Modern education began with the Greeks, whose system freed the human mind and introduced ideas which have profoundly influenced human thought. No later age has approached them in their power of dealing with those branches with which they were familiar. Greek education greatly influenced Roman education, and thus communicated its ideas to the medieval and modern worlds.

With the establishment of Christianity in Europe, education became the province of the Church and owing to the close association of the Church with Rome, Latin was used as the vehicle of thought. The combination of the Latin language and the Christian Church survives to some extent in the public school system of to-day. The Church was responsible not only for the early schools but for the early

universities. Education was given by monks in schools connected with the monasteries, but the bulk of the boys and practically all the girls received no education.

The Renaissance gave a great impetus to education and the 15th and 16th centuries witnessed the founding of many universities and schools, but education remained in the main as before.

In the 19th century, however, education was taken over by the State. Made universal and largely secular, it was given to women in the same way as to men, it included a number of new subjects, largely the outcome of scientific and industrial developments. Elementary education was distinguished from secondary. Technical education was introduced. The old universities were thoroughly reorganised, and new ones were created. Education seemed to take the place of religion, at least in W. Europe, as the nations' driving power.

In Great Britain education was made compulsory by an Act of 1870, and schools, called board schools, which later became council schools, were set up by the side of the existing church schools, a ratio being laid for their support. For the wealthier classes the public schools for boys increased in number and size, and some were opened for girls. In 1891 education in the elementary school was made free. In 1902 the Church schools were given assistance from the rates. In 1918 the school age was raised to 14, and in 1920 to 15, but the latter did not come into force in 1921. In 1935, however, the new Government pledged themselves to raise the school age to 16.

EDUCATION AND THE CHOICE OF A CAREER. In most cases the choice will be influenced, or decided, by family traditions and the means available within these limitations the choice is wide, and competition so keen that it is necessary that a decision should be made before formal schooling comes to an end, so that the boy or girl may, in the last stages, pursue the course which will give the best training and equipment for future work. This is the more necessary as most of the "professions" can only be entered after years of study on recognised and definite lines.

Specialised study for a particular career often begins before the child has gained so much knowledge and experience necessary to decide its own future, and decisions taken by the parent alone often lead to unhappiness and failure. The wise father therefore, will be considering his child's career from the early school days, will discuss the matter with the child's teachers, and by continuous observation and the application of our modern knowledge of vocational guidance will be ready to recognise such indications of a definite "bent" as may appear. This does not mean that children should begin specialised study early in their school days. A sound general education is indispensable and should be continued as far as the means of the parent will permit, with an allowance for the period of special training—short or long according to the career chosen—which is essential before the boy or girl can become self-supporting.

The Elementary School.—Education between the years of five and fourteen is compulsory in this country but there are several avenues by which this may be obtained and continued. After the Nursery Schools, which are a comparatively new development for the period up to the end of the fourth year, the poorer child will proceed to the Elementary School and thence in some cases to the Secondary School or to the newly established Central or "Modern" School, where it will remain until it is fifteen or older. Facilities are provided at this stage for further technical and commercial training, and evening classes may be attended after the day's work is done.

The Secondary School is reached from the Elementary School at the age of eleven or after, or the child may begin by attending one of the "Kindergartens" attached to the Secondary Schools. Scholarships are now freely obtainable by examination which will pay the full fees for secondary education to the age of nineteen, and in some cases a small contribution towards the cost of the child's maintenance.

For the children of the working class, the fees for the Secondary School are obtained from the Education Committee. The cost of the child's maintenance is met by the parents. The cost of the child's maintenance is met by the parents. The cost of the child's maintenance is met by the parents.

Preparatory Schools.—The child whose parents can afford for it a Preparatory School education will usually begin in either a private or a preparatory school. There are many of these and a list with full particulars of them is to be found in the handbook—*Schools in Wales and Scotland*, which is published by Messrs E. J. Burrow, 43 Kingsway, W.C.2.

The choice of a preparatory school is nearly always governed by the parents, which he is afterwards to go to. In a private school it is well to take into consideration its proximity to the child's home, its position of the school from a health point of view, the qualifications of the teachers, and the size of the classes.

Classes in private schools are usually those in the ordinary council schools, but they attract more attention and individual children. There is a danger that private schools are inefficient, but many excellent private schools exist. Parents should ask whether the Principal is a qualified Teacher, and should inquire closely about the health conditions—sanitation, ventilation, and the like.

Children are accepted in private schools at five to seven years of age and they usually remain until the age of thirteen, but some private schools accept children up to eighteen.

The cost of sending a child to a private school may range from £10 per annum, according to the state of the school. This includes board and tuition.

Public Schools.—For entrance to public schools it is necessary to enter at a very early age, often before the child is five years of age. The age for entrance to public schools is usually from 12 to 14 years, leaving age is about 18 to 19.

A list of the public schools in the Kingdom will be found in *The Public Schools Year Book* which is published by The Year Book Press, 31 Mansel Street, London. This also gives a complete list of scholarships to both public schools and universities, and a list of "specialising" schools, at which certain subjects are given particular attention.

For the child of a public school (entrance fees, £155) to the end of the fourth year, the poorer child will proceed to the Elementary School and thence in some cases to the Secondary School or to the newly established Central or "Modern" School, where it will remain until it is fifteen or older.

First School Certificate has been taken at the age of sixteen or seventeen or it may continue for a further two years in order that the Higher Certificate may be obtained. After leaving school specialised training may take the form of an apprenticeship or attendance at Business, Technical or Training Colleges, in some of which a degree may be taken for such purposes as teaching.

The Universities—Further formal education may be obtained at one or other of the "finishing schools" at home or abroad, but the usual procedure after taking the Higher Certificate (in Scotland, after the "Preliminary Examination") is to enter a university.

Every university in England has an annual "calendar," which gives particulars of entrance, fees, and tuition. This can be obtained from the Heads of the separate colleges, or from Oxford and Cambridge, or from the University of London.

The cost of a University Course varies very widely, from about £30 per annum for tuition only at the smaller universities to a minimum of £50 per annum for tuition and full maintenance during term time at Oxford and Cambridge.

Essential at this stage to have definite intentions as to the intended career, since, besides the fact that the choice of a university is upon it. Thus certain branches of science and applied science are best taken at certain universities. Oxford and Cambridge lead to higher posts in service, in teaching, and in the sciences giving preliminary training in law and certain technical branches, engineering, forestry and agriculture.

The Education Board of England and Wales has set up in 1896 a department which took over the duties discharged by a committee of the Privy Council. Its president is a member of the Privy Council. It has a large staff of inspectors of schools. The offices are in Whitehall.

Thomson's Education in Scotland there is a Department under the Secretary of Scotland, 22, St. Andrew Street, Edinburgh. Each of the four parts of the British Empire has its own department. In most foreign countries education is controlled by a department.

Edin. The Lake of Africa formerly known as the Albert Edward Nyanza in Central Africa and was discovered by Dr. Livingstone in 1858. It is 44 m. long, a channel with Lake George to the north-east.

Edin. King of the English, called the Elder. A son of Alfred the Great, he is horn about 870 and early began to show his father in the work of government.

Edin. A chosen king and he reigned until 924. He was successful in enlarging his kingdom and he led north to the Humber and both Mercia and the Welsh submitted to him.

Edward King of the English, called the Martyr. Born about 963, he was a son of King Edgar. When Edgar died in 975 Edward was crowned by Dunstan, but three years later he was murdered, March 15, 978, at Corfe. His mother, Elfried, Ethelred's second wife, became a piety regarded as a saint.

Edward King of the English, called the Confessor. A son of King Ethelred the Unready, he was born in 1005. From 1013 to 1041 he lived in Normandy. In 1041 he crossed over to England and was chosen king in succession to his half-brother, Harthcanute. He reigned for 25 years devoting most of his time to religious matters. He built the first abbey at Westminster. He died Jan. 5, 1066, and was canonised in 1161. His day is Oct. 13.

Edward I. King of England. Born at Westminister June 17 1239. He was the eldest son of Henry III. He fought against the rebellious barons who took him prisoner at Lewes in 1264. He escaped from Hereford by a trick and in 1265 defeated Simon de Montfort at Evesham. Later he went on a crusade and during his absence in 1272 became king.

Edward returned to England in 1274. His reign of 35 years marks him as a strong and wise ruler. He conquered Wales and Scotland, but won his most enduring fame by calling the Model Parliament of 1295 and by his improvements in the laws and legal system. He died at Burgh-on-Sands, while marching to deal with a rising in Scotland July 7 1307. Edward's first wife was Eleanor, daughter of the King of Castile, to whom he erected memorial crosses in several towns. His second wife was Margaret, daughter of Philip III of France.

Edward II. King of England. The son of Edward I. He was born at Caernarvon May 25 1284, and was created Prince of Wales in 1301, being the first English prince to bear the title. Coming to the throne in 1307, he made peace at once with Scotland, and in 1308 married Isabella, daughter of Philip IV of France. His reign of 20 years was marked by the dominance of favourites and the revolts of the nobles. After the Battle of Bannockburn in 1314 Thomas, Earl of Lancaster, secured control of affairs. He was forced to death in 1322 and the king's next favourite, the Despencers, were supreme for a time. Their overthrow was due to the queen, who collected some followers in France and landed in Suffolk. The king was deposed and, on Sept. 21, 1327, was murdered in Berkeley Castle. His young son, Edward III, succeeded him.

Edward III. King of England. A son of Edward II, he was born Nov. 13, 1312. He became king in Jan. 1327, and in 1330 he put a quick end to the usurped authority of his mother Isabella and Roger Mortimer. His reign of 50 years was chiefly occupied with the French war and was marked by the victories of Crécy and Poitiers. The Treaty of Brétigny gave him extensive possessions in France. In 1328 he married Philippa of Flanders. Their family included the Black Prince, who died before his father, and the Dukes of Clarence, York and Lancaster. Edward died June 21, 1377.

Edward IV. King of England. He was born at Rouen April 23, 1442, and was the eldest son of Richard, Duke of York. He early began to fight for the Yorkists, and in 1460, on his father's death in battle, became their leader. After his victory over the Lancastrians at Mortimer's Cross in 1461, he became king. In 1469, owing to the desertion of the Earl of Warwick, his mother's brother, his position became precarious and he left England, but he returned and crushed his foes at Barnet.

EDWARD V

and Towkesbury In 1484 Edward married Elizabeth Woodville He died April 9, 1483

Edward V. King of England

Born at Westminster, Nov 2, 1470. He was son of Edward IV and Elizabeth Woodville In April, 1483, he became king, with his uncle, the Duke of Gloucester, afterwards Richard III., as his guardian With his brother he was imprisoned in the Tower, where they were both murdered Their remains, discovered in the time of Charles II., were removed to Westminster Abbey

Edward VI. King of England

Born at Hampton Court, Oct. 12, 1537, he was the son of Henry VIII and Jane Seymour He became king in Jan 1547, and reigned for six years During that time the country was ruled first by the Duke of Somerset, the king's uncle, and then by the Duke of Northumberland The chief event was the establishment of the Protestant religion Edward died at Greenwich, July 6, 1553

Edward VII King of Great Britain

Born at Buckingham Palace, Nov 9, 1841, he was the eldest son and second child of Queen Victoria and Albert of Saxe Coburg, and was named Albert Edward He passed some time at the Universities of Edinburgh, Oxford and Cambridge and travelled a good deal He was created Prince of Wales and Duke of Cornwall soon after his birth and these titles he held for nearly 60 years

In 1863 Albert Edward married Alexandra, daughter of the prince who afterwards became King Christian IX of Denmark They lived at Marlborough House, London, and in Norfolk, on an estate at Sandringham bought for the Prince On account of the queen's retirement, the Prince and Princess of Wales were for nearly 40 years the acknowledged leaders of English society The Prince entered into every form of social activity, his love of the turf being notable, and made the acquaintance of most of the leading men in Europe, but his mother did not allow him to take any considerable share in affairs of State In 1871 he had a serious illness typhoid fever In 1875 he visited India

On Jan 22, 1901, the Prince became King and Emperor, taking the name of Edward VII His coronation postponed from June 26 1902, owing to an attack of appendicitis, took place on Aug 9 1902 His short reign was marked by a keen interest in foreign affairs, which showed itself especially in earnest efforts to preserve peace He went abroad a good deal and his relations with France were especially friendly He discharged his many kindly duties with tact and dignity which were his outstanding qualities but one or two events in domestic politics caused him keen anxiety In April, 1910, the King was taken ill with bronchitis and died in London on May 6 He was buried at Windsor, and many memorials to him have been erected His life has been written by Sir Sidney Lee The King left four children George V and three daughters, Princess Louise, Princess Mary, Princess Victoria and Princess Maud Queen of Norway In 1922, other sons, the Duke of Clarence died in 1892, and Prince John died the day after he was born in 1871

Edward VIII King of Great Britain and Ireland

Born at Britain and Ireland, he was born at Richmond June 23, 1894 His full name is Edward Albert Christian George Andrew Patrick David He went to the Royal Naval

Colleges at Osborne and Dartmouth, and in 1913 entered Magdalen College, Oxford On June 23, 1910, he was created Prince of Wales and invested at Caernarvon In 1911 he was given the Order of the Garter, and in 1918 he took his seat in the House of Lords as Duke of Cornwall Between 1914 and 1918 he served in various theatres of the Great War In the years after the Great War he travelled widely, but also found time for a great number of public duties He went to Canada, India and Japan, then on a tour to Australia and more than once to Africa for hunting In 1930 31 he visited S America and opened the exhibition at Buenos Aires, giving on his return his impressions to business men of trade openings in S America On the death of his father, King George V (Jan 20, 1936), he succeeded to the throne

As Prince of Wales he took a keen and continuous interest in many forms of national activity He followed the fortunes of his agricultural estates in the west and himself bought a farm at Lenton, near Nottingham, and a ranch in Canada He was fond of flying and had his own aeroplane and landing ground at his residence, Fort Belvedere in Windsor Forest He hunted in the midlands and played a good deal of golf The numerous journeys which he made to attend public functions and meetings testified to his interest in the welfare of the people Some at least of these activities will doubtless be modified by his accession to the throne

Edward English prince, called the Black Prince

The eldest son of Edward III he was born at Woodstock, June 15, 1330 He was made Prince of Wales in 1343 and fought at Crécy Most of his time was passed fighting in France, where his father handed over to him the province of Aquitaine He was at Poitiers and led an expedition into Spain in 1367 In 1371 he returned to England and took some part in public affairs, until on July 8, 1378, he died at Westminster He married in 1361 Joan Holland, "the fair maid of Kent," and left a son, Edward III

Edward Medal

It dates from 1907 The medal which bears the figure of its founder, King Edward VII, is chiefly given to miners and quarrymen and bars are added for further heroic actions

Edwards

Born Nov 2 1848 he went to Jesus College Oxford, and was ordained In 1875 he was chosen head master of Llandoverey College In 1885 Vicar of Carmarthen and in 1889 Bishop of St Asaph He took a leading part in the campaign against the disestablishment of the Church in Wales and when it was effected was chosen the first archbishop under the new conditions

Edwards

John Passmore English philanthropist Born in Cornwall, March 24 1823 he was the son of a joiner In 1846 he settled in London and worked for many years as a journalist From 1876 to 1896 he was owner of the *Echo* and from 1890 85 a Liberal M P He died April 22 1911 Edwards is chiefly known as the founder of libraries, settlements and the like The Passmore Edwards Settlement is now incorporated with the Mary Ward House at Tavistock Place, London, W C 1

Edwin

King of Northumbria A son of Fla, King of Deira, he was born about 585 and became king in succession to his

father Driven out by the King of Bernicia, in 617 he returned, killed his foe in battle, and united Bernicia and Deira into the Kingdom of Northumbria. He married Ethelburga, daughter of the King of Kent, and in 627, under her influence and that of Paulinus, became a convert to Christianity. He was killed in battle at Hatfield Chase, Yorkshire, Oct. 12, 633, when fighting an army led by Penda, King of Mercia. Edinburg was founded by him and named after him.

Eel Family of soft-rayed fishes with long snake-like bodies. They lack ventral fins and external scales. Their life history is still something of a mystery. Widespread in temperate fresh water, the common European eel, *Anguilla vulgaris*, is greenish-brown, and silvery beneath. The female, which anglers call the sharp nosed, measures 3 to 4 ft., the male, called the broad nosed, being much smaller. The females inhabit rivers and ponds, descending seawards in the autumn, sometimes overland, for spawning in mid ocean, the sea-dwelling males do not return. The eggs produce tiny ribbon-like creatures, once separately named *Leptocephalus*, or glass fishes, and now proved to be the larval forms from which elvers or eel fry are derived. In Great Britain there are close seasons for elvers and mature eels. See CONGER.

Eel Grass Popular name of two diverse genera of aquatic herbs. *Zostera marina*, usually called eel grass in the U.S.A., grows on gently sloping shores in temperate regions. It serves as a non-conductor wrapped in burlap, in artificial refrigeration. *Potamogeton pectinatus*, or water celery, grows in the warmer parts of both hemispheres. It is a short-stemmed plant, often cultivated in aquaria. Its thread-like flower stalks, coiling spirally, draw the flowers under water to mature the fruit. The canvas-back duck and the terrapin eat it.

Eel Pie Island Small island in the Thames opposite Twickenham. It is a popular resort for picnic and boating parties, and an angling centre.

Effigy Figure or likeness. The term is used chiefly for the head of a sovereign or other person on a coin. It is also applied to the figures sculptured on tombs. Another effigy is the figure of a detested person made in order to be burned, e.g., Guy Fawkes.

Effusion A pouring forth. The term is used in pathology for an escape of a fluid into the tissues or cavities of the body, as seen in wet pleurisy. Effusion also results from inflammation and occurs in dropsy.

Egbert King of Wessex. The son of a king of Kent, he passed part of his youth at the court of Charlemagne. In 802 he was chosen King of the W Saxons. During his reign of 37 years he conquered Mercia and other parts of England, and was the first king who was recognised by the whole country. He died in 839.

Egeria Legendary nymph in Roman mythology. Her counsel and advice were said to have aided and influenced Numa Pompilius, King of Rome. Horrified at the death of Numa having disturbed the rites of Diana, she was changed into a spring. To day Egeria is a name symbolising any woman who gives mental stimulus and assistance to a man in his work.

Egg Body usually oval produced by birds, insects, reptiles and certain other

creatures to reproduce their kind. Eggs are produced by the female after fertilisation by the male. Though all animal life, except the very lowest forms, starts in the egg, in the case of nearly all mammals (the platypus is a notable exception) the development of the egg takes place within the mother.

Eggs are laid by snails, shell fish and other molluscs, also by insects and fishes. Most of the reptiles, including crocodiles, lay eggs, as do all the birds. Many eggs are enclosed in a hard shell, but those of fishes, frogs, etc., that are laid in the sea and wet places, are not.

The most familiar kind of egg is that laid by the bird. These eggs vary much in size and colour, but all possess the hard shell. The largest are the eggs of the ostrich. In many cases the colouring is protective. The collecting of birds' eggs is a popular hobby. In Britain the law forbids the taking of the eggs of wild birds at certain seasons.

The egg of the ordinary fowl is a popular and nutritious article of food and millions of fowls are kept in order to lay eggs for the market. To a much lesser extent the eggs of the duck, the goose and the plover are used for food, but the sale of plover's eggs has now been forbidden by law. In 1932 the eggs of the penguin were introduced into London restaurants.

In England the consumption of eggs is estimated at 170 per person per year, and in 1931 3,111,024,120 were imported into Great Britain, in addition to dried and liquid eggs valued at £2,718,800. At Milford, Surrey, is a farm where, under the auspices of the National Utility Poultry Society, egg laying tests are held, to determine the laying qualities of the various breeds. Under the national marking scheme imported eggs must be marked with the name of the country of origin.

Egglesstone Village of Yorkshire (N.R.) It stands on the Tees, a mile from Barnard Castle. The beautiful cruciform church was once part of Egglesstone (or Eglistone) Abbey. Near is Rokohy Hall.

Egham Urban district of Surrey. It is 21 m. from London by the S. Rly. The church has associations with the Denham family. The Royal Holloway College for women is here, and the Holloway Sanatorium. Pop. (1931) 15,915.

Eglantine Poetic name for the sweet briar (*Rosa rubiginosa*). It is of bushy growth, the branches being thickly set with hooked prickles and bristles, the flowers are small and pink, and the foliage fragrant. It is largely grown in gardens, and is also found wild in some parts of Britain. The name is sometimes applied to the Austrian briar (*Rosa eglanteria*).

Eglinton Village of Ayrshire. It is 2 m. of earl to the family of Montgomerie. In 1508 Hugh Montgomerie was made Earl of Eglinton and the title has been since held by his descendants. Archibald, the 13th earl, was made Earl of Winton and the present earl holds the double title. The earl's eldest son is called Lord Montgomerie. Eglinton Castle, the family seat, was built about 1800.

Egmont Count of Flemish nobleman. Born in Hainault Nov. 18, 1522, he was baptized as Lamoral, became a soldier and saw service with Charles V. Later he served Philip II of Spain, the ruler of the Netherlands as an ambassador and was made Governor of Flanders. In 1567 he was arrested

EGMONT

by Alva and sentenced to death. With Count Horn he was beheaded at Brussels, June 5, 1568.

Egmont Earl of Irish title held by the family of Porceral (1683-1748), in 1733 to Sir John Perceval, Bart (1683-1748), an M.P. and one of the founders of the colony of Georgia. John, the 2nd earl (1711-70) was First Lord of the Admiralty, 1761-66, and was the father of Spencer Perceval, the Prime Minister. Frederick, who was born in 1873, lived for years as a rancher in Canada, until he succeeded as 10th earl in 1929. He died from the effects of a motor accident on May 16, 1932, leaving an only son. The family seat is Avon Court, Ringwood. The family seat is Cowdray Park, Midhurst. Egmont is a village in Co. Cork, Irish Free State.

Egoism

Theory of self interest or selfishness. An egoist is a person who aims at securing profit or pleasure for himself regardless of the interests or feelings of others. In philosophy, it is the doctrine that we have no knowledge of anything save our own existence. A similar word, egotism, means talking or thinking inordinately about oneself.

Egremont

Town of Cheshire. A residential suburb of Liverpool, 2 m. distant from the Mersey. It stands on the Mersey, 2 m. from Birkenhead, with which it is connected by a railway. Steamers go regularly across the Mersey to Liverpool, and there is a promenade to New Brighton.

Egremont

Market town and urban district of Cumberland. It stands on the Eden, 5 m. from Whitehaven. Coal and iron ore are mined. Pop. (1931) 6016. The title of Earl of Egremont, borne by the family of Wyndham from 1749, became extinct when the 4th earl died in 1845. The 3rd earl, who died in 1837, left Petworth House and estates in Sussex to a natural son who was made Lord Leconfield in 1859.

Egret

Various species of small white herons, with long narrow, loose webbed plumes. Both the great white heron and the little egret, a rare British visitant, populate inland waters, especially in India, and are also found in S. Europe and Asia, from Spain to Japan.

Egypt

Kingdom of Africa. Divided into upper middle and lower Egypt and predominantly the land of the Nile. It covers about 383,000 sq. m., but the only fertile area is that through which the great river flows some 13,600 sq. m. The population, mainly concentrated in this area is 14,217,864. Cairo is the capital and the largest city. Alexandria is next in size. Other places are Port Said, Suez, Tanta, and Mansura. The chief towns and ports are linked by railway. On the east are the Red Sea and Suez Canal. On the west is the desert. To the south is the Sudan and to the north the Mediterranean.

GOVERNMENT

In 1922 British protection on the sultan ruling under British protection on the declared king. There is a constitution consisting of a Senate and a Chamber of Deputies and the Ministry is responsible to it. The members of the chamber are elected by universal suffrage for five years. In 1928 King Fuad suspended the constitution and ruled for a time through his ministers alone.

The State religion is Mohammedanism but there are many native Christians, chiefly Copts. The official language is Arabic. The country has its own courts of justice, but foreigners are exempt from their jurisdiction.

ECONOMICS The chief product is cotton. By means of irrigation works the dam at Assuan and barrages at Assint, Nag Hammadi, Esna and Zifta, much additional land has been brought under cultivation. The value of the cotton crop varies, but in 1931 its export was worth over £20,241,677, other articles being responsible for a further £23,411,758. Wheat, barley and other cereals are grown and animals are kept, but everything is subservient to cotton growing.

The unit of currency is the piastre, worth about 2½d. It is coined in silver, bronze or nickel. A national bank issues paper money and there is an agricultural bank. The ardeb, the unit of capacity is equal to 43,555 gallons. The unit of measurement is the feddan, equal to just over an acre.

Egypt has an army about 14,000 strong. To protect the Suez Canal Great Britain maintains a small garrison including an air force. Egypt has a debt of about £90,000,000.

ARCHAEOLOGY AND HISTORY

Egypt is famous as perhaps the earliest home of civilisation, the best known remains of which are the pyramids, but there are also remains of temples and other buildings that prove the possession, thousands of years ago, of a wonderful artistic skill to say nothing of a truly marvellous knowledge of building and engineering. The magnificent temple remains at Karnak and the discoveries in the tomb of Tutankhamen are some of the many evidences of this culture.

The ancient Egyptians had too, a religion with elaborate rites and strong in the beliefs in the immortality of the soul, and an extensive literature, written on rolls of papyrus. They knew something of the arts of government and war and were skilled in the industrial arts.

Egyptian civilisation may have begun 8000 years before Christ, perhaps a little later. Scholars have divided its course into civilisations first, second, third, etc. and have arranged its rulers in dynasties also numbered. The first civilisation was prehistoric, the continuous written history of Egypt begins with the second. At this time Memphis was the country's capital.

The third civilisation, dating from about 5600 B.C., covered the periods of the first three dynasties of the kings. It was an age in which art flourished exceedingly, but in this respect it was far surpassed by the fourth civilisation. In this the great pyramids were built and the country was rich and prosperous. Egyptian art now reached its highest point and probably only one age in the world's history, that of Greece in the time of Pericles can compare with it in the magnificence and volume of its works of art.

Decay began about 3600 B.C. with the fifth civilisation during which the Syrians invaded the land. More serious was the arrival of the Hyksos, a people who dominated Egypt for about 1000 years. They were expelled by Aahmes about 1600 B.C. the time from which the sixth civilisation dates. Constant wars with Syria, although sometimes successful in bringing more territory under Egyptian rule, greatly weakened the country's power. There was however much trading activity especially with Greece. During the seventh civilisation, which dates from 664, the Persians conquered the land and soon Alexander the Great repeated this feat. The last of the dynasties (XXX) ended in 340.

For the next 300 years Egypt was under the rule of the Ptolemies and Greek influence was strong until the death of Cleopatra, the last

of her line In 30 B.C. Egypt was included in the Roman Empire and it remained subject to Rome or Constantinople until A.D. 616.

In 641 it was conquered by the Arabs, and was under the caliphs of Bagdad until 868. A disturbed period without stable government followed until in 1517 it was subdued by the Ottoman Turks. It remained a province of Turkey until seized by Napoleon in 1798. Mehemet Ali became ruler in 1805 and his descendant is now on the throne.

Mehemet and his successors were vassals of Turkey and were called Khedives from 1867 until 1914, when the title of sultan was used by Hussein Kamil, brother of Fuad. Their misrule led Great Britain to invade Egypt in 1882, and from then until 1914 the country's affairs were controlled by British officials. In 1914 the British made Egypt into a protectorate and this lasted until 1922, when the country was granted its independence. Actually, however, there was still a certain dependence on Britain, which the Nationalist party in Egypt acutely resented. This condition was much aggravated in the winter of 1935-36, when King Fuad restored the Democratic Parliamentary Constitution of 1923, thus increasing the power of the Nationalists as the dominant party. Serious rioting followed, at the end of Jan. a crisis arose and a "neutral" government was formed to negotiate with Britain.

Egyptology Study of Egyptian antiquities. Material and literary treasures, unearthed in the Nile valley and elsewhere, have reconstructed the artistic, economic, literary, social, political and religious life of ancient Egypt. The Egypt Exploration Society, founded in 1882, the British School of Archaeology in Egypt, founded in 1896, and other learned societies and universities, pursue this branch of research.

Ehrenbreitstein Town of Germany. On the right bank of the Rhine opposite Coblenz, it stands on a rock overlooking the Rhine and Moselle in a position that has been fortified since Roman times, and has a trade in wine. It was taken by the French and destroyed in 1799, rebuilt 1816-20 and modernised after 1870. Until 1918 it was one of Germany's strongest fortresses. Pop. 5500.

Ehrlich Paul German bacteriologist. Born in Silesia, March 14, 1851, he studied medicine, and did research on aniline dyes. He treated diseases by chemical injections, and in 1910 prepared an arsenical compound, "salvarsan," or "606" (the 606th compound he had tried), which was a cure for syphilis. He did important work on immunity, and shared the Nobel Prize for Medicine in 1908. He died Aug. 20, 1915.

Eider Duck (*Somateria*) Genus of northern sea ducks which line their nests with down. Dwelling on N. Atlantic coasts, the common eider duck, *S. mollissima*, lays green eggs in nests on the ground. The down is valued for stuffing quilts and cushions, is collected in Iceland and other localities where the bird is practically domesticated. It breeds in the Farne Islands.

Eiffel Alexandre Gustave French engineer. Born at Dijon, Dec. 15, 1832, he was one of the first engineers to use compressed air caissons for building bridges and the inventor of movable section bridges. His most important works include the bridge over the Garonne at Bordeaux in 1858, the dome of the Nice Observatory, the framework of the

Statue of Liberty in New York Harbour and the Eiffel Tower, Paris, designed for the Exhibition of 1889. This colossal iron structure, 984 feet in height, is used as a meteorological and broadcasting station (1445.7 M., 13 kW). Eiffel died Dec. 28, 1923.

Elgg Island of the Inner Hebrides, Scotland. It is in the county of Inverness-shire, and lies about half-way between the Island of Rum and the mainland, it is 6 m. in length. The Scur of Elgg a hill on the island, is 1289 feet in height. Pop. 181.

Einstein Albert Gorman solentist. He was born at Ulm, May 14, 1879, and educated at Munich and Zürich. After being engineer to the patent office in Bern, he was appointed Professor at Zürich University in 1909. In 1914 he moved to Berlin. A remarkable tower was built at Potsdam for him to work in, and in 1915 he brought his famous theory of relativity before the Academy of Sciences in Berlin. In 1921 he was awarded the Nobel prize for physics and visited England. He received the Copley Medal in 1925, the gold medal of the Royal Astronomical Society in the following year, and also honours from various other countries. In 1931 he lectured on his theories at Oxford, and in 1933 at Edinburgh.

The main ideas put forward by Einstein are that time is a co-ordinate of space, that distances in the universe are relative, not absolute, and that the universe itself is constantly expanding or contracting in size. He became a prominent pacifist and Zionist.

Eisenach Town of Thuringia, Germany. It stands at the junction of the Hösels and Nesse, 32 m. west of Erfurt and close to the Thuringian Forest. Spinning, wagon building and the manufacture of beer, cigars and pottery are the chief industries. Near is the Wartburg associated with Luther. Until 1918 the palace was the residence of the Duke of Saxe-Weimar-Eisenach. Pop. 43,400.

Eisleben Town of Germany. It has a school of mining and is the chief centre of the neighbouring copper and silver mines. Luther was born here, and the house in which he died is now a museum. Pop. 25,000.

Eisteddfod Welsh bardic congress. It is held annually in different towns for encouraging national music and literature. Sprung from the Gorsedd or National Assembly, it is mentioned in early records. It was held in 1567, reappeared occasionally after 1771, and has been held almost annually since 1819. It usually lasts three or four days. The chief bard is chosen and crowned, and prizes are awarded for choral singing, instrumental playing, especially harp, and lyrical compositions and essays.

Ekaterinburg Town of Soviet Russia. It is in the Ural Mts. 175 m. from Perm, on the Trans-Siberian Rly. It was founded by Peter the Great and named after his wife Catherine. It is a great mining centre. There are two cathedrals and a university. Here, in July 16, 1918, the Tzar Nicholas II and his family were murdered. The Soviet authorities have changed the name to Sverdlovsk. Pop. 60,000.

Ekaterinoslav City of the Ukraine, now known as Dnepropetrovsk (77).

Elan River of S. Wales. Only 15 m. long it rises in Cardiganshire and flows into Radnorshire and Brecknockshire before it joins the Wye below Rhayader. The valley

ELAND has been dammed, and three huge reservoirs built to hold the water from which Birmingham

Eland (*Taurotragus*) Genus of large African antelope, also called the Cape kudu, has a tufted forelock and sometimes stands nearly 6 ft. at the withers. The screw like horns occur in both sexes. Except on small reserves in Natal the eland has disappeared from S Africa. Herds still roam north of the Zambesi and other species are found farther north.

Elandslaagte Village of Natal It is 16 m from Ladysmith

On Oct 21, 1890, a British force under Sir John French sallied out of the Ladysmith to attack a Boer position in the hills near Elanslaagte, which was taken with a loss to the British of about 40 men, the Boers lost some 250.

Elasticity

Elasticity Term used in physics to express a property of matter whereby a substance may be elongated by tension without remaining permanently distorted after the removal of the tensile force. That is, the cohesion between the constituent particles of an elastic substance is sufficient to prevent permanent strain or distortion, and consequently the particles return to their original positions. Both elasticity of form or resistance to change of shape, and elasticity of bulk, or resistance to compression are properties of solids, but liquids having no shape, can only resist compression, a property shared in a high degree by gases.

shared in
Elba

Elba Island of the Mediterranean Sea. It belongs to Italy, covers 90 sq m and is 6 m from the mainland at Piombino. Porto Ferrajo is the capital. Many of the inhabitants are fishermen. Here Napoleon lived in exile, May, 1814, to Feb., 1815. Pop 30,500.

Elbe

Elbe River of Europe. It rises in the Riesengebirge Mountains of Bohemia, passes into Saxony, and enters the North Sea near Cuxhaven. It is 725 m from source to mouth and its estuary is 70 m long. On it are Prague, Dresden, Magdeburg and Hamburg as far as it is navigable for small vessels nearly as far as Prague, about 500 m from its mouth. Much shipping passes along its lower course. The chief tributaries are the Havel, Saale, Moldau, Eger and Muldo and it is connected by canal with the Oder, Trave and other German rivers.

Elberfeld

Elberfeld Town of Germany. In the Rhine province of Prussia. It stands on the Wupper 16 m. from Düsseldorf. Recently linked with Barmen. An important railway. Wuppertal Elberfeld. An important railway centre, its textile industries have caused it to be named the Manchester of Germany. Other products are chemicals and hardware. Pop. (1930) 405,515.

he named the products are chemicals and (1030) 405 515

ELBERFELD POOR RELIEF SYSTEM and
field gives its names to a system of poor relief
which was started here. This consists in a care-
ful examination of each case by unpaid workers
who report to a central committee. For cases
of emergency there are almoners who can give
of immediate assistance. A town is divided into
districts for the purpose and the school trunks
to avoid making paupers by assisting the poor
in ways other than by gifts of money. Started
in 1832 the system has spread to other towns
Seaport of E. Prussia, Germany
near the Elbing, near its
mouth, Danzig

Elbing

Elbing Seaport of E. Prussia, Germany. It stands on the Elbing, near its mouth in the Frisches Haff 60 m from Danzig. The industries include shipbuilding and the manufacture of motor-cars, tobacco and other

6 goods There is a good harbour Elbing was founded in 1257 and was long a member of the Hanseatic League Pop 68,200

Elbow

Elbow In man, a joint. Joint between the upper arm bone with the radius and ulna, the outer and inner forearm bones. A prominence terminating the humerus fits into a cavity of the disk shaped head of the radius, whose edge articulates with a deep S shaped notch in the ulna, its gliding over the humerus rotates the forearm. A bony knob on the ulna, rising behind the humerus, prevents the joint from bending backwards. Fibrous sheaths, thickened into ligaments, help to hold the bones together, and are lined with a synovial membrane producing a lubricating fluid. The elbow may be dislocated forwards or backwards.

Elburz

Elburz Mountain range of Persia. Its length is about 600 m, breadth about 200 Mt Demavend a dormant volcano, is the highest peak (18,000 ft)

Expelled Elder

Elder Genus (*Sambucus*) allied to the guelder rose. They are native to all temperate regions except S. Africa. The common *S. nigra* is a rapidly growing tree, normally about 10 ft high with cream coloured flowers growing in flat clusters. The purplish black berries are used for home made wine, and elder flower water is used in confectionery. Dried elder pith balls serve for electrical experiments. The wood makes weavers' shuttles, skewers, and shoemakers' pegs. Several cultivated forms of elder occur in shrubby forms, e.g., the golden, leaved and scarlet berried.

cut leaves
Elder

Elder It is analogous to the Roman senator and the English alderman. The term was used by the Jews and in the Old Testament there are frequent references to elders or leaders of the people. Hence the early officials were called Church where the Presbyterian churches called elders. In the Presbyterial churches elders elected by each church form the ruling body. Members of the Corporation of Trinity House are called elder brethren, and retired statesmen in Japan who are called on for advice in emergencies are known as elder statesmen.

Eldon

Eldon Earl of English title borne by the family of Scott since 1821 John Scott was born at Newcastle on Tyne, June 4, 1751, the son of a coal merchant. He was educated there and at Oxford and in 1776 became a barrister. In 1782 he entered the House of Commons and in 1788 he was knighted and made Solicitor General. Five years later he became Attorney General, and in 1790, a peer and a peer as Baron Eldon. In 1821 he was made an earl. A strong Tory Eldon is best known as Lord Chancellor, an office he filled, 1801-06 and 1807-27. He died Jan. 13, 1838. The earl's eldest son is called Viscount Encombe (1745-1836), the earl's elder brother, William (1745-1836), also made a reputation as a lawyer. He was also made an earl, Stowell in 1821.

E1 Dorado

El Dorado

tribal chief who, smeared with balsam and covered with gold dust, plunged into a sacred lake near Bogotá at a yearly festival. It developed into the story of a mythical city, Manoa or Omoa, the quest of many expeditions, including one by Raleigh which penetrated Guiana in 1595.

Eleanor Name of three English queens. One was the daughter of William, Duke of Aquitaine. In 1137 she married Louis VII of France. The marriage being dissolved, she became the wife of Henry, later Henry II of England. A great heiress, Henry secured with her lands in the S of France. She was the mother of Richard I and John and died April 1, 1204.

Another Eleanor was the wife of Henry III. She was the daughter of the Count of Provence, and was married to Henry in 1236. Edward I was her son. She died at Amesbury, Wilts, June 25, 1291.

The third Eleanor was a daughter of Ferdinand III, King of Castile. In 1254 she married Edward, later Edward I, and with him went on crusade whence her devotion to him has become a legend. She died at Harby, Nottinghamshire, Nov. 28, 1290, and the king erected a series of beautiful crosses at the places where her body rested on its way to Westminster Abbey. Of these crosses only those at Geddington, Northampton, and Waltham survive.

Eleatic School The School of philosophy which flourished at Elea, Lower Italy, from about 570-450 B.C. Its leading exponents were Xenophanes, Parmenides and Zeno, who taught the unity of all phenomena ("the All is one"), and attacked the current anthropomorphic mythology.

Election In politics, the act of choosing a representative. It is usually done by ballot, and in most elections a bare majority of the votes cast is sufficient to secure a return. Where, however, there are three or more candidates the votes given to the unsuccessful candidates are together often more numerous than those given to the successful one. To remedy this proportional representation (q.v.) other methods have been suggested.

Elections are of several kinds. In one the electors choose their representatives directly, in another they vote for persons who in turn choose the representatives. The President of the U.S.A. and the aldermen of English county and town councils are examples of indirect election. A general election is when all the representatives on a body are elected at once, a by-election is held to replace a representative who has resigned or died. In Fascist Italy the electors can only say yes or no to a list of names submitted to them by the authorities.

In company law, directors are elected by the shareholders, but such election is usually a mere form. Members are elected to clubs by the committee. Here a small minority can usually prevent a man from securing election. This is called black balling. See VOTE.

Election Theological doctrine attributing to God the choice of particular persons to receive eternal life. It is a special adaptation of the process of redemption of the wider doctrine of predestination which claims to interpret the all-embracing design in the Divine will. John Calvin maintained the doctrine in an absolute and unconditional form.

Elector In general any one who is entitled to vote at an election.

In England and Wales there were in 1930 25,730,507 electors, or practically the whole of the adult population. In a special sense, the electors were the princes who chose the Holy Roman Emperor. They date from 911, but it was some time before they became a definite body. In the 13th century their number was fixed at seven and by the Golden Bull of 1356 this arrangement was confirmed. The seven were the Archbishops of Mainz, Cologne and Treves, the King of Bohemia, the Elector Palatine, the Duke of Saxony and the Margrave of Brandenburg. They formed the electoral college and each had a position in the emperor's household. The Archbishop of Mainz was president of the college. In 1648 the number of electors was raised to eight, and in 1708 to nine, the new electors being the Duke of Bavaria and the Ruler of Hanover, who later became King of Great Britain.

Electra In Greek legend, the daughter of Agamemnon and Clytemnestra, and the sister of Iphigenia and Orestes. After her father had been murdered by his wife, she assisted her brother in avenging his death. The three famous Greek tragedians, Aeschylus, Sophocles and Euripides, have written dramas dealing with the life story of Electra, the first of the three being called *Chœphoroi* from the chorus of captive Trojan women offering libations at Agamemnon's tomb, and the other two *Electra*.

Electric Fish Genus of fish which possesses the power of giving an electric shock. Three kinds of fish are known to have this power, the electric eel (*Gymnotus electricus*), a native of the rivers of Brazil and Guiana, the electric catfish (*Malapterurus electricus*), a native of the larger African rivers, and the torpedo, or electrical ray, found in warm seas all over the world. The fish use their power for defence and to stun their prey.

Electricity From early times certain phenomena related to frictional electricity have been noticed. Among the ancient Greeks, Thales recorded the attraction of light bodies by a piece of amber. In the 16th century Dr Gilbert showed that other bodies also possessed this property, and to these he gave the name of electrics from the Greek *elektron*, or amber. From this time onward the experimental study of electricity grew, and the work of Newton and others resulted in the production of frictional machines giving a spark several inches in length.

With the Leyden jar, invented in 1745 came an understanding of the principles of induction, and seven years later, Franklin demonstrated the identity of lightning with the electric spark. In 1800 Volta discovered a new source of electricity in the contact of two dissimilar metal plates immersed in acidulated water, the prototype of the modern primary battery or cell.

The phenomena observed by this new discovery led to the foundation of electrochemistry, Davy, by his study of electrolysis, being able for the first time to decompose the alkalis and earths. The work of Faraday, Oersted and Ohm resulted in the enunciation of the laws governing electrolysis, the principles of electro-magnetism and the idea of electrical resistance.

In more recent times the researches of Hertz and many others have further increased our knowledge of the working of electrical forces, and the work of Johnstone Storey and Thomson

has culminated in the discovery of the atomic nature of electricity and the elaboration of the electron theory.

The uses which electricity has for man are many and varied. It is used as a source of power, as a source of light and heat, and is beneficial in the treatment of certain diseases.

Electricity is produced by water power on a large scale in Canada, the United States (where Niagara is utilised), Norway, Switzerland and other countries. In Great Britain, where water power is less abundant, coal is used, although some of the falls in Scotland are harnessed to the service.

In London and other cities great power stations have been erected for supplying electricity to railways, tramways, and industrial establishments, shops and private houses. These are controlled by private companies, with a certain amount of public control.

In 1926, to extend the use of electricity, a Central Electricity Board was established. The whole country has been divided into regions and for each a scheme to supply electricity on a large scale by means of main transmission lines ("The Grid") has been prepared. Work has begun on some of them, for instance a large power station for the midland area has been opened near Birmingham. Meanwhile the railway lines, especially in the London, Manchester and Liverpool areas, are being electrified and in 1931 a large scheme for electrifying the main lines was put forward.

Electricity is used to a certain extent on farms and there is an electricity department at the National Physical Laboratory.

Electric Shock *Treatment for*—If the contact has not been broken, stand on some poor conductor (dry wood, cement) and handle the patient very carefully, if possible with rubber gloves, and in any case with some dry material between the hands and his skin. It may be necessary to knock away the wire with a dry stick after short circuiting the current with a bar of metal dropped on the wire and with the other end on the ground. The patient has to be treated for burns and shock—the latter primarily (see SHOCK). In severe cases it may be necessary to use artificial respiration (see under DROWNING). If the patient is breathing keep him warm and quiet. Obtain medical aid as soon as possible.

Electro-Chemistry Branch of science dealing with the relation between electricity and chemical action. Some chemical actions produce electricity while in certain cases the passage of an electric current results in chemical change (electrolysis). The action in an electric storage battery is electrolytic. Electro-chemistry has many modern industrial applications as in production of metals (aluminium, sodium, iron alloys, etc.), refining (gold, copper), electroplating and the manufacture of nitrates and other synthetic fertilisers, calcium carbide, phosphorus, carborundum, etc.

Electrocution Method of inflicting the death penalty adopted in the United States. It consists of the passage of a current of electricity of very high voltage through the body of the criminal who is seated in a specially constructed chair. It is claimed by those who advocate this form of execution that it is more nearly instantaneous and less revolting than other methods. It was adopted by the state of New York in 1888,

the first execution taking place in 1890, and by Ohio in 1896.

Electrode Term applied to the points of entry and exit of electric current (positive and negative poles) of a voltaic cell, electrolytic cell, high vacuum tube, etc. The positive electrode in a primary cell is termed the anode and is usually of zinc, whilst the negative electrode or cathode may be of copper, carbon or mercury. In a secondary or storage cell the electrodes are usually of lead.

Electrokinetics Branch of physical science dealing with electricity in a state of motion, or current electricity, in contradistinction to electrostatics which treats of electricity in a state of equilibrium, or electric charges.

Electrolysis The process of chemical decomposition by means of an electric current. If a current be passed through a conducting liquid, or electrolyte, chemical change sets in and the products of decomposition appear at the electrodes. For example, if the electrolyte is an aqueous solution of copper sulphate metallic copper is deposited on the cathode, or negative electrode, and sulphuric acid is liberated at the anode, or positive electrode. This process forms the basis of electroplating (q.v.).

Electro-Magnet See MAGNET.

Electrometer Instrument for measuring electrical potential differences. The term is usually confined to instruments of high sensitivity used for measuring very small charges or changes of potential. Lord Kelvin in 1857 designed two forms which have persisted with minor improvements until the present day. This Quadrant Electrometer is based in principle upon the rotation of a light delicately suspended vane between the four separate quadrants of a circular metal box, opposite pairs of which are charged to the potential difference to be measured.

Electron Smallest known particle of electricity matter, or atom of negative electricity. The term was first used by the physicist, Dr Johnstone Stoney, the theory of electrons being substantiated later by Sir J. J. Thomson, who demonstrated the atomic nature of electricity. The weight and speeds of movement of electrons are known from experimental evidence, and the accumulated knowledge of these minute bodies has revolutionised physical science. The atom is now regarded as consisting of a group of electrons revolving round a central positively charged nucleus.

Electro-Plating Process by which a thin layer of one metal is deposited electrolytically upon another metallic surface. The metal to be deposited may be gold, silver, nickel, copper, etc., and is used in the form of an aqueous solution of a salt. The object to be plated is suspended in the liquid from the cathode, while a piece of the metal to be deposited is attached to the anode. Silver plating is widely adopted for many articles of brass, copper and German silver. Nickel plating forms an efficient protective covering to many articles, while chromium is now extensively used. See ELECTROLYSIS.

Electrostatics Section of physical science dealing with electricity in a state of equilibrium, in contradistinction to electrokinetics which treats of

electricity in motion. It deals with the laws and problems relating to the forces of attraction and repulsion as seen in the phenomena of frictional electricity, also with the conditions of conductivity and non conductivity and the laws governing these conditions. Electrostatics is concerned experimentally with various machines or devices designed to convert mechanical energy into electrical energy.

Electro-Therapy Medical term for application of electricity to treatment of disease. Direct and high frequency alternating current and static discharges of suitable strength are used. The results include benefit to the nervous system, the creation of heat at greater depths than can be reached by external application, and the destruction of certain growths.

Electrotyping Method of printing of the type to be reproduced is faced with graphite on which copper or other metal is deposited electrolytically and then strengthened by a backing of lead or similar metal. On removing the mould, the impression is used for printing copies of the original.

Electrum Term originally used by the ancients for amber. It was later applied to a natural alloy of gold and silver found in veins in Hungary and Transylvania, most of this alloy contains about 80 per cent of silver. Electrum was also produced artificially in early times, for use in coinage and plate, and consisted of three or four parts of gold to one of silver. A modern alloy known as electrum contains nickel, copper and zinc.

Elegy Term denoting a poem of mourning. Strictly the true elegy was a lament in elegiac metre, each couplet consisting of a hexameter and a pentameter, the name referring to the form rather than the sentiment.

Famous English elegies are *Daphnia* by Spenser, *Lyridas* by Milton, *Adonais* by Shelley and *Thyrsis* by Matthew Arnold, all commemorating under classical names, friends of the poets. Tennyson's *In Memoriam* is another elegy, other famous ones are the *Elegy* written in a Country Churchyard by Gray, and Swinburne's *Are algue Vale* in memory of Baudelaire.

Element According to the ancients, term applied to fire, air, earth and water, which were regarded as certain qualities determining the different forms of matter. In modern chemical terminology an element is a simple body which cannot be decomposed by any known means of chemical analysis. There are 90 elements at present known, some of these being very rare and their properties little understood. The study of radio-activity has shown that some of the elements, under certain conditions, may change one into another, as in the case of radium, uranium and lead, and recent experiments on the bombardment of elements with particles travelling at very high speeds have resulted in definite disintegration of one element into another.

Elephant (*Elephas*) Genus of mammals, comprising the largest existing quadruped. They are sometimes 8 to 11 ft in height. The nose forms a flexible, double-barrelled proboscis or trunk, often 4-5 ft in length, the sensitive finger-like tip of which can pick up small objects. The teeth include, in both sexes, upturned upper incisors or tusks.

the source of ivory. Large tusks may measure up to 9 ft and weigh 90 or 100 lb.

The two living species of elephant are the Asiatic or Indian, with concave forehead and small ears and the taller African species with convex forehead and large flapping ears. A dwarf race, standing 5½ ft., occurs in French Congo. Tamed Asiatic elephants serve for ceremonial, timber and other transport. They rarely breed in captivity. The African elephant has as yet proved untamable. White elephants are albinos.

Elephantiasis Disease characterised by overgrowth of the skin and subcutaneous tissues. It is also called Barbadoes leg. It is caused through chronic obstruction of the lymphatic vessels. The skin becomes tense, hard and sometimes wart-like, the affected parts being permanently swollen, sometimes enormously. It may arise from several causes, but chiefly from a thread-like parasite worm, filaria, introduced by mosquito agency. Frequent all over the tropics, it apparently originated in Asia in antiquity. It is distinct from leprosy, which is sometimes called *Elephantiasis graecorum*.

Elephantine Island in the Nile, opposite Assuan, Upper Egypt. It contained the frontier station at the southern limit of the Old Kingdom Nile navigation, through which Sudan ivory passed into ancient Egypt. Its governor also regulated granite quarrying at Assuan. There is a nilometer of the Ptolemaic period on the island.

Eleusis In ancient geography, a city twelve miles from Athens, the seat of the worship of Demeter and of the Eleusinian mysteries. The events celebrated were the descent of Persephone into the underworld and her return to the light of day and her mother. There were two festivals, the greater and the less. They were intended to confirm, in the minds of the "initiated," the faith in life after death and a system of rewards and punishments. The city was destroyed by the Goths in 396. Excavations were begun in 1882, and the whole site is now exposed.

Elevator Appliance for raising a body or bodies to a higher level. The term is most frequently used for a lift for passengers. In mining, bucket chains, consisting of revolving chains with buckets attached, and hydraulic elevators are used. In America and other wheat growing countries, the term elevator is used for the great grain stores or silos which are fitted with elevating, loading and distributing machinery.

Elgar Sir Edward, English composer. He was born June 2, 1857, at Broadheath, Worcestershire and his youth was spent in a variety of choral and orchestral experiences. In 1890 his overture *Froissart* was played at the Worcester Festival and with *The Dream of Gerontius*, 1900, a violin concerto, 1910, symphonies, 1905 and 1911, and his cello concerto he has earned a sure position as one of the great masters of music. Elgar was knighted in 1902 and received the Order of Merit in 1911, in 1924 he became Master of the King's Music. In 1930 he produced a new *Pomp and Circumstance* march and in 1931 a *Miniature (Nursery) Suite*, dedicated to the Princesses Elizabeth and Margaret Rose. In 1931 he was made a baronet. He died on Feb 23 1934.

Elgin Burgh, market and county town of Moray or Elginshire, Scotland.

ELGIN

is 80 m from Aberdeen and 180 m from Edinburgh and is served by both the L N E and L M S Ryhs. The chief object of interest is the ruined cathedral, there are also the remains of a castle and of monasteries. The Greyfriars chapel has been restored. The burgh has an agricultural trade. Pop 7776.

Elgin Earl of Scottish title borne by the family of Bruce since 1833. The first earl was Thomas Bruce, and his son, the second earl, was also Earl of Aylesbury. In 1746 the title passed to the Earl of Kincardine and since then the earls have held the double title. The family seat is Broomhall Fife, and the earl's eldest son is called Lord Bruce.

James Bruce, who became the 8th earl in 1841, was Governor General of Canada, 1846-54, and from 1862-63 was Viceroy of India. In the meantime he represented his country in China. He died in India, Nov 20, 1863. His son, Victor Bruce, the 9th earl, was First Commissioner of Works in 1886. From 1894-99 he was Viceroy of India and he presided over two important royal commissions. In 1905 he was made Colonial Secretary, an office he held for three years. He died Jan 18, 1917.

The Elgin Marbles are works of art collected by Thomas Bruce, 7th earl of Elgin when he was British ambassador in Constantinople. They include specimens of the work of Phidias and other great Greek artists. They were brought to London in 1806 and were bought in 1816 for the British Museum, where they still remain.

Elginshire County of Scotland, officially known as Moray.

Eli (q.v.) High priest of Israel in the later period of the Judges (1 Sam 14). He judged Israel for forty years, and the ark sanctuary at Shiloh was in his care. Samuel, the boy at Shiloh was in his care. God's anger at the wickedness of Eli's sons, Hophni and Phinehas. Hearing of their death when the Philistines captured the ark, he fell down and died.

Elia Pen name under which Charles Lamb (q.v.) contributed a series of essays to the *London Magazine*. The first essay, which appeared in 1820, describes the Old South Sea House where he spent his first few months of business life 30 years before. Elia was the name of one of his fellow clerks there.

Elibank Village of Selkirkshire, Scotland. It gives the title of viscount to the family of Murray. In 1643 Patrick Murray was made a baron and this title passed to his descendants. In 1911 the 10th baron was made a viscount. His eldest son, Alexander Murray (1870-1920) was a Liberal politician. After serving as chief whip he was made a peer in 1912 as Baron Murray of Elibank. He died before his father and the title passed in 1927 to Gideon Murray, as 2nd viscount.

Elie Burgh, seaport and watering place of Fife, Scotland. It stands on the north side of the Firth of Forth, 10 m from St Andrews and 45 m from Edinburgh. It includes Earlsferry. Pop (1931) 1098.

Elijah Hebrew prophet (1 Kings xvi, 2 Kings i, iii). Of Gileadite origin, he led the life of a hermit, dramatically emerging to predict a drought, to summon Ahab and the priests of Baal to a contest with Jehovah on Mt Carmel, or to warn Ahaziah. Finally he disappeared in a fiery chariot. Believing in his reappearance before the coming of the Messiah, Jews still set his chair ready at

the Passover meal. The New Testament, in describing the Transfiguration, calls him Elias. His day is July 20.

Eliot

George Pen name of the English novelist, Marian or Mary Ann Evans. She was born at Arbury Farm near Nuneaton, Nov 22, 1819, her father, Robert Evans, being agent for a neighbouring landowner. Her early years were passed in the country, but in 1841 the family moved to Coventry. There she studied a good deal and was an accomplished scholar when, in 1849, she settled in London. She had abandoned the evangelical faith of her youth for agnosticism and her first literary work was a translation of Strauss's *Life of Jesus*. In 1851 she was made assistant editor of *The Westminster Review*, for which she wrote and through which she met George Henry Lewes, with whom she formed a union. In 1858 Miss Evans published in *Blackwood's Magazine* her first stories, called *Scenes from Clerical Life*. Then followed three of her greatest works, *Adam Bede*, *The Mill on the Floss* and *Silas Marner*. In 1863 she published *Romola* and then came *Felix Holt*, the *Radical*, *Middlemarch* and *Daniel Deronda*. In verse she wrote *The Spanish Gypsy*. Lewes died in 1878 and in 1880 she married John W Cross. She died Dec 22, 1880.

One of the leading novelists of the 19th century, George Eliot is at her best in picturing, as she does with remarkable fidelity, the quiet country life of the midlands.

Eliot

Sir John English politician. Born at Port Eliot in 1852, of a wealthy Cornish family, he went to Exeter College, Oxford. In 1874 he entered the House of Commons and in 1878 was knighted. About the time when Charles I ascended the throne he became an active critic of the policy of the king and the Duke of Buckingham, his former friend. He helped to draw up and pass the Petition of Right and in 1629, for protesting against illegal taxation, he was put in prison. He was still in the Tower of London when he died, Nov 27, 1632. Eliot wrote *The Monarchy of Man* and other books.

Elisha

Hebrew prophet the disciple and successor of Elijah (2 Kings ii, viii, xiii). He exercised great influence on court and city life under the Israelite kings from Jehoram to Joash. His story abounds in miraculous incidents, mostly beneficent as raising a widow's son and healing Naaman the leper. The orthodox calendar commemorates him on June 14.

Elixir

Term used in pharmacy. An elixir is a preparation composed generally of weak syrup flavouring agents, a fair proportion of alcohol and a medicinal ingredient. Examples are the elixirs of senna, rhubarb, figs and cinchona. The alchemists applied the term to the philosopher's stone and to a substance (*elixir vitae*) supposed to prolong life indefinitely.

Elizabeth

Hungarian saint. Daughter of King Andrew II, she was born in 1207 and in 1221 married Louis IV of Thuringia. On his death in 1227 she left her three children and went into a monastery. Her later days were passed in penances and self denial in a hut at Marburg where she died Nov 10, 1231. She was canonised in 1235 and her story is the subject of Charles Kingsley's *The Saint's Tragedy* 1848.

Elizabeth

Name of two English Queens. One, born about 1437, was a member of the Woodville family. She was

the widow of Sir John Grev when she met and married Edward IV. Edward V was her son. She died in 1492.

The other horn Feb 11, 1465, was her daughter. She was probably concerned in the plot that culminated in the Battle of Bosworth and afterwards married the victorious Henry Tudor, later Henry VII. Henry VIII was her son. She died Feb 11, 1503.

Elizabeth Queen of England and Ireland. Born at Greenwich, Sept 7, 1533 she was the daughter of Henry VIII and Anne Boleyn. In 1536 her mother was executed and her father took little interest in his daughter, who passed her time mainly at Hatfield. Her education, however, was not neglected and she was placed in the succession to the throne after Edward and Mary.

In Nov 1558 she became queen and her reign lasted for 45 years. Its glories are one of the main themes of English history, and the Elizabethan age is regarded as one of the greatest, perhaps the greatest, the country has ever known. Its literature alone would make it memorable, even unique, but there were also glories of other kinds won by the men of action who have given eternal fame to the word Elizabethan.

The first part of the reign was occupied with the establishment of the Church of England in the form which it retains to-day. Then came the increasing hostility between the English and the Spanish seamen and the plots formed to kill the queen and replace her by Mary, Queen of Scots, her prisoner for 19 years. Tortuous negotiations with France and spasmodic assistance to the Dutch Protestants were other occupations. The execution of Mary in 1587 ended one danger and the defeat of the Spanish Armada in the following year made England supreme on the seas. The last years of the reign were troubled by risings in Ireland and by the queen's reluctance to make any arrangements about a successor. She died at Richmond, March 24, 1603.

A clever, if unscrupulous woman, Elizabeth's personal part in the affairs of state was a considerable one. From some grave mistakes she was undoubtedly saved by the wisdom of her ministers especially the great Lord Burghley, and by the gallantry of her warriors, but at other times her own strong common sense was of inestimable value. To the end Elizabeth remained unmarried, but the possibility of winning the hand of a powerful ruler was a factor of importance in European politics for many years. She refused Philip II of Spain; she dabbled with the idea of marrying Henry III of France, or his brother, or Don John of Austria, but these were only moves in the political game. If she loved at all, it was one of her English favourites, either Leicester or the unfortunate Essex.

Many books have been written about Elizabeth. Two of the best are M. Creighton's *Queen Elizabeth* and *Elizabeth and Essex* by Lytton Strachey.

Elizabeth English princess. Born Dec 23 1635, she was the second daughter of Charles I. After her father's execution in 1649, she was kept in Carisbrooke Castle, where she died, Sept 8, 1650.

Elizabeth British princess. Born April 21 1926, she was baptised as Elizabeth Alexandra Mary. The daughter of the Duke and Duchess of York, the princess is the third in succession to the throne.

Elizabeth Empress of Russia. A daughter of Peter the Great and Catherine, she was born Dec 18, 1700. Having lived a retired life for some years, she appeared in 1741 at the head of the party that deposed the young Tsar, Ivan VI. She then became empress and ruled Russia until her death, Jan 5, 1762. A good part of her reign was occupied in fighting against Frederick the Great. She founded the University of Moscow.

Elizabeth Queen of the Belgians. Born July 25, 1876, she was a daughter of Charles, Duke of Bavaria. In 1890 she was married to Albert, who in 1899 became King of the Belgians. Their family consists of two sons and a daughter.

Elizabeth Queen of Bohemia. Born at Falkland, Fife, Aug 19 1596, she was the eldest daughter of James VI of Scotland. In 1613 she married Frederick the Elector Palatine, who, in 1619, was crowned King of Bohemia. She shared his troubled fortunes and with him became an exile in the Netherlands. After Frederick's death in 1632, Elizabeth remained there for some years in considerable distress, made worse after the death of her brother Charles I. At this time she met the Earl of Craven, who devoted his life to her. In 1661 she settled in London, where she died, Feb 13, 1662. The queen's large family included Sophia the mother of George I, and the soldier prince, Rupert.

Elizabeth Queen of Rumania. A daughter of the Prince of Wied, she was born Dec 29 1843, and in 1860 was married to Charles, or Carol, who became later prince and then King of Rumania. She was Queen Consort until her husband's death in Oct., 1914. Her own followed on March 2, 1916. The queen is best known as a writer of poems and stories under her pen-name of Carmen Sylva. Some of them have been translated into English.

Elizabeth Madame. Name given to the French princess, Elizabeth Philippino Marie Hélène. Born at Versailles, Mar 3 1764, she was the granddaughter of Louis XV and sister of Louis XVI. In 1792 she tried to escape with the king, but was caught at Varennes and imprisoned. On May 10, 1794, she was sent to the guillotine.

Elk Largest species of deer (*Alces machlis*). It is native to northern Europe, Siberia and America where it is called the moose. Fossil remains occur in the Thames valley. The Alaskan elk is a gigantic animal, standing 8 ft at the withers, with broad, palmate antlers weighing 50 60 lb. In Scandinavia the elk is hunted on snowshoes with trained dogs and is rapidly diminishing in numbers. Americans transfer the name elk to the wapiti deer, *Cervus canadensis*. A gigantic elk, once inhabiting Ireland, is now extinct.

El Kantara Town of Egypt. It stands on the Suez Canal, about 20 m from Port Said and has a station on the railway line to the coast. In Jan and Feb., 1915, the Turks attacked British forces defending the canal here, but were beaten back.

Ell (Latin, *ulna*, A S *elan*). Old measure, used chiefly for cloth. It is of varying lengths in different countries, the English ell is 45 inches, the Scottish 37, the Flemish 27, and the Jersey 48 ins. In Holland the modern ell is the metre, 39 37 ins. Ell wand was the old name for a measuring rod an ell in length.

Elland Town and urban district of Yorkshire (W R) It is situated on the River Calder, 3 m from Halifax. There are textile works, flagstone quarries, tile making and fireclay works. Pop (1931) 10,327

Ellenborough English title borne by the family of Law. Edward Law, a Cumberland man, born Nov 16, 1750, was made Lord Chief Justice and a baron in 1802. He resigned in 1818 and died in the same year. His son, Edward Law, born Sept 8, 1790, then became the 2nd baron. He was Lord Privy Seal and President of the Board of Control in 1823. From 1841-44 he was Governor General of India, being responsible for the annexation of Sind. In 1846 he was First Lord of the Admiralty and in 1858 was again President of the Board of Control. In 1844 he was made an earl, but this title became extinct on his death, Dec 22, 1871. His barony, however, passed to a kinsman and is still in existence.

Ellenborough is a village in Cumberland, just outside Maryport.

Ellen's Isle Small island of Loch Katrine, Perthshire, associated with Scott's poem *The Lady of the Lake*.

Ellerman Sir John Reeves. English shipowner. Born May 13, 1862, he became a clerk in a shipping office. In 1902 he purchased part of the Leyland line of steamers and founded the Ellerman Line. Soon he controlled a large shipping fleet, including the Ellerman, Hall, City and Bucknall Lines. In 1910 he was made a baronet.

Ellesmere British island. Situated in the Arctic regions of North America, it is 40,000 sq m. in area, but uninhabitable.

Ellesmere Market town and urban district of Shropshire. It is 11 m from Whitechurch, on the G W Ry and is also served by a canal. Near several meres. Pop (1931) 1872.

The title of Earl of Ellesmere has been held since 1846 by the family of Egerton. The first earl was Lord Francis Leveson Gower, a younger son of the 1st Duke of Sutherland. On the death of the last Earl of Bridgewater in 1829, he inherited the estates of the Egertons and took that name. He was made an earl in 1846 and the present earl is his descendant. The earl's seat is Worsley Hall, Manchester, and his oldest son is called Viscount Brackley.

Ellesmere Port Town of Cheshire. It is 7 m from Chester and stands on the Mersey at the junction of the Ellesmere and Manchester Ship Canals. There are large docks and the other industries are dyeing and the manufacture of chemicals. With Whitby it forms an urban district. Pop (1931) 13,893.

Ellice Islands Islands of the Pacific Ocean. The group of nine islands forms part of the Gilbert and Ellice Islands colony, which became a British Protectorate in 1892 and was formally added to the Empire in 1915. Area, 14 sq m. Pop. 741. See GILBERT ISLANDS.

Elliot Walter Elliot. British politician. Educated at Glasgow Academy and at the university there, he became a doctor. In 1914-18 he served with the R A M C in France. In 1918 he was elected Conservative MP for Lanark. In 1923 he lost his seat, but in 1924, 1929 and 1931 was elected for

Kolringrove. In 1923-24, and again in 1924-26, Major Elliot was Under-Secretary for Health for Scotland, in 1926-29 he was Under-Secretary for Scotland and in 1931 Financial Secretary to the Treasury. Since 1932 he has been Minister of Agriculture. He was made a P C in 1932.

Ellipsis Figure of speech in which a word or words are omitted, although their meaning is implied. The nominative is often omitted as in the sentences, "Who steals my purse steals trash," and "Would he were here," or the antecedent is omitted before the relative pronoun as in "Whom the gods love die young."

Ellis Henry Havelock. British psychologist. Born at Croydon, Feb 2, 1859, after teaching for four years in New South Wales, he took his medical degree in London. He soon afterwards abandoned his practice for literary and scientific work. He writes on scientific subjects in a clear literary style, and has written amongst other books *Man and Woman* (1894-1904), *The Soul of Spain* (1908), *The Task of Social Hygiene* (1912), *Essays in Warlike* (1916), *Kanga Creek* (1922), *The Dance of Life* (1923), *Essays of Love and Virtue* (1931). His greatest work is to be found in his *Studies in the Psychology of Sex* in seven volumes published over a number of years.

Ellora Ruined city of Hydernabad, India. It is 13 m from Aurangabad and is noted for its temple and caves which are among the wonders of India. Extending along the front of a hill for over a mile, these caves were cut in the rocks and the rock temples include Buddhist, Brahmin and Jain examples and date from the 5th, 9th and 10th centuries. The Kailas temple, a famous ruin, is here also.

Ellwood Thomas. English writer. Born in 1639 at Crowell in Oxfordshire, he was converted to Quakerism about 1650. He is chiefly known as the friend and assistant of Milton, whom, from 1662, he served by reading to him. He suggested the idea of *Paradise Regained*. Ellwood wrote a good deal in defence of the Quaker faith and also an *Autobiography* which is full of interest. He died March 1, 1714.

Elm Genus of trees and shrubs (*Ulmus*), native to N temperate regions. The common *U. campestris*, a tree growing up to 130 ft, rarely perfects its winged one-seeded fruits in Britain, where it is usually propagated by layering or suckering. The hard, tough close-grained timber serves for keels, tackle blocks, coffins, wheel naves and common turnery. The indigenous Scotch or wych elm, *U. montana*, which is almost as tall, yields timber much employed for boat and coach building, because it is flexible when steamed.

Elms are subject to a disease which causes the tree to die back. This became serious in France and Belgium after the Great War and in 1927 appeared in England.

Elman Mischa. Russian violinist. Born Jan 20, 1891, son of a Jewish schoolmaster, he made his first appearance in public in St Petersburg in 1904. In 1905 he played in London and was soon recognised as one of the world's masters. In 1920 he was naturalised as an American and made his home in New York.

Elmham Name of several English villages. The largest, North Elmham, is on the Wensum, 5 m from East Dereham and 127 m from London on the

L N E Rly Pop 900 South Elmham is about 5 m from Bungay

Elocution Art of speaking effectively in public. A course in elocution is part of the training of an actor. It is also studied by preachers and those who wish to become public speakers. Much depends upon the natural qualities of the voice, but, however good these are, they can be improved by some knowledge of correct pronunciation, the control of the breath, the right use of expression and gesture and other such matters.

El Paso City, river port and watering place of Texas, U.S.A. It stands on the Rio Grande river, on the Mexican border, and is served by Mexican as well as American railway lines. There is a trade in the minerals, lead, copper and silver, mined in the neighbourhood, and the industries include large smelting works for lead and copper. There is a trade along the river and the city has some manufacturing industries. It is the centre of the Rio Grande reclamation project, and the large quantities of cotton grown on the reclaimed land have brought fresh industries to the city. Pop 162,421.

Elsinore Seaport of Denmark. It stands on the Island of Zealand and on The Sound, and is connected by railway with Copenhagen. The place has a shipping trade and some manufactures and from here a ferry goes to Helsingborg in Sweden. It is the reputed scene of Shakespeare's *Hamlet*. Pop 13,800.

Elstow Village of Bedfordshire. It is just outside Bedford. In 1628 John Bunyan was born near the village in which he lived after his marriage. Pop 500.

Elstree Town of Hertfordshire. It is 7 m from St. Albans, on the L N S Rly and is also reached by the Metropolitan Rly. The place has become a centre of the film industry and here and at Boreham Wood are large studios. In 1936 about 5 acres of studio buildings were destroyed by fire. Pop 22,300.

Elswick District of Newcastle-on-Tyne, on the Tyne within the city boundaries. Here are the extensive works founded by Sir William Armstrong, which now belong to Vickers, Armstrong, Ltd.

Eltham District of London. In the Borough of Woolwich it is 7 m from London Bridge, on the S Rly. It is also served by tramways and motor omnibuses. The open spaces include Eltham Common, Avery Hill and Eltham Park. Old Eltham contains some interesting old houses. Nearer Woolwich is New Eltham. The early kings had a palace here. Most of it has disappeared, but the hall remains. Eltham has associations with Sir Thomas More, whose house still stands. A township of North Island, New Zealand, is called Eltham. It is on the railway from Wellington and is the centre of a dairy farming district.

Ely City, market town and urban district of Cambridgeshire. It is on the Ouse, 16 m from Cambridge and is served by the L N E Rly. It is the chief town of the Isle of Ely and has an agricultural trade. Ely is famed for its cathedral, one of the finest and largest in England. The tower, 170 ft. high, is of rare beauty. Pop (1931) 3,382.

The Irish title of Marquess of Ely, taken from a village in Fermanagh, Ireland, has been held

since 1800 by the family of Loftus. The eldest son of the marquess is called Viscount Loftus.

Ely Isle of District of England. It is part of the county of Cambridge for some purposes, but has its own county council which meets at March. The district, in the north of the county, stretches from Ely to Wisbech and is famous for its market gardens. Pop (1931) 77,703.

Elysium In classical mythology, the fair land, also called the Elysian Fields, where the souls of the good dwell after death. Homer depicts it as being on the western margin of the earth, by other writers it is called the Isles of the Blessed, or Fortunate Islands, and in a later age it is described as being in the nether world. A land of flowers, sunshine and happiness, great heroes were supposed to pass there without death.

Elzevir Name of a Dutch family famous as printers. In 1583 Louis Elzevir began business as a printer at Leiden and the business was continued by his descendants, first there and later at Amsterdam, until 1712. The Elzevirs won a great reputation by the excellence of their printing.

Embalming Method of preserving a dead body. It was practised among the ancient Egyptians, Peruvians and many other races, and has been revived to some extent in modern times in Europe and America. In Egypt the body was embalmed by several methods described by Herodotus and Diodorus, the internal organs being removed and preserved in special jars. Various aromatic resins and astringents, natron and bitumen, were used according to a definite ritual. Not only human bodies but cats, crocodiles and sacred birds were embalmed.

Embankment Originally a bank or mound made to keep water from flowing over the land. Now it is usually confined to such works along river banks, encroachments of the sea being dealt with by piers or breakwaters. Embankments usually include a roadway, the best known example being the Embankments along the Thames in London. Another kind of embankment is the earthwork made along the sides of a railway line when it passes through a cutting or depression.

Embargo Primarily a temporary order to prevent the arrival or departure of a ship. It was usually enforced on enemy vessels on the outbreak of war. The term is now used for the temporary stoppage of a particular trade. For instance there may be an embargo on the export of arms or on the import of drugs.

Embassy Building where an ambassador lives. The word is also used to designate the ambassador and his staff collectively. As a building the embassy is regarded as being on the land of the country that owns it. By a similar convention, an embassy is freed from rates and taxes.

Ember Days Four seasons for prayer and fasting observed in the liturgical churches of W. Christendom. They comprise the Wednesday, Friday and Saturday of the weeks, called Ember Weeks, which begin with the 1st Sunday in Lent, Whitsunday, Holy Cross day (Sept. 14) and St. Lucy's day (Dec. 13). The Anglican communion appropriates the Sundays following them for ordinations, the Roman Catholic church the Saturdays of the Ember Weeks.

EMBEZZLEMENT

Embezzlement

In English law the offence of appropriating money by a servant or agent, or when an agent or collector keeps for himself money paid to him on account of his employer, or where a shop assistant puts in his pocket money paid to him for goods sold.

Emblem

Device or picture made to embody a spiritual idea or to symbolise a quality. In art, emblems have been attached to most of the saints, and even to Jesus Christ. Instances are the lily of the Virgin, the keys of St Peter and the lamb of St John the Baptist, and there are thousands of others. Printers call the marks they use on their works emblems. The modern substitute of the emblem is the badge.

Embolism

Medical term for the condition of obstruction in the arteries or capillaries due to some substance carried in the blood. Usually this condition is caused by masses of fibrin detached from a blood clot formed in a vein on the heart, but it is sometimes caused by foreign bodies which have entered the blood stream. An embolism occurring on the brain may cause paralysis, and when formed in a limb may be followed by gangrene.

Embroidery

Method of decorating materials by means of needle and thread. Beautifully embroidered work was made in Babylon and Greece and the Christian church has always made much use of embroidery to adorn vestments and hangings. Wonderful patterns were worked with remarkable skill and patience and some times, as in the Bayeux Tapestry, historical scenes were depicted.

To day, the more elaborate forms of embroidery are rarely practised except by professional workers for churches and so on. Women's garments are sometimes adorned with embroidery, but much of this is machine made.

Embryology

Section of biology dealing with the developmental stages of an animal or plant from the egg to the mature organism. This science has become of great importance as it is only by the study of the early stages that the true relationships of many organisms can be ascertained, as in the case of the barnacles whose embryology shows that they belong to the Crustacea, although, from anatomical observations they were classed by the older naturalists as mollusca.

The individual plant or animal usually starts its life cycle in the union of two germ cells or gametes, one the sperm cell or spermatozoon, the other the ovum or egg cell. The ovum, after fertilization, undergoes cell division resulting in the formation of tissues and organs, the details of these early stages varying greatly in different types. Further, the evolutionary history of the race is in some way stamped upon the germ cells with the result that the individual recapitulates more or less the stages through which it has evolved.

Emden

Scaport of Prussia, Germany. It stands on the estuary of the Ems, on the borders of the Netherlands, 50 m. from Oldenburg. A short ship canal links the harbour with the River Ems, and Emden is also the terminus of the important canal to Dortmund. The town has a considerable trade for which there are extensive harbours and it is a fishing centre. Another industry is shipbuilding. Pop 27,800.

444

The Emden was the name of a German light cruiser. She displaced 3 600 tons and early in the Great War did a good deal of damage to British shipping in the Pacific and Indian Oceans. On Nov 9, 1914, she was caught and destroyed by the Australian cruiser, *Sydney*, at North Keeling Island. A later light cruiser of this name, launched in 1915, was surrendered by Germany at the armistice.

Emerald

Precious stone, the green variety of the beryl. It is a silicate of beryllium and aluminium, the colour being due to a minute proportion of chromium compounds and varying from a grass green with a yellowish tinge to a deep emerald green. The lustre of the emerald is vitreous with a velvety effect in the finest gem stones. Few specimens are flawless or have uniform colouring. The finest stones are found at Muzo in Colombia.

Emerson

Ralph Waldo Emerson, American author. Born in Boston, May 25, 1803, he was the son of a Unitarian minister. He was educated in his native town and at Harvard, and became a teacher. In 1829 he was selected as minister of a Unitarian church in Boston, but three years later he resigned because his views were unacceptable to his congregation. He then visited England where he began his lifelong friendship with Carlyle and met Coleridge and Wordsworth. Soon after his return, he settled at Concord and earned a living by preaching and lecturing but his reputation was really made by his writings, especially his essays and poems. He kept up a close connection with his English friends and lectured in England in 1847. He died at Concord, April 27, 1882, and was buried in Sleepy Hollow cemetery.

Emerson's first book was called *Nature*, 1836, and in it and its successor, *The American Scholar*, he outlined the principles of his philosophy, called transcendentalism. The organ of this movement was *The Dial*, which he edited for two years. In 1841 he published his first volume of essays and in 1847 his first volume of poems. *Representative Men* are lectures delivered in England, his visit to which country inspired *English Traits*. His later volumes include *The Conduct of Life*, 1860, *Society and Solitude*, 1870, and *Letters and Social Aims*, 1876.

Emery

Dark brown or greyish black variety of corundum. It is composed of alumina mixed with the iron oxides, magnetite and haematite, and is used as an abrasive on account of its extreme hardness. It is found in bands or irregular granular masses in crystalline limestones associated with metamorphic rocks in Naxos in the Aegean Sea, but its chief commercial sources are Ontario, New York State and the Transvaal. The rock is reduced to various grades of powder, which is used for grinding, cutting and polishing metals, etc.

Emetic

Substance which, when taken into the stomach or injected subcutaneously, induces vomiting. It is used in cases of whooping cough and bronchitis to remove accumulations of mucus, in some forms of dyspepsia where evacuation of the stomach is necessary, and in many cases of poisoning. Emetics in general use are mustard or salt in warm water, sal volatile, ipecacuanha wine and sulphate of zinc, while apomorphine is injected beneath the skin as a powerful but non irritant emetic.

Emigration

Act of leaving one's native country in order to settle

in another. From the earliest times there have been emigrations of people from one land to another, but emigration in the modern sense only began in the 17th century when Europeans crossed the Atlantic to settle in America. There were also emigrations within Europe such as those of the Huguenots after the revocation of the edict of Nantes. In the 19th century emigration to North America reached enormous proportions, Ireland and Scotland being two of the countries that contributed greatly to it. Australia and parts of South Africa were also peopled by European emigrants.

After a time, as the new countries filled up, they began to place restrictions on immigrants. This took the form of requiring them to possess a certain capital, or a certain standard of education, or freedom from disease. Still more drastic measures were taken in the United States, Australia, Canada and elsewhere to keep out coloured immigrants on the ground that their lower standard of living was a menace to the white man.

After the Great War, for these reasons and also for others, e.g., pensions, insurance and other benefits which made people more reluctant to leave the homeland, there was a great decline in emigration. For instance in 1913, 196,278 emigrants left the United Kingdom for Canada, 77,934 for Australia and New Zealand, and 77,014 for U.S.A. In 1933 the corresponding figures were 28,391, 12,195 and 22,159.

The United States adopted a policy of only allowing a limited number of immigrants from each nation. For each a quota, based on the number of each nationality already in the country, was fixed, and only this number was admitted each year. In 1933 the number allowed was 23,068 divided as follows:

British Isles	1317	Italy	3477
Germany	1919	Other Nations	17335

In order to encourage emigration, the British Government has an Oversea Settlement Department at Caxton House, Westminster, S.W. 1. Suitable emigrants can be helped and under the Empire Settlement Act of 1922 over 50,000 were assisted to emigrate in 1927.

Emir Arabic word for a ruler or commander. Other forms of it are *amir* and *amir*. The form *omir* is only used in Africa, where it refers to an independent chieftain.

Emmaus In Biblical geography, a village in Palestine. Its exact position is unknown, but it was not far from Jerusalem. It was for a long time identified with the Emmaus, rebuilt by Vespasian under the name of Neopolis, now known as Amwas. Other identify it with Kolonieh and El Kubebe, both about ten miles from Jerusalem.

Emmet Robert, Irish politician. He was born in Dublin, the son of a doctor, in 1778, and went to Trinity College there. Influenced by a stay in France, he decided to make an attempt at securing independence for Ireland. He planned a rising in Dublin, but this was made known to the authorities and Emmet, having fled to Wicklow, was caught. Found guilty of treason he was hanged, Sept. 20 1803.

Empedocles Greek philosopher and poet. He was born at Agrigento in Sicily. He set up a democracy there, but later left Sicily and settled in Peloponnesus. His works, all in verse, include a poem on medicine on purification and on natural science. He held there were four

unchangeable elements, fire, air, earth and water, and two opposing forces, love and hate, which bind or separate.

Emperor Word taken from the Latin *imperator*, to rule, and used for a ruler more powerful than a king. Julius Caesar called himself *imperator* and his nephew, Augustus, was the first of the Roman emperors. The title was used by those who claimed to be the successors of the Roman emperors. See **EMPIRE**.

A large butterfly found in the south of England is called the emperor, or purple emperor, on account of the purple lustre on the male. There is also an emperor moth which is found in Great Britain.

Empire Term used loosely for a state of the most powerful kind which is ruled by an emperor or empress. It comes from the Latin word *imperium*. The German word for it is *Reich*. The first empire was the Roman. Later the word was used for the great states that existed before Rome, and men speak of the Assyrian, Persian, Babylonian and other empires.

The Roman Empire was continued by the Byzantine and the mediaeval empires and on the ruins of the latter arose the Austrian Empire in 1804 and the German Empire in 1871. Both these disappeared in 1918, while the Russian Empire which also claimed succession from Rome through Byzantium, was destroyed a year earlier. The title of Emperor of the French was taken by Napoleon in 1804 and France was an empire for 10 years. This was the first French Empire. The second lasted from 1852 to 1871 and its ruler was his nephew, Louis Napoleon, known as the Emperor Napoleon III.

In the 19th century, too, the term empire began to be used for the lands under the King of Great Britain and Ireland. India was made an empire when the title of empress was given to Queen Victoria in 1875. In America two empires, Brazil and Mexico arose, but each had only a short life. The only empires in the world since 1918 are the British and the Indian, one within the other, and the Japanese, but neither of these has any resemblance to the earlier empires.

THE HOLY ROMAN EMPIRE The Empire, in full the Holy Roman Empire, known also as the Mediaeval Empire, lasted from 800 to 1806. It was created by Charlemagne, who was crowned emperor in Rome by the Pope and believed himself to be the successor of Augustus Caesar. It consisted of the lands under his rule, which included the countries now known as France, Germany, part of Italy and other European lands. This empire was divided after his death and in the 9th and 10th centuries it fell to pieces.

The Empire was revived in 962 by Otto the Great, Duke of Saxony who was crowned, like Charlemagne, in Rome by the Pope. His empire, however, did not include France, but consisted chiefly of Germany and Italy. Otto's son and other descendants succeeded him, but the idea grew up that each must be elected and be crowned by the Pope. The Electors at first were all the princes of Germany, but gradually they were narrowed down to seven, the Archbishops of Mainz, Treves and Cologne, the King of Bohemia, the Count Palatine of the Rhine, the Margrave of Brandenburg and the Duke of Saxony.

The Saxons, descendants of Otto the Great, were emperors until 1002. Then came the Franconian or Salian, emperors who ruled

EMPIRE DAY

until 1124 During this time there took place the tremendous struggle for supremacy between the Papacy, under Pope Gregory VII. (Hildebrand) and the emperors. The Franconian emperors were succeeded by the Swabian house of Hohenstaufen and during their reigns the fight was renewed. On the whole the popes had much the better of it and when Frederick II died in 1250 the Empire was in a state of chaos.

After a period without a ruler, Rudolph of Hapsburg was elected German king in 1273, but he was not crowned at Rome and so is not reckoned as an emperor. For the next 50 years or so there was continual fighting for the imperial crown and, although various princes were crowned emperors, no one had any real authority. In 1346 Charles, King of Bohemia, became ruler of Germany and later was crowned emperor. By this time Italy had been lost and the Empire consisted of little more than Germany, although the titular connection with Rome was maintained.

Charles was followed by his two sons, Wenceslaus and Sigismund, and on the death of the latter Albert of Hapsburg secured the Empire. From then until 1806 the Empire was in practice, though not in theory, the possession of that great family. One after the other its members were elected and took the imperial title, but, especially after 1648, the Empire was but a loose collection of rival states over which the emperor had little authority. The greatest Hapsburg emperor was Charles V, the last was Francis, who resigned an empty dignity in 1806. He belonged to the family of Hapsburg Lorraine, for he was descended from the marriage of Maria Theresa, the heiress of Charles VI, and Francis, Grand Duke of Lorraine.

Empire Day In Great Britain an annual celebration. It takes place on May 24, the birthday of Queen Victoria, and dates from 1904. The idea is due to the 12th Earl of Meath. Empire Day is not a bank holiday.

Empire Free Trade See IMPERIAL PREFERENCE

Empire Marketing Board

British Government organisation, founded in 1926, to advise the government on matters connected with marketing Empire produce. In 1933 its services were transferred to the Imperial Economic Committee. Publicity was an important activity while in the colonies suitable institutions at home and in the colonies it encouraged research in connection with Empire agricultural products suitable for the home market.

Empire Style Neo-classical style of French decoration, in vogue during Napoleon's consulate and empire. Following the Directorate style, it derived its impulse from Napoleon's campaigns in Egypt, which popularised the sphinx, and from Pompeii discoveries then recently made at Pompeii and Herculaneum. Architecture displayed the Roman grandeur, furniture with swelling, tangular forms, sometimes with motives, curves, as in sofas, and curvilinear bore the such as wreaths and bows. Textiles bore the bee, eagle and Napoleonic N. Its influence lasted until 1840.

Empiricism Knowledge which rests solely on experience and induction, not on the study of laws and general principles. It is used for a school of philosophy

in which these are the essential ideas. The philosophers who have taught empiricism include Hobbes, Locke and John Stuart Mill. One who engages another to work for him or her at a wage or salary, either temporarily or permanently. An employer must, in his dealings with his employees, observe the laws concerning the relations between master and servant, such laws include the length of notice necessary to terminate an engagement, and between the employer and employed there is a contract.

At common law an employer is liable to pay damages to a servant who is injured in the course of his employment. This was dealt with in detail in the Employers' Liability Act of 1880. The matter is also dealt with in the various Workmen's Compensation Acts, and a person who is injured may decide under which he shall take action. To-day the majority of cases are dealt with under the Workmen's Compensation Acts. Employers usually insure themselves against the risk of injuries to their employees.

Employment Exchange

In 1905 local authorities in Great Britain were empowered to open labour exchanges as they were called, and in 1910 a national system was established. Buildings for the purpose were erected or bought all over the country. In 1910 the name was changed to employment exchanges. They were at first controlled by the Board of Trade, but later passed under the Ministry of Labour. These exchanges are responsible for paying out benefits to those insured against unemployment (q v).

Empress Female ruler, or the wife of an emperor. It comes from the Latin *imperator* and was used for the female rulers at Byzantium. Several rulers of Russia were empresses, as were the wives of the French, German and Austrian emperors, but the last named were not sovereigns. Some of the boats of the Canadian Pacific are named empress, e.g., *Empress of*

Elbe River of Germany. Rising in Thuringia it flows for 210 m. through Westphalia and Hanover to the North Sea. Emden stands near its mouth and it is connected with Dortmund and other places by the Dortmund Ems canal.

Emsworth Seaport of Hampshire. At the month of the little River Ems, it is 76 m. from London and 9 from Portsmouth. Pop. 2200.

Emu Large bird found only in Australia and the adjacent islands. Though smaller, it resembles the ostrich, having only rudimentary wings. It can run very fast and swim well. Emus live in flocks in uninhabited parts and feed chiefly on fruit. They are hunted with dogs and will breed freely in captivity. The male is smaller than the female and incubates the eggs, which are green.

Enamel Term applied to either a hard, smooth, resistant coating on metal pottery, etc., or to a varnish paint or lacquer on wood, metal and leather. The first kind consists of a glossy material applied in paste form to an article which is afterwards heated in a furnace. Its application in coloured designs was brought to a fine art by Egyptian, Greek, Roman, Byzantine and mediaeval craftsmen.

The second kind consists of a pigment added either to a linseed oil varnish containing kauri gum or other resins, or to a resin dissolved in pyroxylin or cellulose nitrate

Encaenia Annual festivals in memory of the dedication of particular churches. An instance is that commemorating the Temple at Jerusalem. The annual commemoration of the founders and benefactors of Oxford University in June is called the Encaenia.

Encaustic Method of painting by means of pigments with melted wax as a medium. It was used by the Greeks and Egyptians of the Graeco-Roman period. In one process the pigments were mixed with white wax and moulded into sticks or cakes and the tints were blended with a heated metal tool, the rhabdion. In another method the brush was used for laying on the colours, the whole picture being then heated.

Encke Johann Franz. German astronomer. He was born at Hamburg, Sept. 23, 1791, and after service in the army, became director of an observatory near Gotha in 1817. Director of the observatory at Berlin from 1825-87, he died at Spandau Aug. 26, 1865. Encke gave his name to a comet. This was discovered by a French astronomer in 1818, but Encke did valuable work in calculating its movements, he also made observations on the transits of Venus.

Enclosure Common land converted to the use of a private individual. In England, in the Middle Ages there was an enormous amount of common land, but gradually much of it was enclosed by the lords of the manor. By law they could do this, provided they left enough unenclosed for the use of the tenants. In the 18th century by special Acts of Parliament dividing the land between the lord of the manor and the tenants, about 5,000,000 acres were enclosed and the practice continued until 1845, when commissioners were appointed and further enclosures were few and small.

Encyclical Circular letter addressed by an ecclesiastical authority to its members. In the Anglican communion the word nowadays denotes letters summarising the episcopal conclusions formed at the periodical Lambeth conferences. In the Roman Catholic communion it is reserved for letters addressed by the pope to all bishops on topics interesting the church at large.

Encyclopaedia Word of Greek origin meaning the whole circle of knowledge. It is used for books that give, in alphabetical order, information on all subjects of human interest and sometimes for works not arranged on the alphabetical plan. Books dealing in similar fashion with or branch of knowledge, e.g. education or chemistry, are sometimes called encyclopaedias.

Encyclopaedias go back to the time of the Greeks. The first English example appeared in 1701, and in 1728 Ephraim Chambers published one. The *Encyclopaedia Britannica* first appeared in 1771 and until it passed under American control was the leading British example. The most famous of all was the *Encyclopédie* edited by Diderot and D'Alembert. The group of brilliant men who wrote for it were called the *Encyclopédistes* and included Voltaire and Rousseau. In recent years the tendency has been to make encyclo-

paedias shorter and handier, and the present work is written with this end in view.

Enderby Land District in Antarctica. Situated in about 50° E long, and S of Madagascar, and within the Antarctic Circle. It was named by John Biscoe, who discovered it in 1831, when sailing in the London whaling brig *Tula* belonging to Enderby Brothers. The Enderby quadrant designates one of the four map-sectors constituting the south polar region.

Endocrinology Study of the endocrine (internal secreting) glands and their secretions (hormones). These glands include the thyroid, thymus, supra-renal, pituitary, pineal body, carotid and coccygeal glands, which yield up their secretion to the blood stream without the intermediary of a duct and others (pancreas, ovary, testes) which though provided with ducts for certain secretions, manufacture also others (endocrines) which reach the blood directly. Thus the term "ductless glands" is not synonymous with endocrine glands.

The internal secretions govern nutrition, growth, metabolism. Deficiency in some may produce abnormalities such as cretinism or dwarfism, excess may cause gigantism, and in the case of the thyroid, exophthalmic goitre. Both physical conformation and mental make-up are affected by their functioning. Defects may be remedied by the administration of glandular preparations or by surgical removal of portions of the glands. See GLAND.

Endogamy See EXOGAMY.

Endorsement Writing on the back of, a document constituting a sanction. Cheques, bills of exchange and other documents must be endorsed before they can be paid into a bank. The endorsement usually takes the form of the signature of the person to whom the document is made out.

Endowment Money settled on an institution or society. The term is generally used for money given or bequeathed to a religious, educational or philanthropic institution which, being corporations, can hold land or other property in perpetuity. In Great Britain a vast sum of money is held as endowments, some of it being controlled by the Charity Commission.

Endowment policies, as they are called, are issued by insurance companies to provide money for educating a son or daughter, or starting them in life, or for some other purpose.

Endymion In Greek legend a youth of remarkable beauty, variously described as a king, shepherd or hunter. He was kissed by Selene (the moon) when asleep in a cave on Mount Latmus in Caria. Selene caused him to sleep for ever that she might be able to kiss him without his knowledge. Keats called his most considerable poem *Endymion*.

Enema Fluid injection into the bowel. Enemata may be cleansing, comprising water with or without soap and purgatives, nutrient, when stomach derangement prevents digestion, sedative for painful bowel irritation, destructive for thread-worms, and healing as for intestinal ulcers. A rubber ball syringe or a funnelled tube passes the fluid through a round-ended nozzle into the rectum.

Energy Term used in physics for the power of doing work. This power is not necessarily active. It may be stored up in a body, as in the case of a coiled spring which possesses potential or static energy. Work implies the action of force and motion, and when the spring is released these factors become active in the performance of work.

In static energy there must be that which will cause the continuance of the force in spite of motion as in the elasticity of the spring. In kinetic energy, the energy of motion, there is inertia or momentum to ensure the continuance of the motion against resistance. A leaden weight moving rapidly will produce a greater effect than a ball of wool moving at a high speed. Energy is measured in units of work or foot pounds, one foot pound being the amount of work required to raise one pound vertically one foot.

Enfield Market town and urban district of Middlesex. It is 10½ m from London on the L.N.E. Ry. The New River passes through the town. Enfield Lock, where is the Royal smallarms factory, is a district near

Enfield Chase, fragments of which survive in Hadley Wood and elsewhere, was at one time a noted hunting ground and a palace was built here. The greater part of the palace was demolished in the 18th century. What remained has been used as a school and then as a club. A section of a cedar brought from the W. Indies about 1780 and believed to have been the first cedar to be planted in England, is preserved in Enfield library. Pop (1931) 67,869.

Enfranchisement Liberation or the admission to political privileges. Persons are enfranchised by being given the right to vote, as was done in 1918 and 1928 in Great Britain when women were made voters. Another kind of enfranchisement is turning a leasehold tenure into a freehold one.

Engadine Valley of Switzerland. The upper part of the valley of the River Inn, it is on the borders of the Tirol. About 60 m long it is famed for its beauty and climate. It is divided into two parts, upper and lower, and in it are several places visited for health and pleasure, such as St. Moritz and Pontresina.

Engelberg Pleasure resort of Switzerland. It stands at the base of the Titlis Alps 14 m from Lucerne. The chief building is a Benedictine abbey with a fine and valuable library and an old church. The place is noted for its cheese. Pop 2500.

Engghien French prince, the last of the Condé family. Louis Antoine Henri de Bourbon Condé was born Aug. 2, 1772. He commanded a royalist army against the republicans before 1801, when he settled in Baden, but three years later, falsely accused of conspiracy, he was arrested by Napoleon's orders, tried by a mock court martial and shot, March 21, 1801.

Engine Mechanical appliance used for converting one form of energy into another. The conversion of heat into mechanical energy is seen in the steam engine and in gas, oil and internal combustion engines. Formerly the term was applied to any complex machine, such as a beer engine or water engine, and in a military sense to any

appliance used in war. Of modern types of engines the internal combustion engine and the Diesel oil engine are noteworthy.

Engineer One engaged in any engineering work. There are engineer officers in the navy. These pass through courses at Keyham and Greenwich and then enter the navy, where they rank as engineer lieutenant, engineer commander and so on up to engineer vice admiral. Owing to the increase in the power of warships, this branch of the service is of much greater importance than formerly. In the army engineers belong to the corps of royal engineers, on gineers are also employed in the air force.

In civil life engineers are employed on a great variety of work and are classed accordingly. They are trained in colleges and at the universities, most of which give degrees in engineering. Engineers are employed by the Board of Trade, the Post Office and other Government departments, but more find work with railway companies, shipbuilders and contractors, whilst there are many openings with local authorities and companies that possess electric light, gas and water plants. Every large city or town has a city or borough engineer with a staff.

Skilled artisans engaged in making engines, boilers and the like are called engineers. These form a powerful trade union, the Amalgamated Society of Engineers. The word was first used in England in the 13th century as a military term.

Engineering Civil engineering is concerned with the design and construction of bridges, roads and docks and with irrigation and its associated mechanical devices. Mechanical engineering deals with the machinery for generating motive power and with mechanical appliances for trades and manufacturing processes. Electrical engineering is concerned with all forms of electrical machinery for generating power and the methods of electric lighting and heating. Further specialisation has resulted in the important branches of mining, metallurgical, agricultural, chemical and wireless engineering.

The principles of engineering science and their practical application in many directions appear to have been known in very ancient times as is demonstrated in the remains of constructional work in Egypt, Crete and elsewhere. The remains of double cylinder force pumps used by the Romans show a high state of development of mechanical knowledge.

Civil engineering as a definite branch began in the 17th century, and the discovery of the steam engine and the progress of scientific knowledge brought about the specialisation of other sections.

The interests of the science are fostered by the Society of Engineers in London and by the Institutions of Civil, Mechanical and Electrical Engineers whose headquarters are also in London. The British Engineering Standards Association exists to assist the profession. At the National Physical Laboratory there is a research department for engineering, and at South Kensington there is an engineering museum.

ENGINEERING AS A CAREER—It is said, and with some truth, that engineers, like poets, are born, not made. At all events a "feeling" for machinery is necessary to the would-be engineer if he is to find success and happiness in his craft.

To become a skilled artisan it is necessary to enter a workshop at the age of 15 or 16, and to serve an apprenticeship of four or five years at a nominal wage. The artisan's pay is not high—usually somewhere in the region of £3 10s to £5 per week.

Technical apprentices are those who propose to take up engineering work of a higher grade, and are usually boys of 16 to 18 years, and of good education. Their apprenticeship period is three or four years.

It is also generally possible, and a great advantage, to take a degree in engineering at a university or a diploma at a technical college, either before, or concurrently with, experience in or on works—but it should be remembered that the latter is essential.

Training will vary according to the particular branch of engineering it is intended to enter, and it is advisable to decide this at the outset. Full information of training, qualifications necessary and examinations which may be taken, is obtainable from the secretaries of the various technical institutions representing the particular branches of engineering. See also CIVIL ENGINEERING.

AUTOMOBILE ENGINEERING—No new industry has made such progress of recent years as that of the manufacture of motor cars. The possibilities for an automobile engineer are undoubtedly good for the able, trained and enterprising man, but like most other departments of engineering, it is at present somewhat overcrowded. The wage rate varies widely, but there are real opportunities for ultimate advancement for qualified men in the private car and commercial vehicle factories, the passenger carrying concerns and maintenance.

Those contemplating training for this branch of engineering should consult the Institution of Automobile Engineers (Watergate House, York Buildings, Adelphi, London, W.C. 2), the council of which has given considerable thought to the correct procedure for the trainee—and is therefore in a position to advise, through its secretary, on such questions as suitable works apprenticeship, Technical Evening and Part-time Day Classes, Full-time University Courses, and Full-time Courses at certain specialised colleges.

CIVIL ENGINEERING—Under the term "Civil Engineering," as it is popularly understood, may be grouped work on railways, canals, harbours, docks, etc., structural steelwork and municipal engineering (waterworks, sewage, etc.).

As with the other branches of engineering, practical experience and scientific knowledge are the essentials, the latter being obtainable in a variety of ways. Advice on the possible avenues of training and the qualifications necessary should be sought at an early date from the Institution of Civil Engineers, Great George Street, Westminster, London, S.W. 1. (It should be noted that the conditions of admission to this Institution are such as to be capable of fulfilment by one who has been trained in any branch of engineering.)

There is a field for Civil Engineers both at home and abroad. Pay usually commences at about £250 and may rise to £1000 or more with suitable adjustments to conditions of living abroad.

ELECTRICAL AND WIRELESS ENGINEERING—Electrical Engineering is divided into two classes, manufacturing and operating. It is advisable to take a thorough course in the theoretical side, and the usual apprentice-

ship is necessary. The student should qualify for membership of the Institution of Electrical Engineers (Savoy Place, Victoria Embankment, London, W.C. 2).

The possibilities of advancement for the electrical engineer are perhaps more promising than in any other department of engineering. The field of manufacture offers the widest scope for advancement and remuneration, but the development of Wireless Telegraphy and Broadcasting has introduced extensive possibilities in technical and administrative positions.

The more responsible posts carry salaries from £200 upwards, sometimes rising to £1000 a year or more. Abroad, in the Dominions and Colonies, salaries usually commence at £400 to £600 a year.

MINING ENGINEERING—There is scope for the Mining Engineer, both at home and abroad, in commercial firms (which in the British Isles implies chiefly coal, with some iron ore, lead and tin), as mine inspectors and surveyors under the Mines Department and occasionally for Government posts in the Colonies.

Practical experience is essential, while the scientifically trained man (preferably a University Graduate) is more and more in demand for coal mining, metalliferous mining or oil-field development. Depending on the branch or branches of mining engineering adopted, the student should qualify for membership of one or more of the recognised technical Institutions, viz., The Institution of Mining Engineers, The Institution of Mining and Metallurgy, both of 225 City Road, London, E.C. 1, and the Institution of Petroleum Technologists, Aldine House, Bedford Street, London, W.C. 2.

Salaries for trained engineers range from £250 upwards per annum, mine managers earn £500 and upwards, while abroad the rates may be considerably higher. British qualifications are accepted in all parts of the world.

Engineers Royal Corps of the British Army It is organised into electric, field, fortress, postal, printing, railway and surveying companies, as well as a bridging, tracing and a searchlight battalion. In time of war they take the field in companies attached to various divisions or brigades. The corps may be said to date from 1772. Its strength in peace time is about 20,000 officers and men, but in 1918 it had risen to 340,000. The engineers are commonly called the sappers. Entrance to the corps is by competitive examination, after which the successful candidates pass through a course at Woolwich.

England Chief part of the island of Great Britain. Once a separate kingdom, it has become the nucleus of the United Kingdom and of the British Empire. Its king has become the ruler of vast areas including India, and its Government has, with modifications, been extended over large parts of the globe. Its area is 50,874 sq. m. Its population at the census of 1931 was 37,354,917, of whom 17,844,709 were males and 19,510,208 were females. London is the capital.

PHYSICAL FEATURES—The country, including Wales for this purpose, is almost an island, its only land boundary being where it touches Scotland. Its extreme lengths are 430 m. and 370 m., and it has a coastline of about 1800 m. Most of the country is fairly

level without any ground over 1000 ft high in the N.W., however, are mountainous areas. The country is well watered. The chief rivers are the Thames, Severn (partly in Wales), Trent, Tyne, Tees, Great Ouse, York shire Ouse, etc. Round the coast are many excellent harbours and river mouths on which are great ports such as London, Liverpool, Hull, Bristol, Southampton and Plymouth. A network of railways covers the land, but canals are less general. Off the coast are a number of islands, the largest being the Isle of Wight.

DISTRIBUTION OF POPULATION—England is divided into 40 counties, which vary much in size and population, the largest being Yorkshire and the smallest Rutland. The population is very unevenly distributed, as for nearly 200 years the land has become more industrial and less agricultural. It tends to gather in great industrial areas. More than half the population live within an easy radius (say 25 m) of London and Manchester. In the 20th century there has been a tendency for industry to congregate in the south, a reversal of the process of the 18th and early 19th centuries when it congregated in the north. In the agricultural counties, Lincolnshire, Norfolk, Wiltshire and Somerset, for example, the tendency is for the population to decline, if it does not do so it is because of its proximity to an industrial area. The largest cities after London are Birmingham, Liverpool, Manchester and Sheffield, all with over 600,000 inhabitants. Leeds, Bristol, Hull, Bradford, Newcastle, Stoke, West Ham and Nottingham have each over 350,000 whilst Portsmouth, Leicester, Salford and Croydon are very near that figure.

England Church of National Church of England and the recognised parent of the Anglican Church throughout the world. It dates from the 6th century when St. Augustine settled at Canterbury and began to preach Christianity in the country. It was soon organised into dioceses under bishops, and this organisation has continued. The main influences came from Rome, but Celtic influences were mingled with these.

Under Henry VIII the Church of England broke away from Rome. Its doctrines were reformed under Edward VI, and since the time of Elizabeth there has been no fundamental change. Its doctrines are in the 39 articles, and its services are contained in the Book of Common Prayer, both legalised in that reign.

After the Great War the Church in Wales, hitherto an integral part of the Church of England, was disestablished, and now forms an independent branch of the Anglican Church under its own archbishop. The Church of England is organised in two provinces, Canterbury and York, each under an archbishop, and in 43 dioceses. The two archbishops and 22 bishops sit in the House of Lords.

The Church of England is controlled by the state, and no alterations can be made in its doctrines, or its form of worship, without the sanction of Parliament. In 1927 and 1928 attempts to revise the prayer book were rejected by the House of Commons. Under Parliament, it is governed by a national assembly, a body set up in 1920 and consisting of three houses, bishops, clergy and laity. There is also an older body called Convocation (q.v.). In addition there is an annual church congress, and periodically a conference of all Anglican bishops meets at Lambeth.

In 1931 the beneficed clergy in the Church of England numbered 12,773. There were during the year 1930 200,000 confirmations and 430,621 baptisms. There were 2,401,835 communicants at Easter.

Englefield Green Village of Surrey. It is 14 m from Egham and near Windsor Park. The village is the scene of Mrs. Oliphant's *Neighbours on the Green*. Another Englefield is a village in Berkshire, about 6 m from Reading.

English Channel Arm of the sea, between England and France. On the west it connects with the Atlantic Ocean and on the east with the North Sea. It is narrowest between Dover and Calais (21 m), and widest between Lyme Regis and St. Malo (145 m). Its length is 280 m. The English coastline is 400 m, and the French nearly 600. The French call it La Manche, the sleeve. See DOVER.

Engraving Art of cutting a design upon wood, metal, or stone to obtain an impression of the drawing in ink upon paper. The woodcut was the earliest form of engraving and was at its height in the 15th century. In this process the parts to appear white on the print were cut away on the wood block, leaving the black parts in relief. In engraving on copper and later on steel-coated copper, popular in the 19th century but now largely superseded by photographic and lithographic processes, the drawing is incised by means of a steel graver or burin. Engraving on stone is known as lithography. There is a fine collection of engravings in the British Museum.

Engrossing Form of writing in a fair, round legible hand which is used for copying or writing legal documents. Formerly the engrossing of documents was done in a peculiar script modified from the ancient court hand and often far from legible.

Engrossing is also applied in a legal sense to the wholesale purchase of goods to create a monopoly for the purpose of raising prices. At one time it was an offence against the law.

Enham Village of Hampshire. It is 2 m from Andover. After the Great War it became a centre for the treatment and training of disabled soldiers. The full name is Knight's Enham.

Enlistment Act of enlisting or enrolling oneself in the ranks of the army or air force. A recruit enlists on certain conditions of pay, etc. and for a certain period. If accepted as fit he signs an attestation paper, takes the oath of allegiance and becomes subject to military law.

Ennerdale Lake of Cumberland. About 3 m long and 1 m broad. It provides Whitehaven with a water supply.

Ennis Urban district and county town of Co. Clare, Irish Free State. It stands on the River Fergus 25 m from Limerick and is served by the G.S. Rlys. Its port is Clare Castle. The trade is agricultural and there are some industries. Pop. 5300.

Enniscorthy Urban district and market town of Wexford, Irish Free State. It stands on the River Slaney, 77 m from Dublin on the G.S. Rlys. The chief object of interest is the castle, now a

private residence, and near the town is Vinegar Hill, the site of a rebel camp in 1798. The town has brewing and distilling industries. Pop 5500.

Enniskillen Market and county town of Fermanagh, N. Ireland. It is 116 m from Dublin and 38 m from Belfast on the G.N. (Ireland) Rly. and stands on an island in the River Erne, with suburbs on both sides. There is an agricultural trade, also some river traffic. Pop 4850.

Enniskillen or Inniskilling, a great Protestant centre in the time of William III., gives its name to two regiments of the British Army. These are the 28th Foot, known as the Royal Inniskilling Fusiliers and the Royal Inniskilling Dragoons. In 1921 the latter regiment was disbanded and its name transferred to the 5th Dragoon Guards.

The title of Earl of Enniskillen has been borne since 1780 by the family of Cole. The earl's eldest son is called Viscount Cole, and his seat is Florence Court, Enniskillen.

Ennius Quintus Roman poet. One of the founders of Latin literature, he was born at Rudiae in Calabria about 240 B.C. and died in Rome about 170 B.C. He served with the Roman army in Sardinia and was taken by Cato to Rome, where he taught Greek. His great work was the *Annales*, a chronological account, written in hexameters, of Roman history, of which only fragments survive.

Enoch Name of four Old Testament patriarchs. One, the seventh in descent from Adam, the son of Jared and father of Methuselah, "walked with God" and after living 365 years, "was not, for God took him" (Gen. v., Heb. xi.).

The apocryphal Book of Enoch, comprising primitive literary fragments compiled after 200 B.C. and completed under Herod the Great, is quoted in Jude 14. The other Enochs were a son of Cain, a grandson of Abraham and Keturah, and a son of Reuben.

Ensign Flag carried by a ship to show her nationality. Each nation has its own ensign, usually one for the navy and one for the mercantile marine. Great Britain has three ensigns. The white is for the royal navy, the blue for the royal naval reserve and the red for the merchant navy. Ships of the Royal Yacht Squadron have the privilege of flying the white ensign. Each ensign has the Union Jack in one corner. The ensign flying upside down is a sign of distress. In 1931 an ensign for aircraft was authorised. It is of light blue with a dark blue cross, edged with white, and has the Union Jack in the first quarter.

Ensign Former rank in the British Army. It was the equivalent of the second lieutenant of to-day. The duty of the ensign was to carry the regimental colours. The rank was abolished in 1871.

Ensilage Method of preserving green fodder or other crops. The material (silage) is stored in pits, stacks or towers (silos) so as to retain its succulence. It is necessary to exclude the air after fermentation is complete, otherwise over heating of the silage takes place and the presence of organic acids gives rise to souring. Modern silos are built of wood, iron or concrete, the stack form is useful for saving hay crops in wet seasons.

Entablature In classical architecture the horizontal super-

structure surmounting the columns and resting upon the capitals. It usually comprised three members, the architrave, carried from column to column, pier or wall, the frieze, if present, and the projecting, protective cornice. All these members, originally of timber, preserved when translated into stone, some reminiscent features, e.g., triglyphs represented beam ends. The frieze was utilised for decorative sculpture and painting, but sometimes tended in late classical times to become overloaded and incongruous.

Entail Legal term for the rule by which real property is settled on a succession of heirs. In England a great deal of land was once settled in this way, but the amount gradually grew less since an entail could be broken with the consent of the heir. The system was finally ended by the Law of Property Acts of 1925. Real property can only be dealt with now by an ordinary settlement, although such is sometimes called an entail.

Entebbe Town of Uganda. It stands on a northern opening of Lake Victoria, and is the administrative capital of the British protectorate. Steamers go from here to other places on the lake, and there are also a mail and telephone service and an aeroplane landing ground.

Entente Cordiale Term for the friendship between Great Britain and France that began early in the 20th century and resulted in the alliance that carried on the Great War.

Enteric Fever Disease more properly termed typhoid fever (q.v.).

Enteritis Inflammation of the mucous membrane of the intestine, popularly called inflammation of the bowels. It receives specific names according to its locality, e.g., appendicitis. Its most marked symptom is diarrhoea. It may be due to eating unripe fruit, may accompany certain infective diseases caused by micro-organisms, such as cholera and typhoid fever, which is often called enteric fever, or may be a chronic sequel to dysentery. Epidemic enteritis in young children is termed summer diarrhoea. See COLITIS.

Entertainment Amusement or diversion, any public spectacle, such as a cinema or theatrical performance, sporting event, etc. In Great Britain there is a tax on entertainments. It was introduced in 1916 and is in a scale which varies according to the price charged for admission.

Entertainments in schools and educational institutions are exempt from the tax, which in 1935 produced just over £9,724,280.

Entomology Branch of zoology concerned with insects. Most jointed invertebrates, including spiders, mites and centipedes, were formerly included, but the word is now restricted to the true or six-legged insects. Economic entomology considers insects in relation to mankind's interests. The Entomological Society of London, 41 Queen's Gate, S.W. 7, founded in 1834, and various foreign societies, specialise in this study. There is an Imperial Institute of Entomology with headquarters at the Natural History Museum, London, S.W. 7.

Entrepôt Term used for a store or bonded warehouse. It is also used for a seaport through which goods

pass London is an entrepôt of the world's commerce

Enver Pasha Turkish leader Born in Constantinople in 1881, he became a leader of the Young Turk Party, and was active in the deposition of Abdul Hamid II in 1909. He fought against the Italians in Tripoli and was Minister of War during the second Balkan War, in which also he led an army in the field. During the Great War, Enver, who had been an attaché in Berlin strongly favoured the German side. When peace was made in 1918 he escaped to the Caucasus and did all he could to upset the peace treaties. On Aug 4, 1922, he was killed at Bokhara.

Environment Conditions that influence growth or development. It plays a prominent part in theories of evolution. Living beings must have a certain power of adapting themselves to their environment or else they die, but the extent of this power cannot be precisely ascertained.

Envoy Person sent on an errand, especially on a diplomatic one. It is used for one who is sent on a temporary mission, for instance to a coronation, in contradistinction to an ambassador whose mission is more permanent. An ambassador, however, is also called an envoy extraordinary.

Enzyme Active principle of a ferment. Enzymes belong to the class of catalysts, or substances whose mere presence induces chemical change in other molecules, but an enzyme will usually act on one or a few closely related chemical compounds only, and will refuse to touch any molecule coming outside its own limited range of specificity.

The amount of an enzyme present in any biological material is almost vanishingly small, but methods of extraction from such material in a state approaching purity have been worked out. Enzymes are now considered to be definite chemical compounds anchored to "carriers" of much larger molecular size.

Eoanthropos Oldest known European race of man. It is one of a number of words, the first part of which is *eo* (a form of the Greek *eos*, dawn) used chiefly in palaeontology, in the sense of first beginnings.

Eocene Oldest division of the Tertiary system of geological deposits. It represents the period of the dawn of animal life and followed the Cretaceous period. Eocene strata usually rest upon the denuded surface of the underlying beds of white chalk and often form basin-like areas showing, by their character and fossil contents, their origin in estuaries and shallow seas. The beds consist of sands, clays, marls and, in S. Europe, N. Africa and Asia, a great development of limestone.

Eolith Name given to certain very early flint implements. They have been found near Ightham in Kent and elsewhere in S. England. Eoliths are generally flat on one surface, rounded with an ochreous patina on the other, and chipped to form a scraping edge or notches.

Eos Greek goddess of the dawn, regarded as identical with the Roman Aurora (q.v.).

Epect Term denoting the moon's age at the beginning of the year or the excess of the solar month or year over the corresponding lunar period. It is expressed

in the number of days, and is given in almanacs for each year. The epect is used in calculating movable ecclesiastical feasts.

Epaminondas Theban general and statesman. He was born about 418 B.C., and in 371 was one of the generals at the Battle of Leuctra, in 370 he invaded Peloponnesus, where he founded Messene and Megalopolis. In 362 he invaded it for the fourth time, and while he gained a brilliant victory over the Lacedaemonians at Mantinea, he was himself slain. Thebes for a short time held the supremacy of Greece, but lost her position almost immediately after his death.

Epéhy Town of France. It is 13 m from Cambray and came into prominence during the Great War. In April 1917, it was taken by the British from the Germans, who had held it since the invasion of France in 1914. The Germans regained it in March, 1918, and kept it until the following September. Between Sept. 12 and 25, 1918, the British, assisted by some French divisions, attacked strong German positions and gained considerable ground. These successes made possible the attacks on the Hindenburg line. Nearly 12,000 prisoners and 100 guns were taken.

Épernay Town of France. It is about 19 m from Châlons, in the department of the Marne. The town is a great centre of the champagne industry, and there are large rock cellars in which the wine is stored, and works for making casks, corks, etc. In July, 1918, there was some fierce fighting around the town, but it was held by the French, aided by a British contingent. Pop. 21,800.

Ephah Hebrew measure of capacity. It contained 10 omers and was used for dry goods such as flour and barley. It is said to have had the same capacity as the bath, which was a liquid measure, and to have contained from 4½ to 9 gallons. The word is apparently of Egyptian origin.

Ephemera Family of insects popularly called may flies. They have a long, jointed abdomen with three bristle-like tails. The aquatic larva, living in ponds and sluggish streams, pass into a chrysalid stage which, in *E. vulgata* and *E. danica* two of the commonest of Britain's 50 species, furnish the bait that anglers call green drake and grey drake respectively. The perfect insects, which can be seen in May fluttering their lace-like wings in dense clouds, do not eat, and exist only for a day or two, or sometimes for a few hours only.

Ephesians Epistle to the Tenth book of the New Testament. Written during St. Paul's first imprisonment in Rome, about A.D. 62, it was apparently a circular letter addressed to the churches of Asia Minor which Timothy carried simultaneously with that addressed to the Colossians.

Ephesus In ancient geography, the chief of the twelve Ionian cities on the coast of Asia Minor. It was a great commercial centre. There are numerous interesting ruins, a great theatre (Acts xix), an odeum, or building for musical purposes, a stadium and the famous temple of Diana or Artemis, built in the 6th century B.C., and rebuilt in the 4th. This was regarded as one of the wonders of the world. Six important

councils of the Christian Church were held there between the 2nd and 5th centuries

Ephod Surplice worn by Jewish priests when officiating at the altar. The high priest's ephod was of linen, fastened by a girdle and supported by two shoulder straps. On each strap was an onyx stone on which were engraved the names of the twelve tribes of Israel. There are several biblical references to it, notably in Exodus, xxviii, xlix, xxxix.

Ephraim Younger son of the patriarch Joseph. He was exalted over his elder brother Manasseh in the paternal blessing. His descendants formed two of the tribes of Israel established in N Palestine. Ephraim led the tribal opposition against the kingdom of Judah which resulted in the formation of the separate kingdom of Israel.

Epic Poem which deals with a great event in a lofty and dignified manner. The *Iliad* and the *Odyssey* are perhaps the world's greatest epic poems, another is *Paradise Lost*.

Epictetus Greek stoic philosopher. He was born at Hierapolis in Phrygia, and died at Nicopolis in Epirus. His dates are not known, but he died after A.D. 118. He lived in Rome as a slave in the house of Epaphroditus, a favourite of Nero, who emancipated him. When Domitian expelled the philosophers from Rome, he withdrew to Nicopolis. His great rule of life was "endure and abstain" which teaches men to judge what they can and ought to control, and what they ought to bear as being beyond their control.

Epicureanism Greek school of philosophy. It was founded by Epicurus who was born in Samos, 341 B.C., and came to Athens, where he taught and died 270 B.C. According to him happiness consists in pleasure or rather in the absence of pain. But man needs a correct idea of the nature of pleasure, it is not individual pleasure, but complete mental tranquillity (*ataraxia*), for which virtue is indispensable. The mere sensual enjoyment of the later Epicureans was rejected by Epicurus.

Epidemic Term applied to a disease prevailing among a number of people at the same time. It is spread by infection, usually by the agency of micro-organisms. Among such epidemic diseases are influenza, measles, scarlet fever, whooping cough etc. The term endemic is used when the disease is local in character and pandemic when affecting very large areas. Epidemics are less frequent than in former times, owing to various preventive methods and the greater attention paid to sanitation.

Epidemiology is the branch of medical science devoted to the study of epidemic disease.

Epidermis Outer layer of the skin in animals, and the superficial cell layer in the higher plants. The animal epidermis also called the cuticle, may be one or many layered, and in the higher animals, may be covered by a superficial horny layer.

Epiglottis In man a thin flap-like structure containing elastic cartilage. It is situated in front of the glottis or entrance to the larynx and behind the root of the tongue. In its ordinary position it is directed forward and in some types may extend over the edge of the soft palate. It prevents food passing into the air passage to the lungs.

Epigram Concise, pointed saying, often in verse. The earliest epigrams were written by the Greeks as inscriptions on tombs and memorials, one of the most famous being that written by Simonides on the heroes who fell at Thermopylae. The Romans, too, were very good at making epigrams, and Martial ranks as one of the world's great epigram makers.

After the revival of learning the epigram became a short poem on a single subject, ending with a witty or sarcastic remark. Of modern nations the French are perhaps the best at epigrams, Voltaire being outstanding in this respect. There are many excellent epigrams in English, those of Pope being notable. As an example, Coleridge's epigrammatical definition of an epigram may be given.

What is an Epigram? A dwarfish whole,
Its body brevity and wit its soul.

Epigraphy Study of inscriptions. It is usually concerned with those occurring on rigid materials as stone, metal, bone, shell and wood, or materials capable of becoming rigid as clay. It includes incidental scratchings, as graffiti, but leaves to palaeography, or ancient writing, inscriptions on such flexible materials as papyrus, parchment and paper.

Epilepsy Nervous disorder, manifested by attacks of sudden insensibility. It is also known as falling sickness. When accompanied by convulsions it is major epilepsy or *grand mal*, when convulsions are absent it is minor or *petit mal*. In Jacksonian epilepsy the convulsive movements concern single groups of muscles, consciousness being retained, this is often remediable by surgical operation upon the brain lesion, usually caused by external pressure. Epileptic fits are often preceded by warning sensations, and sometimes masked by outbreaks of epileptic fury.

Epilogue Conclusion of a literary work or peroration of a speech. Specifically it was an independent commentary in verse after a drama, sometimes by another pen, appealing to the hearer's or reader's indulgence or deprecating criticism, it especially characterised 17th-18th century English drama.

Epinal Town of France. The capital of the dept of Vosges, it stands on the Moselle, 46 m from Nancy. It has many industries, one being the production of cheap images and pictures for children. The fortress, built after 1870, is one of the most important defence works of Franco-Pop 30,000.

Epiphany Christian festival. It is celebrated on Jan 6, the twelfth day after Christmas. Originally part of the 12 day commemoration which included Christ's nativity and baptism, the adoration of the magi or three kings, and the Cana miracles, the nativity feast was transferred to Dec 25, Twelfth Day being appropriated in the East for baptisms, in the West for commemorating the three kings. Symbolic offerings of gold, frankincense and myrrh are made in the king's name at the Chapel Royal, London, on Epiphany Day.

Epirus In ancient geography, a country in the N.W. of Greece. It flourished under Pyrrhus (295-272), and formed part of the Roman Empire from 146 B.C. to A.D. 1204. The modern Epirus, which includes

part of N. Greece and S. Albania, was conquered by the Turks in the 15th century, and now forms part of Greece.

Episcopacy Form of church government of which bishops are the head. It grew up in the 2nd century and has since been the rule in the Roman Catholic Church, which claims for its bishops an unbroken descent from those times. The Anglican and Greek Churches are both episcopal and both regard the "historic episcopate" as essential to their life and work. Bishops can only be ordained by other bishops and in this way the apostolic succession, as it is called, is maintained. Episcopacy also prevails in the Lutheran, Moravian and Methodist Episcopal churches. See BISHOP.

Epistle Writing or letter. It is applied especially to the letters included in the New Testament, sent by S. Paul, S. Peter and other apostles to churches and individuals. Such are the epistles to the Corinthians and to Timothy. Other epistles were those written by Horace and later poets in a fashion copied by English writers in the 18th century.

Epitaph Inscription on a monument or tomb. Epitaphs have been found on Egyptian, Hebrew and other early tombs. The Greeks used them freely and the Romans were skilled in the art of stating the facts of a man's career in a few pregnant words. From Rome the custom spread all over the civilised world, and for many years Latin was much used for epitaphs, as it is to some extent to-day. In the 18th century humorous epitaphs were very popular on tombstones. Collections of them have been made. Notable epitaphs are the one on Sir C. Wren in S. Paul's Cathedral, London, *Sic monumentum requirit circumspice* (If you wish for his memorial look around) and "O rare Ben Jonson" in Westminster Abbey. A curious epitaph in a Lancashire churchyard is as follows—

John Vattall lies here & that's enough,
The card + cart & w's the wiff
His cart's with God, you need not fear
And his cart's lies buried here

Epithalamium Marriage song invoking blessings. In ancient Greece the epithalamium was sung by boys and girls before the bridal chamber on the marriage night and on the following morning. The Romans modified it to a song by girls only on the departure of the wedding guests. Pindar and Alcaeus among the Greeks, Catullus of the Romans, Ronsard, Scarron and Malherbe among the French and Spenser, Ben Jonson, Donne and Tennyson among English poets have written epithalamia.

Epithelium Animal tissue formed of the epithelial cells. It forms the epidermis (q.v.), lines the alimentary tract (mouth to anus) and the windpipe and occurs in glands. Its functions are protective, secretory or sensory and it varies in form from the layer of ciliated cells in the windpipe to the stratified multilayered epithelium of the epidermis. See SKIN.

Epoch In astronomy a date fixed for reckoning the place of a star or planet. It has therefore come to be used for a period marked by important events, as the Napoleonic epoch.

Eponym Person after whom anything is named. In Greece it was the unofficial title of magistrates after whom

the year was named and of the heroes who gave their names to a tribe or people. Thus, Pelops was the eponym of the Peloponnese.

Epping Urban district and market town of Essex. It is 17 m. from London, on the outskirts of Epping Forest, on the L.N.E. Ry. The town is a busy agricultural centre. Pop. (1931) 4956.

Epping Forest District of Essex. It occupies about 6000 acres between the Rivers Lea and Rodden, with Leytonstone, Epping, Chigford, Woodford and Loughton on its borders. Acquired by the corporation of the city of London and opened in 1882 it is a popular pleasure resort. It is wooded and contains two ancient camps, Amhresbury and Loughton. In 1928 Knighton Wood, 37 acres, was added.

Epsom Urban district and market town of Surrey. It is 14 m. from London on the S. Ry. On the downs nearby the Derby, Oaks and other races are run. Epsom College is a public school associated with the medical profession. Woodcote Park is the country home of the Royal Automobile Club, and The Dirdans was the residence of Lord Rosebery. Pop. (1931) 27,080. See DRIVE, THE.

Epsom Salts Magnesium sulphate in the form of small white crystals. Dissolved in water it is used medicinally as a purgative. The name is derived from a mineral spring at Epsom from which it was at one time obtained.

Epstein Jacob. British sculptor. Of Russo-Polish parentage he was born in New York, Nov. 10, 1880, and studied art in New York and Paris, where he came under the influence of Rodin. In 1908 he executed a series of figures on the facade of the British Medical Association building in the Strand, London, a work assailed at the time by much criticism. His figures of Venus, his Rima and Genesis, and the groups entitled Day and Night on the Underground building in Westminster have also provoked lively criticism. His portrait busts are by many considered his best work.

Epworth Town of Lincolnshire. It is situated on the Isle of Axholme, and is 183 m. from London by the L.N.E. Ry. At the rectory here John Wesley was born. Pop. 1836.

Equation In algebra a statement or formula expressing the equality of two quantities. The two parts of the equation are separated by the sign of equality, as for example, $3x = 21$.

The term chemical equation is used for the symbolic representation of a chemical reaction the symbols of the reacting substances being placed on the left and those of the substance produced by the reaction on the right, as in $H_2 + Cl_2 = 2 HCl$.

Equator Circle drawn round the earth equally distant from the poles. Its plane cuts the earth's axis at right angles and it divides the globe into two halves, the northern and southern hemispheres. Latitude is measured north and south of the equator by small circles parallel to it, the equator being regarded as 0° of latitude. At the equinoxes the sun at noon is directly over the equator.

Equerry Official of the royal household. The crown equerry is the head of the royal mews. Other equerries are members of the royal household who attend

upon the king on ceremonial occasions. The Duke of York and other members of the royal family have equerries.

Equilibrium State in which forces acting upon a body are so determined that they balance one another, giving no resultant at any point. In the case of a heavy body resting upon the ground, the weight of the body and the normal reaction of the ground are exactly equal and opposite. If a body returns to its position after being moved it is in stable equilibrium.

Equinox Period when the equator lies in the plane of the earth's orbit and day and night are equal in length in all parts of the world. The vernal or spring equinox occurs on March 21-22, the autumnal equinox on Sept. 21-22. The vernal equinox also marks the point in the heavens where the sun crosses the equator, this position being known as "the first point of Aries."

Equitation Horsemanship, especially for military purposes. The British army has a school of equitation at Weedon and there is one for the Indian army at Saugor.

Equites (Lat. horsemen) Name of a class in Roman society ranking between the senators and the commoners. Originally applied to those wealthy enough to serve as horse soldiers the term became, on the development of the paid army, somewhat synonymous with knights.

Equity (Lat. *aequis*, equal) Term denoting moral right or justice, something based on the law of nature, not on legislation. In England in early days there were many cases where right could not be done, or wrong redressed, by the processes of the ordinary law. It became the custom to refer such cases to the chancellor as the keeper of the king's conscience. Ignoring the common law, he gave decisions according to the principles of equity, and in time a body of law and precedents grew up which was known as equity. This was administered by the court of chancery which proceeded usually by way of injunction and specific performance. Within its scope were all matters relating to trusts, etc., and others for which the common law did not provide. Since 1873 all the courts have administered both common law and equity, which is therefore no longer the sole privilege of the chancery courts.

An equity of redemption is the right which the mortgager has to redeem the mortgaged property on payment of the mortgage money and interest although the mortgagee is in possession. The right is lost if the mortgagee has exercised his power of sale or has completed a foreclosure.

Era Epoch from which years are counted and the series so reckoned. An historical event usually determines the choice, e.g., the Greek Olympiads, from 776 B.C., the Roman from Rome's foundation 753 B.C., the Hindu Saka, from A.D. 78, the Mohammedan, from A.D. 622 and the Christian from Christ's nativity. The pre-Christian is reckoned backwards.

Erasmus Desiderius Dutch scholar. Born at Rotterdam Oct. 23, 1466, he was an illegitimate son of a certain Gerard who figures in Charles Reade's novel, *The Cloister and the Hearth*. He took his father's name, but soon changed it to the one, half Latin half Greek, by which he is known. He was educated at Leuven and was for six

years an Augustinian monk. In 1496 he visited England, and became a close friend of Sir Thomas More. He studied Greek with Linacro and afterwards taught that language at Cambridge, where he was Lady Margaret Professor of Divinity. In 1517 he settled at Louvain and in 1521 at Basel, where he died, July 12, 1536.

Erasmus was one of the great humanists. In religion he was a Roman Catholic and by birth a Dutchman, but his intellect could not be confined to one creed or one nationality. He sympathized with Luther and the Reformation but was too great a scholar to be a keen partisan.

Erasmus did much literary work, chiefly editing the works of Latin writers, both secular and ecclesiastical. His great edition of the New Testament, Greek text and Latin translation, appeared in 1516. *Encomium Moriae* or *In Praise of Folly* and *Colloquia* are true revelations of his mind. His letters are interesting for their comments on England as he saw it.

Erbium Rare metallic element. Its atomic weight is 167.7 and specific gravity 4.77. It exists as a silicate in the mineral gadolinite and a few other minerals. Its oxide, erbia, obtained by ignition of some of its salts, is an earthy substance with a faint rose-red colour, a character shared by other compounds of the metal.

Erckmann-Chatrian Name used by two French writers for their joint work. They were Emile Erckmann and Alexandre Chatrian, both natives of Lorraine. Their literary partnership lasted for 30 years, from 1846. Their best works are those dealing with the Napoleonic wars. They have been translated into English notably, *The History of a Conspiracy* and *Walcroto*. Their plays include the popular Polish Jew, produced in London as *The Bells*. Erckmann was born May 20, 1822, and died March 14, 1899. Chatrian was born, Dec. 18, 1826, and died Sept. 3, 1890.

Ercole da Ferrara Name taken by the Italian printer, Ercole di Giulio Grandi. Born about 1462 he lived chiefly at Ferrara, where he was employed by the duke. Two of his pictures, "The Madonna and Child" and "The Conversion of St. Paul" are in the National Gallery, London. He died in 1531.

Erebus In Greek mythology, a god of the underworld. He was the husband of Night, who bore him Light and Day.

Erebus Volcano of Antarctica. In Victoria Land, it is situated on Ross Island and was discovered in 1841 by Capt. James Ross. It is 12,370 ft. high and has been active in recent years.

Erechthēum Temple at Athens. It was the original sanctuary of the tutelary deities of Athens, Athena Polias (Athena of the city), Poseidon and Erechthens. It stood on the Acropolis, close to the Parthenon. Burnt by the Persians in 480, it was rebuilt in the time of Pericles and was finished about 469.

Eretria City of Greece. Situated on the west coast, 15 m. S.E. of Chalcis, its stubborn resistance to the Persian advance occasioned its destruction in 490 B.C. Its importance declined under Macedonian and Roman rule. American excavations at the

foot of the acropolis, 1890-95 exposed remains of theatre, temple and gymnasium.

Erfurt City of Prussia, Germany. It stands on the Gera, 14 m from Weimar, and is an important railway junction. Its cathedral is one of the finest Gothic edifices in Germany and the palace was once the residence of the electors of Mainz. The industries include the making of railway stock, machinery, clothing, etc., and the market for vegetables and flowers is important. Erfurt was once a member of the Hanseatic League. In the Augustinian monastery Luther lived for some years. In the 19th century its fortifications were pulled down and its limits extended greatly, as it became a busy manufacturing centre. Pop 148,200.

Erg In physics, unit of energy or work done. It is the quantity of work done by a force of one dyne moving through a distance of one centimetre. Power is expressed in ergs per second.

Ergosterol Unsaponifiable part of a natural fat, sterol (*qv*). Named from its discovery in ergot of rye, ergosterol is found also in yeast. It is present in minute proportion as an impurity of cholesterol found in all animal cells. When irradiated by sunlight, ergosterol in superficial tissue cells (skin, etc.) yields up the anti-rachitic vitamin D essential to health. Ergosterol in solution, irradiated by ultra violet rays, is used to supply natural bodily deficiency in this vitamin, and is included in the 6th edition of the *British Pharmacopoeia*.

Ergot (*Claviceps purpurea*) Fungus which attacks the flowers of cereals and grasses. It shows three well marked stages in its life history, each stage being formerly regarded as distinct fungi. The honey dew, or *sphacelia*, stage consists of a network of threads ramifying through the ovary and producing spores and honey dew; the winter, or *sclerotium*, stage forms a hard curved purplish body (ergot) and the spring, or *ascospore*, stage which forms thread-like spores. Ergot of rye is used in medicine as a haemostatic and peristaltic agent. The eating of bread made from rye or other grain infected with ergot gives rise to a condition of chronic poisoning known as ergotism.

Ericht Loch of Scotland. It is on the borders of the counties of Perth and Inverness and is 14½ m long. The River Ericht, which flows from it to Loch Rannoch, 5½ m away is used to generate power for the national scheme for providing electricity. It has been widened and deepened and a dam has been built across it.

Eridanus In Greek legend, a river god. He was the son of Oceanus and Tethys and was called the King of rivers. It is also the name of a constellation of stars, part of which is below the horizon of the northern hemisphere.

Eridge Village of Sussex. It is 3 m from Tunbridge Wells and 3½ from London, on the S Rly. Eridge Castle, the seat of the Marquess of Abergavenny, is a modern building standing in a large park.

Erie One of the Great Lakes of North America. It is the most southerly of the five but the fourth in the chain and covers 10,000 sq m. Its length is 250 m, and its greatest breadth 60.

Its waters come by the River Detroit from the three higher lakes and pass by the Niagara River into Lake Ontario. The Welland Canal

(*qv*) enables shipping to pass between these two lakes. One side of the lake is Canadian and the other American. On the American side are the great cities of Buffalo and Cleveland.

Erie City and lake port of Pennsylvania. It is 88 m from Buffalo on Lake Erie, and is well served by railways. There are a number of manufactures, but the shipping is of greater importance. For this there is a fine natural harbour formed by Presque Isle, on which a French fort was built in the 18th century. Pop (1930) 115,967.

Erie Canal Waterway of the United States. It is 361 m long and connects the Hudson with Lake Erie, its terminal being Buffalo and Albany.

Erin Name for Ireland. Its origin is uncertain, but its general use dates from the time of Thomas Moore's poems. It occurs in the phrase Erin go bragh, or Erin for ever.

Erinus Variety of starwort, suitable for the rock garden. It is of low growth and bears purplish blue or white flowers in early summer. It grows in the Alps and is called *erinus alpinus*.

Eris In Greek legend, the goddess of discord. Angered at not being invited to the wedding feast of Peleus and Thetis, she threw a golden apple amongst the guests. This was to be given to the fairest and was claimed by Hera, Athena and Aphrodite. The question was submitted to the judgment of Paris.

Erith Urban district of Kent. It is on the Thames, 14 m from London, and is served by the S Rly. It is an engineering and yachting centre. At one time a borough and a naval station, Erith became an industrial district in the 19th century. Pop (1931) 32,780.

Eritrea Colony of Italy. It is on the Red Sea, with a coastline of 670 m. Its other boundaries are the Anglo-Egyptian Sudan and Abyssinia. Asmara is the capital. The ports are Massawa and Assab. The area is 45,754 sq m and the population (1931) 621,776, of which 4681 are Europeans. Sheep, goats and camels are kept and the products include ostrich feathers, palm nuts and hides. Some gold is found. There is a railway line 258 m long from the sea to the capital and beyond. Italy took possession of the land in 1885, and it was formed into a colony in 1889. The earliest Italian attacks on Abyssinia were launched from Eritrea.

Erivan Capital of the Soviet Republic of Armenia or Hyastan. It was formerly the capital of the Transcaucasian Government of Erivan, and stands on the Sanga, 40 m from Ararat. Erivan was ceded to Russia by Turkey in 1828. Pop 75,000.

Erl-King In German mythology an evil forest spirit. He was inimical to children and was gigantic, draped, bearded and crowned with gold. Herder's *Stimmen der Vögel*, 1773, in translating *The Elf King's Daughter* confounds *elle* (Danish elf) with *erle* (German alder). The mistake was perpetuated and the Erl King established as an alder wraith.

Ermine (*Mustela erminea*) White fur, with black tipped tail. It is the winter coat of the stoat, which is native to Britain and to temperate and subarctic regions. It is largely used on state and judicial robes. In heraldry it is usually symbolised by black arrow heads crowned with three dots on a white ground.

foot of the acropolis, 1890-95 exposed remains of theatre, temple and gymnasium

Erfurt City of Prussia, Germany. It stands on the Gera, 14 m from Weimar, and is an important railway junction. Its cathedral is one of the finest Gothic edifices in Germany and the palace was once the residence of the electors of Mainz. The industries include the making of railway stock, machinery, clothing, etc., and the market for vegetables and flowers is important. Erfurt was once a member of the Hansatic League. In the Augustinian monastery Luther lived for some years. In the 19th century its fortifications were pulled down and its limits extended greatly, as it became a busy manufacturing centre. Pop 148,200

Erg In physics, unit of energy or work done. It is the quantity of work done by a force of one dyne moving through a distance of one centimetre. Power is expressed in ergs per second.

Ergosterol Unsaponifiable part of a natural fat, sterol (qv). Named from its discovery in ergot of rye, ergosterol is found also in yeast. It is present in minute proportion as an impurity of cholesterol found in all animal cells. When irradiated by sunlight, ergosterol in superficial tissue cells (skin etc.) yields up the anti rachitic vitamin D essential to health. Ergosterol in solution, irradiated by ultra violet rays, is used to supply natural bodily deficiency in this vitamin, and is included in the 6th edition of the *British Pharmacopoeia*.

Ergot (*Claviceps purpurea*) Fungus which attacks the flowers of cereals and grasses. It shows three well marked stages in its life history, each stage being formerly regarded as distinct fungi. The honey dew, or *sphaeria*, stage consists of a network of threads ramifying through the ovary and producing spores and honey dew. The winter, or *sclerotium*, stage forms a hard curved purplish body (ergot) and the spring, or *ascospore*, stage which forms thread like spores. Ergot of rape is used in medicine as a haemostatic and peristaltic agent. The eating of bread made from rye or other grain infected with ergot gives rise to a condition of chronic poisoning known as ergotism.

Ericht Loch of Scotland. It is on the borders of the counties of Perth and Inverness and is 14½ m long. The River Ericht, which flows from it to Loch Rannoch 5½ m away is used to generate power for the national scheme for providing electricity. It has been widened and deepened and a dam has been built across it.

Eridanus In Greek legend, a river god. He was the son of Oceanus and Tethys and was called the king of rivers. It is also the name of a constellation of stars, part of which is below the horizon of the northern hemisphere.

Eridge Village of Sussex. It is 3 m from Tunbridge Wells and 39 from London, on the S Rly. Eridge Castle, the seat of the Marquess of Abergavenny, is a modern building standing in a large park.

Erie One of the Great Lakes of North America. It is the most southerly of the five but the fourth in the chain, and covers 10,000 sq m. Its length is 250 m, and its greatest breadth 60.

Its waters come by the River Detroit from the three higher lakes and pass by the Niagara River into Lake Ontario. The Welland Canal

(qv) enables shipping to pass between these two lakes. One side of the lake is Canadian and the other American. On the American side are the great cities of Buffalo and Cleveland.

Erie City and lake port of Pennsylvania. It is 88 m from Buffalo on Lake Erie, and is well served by railways. There are a number of manufactures, but the shipping is of greater importance. For this there is a fine natural harbour formed by Presque Isle, on which a French fort was built in the 18th century. Pop (1930) 116,967.

Erie Canal Waterway of the United States. It is 361 m long and connects the Hudson with Lake Erie, its termini being Buffalo and Albany.

Erin Name for Ireland. Its origin is uncertain, but its general use dates from the time of Thomas Moore's poems. It occurs in the phrase Erin go bragh, or Erin for ever.

Erinus Variety of starwort, suitable for the rock garden. It is of low growth and bears purplish blue or white flowers in early summer. It grows in the Alps and is called *erianus alpinus*.

Eris In Greek legend, the goddess of discord. Angered at not being invited to the wedding feast of Peleus and Thetis, she threw a golden apple amongst the guests. This was to be given to the fairest and was claimed by Hera, Athena and Aphrodite. The question was submitted to the judgment of Paris.

Erith Urban district of Kent. It is on the Thames 14 m from London, and is served by the S Rly. It is an engineering and yachting centre. At one time a borough and a naval station, Erith became an industrial district in the 19th century. Pop (1931) 32,780.

Eritrea Colony of Italy. It is on the Red Sea, with a coastline of 670 m. Its other boundaries are the Anglo-Egyptian Sudan and Abyssinia. Asmara is the capital. The ports are Massawa and Assab. The area is 46,764 sq m and the population (1931) 621,770, of which 4681 are Europeans. Sheep, goats and camels are kept and the products include ostrich feathers, palm nuts and hides. Some gold is found. There is a railway line 258 m long from the sea to the capital and beyond. Italy took possession of the land in 1885, and it was formed into a colony in 1889. The earliest Italian attacks on Abyssinia were launched from Eritrea.

Erivan Capital of the Soviet Republic of Armenia or Hyastan. It was formerly the capital of the Transcaucasian Government of Erivan, and stands on the Sangha 40 m from Ararat. Erivan was ceded to Russia by Turkey in 1828. Pop 75,000.

Erl-King In German mythology an evil forest spirit. He was inimical to children and was gigantic, draped, bearded and crowned with gold. Herder's *Stimmen der Völker*, 1778 in translating *The Elf King's Daughter* confounds *elle* (Danish elf) with *erle* (German alder). The mistake was perpetuated and the Erl King established as an alder wraith.

Ermine (*Mustela erminea*) White fur, with black tipped tail. It is the winter coat of the stoat, which is native to Britain and to temperate and subarctic regions. It is largely used on state and judicial robes. In heraldry it is usually symbolised by black arrow heads crowned with three dots on a white ground.

Ermine Street Early English name for an ancient British highway leading from London through Lincoln to York and Hadrian's Wall. It was one of four reputedly enjoying royal protection, and coincided in part with the Romano-British road system.

Erne Old English name of the brown, white-tailed, sea eagle (*Haliaeetus albicilla*). Distributed throughout northern regions, it formerly bred in the wildest parts of Scotland and Ireland. Though distinguished by its broad-scaled toes and lack of leg-feathers, it is often confused with the golden eagle. The female sometimes reaches 3 ft. in length.

Erne River and lake of Ireland. The river rises in Longford and passes through the counties of Cavan and Fermanagh into Donegal. Near Ballyshannon it enters Donegal Bay. Its length is 72 m. Enniskillen is the chief town on its banks. It passes through two lakes called upper and lower Lough Erne. The upper is 13 m. long and the lower 20 m., and between them there is a distance of 10 m. In both are many islands and the lakes are rich in fish.

The Irish title of Earl of Erne has been borne since 1789 by the family of Crichton. The family seat is *Crom Castle, Fermanagh*, and the earl's eldest son is called Viscount Crichton.

Ernest King of Hanover. Fifth son of George III. of Great Britain, he was born at Kew, June 5, 1771, and educated at Göttingen, became an officer in the army of Hanover and saw service against the French. In 1799 he was created Duke of Cumberland and Teviotdale and for over 30 years took part in English politics as an antagonist of reform. In 1837, on the death of William IV, he became King of Hanover and ruled that country until his death, Nov. 18, 1851.

Eros Greek name of the god Cupid (*q r*). It is also the name of an asteroid, discovered in 1898, when it came nearer to the earth than Mars. In 1901, and again early in 1931, it approached the earth, in the latter year, as near as within 16 million miles.

Erosion Denudation of the earth's surface by the action of wind, rain, the atmosphere, ice, rivers and sea. By these agents the forms of hills and valleys, cliffs and shore gradually become modified, rivers deepen their channels and silt up their estuaries, and lakes become marshes or dry valleys. See **COAST**.

Erroll Earl of Scottish title held by the family of Hay. It was given in 1453 to William Hay, constable of Scotland, and has since been held by his descendants. The earl is still lord high constable of Scotland. His estates are in Aberdeenshire. The earl's eldest son is called Lord Kilmarnock.

Victor Alexander Hay (1876-1928), the 20th earl, was in the diplomatic service. In 1919 he was sent to Berlin as the first British representative there after the war. From 1921-27 he was British high commissioner in the Rhineland, being known as Lord Kilmarnock until he succeeded to the title on his father's death, July 8, 1927. He died Feb. 19, 1928. Josslyn Victor Hay, the 21st earl, was born in 1901.

Erse Word denoting the Celtic population, their speech and writing. It anciently migrated from N.E. Ireland to Scotland and because of its Irish origin, Lowland Scots applied the word to the speech of the High-

landers, who themselves called it Gaelic. Nowadays it sometimes denotes the Goidelic language group embracing Scottish Gaelic, Irish Gaelic and Manx.

Erskine Baron Scottish lawyer Thomas Erskine, born in Edinburgh, Jan. 10, 1750, was a son of the Earl of Buchan. He was called to the bar in 1778. He sat in Parliament as a Whig in 1783, and again in 1790-1806. In 1806 he was made lord chancellor and a peer, but held office only for a few months. He died Nov. 17, 1823.

Henry Erskine, Erskine's elder brother, was also a successful lawyer. He was lord advocate of Scotland in 1783 and again in 1806-07. He died Oct. 8, 1817.

Ervine St. John Greer Irish writer. Born in Belfast, Dec. 28, 1883, he early began to write plays and made his name as a dramatic critic. Among his plays are *Jane Clegg*, *Mary*, *Mary Quite Contrary* and *The Second Mrs. Fraser*. He has also written novels, including *The Foolish Lovers* and *The Hancard Man*, short stories, and *Lives of Parnell* and General Booth. *The Theatre in My Time* appeared in 1933.

Erysipelas Acute contagious disease, characterized by redness of the skin, especially of the face. It is due to a specific micro-organism, *Streptococcus pyogenes*, introduced through a wound or abrasion, sometimes in the tear duct, or through a cat whilst shaving. Clothing and bedding may convey it. There is sometimes swelling and delirium. Attacks last from 7 to 21 days, but are usually followed by a recovery. Iodine, iron perchloride and other internal preparations are sometimes administered, injections of antistreptococcal serum often, but not invariably, prove beneficial.

Erzerum City of Turkey. It is 120 m. south-east of Trebizond and lies to the north of Lake Van on the River Kara-su or Western Euphrates. Situated in a wide pastoral plain hemmed in by mountain ranges it is an important town on the trade route between Persia and Europe. Lignite and salt are found near it. It was the scene of Armenian massacres in 1895 and 1915. Pop. 30,800.

Erzgebirge Range of mountains in Central Europe. They form part of the boundary between Saxony and Bohemia, rising in places to over 4000 ft., and sloping gradually on the northern side and more precipitously on the south. A great variety of metallic ores, chiefly lead, tin, copper, silver and iron, abound on both Saxon and Bohemian sides.

Esau Son of the patriarch Isaac, and Jacob's elder twin brother. He sold his birthright to his brother for a meal of lentils, and thereby lost the paternal blessing.

Esbjerg Seaport of Denmark. The construction of an excellent harbour has transformed it from a small village into the chief port of West Jutland. Fishing is an important industry and its exports include bacon, dairy produce, beef and cattle. Pop. (1930) 27,405.

Escalator Moving stairway. It has been adopted in many stations on the London tube railways. It is driven by electric power and consists of an endless chain of steps passing round rollers at the top and bottom of the escalator, each step being fixed to a framework having two wheels not set in the same line. It requires less attention

ESCARPMENT

and carries more passengers in a given time than the ordinary type of lift.

Escarpment

Term applied to the steep abrupt slope of strata. It is due to the denudation of the softer underlying beds leaving the outstanding hard rock as a cliff like ridge in one direction, and a gentle dip slope in the other. One of the commonest forms of land surface. It occurs usually in areas of gently inclined beds. The North and South Downs, the Cotswolds, Snowdon and Scafell show good examples of escarpments.

Escheat

Word meaning the return of land to its original owner. In feudal times the theory was that land was held from the king, and that when a man died without heirs it reverted to him. Similarly, land let out to vassals by other landowners reverted to them under like conditions. Until abolished in 1925, it was the law of England that the land of all who died without heirs reverted to the crown.

Escudo

Coin current in various countries. It replaced the milreis as the monetary unit in Portugal at the 1911 revolution, having a par value of 48 61d, divided into 100 centavos. One thousand escudos make a conto. In Spain and Chile also the escudo is current.

Escurial

Palace in Spain, one of the largest in the world. Designed for Philip II it is situated amid the mountains, 26 m. from Madrid. The form is rectangular and the style Doric. In the centre is a fine church, and the Pantheon where the kings and queens of Spain are buried. Among the buildings, which cover 10 acres, are also a convent and a valuable library.

Esdras

Books of the Old Testament. The Vulgate calls the canonical books Ezra and Nehemiah 1 and 2 Esdras. The apocryphal scriptures 3 and 4 Esdras. The earlier virtually repeats by Ezra and Nehemiah of 2 Chronicles, followed by an apocryphal story of three pages at Darius's court, ill & 6. It was written for Alexandrian Jews between 300 B.C. and 100 B.C. The other is apocalyptic, chiefly describing seven visions vouchsafed to Ezra, and was probably written under Domitian A.D. 81-96.

Esh

Town of Durham. Situated 5 m. W.N.W. of Durham, it is near Ushaw Moor colliery. Here is the Roman Catholic College of St. Cuthbert, founded in 1804 for the dispossessed seminary at Douai. The chief industry is coal mining. Pop. 10,175.

Esher

District of Surrey, an outer suburb of London. Forming with the Dittons an urban district, it is 15 m. from the city on the S. Ry. The Bear Inn is interesting. Esher Place once belonged to Wolsey and a tower of his palace still stands. Later it was the residence of Lord D'Abernon, who sold it in 1928 to the Shaftesbury Homes. Sandown Park racecourse is near. Pop. (1931) 17,075.

Esher

English title held since 1897 by Brett was born Aug. 13, 1817, and educated at Westminster and Caius College, Cambridge. He became a barrister in 1840 and in 1866 a Conservative M.P. In 1868 he was made solicitor general and in the same year a judge. In 1883 he became Master of the Rolls and in 1885 was made a baron. He retired and was

made a viscount in 1897 and died May 24, 1899.

His son and successor, Reginald Balliol Brett, the 2nd viscount, was born June 30, 1852, and educated at Eton and Cambridge. From 1880-85 he was Liberal M.P. for Penryn and Falmouth, and from 1895 to 1902 secretary to the Office of Works. In 1904 he was chairman of the committee of inquiry concerning the War Office. He was joint editor of *The Letters of Queen Victoria*. He died Jan. 22, 1930, when his son, Oliver, became the 3rd viscount.

Esk

Name of several British rivers. One flows through the counties of Dumfries and Cumborland into the Solway Firth and is 36 m. long.

The North Esk is formed by a union of the Lee and the Mark at Invermark. It flows through the counties of Forfar and Kincardine into the North Sea near Montrose and is 29 m. long.

The South Esk rises in the Gramplains and flows through Forfar for 49 m. and enters the sea at Montrose. A small stream in Midlothian is called the Esk. It rises in Dalkeith Park and joins the Firth of Forth at Musselburgh.

Eskimo

N. American Indian people. They inhabit the Arctic coast from E. Greenland to Siberia and number about 30,000. They live by hunting the musk ox, reindeer and seal. They occupy in summer conical skin tents, in winter earth huts half under ground called igloos. Their one man skin canoes (kayaks) and larger cargo or women's boats (umiaks), show constructional skill.

Eskimo Dog

Breed of dog used as a draught animal by the Eskimos. They are tamed rather than domesticated, the females being often crossed with wild wolves from which they differ by having the dog's characteristic upturned tail. They are trained to pull sledges, and usually work in four pair teams.

Esmond

Henry Vernon pseudonym of H. V. Jack, an English dramatist. Born Nov. 3, 1869, he became an actor and playwright. In 1895 he won a success with *Bogey*, and others followed. Perhaps the most popular are *Eliza Comes to Stay*, *The Dangerous Age* and *Birds of a Feather*. He died April 17, 1922.

Espalier

Term denoting a lattice work or a row of timber stakes and flowering plants are trained. Its purpose is to provide freer air circulation, better exposure to the sun and easier access. The term also denotes the tree so trained, with a main stem whence the branches extend horizontally right and left in ascending tiers.

Esparto Grass

Tall perennial grass native to S. Spain and N. Africa. Also called *Stipa tenacissima*. Its grey green tufts serve when young as cattle food, but after several years furnish a very tough and tenacious fibre useful for making cables, baskets, matting, sandals and paper. Another grass *Lycium spartum* also supplies *esparto* fibre. It is an important ingredient in the making of paper.

Esperanto

Artificial, international auxiliary language. Invented by Dr. Zamenhof, a Polish oculist, and published in 1887 it quickly became the leading system purporting to establish ready communication between persons of different native speech.

Phonetically spelt, it adopts about 2500 selected roots with 30 word-forming prefixes and suffixes, logically applied.

An international academy and a language committee, centred in Paris, exercise control. More than 4000 books have been issued, 100 magazines appear regularly, and various commercial schools hold classes. Annual international congresses are held, and nearly 50 broadcasting stations systematically transmit Esperanto programmes. Esperanto is officially recognised as a telegraphic language.

Esquiline Hill *See* ROME

Esquimalt Seaport of British Columbia, Canada. Situated on Vancouver Island, it is 3 m. from Victoria, and has a fine harbour. It is a base of the Canadian Navy and has large docks, etc. Shipbuilding is the chief industry. The town is on the C.P. and C.N. Rlys.

Essay Trial or experiment. It refers now almost invariably to a written composition dealing with a single subject. Some essays are literature of a very high order such as the *Essays* of Bacon and Montaigne, and Lamb's *Essays of Elia*. Other notable essayists include Joseph Addison, William Hazlitt, Lord Macaulay, Matthew Arnold, Robert Louis Stevenson, and more recently Augustine Birrell, Max Beerbohm, E. V. Lucas, Arthur Symonds, Mrs. Moynall, G. K. Chesterton and Hilaire Belloc. Notable American essayists are Emerson, Holmes, and Lowell. Pope's *Essay on Man* is in verse.

Essen Town of Prussia. It is on the Westphalian coalfield 22 m. from Düsseldorf and is well served by railways. The minster is one of the oldest churches in Germany. Here are the gigantic engineering works of Krupp. Before and during the Great War, these turned out huge quantities of war material. Pop. (1931) 629,564.

Essence Solution of the more important constituents of certain substances. In most essences the solvent is alcohol, but in a few water is used. In medicine drugs containing oils soluble in alcohol are sometimes used in the form of essences. Many alcoholic essences are used in perfumery.

Essential Oils Oils, present in many plants, which tend to evaporate in contact with the air. This property accounts for their alternative name of volatile oils. They form the principles which give aroma to plants, and are used in perfumery. The oils are obtained by steam distillation, or by means of a volatile solvent and maceration with fats or fixed oils.

Essex County of south-east England. It is 1530 sq. m. in area and lies just north of the Thames with a very irregular coastline on the North Sea. It includes Canvey Island and other districts which are islands at high tide, also Epping Forest. The land is mainly flat, with some hills in the centre and north-west.

The chief rivers are the Colne, Stour and Crouch, which form large estuaries. The Thames divides it from Kent and the Lea from Middlesex and Hertford. Other rivers are the Blackwater, the Chelmer and the Roding. Chelmsford is the county town. Other boroughs are West Ham, East Ham and Walthamston, which are within the London area. Maldon, Colchester, Saffron Walden, Southend-on-Sea, Harwich and Barking (made a borough in 1931). Harwich is the chief port.

The chief watering places are Southend, Westcliff, Clacton, Frinton and Dovercourt. Essex is served by the L.N.E. and L.M.S. Rlys. It is in the diocese of Chelmsford and sends 8 members to Parliament. The population of the administrative county was 1,198,601 in 1931. This showed the enormous increase of 278,460 during the 10 years, 1921-1931.

The Essex Regiment, formerly the 14th and 56th Foot, dates from 1741. The castle and key on the regimental badge commemorate their service at the siege of Gibraltar (1779-83). Many battalions served in the Great War. The regimental depot is at Warley.

Essex Earl of English title held by the families of Bohun, Devereux, Capel and others. The first Earl of Essex was appointed soon after the Norman Conquest, and one of the earls was the famous Geoffrey de Mandeville. The Bohun family held the earldom for some time in the 13th and 14th centuries and there were other earls, including Thomas Cromwell, created earl in 1540. In 1572 Walter Devereux was made Earl of Essex and the title was held by his son and grandson, but became extinct in 1616. In 1661 Arthur Capel was made earl and his descendants still hold the title. Cassiobury Park, Watford, long the family seat, has been sold. The earl's eldest son is called Viscount Malden.

Essex Earl of English courtier Robert Devereux, the famous favourite of Queen Elizabeth, was born Nov. 19, 1566, and succeeded his father as 2nd earl in 1576. He was with the English forces in the Netherlands, and was sent to Ireland as governor-general in 1599. For leaving his post without permission, he was imprisoned. Soon after his release he led a rebellion which was a failure and he was executed Feb. 25, 1601.

His son, Robert Devereux, born in 1591, was restored to the earldom in 1604. He, too, was a courtier and a soldier, seeing service in Germany and against Cadix. In 1642 he was appointed commander-in-chief of the parliamentary army and he kept that position until 1645. He died Sept. 14, 1646.

Es Sinn Village of Iraq, or Mesopotamia. It is 7 m. from Kut-el-Amara, and here in Dec. 1915, the Turks had a strong position. This was attacked in March by the British force advancing to the relief of Kut, but it was found impossible to dislodge the Turks before the garrison under Sir C. Townshend surrendered.

Establishment Position of some religious bodies in relation to the State.

An established church is one officially recognised as the church of a nation. Generally such recognition has a legal basis and is coupled with State endowment. Christianity was first made a State religion by the Emperor Constantine in the 4th century. After the Reformation the English Church became established, but not the (Presbyterian) Church in Scotland. It was partly an objection to State control which later led to the founding of the Independent and Baptist Churches.

Estaires Town of France. It is 13 m. from Lille and was the scene of much fighting in 1918. On April 10, 1918, after a fierce fight, the Germans captured it from its British defenders, but they were driven out in the following September.

Estate Term used for property, especially landed property. It may refer

ESTATE DUTY

to a considerable amount of land, owned by a single person, or to the whole of a person's property. Originally it meant a state, as in the Prayer Book. The good estate of the Catholic Church.

Estate agent is the term used for a man who undertakes to manage and to buy or sell property. There is a college of estate managers at 35 Lincoln's Inn Fields, London, where estate agents are usually paid by a percentage on the amount they collect or obtain from sales. This is 5 per cent. on large ones and 14 per cent. on small ones.

Estate Duty Name given to one of the duties paid on the money left by persons at death. The other duty is the legacy duty. The estate duty was introduced in 1891, and is payable on all property left. It is graduated according to the amount. In 1930 the scale was fixed as follows:

£200 to	£1 000	2 per cent
£1 000	£5 000	3 "
£5 000	£10 000	4 "
£10 000	£20 000	5 "
£20 000	£30 000	6 "
£30 000	£40 000	7 "
£40 000	£50 000	8 "
£50 000	£60 000	9 "
£60 000	£70 000	10 "
£70 000	£80 000	11 "
£80 000	£90 000	12 "
£90 000	£100 000	13 "
£100 000	£250 000	14 "

From this the rate rises until it becomes 40 per cent. on an estate between £1,000,000 and £1,250,000, and 50 per cent. on an estate worth £2,000,000 and over. Money or property given away during the three years before death is charged with duty, estates under £500 pay an inclusive fee of 50s or 30s which include all charges. Interest at the rate of 4 per cent is charged on the amount due.

Este Famous Italian family. It takes the name from a city, 20 m from Padua. Dating from about 1000 its earliest members were lords of Este. In 1452 one of them was made Duke of Modena and then Duke of Ferrara. Beatrice (1475-97), Duchess of Milan, was famous for her beauty and culture. Another notable member was Ippolito d'Este, who became a cardinal and built the Villa d'Este at Tivoli. The family lived in great estate at Modena until 1797, when the duchy was taken from them and, in 1803, Ercole, the last male member of the family died. His daughter, Maria Beatrice, married a son of the Emperor Francis I of Austria and their son regained Modena, which was sold by the family of Hapsburg Este until 1859. Maria Beatrice wife of James II, was a member of the Este family.

Esterhazy of Galantha. Noble Hungarian family. Of the three branches of the family, that of Forchtenstein bulks most largely in history. Nicholas (1582-1645) fought long to free Hungary from the Turks, defeating them himself in 1623. His son, Poni (1635-1713), founded the princely branch of the family. He helped to deliver Vienna from the Turks in 1683 and was made a supporter of the Holy Roman Empire in 1712. Prince of the Hapsburgs and was both a brilliant soldier and a patron of the arts. As general music director of his court for thirty years, Joseph Haydn (1732-1809) wrote many compositions for his private orchestra. His grandson, Nicholas (1765-1833), a great art collector, raised troops and fought against

Napoleon. He was offered the kingship of the Magyars in 1809, but refused the honour. Paul Anthony (1786-1866) was ambassador in London after the Napoleonic wars, and in 1848 was foreign minister in the first responsible Hungarian ministry. He died in comparative poverty, the fruit of his reckless extravagance.

Esther Book of the Old Testament. It narrates an episode at the court of the Persian King Ahasuerus (Xerxes) in Susa, 5th century B.C. The royal consort Vashti was deposed, and her place taken by Esther, related to a Jewish exile, Mordecai. Esther and Mordecai frustrated the plots of the grand vizier, Haman, against the Jewish people, whose deliverance was there after commemorated by the Book of Esther. Written about 300 B.C. the Book of Esther was expanded by Maccabean additions which form a separate section of the Old Testament.

Estimate Calculation of probable cost, building, printing, and other business transactions. It is usual for the prospective customer or client to ask for a statement giving an estimate of probable cost. He often asks for two or more estimates from different firms in order to compare one with another.

In parliamentary procedure the proposed expenditure of the country is put before the House of Commons in the form of estimates. These are divided into navy, army, civil service and other branches and each shows the amount of money required for the coming financial year. After they have been passed the Chancellor of the Exchequer can frame his budget. Each year the House appoints a committee to examine the estimates and report on them.

Eston Urban district of York shire (N.R.). It is 243 m from London by the L.N.E.R. Iron ore is mined, and there are iron and steel works. Pop. (1931) 31,142.

Estonia Republic of Europe. On the Baltic Sea, on the south is Latvia, and on the east Lake Peipus and Russia. It covers 18,353 sq m and its population is (1932) 1,120,000. The capital and chief seaport is Tallinn (Reval). The next largest place is Tartu (Dorpat), where is the national university. The republic is divided into eleven districts and includes Oesel, Moon and other islands in the Baltic. In religion the people are chiefly Lutherans. From 1721 to 1917 Estonia was part of Russia, and before then part of Sweden. Its independence was proclaimed in 1918, and in 1920 was recognised by Europe. The constitution consists of an assembly of 100 members elected by all adult citizens for three years. The assembly chooses the prime minister and the other ministers. Agriculture and dairy farming are the chief industries. Rye, wheat, barley, oats and potatoes are grown. Butter and other farm produce and timber form the chief exports. Military service is compulsory. The unit of currency is the kroon, worth about 1s. 1½d and divided into 100 cents. The national flag is blue, black and white in horizontal stripes.

Estuary Mouth of a river, where river waters meet the sea, the effect of the currents causes a gradual mixing of the waters, and where the river is large, as in the Thames, the surface of the estuary may be fresher than at a greater depth.

Étaples Town of France. It is 17 m from Boulogne at the mouth of the little river called the Canche. Fishing is carried on and there are some small industries. In 1492 the treaty of Étaples was made between Henry VII and the French king. Pop 6000.

During the Great War Étaples was an important British base, with training grounds, hospitals, etc. There is now a large cemetery near the town.

Etching Method of engraving on metal. The design is engraved by means of an acid solvent or by the use of special tools for cutting directly on the metal. In the acid process the metal plate (generally of copper) is covered with a ground or coating of wax, bitumen or other resinous material, the design or drawing being traced through the ground by means of fine or coarse steel points or etching needles. The plate is then treated with nitric acid, or other solvents in the case of other metals, and on completion of the process the wax layer is removed by the use of turpentine. Albrecht Dürer was one of the earliest etchers, and Rembrandt the greatest.

Ethelbert King of Kent. A descendant of the Saxon invaders of England, he is believed to have reigned between 560 and 615. Counted as one of the bretwaldas or overlords of Britain, he issued some laws which are still extant, but he is best known as the husband of Bertha, a Frankish princess and a Christian, who invited missionaries to England. In 597 he was baptised by St Augustine.

Ethelred Name of two English kings. Ethelred I, a son of Ethelwulf, King of Wessex, became king in 866 in succession to his brother Ethelbert. He spent his time fighting the Danes being assisted by his young brother Alfred. His death on April 23, 871, was caused by wounds received in battle.

Ethelred II, was a son of King Edgar. He began to reign in 973, when only ten, and was on the throne for nearly 40 years. His inability to deal with the Danish peril won for him the name of the Unready. He began the payment of Danegeld, and in 1002 was responsible for a massacre of the Danes. He died in London, April 23, 1016.

Ether Colourless, volatile and very inflammable liquid. It is prepared by distilling alcohol with sulphuric acid. Owing to its solvent action upon fats, oils, resins and alkaloids, it is used in the preparation of coal tar dyes, artificial silk, cordite, collodion and many medicinal compounds, and in wet plate photography.

As it evaporates rapidly, producing a sensation of cold, ether is used as a local anaesthetic in minor operations. It is also used by inhalation, as a general anaesthetic, since it causes less depression on the heart than chloroform. Ether for medicinal purposes is prepared from pure alcohol, but for ordinary commercial use from methylated alcohol.

Ether Name given to the subtle medium that was assumed to fill all space (including that between atoms and electrons), in order to explain the propagation of light, heat and other electro-magnetic waves. The necessity for the assumption of such a medium has now been overcome.

Etherege Sir George. English dramatist. Born in 1634, he became a lawyer and a courtier. In 1664 his comedy,

The Comical Revenge or Love in a Tub was produced in London, followed by *She Would if She Could* and *The Man of Mode*. From 1685 to 1688, he was ambassador in Paris, and died in 1690.

Ethics Science of moral values. Zeno of Citium in Cyprus, in the 3rd century B.C. was one of the first to set up a scientific system of ethics. Virtue is the only good and baseness the only evil, all else is *adiaphora* (indifferent). The correct knowledge of virtue is acquired by *phronēsis* (practical wisdom), and the aim of life should be "to live in complete agreement with nature." The wise man knows and can do everything, he is rich in poverty, free in chains, happy in sickness, even at death.

Ethiopia Official name for Abyssinia. The name was used by the Greeks for the people of Africa in general who, to them were Ethiopians, meaning "people with burned faces." They are mentioned in both Homer and Herodotus. In the 11th century B.C. there arose a kingdom of Ethiopia and early in the Christian era another was set up. See ABYSSINIA.

Ethnography Description and classification of human races and peoples according to their geographical distribution. It furnishes the material for ethnology.

Ethnology Study of the distribution and development of human races. It treats of those racial distinctions which attend the material and intellectual elements of human culture, calling in the aid of specialised inquiries dealing with the primary needs of food, clothing and shelter, and the social, artistic, economic, political and religious elements in human life.

Assuming a single origin for mankind, the ethnologist makes a general classification of past and present races, which he summarises as brown, black, yellow and white. He finds that racial admixture has been operative throughout all human history, and that physical development is unaffected by language relationships, there being peoples, e.g. the Celts, united more closely by speech than by race. The study of tribal customs and relations is of importance in the administration of native peoples.

Ethyl Organic radical, or group of atoms capable of behaving like an element, having the chemical formula C_2H_5 . It forms a number of important compounds, such as ethyl alcohol, ethyl chloride and ethyl nitrate. Of recent years the term ethyl petrol has been used for petrol containing lead tetraethyl to form an "anti-knock" compound.

Ethylene Colourless gaseous hydrocarbon. It was formerly known as olefiant gas and is prepared by strongly heating alcohol with sulphuric acid. Ethylene is very inflammable, burns with a luminous flame and is explosive when mixed with oxygen. A considerable quantity of ethylene is present in coal gas and imparts to it much of its luminosity. Several of its compounds are of value, e.g. ethylene bromide which is used in medicine and in the preparation of ethyl petrol.

Etive Sea loch of Scotland. It is an opening of the coast of Argyllshire and is about 20 m long. The River Etive which flows into it, is noted for its salmon.

Etna Volcano of Sicily. It is situated near the east coast and rises gradually to

a height of about 10,865 feet, forming a large cone, cleft on one side by the Valle del Bove and a number of smaller cones. The base of the volcano covers over 400 sq. m. and consists of a large expanse of fertile soil. Over eighty eruptions have been recorded since the one described by Pindar in 476 B.C. The eruptions of 1923 and 1928 caused considerable damage.

Etna is famous in classical mythology, chiefly perhaps as the place where Vulcan had his forges.

Eton Town and urban district of Buckinghamshire. It stands on the Thames opposite Windsor, which is its station, and is 21 m. from London. Pop. (1931) 2005.

ETON COLLEGE. One of the great public schools. It was founded in 1440 by Henry VI. The head of the foundation is the provost, but the headmaster is the head of the school. It consists of about 1114 boys of whom 70 have scholarships and live in college. The rest are boarders and live in houses outside the college. The school has its own customs and games, including the wall game of football. Many great men have been educated here.

Etretat Watering place of Normandy. It stands on the English Channel 16 m. from Havre. The attractions include a casino, gardens and bathing. Pop. 2000.

Etruria District of Italy, now known as Tuscany. Before the rise of Rome it was inhabited by a people who have left traces of a remarkably high civilisation, to which it is almost certain Rome owed a good deal. The sculptured tombs and the paintings found on vases and other pottery display not only a keen artistic sense, but also the possession of gold, silver and other metals used for decorative purposes. The Etruscans were also acquainted with music.

Etruria District of Staffordshire now included in the city of Stoke on Trent. It has a station on the L.M.S. Rly. Josiah Wedgwood opened his pottery works here in 1769, imitating Etruscan and other ancient vases.

Etruria marls are beds of marl and clay found in the north and midland counties of England and used for the making of pottery.

Ettrick District of Scotland, called Ettrick Forest. A forest only in name it is chiefly in Selkirkshire, with portions in the counties of Midlothian and Peebles. The kings of Scotland hunted here. The poet, James Hogg, is known as the Ettrick Shepherd. Ettrick Water is a river of Selkirkshire. It is 32 m. long and joins the Tweed near Selkirk. Ettrick Pen is a hill in the county.

Etty William English artist. Born at York, March 10, 1787, he studied at the Royal Academy School and under Sir Thomas Lawrence. Elected R.A. in 1828 he was a brilliant colourist and flesh painter. His best known works are *Youth at the Plow* in the National Gallery, London, *The Combat* in Edinburgh, and *Ulysses and the Sirens* in the Royal Institution, Manchester. He died Nov. 13, 1849.

Etymology Study of the derivation and original significance of words. A modern study, much attention is paid to it by students of languages, especially in Germany. In English there is a valuable *Etymological Dictionary* edited by W. W. Skeat.

Euboea Largest island of the Aegean Sea. Belonging to Greece, it is separated from the coast by Euripus Strait, which is bridged at Chalcis, the capital. It is 90 m. long, and occupies 1430 sq. m. Mt. Delphi, 5725 ft. high, rises in the centre from fertile lowlands, which produce corn, wine, oil, fruits and cattle. Hot sulphurous springs, esteemed by Sulla, still function and many minerals and ores are mined here. Pop. 154,500.

Eucaine Drug used as an anæsthetic. Prepared artificially, it is an alkaloid not unlike cocaine, but less powerful. It is used by dentists.

Eucalyptus (Gr. *eu* well, *kalyptos*, concealed). Genus of evergreen trees and shrubs of the order Myrtaceae. The name is derived from the protective covering on the buds which is shed when the flowers open. The blue gum, *E. globulus*, yields an aromatic oil with antiseptic and medicinal qualities, which is used in affections of the throat and lungs. The trees grow chiefly in Australia.

Eucharist One of the names for the sacrament of the Lord's Supper. The word, denoting thanksgiving, was applied to the consecrated elements, and then to the whole celebration, which passed into the sacrifice of the Mass. At the Reformation the Anglican church adopted the term Holy Communion, some other Protestant churches adhere to the original name, the Lord's Supper. The Roman Catholic Church and high churchmen in the Anglican church use the term Eucharist.

Euchre Card game. It can be played usually by two players. Of the pack, the 2, 3, 4, 5 and 8 of each suit are discarded, and of the remaining cards the dealer gives five to each player, turning up the top one of the balance to fix the trumps. Each player in turn can decide to play or to pass, if he plays he is entitled to the trump card in exchange for one of his own. Two cards make a trick, three tricks make a point, and five points make a game. Euchre can be played by four persons.

Eucrase Rare mineral. It is composed of hydrated silicate of beryllium and aluminium and contains 17 per cent of beryllium oxide. It is found at Minas Geraes in Brazil, in Austria and in the Ural Mountains in the form of extremely brittle striated prisms, which may be colourless or yellow, green or blue.

Euclid Greek mathematician. He taught at Alexandria about 300 B.C. and was the founder of mathematical literature. Of his numerous works, we still possess his *Stoicheia* (Elements of Mathematics), which were used until comparatively recent times as the foundation of all geometrical text books. They are in fifteen volumes, of which the thirteenth and fourteenth were added by Hypsicles. Other extant works are *Data*, 95 geometrical propositions, and an astronomical treatise *Phaenomena*.

Eucleides Greek philosopher. He flourished about 400 B.C. and was a pupil of Socrates. He founded the Megarian school which was chiefly known for its cultivation of dialectics. The school unites the doctrines of Socrates with those of the Eleatics, and identifies that which exists with the good, that which is not good does not exist. The good is unalterable, one and similar, always the same, it is the intelligence, the reason, God.

Eudiometer Instrument used for analysing gaseous mixtures. It consists of a graduated straight or U-shaped glass tube sealed at one end and open at the other, with two platinum wires inserted near the closed end to allow of the passage of an electric spark. The tube is filled with mercury and inverted in a mercury pneumatic trough. The gases are introduced and a spark passed through the mixture, the analysis being determined by the diminution of volume.

Eudocia Name of two East Roman empresses. (1) Eudocia Augusta, a Greek sophist's daughter, was converted by Pulcheria, sister of Theodosius II., whom she married in 421. Banished in 440, she retired to Jerusalem, and was the author of several literary compositions. (2) Eudocia Macrembolitissa was the consort of Constantine X. At his death she married Romanus IV. in 1068, but abdicated in 1071 to become a nun.

Eugène Italian prince and soldier. The son of a prince of Savoy, he was born in Paris, Oct. 18, 1663, his mother being a Frenchwoman. He served his life as an officer in the Austrian army, being almost continuously in the field. He fought first against the Turks and then in Italy against the French. In 1697 he won one of his great victories at Zenta, against the Turks. In the war of the Spanish Succession he ranked with Marlborough as a leader of the Allies. The two won Blenheim together and later Oudenarde and Malplaquet, in the meantime Eugene had taken Turin.

Having helped to make peace in 1714, Eugene was able in 1716 to command an army which defeated the Turks, and took Belgrade. In 1734 he fought his last battles, once more against France, and died April 21, 1736.

Eugenics Study of the factors which may improve or impair the physical and mental racial qualities of future generations. The modern science owes its inception to Sir Francis Galton (q.v.), whose anthropometrical studies led to the collection of valuable statistics relating to the problems of inheritance. A further advance in eugenics was made by the Mendelian research into the laws governing the transmission of hereditary physical characters. There are now specialised branches dealing with such questions as the encouragement of procreation of children by individuals of sound stock, the reduction and prevention of mental deficiency and general preventive measures of hygiene and social reform.

Eugénie Empress of the French. She was born at Granada, Spain, May 5, 1826, the daughter of the Spanish count of Montijo, her maternal grandfather was a Scot named Kirkpatrick. She met the emperor Napoleon III. in Paris in 1851, and the two were married in 1853. Her career was divided into two parts. From 1853 to 1870 she was the centre of a brilliant and luxurious court, from 1871 to her death she was an exile in England. She lost her husband in 1873 and her only child, the Prince Imperial, in 1879. She lived at Clifden, and then at Farnborough, but died in Spain, July 11, 1920. She was buried at Farnborough.

Eugenol Substance obtained from cloves. It is obtained by distillation of the oil and also from the oil of the pimento leaf. It is used in medicine as a carminative and in cases of toothache. It is also used to make vanillin.

Eulenspiegel Tyl A popular German character, and the title of a sixteenth century chapbook. The son of a peasant, born at Knettingen in Brunswick, in the fourteenth century, he played practical jokes and tricks on tradespeople, priests, princes, and especially innkeepers. In England, his tricks became anglicised, and were attributed to Robin Goodfellow.

Eumæus In Greek story, the swineherd mentioned in Homer's *Odyssey*. He was in the service of Penelope, during her husband's absence, and to him Odysseus made himself known when he arrived home in disguise.

Eumenides (The kindly) In Greek mythology, a name given to the Erinyes or Diræ (the Furies). Three in number, Tisiphone, Megæra and Alecto, they were the ministers of divine vengeance, who punished the guilty by plague, war and the stings of conscience. After they had ceased to persecute Orestes for slaying his mother Clytemnestra, they were called Eumenides, and a temple was erected by him in their honour. They were represented in black garments, with serpents instead of hair. The Eumenides is the title of a tragedy by Aeschylus.

Eunuch Word denoting bedkeeper, applied to a chamberlain in Western Asia and Egypt, and, later, at the Byzantine court. He was generally an emasculated man, but the term was extended to any castrated attendant of bodacious or of women's quarters in polygamous households, the position, in princely establishments, often conferring great political influence. At one time male choristers, retaining their boyish voices through castration, sang on the Italian stage, and even in the Sistine chapel, Rome, but the practice ceased in 1878.

Eupen Town of Belgium. It stands on the Weser, 10 m. from Aix-la-Chapelle, and is a busy industrial centre. The French name for it is Neaux. Pop. 14,000.

Eupen is the capital of a fertile district or circle which has been a subject of European concern. It was part of the Austrian Netherlands before it became French in 1801. In 1811 it was given to Prussia, who retained it until 1919, when, with Malmédy, it was ceded to Belgium. The combined area of Eupen and Malmédy is 382 sq. m., and the population 60,213. In 1925 they were joined to the province of Liège.

Euphemism Figure of speech which describes an offensive or unpleasant thing in an indirect way. An example is to describe a lie as a terminological inexactitude.

Euphonium Brass musical instrument. It is a member of the saxhorn family and is identical with the tuba in B flat. Its pitch is an octave lower than that of the cornet and it is the chief bass solo instrument in military bands.

Euphrates Largest river of W. Asia. It is formed by the union of two rivers, the Kara Su and the Murad Su, which rise the former in the Dumlâ Dagh, the latter in the Ala Dagh. Piercing the Taurus Mountains, the stream flows south by west until nearing Aleppo. It turns south-east and runs through Syria and Iraq joining the Tigris to form the Shatt-el-Arab. It has a total length of 1800 m. Babylon stood upon its banks.

Euphuism Affected English prose style fashionable in the late 16th

including the F.R.S. From 1884 to 1908 he was keeper of the Ashmolean Museum, Oxford, and he was twice president of the British Association. He has written several books on his discoveries.

Evaporation Process by which a liquid passes into a state of vapour. Evaporation is increased by the application of heat and by lowering the pressure upon the liquid. If evaporation is carried out in a confined space at a given temperature a point is soon reached where the space becomes saturated with the vapour, equilibrium is established and the process ceases. Boiling commences when the pressure of the saturated vapour, which increases with the temperature, becomes equal to the atmospheric pressure.

Eve Name given by Adam to his wife, because she was "the mother of all living" (Gen. III. 20). Her sons were Cain, Abel and Seth. The Genesis story describes her creation from a rib taken out of Adam's flesh as a "help meet for him," and her participation in the Temptation and the Fall.

Evelyn John. English diarist. Born at Wotton House, near Dorking, Surrey, Oct. 31, 1620, he was educated at Balliol College, Oxford. A man of wealth, he spent some years abroad, and in 1652 made his home at Sayes Court, Deptford. Evelyn was secretary of the Royal Society, treasurer of Greenwich Hospital, and held other public positions. He wrote on agriculture, forestry, and a number of other subjects. He died at Wotton, Feb. 27, 1706. His many friends, his wide knowledge and his acute intellect make his *Diary* one of the outstanding books of its kind and an invaluable mine of information concerning the life of his time. It was discovered in an old clothes basket at Wotton in 1817.

Evening Primrose Biennial herb (*Oenothera biennis*), of the order Onagraceae, a native of the United States. A favourite in English gardens, it has flower stems four to five feet in height, bearing spikes of large yellow flowers which only open towards sunset.

Everest Highest mountain in the world. It stands on the borders of Nepal and Tibet and is 29,141 ft. high. It is named after Sir George Everest (1790-1866) Surveyor General of India. In 1922 and again in 1924 expeditions under Col. C. G. Bruce set out to reach the summit. Both failed, but on the second occasion some of the climbers ascended to over 28,000 ft.

In 1933, after elaborate preparations, another expedition was made over Mount Everest by the Houston Mount Everest Flight Expedition, led by Air Commodore Fellowes and the Marquess of Douglas and Clydesdale, and about the same time the Rutledge Expedition attempted the climbing of the mountain. In 1936 Mr. Rutledge was a leader of a new attempt on Mt. Everest.

Everglades District in the South of Florida, U.S.A. It is hot and swampy and largely overgrown with vegetation, but parts have been drained and used for growing sugar. In it are many lakes with islands. It extends for about 120 miles from north to south.

Eversley Village of Hampshire. It is 14 m. from Basingstoke. Charles Kingsley, who was rector here, 1844 to 1875, is buried in the churchyard of the 13th-century church.

Eversley Viscount. English title borne by Charles Shaw-Lefevre. Born Feb. 22, 1794, he was a member of parliament from 1830 to 1857. From 1838 to 1857 he was Speaker of the House of Commons. He was made a viscount in 1857 and died Dec. 28, 1888, when the title became extinct.

Eversley's nephew, George John Shaw Lefevre, who was born June 12, 1832, was a Liberal M.P. from 1863 to 1895. He held office under Gladstone, 1869-74 and again 1881-84. In the Liberal ministry of 1892-95 he was first Commissioner of Works and then President of the Local Government Board. In 1906 he was made a baron. In 1919 he published a volume of *Reminiscences*, and he died April 19, 1928. Baron Eversley did a great deal to preserve commons and footpaths for public use.

Everton District of Liverpool. On the north side of the city, it gives its name to a toffee originally made here.

The Everton Football Club is one of the leading professional clubs playing the Association game. It was founded in 1879 and was one of the original members of the Football League. The club won the Association Cup in 1906 and 1933 and was champion of the League in 1891, 1915, 1928 and 1932. The ground at Goodison Park, Liverpool holds 60,000 people.

Everyman English morality play. Its authorship is unknown, but it dates from about 1500. Possibly a translation from the Dutch, it tells the story of Everyman's journey through the world, a journey which, by means of Death, God summons him to take.

The Everyman Theatre is at Hampstead, London, and was opened in 1920.

Evesham Borough and market town of Worcestershire. It stands on the Avon, 15 m. from Worcester and 106 from London on the G.W. Ry. The town is the centre of a fruit-growing district known as the Vale of Evesham. Pop. (1931) 8799.

The Battle of Evesham was fought here, Aug. 4, 1265, when Prince Edward afterwards Edward I. defeated the barons under Simon de Montfort. An obelisk marks the site.

Eviction Turning a tenant out of his house or lands. Before 1914 a landlord could evict a tenant without offering any reason, providing proper notice had been given. Since the passing of the Rent Restriction Acts the tenant of a controlled house can only be evicted by an order of the court for non-payment of rent or if the landlord requires the premises for his own use. The eviction of tenants was carried out on a large scale in Ireland during the land troubles late in the 19th century.

Evidence Testimony or information given in a court of law. By English law all evidence must be given on oath and one who gives false evidence can be prosecuted for perjury. The two main rules of evidence are that it must be the best available, primary evidence, as it is called, and that it must be relevant to the issue. In the former case it means for example that a copy of a document will not be accepted as evidence if the document itself is in existence. Hearsay evidence is not regarded as evidence, although there are exceptions to this rule. Since 1908 the husband or wife of an accused person can give evidence in a case. The phrase, king's evidence, is used for the testimony of a criminal who gives evidence against his fellow criminals.

Evil Eye Faculty of fascinating persons or things to their harm by looking at them. Belief in the evil eye, possession of which was involuntary, was common to the Hebrews, Greeks and Egyptians and was rife throughout Europe in the Middle Ages. It still persists among Italian and Irish peasants. Most savage races have been found to believe in it. Charms and amulets as well as certain offensive actions such as spitting, are supposed to avert it.

Evolution Process by which plants and animals have developed by gradual modification from previously existing forms of life. Evidence of such changes are afforded from anatomical and embryological data as well as from a study of fossil remains. It is only by reference to the theory of evolution that the resemblances and differences of structure in various groups of plants and animals can be satisfactorily explained. It elucidates also the appearance of features, permanent in lower forms, in the developmental stages of the higher animals, e.g., the possession of fish-like characters and later of reptilian characters in the early stages of the embryo of a mammal. Fossil remains, though necessarily incomplete, supply many indications of the evolution of complex types from simpler ones. In general the changes are progressive, but in some cases evolution is retrogressive.

Evora City of Portugal. It stands on a fertile plain, 72 m. from Lisbon. It contains a temple and other remains of a Roman colony, also examples of Moorish architecture. It is an archiepiscopal see and has a beautiful 12th century cathedral. The city walls still exist and Evora trades in wine and has textile industries. Pop 16,148.

Évreux City of Normandy. It stands on the Iton in the department of Eure, of which it is the capital. It is famous for its cathedral, which has been restored, but remains a wonderful monument of Gothic art. The city is an agricultural centre. At Old Evreux 4 m. away, Roman remains have been found. Pop 19,000.

Ewell Village of Surrey. It is 13 m. from London, on the S. Rly., and a residential area for Londoners. Between Ewell and Cheam is Nonsuch Park. Pop 3,000.

Ewing Sir James Alfred, Scottish scientist. Born in Dundee March 27, 1855, and educated at the University of Edinburgh. He began his lifework as assistant to Lord Kelvin. His first important post was Professor of Engineering at Tokyo, 1878-83. From 1883-90 he was Professor at University College, Dundee, and from 1890 to 1903 Professor of Mechanism and Applied Mechanics at Cambridge. In 1903 he was made Director of Naval Education, and in 1916 Principal of Edinburgh University. He retired in 1929 and died in 1935. During the Great War Ewing was a member of the explosives committee. His many honours included a Knighthood (1911), an F.R.S., the presidency of the Royal Society of Edinburgh, and the presidency of the British Association (1932). Ewing did much for the improvement of electrical apparatus.

Examiner One who conducts an examination, or part of it. Examiners are usually members of the teaching staff of a university or college.

In the high court in London lawyers, called examiners, are empowered to examine witnesses.

The examiner of plays is an official in the Lord Chamberlain's department, to whom a copy of any new play or altered old play must be sent at least seven days before it is produced. He has the power to prohibit the acting of any play that is indecent.

Excalibur Magic sword of King Arthur. It was given to him by the Lady of the Lake to ensure his immunity from severe wounds and loss of blood. After his final defeat King Arthur caused Excalibur to be cast into the lake, whence a hand arose and drew it from sight.

Excavator Mechanical device for the removal of large quantities of earth or similar material. It is employed in building, mining and quarrying operations. The crane, navy or power shovel, used largely in quarrying, consists of a movable crane working a dipper at the end of an arm. Another type is a modification of a dredger, with an endless chain of buckets having cutting edges, it is used for removing surface materials.

Excess Profits Duty Tax imposed by the British Government to meet the expenses of the Great War. It was introduced in 1915, when it was 50 per cent. on all profits made in business in excess of the normal. The rate was raised to 60 per cent. in 1916 and 80 per cent. in 1917. Farmers and professional men were exempt. The tax was abolished in 1921. In 1920-21 it produced £186,000,000. A similar tax was introduced in the British Dominions and some foreign countries.

Exchange In finance, the transfer of the money of one country into that of another. The enormous volume of international trade and the amount of international loans make the question of the exchanges very important, and many firms are engaged in the business of buying and selling bills of exchange and other forms of currency. Each day the rates of exchange are given in the papers, and a merchant in London can calculate exactly what he will get for goods he sells in New York, Paris or Berlin.

After the Great War there were serious fluctuations in the various rates of exchange which made business very difficult, but gradually most of the countries stabilised their currencies, and to-day variations are usually very slight indeed. The rate of exchange is influenced by trade balances, the volume of gold in a country, and other such matters.

Exchange Name for a building in which merchants meet for the transaction of business. In England the principal one is the Royal Exchange, London, but this is no longer used for its original purposes. Exchanges are now confined to a single line of business, e.g., the stock exchanges in London and other large cities; also the wool, hop and coal exchanges in London and the corn exchanges in many agricultural centres. Membership is usually confined to those engaged in the particular business concerned.

Exchequer Name given in England in Norman times and later, to the department responsible for collecting the king's revenues. The name comes from chequer, a board resembling a chequer or chess board being used to help in calculating the amounts due. The name survives in the Chancellor of the Exchequer and the Exchequer and Audit Department.

The exchequer was first at Winchester, but later removed to Westminster, and there is in

EXCISE existence a book the *Dialogus de Scaccario*, which describes its working in the time of Henry II. To an official meeting twice a year the sheriffs of the counties came and accounted for the money they had collected. The exchequer continued its duties, although they varied from time to time, until in 1834 its duties were handed over to the Treasury with the Chancellor of the Exchequer as its head. Scotland and Ireland had each an exchequer until this was abolished in the 19th century. A law court, the court of exchequer, grew out of the exchequer. The judges of this were called barons and it lasted until 1876, when its duties, chiefly concerning revenue cases, were handed over to the King's Bench division of the High Court.

The Exchequer and Audit Department was set up in 1866 to audit the public accounts. It is independent of the Treasury. The offices are on Victoria Embankment, London, EC 4.

Exchequer bonds are bonds issued by the British Government from time to time when money is needed for temporary use. They were introduced in 1853 and replaced the exchequer bills by which the government had borrowed money since 1696.

Excise Word used for the duties levied on goods produced within a country, as distinct from customs duties, which are levied on goods entering a country. Under a system of Free Trade every customs duty is counterbalanced by a corresponding excise duty. England the earliest excise duties date from 1200, when they were added to the

England the earliest excise duties date from the 17th century, when they were placed on beer and other drinks. Others were added in the 18th century to the excise men, and in the 18th century the excise men, numerous and their collectors the excise men, were a detested class. In the 18th century many of them were removed and to day they are only levied on a few articles, chiefly beer, spirits, patent medicines, table waters, etc. matches. Licences for dogs, messervants, etc. and the entertainment tax are also classed as excise duties. In 1931 the total receipts from the excise duties was £119,843,470. They are collected by the Board of Customs and Excise, but before 1909 were collected by the excise branch of the Inland Revenue Department.

Oxcommunication

Excretion Discharge of waste matter from the body, also the substances so excreted. Excretion takes place through the skin, lungs, bowels and kidneys. Of these the most important are the two kidneys, which filter out from the blood the waste products normally resulting from metabolism. Of the 50 oz or so of urine excreted per diem about one-twentieth is solid waste.

3 matter. In the process of perspiration (or) water is discharged through the sweat glands of the skin, this excretory process aiding temperature regulation. Carbon dioxide and water are exhaled from the lungs, while the bile salts pass out undigested food material, bile remains and pigments, bacterial remains and cell residue.

DR. KIDNEY, SWEAT, URINE

See of Devon and Somerset It rises
Exmoor and flows S
Channon

Exe River of Devon and Somerset. It rises in Somerset on Exmoor and flows S across Devon, entering the English Channel by a navigable estuary 6 m long. It is 55 m long and its chief tributaries are the Barle and other streams rising on Exmoor. It passes Exeter, and Exmouth stands at its mouth.

other streams rising
Exeter, and Exmouth stands at its mouth.
Execution Act of carrying out a decision
of a court of law. One kind of execution is a
distrain on the goods of a person who has
not paid a debt after being ordered to do so
by a court. It can only be carried out by
officers of the court. Execution is putting a person
to death. Another form of execution has been passed. The
death sentence is now hanging by a thread.

Another form of execution is putting a person to death after sentence has been passed. This is done in Great Britain and in parts of the France by the guillotine and in the United States by the electric chair. Until 1868 executions in England were public. Formerly persons of rank and political offenders were executed by the sword. In 1746 soldiers were ordered to be shot.

Executor Person appointed to carry out the provisions of a will. There may be one, two or more executors. Their duties are to prove the will and obtain the probate, to wind up the estate of the deceased person. They should first pay the debts and then distribute the remainder of the property as stated in the will. An executor is liable for any breach of trust, but a year has passed since his term of office. An executor is not entitled to remuneration unless it is stated in the will that he is to be paid, but he can employ a solicitor to act for him and charge his expenses to the estate. When money is left in trust the same person is often appointed both executor and trustee. See WILL.

Exegesis Exposition or interpretation of any literary work or passage, especially of Holy Scripture. It accepts the text as it stands, the consideration of its origin and authenticity being the task of Biblical criticism. It seeks to determine the exact meaning of the words.

Exeter City and county town of Devonshire. It stands on the E. of the G. W. and is served by the cathedral. The chief building is the cathedral, dedicated to S. Peter. It was restored in the 19th century and contains interesting architectural and other features including a minstrel's gallery. Near are the bishop's palace and the college of priest vicars. The Guildhall, one of the finest buildings of its kind, dates from Elizabethan times. In Rougemont Park are the ruins of Rougemont Castle, and parts of the city walls still stand and greatly enlarged. College founded in 1835 and in 1623, is a large public school in modern buildings. Exeter is since Exeter a modern business centre for a wide district. A ship canal connects it with Topham on the estuary of the Exe. Pop (1931) 68,039.

Exeter Marquess of English title borne by the family of Cecil John Holland, half brother of Richard II., was made

public agricultural lands.

English title borne
by the family of Cecil John
Marquess of Exeter, was made
Holland, half brother of Richard II., was made

Duko of Exeter in 1397, but he was executed in 1400. Thomas Beaufort was duke from 1416 to 1425, and in 1443 John Holland, son of the former duke, was created duke. In a few years, however, the title was again extinct.

In 1525 Henry Courtenay was made Marquess of Exeter but he lost the title when he was executed in 1538. In 1605 Thomas Cecil, Lord Burghley, was made Earl of Exeter and in 1801 the 10th earl was made a marquess. The title has since been held by the Cecilis. The eldest son of the marquess is called Lord Burghley and his seat is Burghley House (q.v.). Lord Burghley (born 1905), son of the 5th marquess, is a famous athlete, proving himself at the Olympic Games and elsewhere, one of the greatest hurdlers of the age. In 1931 he was elected Conservative M.P. for Peterborough.

Exhaustion See FATIGUE.

Exhibition Kind of scholarship. It is used at the Universities of Oxford and Cambridge for grants of money which are of less value than scholarships. Most of the colleges award them and there are also awarded by other educational authorities. The Whitworth exhibitions for engineering students are notable examples.

Exhibition Term for a show or display of any kind. International and other exhibitions are now held for business purposes in the great commercial centres. Some of these are general, but others are confined to a single industry, as the exhibition of agricultural machinery. The first great international exhibition was held in Hyde Park in 1851. The British Empire Exhibitions held at Wembley in 1924 and 1925 were notable. Some cities, e.g., Barcelona, have permanent buildings for exhibitions.

Exhumation Act of taking a dead body from its burial place for purposes of examining it. In Great Britain it is illegal to disturb a grave, but an exhumation can be ordered by the Home Secretary if foul play is suspected, or for any other good reason. Bodies are also exhumed sometimes in order to be buried elsewhere, but this can only be done by consent of the authorities.

Exile Banishment from country or home. It may be self-imposed or by authoritative decree, and is distinct from the compulsory deportation of aliens, which is banishment to their native land.

Exmoor Moorland tract of Somerset and Devonshire. It lies in the north of the two counties and was once a forest. It covers about 20,000 acres of wild and beautiful scenery. Dunkery Beacon, 1700 ft., is the highest point. Simon's bath is the centre of the moor, and on its borders are Minehead and Dulverton. It is the only place in England where the red deer is wild. A good deal of it belongs to the National Trust and it is the scene of R. D. Blackmore's *Lorna Doone*.

Exmouth Seaside resort and market town of Devonshire. It is situated at the mouth of the River Exe, 1½ m. from Exeter on the S. Riv. It was once a seaport of some importance, and in the reign of Edward III. sent ships to take part in the siege of Calais. It has good sands and bathing, and beautiful scenery in the neighbourhood. Industries include fishing and lace-making. Pop. (1931) 14,584.

Exmouth Gulf is an opening, 65 m. long, on the west coast of Australia.

Exmouth Viscount English title held since 1816 by the family of Pellew. Edward Pellew was born at Dover, April 19, 1757, and entered the navy. He rose to command a ship and then a fleet. In 1816 his fleet bombarded Algiers and compelled the ruler to release 2000 slaves. In 1796 Pellew was made a baronet, in 1814 a baron and in 1816 a viscount. He died Jan. 23, 1833.

Exodus Book of Second book of the Old Testament. Describing the release of the Hebrews from their Egyptian bondage. It continues the Genesis story and deals with the life of Israel in Egypt, the preparation of Moses, the ten plagues, the institution of the passover, and the flight across the Red Sea to Sinai (I xviii). The remainder records the prolonged sojourn in the Sinai wilderness, the promulgation of the Ten Commandments, and the Book of the Covenant (xix-xi).

Exogamy Primitive custom requiring marriage to be effected outside the social group. Its impulse is probably economic rather than biological, although its eugenic value as a corrective to in-and-in breeding is undoubted. Where kinship groups are highly specialised, as in aboriginal Australia, the exogamy pertains to totemic families, forbidding marriages between persons of the same totemic name. Some Hindu castes recognise a special variant called hypergamy, under which women may not marry except into castes higher than their own. The prohibition of marriage outside the social group is called endogamy.

Exophagy Custom among certain cannibal peoples of eating only the flesh of persons outside their own social group. Some eat relatives who have died naturally, to acquire their qualities, but slay for food only persons of another kin. The custom usually characterises those forms of man-eating instigated by revenge, e.g., among the Maories in ancient times.

Exorcism Expulsion by ritual methods of evil spirits from persons or places. In all ages belief in intrusive demons as causing bodily or mental ailments has suggested attempts to expel them by incantations fortified by material aids. Present in Babylonia, the practice reached the Hellenistic world, was rife in New Testament times, and still lurks in Roman Catholic and other baptismal rites.

Expansion Enlargement of a body in bulk or surface. A rise in temperature causes expansion of volume in solids, liquids and gases, and the expansion of unit, length, area or volume, per degree centigrade of increase in temperature, is known as the coefficient of expansion. A copper rod will increase in length by 0.0017 of its length for a rise from 0° to 100° C. and the linear expansion of steel railway lines and bridge girders, and all sensitive metal instruments must be allowed for or compensated.

Expectation Something that one thinks will happen in the future. Actuaries and insurance officials use the phrase expectation of life for the number of years persons may be expected to live and on their information derived from experience, base their rates for annuities, life insurances and the like. A rough method of calculating this is to reckon the expectation of life at two thirds of the difference between the present age and 80. Thus, if a man is 44, his

expectation of life is a further 24 years, or a total age of 68. 24 is two thirds of 36, the difference between 44 and 80. To day, however, the expectation is a little more than this, owing to the increased attention paid to public health. The expectation of life is rather different for women than for men.

Expeditionary Force

A name given to the divisions of the regular army kept ready for active service. It was planned when the army was reorganised in 1907, and consisted of six divisions of infantry and one of cavalry with suitable artillery. Its total strength was about 130,000 men and 480 guns. In Aug. 1914 five divisions, one being cavalry, were landed in France, just after the declaration of war on Aug. 4, and were in action at Mons on Aug. 23.

Experimental Farm

A farm or station where experimental work in agriculture is carried out under scientific supervision. The result of statistical and other investigations are published. The oldest of these farms is the one at Rothamsted in Hertfordshire, under the Lawes Agricultural Trust; others are at Woburn in Bedfordshire and Pimpherton in Scotland. There are many experimental farms, under public control, in Canada.

Exploration

Travelling in unknown lands in order to gain information about them. The term is usually confined to the journeys of white men in the unknown parts of continents outside Europe. The exploration of America began with the arrival there of Columbus and continued until almost the whole of the two continents was mapped out. There are still, however, immense areas in Brazil and other parts of S. America which have been only slightly explored. In the 19th century Australia and then Africa were explored until something was known about practically the whole of their surfaces. At different times much exploration work has been done in Asia, but in the centre of that continent are tracts still unknown. More recently exploration has concentrated on first the Arctic and then the Antarctic regions. Both poles have been reached and much valuable knowledge has been gained.

Explosive

Explosive agent. A large number and great variety of explosives are used in war and in mining, quarrying and for similar purposes. These substances which may be in solid or liquid form, vary much in their disruptive power. The original explosive gunpowder has become superseded largely by such compounds of nitroglycerine and nitrocellulose as dynamite, gun cotton and cordite, and by ammonium nitrate, picric acid, and the nitro derivatives of the aromatic hydrocarbons such as trinitro toluene.

Owing to obvious dangers in the manufacture, storage and conveyance of explosives the industry is strictly regulated by the Explosives Act, 1875, and other legal restrictions. To see that the regulations about the use of explosives are observed the Home Office has a staff of inspectors.

Exports

Term used for the goods sent out of a country. In Great Britain they are valued by the authorities at the custom houses, and every month particulars about them are published by the Board of Trade. The difference between a country's exports and imports is called the balance of

trade. Invisible exports are sums paid for shipping, insurance and the like. Re-exports are goods imported in order to be sent to another part of the world.

In 1926 the British Government started a scheme of export credits. The idea was to help trade by guaranteeing credit to reputable firms. The scheme was for five years and was under the Department of Overseas Trade. Its offices are at 9 Clements Lane, Lombard St. E.C. 4. In 1930 it was decided to extend the scheme for a further four years until 1935.

In 1913 Great Britain's exports were valued at £634,800,000. In 1928 they totalled £843,780,000 but there was a decline in 1929, and this continued with only slight interruptions throughout 1930, 1931 and 1932. It was, however, partly accounted for by lower prices.

Act of representing any thing as less serious than it really is. In English law a jury can add a verdict of guilty to a statement that there were extenuating circumstances to account for the crime in question and the judge will usually take this into account when passing sentence.

Extradition

Delivering up, by a government to another, of fugitives from justice. It is usually the subject of treaty and if there is no extradition treaty the fugitive is usually safe. Great Britain has extradition treaties with many countries, but not with some of the republics of S. America. Political offenders are usually excepted from extradition treaties.

Extraterritoriality

Form of international law. It denotes the immunity of certain persons, property or places, from the laws which obtain in the state in which they are. In most countries, foreign sovereigns and titular heads of states even when incognito, are exempt from local jurisdiction. Diplomatic residences are immune, and foreign communities in some non-Christian countries. Public vessels and the crew and passengers, are exempt when the ship is in the water of a friendly power but this does not apply to private vessels. In some foreign countries, as in China for instance, whole communities are regarded as extraterritorial for purposes of civil and criminal jurisdiction being subject to national laws administered by their consuls.

Extreme Unction

Sacrament of anointing for persons apparently dying. General since the 9th century, it is the fifth of the seven Roman Catholic sacraments, supplementing that of penance, and is administered by a priest after the Viaticum or Holy Communion.

Exudation

Discharge of a liquid from a surface usually through pores or from incisions. Many economic plant products are exuded. Some are due to the decomposition of cellulose like the tree gums, others to the action of bacteria like the wattle gums or to incisions in the bark, like caoutchouc and many resins.

Eyam

Village of Derbyshire. It lies 3 m. from Bakewell and 12 m. S.W. of Sheffield. The old church is dedicated to St. Helen, and the churchyard contains an old Runic cross. In Sept., 1665, the plague was carried here by means of an infected parcel from London, and over three quarters of the population perished. Pop. 1120.

Eyck

Hubert Van Flemish painter. He was born in Holland, about 1366. About 1420 he was at Ghent engaged upon the

large altar piece, "The Adoration of the Lamb" in S. Bavon's Church, a work which was completed by his brother, Jan (1385-1440). A fine example of Jan's painting is shown in his "John Arnolfini and his Wife" in the National Gallery, London. Hubert died at Ghent, Sept. 18, 1426.

Eye Borough and market town of Suffolk. It is 94 m from London by the L N E Rly., and 10 from Ipswich, and is situated on the Dove a tributary of the Waveney. Brewing is carried on. Pop. (1931) 1733.

Eye Organ of vision. It comprises an eyeball, about 1 in. in diameter, set on each side of the face, in a hollow orbit, the foremost protruding portion being covered by a transparent cornea, the rest of the envelope forming the opaque sclerotic. Behind the cornea is the aqueous humour and a contractile curtain perforated by the pupil, called the iris, whose colour varies in different persons from light blue to dark brown. These confront a double-convex crystalline lens, behind which a transparent jelly called the vitreous humour is backed by the retina. This receives images from the lens which the optic nerve transmits to the brain.

A number of medical men, called ophthalmic surgeons, specialise in dealing with affections of the eye. In addition there are qualified opticians, who fit persons with glasses. There are several hospitals for eye troubles in London. The largest is the Moorfields Eye Hospital in the City Road.

EYE, BLACK A severe blow on the eye causing discolouration, should first be bathed in cold water. After a few hours, bathing with hot water will help to reduce the discolouration and swelling. If the surrounding flesh is bruised apply vaseline. A severely blackened eye may require medical attention.

EYE, DISCHARGE FROM A doctor should be consulted at once when any discharge is noticed from the eye. In the meantime the eye can be bathed with clean cotton wool dipped in boracic lotion (1 teaspoonful of boracic acid in a tumblerful of boiling water, allowed to cool). Discharge from the eyes is also a symptom of measles.

EYE, INFLAMMATION OF (Conjunctivitis) Bathe with cold freshly-made boracic lotion (1 small teaspoonful of boracic powder to a tumblerful of boiling water, allowed to cool). Prevent the spread of infection to the sound eye by the use of a shade. If severe, consult a doctor.

EYE, SOMETHING IN Grit dust, or an insect may be removed with a clean handkerchief. If it is under the upper lid, lift the lid and pull it down over the lower one. If this does not dislodge it, place a match or a knitting needle on the upper lid and roll the lid back until the object can be seen.

A splinter which has penetrated the eye, or any harmful substance such as acid must have immediate medical attention, but relief may be obtained by bathing with warm water and putting a drop of olive or castor oil in the corner. In the case of quick lime, vinegar should be dropped in before the oil to neutralise the lime.

Eyebright Annual herb (*caprasia officinalis*), of the order Scrophulariaceae. It is a native of north temperate regions and grows throughout Britain in meadows and heathlands. It is parasitic upon grass roots and has egg-shaped or lance-shaped leaves and small flowers which are white or lilac in colour stained with purple the lower lip & mid lobe being yellow.

Eyemouth Burgh and seaport of Berwickshire. It is 8 m. from Berwick and 343 m. from London by the L N E Rly., and is situated on the little River Eyre. Its harbour is used by the North Sea fishing fleet. Pop. 2560.

Eyra Wild cat of S. America (*Felis eyra*). It inhabits the region between S. Brazil and N. Mexico. It is about the size of a small domestic cat, and is reddish yellow in colour, with an elongated, weasel-like body, short legs, and a long tail. It is fierce in its habits and preys on poultry.

Eyre Lake of S. Australia. It covers 4000 sq. m. and although two rivers flow into it, is dry during much of the year. Attention is being paid to the commercial possibilities of its salts, and air surveys have been made.

Eyre Edward John, English explorer. Born Aug. 5, 1815, at Horwasa, Yorkshire, the son of a clergyman, he went out to Australia in 1833. For some years he explored the unknown districts in the centre of the continent, and discovered the lake named after him. In 1846 he was made Governor of New Zealand and, after a term in St. Vincent, was appointed Governor of Jamaica in 1864. In 1865 he put down a rising of the negroes with great severity. This caused an outcry in England, and Eyre was recalled and prosecuted for having hanged a man on imperfect evidence. He was acquitted and later was pensioned and repaid his expenses. He died Nov. 30, 1901.

Eyres-Monsell Sir Bolton Meredith, English politician. Born in 1880, a son of Lieut.-Colonel Bolton Monsell, he entered the navy in 1894. In 1904 he married and took the additional name of Eyres. He left the navy in 1906 and in 1910 was elected M.P. for S. Worcestershire now Evesham division, which he represented until 1935. In 1914 he returned to the navy and was mentioned in despatches. In the Coalition of 1919-22 he held a household appointment, and was Civil Lord and then Financial Secretary to the Admiralty. In 1923-24 and 1924-29 he was Parliamentary Secretary to the Treasury. From 1923 to 1931 he was chief whip of the Conservative Party. He was made a privy councillor in 1923 and awarded the G. B. E. in 1929. In 1931 he became First Lord of the Admiralty in the National Government, a post he retained after the General Election of 1935. In 1935 he was raised to the peerage as Viscount Monsell of Evesham.

Ezekiel Book of Prophetic book of the Old Testament. Ezekiel was a priest of Jerusalem, one of the prominent Jews exiled to Babylon by Nebuchadnezzar, 597 B.C. The book comprises the prophet's ecstatic experiences (i-iii), prophecies of judgment uttered before Jerusalem's fall (iv-xxiv), prophecies against seven foreign nations (xxv-xxxii), discourses of the period following the news of the city's fall (xxxiii-xxxix), and visions of the ideal theocracy (xl-xlviii).

Ezra Book of Historical book of the Old Testament. Ezra was a Jewish scribe living in captive exile in Babylon under Artaxerxes Longimanus. Recording Cyrus's decree for rebuilding the Jerusalem Temple, the book describes the return of the first company of exiles under Zerubbabel and the course of the rebuilding (i-vi), then Ezra's return with a smaller company and the reforms he effected (vii-x). It was finally edited as a continuation of the two Books of the Chronicles.

FABIAN SOCIETY

Fabian political society. It was founded in 1884 to forward Socialism by means of the steady and deliberate methods that are associated with the name of the Roman general, Fabius Maximus, undermining the enemy's strength. Its founders believed in "the inevitability of gradualness". It has exercised an enormous influence on the progress of the Socialist movement, and has always attracted the more intellectual members of the party. Its headquarters are at 11 Dartmouth St., Westminster, London, S.W.

Fabius Maximus

Quintus Roman general. Appointed consul in 233 B.C. he received a triumph for his victory over the Ligurians, and he assisted Carthage to demand reparations after Saguntum, 218 B.C. Hannibal's defeat of the consul Flaminius at Trasimene, 217 B.C., led to a Fabian dictatorship. By delaying tactics, whence his surname Cunctator, he avoided engagements, while his more impetuous colleagues were defeated at Cannae in 216 B.C. Consul for the fifth time, he inflicted losses on Hannibal, and recaptured Tarentum in 209 B.C. He died six years later.

Fabre

Jean Henri Fabre, French naturalist. He was born in poor circumstances Dec. 21, 1823, and was self-educated to a large extent. During his early life when a teacher in a small school, he showed his bias towards science and particularly entomology. Later he became Professor of Philosophy at Ajaccio and at Avignon, and began his researches into insect life. His published works show remarkable powers of observation and literary ability. He died Oct. 11, 1915. The following, which have been translated into English, are among the most important: *Story Book of Science*, *The Life of the Grasshopper*, *The Life of the Fly*, *The Hunting Wasps*, *The Mason Bees*, *The Life of the Spider*.

Face

Front of the head. Extending from the top of the forehead to the chin and from ear to ear it possesses 14 facial bones, 12 of which occur in pairs, the two single bones are the vomer and mandibles and the lower jaw. The temporal muscles operating between temples and mandibles take part in mastication these and the muscles of expression are served by pairs of nerves, former by the fifth, or trigeminal, and the latter by the seventh, or facial nerves.

Factor

Word for an agent. Legally a factor is one who buys and sells for another. There are corn and other factors. Usually, factors, unlike brokers actually handle the articles which they buy and sell. Their relations with their principals are regulated by the Factors' Act of 1889. In Scotland a factor is a man who manages an estate for another.

In engineering work, including the making of aeroplanes, there is a factor of safety, as it is called. This is reached by calculating the maximum strains which the parts may have to bear and allowing for a margin over these. In mathematics a factor is one of the two

or more quantities which, multiplied together, yield a given product, and the word is also used for anything having an influence on a particular result.

Factory

Building where goods are manufactured. The older ones are, for the most part, grimy and unsightly erections but in the newer ones much attention is paid to lighting and ventilation, whilst they are frequently by no means unpleasant from the architectural point of view.

The factory system was introduced into England from Italy about 1700, but its development was due to the invention of machinery, the use of which superseded gradually the system of spinning and weaving by hand in the homes. At first, factories were subject to no law, hence employees, including women and children, had to toil for long hours and low wages under appalling conditions judged by modern standards. In the 19th century, however, factories began to be regulated by law, the first Act in Great Britain being passed in 1802. A number of others were passed in the 19th and 20th centuries. Under these laws, all factories are subject to strict inspection by Home Office officials.

Faculty

Ability to do a certain thing, e.g., to talk or sing. It has also meanings of a special kind in educational and ecclesiastical usage. The studies of a university are grouped into faculties, such as arts, law, science, etc. A kindred use is for the Scottish faculty of advocates. In ecclesiastical law a faculty is a permission to do anything, e.g., to erect or remove a memorial in a church. In these cases the chancellor of the diocese hears the case and decides whether or not to grant a faculty. The Archbishop of Canterbury has a court of faculties presided over by the judge of the Court of Arches. Among other matters within the jurisdiction of the archbishop, this court grants special marriage licences.

Faeroe

Group of islands in the Atlantic Ocean. They are 200 m. to the north of the Shetlands and 250 m. from Iceland and belong to Denmark. There are 21 islands and they cover 540 sq. m. Strömö and Sudö are the largest. Thorshavn on Strömö is the capital. The people are engaged in agriculture and fishing. Sheep and cattle are reared and barley and potatoes are grown. The islands, having been Norwegian, became Danish in 1380. They elect one member to each house of the Danish Parliament and have a council for local affairs. Pop. (1930) 24,200.

Fagan

James Bernard Fagan, Irish dramatist and producer. Born May 10, 1873, a son of Sir John Fagan, the surgeon, he was educated at Clongowes and then at Trinity College, Oxford. He became an actor, but made his reputation in 1899 by his play *The Rebels*. Other successes include *The Prayer of the Squire*, *Under Which King*, *Harthorne*, and *So to Bed*, *The Greater Love*, and *The Improper Duchess*.

Fahrenheit

Gabriel Daniel Fahrenheit, German physicist. Born at Danzig May 14, 1686, he used mercury for thermometers and devised, about 1726, the scale which is in common use in England. He died in Holland, Sept. 16, 1736.

In the Fahrenheit scale the freezing point of water is fixed at 32° and the boiling point at 212°, the intervening space being divided into 180 equal degrees. In the centigrade scale freezing point is 0° and boiling point 100°. Conversion of these scales is effected as follows —

$$^{\circ}\text{C} = 5(^{\circ}\text{F} - 32)/9,$$

$$^{\circ}\text{F} = (^{\circ}\text{C} \times 9/5) + 32$$

Faience Generic term for various kinds of glazed pottery painted with decorative designs. It is derived from Faenza in Italy where pottery with a fine vitreous surface was made in the 15th century. Examples of Italian faience are the Gubbio and Delft. Robbia ware, and of French workmanship Pailissy and Limoges ware, while Wedgwood ware is a modern type.

Failsworth Urban district of Lancashire. It is an outer suburb of Manchester, and is 191 m from London by the LMS Ry. Cotton manufacture is the principal occupation. Pop (1931) 15,724.

Fainting An incipient attack of fainting can usually be prevented by sniffing smelling salts and sitting with the head between the knees for a few moments. Thirty drops of sal volatile in water is a safe and effective restorative. If loss of consciousness actually occurs, carry the patient where he may have fresh air and quiet. Lay him down with the head lower than the feet. If attacks are frequent the sufferer should consult a doctor.

Fair Place where traders offer their wares for sale. In the Middle Ages buying and selling was chiefly done at fairs and amongst the hundreds of fairs held were the important ones in London (Bartholemew Fair), Winchester, Oxford and Stourbridge, near Cambridge. Some fairs have disappeared, but in many places they are still held for the sale of horses and cattle. Fairs were held, too, all over Europe and one of the most famous, the Leipzig Fair, is still held every year.

Some fairs were gradually turned into occasions for pleasure and of these a few remain, such as Gorso Fair Nottingham, one on Blackheath and St Giles Fair at Oxford. Here the attractions include roundabouts, coconut shies, games of all kinds for testing skill or luck and a variety of amusements. Ireland was noted for its fairs and the most notorious, Donnybrook, was suppressed because of the disorder caused by it. Another kind of fair is the one at which farm servants are hired, but these are now almost extinct.

In recent years the fair has been revived as a means of promoting trade. Every year the British Industries Fair is held in two sections, one in London and the other in Birmingham at Castle Bromwich. In 1933 a "World's Fair" was held in Chicago.

Fairbanks Douglas American motion picture actor and producer. He was born in Denver, Colorado, May 23, 1883, and educated at the Colorado School of Mines and Harvard. He acquired stage experience in Shakespearean drama and other plays and once played a small part in London. His first screen appearance was with D. W. Griffith in *The Lamb* and he became so popular that later he had his own producing company. His speciality is athletics and his most famous pictures are *The Mark of Zorro*, *Robin Hood* and *The Thief of Bagdad*. In 1920 he married Mary Pickford. Divorced 1935.

Fairfax Baron Thomas Fairfax, English soldier, born at Denton, Yorkshire, Jan 17, 1612, a son of Ferdinando Fairfax, the 2nd baron. He saw military service in the Netherlands and against the Scots and, with his father, joined the parliamentary forces at the outbreak of the civil war. The elder Fairfax was given the command of the troops in Yorkshire, but he was not very successful. The younger Fairfax, however, an able soldier, was made commander-in-chief in 1644 and was partly responsible for the victory at Naseby and for crushing the royalists in Essex in 1648. He refused to attend as one of the judges appointed to try Charles I, and in 1650 he resigned his commission in the army and received a pension of £5000 a year. Later he aided Monk in placing Charles II on the throne. He was elected M.P. for Yorkshire in 1660 and died Nov 12, 1671.

Fairfield Municipality of New South Wales. It is 14 m west of Sydney, of which it is practically a suburb, and with which it is connected by railway. Pop 7400.

Fairford Village of Gloucestershire. It is on the Coin, 25 m from Oxford, and is the terminus of a branch line of the G.W. Ry from that city. It is famed for its 15th century church, with its stained glass from the Netherlands, telling the story of the creation and the work of Jesus Christ. Near are Fairford Park and Hathorop Castle. There is trout fishing in the river. Pop 1400.

Fair Head Promontory on the coast of Antrim, Ireland. Also called Benmore. It is situated between Ballycastle and Marlongh Bays, stands 636 feet above the sea, and is composed of huge greenstone columns.

Fair Isle Island of Scotland. It is one of the Shetland Islands, and is 16 m S.S.E. of Mainland, and midway between the Shetland and Orkney groups. There are two lighthouses. The inhabitants engage in sheep rearing and fishing, and in making woollen garments, including the celebrated Fair Isle jerseys. Pop 140.

Faith Healing Cure of disease by faith in the Divine Power. The cure is elicited by prayer, without recourse to medical advice or methods. In Christendom the practice is largely based on James v 14. Christian Science seeks to cure by instilling into the patient the belief that pain is an illusion conquerable by faith. The tradition of apostolic cures passed in the 3rd century into trust in the curative power of relics. Medical opinion attributes faith cures at Lourdes and other pilgrim resorts to a psychological action.

Fakenham Market town of Norfolk. It stands on the Wensum, 24 m from King's Lynn, on the L.N.E. and LMS Rlys. Pop 3000.

Fakir Religious devotee. The term is used chiefly in India, where there number 1,000,000. They are partly orthodox ascetic mendicants of the dervish orders, partly irresponsible nomads and also Hindus. Some of the latter pertain to the yogi orders, who claim miraculous powers and practise severe mutilations and austerities. Others are merely degraded and filthy vagabonds.

Falaba Town of Sierra Leone, W. Africa. It is 170 m from Freetown and is a trading centre. Pop 6000.

Falaise Town of N France. It stands on the River Ante, 20 m from Caen, and is chiefly famous as the birthplace of William the Conqueror. The extensive ruins of the castle in which he was born overlook the town. Falaise is an agricultural centre and has important horse and cattle fairs. Tanning is an industry. Pop. 6900.

Falcon Sub family of birds of prey. They have stout, hooked beaks, notched in the upper mandible, and long, sickle shaped claws. Resident British forms include the black-crowned peregrine, 15 in in length, which was formerly trained for hawking (*q.v.*), a popular sport in England at one time, and lays red-spotted, yellowish eggs, the kestrel, 13 in long, which lays similarly tinted but smaller eggs, and the still smaller merlin, laying deep red eggs. The hobby is a summer visitor, the Norway gyrfalcon and Iceland and Greenland falcons are rarer.

The Order of the Falcon is an Icelandic order. It was founded in 1921 after Iceland had separated from Denmark, and appointments to it are made by a committee.

Falernian Wine A sweet still wine made in the Campanian district of Italy from Roman times.

Falkenhayn Erich von German soldier. Born Nov. 11, 1861, he entered the army in 1880 and ten years later joined the general staff. In 1900 he saw service in China and rose to be chief of the staff of the 4th army. In 1913 he was appointed Minister of War and when the World War began he held that position. In Dec., 1914, he succeeded Moltke as chief of the general staff and directed operations until he was superseded in Aug. 1916. He then took command of the army that invaded Rumania and was afterwards in charge of the Turkish Armies. He died April 8, 1922.

Falkirk Burgh and market town of Stirlingshire. It is 22 m from Glasgow, on the L.M.S. and L.N.E. Rlys. The chief industries are coal mines and iron works but there are other manufactures. The town is also important for its cattle fairs. Its port is Grangemouth on the Firth of Forth, 3 m away. The burgh includes Grahamstown, Laurieston and Camelon. Pop. (1931) 36,565.

Two notable battles have been fought at Falkirk. In one on July 22, 1298, Edward I of England defeated the Scots under Sir William Wallace. The day was decided by the English archers. The second battle was fought Jan. 17, 1746. The Highlanders, under Prince Charles Edward, were returning from Derby, when they met a small English force, which was soon routed.

Falkland Burgh of Fifeshire. It is 21 m from Edinburgh, on the L.N.E. Rly. Here is the palace built by James V on the site of the castle in which earlier kings lived. After 1603 it fell into decay, but it was restored by the Marquess of Bute about 1890. Pop. (1931) 791.

Falkland Viscount Scottish title borne by the family of Cary since 1620. The first viscount was Sir Henry Cary, a Devon man, who was Lord Deputy of Ireland under James I. The most famous holder was his son, Lucius, the 2nd viscount, who succeeded in 1633. In 1640 he entered parliament and in 1642 became Secretary of State. He fought for Charles when war began, but his dislike of the strife is shown by the words attributed to him before the Battle of Newbury,

that he would be "out of it ere night." Riding forward he met his death there, Sept. 20, 1643.

Sir J. A. R. Marriot has written *The Life and Times of Lucius Cary, Viscount Falkland*. The title is still in existence and is held by a descendant of the 1st Viscount, but he is only related collaterally to the great Lord Falkland.

Falkland Islands A group of islands in the South Atlantic, 300 m east of the Straits of Magellan, discovered by John Davis in 1592. They were taken by the French in 1764, ceded to Spain in 1767, and finally yielded to Great Britain in 1771.

They now form a British Crown Colony under a governor assisted by executive and legislative councils.

Only two—East and West Falkland—are important, covering, with the neighbouring small islands, 4618 sq. m. South Georgia (about 1000 sq. m.), the S. Shetlands, the S. Orkneys, the Sandwich Islands and Grahams Land are dependencies extending the territory to the South Pole. Stanley, on East Falkland, is the capital and only town and has a good harbour. Sheep farming is carried on and the islands are a centre of the whaling industry. Pop. (1931) 2,392.

BATTLE OF THE FALKLAND ISLANDS

On Dec. 8, 1914, a naval battle was fought near the Falkland Islands, between the British and the Germans. After the destruction of the British Fleet at Coronel in Oct. 1914 two battle cruisers were sent to find the victorious Germans. With some old armoured cruisers they reached Port William in the Falklands and were coaling there when the German squadron was sighted. It consisted of the two armoured cruisers called *Scharnhorst* and *Gneisenau* and three light cruisers. Knowing he was no match for the British battle cruisers, which he had not expected to meet in these waters, the German Admiral, Count von Spee, turned away. The British ships, under Vice Admiral Sir D. Sturdee, put to sea and the fight began. Both the German armoured cruisers were sunk by gunfire after a battle lasting about four hours. The light cruisers, *Leipzig* and *Nürnberg*, were sunk by the British cruisers, but the *Dresden* escaped. The Germans lost 2100 men, the British, 7 killed and 12 wounded.

Fallacy Any mistaken statement used in argument. Specifically it is a piece of false reasoning, or a mistaken belief or opinion, founded on correct reasoning from untrue premises, or on incorrect reasoning from true ones. Systems of logic include the classification of fallacies under a number of headings mainly following those of Aristotle, among the more common being irrelevancy or *ignoratio elenchis*, question begging, or *petitio principii* and an unjustified conclusion, or *non sequitur*.

Fallières Clément Armand French statesman. Born at Agen France, Nov. 6, 1841, he became a lawyer. In 1876 he was elected to the Chamber of Deputies and in 1880 he became a minister. In 1883 he was premier and between 1880 and 1890 held offices almost continuously. In 1890 he entered the Senate and from 1899 to 1906 was its president. In 1906 he was elected president of the republic and was largely responsible for the alliance with Russia and the entente with Great Britain that came to fruition in 1914. His term of office ended in 1913. He died June 22, 1930.

Fallow Term used in agriculture for land ploughed but left unplanted.

to allow the soil to recover from the exhaustion due to previous crops. With the adoption of rotation of crops and scientific fertilising, fallowing became less necessary, because the different requirements of the crops in the rotation ensure that the supplies of the various plant foods in the soil are not exhausted.

The Fallow deer is a small European species, commonly found in English deer parks.

Falmouth Borough, seaport and market town of Cornwall. It is on the G.W. Rly., 12 m. from Truro and 291 from London. The harbour is formed by the River Fal, which enters the sea here. The port has dry docks and can hold all but the largest vessels. It is also a fishing and yachting centre. The old town lies along the river, whilst on the sea front is the newer district called Gyllyn-grass, which has good sands and is a popular resort. In the harbour are the *Cutty Sark* and the two old warships, *Implacable* and *Poudroyant*. Near the town is Pendennis Castle, built by Henry VIII., and around is much beautiful scenery. Pop. (1931) 13,492.

The title of Viscount Falmouth has been borne since 1720 by the old Cornish family of Boscawen. From 1821 to 1852 the viscounts were also earls of Falmouth. The family seat is Tregothnan, near Truro.

False Acacia Tree of the leguminous order *Robinia pseudo-acacia*, also called bastard acacia or locust tree. It is a native of North America and attains a height sometimes of 60 or 80 ft. It is widely cultivated in Britain and Europe, its long sprays of fragrant white or rose-purple flowers closely resembling those of the yellow laburnum. It is usually called *acacia* erroneously, as the true *acacia* is a mimosa.

False Pretences Phrase used in English law. It is an offence to obtain, or attempt to obtain, goods or property on false pretences, which is "a false representation by words, writing or conduct of an existing fact." To convict a person of this offence, it must be shown that he acted with intent to defraud and that he knows that the statement he made was false.

Falsetto Forced or false voice with a range above the natural. It is used chiefly of men's voices, when they cultivate high notes in order to sing alto parts although their ordinary range is that of a baritone or a bass.

Famagusta Seaport town of Cyprus. Situated south of the ruins of Salamis, it was built in 274 B.C. by Ptolemy Augustus and originally named Arsinoe. It is connected by a light railway with Nicosia, the capital. Of its mediaeval glories only the fortifications, the castle and the fine Gothic cathedral now a mosque remain. Two acts of Shal espeare's *Othello* are laid here. Pop. 8,979.

Family Unit of society consisting of father, mother and their offspring. It is used also for a larger unit, brothers, sisters, and their offspring, and we speak of the royal family and the Cavendish family meaning a group of relatives.

Many scholars have enquired into the early history of the family and although they disagree on many points they agree that it goes back to the beginnings of human society. It evolved from a society in which unions were promiscuous and paternal parentage uncertain, and became one of the bases on which our modern civilisation is built.

The family was mainly patriarchal and under the rule of the father, and in many countries it included his children by various wives and concubines. In some societies it was matriarchal, the mother being the recognised head, but this state of affairs has long passed away, except perhaps among one or two primitive peoples. In the western world, protected by the power of the Christian Church, it took the form which it now retains.

Family is used by zoologists and botanists for a group of organisms that in certain vital principles resemble each other. A family in this sense consists of several genera.

Family is also used for a group of languages, e.g. the Aryan or Indo-European family.

FAMILY ENDOWMENT The steady fall in the birth-rate has given prominence to the principle of regulating salaries and wages to some extent by the number of a man's family. For long payments for children have been made to ministers in the Wesleyan Methodist church and the scheme has been introduced into one or two educational establishments. In New South Wales there is a state scheme of this kind. Employers pay a tax on the amount paid by them in wages, and this goes in allowances to those workers who have dependent children. This family endowment principle was introduced in 1927. There is in London a society for introducing something of the kind into Great Britain.

Famine General scarcity of food leading to starvation and frequently death. From earliest times famines have been prevalent and millions have died during their course. They are caused by the failure of the crops, which in its turn may have been due to drought, war, or pestilence. They have been most terrible in the densely populated countries of the east where the population increases very rapidly and any serious decrease in production quickly brings about a famine.

Famines are mentioned in the Bible. During the 1st century whole provinces in India were depopulated. There was a terrible European famine in 1162 and a potato famine in Ireland in 1846-47. The thirty years' War, and, to some extent, the World War, led to famines.

The severity and frequency of famines has been greatly mitigated by the greater productivity of the soil, brought about by irrigation and modern methods of farming, improved means of transport, methods of preserving food and attacks on the diseases that destroy food crops. Famines are practically unknown in the more civilised countries, but there are still, from time to time, terrible famines in parts of India, China and Russia, where the population is much closer to the means of subsistence than it is in Europe and North America.

Fan Implement for agitating the air to obtain a cooling draught on the face or person. Employed in hot countries from remote antiquity, fans composed of palm leaves or feathers mounted on long handles were royal attributes in West Asia and India. Their use in Imperial Rome survives in papal processions.

Folding fans, made of paper on bamboo framework, originated in Japan, and this form has become generally popular in Western Europe, especially in Spain. At one time painting on fans was a very popular art. In the East a form of fan known as a *punkah* is employed. It is composed of an oblong sheet hung from the ceiling and oscillated by man or other power.

FAN

Fan A machine consisting of a number of blades set round an axle at an angle to their plane, capable of being rotated, on the axle, at a high rate of speed, enclosed in a case and used for moving air out of or into closed spaces. It finds practical application in cooling and ventilating, drying the transport of light materials, such as cotton, lint, grain, etc., and for providing a supply of air under pressure. The common electric fan is of this type, but is not enclosed, as its object is to create a current of air in a room.

FAN VAULT The idea of the open fan was copied in Gothic architecture at a late period in its development. The stone ribs used in vaulting are carved to open out like a fan. There is a beautiful example of this fan tracery in Henry VII's chapel, Westminster Abbey.

Fang Term applied to the poison teeth of certain snakes, particularly the viper and rattlesnake. The poison fangs are usually larger than the ordinary teeth and are grooved or traversed by a duct from the poison gland. When a snake strikes its prey, the venom is pressed out of the gland, into the duct by muscular contraction and thence conducted into the wound made by the fang.

Fannich District and loch of Scotland. The district is in the County of Ross and Cromarty and consists of a group of mountains and a deer forest. Near these is Loch Fannich, a lake about 6½ m long. A short stream, called Fannich Water, carries off its waters.

Fanning Island of the Pacific Ocean. Of coral formation, it covers 15 sq m and is a British possession, being attached to the Gilbert and Ellice Islands Colony. It is a station for the cable between Canada and Australia. It owes its name to an American soldier, Edmund Fanning (1737-1818) who discovered it in 1798.

Fantasia Musical composition free from formal restrictions and often descriptive. Originally a fantasia was a composition for instruments variously combined, but without voices. As composed by Byrd and his contemporaries the fantasia was the immediate precursor of the sonata. Bach, Mozart and Beethoven carried on the tradition.

Fao Village of Iraq. It stands on the Shatt el Arab, about 3 m from the Persian Gulf. It was seized by the British in Nov., 1914 and, when fortified, was used as a base for the operations in Mesopotamia.

Farad Electrical unit of capacity. It represents that capacity which the coulomb of electricity will charge to the pressure of one volt. As the farad is too large for practical purposes, the micro farad, equal to one millionth of a farad, is generally used.

Faraday Michael English chemist and physicist. He was born in London, Sept. 22, 1791 of humble parents. He was apprenticed to a bookbinder, but found time to study science and in 1813 became assistant to Sir Humphry Davy. In 1827 he succeeded Davy as Professor of Chemistry at the Royal Institution and became one of the greatest scientists of his time. His lectures at the Royal Institution were very popular and he wrote a great deal. He belonged to the Glossites and was a devout Christian. He died Aug. 25, 1867. Faraday's researches in electrolysis laid the foundations of electro-chemistry, and were

followed by many important discoveries in electro dynamics (including the laws which are the basis of modern electrical power), and in various departments of pure and applied chemistry, particularly in the liquefaction of gases, the manufacture of glass, the metallic alloys and the vaporisation of mercury.

The Faraday Society was founded in his honour in 1903, and in 1931 the centenary of some of his greatest discoveries was celebrated.

Farcy Ulcerative disease affecting horses. It is of the same nature as glanders. It is notifiable in England and Wales. It is of a contagious nature and can be contracted by human beings as well as other animals.

Fareham Seaport, urban district and market town of Hampshire. It stands on an opening of Portsmouth Harbour, 8 m from Portsmouth, and is a junction on the S. Rly. There is a shipping trade and the industries include brewing. In the Middle Ages and later Fareham was a flourishing port, but, as only small ships could approach it, its trade declined. Pop. (1931) 11,575.

Farewell Cape of Greenland the country's most southerly point. Situated on an island, it is perilous to sailors on account of currents and drift ice.

Farina Term applied to a number of starchy substances, such as potato starch in this country, maize starch in the U.S.A. and cassava starch in S. America. Starch is the commonest storage material of the ordinary plant hence many seeds, stems and roots are farinaceous.

Farlington Market town of Berkshire, sometimes called Great Farlington. It is 17 m from Oxford, on the G.W. Rly. Farlington is an agricultural and hunting centre. Pop. 3079.

The title of Baron Farlington has been held since 1916 by the family of Henderson. Alexander Henderson, the 1st baron, was born in London, Sept. 28, 1850, and became a stock broker. For a time he was chairman of the G.C. Rly. From 1898-1906 and again 1913-16, he was a Unionist M.P. In 1902 he was made a baronet and in 1916 a baron. His seat is Punscoe Park, near Farlington.

Farm Piece of land with house and the necessary buildings used for agricultural purposes. It is usually owned by one person and rented and worked by another, the farmer, and this is the original meaning of the word, but to day many men own the farms which they work.

There are several classes of farms as much depends upon the soil. A large expanse of poor land will serve as a sheep farm but a dairy farm requires much better soil. Other farms may be chiefly devoted to the cultivation of wheat, oats, and potatoes whilst other farms may embrace all these. In England and Wales, in 1928 there were 490,895 farms and in Scotland 75,866. In Ireland, where they are much smaller in size, there were 572,574. (See DRY FARMING.)

A settlement where men are put to work on the land is called a farm colony. These were started by the Salvation Army and after the Great War several were founded for ex-servicemen.

FARMING AS A CAREER See AGRICULTURE.

Farman Name of a type of aeroplane built by the brothers Henry and Maurice Farman. They were the sons of an English journalist. Henry, born in

France in 1874, became a champion racing cyclist and later a racing motorist. Then he started work for the manufacture of cars and bicycles. Turning to aeronautics, he designed and built an aeroplane which made its first trial in 1907. A year later he started a school for aviation near Versailles. His brother, Maurice, opened an aeroplane factory, and in 1912 they combined to erect works at Billancourt. During the Great War they supplied aeroplanes to the French and other armies.

Farmer John English musician. He was born Aug. 6, 1836, at Nottingham, studied music abroad and became Music Master at Harrow in 1864. In 1885 he was appointed organist at Balliol College, Oxford. He died July 17, 1901.

Farmer composed the music for many school songs, his most famous being *Forty Years On*, and he also edited music for public school use.

Farnborough Urban district of Hampshire. It is 33 m from London, on the S. Ry. On Farnborough Common is the aircraft factory of the Royal Air Force. The Empress Eugénie lived on Farnborough Hill, where she built a Roman Catholic Church, containing a mausoleum in which lie the remains of herself, her husband, Napoleon III., and her son. The Benedictines have an abbey here. The town has a military camp, being in the Aldershot area. Pop. (1931) 16,359.

Another Farnborough is a village in Kent. It is 4 m from Bromley and is a centre for motor bus services.

Farnborough Baron English historian. Thomas Erskine May was born Feb. 8, 1815, and educated at Bedford. In 1831 he secured a position in the library of the House of Commons and in 1835 became a barrister. He passed his life in the service of parliament, and, having been clerk assistant since 1856, he was chosen clerk of the House of Commons in 1871, a position he held until just before his death, May 17, 1886. In 1886 he was made a peer, but the title became extinct. Erskine May, by writing a book on the *Privileges, Proceedings and Usages of Parliament*, made himself the chief authority on this subject. Almost equally valuable is the *Constitutional History of England*, 1760-1860.

Farne Group of islands off the coast of Northumberland. The largest, Inner Farne, is about 1½ m from the mainland, the other 20 or so being more to seaward. They are mainly uninhabited islets. On Longstone, associated with Grace Darling, is a lighthouse.

Farnese Famous Italian family. In 1493 Pope Alexander VI created Alexander Farnese a cardinal. He belonged to a family who were lords of Farneto in Tuscany and his sister was the mistress of the pope. In 1534 Alexander became pope as Paul III. He had a family and to one of his sons he gave the Duchy of Parma, which remained in the possession of his descendants until the family became extinct in 1731. One duke of Parma, Alexander, was the Spanish soldier who led the army that was intended to invade England in 1588. Elizabeth Farnese became the wife of Philip V., King of Spain.

Paul III was responsible for the Farnese Palace, one of the finest buildings in Rome. It was completed by Michelangelo and is in the Renaissance style. In 1874 it was bought by France to serve as an embassy. The Farnese Bull, one of its treasures, is now in Naples.

Farnham Market town and urban district of Surrey. It stands on the Wey, 38 m from London, on the S. Ry. The industries include brewing, and hops are grown in the neighbourhood. Near the town are Waverley Abbey and Moor Park. Pop. (1931) 18,294.

Farnham Castle was long the residence of the Bishops of Winchester. A fine building, mainly of the 17th century, it stands on a noble park, part of which now belongs to the town. The castle is used for church purposes, as the bishop ceased to live there in 1926.

Farnol John Jeffery English author. He was born Feb. 10, 1878, and educated privately. In 1902 he went to America, where he contributed stories to magazines and for two years painted scenery for the Astor Theatre in New York. His first novel, *Lady Caprice*, published in America, appeared afterwards in England as *The Chronicles of the Inn*. Returning to England in 1910, the publication of *The Broad Highway* made him immediately popular with the readers of romantic adventure. This was followed by others, notably, *The Amateur Gentleman*, *The Honourable Mr Tawnish*, which was dramatised, *Bellane the Smith*, *Black Bartlemy's Treasure*, *Martin Conisby's Fennance*, *Percegrine's Progress*, *Sir John Dering*, *Another Day Over the Hills* and *The Jade of Destiny*. He also published a volume, *War Impressions*, in 1918.

Farnworth Market town and urban district of Lancashire. It is 3 m from Bolton on the L.M.S. Ry. The main industries are cotton spinning, engineering and coal mining. Pop. (1931) 28,711.

Faro Card game. Reputedly of Italian origin, it was in vogue under Louis XIV in France when it reached the American Colonies. A picture of Pharaoh formerly appearing on one of the cards occasioned its name. It nowadays requires expensive apparatus, comprising a layout and a faro-box, with spring-releasing the cards in pairs, giving 25 turns, the top card, *soda*, and the lowest, *in hoc*, not counting. Bets are made that any specific card will win or lose.

Farrar Frederic William English divine and author. Born in Bombay, Aug. 7, 1831, he was educated at King William's College, Isle of Man, King's College, London, and Trinity College, Cambridge. He became a schoolmaster and was ordained, serving at Marlborough and for 15 years at Harrow. In 1871 he was chosen head of Marlborough and from 1876 to 1895 he was canon of Westminster and rector of St Margaret's. He was dean of Canterbury from 1895 until his death, March 22, 1903.

Farrar wrote a great deal and his religious views, liberal for his day, had a considerable influence. His *Life of Christ* (1874) was immensely popular and his *Life of St Paul* had a great sale. His books for boys especially *Lillie*, or *Little by Little*, were also great popular successes, although their sentiment makes no appeal to a later generation.

Farren Elizabeth. English actress. Born about 1759, the daughter of a surgeon at Cork who took to the stage and left his family in poverty, Elizabeth made her first stage appearance in 1775. Four years later she played in London at the Haymarket theatre, appearing as Miss Harcastle in *She Swoops to Conquer*. From 1788 until her retirement in 1797, she played at Drury Lane, where

was a great success as the impersonator of fine ladies in the works of Sheridan and greye. She married the 12th Earl of Derby 1797 and she died April 23, 1839.

Carrier Man whose business it is to shoe horses. It was also used for man who attends to their ailments, but now known as a veterinary surgeon. The 'Carriers' Company is one of the London livery companies. Its offices are at 140 Leadenhall, London, E.C. 4, and it takes a special interest in veterinary matters.

Farthing Smallest British coin. Equal to one fourth of a penny. It was legal tender up to four at a time. It was coined in silver from the time of Edward I, that of Mary I, and in copper under James and later. Under Charles II tin farthings met with a circle of copper were struck. Copper half farthings were circulated between 1812 and 1860 and in 1860 they became bronze, of a weight.

Farthingale Hooped potticoat or hooped framework of whalebone worn beneath the potticoat to extend it. Of Spanish origin, the fashion appeared in England during the reign of Queen Elizabeth. It developed gradually into a circular contraption of immense proportions, with a flat surface radiating from the waist. The outline of a later period was a modified form.

Fascism Political and social movement in Italy. It began about 1919 amongst those who were dissatisfied with the conduct of affairs at a time when the country was suffering from the effects of the Great War. They called themselves fascists from the Latin word *fascis*, bundles. Mainly composed of men who had served in the War they organised themselves on military lines and the movement grew rapidly. Fascism was at first republican and socialist in its aims and its members wore the black shirt as their distinctive garb. Benito Mussolini soon stood out as the guiding spirit of the movement.

In 1920 Fascist candidates stood for the Chamber of Deputies and local councils. Some were elected, but the activities of the organisation were more articulate in other directions. Abandoning gradually their earlier creed, they stood out as the opponents of communism, then strong in Italy, and in several towns there were riots. In 1921, 38 Fascists were elected to the Chamber and at a congress a national programme was adopted.

In Oct. 1922, there took place the march on Rome, a great event in the history of Fascism. The city was entered by 200,000 armed fascists; the government was overthrown and a new one under Mussolini set up. Otherwise civil war would have broken out. Since then Fascism has been supreme in Italy and Mussolini far more a dictator than a premier.

Fascism has consolidated its power by altering its constitution more than once. In 1921 and again in 1928, by changing the electoral law, Mussolini secured a majority in the Chamber and this he has since retained. Only those are eligible for election to the Chamber who are on a roll prepared by the Grand Council of the Fascists, and there is a similar grip upon the minor governing bodies. In much the same way industry is controlled by Fascist organisation. Although antagonistic to all ideas of constitutional government, Fascism has undoubtedly done a great deal to make Italy prosperous.

There is a society of British Fascists at

99 Buckingham Palace Road, London, S.W. 1 and the movement has adherents in other countries.

Fashoda Town of the Anglo-Egyptian Sudan, formerly known as Fashoda Kodok. It stands on the White Nile, 468 m. to the south of Khartoum and is a caravan trading and official centre. In Sept., 1898 it was occupied by a small French force under Marchand, although within the British sphere of influence. Marchand was asked to withdraw, but refused and the position was for a short time serious. However, in Nov. the French Government ordered him to abandon the post and signed an agreement, March 21, 1899, which provided a definite boundary line between the British and French spheres.

Fast Ruined castle of Berwickshire. It is situated on a promontory of the cliffs near St. Abb's head, and was once a fortress, accessible only by a drawbridge over a chasm which separated it from the mainland. Garrisoned by English troops in 1410, it was retaken by one of the Dunbars. At the time of the Gowrie conspiracy it was intended to imprison James VI of Scotland in the fortress which was at that time in the possession of Logan of Restalrig, one of the conspirators. In Scott's *Bride of Lammermoor* it figures as Wolf's Crag, the residence of the Master of Ravenswood.

Fasting Abstention from food. It may be either total or partial. The Moslem law imposed an annual fast on the day of atonement and the Jews still observe this and other days as fasts. The Anglican Church prescribes days of fasting or abstinence during the 40 days of Lent, Ember days, Rogation days, all Fridays except Christmas day, and the vigils of various festivals, leaving to the individual conscience the manner of observing them. The Roman Catholic Church makes fasting compulsory. Its most usual form is to eat no meat on Fridays, but in religious houses, especially during Lent, it takes more severe forms. Roman Catholics and high churchmen in the Anglican Church believe that the Holy Communion must only be taken fasting.

Fastnet Rocky islet off the coast of Co. Cork, Irish Free State, the site of a lighthouse.

Fat Oily substance of animal or plant origin which is solid or semi-solid at ordinary temperatures, becoming an oily liquid with increase of temperature. In animals fat acts as a reserve from which the body can maintain heat. In plants it is stored in many seeds and fruit. Most fats are valuable either as food or for industrial purposes.

Fatalism Doctrine that all things are preordained by an inexorable necessity. First taught by Epicurus and the Stoics in Greece, it appears in Christian theology in association with views concerning predestination and election. Mohammedanism calls for man's calm acceptance of the decrees of Kismet, an absolute power transcending all physical law.

Fata Morgana Kind of mirage seen across calm water in the Messina Strait which separates Sicily and Italy. Inverted images as of ships appear in the sky above actual objects. Norman settlers associated it with the mediaeval fairy Morgana, who, according to mediaeval romances, was King Arthur's sister.

Fates In classical mythology, three goddesses who presided over human

destiny. The Greeks know them as the Moirai, daughters of Zeus and Themis, or of Erebus and Night, the Roman name was Parcae. Clotho the youngest, held the distaff and spun the thread of life, Lachesis determined its quality and length, Atropos, with the shears, severed it at the inevitable moment. Even Zeus was unwilling to interfere with their fateful decrees.

Father A male parent. In English law a father is responsible for the maintenance of his offspring until they can maintain themselves. By analogy the word is used for God, especially as the first person of the Trinity and Christianity teaches the doctrine of the fatherhood of God, that He is the lover and protector of His children, to whom He has revealed Himself in Jesus Christ.

Father is used for priests and members of monastic orders in the Roman Catholic and to some extent in the Anglican Church. It is also used for the senators of Rome, for any venerable person, and for the first or oldest person in a community, as the father of the chapel in the printing industry and the father of the House of Commons.

The Fathers of the Church are the writers who lived in the early ages of Christianity, and whose writings are regarded as only of less importance than those in the Bible. They include S. Jerome and S. Ambrose.

Fathom Linear measure used only for nautical purposes, especially sounding. Originally the distance a man could stretch with his arms spread, it is now 6 ft.

Fatigue Condition resulting from prolonged muscular or mental activity. As this condition affects the nervous system, fatigue is characterised by inability to work, pay attention or think, and by a falling memory. The study of industrial fatigue, which results in diminished capacity for work due to excessive labour, monotony and other factors, has become one of great importance. A good deal of research work has been done on this subject by the Home Office and the Institute of Industrial Psychology.

Fatigue in metal, responsible in many instances for fracture of parts of machines, is the result of local deformation of the metal when subjected to prolonged vibratory stress.

The word is also used for military duties, especially those connected with routine work of a camp or barracks.

Fatima Daughter of Mahomet. The child of his first wife Kadijah, she was born about 606 and was called by the prophet one of the world's four perfect women. She married Ali, and bore three sons: Ali-Hasan, Ali Husain and Ali-Ruhain. From the first two sons the Fatimite caliphs were descended. She died in 632.

Fatimites (or Fatimides) Arabian dynasty, claiming direct descent from Fatima, daughter of the prophet Mahomet and her husband. The dynasty, founded by Ubaidallah in 909, ruled in Egypt for nearly 200 years. At first their claim was unquestioned, but as they became more powerful, the Caliphs of Bagdad were at great pains to discredit it. The last caliph of the dynasty died in 1171.

Fault Geological term for the fracture of strata due to earth movements. Resulting in the formation of fissures, faults may be small or may extend to a considerable depth and for a great distance. The plane of fracture is termed the fault plane, and the side

upon which the beds are depressed, the downthrow side. In a normal fault the beds are displaced downwards, in a reversed fault they are shifted upwards.

Faun In Roman mythology, a rural deity, patron of flocks, herds and agriculture. He is sometimes identified with Pan, whose attributes he shares. Ancient fanev peopled the woods with fauns or demi-gods resembling men except that they were goat-footed and tailed and had sprouting horns.

Fauna Term used collectively for all the animal life of a given geographical region or geological period. In a similar way flora designates the plant life. The preservation of the fauna of an area is now beginning to interest responsible authorities such as the Society for the Preservation of the Fauna of the British Empire.

Faure François Félix, French statesman. Born in Paris, Jan. 30, 1841, he became a merchant and shipowner at Havre. As a volunteer officer he fought throughout the Franco-Prussian War. In 1881 he became a member of the National Assembly, and in 1882 Under-Secretary for the Colonies. On the resignation of Casimir Périer in 1895, Faure was elected President. The chief events during his administration were the Franco-Russian Alliance, the Fashoda affair, and, in 1898, the re-trial of Dreyfus. He died Feb. 16, 1899.

Faust Historical figure in 16th century Germany, famous in legend and poetry. Dr. Johann Faust, a profligate necromancer and charlatan, passed into legends which attributed to him a pact with the devil. A collection of tales about him issued in 1587 became widely known. Marlowe's tragedy of Dr. Faustus was published in 1604. Goethe developed the theme of man's eternal struggle with temptation in his great drama called *Faust*, which was begun in 1773 and completed in 1832. Gounod's opera on the subject appeared in 1859, and on Goethe's version W. G. Wills based the tragedy produced by Sir H. Irving in 1885.

Faustina Name of two Roman empresses. Both were charged by contemporary historians with gross profligacy. The elder (c. 104-141) married Antoninus Pius, a temple in Rome to her memory, and a colossal bust in the Vatican, still remain. Her daughter, like her mother named Anna Galeria, married Marcus Aurelius. Both emperors founded institutions, called Faustianae, for educating orphan girls, in memory of their lives.

Faversham Borough, river port and market town of Kent. It is 9 m. from Canterbury and 52 from London, on the S. Ry. Faversham Creek is an opening of the Swale and on it there is a little shipping. There is also an agricultural trade and brewing is carried on. Here are oyster beds. A very old place, Faversham had an abbey and in the 12th century or later was one of the Cinque Ports. Pop. (1931) 10,091.

Favre Jules Claude Gabriel, French statesman. Born at Lyons, Mar. 21, 1809, he studied law in Paris and became a keen republican. After the Revolution of 1848 he was elected deputy for Lyons, and bitterly and violently opposed the election of Louis Napoleon to the presidency. From 1863-70 he led the republican opposition. In 1870 Favre was Foreign Minister and Vice-President. After his mismanagement of the armistice, June 28, 1871, and later of the

Treaty of Frankfurt, Favre resigned. Elected to the senate in 1878, he died Jan 20, 1880

Fawcett Henry British politician and economist Born at Salisbury, Aug 25, 1833, he was educated at London and Cambridge and in 1858 was totally deprived of his sight through a shooting accident. Nevertheless he became Professor of Political Economy at Cambridge in 1863, he was elected Liberal M.P. for Brighton in 1865, and in 1875 for Hackney. In 1880 he became Postmaster General under Gladstone. He died Nov 6, 1884. His wife, Millicent Garrett Fawcett, was a leading advocate of women's suffrage and a writer on political and educational subjects. She died Aug 5, 1929.

Fawkes Guy English conspirator Born at York, April 16, 1570, he enlisted as a soldier of fortune in the Spanish army in Flanders, returning to England in 1604 at the suggestion of Thomas Winter, one of the conspirators in the Gunpowder Plot. To Fawkes was left the actual execution of the plot, and he was arrested at his post, Nov 4, 1605, when the plot was discovered. This was the day before the one fixed for the meeting of Parliament. He confessed under severe torture, and with other conspirators was hanged, Jan 31, 1606. See GUNPOWDER PLOT

Fayolle Marie Émile French soldier Born at Le Puy, May 14, 1852, he entered the French army as lieutenant of artillery in 1875. In Aug 1914, he commanded the 70th division of infantry, and from 1915-19 his commands included the 33rd army corps, the French 8th and 1st armies on the Somme, and the army of the centre on the Aisne. He was commander of the French forces in Italy in 1917. In 1919 he commanded the French army of occupation in Germany, and in 1920 he was French military representative at the League of Nations. He became a marshal of France in 1921, and died Aug 27, 1928.

Feather Outgrowth from the skin constituting the protective covering of birds. A tubular quill fixed in the skin develops into a squarish, tapering, pith-filled shaft, supporting a vane of lath-shaped barbs which, except in flightless birds, are interlocked. Shaftless down feathers with discontinuous barbs, forming in many birds thick undercoats, are acquired in the egg or shortly after hatching.

Featherstone Urban district of Yorkshire (W.R.) It is a coal-mining town 176 m from London and 2 from Pontefract on the L.N.E. Ry. Pop (1931) 14,952.

Featherweight Term used in sport. In racing, a featherweight is the least weight that may be carried by a horse when running. In boxing, featherweights form a class between the light weights and the bantam weights. In Great Britain the rules are that a featherweight must be below 126 lb in weight.

Febrifuge Old term for a substance which allays fever. It is also applied to such external remedial agents as cold baths and wet packs, the more modern term being antipyretic. Quinine is the most popular of febrifuges, but many others have been introduced such as phenacetin, antipyrin, salicylate of soda, etc.

Fécamp Town and seaport of Normandy. It stands where the river of the same name falls into the English Channel, and is 28 m from Havre. There is a harbour and

the industries are chiefly shipping and fishing. Benedictine is made here. In the Middle Ages Fécamp had a nunnery which later became a famous Benedictine abbey. Pop 17,200.

Federalism System of government in which states are united for certain purposes, but for others are independent, each managing its own affairs. The United States, Germany, Brazil and Switzerland are federal states, as, in the British Empire, are Canada and Australia.

The division of power between the federal government and the separate states is laid down in the constitution and varies between one and another. Some matters, foreign relations, defence and tariffs for instance, are almost always given to the federal government, education is usually left to the states. In some constitutions, the states retain all rights not expressly handed over to the federal government. In others the states have only the powers specified as belonging to them.

The government of a federal state is usually by a legislature of two houses and a cabinet of ministers. One house represents the people and the other, the upper house, represents the states. In the United States, each state sends two members to the Senate, in other countries the number depends on the population. In addition each state has its own legislature. The federal government often sets aside for its own capital a piece of land which is outside all the states. Washington and Canberra are examples of this federal territory. The Federated Malay States are a group of states in the British Empire united in a kind of federation. See MALAY STATES.

Federal Reserve System

Banking system of the U.S.A. designed as a means of bank control, it was instituted in 1914 when it was considered necessary to take control out of the hands of the Government. There is a board of seven directors, and under them a chain of twelve local banks. All national banks must subscribe for and between them hold, all the stock. These banks, which have wide powers of authority, issue currency and paper money at their discretion.

Feilding Robert English rake, known as Beau Feilding. Born about 1651, he squandered a fortune and became notorious for his amours at the court of Charles II. He commanded a regiment for James II, and at the Revolution followed him to Ireland, being a member of the Irish Parliament in 1689. Seven years later he was permitted to return to England. Swift and Steele satirised him, and his portrait was painted by Lely. He died May 12, 1712.

Feisal King of Iraq. Born in Arabia in 1885, he was a son of Hussein, who became King of the Hejaz but was a vassal of the Sultan. He was educated in Constantinople and was one of the group that deprived Abdul Hamid II of his throne in 1909. Returning to Arabia, he was occupied in fighting and in 1916 he was in arms against the Turks. In 1918 he helped the British in Palestine and Syria, and he attended the Peace Conference in Paris in 1919. In March, 1920, he was proclaimed King of Syria, but abdicated in July. In August, 1921, he was elected and proclaimed King of Iraq. He died in 1933.

Felix Name of five popes. Felix I was Pope, A.D. 269-274, and Felix II from 356-58. Felix III reigned from 483-92 and Felix IV from 526-30. Felix V was Duke

of Savoy from 1416 to 1434, and in 1439 although still a layman, was chosen Pope in opposition to Eugenius IV. He was never recognised in Rome and was the last of the anti-Popes. He died Jan 7, 1451.

Felix was also the name of a monk who came to England in the 7th century and was made Bishop of Dunwich. Felixstowe is named after him. The word means happy or fortunate.

Felix Roman official in Judaea. He is known only because S. Paul preached before him at Jerusalem (Acts xxiii-xxiv). He was then procurator of Judaea under the Emperor Claudius. In A.D. 62 he was recalled to Rome because he was accused of having oppressed the Jews.

Felixstowe Watering place and urban district of Suffolk. It is on the estuary of the Orwell, 16 m. from Ipswich and 84 from London, on the L.N.E. Rly. Steamers also go along the river to Ipswich.

There is a fine promenade and the sands and bathing are good. A station is established for flying boats. Pop. (1931) 12,077.

Fellah Egyptian word for a peasant, or labourer on the land. About 62 per cent of the native population belong to this class. They are chiefly Mohammedans and live in villages under chiefs. The word is also used for similar classes in Palestine and Syria. The plural is fellahin or fellahen.

Felling Urban district of Durham. It is a mile from Gateshead, on the L.N.E. Rly. The chief industries are coal mining and engineering, largely shipbuilding. Pop. (1931) 27,041.

Fellmonger Dealer in fells, or skins. Fellmongering includes the process of removing the wool from sheep skins, which is done by various means, including "sweating," soaking in a solution of lime, and by chemical treatment of the hides.

Fellow Word for a male person. It meant originally a companion or equal. In a special sense it is used for a member of the governing body of a college at Oxford and Cambridge. Such consists of a head, fellows and scholars. The fellows are elected, sometimes after examination, and usually from the most brilliant members of the university. Members of the governing bodies of certain schools, e.g., Eton and Winchester, are called fellows, and colleges at London, Durham and elsewhere have fellows. The members of learned societies are called fellows, examples being F.R.S., Fellow of the Royal Society, and F.B.A., Fellow of the British Academy.

Felo de Se One who commits murder upon himself, a suicide. The act may be unintentional, as when, in attempting maliciously to kill another, a man runs upon his antagonist's weapon or is killed by the discharge of his own. A *felo de se* was formerly buried on the highway with a stake through his body. In 1823 this was replaced by night burial in the usual burial place without Christian rites. In 1862 night burial was abolished and a religious service permitted.

Felony Class of crime in English law. All crimes are either felonies or misdemeanours, the more serious ones falling into the former category. Felony includes such crimes as murder, manslaughter and burglary. Until 1870 the goods of a felon, i.e. one convicted of felony, were forfeited to the Crown.

Felsite Hard, close grained rock representing an ancient devitrified lava.

It contains scattered porphyritic crystals of quartz and felspar.

Felspar Group of minerals met with in most eruptive rocks. They consist of silicates of aluminium with varying proportions of lime, soda or potash, hence the names of potash felspar, soda felspar, etc. They vary in colour and form but have approximately the same hardness and specific gravity and similar crystalline shape.

Felsted Village of Essex, also called Felstead. It is 3 m. from Great Dunmow and 42 from London, on the L.N.E. Rly. Here is Felsted School, founded by Lord Rich in 1564. Now a large public school, it has modern buildings holding about 300 boys, and extensive grounds. Pop. 2100.

Felt Fabric made by beating or pressing together the moist fibres of wool and certain kinds of hair. Wool owes its property of felting to the interlocking of the scales on the fibre when subjected to rubbing or beating. Usually waste wool and mixtures of various fibres are used for this purpose. Felt is employed for making carpets, hats, gun wads and pianoforte hammers. Cow hair is used in making roofing felt. The Feltmakers' Company is one of the London livery companies.

Feltham Urban district of Middlesex. It is 15 m. from London, on the S. Rly. There are many market gardens in this neighbourhood, and here the London County Council has an industrial school. Pop. (1931) 16,316.

Felucca Name given to a small vessel used in the Mediterranean. It has one or two masts, a lateen sail, and often a rudder at each end.

Feminism (Lat. *femina*, a woman). Term used for the movement that aims at putting woman on an equality, politically, legally and economically, with men. It began in the 19th century, and soon after the Great War its advocates had achieved most of their aims. In Great Britain women were given educational advantages, hitherto confined to men, they secured the vote and with it equal rights of citizenship. The learned professions were opened to them, save only the ministry of the Church of England and some other churches. A woman can sit in Parliament and in the Cabinet, and can hold most public offices. In other countries the amount of freedom given to women varies, but in practically all feminism has made enormous strides since about 1900.

The aims of the feminists to-day are to break down the few remaining barriers to their entrance into public life and to secure economic equality with men not only in the civil service, but throughout professional and industrial life. To secure this involves the abandonment of a principle, hitherto regarded as fundamental, that the wages of a man are not individual, but family wages.

Fen Flat, low-lying land, at times wholly covered with water. Certain marshy districts in Lincolnshire and other L. counties are known as the Fen District.

Fencible Word used in the 18th century for a regiment raised for home defence only. They consisted of both horse and foot soldiers, and were disbanded when the need for their services was over.

Fencing Pastime for which the two combatants use a light weapon called a foil, sabre or épée. In the 15th and 16th centuries a knowledge of swordsmanship was

Fiacre Saint of Irish descent. He founded a monastery and guest house at Breuil, near Paris, dying there about 670. His remains were transferred to Meaux cathedral, he is commemorated on Aug. 30.

French hackney coaches, established in Paris in 1640, were named *fiacres* because their first stand was at the Hôtel de S. Fiacre, Paris.

Fiat Legal term meaning "it must be done," issued by judges and other high officials of the law courts in certain circumstances, and differing from an order proper in not being drawn up in formal style. For instance, legal action can only be taken in certain cases after the attorney-general has given his consent, or issued his fiat.

Fibre Thread like filament of mineral plant or animal derivation. Plant fibres are of diverse origin and composition: the hairs of cotton and the fibres of flax and ramie represent nearly pure cellulose in jute, esparto and sisal, lignin is present, and in raffia and hemp, cutin is a constituent. Plant fibres may take the form of hairs, bast fibres, wood fibres, the cuticle of leaves or the whole stem itself. The hair or fur of animals supplies wool, mohair and other textile fibres; the silkworm provides silk, and the mineral asbestos forms an incombustible fibre.

Fibula Brooch or hucklo, especially one dating from the early metal ages. Neolithic bone pins were later reproduced in bronze by looping one end and bending the other until the point reached the loop; safety pins arose. The Hallstatt period developed held decorative forms, succeeded by a series of La Tène designs which are invaluable for dating antiquities of the iron age.

The slender bone on the outside of the leg is called the fibula. It is bound by ligaments to the tibia or inner bone. Its lower end forming a bony knob outside the ankle.

Fichte Johann Gottlieb, German philosopher. Born May 19, 1762, he was educated at Jena, Leipzig and Wittenberg, and later taught and wrote for a living. He came under the influence of Kant and submitted to him *A Critique of Revelation* which was highly approved by the great philosopher. In 1794 he became Professor of Philosophy at Jena and there wrote many philosophical books. He had to resign in 1799 and retired to Berlin. He died Jan. 27, 1814.

Fiction Word used for imaginative prose literature. The fiction of to-day takes the form of novels but the romances of an earlier day are equally fiction.

A legal fiction is defined by Blackstone as an idea put forward to prevent a mischief or remedy an inconvenience that might result from the general rule of law. Legal fictions were invented by the lawyer to overcome difficulties in the way of obtaining justice. "The king never dies" is an example.

Fief Name given to a landed estate in feudal times. It was land which was held on condition that the holder rendered certain services usually in time of war, to his overlord. The word fee comes from it, as does the Scottish fee.

Fieldfare Large species of thrush (*Turdus pilaris*). Breeding in northern Europe in pine and birch forests, multitudes spend autumn and winter in Britain, where they nest in colonies, and feed on grubs, slugs and berries. The male, 10 ins. in length

has a reddish yellow throat and a black-spotted breast. The song note is low and twittering, the call note loud and harsh.

Fielding Henry English novelist. Born in Somerset, April 22, 1707, he was educated at Eton and then went to Leiden. After his return to England he wrote plays and studied law for some years until in 1749 he was appointed a magistrate for Westminster, where he sat fairly regularly until his death at Lisbon Oct. 8, 1754.

One of England's greatest novelists, Fielding is known as the author of *Joseph Andrews*, *Tom Jones* and *Amelia*. *Tom Jones* deals with episodes in the author's own life, and is regarded as one of the greatest works of fiction ever written, full of humour, although coarse according to modern ideas. He also wrote *Jonathan Wild*. Thackeray in his *English Humorists* pays homage to Fielding's genius.

Fielding William Stevens, Canadian statesman. Born at Halifax, Nova Scotia, Nov. 21, 1848, in 1864 he became a reporter on the Halifax *Morning Chronicle*, and later managing editor of that paper. In 1882 he was elected to the legislature of Nova Scotia, and from 1884-96 was Prime Minister. In 1896 he entered the Dominion House of Commons and from then until 1911 was Minister of Finance under Sir Wilfrid Laurier. He occupied the same position from 1921 to 1925 when the Liberal party was again in power, and died, June 23, 1929.

Field Marshal Highest rank in the British army. It dates from 1736. There must not be more than eight field marshals, apart from those of honorary rank such as the king of the Belgians. A field marshal carries a baton as a sign of his rank, and wears on his uniform the representation of two crossed batons. The equivalent rank in the navy is admiral of the fleet, and in the air force marshal of the air. The term marshal is used in the French and other European armies.

Field Mouse Popular name of several rodents which are not house mice. They include the long-tailed, *mus sylvaticus*, and various species of voles, especially the short-tailed and the red field mouse or bank vole, all very destructive to British field and forest produce.

Fiery Cross Ancient summons to arms in Highland Scotland. Two crossed sticks of light wood were charred at the ends and dipped in goat's blood. Sent by clan chieftains from place to place by swift messengers it rendered any clansman, who did not answer the call, liable to the death penalty. It lingered until the rebellion of 1745.

Fiesole City of Italy. It stands on the Arno, 3 m. from Florence and is visited for its beautiful surroundings. Fiesole was a flourishing city of Etruria before the foundation of Rome. Straw plaiting is now its chief industry. Pop. 10,500.

Fife Small transverse flute intermediate between the flute and piccolo. The modern fife used in drum and fife bands, has six finger holes and four firs or six keys. The B flat fife supplies the melodic substance of the music and is accompanied by piccolos and flutes in F or E flat.

Fife County of Scotland. It is a peninsula between the Firths of Forth and Tay, covers 504 sq. m., and is partly hilly. Cupar is the county town, other places are Dunfer-

Fife, Kirkcaldy, St Andrews and Buckhaven. The county has some rich coal mines and there is a good deal of fishing. It is served by the L N L Riv. The Fife and Forth are the principal rivers. Historically, the kingdom of Fife as it is called, is one of the richest parts of Scotland. St Andrews and Dunfermline especially are full of memories of the past, and there are many small burghs, Kinghorn, for example, that have historic and interesting associations with the old Scottish kings. Pop (1931) 290,000.

Fife Duke of British title held by the family of Duff. In 1735 William Duff who had large estates in Banffshire and Aberdeenshire, was created an Irish baron, and in 1759 Earl Fife and Viscount Macduff. James the 5th earl, was created a British peer in 1877 as Baron Skene. He died in 1879 and was succeeded by his son, Alexander William George, who, on his marriage in 1889, to Louise, eldest daughter of the Prince of Wales, was created Duke of Fife. On his death, Jan 29, 1912, his Irish title, that of Earl Fife, became extinct, but the British dukedom and earldom, under the special remainder, passed to his elder daughter, Princess Alexandra, who became Duchess of Fife. She was born May 17, 1891, and in Oct 1913, married her cousin, Prince Arthur of Connaught. Their son, the heir to the title, is known as the Earl of Macduff. The Princess Royal, wife of the duke, died Jan 4, 1931.

Fig Genus of fruit bearing trees (*ficus*). The common *f. carica*, cultivated from antiquity in the Mediterranean region, bears pear shaped receptacles containing nearly closed cavities within which the flowers are fertilized, largely through the agency of wasps, assisted artificially. It was introduced into England in Tudor times, but fruit ripened there cannot rival the figs of commerce which come from Asia Minor and thereabouts. The screamer fig, *f. sycomorus*, yielded the light wood which the Egyptians used for mummy cases. See BO TREE.

Figaro Chief character in Beaumarchais' comedy, *The Barber of Seville*, 1775. He reappeared as a valet in *The Marriage of Figaro*, 1784 and as a sublimed philosopher in *La Mère Coupable*, 1792. He personified adroit wit, courage and gaiety. Rosini utilized the first play and Mozart the second for still better known operas. The name was adopted by a satirical Parisian journal founded in 1826, and revived in 1854. It still exists as a morning daily with a literary supplement and an illustrated monthly.

Fighting Fish Small freshwater spiny finned fish (*telia*). It is found in both Asia and Africa and seldom exceeds 4 ins in length. In Slam one species, *b. pugnar*, is bred for sporting contests under recognised rules the combats being watched by numerous spectators and associated with heavy betting. Normally greyish-brown, the fish assume dazzling liveries during the breeding season and when fighting.

Fighting Top Term applied to a structure of varied character built high up on the mast of a war vessel in ancient times it served as a place for archers and later for riflemen. In modern vessels the fighting top is used as a station for officers in charge of the fire control.

Figwort Genus of herbs of the snapdragon order (*scrophularia*).

They are natives of Europe, temperate Asia, N Africa and, rarely, of America. Often fetid, they are mostly possessed of creeping rootstocks and opposite leaves, the panicles of greenish-purple or yellow flowers bearing two-valved capsules. A decoction made from the knotted figwort, *s. nodosa*, is an empirical remedy for swine scab.

Fiji Group of islands in the Pacific Ocean. They form a British Crown Colony and cover 7083 sq m. Of the 250 islands about 80 are inhabited. The three largest are Viti Levu, Vanua Levu and Taviuni, and since 1880 the colony has included the island of Rotuma some distance from the main group. Suva on Viti Levu is the capital. The soil is very fertile and sugar coconuts, bananas and other tropical products are exported. The islands, which are inhabited by a native race, were discovered by Tasman in 1643. In 1874 they became British. They are under a governor who is also high commissioner for the Western Pacific, an executive council of eight members and a legislative council of 21, partly elected and partly nominated. Pop (1931) 185,573, of whom 91,414 are Fijians, 76,722 Indians and 5058 Europeans.

Filbert Fruit of cultivated varieties of hazel (*corpius arcellana*). A leathery husk encloses the nutshell. It grows especially in Kent, and is much esteemed in America. Larger varieties are known as cobs. The name comes from S Philibert, whose day, Aug 22, fell in the nutting season.

Fildes Sir Luke English artist. Born at Liverpool, Oct. 18 1844 he studied at South Kensington and the Royal Academy Schools, and for a number of years produced black and white illustrations for books and magazines. His paintings, of which *The Doctor* in the Tate Gallery, London, is a well-known one, are of a sentimental and somewhat mechanical character. From 1887, when he was elected a Royal Academician, he did little but portrait painting. He was knighted in 1906 and died Feb 27, 1927.

File Steel tool furnished with sharp edged ridges or points. It is employed for smoothing irregular metal surfaces and to sharpen saws. Some are round or square, others triangular or flat and either parallel edged or tapered. A float-cut file has parallel furrows, whilst a cross-cut file has the furrows crossed.

Another kind of file is a folder, often fitted with clasps in which records and correspondence are kept.

Another file is a body of soldiers ranged one behind another hence the phrase rank and file.

Filey Urban district and watering place of Yorkshire (E R). It is 9 m from Scarborough, 240 from London on the L N E Riv. The town has good sands bathing and other attractions for visitors, including the gardens. It stands on Filey Bay to the north is a ridge of rock nearly 1000 yds long called Filey Brig. Pop (1931) 3730.

Filigree Ornamental work carried out in fine wires of gold, silver, copper or other metal. The wire is arranged in the required pattern upon charcoal and is exposed to heat when the charcoal being reduced to ash the welded filigree work is left. Granular filigree was made by the Etruscans by welding together very minute globules of gold to form wire like designs of great beauty and delicacy. Often filigree is combined with work in enamel and precious stones.

Filipinos Collective name for the Christianised natives of the Philippine Islands. Of Malay descent they number 8,500,000 the remaining 3,500,000 inhabitants of the islands are largely Moslems and pagans. Before the American occupation, 1898, a Liga Filipina sought to improve their condition. See PHILIPPINE ISLANDS

Fillmore Millard American president. Born Feb 7, 1800, in the state of New York, he began life as a teacher, later becoming a lawyer at Aurora. In 1829 he was elected to the state legislature. He sat in the House of Representatives, 1833-35 and 1837-43. In 1848 he was elected vice-president and on the death of Zachary Taylor in 1850 he became president. His short term of office, which ended in 1852, was not very distinguished. In 1856 he was a candidate for the presidency again, but only one state voted for him. He died at Buffalo, March 8, 1874.

Film In photography the flexible material used instead of glass in the making of negatives. It was first introduced for general photographic work by the Eastman Co. in 1881. The particular value of the film for cinematographic work was soon recognised by Edison, who used it first in his kinetoscope, since when the cinematographic film has grown in importance. Celluloid was originally used as the material of films, but owing to its inflammability a non inflammable film made from cellulose acetate is now in use.

The making of films for the cinema houses is an enormous industry, in which perhaps 2400,000,000 is invested. Its chief centre is Los Angeles but films are also made in the studios at Elstree, Shepherd's Bush, Ealing, and other places in England. A duty is charged on all films imported into Great Britain and since 1927 it has been compulsory for a certain proportion, increasing each year to 1036, of British films to be shown. Films are censored by a board appointed by the trade. In 1932 it was decided to establish a national film institute from funds obtained from the Sunday opening of cinemas. See CINEMATOGRAPH

Filter Apparatus for separating suspended particles from a liquid. A great advance has been made during recent years in the study of filtration and the designing of filters. The porous materials for filters are very varied and range from special absorbent paper and various fabrics to sand, powdered glass, quartz, charcoal, stoneware, asbestos and iron gauze. Public water supplies are filtered through sand and thus, not only suspended solids, but also pathological bacteria are removed. Filtration is an important process in many industries for example in the manufacture of sugar, beer, oils, chemicals, paint, etc.

Finance Management of money. National finance concerns the income and expenditure of the nation and similarly there are local and other kinds of finance. The finances of business houses have passed largely into the care of trained accountants. The proposals put forward each year by the Chancellor of the Exchequer are embodied in the Finance Act.

Finch Name of various small perching birds (*Fringillidae*). Members of the finch family are distributed over all temperate regions except Australasia. The name occurs almost always in composition, e.g., the common British resident bullfinch, chaffinch, goldfinch, greenfinch, and hawfinch,

and the casual visitors oirlin, serin and snow finch. Closely allied are the resident skink, hunting, house sparrow, linnet and redpoll, and the migrant brambling. Their hard, conical, smooth-edged bills facilitate the shelling and eating of seeds.

Finchley Urban district of Middlesex, really a suburb of London. It is about 6 m to the north of the city and consists of several districts. Pop (1931) 58,861.

Findhorn River of Scotland. It rises in the mountains of Inverness shire and flows through Elgin and Nairn to the Moray Firth. It is 82 m in length. There is a small seaside resort of the same name on the east side of Findhorn Bay, an opening of the Moray Firth.

Findon Village of Kincardineshire. It stands on the coast, 6 m from Aberdeen and is a fishing centre. The Findon or Finnon haddock takes its name from here.

An English Findon is a village in Sussex. It is near the Downs, just outside Worthing.

Fine Arts Term used to include such forms of art as painting, drawing and sculpture to distinguish them from those which are more mechanical, utilitarian and of the nature of crafts. The term, however, is a somewhat loose one, as obviously the various branches of art overlap one another.

To look after matters affecting fine arts in Great Britain a Royal Fine Arts Commission was set up in 1924.

Finedon Urban district of Northampton shire. It is 681 m from London by the LMS Ry., and is 3 m from Wellingborough. Iron is mined, and shoes and boots are manufactured. Pop (1931) 4100.

Fingal Scottish hero, corresponding to the Irish hero Finn. He was king of Morven in Argyllshire and was a great warrior, who was killed in battle. He is remembered by many legends and by the cave in Staffa, called Fingal's Cave. Discovered in 1772, it is the most famous cave of its kind with columns of basalt on which the light makes wonderful effects.

Finger Terminal member of the hand. Each hand has five, the name being sometimes reserved for the four digits, excluding the thumb. The three joints are united by ligaments whose back and front tendons straighten and bend the digits. Two small arteries and nerves line each side. The skin is strong and sensitive, the tip being specialised into a nail. The finger itself lacks muscle or flesh. The sense of touch is in the fingers and in some persons, especially the blind, is highly developed.

Finger-and-Toe Popular name of a destructive plant disease. It causes malformation of cruciferous root crops, such as turnips, radishes and cabbages. Also called anbury and club root, it is caused by a microscopic slime fungus, *plasmiodiophora brassicae*, whose spores in the soil enter the root, producing nodules or warty outgrowths which sometimes swell and rot with offensive odour. The disease is infectious and difficult to eradicate. Lime dressing sometimes reduces it. Diseased roots should be burnt and not fed to stock.

Finger Print Impression of the human finger. It was used in ancient times in the East as a potentate's sign manual.

Sir W. Herschel introduced it into Bengal

THE FLAGS OF THE NATIONS

1. Great Britain, Union Jack 2. Great Britain, White Ensign (Royal Navy)
 3. Canada 4. Australia 5. India 6. United States of America 7. Irish
 Free State 8. New Zealand 9. Germany 10. France 11. Union of South
 Africa 12. Italy 13. Japan 14. Belgium 15. Russia (Union of Socialist
 Soviet Republics) 16. Norway 17. Netherlands 18. Spain 19. Austria
 NSL 20. China 21. Sweden 22. Poland. *12-15 page 4-5*

law courts for purposes of identification in 1858, and Sir E. Henry into the Bengal police for crime detection. Sir F. Galton laboured long to show the unchanging character and individuality of every finger tip's ridges and furrows. Henry devised a practical system of classification for the London metropolitan police, based on arches, loops, whorls and composites, with seven sub-classes, only simple recording appliances being required. A classified finger print index to all known criminals, exceeding 250,000, is kept by the London police.

Finistère Cape of Spain. It is the north-west point of the country, owing its name (land's end) to its position. Here the British fleet gained a victory over the French on May 3, 1747. For this Admiral George Anson was made a peer.

A department of France is named Finistère. This is the part of Brittany in the north-west of the country. Quimper is the chief town.

Finland Republic of Europe. Russia, Sweden and Norway form its land boundaries, whilst on the south and most of the west its borders are the Baltic Sea, on which it has 1200 m. of coast line. Its area is 132,589 sq. m. including the Åland Islands and a number of other islands. Most of the land is flat and there are many large lakes. Part of Lake Ladoga and a piece of Lapland are in the republic. Helsingfors (or Helsinki) is the capital and the largest town. Others are Åbo (Turku), Tampere, Viborg and Vasa.

For some centuries Finland was part of Sweden, but in the 16th century it became a grand duchy. In 1809 it was handed over to Russia, which had previously secured part of it and the rest became grand duke. Later there was a good deal of trouble between the Finnish and the Swedish elements in the population.

The country was, in 1917, declared a sovereign and independent state. It is governed by a president, elected for six years by universal suffrage, and a council of state. These are responsible to a house of representatives of 200 members. Socialism is very strong in the country and against communism repressive measures were found necessary in 1930. The chief occupation is agriculture. Rice, barley and oats are grown. There are immense areas of forest and timber and pulp are the principal exports. Horses and cattle are kept, and butter is made. The railways are state owned and transport, especially of timber, is facilitated by the numerous lakes which are joined by canals. Finland has an army recruited by universal service, a small navy and an air force. Lutheranism is the national religion. The country adopted prohibition, but in 1932 it was abandoned.

The unit of currency is the markka, worth 11d. and stabilised at 39.70 to the dollar. The Bank of Finland is the state bank. The metric system of weights and measures is used. The population of the republic is 3,667,067. Of these 342,916 speak Swedish, nearly all the others are Finns.

The Gulf of Finland is a branch of the Baltic Sea. It is 250 m. long and lies between Finland and Estonia.

Finn Legendary hero. He is associated with both Ireland and Scotland and many stories are told about him. He was the son of a king and became the leader of the Fionna. The word Finn means fair one. In Scottish legend he is known as Fingal.

Finsbury Metropolitan borough of London. It is in the north of the city of London and includes Clerkenwell. In it are the Charterhouse and Bunhill Fields. Finsbury Pavement, Finsbury Square and Finsbury Circus are in or near the borough. Pop. (1931) 69,888.

Finsbury Park is a district just outside the boundary of the county of London. The name is primarily that of a recreation ground opened in 1869, but has become attached to a great railway junction and traffic centre, where the L.N.E. and Underground Rlys. connect.

Finsen Light Apparatus invented by a Dane, Nils Ryberg Finsen (1860-1904) for the treatment of the virulent skin disease, lupus. The actinic rays from an arc lamp are transmitted through a light filter and, after being concentrated by passing through quartz lenses and cooled by a stream of water, are brought to bear upon the diseased part.

Fir General name for various resinous cone-bearing trees yielding useful timber. The true, or silver, fir, *Abies pectinata*, abounds in central and S. Europe, often reaching in English parks a height of 90 ft. The Norway spruce fir, *Picea excelsa*, Europe's stately tree, may reach 170 ft. Other genera yield the hemlock, Douglas and Japanese parasol firs. The needle-like leaves of firs grow singly on the shoots, not in sheathed clusters, as in larches and pines. The Scotch fir, *Pinus sylvestris*, is properly a pine.

Firdausi Persian poet. His real name was Abul Kasim Mansur, and he lived from about 940 to 1020. His great work is the epic poem, *Shahnamah* or *Book of Kings*, which contains 60,000 lines and relates the history of Persia from the earliest times.

Fire Any manifestation of glowing heat, more particularly the visible heat and light produced by high temperature on combustible or inflammable substances. Combustion may be attended by flame, with or without non-luminous vapour or smoke. Fire is generated naturally by solar radiation and other means. After being recognised by primeval man as a physical fact, it was slowly brought under control, utilised for defence against wild beasts, preserved, artificially produced at will and converted into a mighty auxiliary of man's conquest of the globe.

The worship of fire is still practised by some primitive people of Africa, Asia and America. In ancient Mexico, in pre-Aryan India and in early Persia fire worship was an important element of the popular religion.

FIRE INSURANCE—Insurance against loss by fire is one of the oldest and most important branches of insurance. It is undertaken by all large offices and practically every building in the civilised world is insured against fire, as well as furniture and other household possessions. In Great Britain the premium on an ordinary house or shop is very low, but it is higher on factories, especially those where any inflammable material is used. The premium is reduced in cases where fire extinguishing apparatus is installed.

Fire Alarm Device for giving an alarm on the breaking out of a fire. There are many types, most of which depend upon the expansion of a substance when heated. In one an electric bell circuit is connected with two platinum wires fused into a thermometer tube. One wire is in con-

FIREARM

tact with the mercury in the bulb, the other is placed at a point above the mark of normal temperatures. When the mercury rises to the upper wire, the circuit is completed and the bell rings. In 1930 a fire alarm of the loud speaker type was installed in Edinburgh.

Firearm Weapon discharged by means of gunpowder or other explosive in the 14th and 15th centuries primitive cannon or hombards were made of wood, leather or iron bars, and throw stono halls these in the 16th century were replaced by cast iron brass or bronze cannon and mortars. Soldiers were armed first with the arquebus and later with the matchlock, musket and pistols. In the 19th century, with the adoption of the percussion cap, the breechloader came into use, followed by the rifle and revolver.

A person may not possess, use or carry a firearm unless he holds a certificate which costs 5s for the first year and 2s 6d afterwards, and in addition with a few exceptions, either a gun licence (costing 10s a year), or a game licence (costing from 21 for 14 consecutive days to 23 for a year) is necessary.

Fire Brigade Body of men equipped with outbreaks of fire. Every town and urban district has its fire brigade. The larger ones consist of paid men always on duty, the smaller ones of volunteers. The equipment consists of powerful motor pumps, hose ladders, etc. The largest fire brigade, the London Fire Brigade, has a staff of 2000 men. Its offices are at 94 Southwark Bridge Road, London, S E 1.

Fireclay Variety of clay able to withstand high temperatures owing to the absence of fusible constituents. It resists corrosion and is unaffected by sudden changes of temperature. Fireclay is worked at Stour bridge and many places in the coalfields and is used for making crucibles, stove backs, furnace and oven linings.

Fire Damp Term applied by miners to methane or marsh gas which tends to accumulate in coal mines, escaping especially when there is a sudden drop in atmospheric pressure. Marsh gas when mixed with air explodes with great violence in contact with a naked flame, hence the necessity for the use of safety lamps.

Fire Engine Mechanical device used by means of water for extinguishing fires. The earliest type was a brass hand squirt or pump, but in 1872 the first manual engine with flexible leather hose was invented. Steam fire engines came into use in London in 1860, but the modern type is petrol driven with pumps capable of throwing heavy streams of water to a considerable height.

Chemical fire engines are now used in some cases, utilising materials which evolve carbon dioxide as a gas or as foam.

Fire Escape Device for facilitating the escape of persons from a burning building. It may be merely a knotted rope fastened to a window frame, or a more elaborate device for lowering a person to the ground. Another form of escape is provided by external iron staircases to high buildings. The modern portable wheeled fire escape possessed by the fire brigade has telescopic ladders usually in three or four sections mounted upon a two wheeled base and capable of reaching a height of over 80 ft.

Firefly Name given to certain types of beetles which possess luminous organs. The firefly of tropical America belongs to the group of click beetles and is remarkable for the brilliance of the light it emits. Its European representative, the glowworm, possesses luminous organs along the edges of the last abdominal segments.

Fireproofing Method of treating fabrics, wood or paper with chemical solutions to render them more or less noninflammable. Sodium silicate, sodium tungstate and potassium tungstate are used extensively for this purpose. Among other chemicals the following have been suggested, borax, ammonium chloride, phosphates and sulphate, alum, salt, sodium sulphate and zinc sulphate. Slag wool is used as a fireproof covering for steam pipes and flooring, and special fireproof paints, or the application of lime wash are useful for preventing wood from catching fire.

Fire Ship Device used in ancient and mediaeval warfare. A vessel filled with tar and other inflammable material was set alight and allowed to drift among enemy ships in order to ignite them and create a panic. A number of fireships were used against the vessels of the Great Armada when they were anchored in the Calais Roads on the night of July 27, 1588 causing a panic and the scattering of the Spanish vessels.

Fireworks Devices or preparations of nature used chiefly for purposes of display. Pyrotechny, or the art of the making of fire works, has been known in the East from remote times, and was introduced into Europe about the 13th century. In the 17th century, pyrotechny was well advanced, but the greatest progress in the art took place in the 19th century with the introduction of chlorate of potash, magnesium and aluminium giving colour effects and greater brilliancy.

Pyrotechnic compositions consist of substances such as charcoal and sulphur, which ignite or explode in contact with an oxygen yielding substance, such as nitre or chlorate of potash. Some mixtures containing nitre, sulphur, charcoal and powdered metals, produce force and sparks. Others with a chlorate base give flame, colours being produced by metallic salts. Their manufacture is strictly supervised by the Home Office and is carried on under conditions laid down by the authorities.

Firework displays are given at fêtes and celebrations of any kind. Those at the Crystal Palace, London, are famous.

Firkin Measure once used for liquids. It equalled 9 gallons, or a quarter of a barrel, and was chiefly used for beer of a firkin of butter weighs 56 lb.

First Aid Term used for the assistance given at once in case of accident or sudden illness. A knowledge of a few simple rules about stopping bleeding, etc., is often the means of saving life. Lessons in first aid methods are given to both men and women by the S. John Ambulance Association, the British Red Cross Society, the S. Andrew's Ambulance Society (a Scottish organisation) and other societies all over the country.

Firstborn Term denoting, in Jewish life, "that which openeth the womb." It is employed even when no second child follows. To commemorate the

deliverance from Egyptian bondage all first-born human males were consecrated, but after one month were redeemable, as a substitute for this national obligation, the tribe of Levi was chosen for service thus inaugurating the hereditary priesthood. The redemption of the first-born 30 days after birth is still solemnised. Firstling animals if clean were sacrificed, if unclean were redeemed.

First Empire Term used by historians for the period in France between 1804 and 1814. In May, 1804 Napoleon was made emperor and his empire existed until his abdication in April, 1814. The second empire was the period, 1852-70 when his nephew, Napoleon III, was emperor.

First Fruits Earliest gatherings of a person's crop. The Jews made an offering to God of a portion of the first fruits, a sixtieth or a fortieth. Voluntarily observed in the early Christian church, the fruits were later claimed by the clergy as part of their stipend. First fruits were sometimes payable under feudal law, and in the 12th century the papacy claimed this feudal right over all benefices in Christendom. These were paid often under protest in England until the Reformation, when they were made part of the royal income. Elizabeth reserved such annates for the crown. Anne restored them to the church as Queen Anne's Bounty.

First Offender Term used in English law for a criminal who has committed only one offence. In 1887 a law was passed ordering magistrates to bind over such persons to be of good behaviour instead of sending them to prison. The offence with which the first offender is guilty must, of course, be a minor one. To-day first offenders are often put in charge of a probation officer who looks after them for a stated period, as provided for by an Act of 1907, which replaced that of 1857.

First Republic Term used by historians for the period from 1792 to 1804 when France was a republic. The monarchy was abolished in 1792 and in 1804 Napoleon was declared emperor. The second republic began with the fall of Louis Philippe in 1848 and ended in 1852 when Louis Napoleon made himself emperor. The third republic began on the fall of Napoleon III in 1870 and is still in existence.

Firth Name common in Scotland for an arm of the sea such as the Solway and Pentlands Firths and named after the rivers where these enter such as the Clyde Firth and Tay. In Iceland a firth is called an estuary and fiord is the Norwegian equivalent.

Fish Word popularly designating a swimming animal. Loosely applied to such marine animals as whales and dugongs, such amphibia as eels and such invertebrates as cuttle fish, shell fish and star fish. It properly denotes a class of cold blooded, vertebrates living in water and breathing through gills. The body is usually covered with scales and the limbs, when present, are represented by paired fins. Reproduction is mainly by eggs fertilised after being spawned. The study of fish is called ichthyology. See **Fishery**.

The preserving of fish for food purposes is a large industry. At Yarmouth and elsewhere in Great Britain the curing of herrings

is carried out on a large scale. Salmon, lobster and other fish are canned, an important industry in British Columbia and California. Cod is cured in Newfoundland and Norway. Sardines and anchovies are prepared and packed in oil in France, Italy and Spain.

To conserve the supply of fish, hatcheries, as they are called, have been established. In England these exist for trout, in North America they are used on a large scale for the breeding of salmon and other river fish.

Fisher Andrew Australian statesman. Born near Kilmarnock, Aug. 29, 1862, he worked for some time as a coalminer, and in 1885 went to Queensland, where he was elected to the state legislature in 1893. In 1900 he became a member of the Commonwealth parliament. He was minister of trade and customs in 1901, leader of the Labour party in 1907, and prime minister 1908-09 and 1910-13. He was High Commissioner in England, 1915-21. He died Oct. 22, 1928.

Fisher Herbert Albert Laurens English historian and politician. Born in London, Mar. 21, 1865, he was educated at Winchester and New College Oxford, remaining there as lecturer and tutor in history until 1912, when he was appointed vice-chancellor of Sheffield University. He entered parliament in 1916 and was president of the board of education from 1916 to 1922, being responsible for the Education Act of 1918. He resigned his seat in 1926. A year earlier he had been appointed varden of New College, Oxford. He has written many books on historical subjects, including *Studies in Napoleonic Statesmanship*, 1903, also a study of Christian Science, 1929. In 1925 he was made president of the British Academy.

Fisher John English prelate. Born at Beverley about 1450, he was educated at Cambridge, and in 1504 was consecrated Bishop of Roches. In 1527 he was the only bishop who refused his assent to the declaration that the marriage of Henry VIII to Catherine of Aragon was unlawful, and in 1534 again stood alone in refusing to swear to the Act of Succession. He was sent to the Tower, and while in prison was given by the pope a cardinal's hat. He was beheaded on Tower Hill, June 22, 1535, for refusing to recognise Henry as head of the church. In 1886 Fisher was beatified.

Fisher 1st of Baron Kilverstone British admiral. John Arbuthnot Fisher was born in Ceylon, Jan. 25, 1841, and entered the navy in 1854 on board the *Victory* at Portsmouth. From 1865-1882, he saw much service during the Crimean War and in Chinese and Egyptian waters, being captain of the *Invincible* at the bombardment of Alexandria. He became first sea lord in 1904, resigning in 1910, but was recalled in Oct. 1914 finally resigning on May 15, 1915. He was knighted in 1891 and when a barony was conferred in 1909 he took the title of Lord Fisher of Kilverstone, Norfolk. He died July 10, 1920.

Fisheries Industry that provides a vast quantity of food for mankind. The most valuable fishing grounds in the world are the northern waters of the Atlantic Ocean, and Great Britain and the United States are the chief participants in the industry. France, Norway and Canada are other nations with valuable fisheries.

British fishermen take part in the cod fisheries off Newfoundland, and in fisheries in other parts of the world, but their chief sphere

of operations is the North Sea, which is very rich in fish valuable for food. Accordingly, Yarmouth, Grimsby, Aberdeen and other places on the east coast are the chief British fishing ports. The herring is the chief fish caught, but haddock, mackerel, sole and turbot are also brought in. Pilchards are caught off the coast of Cornwall.

The fisheries of the United States include a vast quantity of shell fish and salmon, the latter being caught chiefly in the rivers of the Pacific coast. Somewhat similar are the Canadian fisheries. Norway concentrates chiefly on the cod and the herring. France has valuable fisheries in the Mediterranean, where the anchovy, sardine and tunny are found. Japan and Russia have also extensive fisheries, Russia producing sturgeon in great quantities.

REGULATION AND CONTROL—International law recognises the seas are open to all nations equally for the purpose of fishing therein, except for a belt round the coast which is the exclusive property of a particular nation. In certain areas, e.g., Newfoundland, fishing rights are regulated by treaty.

To look after the fisheries each nation has a department of state. These collect statistics, issue regulations and from time to time take part in international and other conferences. In England this is the Ministry of Agriculture and Fisheries. In Scotland, it is the Fishery Board.

MODERN DEVELOPMENTS—Of late years great improvements have been introduced into fishing methods, which, until the 19th century, had been much the same for, perhaps, 2000 years. Steam trawlers took the place of fishing smacks and more important still was the introduction of refrigerating methods, which enables the fish to be kept fresh and the fishing fleet to remain longer at sea. Sounding and other apparatus have been introduced to locate the whereabouts of the shoals. Scientists have also been employed to investigate the habits of fish and to suggest methods for conserving the supply.

In 1934 the fish of British taking (excluding river salmon and shellfish) landed in Scotland, England and Wales amounted to 931,421 tons, valued at £15,503,895. Nearly 14,000 boats were employed and the number of men and boys engaged in fishing was estimated at 56,835 at the beginning of the year. Nearly half the catch consisted of herrings. Cod and haddock were the next in importance. Whale and seal fisheries are not counted in the totals of national fisheries.

Fishguard Seaport, urban district and market town of Pembrokeshire. It stands on the little River Gweon, 12 m. from Haverford west and 261 from London. There is a good harbour and the G.W.R. runs a service of steamers from here to Cork, Waterford and Rosslare, Ireland. There is a little fishing. In 1797 a small French force landed here, but it was soon made to surrender. Pop. (1931) 2963.

Fishing Occupation or sport of catching fish. It is one of the oldest of human pursuits and was at first carried on solely to provide food. To day it has become a sport, as well as an industry of enormous proportions. As a sport fishing is usually called angling and is pursued chiefly in rivers, although a certain amount is done in the sea. The rod and line are invariably used, and

the methods and the bait adopted differ according to the fish sought. Fishing for salmon, for example, is quite different from fishing for trout.

When carried on as a business, as it is in almost every country with a seacoast, fishing is chiefly done at sea, although there are extensive salmon fisheries in some of the rivers of North America and in the Great Lakes. The fish are usually caught with a net which may be let down into a shoal and swept through the waters by trawlers. In fishing for shell fish which is quite another branch, traps are usually employed. See **ANGLING**.

Fishmonger Dealer in fish. The Fishmongers' Company is one of the great livery companies of London. It existed in the 14th century or earlier and for long had the monopoly of the fish trade in London. It has an income of nearly £50,000 a year and its hall is near London Bridge.

Fitton Nemo of a noted Cheshire family, also spelled Fytton. They owned land at Gawsworth where they lived for some centuries and where there are memorials to them in the church. Sir Edward Fitton, or Fytton, was lord president of Connaught in the time of Elizabeth. Sir Alexander Fitton was lord chancellor of Ireland. He followed James II to France and was the last Fytton to hold the Gawsworth estate. The most famous member of the family was Mary Fitton, mistress of William Herbert, 3rd Earl of Pembroke, and presumably the "dark lady" of Shakespeare's sonnets.

Fitzgerald Edward, English poet. Born at Woodbridge, Suffolk, Mar. 31, 1809, he was the son of John Purcell, who took his wife's name of Fitzgerald in 1818. Educated at Bury St. Edmunds and Trinity College, Cambridge, his life was very uneventful. His fame, however, was chiefly due to his translation from the Persian of *The Rubáiyat of Omar Khayyám*, first published in 1859. Other works from his pen are *Six Dramas of Calderon*, 1853, *Salutem and Absal*, 1856, and *Readings in Crabbe*, 1882. He died June 14, 1883.

Fitzgerald Family. A historic Irish house, descended from Walter, son of Othar, who is mentioned in Domesday Book as castellan of Windsor. His youngest son, Gerald, captain and constable of Pembroke Castle, married Nesta, sister of a Welsh prince, and became ancestor of the Fitzgeralds. The house was granted the Earldom of Kildare in 1316, and the 20th earl received the dukedom of Leinster in 1766. The heir to the dukedom carries the title of Marquess of Kildare.

Fitzherbert Maria Anne, Wife of George IV. The youngest daughter of Walter Smythe of Brambridge, Hampshire, she was born in 1756 and married in 1775 Edward Weld of Lutworth Castle, Dorset. In 1778 she became the wife of Thomas Fitzherbert of Swinerton, Staffs, who died in 1781. Four years later she met the Prince of Wales, to whom she was privately married, Dec. 21, 1785. Being a Roman Catholic, the union, according to law, was illegal, but not necessarily invalid. However, in 1795 George IV. married Caroline of Brunswick. He later lived with Mrs. Fitzherbert again until 1803 when the connection was severed. She was granted an allowance of £6000 a year and died Mar. 20, 1837.

Fitzroy River of Queensland. It is a union of the Dawson and the Mackenzie and flows through a very fertile country. It falls into the sea at Keppel Bay. Rockhampton stands on it and it is navigable by small steamers to that place.

Another Fitzroy is a river in W. Australia, in the extreme north of the state. It flows for 300 m. in a westerly direction and falls into King Sound on the Indian Ocean. Fitzroy is also the name of a north-east suburb of Melbourne.

Fitzroy is the family name of the Duke of Grafton, a descendant of Charles II and the Duchess of Cleveland. A member of the family, Robert Fitzroy (1805-65) commanded the *Beagle* in 1831, when Charles Darwin was on board as naturalist. From 1843-45 he was Governor of New Zealand and afterwards meteorologist to the Board of Trade, his discoveries being of considerable value.

Fitzroy Edward Augustus. English politician. A member of the Duke of Grafton's family, he was born July 24, 1860. Having passed through Eton and Sandhurst, he joined the 1st Life Guards. In 1900 he entered the House of Commons as M.P. for S. Northamptonshire and retained his seat until 1906, being again M.P. 1910-18. In 1918 he was elected for the Daventry division, as he was at all later elections to 1929. From 1922-28 Captain Fitzroy was Chairman of Committees in the House of Commons, he was elected Speaker in 1928, and re-elected in 1929, 1931 and 1935.

Fitzsimmons Robert. English pugilist. Born at Helston, Cornwall, June 4, 1862, at the age of nine he emigrated to New Zealand, and was trained as a blacksmith. He won a heavyweight competition for novices promoted by Jem Mace, and soon after entered the professional ranks, securing heavy and middle-weight championships of the world. He fought his last match in 1912 and died Oct. 23, 1917.

Fitzwilliam Earl. Title held by the family of Fitzwilliam since 1716. Sir William Fitzwilliam became prominent during the reign of Elizabeth, being Lord Deputy of Ireland 1571-75 and 1588-91. His grandson became an Irish baron in 1620. William, the 3rd baron, became an earl in 1716. The 3rd earl, also a William, received an English barony in 1742 and an English earldom in 1746.

His eldest son, William Wentworth Fitzwilliam, succeeded to the titles in 1756. A Whig in politics, he became, in 1794, President of the Council under Pitt, and in Dec. of the same year Lord Lieutenant of Ireland. In 1798 he became Lord Lieutenant of the West Riding, Yorkshire, but was dismissed in 1819 for censuring the Peterloo Massacre. In 1782 he inherited the great estates of the Wentworths on the death of his uncle, the Marquess of Rockingham. He died Feb. 8, 1833, and the present earl is his direct descendant. The family seat is Wentworth Woodhouse, Yorkshire, and the eldest son is known as Viscount Milton.

Another William Fitzwilliam, who died in 1542, was Lord High Admiral of England under Henry VIII and was created Earl of Southampton in 1537.

Fitzwilliam Museum Museum belonging to the University of Cambridge. Richard Fitzwilliam, an Irish viscount, who died in 1816, left to the university his valuable collection of

books, manuscripts, pictures, engravings, etc., also a sum of money. When a sufficient sum had accumulated a building was erected in Trumpington Street, and from time to time further donations were received. In 1931 extensive additions were made to the building by the generosity of the Courtauld family.

Fiume Seaport and city of Italy. It stands on the River Rienza at the north-eastern end of the Adriatic Sea, and is connected by railway with Budapest. There is an arch here dating from Roman times. Fiume has some manufactures, but the chief industry is shipping, for which there is an excellent harbour. Since 1929 it has been a free port.

The city has had an eventful history. Until 1914 it was part of Austria-Hungary, although its population was mainly Italian, except in the suburbs of Sushak where Croats predominated. When the World War ended Fiume was claimed both by Italy and Yugoslavia, the latter on behalf of the Croats. In Sept., 1919, Gabriele d'Annunzio (q.v.) led a band of volunteers to the city, which he seized for Italy. In 1920 by the Treaty of Rapallo, it was made an independent state. This was distasteful to the Italians, causing disorder which lasted until Jan., 1924, when a treaty was made between Italy and Yugoslavia. By this Fiume and a small surrounding district was given to Italy, Yugoslavia receiving compensation. Pop. (1931) 52,928.

Five Nations Name given to the Iroquois, a group of American Indians. It is due to the fact that it consisted of five tribes—Mohawks, Cayugas, Senecas, Oneidas and Onondagas. Later they were joined by the Tuscaroras and became the Six Nations.

Flag Popular name of various flowering herbs. They usually possess sword-shaped leaves, and mostly grow in moist situations. Several species of iris are known as flags, e.g., the yellow flag, common throughout Britain, and the blue and white flags, equally common in central and S. Europe, from which handsome garden varieties are derived. The sweet flag, *acorus calamus*, rare in England, and naturalised in Scotland and Ireland, perhaps came from the Himalayas. The corn flag is a gladiolus, the cat-tail flag is the reed mace.

Flag Piece of material usually oblong, with a distinctive design, flown as a symbol or sign at the top of a flagstaff. Each country has its national flag and some have several others. The Union Jack is the national flag of Great Britain and the Tricolour of France. These are flown on public buildings, etc., indicating that they are national property. It is customary to fly them at half-mast on the death of an important person. National flags are also flown over embassies and consulates. A sovereign has his standard or flag which is flown over the house in which he is at the time residing.

Flags play an important part in shipping. Every ship, merchantman or warship, shows her nationality by her flag, and they are also used for signalling. An admiral has a flag which is flown on the ship carrying him, the flagship. Commanding officers of lower rank fly a pennant, a long narrow flag. The flag of the British Navy is the white ensign; the mercantile marine flies the red ensign. Yachting clubs have flags, as have shipping lines, these being called house flags. In the army the flags are known as colours. See ENSIGN.

FLAG DAY

Flag Day Day on which small flags are sold in the streets for the benefit of a charity such as the National Life Boat Association. The idea was started during the war period (1914-18), and much money is raised in this way. The idea was soon abused and it was decided that in the metropolitan area no flag day may be held without the consent of the police.

Flagellants

Religious ascetics who practise scourging or bodily discipline or mutual whipping, for the punitive flagellation of offending priests and monks, voluntary scourging developed, after the 11th century into a practice which Cardinal Damiani and others advocated. S. Dominio and S. Anthony of Padua were rigorous self scourgers. Fraternities established in 13th-century Italy conducted public processions. The Black Death in 1348 witnessed revivals of this fanaticism, which was condemned by Clement VI, and stamped out by the Inquisition.

Flageolet

Musical instrument. It was a survivor of the old ripple flute or finte à bec and had a flute like high tone. Mozart wrote a part for the flageolet in his *Entführung aus dem Serail*, but as the instrument is obsolete in the orchestra this part is now played on the piccolo.

The ordinary six-holed tin whistle is a popular extant form of flageolet and gives a good idea of the tone and appearance of its orchestral prototype.

Flagship

Name given to a warship which has an admiral on board. The admiral is in command of a squadron of ships or holds some other command, and has a distinctive flag to denote the ship from which his orders are issued. The *Victory* was Nelson's flagship at Trafalgar and the *Iron Duke* was Jellicoe's at Jutland. A flagship, like any other vessel is under a captain who is responsible for her affairs, with which the admiral has nothing to do. A commanding admiral is sometimes called a flag officer, his personal attendant is a flag lieutenant.

Flagstone

Hard, fine-grained sandstone capable of being split into thin slices. Having a close texture, great durability and a non slipping surface, it is used for paving stones, steps, hearths and landings. York stones is a trade name for the Yorkshire flagstones, comprise stones varying in colour from whitish to blue, brown and mottled. The Craigleith flagstone from Scotland is a whitish grey, now largely replaced by artificial slabs.

Flail

Wooden agricultural instrument. It consists of two strong sticks bound together by thongs, one forming the handle and the other the striking portion or snaffle. It was formerly in general use for threshing corn in European countries.

Flamborough

Village of Yorkshire (E.R.). It is 4 m from Bridlington and here is Flamborough Head, a promontory 450 ft. high, with a lighthouse and numerous caves.

Flamboyant

Style of architecture that prevailed in France in the 15th century. It is a late and debased form of Gothic, and took its name from the flame like tracery which characterised it. It was little used in England.

Flame

Burning gaseous matter. Normally due to its union with oxygen in the air when the temperature is raised sufficiently. A solid substance gives rise to

flame during combustion when it, or some constituent, is volatilised during the process. The heat of flame varies, in the oxy-acetylene flame it is as high as 2500° C.

During the Great War the German troops who were trained to use liquid fire were called flame throwers, because they carried blow-lamps which ejected burning liquids to a considerable distance.

Flame Flower

Perennial flowering herb. Also called the red hot poker, it is a native of S. Africa, but flourishes in Great Britain. The leaves, long and narrow bear bright red flowers at the end of long stems each thus resembling a poker.

Flamen

Class of priests in Rome. Their chief was the flamen Dialis, or priest of Jupiter, whose characteristic vestments included an olive crown, a white cap and a woollen toga, with a sacrificial knife. His wife, *Flaminica Dialis*, shared with him the daily sacrifices.

Flamingo

Order of tall wading birds related to ducks. They are widely distributed in the warmer regions except Australia, and are long necked and long-legged. Their beaks, abruptly bent down in the middle, serve as scoops when the head is twisted upside down. They are found in great flocks, particularly near the great lakes in Central Africa. The European *Phoenicopterus roseus*, ranging from Capo Verde eastward to Lake Balkal, breeds in the Mediterranean region, making conical mud nests. It is occasionally seen in Britain. The plumage is rosy white, with black marks on the wings.

Flamininus

Gaius Roman statesman. He lived in the 3rd century B.C. In 220 B.C. he was censor and built a circus and a road named after him. The latter, the Via Flaminia, led from Rome and was the first Roman road to cross the country. He was killed in the battle of Lake Trasimeno, 217 B.C.

Flammarion

Astronomer. Born Feb 25, 1842 his greatest contribution to astronomy was his efforts to popularise it, by writing and lecturing. His *Popular Astronomy*, translated in 1894, was widely read in England. In 1887 he founded the French Société Astronomique. He died June 4, 1923.

Flamsteed

John English clergyman and astronomer. He was born at Denby Derbyshire, Aug 19 1646, and educated at Cambridge. On the establishment of the Royal Observatory at Greenwich in 1675 Flamsteed was appointed Astronomer Royal by Charles II at a salary of £100 a year. In 1684 he was presented with the living of Burston, Surrey. Flamsteed revised the star tables then in use, and published his catalogue of the fixed stars. He died Dec 31, 1719.

Flanders

Name given to a district in France. Its inhabitants are called Flemings chiefly in Belgium, but partly in the Belgian provinces, E. Flanders and W. Flanders are the part of Belgium which lies between the French frontier and the estuary of the Scheldt. Bruges, Ipres and Ghent are in Flanders, as are the Rivers Lys and Yezer.

At one time Flanders under its own counts was practically an independent country. From 1335 to 1477, it was part of Burgundy and then a possession of Spain when it became perhaps the most prosperous part of Europe. In the 17th century parts of it were taken by France whilst the rest helped to form the district known

as the Spanish and after 1714 as the Austrian, Netherlands. In 1794 Austria lost it. At the settlement of 1815 it became part of the Kingdom of the Netherlands, and in 1830 of the new Kingdom of Belgium. In 1914-18, there was a great deal of fighting in Flanders, especially around Ypres.

Flannel Loosely woven woollen stuff. It is used for clothing, its softness and warmth rendering it especially suitable for sporting wear. Some makes have both sides alike, others a long nap on one side only. Flannel was made in Wales, but the chief British centres are now in Lancashire, especially Rochdale and Yorkshire. Much flannel contains a proportion, sometimes high, of cotton. Blankets are a special branch of the flannel manufacture.

Flannelette is a cotton material made to resemble flannel. It, too, is much used for clothing, but is rather inflammable.

Flash Ornament consisting of three short pieces of black velvet ribbon sewn under the collar and hanging down the back. It is part of the regimental dress of the Royal Welch Fusiliers. Its use dates from the time when queues of hair were worn, and the flash was introduced to prevent these from greasing the coat or tunic.

Flash Point Temperature at which a liquid gives off vapour which will ignite with a flash upon the application of a flame. It is especially used in connection with the products of petroleum. To minimise the danger arising from the use of lamp oils the legal flash point of paraffin oil is placed at 73° F., to determine which several forms of apparatus have been devised in which oil is slowly warmed and its vapour tested from time to time by a small gas flame at a certain distance above the surface of the oil.

Flashlight photographs are taken by means of an instantaneous brilliant light caused by burning magnesium powder. An electric bulb has now been perfected to serve the same purpose. It possesses the advantage of smokelessness.

Flat In music one of the commonest signs. It means that the note which is marked by it is lowered a semitone.

Flat Self-contained dwelling, usually on one floor and part of a large building. In England since the Great War the use of flats has increased enormously. Many large houses have been converted into flats and new blocks of flats have been built, especially in London, many of them being large and luxurious buildings, as those in Park Lane and Baker St. Some of them are service flats, meals being obtained from a special restaurant or kitchen. The rent of flats usually includes rates and the proprietor generally undertakes to look after the common entrance hall and other common ground. Some flats are let furnished. The law about flats is the same as for other dwellings. See RATES, RENT.

Flat-fish Family of fishes without air bladders. The 500 species, almost all marine, and inhabiting all seas except the polar, have compressed and flattened bodies, the eyes and nostrils being twisted round to the upper side, and the mouth becomg awry. The fish swims on one side, and the under side, that rests on the sea floor, is colourless, the other, darkly pigmented, changes colour protectively. The transparent and perfectly symmetrical young swim vertically. Important edible species include the halibut, turbot, plaice, sole and flounder.

Flat Foot Deformity of the foot in which its arch subsides until the sole rests upon the ground. It usually occurs in young persons of poor physique who have been exposed to much standing or to the carrying of heavy weights. There is pain and fatigue with a tendency to turn the toes outward. A change of occupation, with rest, tip-toe exercises and massage may suffice to cure it, or relief may be obtained from artificial supports such as insole pads. Bad cases may need surgical treatment.

Flatford Village of Suffolk. It is near E Bergholt on the River Stour. The mill here was painted by Constable who also immortalised other scenes in the neighbourhood. In 1928 the mill was presented to the nation together with the house called Willv Lot's Cottage. The latter is now a guest house for artists.

Flatulence Gas in the stomach or bowels. In the stomach this arises from air gulped down nervously by dyspeptic persons, or from digestive disturbance and is expelled from time to time noisily into the mouth. In the bowel it usually arises from bacterial fermentation. Marsh gas and hydrogen are formed from vegetables, and sulphuretted hydrogen and carbon disulphide from eggs and peas. There may be unpleasant rumbling, and violent expulsion.

Treatment.—The treatment of flatulence or wind, which is a symptom of indigestion should be mainly preventive—avoidance of habits of eating foods known to cause the condition. Meals should be regular, three a day. Nothing should be drunk with food, but plenty of water between meals. Bicarbonate of soda in water, essence of peppermint, soda-mint tablets, all serve to relieve an attack, and charcoal biscuits eaten at the end of a meal are beneficial.

Flaubert Gustave French novelist. Born at Rouen Dec 12, 1821, he studied law, but, after travelling for a number of years, took up literature. In 1857 he published *Madame Bovary* for which he and his publisher were prosecuted on a charge of immorality, but the action was dismissed and the book was a great success. In 1862 he published *Salammbo*, a picture of life in Carthage, *L'Education Sentimentale* appeared in 1867 and *La Tentation de St. Antoine* in 1874. Other novels and two plays followed. He died Mar 9, 1880.

Flavine Basic dye also known as acriflavine. It is derived from a coal tar product acridine, and consists of a brownish red crystalline powder soluble in water and alcohol. It forms a pure yellow dye for cotton and leather, and is used extensively as a powerful antiseptic in the treatment of sleeping sickness, and in clinical surgery.

Flax Fibre used for linen thread and the plant which produces it. The annual herb, *linum usitatissimum* has narrow lance-shaped leaves and purplish-blue flowers. It yields handsome garden varieties.

Flax grows in Europe, notably in Russia, also in Ulster, Yorkshire and elsewhere. When ready, the tissues of the stems are separated by a process called retting and the tough fibres obtained are dried and when woven form linen. The seed yields linseed oil, used as a painter's oil, the residual cake being a useful cattle food.

New Zealand flax, *phormium tenax*, is a plant of the lily family of which the leaf fibres are convertible into twine and rope. See LINEN.

Flaxman John English sculptor He was born at York, July 6, 1755, a delicate, somewhat deformed boy, and spent his early years mainly in his father's plaster cast shop In 1770 he entered the Royal Academy schools in London, and from 1775-87 was employed by the Wedgwoods to design classical friezes and figures for their china ware Then he turned his attention to executing monumental sculptures and examples of his work are in many cathedrals and churches especially St Paul's Cathedral and Westminster Abbey Made A R A in 1797, Flaxman was elected R A in 1800 In 1810 he was chosen Professor of sculpture at the Royal Academy He died Dec 7, 1826

Flea Order of small wingless insects, mostly parasitic on mammals and birds The mouth parts are adapted for piercing and sucking and the adult insect lives on blood, its bite being troublesome Owing to the length of its hind legs the flea is enabled to leap, in some species, 200 times its own length

The human flea, *pulex irritans*, breeds in neglected, dirty houses Rat fleas convey plague to man, and chicken fleas sometimes attack man, but do not remain with him

Fleabane Several herbs of the order *compositae* Their scaplike odour is reputedly obnoxious to fleas Two British species of *pulicaria* extend to India, one was formerly used as a medicine for diarrhoea and dysentery There are two British species of *erigeron*, and the Canadian species, *E. canadense*, is naturalised in Britain Another fleabane, *inula equarrosa*, is called ploughman's spikenard

Flecker James Elroy English poet and dramatist He was born at Lewisham Nov 5, 1884, and was out East in the consular service from 1910-13 He died of consumption at Davos Platz on Jan 3, 1915 A poet of great individuality and high quality, his brilliant play, *Hassan* was published posthumously and produced in 1923

Fleece Coat of the living sheep removed at one shearing The interlocking of adjacent hairs renders the shorn clip fairly coherent Fleece wools are distinguished from dead wools, which are not derived from the living animal The fleece, after the shearing with hand or power implements, is roughly trimmed and bundled together ready for baling After reaching the market or factory it is opened, examined and classified ased fleeces being those of approximately similar quality See GOLDEN FLEECE

Fleet River of London now merely an underground stream It rose at Hampstead and fell into the Thames at Blackfriars Its northern part was called the Holbourne and the rest the Fleet Ditch In the 18th century it was covered in and became a sewer Its lower course was roughly along Farringdon Rd, Farringdon St, and New Bridge St

The Fleet gives its name to Fleet St, noted as the centre of the newspaper life of the country This runs parallel with the River Thames from the Strand to Ludgate Circus

The Fleet Prison stood on the east side of what is now Farringdon St Long one of the most famous of London's prisons, it was destroyed by rioters in 1780, but was soon rebuilt Before 1850 it ceased to be used as a prison and was pulled down

Fleet Urban district of Hampshire It is 36 m from London, on the S Ry

Fleet Pond, covering nearly 100 acres, is one of the largest sheets of water in the S of England At Church Crookham 2 m away, tobacco is grown Pop (1931) 4528

Fleetwood Seaport, watering place and urban district of Lancashire It stands at the mouth of the River Wyre, 9 m from Blackpool, and is served by the L M S Ry There is a good harbour and large docks, the property of the L M S Ry Co from which steamers ply to the Isle of Man and elsewhere It is also a fishing centre and there is a fine promenade Pop (1931) 22,983

Fleming Marjorie Scottish child in materalised by Sir Walter Scott. She only lived for eight years, 1803 to 1811, but during that time she showed remarkable precocity She read a good deal and wrote poems and diaries Sir Walter Scott saw her at the house of his aunt, Mrs Keith of Ravelston, and took a great interest in her Dr John Brown in *Horae Subsecivae* wrote about her, and her life was written by H B Farnie It is called *Pet Marjorie*

Fleming Sir Sandford Canadian engineer He was born at Kirkcaldy Fifeshire, on Jan 7, 1827, and went to Canada as a youth He took an important part in the preliminary survey for a Canadian transcontinental railway, and later, in the establishment of a cable between Canada and Australia He was largely responsible for the introduction of unified time reckoning, or standard time (g.r.), throughout the world Died July 22, 1915

Flemings Name used for the inhabitants of Flanders (g.r.) Many of them settled in England at various times especially in the eastern counties They brought with them the weaving industry, and there are evidences of their activities at Dedham and elsewhere in Essex and the adjacent counties In the 12th century Henry I settled some of them in Pembrokeshire and that neighbourhood, but they were disliked and often attacked by the Welsh

To day Belgium is inhabited by Flemings, who speak Dutch and inhabit Flanders and other parts in the north west of the country, and Walloons who speak French and live in the south-east

Flensburg Seaport of Germany It stands on Flensburg Fjord in Slesvig, 23 m from the town of that name Founded in the 12th century, it has several buildings of historic interest It is a flourishing port with a good harbour and its industries are chiefly connected with shipping

Flensburg was Danish until 1864 when it was taken by Prussia who kept it after a plebiscite in 1919 Pop 70,000

Fletcher Word meaning a maker of arrows One of the London livery companies is called the Fletchers This was united with that of the bowyers or makers of bows The offices are at 4 Broad Street Place, London EC 2

Fletcher Giles and Phineas English poets Phineas, the elder brother, was born in 1582 and his most important work is *The Purple Island* (1633) a Spenserian allegory The poetry of Giles is religious in character His epic *Christ a Victor* and *Triumph* (1610) influenced Milton Giles died in 1623 and Phineas in 1650

Fletcher John English poet and dramatist Son of Rev Richard

Fletcher Bishop of London, he was born at Rye, in 1579, and was probably educated at Cambridge. Being left without means he, in collaboration with Francis Beaumont, took to writing for the stage. *The Maid's Tragedy*, *Philaster*, *King and No King*, and many others were produced under their joint authorship, whilst the pastoral drama, *The Faithful Shepherdess*, was the production of Fletcher alone. He collaborated also with Massinger, Rowley and other dramatists and died of the plague in the summer of 1625. He is buried in the cathedral at Southwark.

Fletton District of Northamptonshire and Huntingdonshire. Some part of it is within the city of Peterborough, but another forms the urban district of Old Fletton. Pop. (1931) 7480. The district is famed for its enormous brickfields from which the popular Fletton brick is obtained.

Fleur-de-lis French royal symbol. Presumably representing a lily or white iris, it was called by Shakespeare the flower-de-luce. It is traceable in Egyptian, Etruscan, Roman and Indian ornament, and was adopted by Louis as the royal ensign of France about 1147, being represented in gold on azure, scattered over the shield. The number of lilies was reduced to three about 1376. It appeared on the arms of England in royal coats of arms from Edward I. onwards, disappearing therefrom in 1801.

Fleury André Hercule de. French statesman. Born at Lodève, June 22, 1653, he was appointed chaplain to Louis XIV. and became Bishop of Fréjus in 1698. He was appointed tutor to the boy who afterwards became Louis XV. in 1715, and in 1726, at the age of 73, Fleury succeeded the Duke de Bourbon as Prime Minister, and soon after was appointed cardinal. He died Jan. 29, 1743.

Flight Navigation of the air. Human flight, the study of which is termed aeronautics, is a development of modern times. The solution of the many problems of flight are dependent upon meteorology for knowledge of atmospheric conditions, engineering experience, the study of physics, and the effect of air upon fuel combustion. With Langley's early studies of the flight of flat surfaces and Lillenthal's experiments with curved surfaces, gliders came into being, and the development of the internal combustion engine made possible the aeroplane and airship. See AERONAUTICS, GLIDER.

Flight Lieutenant Officer of the Royal Air Force. He ranks above a flying officer or observer and below a squadron leader. The equivalent rank in the navy is lieutenant, and in the army captain.

Flinders Matthew. English sailor. Born March 16, 1774, in Lincolnshire, the son of a surgeon, he joined the navy in 1790. From 1795-99, he was in Australasian waters, where he carried out numerous explorations, made surveys, and circumnavigated Tasmania. Sent in 1801 in *The Investigator* to explore the Australian coast, he was wrecked on his voyage home, and falling into the hands of the French, was imprisoned by them for six years in Mauritius. In 1810 he was released. He died July 19, 1814, after publishing an account of his voyages.

A river in Queensland, 220 m. long, is named after Flinders. It falls into the Gulf of Carpentaria.

Flint Crystalline mineral mainly of silica. More opaque and less lustrous than chalcodony, it is dark grey or dark brown in colour, breaks with a shell-like fracture, and occurs in nodules, tabular masses and veins. In the chalk formations of Britain and W. Europe. Flint was employed for walls and buildings in mediaeval times and there is much flint in the old churches of the eastern counties of England. Because of its readiness to pulverise, it is utilised in pottery and flint glass manufacture. Fire making by striking flint with iron pyrites, an important neolithic discovery, was long used. The artificial flaking of flints by sharp blows of hammer stones, which may have originated in Africa, led to the invention of flint implements, which during the Stone Age laid the foundations of human progress.

Flint Borough and market town of Flintshire. It stands on the estuary of the Dee, 12 m. from Chester, on the L.M.S. Rly. Before the estuary was closed by sand it was an important seaport. There are chemical works and other industries, and near are coal mines. Here is the castle which was built by Edward I. and is now public property. Flint was at one time the county town. Pop. (1931) 7635.

Flint Lock Kind of firearm also known as firelock. It was in use in the 17th century and was fired by means of a mechanism in which a piece of flint was struck upon a steel face, producing a number of sparks. A lighter form of flint lock was termed a fusil, hence the name fusilier applied to soldiers armed with this weapon. The use of flint locks continued until the middle of the 19th century, when they were superseded by the adoption of the percussion cap.

Flintshire County of Wales. In the north of the country the main part lies between the estuary of the Dee and Denbighshire. A small detached portion lies between Denbighshire and England. There are hills in the county which only covers 255 sq. m. Coal and lead are mined. The rivers Dee and Clwyd flow through it and it is served by the L.M.S. Rly. Mold is the county town, other places are Rhyl, Flint, Holywell, Buckley and Connah's Quay. Pop. (1931) 112,849.

Floating Debt Name given to that part of the national debt which is not funded or converted into consols, war loan, etc. It consists of exchequer bonds, treasury bonds, savings certificates, etc.

Flock Stuffing used for chairs, beds, and other articles. It is usually material which is thrown off in the process of manufacturing woollen cloth, or is made by pulling woollen cloth to pieces. By a law passed in 1911 flock must reach a certain standard of cleanliness or its manufacturers can be prosecuted.

Also used for a herd of sheep, goats, geese or other animals and birds. A flock book is a book which records the pedigrees of pure bred sheep. Thor are kept by the societies which exist to assist the breeding of the different kinds of sheep and fulfil a similar purpose to the stud books of the stables.

Flodden One of the Cheviot Hills. It is 3 m. from Coldstream and near the Till. A battle was fought here between the English and the Scots Sept. 9, 1513. After a fierce fight the English under the Earl of Surrey gained a great victory, James IV. and his bodyguard of nobles being among the slain. Flodden was long regarded as one of

the most disastrous days in the history of Scotland. It was the theme of much poetry, and Scott describes it in *Marmion*.

Flood Inundation of low lying land. Generally caused by an overflow of water from a river, it is due to excessive rainfall or the melting of snow and ice on the mountains. In the case of great rivers such as the Mississippi, Hoang ho and Nile floods have played an important part in modifying the surface features of the surrounding areas. As a result deltas and fertile flood plains have been formed and in some cases the river has made new channels and mouths. The great flood which is recorded in the Bible is usually called the deluge (q v).

Flood Lighting Lighting of the exterior of a building generally by powerful, concealed electric lights. It was first introduced in New York where many large buildings were illuminated at night in this way. In 1931 experiments in flood lighting were tried in England, notably on the Houses of Parliament and other buildings in London and the castle at Rochester. In Sept., 1931, there was a great display of flood lighting on London buildings in connection with the meeting of the International Illumination Congress.

Floquet Charles Thomas French statesman. Born Oct. 2, 1828. He was deputy for the Seine in the National Assembly of 1871, and in the same year was imprisoned for his Communist sympathies. In 1876 as a radical republican he entered the Chamber of Deputies and was President of the Chamber from 1885 to 1886. In 1888-89 he was Premier, during which time he fought a duel with Boulanger. In 1892, being involved in the Panama scandal, he resigned. He died Jan. 18, 1896.

Flora In Roman mythology a flower goddess. A temple was erected for her worship near the Circus Maximus in Rome, and an annual festival called Floralia lasting from 28th April to 1st May, was held in her honour.

Flora Term used collectively for all the plant life of a given geographical region or geological period, or its enumeration. It corresponds to fauna as designating the animal life.

Florence City of Italy. It stands about the centre of the country, on both banks of the Arno, 15 m. from the coast and is connected by railway with the other cities of Italy. The Italians call it Firenze and it ranks as one of the most interesting cities of their land and indeed of the world being full of wonderful buildings and adorned as few other cities are with priceless works of art. It is intimately associated with Dante, Boccaccio and Machiavelli as it is with Michelangelo and others of the world's greatest painters and sculptors and owes much to the generosity of the Medici family.

BUILDINGS AND INSTITUTIONS The buildings include the great Duomo or cathedral with its towering dome, in which Savonarola preached, and adjacent to it are the campanile by Giotto and the Baptistery with its wonderful bronze gates. In the church of San Lorenzo are Michelangelo's statues of Day and Night. This church was the burial place of the Medicei. Many sons of Florence lie in Santa Croce the city's mausoleum. Other churches include the Annunciation, San Spirito, Santa Maria Novella, Santa Maria del Carmine, San Michele

and San Miniato. Of the many palaces that of the Medici is used for public purposes. In the Pitti and the Uffizi palaces are two of the greatest collections of pictures in the world.

Another collection is in the Academy. The Strozzi and the Corsini palaces may also be mentioned. Florence contains four great libraries, each rich in books and manuscripts of immense value. One is the national library and another, the Laurentian was once the library of the Medici.

Other buildings that may be mentioned are the Palazzo Vecchio and the Bargello. The hall of Del Lanzi contains Benvenuto Cellini's Perseus in the monastery of S. Mark, as associated with Savonarola are frescoes by Fra Angelico. The Ponte Vecchio immortalised by Dante, still crosses the river and there are several modern bridges. There are remains of the old Roman city in the shape of an amphitheatre and baths. The university was founded in 1224.

The walls of Florence have been pulled down and modern suburbs erected beyond the old city. There are some industries including shipping along the river but the city is chiefly a centre of culture. Art students study here and it is a centre for tourists.

HISTORY Florence was a Roman city and later a town in the district called Tuscan. As the citizens became rich by trading they began to rule over the people around them, and after 1250 Florence was an independent and powerful city. It was disturbed by the struggle between the Guelphs and Ghibellines but after a time the former gained the upper hand. Great prosperity followed and soon Florence was ruling over most of Tuscany, whilst, by conquering Pisa in 1406, her traders were in possession of that seaport.

During these years the citizens of the republic had provided themselves with a constitution, under which the city was governed, which lasted until the 15th century, when the rich family of the Medici (q v) became masters of Florence. Their wealth and influence helped them to maintain this position although there were continual risings against them and for some years they were in exile. The republic was restored in 1494 but in 1512 the Medicei returned and with Spanish help overthrew it. In 1560 Cosimo de' Medici made himself Grand Duke of Tuscany, and Florence remained the capital of the grand duchy until 1860, when it was included in the Kingdom of Italy. In 1737 the Medici family had become extinct and from then until 1860 Tuscany, with Florence, except for a short period during the Napoleonic Wars, was a possession of Austria. From 1865-71, Florence was made the capital of Italy. It has a broadcasting station (500.8 M 20 kW). Pop. (1931) 316,286.

Florentium Another name for the more ancient name usually called *Fluminis* (q v).

Flores Name of two islands. One is in the Azores, being the most westerly of the group. Santa Cruz is the capital. Near here Sir Richard (renville, in the *Revenge* in 1591, fought his famous action with some Spanish ships. Pop. 8200.

The other Flores is in the Dutch East Indies. Situated south of Celebes, midway between Java and Timor of which it is a dependency, it occupies 8870 sq m. The surface of this island is hilly and there are volcanic peaks as high as 9000 ft. Cotton rubber and ponies are raised by the Malays on

the coast and jungle produce by the inland Papuans. The capital is Larantuka. Pop 250,000

Floret In botany, the small flowers forming the inflorescence of composite plants. The florets are arranged upon a flattened or convex disc surrounded by an involucre of bracts, and may be all alike, as in the dandelion, or different in form and colour, as in the daisy.

Florida State of the United States. In the extreme S.E. of the country, it consists mainly of a peninsula, between the Atlantic Ocean and the Gulf of Mexico. It covers 58,666 sq. m. and Tallahassee is the capital, although Jacksonville and Tampa are much larger. Agriculture is the chief industry, and rice, cotton, tobacco and tropical fruits are grown. Much of the state is forest land and the timber reserves are valuable. There are also fisheries and along the extensive coastline are many watering places including Miami, the largest city in the state. In the south is the swampy region called the Everglades and the great lake Okechobee.

Florida was discovered on May 27, 1513, by a Spanish seaman. In 1763 it was handed over to Britain, but in 1781 was returned to Spain. In 1819 it was bought by the United States, becoming a state in 1845. It is governed by a legislature of two houses and sends five representatives to the House of Representatives at Washington. Pop (1930) 1,465,211, about a third of whom are negroes.

Florida Strait separates Florida from Cuba, and the Bahamas, it is 300 m. long. Part of the Gulf of Mexico is called Florida Bay. Florida Keys are reefs off the south coast.

Florin Name of a silver coin. It originated in Florence, where a gold florin was struck in 1252. Other states coined florins, and in 1343 one was coined in England, this being a gold florin for 6s. It was soon withdrawn. In England the silver florin worth 2s. was introduced in 1849 and has since been in general use. A double florin is occasionally seen. In the Netherlands the silver florin has become the guilder.

Flotilla Name, meaning little fleet, given to a group of destroyers or submarines under a single command. Other small warships are also organised in flotillas. Destroyers in the British Navy are now grouped in flotillas of eight and the one which carries the captain, or commander, is called the flotilla leader.

Flounder Small flatfish (*Pleuronectes flesus*) allied to the plaice. It is also called the fluke. It inhabits N. European coasts from the British Channel to Iceland, dwelling in river waters and descending to the sea to breed. It rarely exceeds 12 in. in length and 14 lb. in weight. In America, various larger flatfish are called flounders.

Flour Term denoting especially the ground contents of the wheat seed. Similar meals from other grasses and from non-cereal plants usually bear qualifying or variant names, e.g., cornflour, oatmeal and arrowroot. The wheat kernel, which is nine tenths of the seed, the remainder being skin and germ, consists of starchy matters (73.5 per cent), gluten and other proteins (11 per cent), fats and minerals (3.5 per cent) and water (12 per cent). Besides its use in breadmaking, flour is used in several industries, calico printing, etc.

Wheat was formerly ground by hand and later in a mill between great stones, operated by wind or water, hence the name flour miller. Steam power was first employed in 1784, and in 1837 iron rollers were introduced in the place of mill stones and it is now prepared in great roller mills. A bag of flour consists of 140 lb. See WHEAT.

Flower Part of a plant containing the reproductive organs. It is composed, in its most complete form, of four distinct whorls of modified leaves. (1) The outer whorl or calyx, which forms the unopened bud, consists of sepals, usually green. (2) The corolla consists of petals, often coloured and sometimes forming a tube, their length, form and odour being adapted to assist insect fertilisation, sometimes, as in the crocus, sepals and petals are alike, and together form a perianth. (3) The stamens, which bear pollen grains, or male cells, in anthers, mounted on filaments. (4) The pistils, in which ovaries, or female cells, in ovaries are surmounted by stigmas mounted on styles. Sepals, petals or both are absent in some flowers, but stamens and pistils are essential to reproduction, although in some cases, e.g., the willow, each plant bears flowers of one sex only.

What is known as the language of flowers is the attribution of certain sentiments to certain flowers according to a pre-arranged code. In the 19th century booklets expounding these were popular in England.

Fluke Order of sucker-bearing parasitic worms, whose cysts resemble flukes or flounders. The common or liver fluke, *fasciola hepatica*, passes its adult life in the livers of sheep, producing an incurable rot. The eggs, passing out in the dung, hatch into embryos which penetrate a freshwater snail, *limnaca truncatula*. After further development, they leave the snail and attach themselves to grass, forming cysts which, when swallowed by sheep repeat the life history. Another fluke causes the human disease bilharziosis.

Fluorine Gaseous element. It occurs in the minerals fluorspar and erveitite, also in bone and the enamel of teeth. It is greenish in colour, and has a powerful action on all metals and most other substances. Its principal compound is hydrofluoric acid. It was first isolated in 1886. Its atomic weight is 19, atomic number 9 and symbol F.

Fluorspar Mineral consisting of fluorine and calcium. It occurs in veins or lodes and is often associated with lead ore. It is either colourless, or yellow, blue, green or violet in colour and is used as a flux, an etching agent, or for making cheap jewellery. In Derbyshire it is known as Blue-John and is used for ornaments.

Flushing Seaport and watering place of the Netherlands. It stands at the mouth of the Scheldt, on the island of Walcheren. Its chief importance is as a port for cross-channel services. There are ship-building yards and in former days it was a station of the Dutch Navy. Pop (1932) 21,755.

Flute Musical wind instrument consisting of a cylindrical tube of metal or wood. Into this the player blows through a hole near the top. Other holes, stopped by the fingers, or keys worked by the fingers, vary the air pressure and so make music.

Fluting In architecture the parallel channels or grooves on a column. They are separated from each other by filets. In Greek architecture definite laws governed

the number and depths of the fluting. On the Doric columns there were 20 shallow ovoid flutes and on the Ionic the flutes were semi-circular and 24 in number.

Flux Metallurgical term for a substance which assists in the reduction of an ore to the metallic state. The flux is added to the charge of ore for the purpose of combining with the earthy matter present and forming a fusible compound, or slag. The principal fluxes are carbonate of soda, which forms a slag with silica, borax which combines with lime and iron oxides, oxidising agents such as nitre and litharge and reducing agents such as charcoal.

Fly Name widely used, with or without prefix, for the winged state of many insects of various orders. Apart from butterflies, dragon flies, may flies and caddis flies, they pertain mostly to the two winged order, *Diptera*, and include crane flies, house flies, bot flies, mosquitos, tsetse flies, etc. The mouth parts form a proboscis for piercing and sucking. Some flies are blood suckers, many others owe their troublesome character to their destructive maggot stage in some the larvae are parasitic, in some aquatic. Of widespread importance are the Hessian fly, forest fly, horse fly and window fly. The cosmopolitan house fly, *Musca domestica*, is a disease carrier, and because of its rapid breeding under insanitary conditions, a dangerous pest. See *DIPTERA*.

Flycatcher Large family of small insectivorous perching birds. They pursue their prey on the wing, and abound in the tropical regions of the world. The spotted fly-catcher, *Muscicapa grisola*, is a summer visitant to Britain. The pied, *M. atricapilla*, which arrives in spring is found in woods. The paradise fly catchers of E Asia have brilliant plumage.

Fly Fishing Form of fishing in which flies, usually artificial, are used as bait. These are made to look as much like a real fly as possible. They may be used in two ways. In dry fly fishing the fly floats on the surface of the water, in wet fly fishing it is immersed. The casting or throwing of the fly is important. Trout are usually fished with the fly. The Fly Fishers' Club is at 36 Piccadilly London W 1.

Flying Boat Large seaplane having a boat shaped body which gives it buoyancy on the water and affords space for the pilot, passengers and cargo. As in the ordinary seaplane its engine and screw are placed high up on the boat. Flying boats are specially adapted for coast work and for long distances over seas. The German Dornier "X" has 12 engines and carries 150 passengers, as well as a light cargo, and the American Glenn Martin clipper ship, built to provide the utmost comfort, can attain a speed of 180 m.p.h. and cover 3000 miles without refuelling.

In Great Britain the air ministry has several squadrons of flying boats, examples being the Southampton and the Iris. The 1935 36 air programme maintains a strength of 8 squadrons of flying boats.

Flying Buttress Form of external buttress, characteristic of Gothic architecture. In form a half arch. It was used to join the outer buttress with the wall of the nave, thus resisting the thrust of the central part of the roof, and was usually built in stages and finished with pinnacles.

Flying Corps Royal British organization which existed from 1912 to 1918. It was formed, when air warfare became a possibility, as a branch of the army. In 1914 its strength was about 2000 men, but it expanded enormously during the World War, when it took part in the fighting in all areas of military operations and, in co-operation with the navy, was responsible for the defence of Britain from air attacks. In April, 1918, it became part of the Royal Air Force.

Flying Dutchman Name given to a phantom ship. It was said to haunt the southern coasts of Africa and sailors believed that seeing it meant impending disaster. It was said to be a doomed ship moving continuously over the seas as a punishment for acts of cruelty committed by the captain, Vanderdecken, and the crew. Wagner wrote an opera on the subject, and Douglas Jerrold a play.

Flying Fish Name denoting two genera of tropical and subtropical marine fishes. The two genera include the flying herrings, *Exocoetus*, and flying gurnards, *Dactylopterus*. Their long pectoral fins, acting when distended as parafoils rather than as wings sustain them in the air against the wind, sometimes for 500 ft. They fly to escape the attacks of coryphææ and other predatory fishes.

Flying Fox Popular name of a genus of night flying fruit bats (*Pteropus*). Occupying the tropics of the old world, the largest is the Javanese halong, *P. edulis*, which possesses a wing spread of 4 or 6 ft., others, in India and Queensland, inflict enormous damage to gardens. They slumber head downward, clinging by thousands to a single tree.

Flying Lemur See *LEMUR*.

Flying Squid Widespread genus of small cuttle fishes (*ommas trephes*). They are especially common in the warmer seas of the world. Long and tapering, they leap, by means of their large lateral fins high out of the water, sometimes falling on the decks of ships. The sea arrow (*O. sagittatus*), frequent in Scottish waters, is a common food bait off Newfoundland, and an important food of sperm whales. The fish may be as much as 4 ft. in length.

Flying Squirrel See *SQUIRREL*.

Flywheel Large heavy wheel mounted on a shaft. Its function is to equalise the motion of machinery. In a single cylinder engine a fly wheel is mounted on the crank shaft so that its momentum assists the crank over the dead centres when the piston is at either end of its stroke. It also tends to give a more uniform motion. Some fly wheels are of great size, up to 24 ft. in diameter and 120 tons in weight.

For use on motor vehicles a "fluid" flywheel has been invented. It consists of two main parts made of aluminium, one of which forms the driving member and the other the driven member. With it a driver can start his car from rest and drive on the level, with or without traffic checks, without using the clutch pedal or the gear lever to bring the car to rest with the engine still running.

Foch Ferdinand French soldier. Born at Foch-Turcs Oct. 2 1851, he was the son of a civil servant. On the outbreak of war in

1870 he joined the army. In 1878 he was made a captain of artillery and was soon engaged on staff work. In 1894 he was appointed Professor of Military History at the Staff College, and there he made a reputation by his lectures, which have been translated into English as *The Conduct of War* and *The Principles of War*. In 1901 he was given command of a regiment and in 1905 became chief of the staff of an army corps. From 1907-11 he was head of the staff college (*Ecole de Guerre*), in 1911 he was selected to command a division and in 1912 an army corps.

When the Great War began Foch was in command of the 20th corps at Nancy and helped to defend that city until he was put at the head of the 9th army, which, under him, had a great share in the victory of the Marne (Sept., 1914). He then exercised general control over a group of armies and was prominent in directing the operations on the Somme in July, 1916. A little later, in Sept., being 65 years of age, he retired, but in May 1917 returned as chief of the staff to the new generalissimo Pétain. In the following March, after the British disaster of that month, he was appointed generalissimo of all the armies on the western front, French, British, American and Belgian. In that capacity he controlled the movements of the final advance and received the German envoys when an armistice was requested. In 1918 he was made a marshal and later in the year was declared to have "deserved well of his country."

Foch was a prominent figure in the negotiations for peace, but gradually he retired from public life. He wrote a book on the war, published just before his death, March 20, 1929. He was buried in the Invalides and there are memorials to him in several places.

Fochabers Village of Morayshire. It stands on the Spey, 8 m. from Elgin, and is visited for the fishing and scenery around. Near is Gordon Castle, the seat of the Duke of Richmond.

Fog Atmospheric condition of low lying cloud or thick mist. It is due to the presence of dust particles around which is deposited a film of water when the temperature falls suddenly below dew point. These drops, in the absence of wind, may remain in suspension for a long time and thus form the white fogs of the countryside and the dense black fogs of large towns where sooty particles predominate. Over the sea a current of warm air passing over a cooler layer, or over icy waters, causes condensation to occur resulting in thick fogs, as off Newfoundland.

Foggia City of Italy. It is a railway junction, 78 m. from Naples, and a commercial and agricultural town. The chief building is the cathedral. Pop (1931) 57,232.

Foghorn Apparatus for producing a loud noise as a warning at sea during a fog or as a signal on shore. Many types are in use, from the simple mouth foghorn to those worked by hand or the powerful sirens worked by compressed air. Coast fog signals vary much in character from reedhorns to large sirens installed on dangerous parts of the coast. Sailing vessels and those in tow are required to sound their foghorns at intervals of one minute during a fog.

Föhn Dry warm wind experienced in the eastern Alps. It blows down the mountain valleys, its warmth being due to the increasing pressure and consequent rise in

temperature as it descends from a high altitude. As the snow rapidly melts when the Föhn is blowing, it is of great value to agriculture in these regions.

Foil Thin sheet metal. It is obtained by rolling certain malleable metals, especially tin, aluminium, copper and silver. Tinfoil may vary in thickness up to 1/100th of an inch and is used extensively as a wrapping material for tobacco, chocolates and foodstuffs, or as box linings and for electrical apparatus. Aluminium foil is also used for wrapping, and tinsel, a tin or copper alloy, is employed by jewellers. Copper foil in varying thicknesses is used in repoussé and other metal work.

The word is also the name given to a light sword used in fencing. This has a guard on the hilt and a flexible four-sided steel blade, the point of which is protected by a button.

Fokker Antoine Herman Gerard Dutch engineer. Born at Kedri, Dutch East Indies, April 6, 1890, he was educated at Haarlem, Holland, and at the age of 20 went to Germany, where he started his aeronautical career, becoming known as a pioneer of aviation. He put up factories and built aeroplanes that were used by the German army in the Great War, after which he erected the Fokker Aircraft works in Holland and other factories in Madrid and New Jersey.

Foleshill District of Warwickshire. It is 3 m. from Coventry, of which it is practically a suburb. It is the centre of a rural district with a population of over 33,000.

Folio Book of the largest size, comprising sheets of paper folded once. If folded again the sheets would become quarto, and so on. The term designates also the numbered page of a book or manuscript. Shakespeare's works were printed in folio volumes, hence the phrase, *first folio*. In law writing a folio comprises 72 words, in parliamentary and chancery documents 90, in the USA 100.

Folkestone Borough, seaport and watering place of Kent. It stands on the English Channel, 71 m. from London, with stations on the S. Ry. There is a large harbor for cross channel traffic and near it is the fish market.

The new town has been built on the cliffs in front are the Leas, a fine promenade about 2 m. long, along which are hotels and houses. Radnor Park is an open space and near the town is the Warren, a large expanse of open land. Races are held here regularly and an annual cricket festival is held in September. A road of remembrance leading to the harbour forms the town's war memorial. Much of the land belongs to the Earl of Radnor, whose eldest son is called Viscount Folkestone. Pop (1931) 35,590.

Folk-dancing Dancing uninfluenced by urban or professional tendencies. The term has loosely become synonymous with country dancing. It may be classed under two heads: (1) social, when it is danced purely as a pastime by all; (2) ceremonial, when performed by selected performers to mark a definite occasion.

Folkland In early England land held from the king according to the custom of the folk or people. Sometimes the king made grants of land in a book or charter and this was called hocland. At one time it was believed that folkland was common land, but scholars no longer hold this view.

Folklore Traditional learning of backward people. The term was invented in 1846 by W. J. Thoms to designate popular antiquities and in 1878 the Folklore Society was established in London. Folklore deals with the beliefs and customs, stories and songs, art and ritual, of early and uncultured people, and much work has been done in tracing their origins, resemblances and distribution. The most elaborate work of this kind is *The Golden Bough* of Sir James Frazer.

Folk-Song Vocal and instrumental music originating among the uncultured classes. It is usually based on local legends or incidents of common life and may comprise a simple melody in one or other of the diatonic modes. The English Folk-Song Society, founded in 1898, has recorded several thousand authentic folk songs.

Folly In a particular sense a building erected for no definite purpose. There are several examples in England, such as Allen's Folly, also called Sham Castle, near Bath, built in 1760 by Ralph Allen.

The Follies was the name taken by a group of burlesque actors, under H. G. Plessier, who were very successful when they appeared in London between 1807 and 1812.

Fomentation Application of warmth to the body's surface. It may be employed to soothe pain or to hasten the formation of pus in localised inflammations. For hot fomentations flannel, lint, and similar materials are wrung out in hot water and applied under protective waterproof coverings, medicaments, e.g., turpentine and laudanum may assist. Dry fomentations comprise warmed flannels or bags of warmed salt or bran.

Font Basin used in a church for the ceremony of baptism. It is constructed usually of stone or marble and is sometimes placed in a special part of the building. In the early Christian churches it was in a separate baptistry, octagonal or circular in form adjoining the basilica the font taking the form of a tank for immersion. The earliest of these is the Baptistry of Constantine in Rome. There are fine Norman fonts in some of the old churches of England.

Fontainebleau Town and forest of France. The town is 37 m. from Paris and quite near the Seine. There are some industries, but the interest of the place centres in the magnificent palace which was built by Francis I and improved and beautified by later kings. In it Napoleon abdicated in 1814. Externally it is a wonderful piece of architecture whilst internally are some magnificent apartments and priceless paintings, tapestries and other works of art. The gardens also are beautiful.

The Forest of Fontainebleau, a popular pleasure resort, covers over 40,000 acres and is a region of great natural loveliness.

Fontenoy Village of Belgium. It is about 5 m. from Tournai and is famous for the battle fought here on May 11, 1745. The French under Marshal Saxe were attacked by a British force under the Duke of Cumberland, who had also Hanoverian and Dutch soldiers in his army. After a stubborn fight the British and their allies were forced to retreat, their square having been broken. A brigade of Irish contributed much to the French success.

Fontevrault Town of France. It is 10 m. from Saumur and being part of Anjou, was long an English possession. A great Benedictine abbey existed from 1100 to about 1800. In its church are the tombs of Henry II, Richard I and Matilda the wife of the one and the mother of the other. These were only discovered when the edifice was being restored in 1910. Pop. 2200.

Fonthill Village of Wiltshire. It is near Hindon and is known for its association with William Beckford. Here, on the site of an abbey, he built a magnificent house. It was pulled down, but in the 18th century the 2nd Marquess of Westminster built another, which has now passed out of his family.

Foochow Port of China. It stands on the River Min about 36 m. from its mouth, and is a treaty port. On the island of Nan tai is the European quarter, which is reached by a bridge remarkable for its age and construction. The industries are chiefly connected with shipping for which there are extensive docks and there is a dockyard for the Chinese navy. The older part of the city is still surrounded by walls. Foochow is the capital of the province of Fukien. Pop. (1931) 229,723.

Food That which nourishes the body of man and other members of the animal world. Each animal, using the word to include all forms of animal life, e.g., birds, fish and insects, has its own kind of food, much of it consisting of the bodies of animals weaker than itself.

Man's food may be divided into two classes: the flesh of animals and the produce of the soil. Certain animals are eaten, whilst certain others are not, the reason for the distinction being not always clear although generally man does not eat meat eating animals or birds.

To day, except for certain fruits nearly all the food eaten by man is cooked or prepared in some way. Artificial foods as they are called, have grown greatly in favour and some think modern society owes some of its ailments to this fact.

The nature of man's food differs to a considerable extent according to the climate. In general, those who live in cold latitudes require more food, especially that containing fat than do those in warmer regions.

The invention of refrigerators has enabled meat to be kept for long periods. Improved methods of treating the soil, especially with artificial fertilizers and new strains of plants have increased output. Wheat, a staple food in the west, can now be grown in regions hitherto regarded as too cold for it and in other ways great additions have been made to the food resources actual and potential of the world and have thus lessened the danger of famine.

So far has this gone that, in 1931, an international conference was held with a view to reducing the acreage under wheat and it is much the same with other primary foods.

DIET The essentials of a proper diet are that it should provide for growth and the replacement of waste that it should furnish the heat and energy required by the body, and also a measure of stimulation to metabolism and to the functions of the alimentary tract. Analysis shows that foods are made up of certain constituents, namely, proteins or nitrogenous substances, carbohydrates, fats, salts, vitamins and water.

The proteins, of which white of egg and lean meat are examples, together with mineral matter and water, make good the loss of tissue due to the wear and tear of living. They also go to the making of the secretions of the body. The daily amount of tissue waste in an adult person is not very great, and hard work makes no appreciable difference, because energy is derived from other kinds of foodstuffs. A growing person, on the other hand, requires a liberal allowance of proteins. These substances are contained in flesh, fish and fowl and also in wheat and other vegetable foods, but those of animal origin have, in addition, a certain dynamic quality which explains the craving for animal food in cold climates and the lessened inclination for it among dwellers in temperate climates during the hotter weather. Another advantage of flesh foods is that they present their proteins in a concentrated and easily digested form.

Proteins also furnish a certain amount of heat and energy, but the proper sources of most of our requirements of these are carbohydrates and fats. If more protein is taken than is required for growth and repair, more energy will certainly be provided, but the body will be taxed to dispose of much that is not otherwise utilised, there will be an excess of ash, as it were, for the fuel consumed, whereas fats and carbohydrates produce no ash.

The amount of heat, and incidentally of energy since heat and energy are convertible into one another, furnished to the body by fixed amounts of protein, fat and carbohydrate, can be estimated by chemical processes. The amount of heat is calculated according to a unit known as a calorie or, as is usual when dealing with foodstuffs, a large, or kilo-calorie (=1000 calories).

The mineral matter in foodstuffs include salts of iron, calcium, magnesium, sodium and potassium, which are necessary in tissue building or, in various ways, in the chemical processes which go on in the body. Iron is a necessary constituent of the red blood corpuscles for example, while sodium chloride is a constituent of blood, etc., and the source of hydrochloric acid in the gastric juice.

REGULATIONS AND CONTROL In Great Britain and other civilised countries steps are taken to see that the food sold in the shops is pure. Laws were passed forbidding the sale of diseased and unsound food, but with the great increase in the sale of manufactured foods, something more was necessary. Other laws, therefore, lay down that such foods as cream and margarine must be of a certain standard of purity. In other words, food must not be mixed beyond certain prescribed percentages, with something of inferior quality. A system of marking has been ordered so that people know what they are buying. These laws are actively enforced in each county, city or other district by inspectors who have power to visit shops and to take samples which are analysed and, if found to be adulterated, their vendors are prosecuted. In Great Britain the system of marking foods has been used since the Great War for quite another purpose, that of encouraging the sale of Empire produce.

The World War brought about a great shortage of food and in the belligerent countries steps were taken to ration it. In Germany and Austria the shortage was very acute and rationing was introduced early in the struggle. In 1917 a system of food control was set up in Great Britain. The amount of certain essential foodstuffs, such as meat, sugar and butter was

limited, each person being provided with a card, without which these could not be bought. The system was under a food controller who had representatives in every town. The office became the Ministry of Food and lasted until March, 1921. The shortage was most acute in the early part of 1918 and was partly due to the action of German submarines.

In a modified way the control over food was soon renewed. Complaints of high prices charged for food were so prevalent and the disparity between the price obtained by the producer and that charged to the consumer was so marked, that a food council was set up to investigate the reasons for what appeared to be abnormal rises in prices for foodstuffs.

Fool In olden days a jester, but now a person without sense. Kings and noblemen had fools at their courts who were expected to amuse them and their guests by their tricks and sayings. The fool wore a special dress and carried a stick with a bladder at the end of it. There are many references to fools of this kind in literature, instances being Touchstone in Shakespeare's *As You Like It* and the fool in *Ivanhoe*. The keeping of fools died out in the 17th century. In the Middle Ages one of the recognised feasts was called the Feast of Fools.

Foolscap Conical cap, or hood, curved like a cockcomb and decorated with bells, formerly worn by fools or jesters. The name is also used for folio paper, 13 by 17 in., sometimes slightly smaller, for which the old paper makers used a watermark of a fool's cap and bells.

Foot That portion of the lower limb below the ankle joint. It contains 26 bones, 7 forming the tarsus, corresponding to the wrist, 5 the metatarsus, or sole of the foot, corresponding to the palm, and 14 are phalanges. The tarsus includes the calcaneum or heel bone and the astragalus, supporting the leg bone. The foot is arched between heel and metatarsus. Club foot is a deformity which prevents heel and toe from simultaneous contact with the ground. See **FLAT FOOT**.

FEET, SORE The causes are corns, bunions, blisters, in growing nails, falling arch, etc., all of which can be relieved by proper care and attention.

Corns—bony growths occurring on the toes or soles of the feet—should be removed by the application of a plaster, or by soaking in hot water with bath salts or common washing soda, and then paring with a sharp instrument.

Bunions (inflamed swelling of the bursa over the large joint of the big toe) may be relieved by applying hot fomentations. Bunions are caused by wearing tight, pointed shoes, the inner side of the shoe should be straight, allowing the big toe to lie in its natural position.

Blisters should be punctured near the edge with a sharp, sterilised instrument such as a needle, and when the fluid has run out boracic ointment or lint should be applied and the part covered with a dressing. Feet which blister easily may be hardened by adding methylated spirits to the water in which they are bathed.

In-growing Toe-nails should be treated by a chiropodist if they are bad, but slight tendency may be corrected by cutting the nails straight across, and then cutting a small v from the centre.

Falling Arch, engendered by too much standing—a doctor must be consulted and a support worn inside the shoe.

All foot soreness and tiredness is relieved by frequent bathing in hot water with bath salts, resting with the feet up, fresh stockings daily, the wearing of sensible shoes which fit the foot, are not too heavy and have a good sole and moderate heel. Boracic powder shaken inside the sock or stocking is found to be beneficial where much walking is necessary. See also FLAT FOOT

Foot-and-Mouth Disease

Virulent infectious malady affecting domesticated animals. Its usual victims are cattle, sheep, goats and pigs, but it is communicable to man. Fever is accompanied by rapid spread of eruptions in mouth and feet, thick discharge from the lips, disturbance in abdominal organs and milk supply and a greater or lesser degree of lameness. It is introduced into Britain at intervals by imported animals. The Ministry of Agriculture has extensive powers in cases of this kind, and as soon as an outbreak occurs all movement of animals in the affected area is forbidden. Sometimes they are slaughtered, in which case compensation is paid.

Football Popular ball game. This old game was at first played by two teams of men, without any definite rules regulating the numbers engaged, the size of the ground or other matters. Each side tried by sheer force to get the ball past its adversaries. This is the game still played once a year at Ashbourne and elsewhere. The public schools each played it according to their own rules, survivals being the wall and field games at Eton and the games at Winchester and Harrow.

In the 19th century the game was organised and rules drawn up. Clubs came into existence and soon football was played in practically every boy's school in the land. Of its two popular forms the first is the Association game. This is played with a round ball by eleven players on each side. These are goalkeeper, two backs, three half backs and five forwards. Except by the goalkeeper the hands must not be used, the ball being only propelled by the feet or head. Each match is decided by the number of goals scored, these being obtained by kicking the ball between the goal posts. A game usually lasts for 90 minutes.

Association Football, or soccer, owes its name to the fact that in 1863 the Football Association was formed to draw up a set of rules. A challenge cup was presented for competition between the clubs in 1871 and since then the matches for the Association Cup have been amongst the most popular sporting events in the land. There are also Scottish, Irish and Welsh Associations each of which offers a cup as do many other local associations. The Football Association at 22 Lancaster Gate, London, W., is the controlling authority in England and nets in unison with the other associations in revising the rules.

The first players were all amateurs, mainly old boys from the public schools, but the popularity of the game spread to all classes and soon professionalism was introduced, this being legalised in 1885. Then came the introduction of the league system, now the mainstay of the game. In 1888 a league was formed and each club in it must play two matches in the season with every other club therein. Points were awarded and the championship of the league became almost as great an honour as the holding of the Association Cup. The great professional clubs such as Aston Villa,

Blackburn Rovers and Preston North End, were members of the original league and their matches every Saturday attracted vast crowds.

The league system spread rapidly. The first, or original, league was divided into divisions with a system by which a club could rise from one to another. Leagues were founded all over the country and there are now scores of them in England, Scotland, Ireland and Wales. The game is still played by amateurs and at one or two of the public schools, while the universities of Oxford and Cambridge meet in an annual encounter. The Football Association offers a cup for amateur clubs and the best amateur players form the Corinthians.

International matches are played between the four home countries, the players are usually professionals, but amateurs are not barred. There are also international matches between amateurs and between the national leagues. The game is played in France, Germany, Belgium and other countries, and is an event at the Olympic Games.

The second form of the game, Rugby Football, is a development of the original game as it was played at Rugby School. In 1823 William Webb Ellis picked up the ball and ran with it, and in 1841 this was recognised in the rules. Soon clubs were formed to play the game according to the Rugby rules. The oldest of these is the Blackheath Club, formed in 1860. The English Rugby Union then came into existence and similar unions were formed in the other countries.

Rugby is the chief winter game at most of the public schools. It is also very popular in most parts of England, as well as in South Wales and has been taken up in Scotland and Ireland. It has also spread to France and in New Zealand and South Africa is played with great keenness. It is strictly an amateur game.

Rugby is played with 15 players a side. Eight of these form the scrum, a survival of the original group of men striving to push the ball along as best they could. The other seven are two half backs, four three quarter backs and one full back. The ball is oval in shape and must be kicked above the bar, not under it in order to score a goal which counts five points. Three points are given for a try, which is gained by grounding the ball on the opponent's back line and entitles the side gaining it to kick at the goal without interference.

International matches are played between the four home countries and, until 1930 with France. From time to time teams from South Africa and New Zealand come to Britain and British teams go overseas. A match is played each year between Oxford and Cambridge. The rules are revised periodically by an international board representing the four Rugby Unions. The English Union has its head quarters and ground at Twickenham, the Scottish Union has a ground at Murrayfield, Edinburgh.

A third form of football is the Northern Union game. This came into existence in 1895 when the Rugby Union refused to allow professionalism. Some Rugby clubs in Lancashire and Yorkshire then broke away, formed the Northern Union and began to play a slightly different kind of game. The number of players was reduced from 15 to 13 and other changes made for a more open and spectacular game. The Northern Union has adopted the league system. This game is much played in Australia.

A fourth kind of game is played in Ireland

In this there are 13 players a side and a round ball is used. This, however, can be handled, but must not be carried. A score is made if the ball is sent either over or under the bar of the goal posts.

Foote Samuel English actor and dramatist. Born at Truro in 1720, he was educated at Oxford and studied law, but soon abandoned this profession for the stage, making his debut at the Haymarket Theatre, London, in 1744. In 1747 he gave, at the same theatre, a series of entertainments which were very popular, in which he caricatured people of the day. In all the many comedies that he wrote and in which he performed, caricature of some living person was an outstanding feature. In 1766 he lost a leg and the Duke of Westminster, as compensation, permitted him to rebuild the Haymarket theatre. He continued to act there until he sold the theatre ten months before his death on Oct. 21, 1777.

Footpath Narrow way for pedestrians only. Right of way over a footpath may be established by grant of the freeholder, or by user. In the latter case, if the public have had uninterrupted use of the path for 20 years, a right of way is established, the law presuming an ancient grant to have been in existence before that time. The owner of land who permits the public to use a path over it, but does not wish it to become a permanent right of way, can avoid it by closing the path once a year. The Commons and Footpaths Preservation Society in London closely watches reported encroachments on public rights of way. There is also a Peak District and Northern Counties Footpaths Preservation Society.

Forbes Town of New South Wales. It is 200 m. to the west of Sydney, and is the centre of a district wherein sheep are reared. Pop. (1931) 5120.

Forbes Archibald Scottish war correspondent. Born April 17, 1838, he was educated at Aberdeen University and served in the Royal Dragoons. During the Franco-Prussian War he acted as correspondent of *The Morning Advertiser* and then of *The Daily News*. He also saw service as a war correspondent in Spain during the Carlist wars, in the Russo-Turkish war, in Afghanistan and in S. Africa. He wrote on his campaigns and also a volume, *Memories and Studies of War and Peace*. He died March 30, 1900.

Forbes George William New Zealand politician. Born at Lyttelton in 1868, he became a farmer. In 1908 he was elected to the House of Representatives and in 1928 was made Minister of Lands and Agriculture under Sir Joseph Ward. He acted as premier during Sir Joseph's illness and succeeded him in that office in May, 1930, becoming also Minister of Finance, and in 1931 Minister for External Affairs and Minister of Railways. In 1930 he attended the Imperial Conference in London.

Forbes Joan Rosita English traveller and writer. Born Jan. 16, 1893, she travelled extensively in Africa and other countries. In 1920 she was with the expedition to the Kufra Oasis in Libya. In 1922-23 she visited A.S. and went with a cinema expedition through Abyssinia in 1924-25. Her novels and books of travel and adventure include *The Jewel in the Lotus*, 1922; *From Red Sea to Blue Nile*, 1925; *Adventure*, 1928; and *Conflict*,

1931. She married firstly, Col. Ronald Forbes and, secondly, Col. A. T. McGrath.

Forbes Stanhope Alexander British artist. Born in Dublin, Nov. 18, 1857, he was educated at Dulwich and studied art. He won a reputation by his paintings of English rural life. "The Health of the Bride" is in the Tate Gallery, London. The "Fish Sale" and "Forging the Anchor" are two of many popular works. In 1892 he was elected A.R.A. and in 1910 R.A.

Forbes-Robertson Sir Johnston English actor. Born in London, Jan. 16, 1853, he was educated at the Charterhouse and Rouen and studied art at the Royal Academy Schools. He made his first stage appearance in 1874 at the Princess's Theatre, London, where he appeared as Castiard in *Mary, Queen of Scots*, but he first achieved success in 1876 in *Dan'l Druce*. In 1895 he played in *Romeo and Juliet* and increased his reputation by appearing in *The Passing of the Third Floor Back* and *The Light that Failed*. In 1913 he was knighted. Forbes-Robertson married the actress Gertrude Elliott and wrote *A Player under Three Reigns*, 1925.

Force Term in physics expressing that which produces or tends to produce motion, or a change of motion, in a body. Force is measured by the rate of change of momentum it produces, the unit of force being known as the dyne ($g v$). Work is the product of force.

Forcing Horticultural term for the art of accelerating the growth of plants. By this means many plants may be made to flower or fruit or produce stems and foliage out of their proper season. Forcing is dependent upon warmth and moisture. Warmth may be obtained by embedding potted plants in pits filled with fermenting material or by keeping them in a forcing house. In warm climates such as that of the Channel Islands, vegetables, fruit and flowers are forced under glass for the English market.

Ford Edward Onslow English sculptor. Born at Islington, July 27, 1852, he studied at Antwerp and Munich and at an early age attracted attention with his busts and statues. His group statuary is represented by the Gordon Memorial in London and the Sheller Memorial at Oxford, other works of his are the Gladstone statue in London, the Huxley statue in the National History Museum, London, and a number of portrait busts of well-known people, all showing great skill in modelling. He was elected A.R.A. in 1883 and R.A. in 1895. He died in London, Dec. 23, 1901.

Ford Henry American manufacturer. Born at Greenfield, Michigan, July 30, 1863, he early became interested in mechanics and gained experience in engineering works at Detroit and elsewhere, experimenting meanwhile in motor car manufacture. In 1903 he started the business that grew into the Ford Motor Co., and thus became the largest maker of motor cars in the world. In 1914 he instituted a scheme of profit sharing. The Ford works are excellently organised, and to eliminate waste of every kind, Ford owns his own iron and coal mines, timber forests, railways, etc. Factories have been opened at Manchester and Cork, and extensive works begun at Dagenham. Ford is the author of *My Life and Work*, 1922, *To-day and To-morrow*, 1926, *My Philosophy of Industry*, 1929.

Ford John English dramatist. Born in Devon, April 17, 1886, he studied at Oxford for many years he was occupied in writing for the stage. In 1925 appeared *'This Lady she's a Whore'* a powerful tragedy which was followed by *The Broken Heart* and *Love's Sacrifice*. In 1931 he published *Perlin Wæber* a historical drama. He also wrote many plays in collaboration with Dekker and others. His last play was *The Lady's Trial*, 1939. The date of his death is not known.

Fordingbridge Town of Hampshire. It stands on the River Avon 14 m. from Salisbury and 96 m. from London by the S. Rly. It has an agricultural trade and was once a market town. Pop 3100.

Fordwich Village of Kent. It is on the Stour, 2 m. from Canterbury and in the Middle Ages was an important port, being a member of the Cinque Port of Sandwich. It decayed owing to the closing of the channel of the Stour and for other reasons. It was a corporate town until 1881. Pop 250.

Forecastle Front part of a ship usually occupied by the crew. It owes its name to the fact that the fighting ships of the Middle Ages had an erection in front like a castle.

Foreclosure Act of taking possession of mortgaged property when principal or interest is unpaid. By English law a mortgagee can foreclose if the mortgagor is in arrears longer than a stated time. He can also foreclose if, the required notice having been given, the principal is not repaid. The right of foreclosure, however, is limited to some extent by the Rent Restriction Acts.

Foreign Legion Corps of the French army. It is recruited largely from foreigners, men who wish for some reason to hide their identity or to seek adventure. No questions are asked about their antecedents. The headquarters are at Sidl Bel-Abbes, in Oran and the Legion, which is officered by Frenchmen is quartered in various parts of Algeria. Trained very rigorously and cut off from European life, the men have won a great reputation as fighters and did good service in the Great War when battalions were brought to France.

Foreign Office Department of the British Government. Its head is a secretary of state and a member of the cabinet, and it is responsible for all business with foreign countries, ambassadors and other representatives being under its control. The office in its present form dates from 1782. The secretary is assisted by two under secretaries and a large staff. One of the under secretaries is a politician, the other a civil servant. The department of overseas trade is a department of the Foreign Office, which has its headquarters in Downing Street, London.

Foreland Alternative name for a cape or headland. Two capes known by this name are in Kent. The North Foreland is about 3 m. from Margate and the South Foreland about the same distance from Dover. Both are formations of chalk and on each is a lighthouse. Foreland Point, also with a lighthouse is near Lynton, on the north coast of Devon.

Foreshore Part of the seashore between high water and low

water marks at ordinary tides. Its extent varies with the amount of slope and the tidal height. Except when vested individually by grant, charter or prescription, the foreshore belongs to the crown, with public right of use for navigation or fishing. A right of passage to the foreshore does not necessarily lie over adjacent land.

Forest Word used originally for a tract of woodland wherein wild beasts lived. In Europe many of these were used by the kings for hunting and forest laws were passed to prevent any interference with this sport. The history of England and France is full of references to the habit of the kings and nobles of hunting in the forests. Gradually the area under forest became less and less until to day, England has very few forests, the largest being the New Forest. France, Germany and other countries have more, while Scotland has extensive treeless areas called deer forests. There are also vast forest areas in Canada, India and other countries used for the growth of timber and mostly the property of the state. The men who look after the forests are called foresters, rangers or verderers. See AFFORESTATION.

The Ancient Order of Foresters is the name of one of the largest of the friendly societies. Its headquarters are 17 Russell Square, London, W.C.1.

Forestalling Former equivalent of the modern profiteering (qv). It is the act of buying any merchandise or provisions on the way to market or before market hours, or dissuading persons from bringing them to that market or of doing anything to enhance the price. This interference with public trade for personal profit was, until 1844, a statutory offence.

Forest Gate District of London. To the east of the city it is in the boroughs of East Ham and West Ham. It is an industrial centre on the L.N.E. Rly., 6 m. from the city.

Forest Hill District of London. To the S.E. of the city, it is in the borough of Lewisham 6 m. from London Bridge on the S. Rly. Here is the Horniman Museum.

Forest Row Village of Sussex. It is 3 m. from East Grinstead, on the S. Rly. It is near Ashdown Forest hence its name. Pop 3300.

Forestry Art and practice of looking after the trees in forest areas. It must be distinguished from afforestation, which is the work of planting trees on unforested land. With the enormous and increasing demands upon the world's timber supplies the conservation of forests has become a matter of first importance and many countries have set up departments to deal with it.

In Great Britain there is a forestry commission set up in 1919 but its duties are mainly concerned with afforestation. It controls the crown woods and its headquarters are at 22 Grosvenor Gardens, London S.W. Since 1920 it has been responsible for planting 1,55,000 acres of new forest. The Government also maintains a board for research into forest products which has a laboratory at Princes Risborough. Forestry is a subject of study at the Imperial Forestry Institute, Oxford under a professor the students being trained for the forest services in India and other parts of the Empire. India has an important forestry

department, controlling some 250,000 sq m of forest, so also have Canada and many other countries

During the Great War a forestry corps, recruited mainly from Canada, did good work in providing timber for military operations. The Women's Forestry Service was also established for the same purpose

Forestry Commission

Department of the British Government. Its duties are primarily to manage existing state-owned forest lands, to promote reforestation and to supervise the timber production and supply in Great Britain. In 1932 the Commission had acquired over 724,000 acres of land, including former crown woods, and had planted over 165,000 acres. The commissioners are appointed every five years

Forfar Burgh and county town of Angus, formerly called Forfarshire. It is 14 m from Dundee, on the LMS Ry, and is a railway junction. There are some manufactures. On a nearby hill the early kings of Scotland had a castle. Pop (1931) 9660

Forfarshire Former name of the Scottish county of Angus (qv)

Forfeiture Loss of lands or other property as a result of an offence against the law. In Great Britain, until 1800, it was the law that any person convicted of treason or felony forfeited his property to the crown. The history of the country until after the Jacobite rising of 1745 is full of instances of nobles and others who forfeited their lands.

To day persons convicted of bringing goods into the country without paying duty on them are sometimes sentenced, in addition to the fine, to the loss or forfeiture of the goods. Losses can be forfeited if the tenant fails to carry out his undertakings, but courts of law do not allow this on trivial grounds

Forgery In English law a serious crime. It is defined as making a false document or material alteration therein, without authority, also counterfeiting a seal or die. The forging of documents, such as wills, deeds or bank notes is a felony and can be punished by penal servitude for life. The forgery of documents of less importance does not come within the category of a felony, but is a misdemeanour for which the maximum penalty is imprisonment for two years

Forget-Me-Not Various annual or perennial herbs, (*myosotis*). Native to temperate regions, the best known, the common *M. scorpioides*, has rather stout, flexible stems, and sky-blue flowers. The wood forget-me-not *M. silvatica*, has bright blue flowers. The Alpine species is a dwarf. Ornamental garden varieties and exotic species from the Azores and elsewhere are very popular

Forging Art of shaping metal. It is an ancient industry now principally practised on iron and steel which is heated until plastic, when it can be joined (welded), severed, bent or shaped by hammering with hand or power hammers, with or without shaped moulds

Formaldehyde Simplest of the aldehydes which are oxidation products of alcohols. The gas formaldehyde (HCOH) is produced by passing methyl alcohol vapour over heated platinum. A 40 per cent solution in water (formalin) is a

disinfectant, an antiseptic, and renders gelatine insoluble in water. In recent years formaldehyde has become of great importance in the manufacture of synthetic resins and plastic substances

Formalin Trade name for a 40 per cent solution in water of the organic gaseous compound known as formaldehyde. This is prepared by passing a mixture of methyl alcohol and air over heated platinum as a catalyst. It has a peculiar pungent odour and is used as a disinfectant and deodoriser, also as a hardening agent for photographic films

Formby Urban district, market town and seaside resort of Lancashire. It is 7 m from Southport, on the LMS Ry. Pop (1931) 7957

Formic Acid Simplest of the fatty acids. It has the chemical formula HCOOH . First obtained from ants by distillation with water, it is now obtained by the distillation of sodium formate with a mineral acid. It has a pungent odour and a blistering effect upon the skin. It is used in dyeing and other technical processes

Formosa, or Taiwan Island in the Pacific Ocean. It lies off the coast of China, from which it is separated by the Strait of Formosa. For long Formosa, the beautiful island, as the early European seamen called it, was a Chinese possession, it was ceded to Japan in 1895. It is 240 m long and covers 13,890 sq m. The eastern part is mountainous and very little cultivated, the western part is a plain where rice, sugar, tea and other products are grown in abundance. The fisheries also are valuable. The island possesses vast supplies of timber, gold, silver, copper and other minerals are mined and camphor is produced as a State monopoly. Taihoku is the capital. Keelung is the chief seaport and other towns are Tainan, Taihu and Kun. Roads, railway, telephones, etc. are being developed by the Japanese on modern lines, and a university was opened in 1928

Savage tribes of Malay origin live in the east of the island. Chinese and Japanese have settled in the west. Pop (1930) 4,592,537

Forres Burgh and market town of Morayshire. It stands on the Findhorn, 12 m from Elgin and 5 from the Moray Firth. There are a few manufactures and near are the Cluny Hills and some very beautiful scenery. Pop (1931) 4169

Forster Baron. English politician. Henry William Forster was born Jan 31, 1866 and educated at Eton and New College, Oxford. He played cricket for his university and in 1892 entered Parliament as Unionist M.P. for the Southcocks division. He was a Lord of the Treasury, 1902-05, and Financial Secretary to the Treasury in 1917. In 1919 he was made a peer and from 1920-25 was Governor-General of Australia. Lord Forster is one of the largest landowners in the London area

Forster William Edward. English politician. Born at Bradpole, Dorset, July 11, 1818, of a Quaker family, he was educated at Tottenham and married in 1850 a daughter of Thomas Arnold of Rugby. He became a successful wool manufacturer in Bradford and was elected M.P. for that city in 1861 being successively elected until his death. In 1868 he was made Vice-President of the Council in Gladstone's first Cabinet, and he introduced the Education Act of 1870. He was

FORTALEZA
 Chief Secretary for Ireland in 1880, but resigned in 1882. He died April 6, 1886, having declared his opposition to Gladstone's scheme for home rule for Ireland.

Fortaleza Seaport of Brazil. It stands near the mouth of the River Ceará, 350 m from Pernambuco. There is a harbour, but it is small and cargoes are landed by means of surf boats from vessels that lie in the roadstead. The trade is chiefly in rubber and other products of the country. Pop 98,848.

Fort Augustus

Fort Augustus Village of Inverness on the Caledonian Canal, 34 m from shore. It stands on Loch Ness on the L N E Rly. It is a tourist centre. The fort was built in 1718 and was named after Augustus, Duke of Cumberland, who retook it from the Jacobites. Pop 1030.

Fort de France

Fort de France Capital and sea port of Martinique. It is on the west of the island and has a large harbour. There is a considerable trade in the produce of the island. Its old name was Fort Royal. Pop 43,300.

Fort Duquesne American fort, on the site of Pitts-
 burgh It stood where the Monongahela River
 falls into the Allegheny, and was begun by
 the English in 1754 The French took it and
 finished it, calling it after one of their leaders
 The English settlers, aided by troops from
 home, tried to retake it, but failed on two
 occasions In 1758, however, the French
 destroyed and abandoned it, whereupon the
 English built a new one on the same spot
 This was named Fort Pitt and grew into the
 city of Pittsburg (q v)

Earl English title borne
 by the Duke of Fortescue

Fortescue

English nobleman. This was named Fort Pike in the city of Pittsburgh (70)

Fortescue Earl English title borne by the family of Fortescue in Devon and in 1721 It has long possessed land in Devon and in 1721 Sir Hugh Fortescue was made Earl of Clinton. The title became extinct in 1751 and in 1759 his nephew and heir was made Earl Fortescue. The earl's estates are in Devonshire, and his eldest son is called Viscount Ebrington

Sir John William Fortescue, a younger son of the 3rd earl is the author of the monumental *History of the British Army* and other books on military history. In 1933 he published an autobiography, *Author and Curator*. For a time he was librarian at Windsor Castle. He died in 1933.

Forth

Forth is a narrow strait between the Moray Firth and the Firth of Clyde. It is about 53 m long. On its banks are the towns of Aberdeen, Inverness, and Elgin. The Forth is a major waterway for Scotland and is used by many ships. It is also a popular place for fishing and boating. The Forth is a beautiful area with many scenic views. It is a great place to visit if you are in Scotland.

8 connected with the Clyde by the Forth and Clyde Canal The waterway is controlled by a conservancy Bridge carries the L N E Rly at Leith to

The North Bridge carries the LNE Rly line from South Queensferry in East Lothian to North Queensferry in Fife, and thus saves a long detour. One of the finest bridges in the world, it is nearly 1½ m long and is built on the cantilever principle. The bridge was opened 150 ft above the water. The bridge cost £3,000,000 for traffic in 1890 and cost about £23,000,000 for a new road bridge across the north at Kin cardine was aided by a government grant and started in 1934.

Art and practice of

Fortification

Fortification Art and practice of protecting a town or position against an enemy. Earthworks and palisades were among the earliest forms. Later stone was used, and walls and citadels were built as fortifications. A notable instance is the Roman wall between the Tyne and the Solway. The main fortifications of the Middle Ages were the walls which surrounded every town of importance, but the invention of gun powder destroyed the utility of these fortifications. The history of fortification is a large store in the history of architecture and other branches of art.

The next stage in the history of fortification was the erection of earthworks. These were defended by men and guns, and usually formed a formidable obstacle to the enemy. Such were the works of Torres Vedras erected in Portugal by Wellington. In the 19th century fortifications took the form of protecting vulnerable cities by a ring of detached and hidden forts. Antwerp being a notable example. The experience of the Great War, however, showed that these were almost useless against modern artillery. It still has its uses although of little value in the modern war.

Fortification still has its uses although
immovable fortresses are of very little value in
modern warfare. Positions protected by barbed
wire, machine gun pits and other devices, such
as these adopted during the Great War along
the Western Front, proved very difficult indeed
to overcome, even with the aid of all the
resources of modern artillery. Coast defences
are still powerful fortifications and, as was
shown in the Dardanelles and on the Belgian
coast, they are still able to keep the battleship
and its attendant craft at bay.

Fortress

Fortress Place occupied by soldiers and other kinds. From very early times fortresses have been a feature in warfare although at first perhaps, their protections were little more than a fence of wood, or a mound of earth. Stone fortresses soon came into existence and the Greeks appear to have had such in the time of Homer, as Troy was evidently a very strong fortress. The Roman fortresses took the form of protected camps, such as were on the coast of Britain in England.

The mediaeval castle with its keep and other features was the fortress of the Middle Ages, although the word was also used for walled towns. These castles were gradually built in important positions, so that their occupants could watch a river, a mountain pass, or a barbour entrance. The value of the walled town as a fortress ended with the increasing power of artillery and fortresses of a new type came into being. These were towns protected by earthworks and the like, such as stood between France and the Netherlands in the 15th century and such as figure in the history of the Peninsular War.

Finally, in the 19th century, came the modern fortress, protected by detached forts

and hidden guns. Such were Metz and Antwerp, but in the Franco German War and still more in the Great War, these failed to fulfil the expectations of their builders. The experiences of the struggle showed that the value of the fortress in modern warfare is very slight indeed.

Fortrose Burgh and seaport of Ross and Cromarty. It stands on the Moray Firth, 8 m from Inverness on the L.N.S. Rly. It has a good harbour and attractions for visitors. At one time it had a cathedral, of which there are some slight remains. Pop (1931) 875.

Fort St. David Name of an old fort on the Coromandel Coast, a little south of Pondicherry, and remains of it may still be seen. The land was bought by the English in 1690, and here the East India Co. had a fort until it was taken by the French in 1758. The French destroyed it, but the territory was given back to Britain in 1785.

Fort Sumter Fort in the American state of S. Carolina. It is on an island that protects the harbour of Charleston and is famous because its bombardment by the Southerners on April 12, 1861, opened the American Civil War. It fell on the following day.

Fortuna In Roman mythology, the goddess of good luck or chance. She was especially worshipped at Praeneste and Antium and there were several temples erected in her honour in Rome.

Fortunatus Character found in the folklore of many countries. Fortunatus of Famagusta in Cyprus received from the goddess of fortune an inexhaustible purse and later stole a magic hat which transformed him at will. The earliest German text appeared at Augsburg in 1509. Hans Sachs dramatised it in 1553 and Dekker published a version in England in 1600.

Fortune Telling Professed disclosure by non-rational methods of future events in the life of another. As one of the aims of divination, it is traceable in ancient Mesopotamian records, and was brought from Asia into mediaeval Europe by gipsies, who practised it under society patronage in England in the 17th century. The Witchcraft Act, 1753, punished it with a year's imprisonment and the pillory; the Vagrancy Act, 1824, directs the imprisonment as rogues and vagabonds of persons pretending to tell fortunes. It is still practised by gipsies and others, often for charitable purposes, but is none the less illegal.

Fort William Burgh, market town and pleasure resort of Inverness-shire. It is 65 m from Inverness, on the L.N.E. Rly., and stands on the banks of Loch Eil. It owes its importance to its position at the foot of Ben Nevis. It was built in 1655, and was held against the Jacobites in 1715 and 1716. Near are the works of the British Aluminium Co. Pop (1931) 2527.

Fort William City and lake port of Ontario, Canada. It stands on Lake Superior, just where the Kaministiquia River falls into it, its position making it a prosperous place. It is 420 m from Winnipeg, on the C.P.R. and C.N.R. A railway goes to Port Arthur, 4 m away. The chief industry is the handling of the grain which is shipped here to be conveyed to Europe.

For this there are docks, large elevators and other accommodation.

Fort William was founded in 1801 by the Hudson Bay Co. as a trading post. Pop 26,277.

Forum In Roman times any open place devoted to public business. It was the official centre of a city's public and corporate life, and was usually surrounded by its chief public buildings and often ornamented with statues and other works of art. Justice was administered in it or in buildings opening thereon. It was the people's normal place of assembly. Rome had several of these, the most notable being the Forum Romanum and the Forum of Trajan.

The Forum is the name of an influential review published in New York.

Fosdick Henry Emerson, American preacher and writer. He was born on May 24, 1878, and became the pastor of Park Avenue Baptist Church, New York. His *Manhood of the Master* (1913) is said to have had the largest sale of any modern religious book.

Fosse Way Name of one of the great highways of England in Anglo-Saxon times. It was at first a Roman road and went from Axminster to Lincoln, passing by Bath, Cirencester, Leicester and Newark. It is 180 m. long and much of it is still used.

Fossil Traces of plants or animals in the earth's crust, where they have been embedded by geological agencies. The study of them is known as paleontology. The dating of strata by fossils found therein is fundamental in geological research. The effect of time may be to alter the form or chemical constitution of buried organisms by processes called petrification. Thus, molluscan shells may be preserved unchanged, may be converted into silica, or may disappear, leaving only an external or internal cast. Rocks may perpetuate traces of footprints and even rain drops. Fossil flour is infusorial earth. Fossil ivory comprises tusks of extinct mammoths extracted from frozen Siberian steppes.

Foster Sir George Eulas, Canadian statesman. Born in New Brunswick, Sept. 3, 1847, he was educated there and at Edinburgh and Heidelberg. He became a professor in New Brunswick, and in 1882 was elected to the Dominion House of Commons. In 1885 he was appointed Minister of Marine and Fisheries, from 1888 to 1896 he was Minister of Finance, and from 1911 to 1921 Minister of Trade and Commerce. In 1914 he was knighted, and in 1919 represented Canada at the Peace Conference in Paris. Later he represented his country at the meetings of the League of Nations. He died Jan. 4, 1931.

Foster Myles Birckett, English artist. He was born at North Shields, Feb. 4, 1825, and was one of the last of the topographical artists of the early Victorian period. His earlier work was in black and white, being illustrations for books, but later he executed many water colour paintings of continental and English landscapes which gained him great popularity. He died at Wadebridge, March 27, 1899.

Fosterage Nursing and upbringing of children by other than their own parents. It flourished in Scotland and Ireland where the clan and tribal chieftains gave out their children to nurse, and many stories are told of the affection that arose between foster relatives.

Fotheringhay Village of Northamptonshire. It is on the Nene, 4 m from Oundle. It is famous because in the castle here Mary, Queen of Scots, was tried and executed. The building, once a royal residence, has disappeared.

Foucault Jean Bernard Léon. French scientist. Born Sept. 18, 1819, he joined the staff of the observatory in Paris. He devoted much time to the study of physical phenomena and invented several instruments, including a polariser. His famous pendulum, 200 ft long, was hung from the Pantheon in Paris, where it was used to prove the rotation of the earth. He died in Paris, Feb. 11, 1868.

Fouché Joseph. French statesman and Duke of Otranto. He was born at Nantes on May 21, 1763 and became minister of the police under Napoleon. Distinguished for his tact, foresight, leadership and shrewdness, he served his country well at a difficult time. He died in exile at Trieste on Dec. 25, 1820.

Foundation Primarily the basis of a building. The best foundation is on rock, as in New York, where the rock will stand any conceivable weight. Many bridges rest on rock well below the water. In this case caissons filled with masonry or cement are sunk on to the rock. Gravel is a good foundation. In other cases an excellent foundation can be made by driving piles into the soft ground. Adelade House, London Bridge, stands on piles in this manner.

Foundation is also used for a college, school or other society, which has been founded for educational, religious or charitable purposes. The colleges at Oxford and Cambridge, and the public schools are foundations of this kind. Cathedrals and almshouses are also foundations. In all the conditions of the foundation are laid down by charter, or will, or some other document. For instance, a college may consist of a master, ten fellows and 30 scholars. These are on the foundation, but other members of the college are not. The person responsible for the foundation is known as the founder, an example being William of Wykeham at Winchester College.

Sometimes when a limited liability company is formed, certain shares are reserved for the founders. These are called founders' shares and usually only share in the profits after something has been paid to the other classes of shareholders.

Founding Art of making metal castings. A pattern, which allows for the shrinkage accompanying the cooling of the metal, is supplied to the founder who prepares from it the "mould" in special mixtures of sand and clay. Inserting "cores" where required to produce holes in the casting. Molten metal is then run in, forming the casting when cold. Modern developments include centrifugal casting for metal pipes.

Foundling Name used for a deserted or abandoned child usually an illegitimate one. In Greece and Rome foundlings were cared for by the State, but in more uncivilised countries no heed was taken of them. The Christian Church soon turned its attention to them, and about 800 a foundling hospital was opened at Milan. Many others were set up in the European cities and the Order of the Holy Ghost was established to care for foundlings.

The Foundling Hospital in London was founded by Thomas Coram in 1739. In 1754

a building was erected in Guilford Street, and here for many years 800 or 700 foundlings lived. In 1928 the hospital was removed to Rolgate, pending the erection of a permanent home for the foundlings on an estate near Berkhamstead. A fund was raised to preserve the site in Guilford Street as a public recreation ground, and in 1932 the required sum was obtained, largely through the generosity of Viscount Rothermere.

Foundry Building where the casting or founding of metals is carried on. The art of casting reached a high stage of development among many of the ancient nations. The furnaces in use range from small gas furnaces to large blast and electric furnaces, and different forms of moulds are used for solid and hollow castings.

Fountain Construction for the supply of water. The use of artificial fountains in conjunction with aqueducts for the water supply of towns and cities was fully understood by the Romans. The ornamental type of fountain dates from the Renaissance period and fine examples exist in many cities such as Rome, Paris and Versailles. At the present time public drinking fountains are in use in most towns.

Fountains Abbey Ruined abbey in Yorkshire. It is 3 m from Ripon near the River Skell in the grounds of Studley Royal. The ruins, perhaps the most beautiful in England, include parts of the church, chapter house and cloisters, as well as remains of other apartments. The abbey was a Cistercian house founded about 1130. Near is Fountains Hall, a fine house built early in the 17th century.

Fouquet Nicolas. French politician. Born in Paris in 1615, he entered the public service at an early age, and in 1650 was made Procurator General. In 1653 he was made Superintendent of the National Finances and in that position amassed great wealth which he spent in regal style. This lasted until 1661 when he was arrested and tried. The sentence was imprisonment for life, and he was still a captive at Pignerol when he died March 23, 1680.

Fourier François Marie Charles. French socialist. Born at Besançon, April 7, 1772, he lost his money in business and served for about two years in the army. Afterwards most of his time was passed in putting forward the new social system on which his fame rests. In 1808 he published *The Theory of Four Movements*. In 1832, *The Association of Domestic Agriculture*, and in 1829, *The New Industrial World*, this being a rough translation of the French titles. He found a few followers, but their attempt to found a colony according to his ideas was a complete failure. One or two, however, were established on similar lines in the United States. He died Oct. 8, 1837.

Fourier taught that an entirely new social order was necessary. Men and women must be allowed to live as they like, free from the trammels imposed by civilisation. One of them, marriage, should be abolished. He proposed life in communities or phalanges of 1500 or 1800 persons each housed in a communal building surrounded by a large tract of land. Each man would work as far as possible at what he liked, with constant change of occupation and be assured of a minimum wage; the rest of the communal income being divided in fixed portions to labour, capital and talent.

Fourteen Points The Statement of Allied war aims.

presented by President Wilson (*q v*) to Congress on Jan 8, 1918. The points were (1) open covenants of peace without secret diplomacy, (2) freedom of navigation outside territorial waters, (3) removal of economic barriers, (4) reduction of armaments, (5) impartial adjustment of all colonial claims; (6)-(13) dealt respectively with Russia, Belgium, Alsace-Lorraine, Italy, Austria-Hungary, Balkan States, the Ottoman Empire and Poland. (14) a general association of nations (the League of Nations) to be formed under specific covenants.

Fourth Dimension Term denoting a hypothetical extension over and above the three-dimensional world of length, breadth and thickness in our normal experience. Just as the geometrical forms of lines, planes and solids are expressible algebraically by a , a^2 and a^3 respectively, so a four dimensional world is expressible by a^4 . Although fourth-dimensional relations are mathematically soluble, the notion of a super-solid state is outside our comprehension. Einstein's theory of relativity studies three dimensional space in relation to time as a fourth dimension.

Fourth Estate Term used for the Press. Constitutionally there are in Great Britain three estates of the realm, Lords Spiritual, Lords Temporal and Commons. The phrase, Fourth Estate is believed to have originated with Burke, and is of course, a reference to the power of the Press in the State.

Fowey Market town and watering place of Cornwall. It stands on the estuary of the Fowey River, 10 m from Bodmin and 265 from London, on the G W Rly. There is a good harbour, a little shipping and some fishing. China clay is the chief export. The town is the Town of Sir A. Quiller-Couch's novels. Place House is a 15th century mansion and there are ruins of a castle. Pop (1931) 2382.

Fox Animal of the canine family of the genus *vulpes*. The common *F. alopecurus* averages 4 ft in length, including the tail is 14 in high, weighs from 15 to 22 lb and is reddish-brown in colour with white-tipped hairs. Foxes differ from dogs in some of the skull bones and in having oval pupils to their eyes. The female is known as a vixen and the young as cubs.

The North American silver or black fox yields a silver tipped, black fur and is sometimes raised on fox farms. The Arctic fox, *F. lagopus*, is brownish with whitish under parts in summer, is entirely white in winter or may be silvery blue throughout the year, with a thicker winter coat. These furs also are esteemed. The fennec is an African species.

Fox Strait off the north coast of N America. It divides Baffin Island from Melville Peninsula, and is connected by other arms of the sea with both the Atlantic and the Arctic Oceans. To the south is Fox basin which connects it with Hudson Strait and between the two is the projection of Baffin Island called Fox Land. The strait is named after a sailor Luke Fox, who explored these regions early in the 17th century.

Two rivers in Wisconsin, U.S.A., are named the Fox, and Fox Islands is another name for the Aleutian Islands.

Fox Charles James. English statesman. The younger son of Henry Fox, Baron Holland, he was born in London Jan 1, 1749, and was educated at Eton and Oxford.

In 1769, after a brilliant scholastic career and much travel, he was chosen M.P. for Midhurst, which he represented until 1780, when he was elected for Westminster. After filling minor positions in the ministry of Lord North, he joined the Whigs, and became the most powerful advocate of all liberal causes. He wanted parliamentary reform, liberty for Roman Catholics, freedom for the American colonies and the removal of Ireland's disabilities. In 1789 he went beyond most of his associates when he greeted the fall of the Bastille with welcoming and memorable words, and in spite of its excesses, he remained a firm supporter of the Revolution. This led, in 1791, to the rupture of his long friendship with Burke, but irrespective of this he retained his regard for the great Irishman to the end.

Fox's political life was mainly spent in opposition to the government but in 1782 he was Secretary of State for a few months and in 1783-84 he helped Lord North to form a coalition. On this occasion again being Secretary of State, he prepared a bill for the reform of the government of India, but this was rejected. In 1792 his followers being very few he ceased to attend the sittings of parliament, he returned however, in 1802 and again took up the task of opposing Pitt and the French war. When Pitt died he became a Secretary of State but a few months later, on Sept. 13 1806 he died at Chislewick. He was buried in Westminster Abbey.

Fox George. Founder of the Society of Friends. He was born in July, 1624, at Fenny Drayton, Leicestershire the son of a weaver. He became a shoemaker but gave his time to preaching. He was something of a mystic and believed in the guidance of what he called the inner light. With rare courage and perseverance he travelled over the country and soon had followers in many places. These met regularly for worship on the lines laid down by Fox and were called by him the Society of Friends and by others Quakers. He denounced war, formality in worship and the taking of oaths, and it is not surprising that he was often put into prison for his opposition to authority. He travelled through Wales and Scotland and then visited the West Indies, North America and Germany. He died in London, Jan 13, 1691. Fox's Journals is one of the world's great books.

Fox Richard. English statesman and prelate. Born at Ropesley, Lincs, he was educated at Oxford and Cambridge. In 1485, whilst in Paris, he entered the service of Henry VII, becoming his trusted adviser. He was appointed Secretary of State and Lord Privy Seal, becoming Bishop of Exeter in 1487. He was transferred successively to the sees of Bath and Wells, Durham and Winchester. On the accession of Henry VIII in 1509, he lost his power and resigned the privy seal in 1516. He was the founder of Corpus Christi College, Oxford, and died Oct. 5, 1523.

Foxe John. English martyrologist. Born at Boston, Lincs, in 1516, he was educated at Oxford, becoming a fellow of Magdalen College in 1539. On his conversion to the tenets of the Reformation, however, he resigned his fellowship. For a time he was tutor to the sons of Henry Howard, Earl of Surrey, but soon after the accession of Mary he went to Frankfurt where he met Knox, and then to Basle, where he obtained work as reader to a printer. He returned to England

when Elizabeth came to the throne, and in 1560 was ordained by the Bishop of London. In 1562-3 he published his great work, *Acts and Monuments*, popularly known as *The Boole of Martyrs*. He died April 18, 1587.

Foxglove Genus of hardy biennial or perennial herbs (*digitalis*). They are natives of Europe, W Asia and N Africa. The only British foxglove, *D. purpurea*, is the stateliest, bearing spikes of drooping, thimble-shaped pink flowers, spotted inside. Gardeners have produced cream, white, rosy purple and spotted blooms, propagated by seeds or offsets. One gloxinia-like variety has erect flowers. The large wrinkled leaves yield digitalin and other active principles used medicinally as heart tonics and sedatives. See DIGITALIS.

Foxhound Breed of hound maintained for fox hunting. Smaller than the staghound, it averages 20 or 22 in in height and may be descended from a blend of bloodhound and greyhound with a bulldog strain. It is notable for fleetness, strength, fine scent, endurance and subordination and is deep-chested and straight limbed, with a smooth parti-coloured coat. The hounds are bred for hunting purposes and great care is taken to maintain and improve the breed.

Foxhunting Popular English sport. Practised in England for at least 700 years, at first it had for its object the killing of the fox on account of the damage done by that animal. Later it developed into a sport, which was at its zenith in the 18th and 19th centuries. Foxes are preserved and landowners and farmers co-operate to maintain a supply.

The chief counties for fox hunting are the shires of Leicester, Northampton, Warwick, and Herefordshire but it is also carried on in many of the other counties. The country is divided into a number of hunts each consisting of a master, a pack of hounds and paid servants to look after them. The expenses are usually met by subscription, although one or two packs are private property, as in the 18th century. The most famous hunts are the Quorn, Pychley, Cottesmore, Belfour and others in the Midlands. Fox hunting is carried on in Ireland and in Scotland, but not to any great extent elsewhere. There are about 200 packs of hounds in Great Britain and nearly 100 in Ireland.

The fox hunting season lasts from November to April. It is preceded by a period of cub hunting, really a trial for the hounds and young foxes.

Fox Terrier Breed of dog. It is an intelligent and companionable house dog. The smooth type has a wiry coat, usually black, white and tan, less desirably with liver-coloured markings, and is capable of prolonged exertion, although it is not a rapid runner. The rough-coated terrier is better equipped with the hunting instinct, although both are employed in following burrowing mammals such as weasels into their earths. They kill rats with rapid snaps, despatching them more expeditiously than do cats.

Fox Trot Dance of American origin. It consisted at first of alternate slow and rapid movement, not unlike that of the fox, and was at first part of a stage performance. It then became a dance for two, and, as such, was very popular in the 20th century. There are several variations.

Foyle Lough of the north coast of Ireland, also the name of a river that flows into it. Londonderry stands on the river, which is 16 m long. The lough lies between the counties of Londonderry and Donegal—hence one side is in Northern Ireland, the other in the Free State.

Fraction In mathematics any part of a unit. In common or vulgar fractions the number above the bar is termed the numerator and the number beneath the bar the denominator. Thus in the fraction $\frac{3}{4}$, three is the numerator and eight the denominator. In decimal fractions, the denominator is ten or some power of ten, a dot or decimal point being placed before the number. Thus 1 represents one tenth, 325 equals three tenths plus two hundredths plus five thousandths. See DECIMAL.

Fracture Breach in any hard body. In a bone, it may result from direct or indirect violence, or muscular action. It is called a simple fracture when no wound from it penetrates the skin externally, otherwise it is called compound, except where another serious injury is produced as dislocation or rupture, then it is called complicated. If the bone is broken into several pieces it is a comminuted fracture, if merely cracked, it is fissured, if one part is driven into another it is impacted and if partly broken or partly bent as with children's soft limb bones, it is called greenstick.

Fragonard Jean Honoré, French artist. Born at Grasse, April 5, 1732, he studied painting and soon made a reputation. He painted pictures of contemporary life and also landscapes. Of his works the two called "The Lover's Progress" belong to Mr Pierpont Morgan; others are in the Louvre and the Wallace Collection, London. Fragonard died Aug. 2, 1800.

Fram Vessel famous in polar exploration. A three-masted schooner with auxiliary steam engines, she measured 117 ft and weighed 402 tons. Nansen used her for a northward drift followed by travel with sledges to 86° 13' N, in 1893-7. Sverdrup used her for exploring Jones Sound in 1898. Amundsen used her for reaching King Edward VII Land, whence he marched to the South Pole, in 1910-12. In 1931 a fund was raised for preserving the Fram.

Framlingham Market town of Suffolk. It is 22 m from Ipswich and 90 from London, with a station on the L.N.E. Ry. In S. Michael's Church members of the Howard family are buried. There are considerable remains of one of their castles. Framlingham College, founded in 1876 as a school for boys, occupies a fine block of buildings. The town has an agricultural trade. Pop. 2200.

Frampton Sir George James, English sculptor. Born in 1860, he studied under W. P. Frith and at the Royal Academy Schools, London, gaining the Gold Medal and travelling scholarship in 1887. He was elected a Royal Academician in 1902 and knighted in 1906. His work, which is of a high order, is represented by his statue of Queen Victoria in Calcutta, Peter Pan in Kensington Gardens, London, and the Edith Cavell Memorial in London. He died May 21, 1928.

Franc Standard coin of France, Switzerland and Belgium. It was originally a gold coin issued in 1360, silver francs

being first coined in 1575. In its present form, as a unit of the decimal system, it dates from 1795. It is divided into 100 centimes, and for many years it was valued at 25 to the £ sterling being worth, therefore, just under 10d in English money.

In France during the Great War the franc fell enormously in value and violent fluctuations took place. This lasted until June, 1928, when in France it was stabilised at 124 21 to the £, or rather less than 2d in English money. Some British investors who had lent money to France when the franc was high lost heavily owing to its changed value.

In Belgium the franc has been stabilised at 175 to the £ sterling. In Switzerland it retains its original value.

France Republic of Europe. It covers 212,660 sq m and stretches from the English Channel to the Pyrenees and the Mediterranean, and from the Atlantic Ocean, of which the Bay of Biscay is part, to a land frontier dividing it from Belgium, Germany, Switzerland and Italy. There are mountains, including the Vosges and some Alpine peaks, in the east and a great plateau in the centre. In the south the Pyrenees enter the country, and in the north-east are the Ardennes, but most of the land is flat. The chief rivers are the Loire, Seine, Garonne, Somme and Rhône and there are many others. Paris is the capital and the largest city. Next in size are Marseilles, the great seaport, Lyons, Bordeaux, Lille, St Etienne, Nantes, Nice, Toulouse, Strasbourg and Havre, each with over 150,000 inhabitants. In 1931 the population, as shown by the census, was 41,834,923, an increase of 1,091,026 in five years. A large part of the increase (395,281) is in the foreign population which numbers 2,690,923.

TERRITORIAL DIVISIONS Before the Revolution, France was divided into provinces and some of these retain something of their old independent life. In this respect Brittany is perhaps the most notable, but Normandy, Gascony, Picardy, Provence and Languedoc are only a little less so. To-day the country is divided into 90 departments, one being the territory of Belfort, mostly named after the rivers therein. Three of them form the district of Alsace-Lorraine, which was in German hands from 1871 to 1918. Each department has a prefect and a council, and is divided into *arrondissements* and *communes*.

GOVERNMENT, ETC The head of the government is the president, who is elected for seven years by the two houses of the legislature together. These two houses are the Chamber of Deputies and the Senate. The deputies are elected by all male citizens, for four years. The members of the Senate are elected for nine years by colleges of electors in the various departments. As in Great Britain, the work of the Government is in the hands of a ministry. The head of this, the Prime Minister, is selected by the President, but he must have the confidence of the legislature to enable him to carry on his work. The other ministers are chosen by him, but appointed by the President. Both senators and deputies are paid. As it is very unusual for one political party to secure a majority in the Chamber the ministries are usually coalitions, or, as the French call them, *blocs*.

There is no state religion in France, but the prevailing faith is the Roman Catholic, which church has about 51,000 clergy in its dioceses. Monastic orders are subject to very severe

regulations. There are about 1,000,000 Protestants in France. Education, secondary and university, as well as primary, is controlled by the state, and there is an efficient system of universities, colleges and schools. Justice is administered in local courts, with courts of appeal above them, the highest being the court of cassation.

France maintains a large army, including an air force, recruited by compulsory service. It is organised in 35 divisions, or about 500,000 men, with large reserves. In addition there is a colonial army. France has also a large navy based at Toulon, Lorient, Brest, Cherbourg and Rochefort.

ECONOMICS With a soil generally fertile, France is a great agricultural country. Wheat and other cereals are grown, and cattle, sheep and horses reared. A great quantity of wine is produced and exported. There are many manufactures, the chief industrial centres being Paris, Lyons and the district in the N.E. where is a valuable field of coal and iron ore. Besides providing for home consumption large quantities of silk and cotton goods, iron, steel and chemicals are exported. The manufacture of silk is particularly a French industry, as are several others that call for artistic skill. The fisheries are valuable.

The country has an excellent railway system, which is steadily being electrified. The unit of currency is the franc, which is divided into 100 centimes. The metric system is in general use. The Bank of France is the state bank.

COLONIES France has numerous colonial possessions. These cover 4,265,188 sq m, and have a population of 63,374,600. The largest area in Africa, where a vast area in the equatorial region is French. Algeria, Tunis and Madagascar are also French, as is part of Somaliland. Part of Cameroons and Togoland are administered under mandate. Much of Morocco is a French protectorate. In Asia, France has Indo China consisting of Annam, Cambodia, Tonking, and Cochinchina, and Pondicherry in India, whilst she administers Syria under mandate. The remaining possessions include French Guiana and a few W Indian islands, and New Caledonia and some other islands in the Pacific Ocean.

HISTORY As part of the Roman Empire, France was one of the most civilised regions of Europe, and there Roman influence was very powerful and lasting. Later it was invaded and conquered by the Franks and became part of the empire founded by Charlemagne. Early in the 11th century it had its own kings, but their authority was for some time very circumscribed, as much of the land was under powerful dukes and counts, especially Normandy, Burgundy and Aquitaine.

In the later Middle Ages the history of France is largely one of wars with England for the possession of the crown. This period ended in the 15th century and then France, under the Valois and later the Bourbon kings, became the most centralised monarchy in Europe. When Brittany was included, it took very much the shape it has to-day, except that its N.E. and E. boundaries were frequently altered owing to the vicissitudes of war.

The kingdom of France reached the height of its glory under Louis XIV (1643-1715) when it led the social life of Europe and gained a dominance not yet wholly lost. It was at that time a great military nation, and enjoyed a great flowering of intellectual life.

To this picture there was a dark side, one of extravagance and corruption, and even worse, a vast amount of injustice towards the poor. For this a heavy price was paid when the French Revolution destroyed the monarchy and set up a republic. Then came the empire of Napoleon which ended in 1816, after which the Bourbon monarchy was restored. This lasted until 1830, when Louis Philippe became King of the French. In 1848 he was overthrown, and a second republic established. From this Louis Napoleon emerged as the Emperor Napoleon III, and reigned until 1870.

The third republic was created after the Franco Prussian War in 1871, and exists to day. It carried through the Great War, and when this was over turned to the task of bringing back prosperity to France and securing her from the danger of future attacks. This policy, both military and economic, was not always acceptable to the other nations of Europe, but her statesmen kept on their chosen course. A member of the League of Nations, France took a leading part in various European conferences, including the important one in London in July, 1931 and that at Lausanne in July, 1932, which settled the question of reparations. In Jan. 1934, the Slavist affair caused serious rioting in Paris and two governments fell in quick succession. M. Doumergue was the premier who proposed reforms in the constitution and dealt with the Marseilles assassination situation. In May, 1935 a mutual assistance pact with the Soviet was signed in Paris. Two governments again fell over the serious financial position and M. Laval at last won support for national economics. After war started between Italy and Abyssinia France agreed to honour her League obligations and M. Laval took the initiative in the peace plan which brought about Sir Samuel Hoare's resignation from the British Cabinet (Dec. 1, 1935).

France Anatole French author whose real name was Jacques Anatole Thibault. The son of a bookseller he was born in Paris April 16, 1844, and was educated at the College Stanislas there. He soon began to write and in 1868 produced a book on Alfred de Vigny. This was followed by some poems and then came some stories. About 1880 he began to write novels and in the course of the next few years he had a reputation to which his further work added. In 1896 he was elected to the Academy, and before the end was regarded as the greatest man of letters in France and one of the greatest in the world. A Socialist and a free thinker he defended Dreyfus and used his pen to vindicate the cause of France during the Great War. He died Oct. 13, 1924.

A supreme master of style and satire, France's best work is in his satirical novels notably *Le Lile des Pengouins*, *La Révolte des Anges* and *Les Dieux ont Soif*. Hardly less noticeable, however, were his critical studies in history and literature such as the book on Joan of Arc and the essays in *La Vie Littéraire*. *Thais*, an Egyptian story, and *M. Bergeret à Paris* dealing with the Dreyfus affair, are also notable. Of his early books the best is *Le Crime de Sylvestre Bonnard*.

Franchise In its earlier sense a privilege or liberty, especially one granted by the crown. Thus early franchisees included the right to hold a market. Later the word came to be used for the right to vote at elections of Parliament, and in this

sense it is carefully used to day. In the United Kingdom, by a series of Acts of Parliament, the franchise has been extended, and, since 1928 practically all adult men and women enjoy the right to vote. A similar process has taken place in many other countries, although in some, France for example, the franchise is still confined to men. See **ELECTION**, **VOTE**.

Francesco Italian painter. A native of Bologna, he was born about 1450. Before becoming a painter he worked as a goldsmith doing some excellent work in metal and acting as head of the mint in his native city. About 1490 he turned to painting and produced a number of pictures before his death at Bologna, Jan. 6, 1517.

Francesco is represented in the National Gallery, London, by a 'Madonna and Saints'.

Francis Italian saint known as Francis of Assisi. He was born at Assisi, the son of a merchant about 1182, and was baptised as Giovanni. Later he was called Francesco, or the little Frenchman, and by this name he is known. He lived the usual life of a wealthy young man broken by a spell of military service during which he was taken prisoner. After his release he had a serious illness and from this time dates his career as a saint. He gave this time to prayer and the service of the poor, and in 1207, having mortally offended his father, left his native city as a pauper.

For two years Francis wandered about preaching in public places and paying special attention to the lepers. He soon attracted a few followers, and in 1210 went to Rome and obtained permission to found an order devoted to poverty, work and service. Thus the Franciscan order came into being. For the rest of his life Francis was occupied in preaching, his journeys extending through France and Spain and as far as Egypt, in addition to many in Italy. In his last days he passed much time in devotion and in Sept. 1224, he is said to have received on his body the five wounds of Christ. He died Oct. 3, 1226, and two years later was canonised.

A sincere devotion to poverty and a real sense of the brotherhood of man shown by his care for lepers and other outcasts, coupled with a great piety and much mysticism, made Francis the model of medieval sainthood and a character of unusual charm. His love of birds and flowers is an attractive trait in his character and another was his friendship with St. Clare. He wrote many sermons, hymns and other pieces both prose and verse.

Francis I. German king and Roman emperor. He was born Dec. 8, 1708, the son of Leopold, Duke of Lorraine, he succeeded his father in 1729. In 1737 he became Grand Duke of Tuscany. He had married the preceding year, Maria Theresa, daughter of the emperor Charles VI, who, on her father's death became sovereign of Austria Hungary and Bohemia. Largely through her activities he was elected emperor in 1745, and all his life he was dominated by her. He died Aug. 18, 1765.

Francis II. Emperor of Austria and the Holy Roman Empire. Born Feb. 12, 1768, the son of Leopold, Grand Duke of Tuscany, who became emperor in 1790, he succeeded to the throne in 1792, and in 1804 took the additional title of Emperor of Austria. He was the brother of Marie Antoinette, and from 1797 1809 was

often at war with France, being, after each campaign, compelled to submit to humiliating terms of peace. His daughter, Marie Louise, became Napoleon's wife, but, nevertheless in 1813 he joined the allies and greatly assisted in the final defeat of the great emperor. Francis was the last emperor of the Holy Roman Empire which was dissolved in 1806, and the first Emperor of Austria. He died March 2, 1835.

Francis I. King of France. Born Sept. 12, 1494, a son of the Count of Angoulême, he belonged to a younger branch of the royal family, and like his sister Marguerite, who wrote the *Heptameron*, he was well educated, he was also adept at all manly exercises. In 1514 he married Claude, daughter of his cousin Louis XII and in 1515 he succeeded Louis as king. His reign was chiefly occupied with his wars against the emperor, Charles V, who took him prisoner at Pavia in 1525. In 1526 he was released, and he reigned until his death at Rambouillet, March 31, 1547.

He was a patron of art and literature, which included the foundation of the College de France in 1530, this showed him as a true child of the Renaissance. He was succeeded by his son, Henry II.

Francis II. King of France. Born Jan. 19, 1544, he was the eldest son of Henry II and Catherine de Medici. In 1558 he was married to Mary, Queen of Scots, and in 1559 he succeeded his father as king. On Dec. 5, 1560, he died in Paris and was succeeded by his brother, Charles IX.

Francis Sir Philip. English writer. Born in Dublin Oct. 22, 1740, he was educated at St Paul's School, London, and in 1758 entered the public service. He was soon occupying a responsible position, and in 1773 went to India as a member of the Council of Bengal. He remained there until 1781, having fought a duel with Warren Hastings and made a small fortune at cards. In 1784 he was elected an M.P., and was a member of the group by whom Hastings was impeached. His other activities included the founding of the Society of Friends of the People, and a friendship with the Prince Regent. In 1806 he was knighted, and he died Dec. 22, 1818. He was supposed to have written *The Letters of Junius*, which, however, he never admitted, and the authorship cannot for certain be attributed to him.

Franciscan Order of mendicant friars founded by St Francis of Assisi in 1210. Formally approved by the pope in 1223 they laid special stress on preaching and ministering to the body and some Asiatic, N. African and American missions still survive. In England, where they arrived in 1224, founding houses at Canterbury, London and Oxford, they were known as Grey Friars. At the dissolution of the monasteries in 1537, 66 of their friaries existed.

Other Franciscan orders comprise nuns called Poor Ladies or Poor Clares, 1212, and Tertiaries 1221. From the stricter section called Observants, the Conventuals, who practised a mitigated rule, separated in 1517, whilst the Capuchins, established in 1525, separated in 1537. After 1897 those members of the order who were neither Conventuals nor Capuchins became known as Friars Minor. Franciscans wear a grey or dark-brown cowl, girdle and sandals.

Francis Ferdinand Austrian archduke. Born at Graz, Dec. 18, 1863, the son of Archduke Charles Louis, he was nephew to the emperor Francis Joseph, and on the death of the Crown Prince, in 1889, became heir-apparent to the throne. In 1900 he contracted a morganatic marriage with the Countess Sophia Chotek, who was created Princess of Hohenberg, renouncing for his wife and her children the right of succession. Whilst on a visit to Bosnia, he and his wife were assassinated at Sarajevo, June 28, 1914.

Francis Joseph Emperor of Austria-Hungary. The eldest son of the Archduke Francis, a grandson of the Emperor Francis II and a member of the house of Hapsburg, he was born in Vienna, Aug. 18, 1830. In 1848 his uncle, Ferdinand, abdicated and Francis Joseph succeeded him. His reign, which lasted for 68 years, was one of misfortune, both nationally and personally. There was much discontent in the various parts of his empire, and in 1859 he lost some of the Austrian possessions in Italy, the rest going a few years later. More humiliating still was the rapid defeat of Austria by Prussia in 1866, and the end of Austria's long dominance in German affairs. However with an innate stubbornness the emperor held on, and towards the end took the fatal step of attacking Serbia, after the murder of his nephew and heir, Francis Ferdinand.

Francis Joseph married Elizabeth, a Bavarian princess. His only son, Rudolph, met with a tragic death in 1889. He himself died in the midst of the war, Nov. 21, 1916, and was succeeded by his nephew Charles.

Franck César Auguste. French composer. He was born at Liège, Dec. 10, 1822, and after studying music there and in Paris, became a teacher of music. He also became organist of a church in Paris, and in 1878 Professor of the Organ at the Conservatoire there. He composed a great deal, including some orchestral works. He died Nov. 8, 1890.

Franconia District of Germany. It was at one time one of the great duchies and some of its rulers became German kings. Named after the Franks, it lay in the W. of the country with Frankfort as its capital. In 1024 the duchy was divided between several princes, but the name remained in general use, and until 1802 the bishops of Würzburg called themselves dukes of Franconia.

Most of Franconia is now included in Bavaria, and three districts of the republic are middle, lower and upper Franconia.

Franco-Prussian War

Struggle in 1870-71 between France and Prussia, the latter aided by Bavaria and other German states. There was some tension because Napoleon III, then ruling France, objected to the selection of a German prince as king of Spain. Thinking the time favourable, Bismarck precipitated the struggle by altering and publishing a telegram from Ems which made it appear that the King of Prussia had insulted the French Ambassador.

War was declared by France on July 19, and on Aug. 6 the main armies came into contact. At Woerth and Spicheren the Germans, who invaded France in three armies, were victorious, and soon the French had

abandoned Alsace Lorraine, except the fortress of Metz. German victories at Vionville, Mars la Tour, and, on Aug 18, Gravelotte, forced a large French Army to take refuge in Metz. Then on Aug 31 and Sept. 1, came the decisive Battle of Sedan. This ended in the surrender of Napoleon and his army and, a little later, the forces in Metz followed this example.

The Germans then marched unopposed to Paris, which was besieged from Sept 20 until its surrender in Jan., 1871. During these months the French raised new armies, and there was a good deal of fighting around Orleans and elsewhere, but nothing could save their cause. The armistice was followed by the peace of Frankfurt. France agreed to surrender Alsace Lorraine, except one small district, and to pay an indemnity of £200,000,000.

Frankfort City and river port of Germany, usually called Frankfurt on Main. Situated 22 m from the junction of the Main with the Rhine, in the Prussian province of Hesse Nassau. It is, owing largely to its position, one of the most important German cities. The old town is on the north side of the river, on the south side is Sachsenhausen and all around, stretching far beyond the lines of the old fortifications, are modern suburbs.

Among the many famous buildings in the old town are the Kaiser's hall and the cathedral. The old home of the Rothschilds is now a museum, as is the house in which Goethe, Frankfort's most famous son, lived. The university dates from 1914.

The palace garden and the zoological garden are famous, and there are some noble memorials. An old bridge and several modern ones cross the river.

Frankfort is a noted banking city, and in its population is a large Jewish element. It is an important railway centre and has a considerable trade along the river. Other industries include numerous manufactures and printing works.

HISTORY Frankfort the city of the Franks, was an early residence of the Frankish kings, and quickly became a free city. It was the place chosen for the election and later the coronation of the German kings, and in the later Middle Ages, its wealth and importance grew rapidly. It was an early home of printing and had important fairs. From 1810 it was the capital of a grand duchy, and from 1810 to 1866 the meeting place of the diet of the German Confederation. In 1848-49 the great National Parliament elected to conclude a union of the German states, met here. In 1866 the free city took the side of Austria against Prussia and consequently lost its exceptional status. Since then it has been part of Prussia. Pop 467,500.

Frankfort -on-the-Oder City of Prussia. It stands on both sides of the Oder, 50 m from Berlin, and is a shipping and manufacturing centre and a railway junction. There are docks along the river, which is connected with other German rivers by canals. Frankfort proper is on the left bank of the Oder, on the right bank are suburbs. Frankfort belonged to the Hanseatic League in the Middle Ages. Pop 75,000.

Frankincense Aromatic gum resin. It is yielded by various trees, pre-eminently of the genus

Boswellia, which grow mainly on the Somaliland and Arabian coasts, whence it reaches Bembay. It appears in commerce as hardened yellow tear drops called gum olibanum. It entered into the incense of the Jewish sanctuary (Ex xxx). Long employed medicinally it is nowadays rarely used.

Franking Use of the postal service gratuitously. Members of Parliament, both peers and commoners, long enjoyed the privilege of sending their letters, and those of their friends through the post without fee. In 1704 the number for each member was restricted to 10 a day, and in 1840 the privilege was abolished. Official letters are still franked when sent on public business, by marking the envelope O H M S.

Franklin Name sometimes used in mediæval England for a small independent landowner. He was below the nobles, but above the villeins. Chaucer has a franklin in *The Canterbury Tales*, and the word is used by Scott in *Ivanhoe*.

Franklin Benjamin American politician and scientist. Born in Boston Jan 17, 1700, the son of a tallow chandler from England, he was apprenticed when a boy to his brother, a printer. In 1723 he settled in Philadelphia, but soon went on a vain errand to London, where also he worked as a printer. Returning to Philadelphia he became owner of *The Pennsylvania Gazette*, and in 1732 started the popular *Poor Richard's Almanac*. Prominent in public life, he was postmaster of the city in 1735. In 1736 he was made Clerk to the General Assembly of the state of Pennsylvania, and in 1751, on giving up that post, he became a member remaining such for 13 years.

In 1757, as agent for his state, Franklin went to London and remained there until 1762, he filled the same position from 1764 to 1775 and to these two periods is due his acquaintance with English men and manners. In 1770 he helped to draw up the Declaration of Independence, and went to Paris on behalf of the revolting colonies where he arranged for the help of France in the struggle with Britain and remained until peace was signed in 1783. He was President of the State from that time until he retired in 1788, and helped to draw up the constitution of the United States. Franklin died in Philadelphia, April 17, 1790.

Franklin spent much of his time in scientific research, particularly on electricity. A practical result was his invention of the lightning conductor.

Franklin Sir John English explorer. Born at Spilsby, Lincs, April 16, 1786, he entered the navy in 1801, and was present at the Battles of Copenhagen and Trafalgar. In 1818 he made his first Polar expedition to the Arctic, under the direction of Capt Buchan. In 1819 he explored and charted the little known northern coasts of America, writing on his return a *Narrative of the Journey*. In 1822 he was knighted, and was Governor of Van Diemen's Land, 1836-43. In 1843 Franklin set out in search of the N.W. Passage, and for many years nothing was heard of him. Several expeditions were sent in search of his party, and in 1859 a paper was found giving some record of the ill-fated voyage and of Franklin's death, June 11, 1847. It proved also that he had actually discovered the N.W. Passage.

Franks Name given to some European tribes. They are first heard of in the 3rd century and lived along the lower courses of the Rhine. Each tribe was under a chief, but these united together, and in the 4th century were collected into only two groups, the Riparian Franks and the Sallian Franks. Under the leadership of Clovis the Sallian Franks moved into what is now known as France, and in 481 he was made their king. Thus began the Kingdom of France, which took their name. Clovis conquered much of the land, and the Riparian Franks came under his rule. Later, however, in the 9th century, when their land had extended in all directions, the Franks again broke into two divisions. The west Franks remained in France, whilst the east Franks founded what later became Germany.

Franz Joseph Land Archipelago in the Arctic Ocean to the east of Spitzbergen. It consists of about sixty volcanic islands, mostly glacier covered. It was discovered by Julius Payer in 1873.

Frascati City of Italy. It is 15 m from Rome, and owes its fame to its beautiful position on the Alban Hills. On this account it became a popular resort in the hot weather and many Roman families had villas there. There is a modern cathedral in which Charles Edward, the Young Pretender, was buried in 1788, and around are vineyards, the place being noted for its wine. Near are the ruins of an amphitheatre. Pop 11,000.

Fraser River of British Columbia. It is a union of the N and the S Fork, two rivers that rise in the Rocky Mountains. They join at Fort George and flow, as the Fraser for 750 m, to the sea in the Strait of Georgia. The river is famous for its salmon and also for the scenery along its course. It is navigable for about 100 m.

Fraserburgh Burgh and seaport of Aberdeenshire. It is 47 m from Aberdeen and 155 from Edinburgh, on the LNE Ry. There is an excellent harbour, and the place is one of the Scottish centres of the herring fishing. Pop (1931) 9720.

Fraserville Town and riverside resort of Quebec, Canada, also known as Rivière du Loup. Standing where that river falls into the River St Lawrence, 110 m from Quebec, it is a port, a pleasure resort and has some manufactures. Pop 7700.

Fraud Deceit or imposture. In English law it is an offence to commit a fraud, i.e., to gain an advantage by a deliberate act of deceit. Some frauds, for instance, a conspiracy to defraud, are criminal offences. The statute of frauds is an important measure dating from 1676. By it no one can bring an action for fraud unless he has written evidence to support it.

Fraunhofer Joseph von German scientist. Born in Bavaria in 1787 he became a glass polisher, a career which led him to study mathematics. In 1806 he secured a position as optician in an institute at Munich and in 1809 he helped to found a similar institute which he controlled. He died June 7, 1826.

Fraunhofer did a great work in making lenses for telescopes and microscopes, but his greatest achievement was to discover the lines in the solar spectrum named after him. He counted and mapped out 600 of

these and gave the distinctive letters A to H to the most important of them. Much work has since been done in the same direction, and over 10,000 lines have now been counted, but the inception of this branch of astronomy is due to Fraunhofer.

Frazer Sir James George British scholar. Born in Glasgow in 1854, he was educated privately. His life was spent in studying comparative religion and its associations with folklore and mythology and this led to publication in 1890 of *The Golden Bough*, the greatest work of its kind. Several editions have appeared, each with additional information. In 1915 it was again published in 12 volumes, and in 1922 in an abridged edition. In 1907, Frazer was made Professor of Social Anthropology at the University of Liverpool, and in 1920 an FRS. In 1914 he was knighted, and in 1925 was given the O.M. His other writings include *Totemism and Exogamy*, *Balder the Beautiful* and *Folklore in the Old Testament*.

Freckles Brownish yellow spots appearing in the skin. They are found particularly on the face, neck and hands of fair and red-haired persons during hot and windy weather, and comprise pigmented areas in the deeper layers of the cuticle. They are stimulated by exposure and are best left alone.

Treatment—Lergyal's Birch Balsam is a good lotion to apply to freckles with a brush or soft piece of rag once daily. It should be washed off with soft water in about half an hour and the skin carefully dried.

Frederick I. Emperor of the Holy Roman Empire, known as Barbaressa. Born about 1124 he belonged to the Hohenstaufen family, and in 1147 succeeded his father as Duke of Swabia. In 1152 he was chosen German king in succession to his uncle, Conrad III., and in 1155 he was crowned Emperor in Rome. Frederick's long reign fell into two spheres of activity. To Germany he was a strong and resolute ruler, crushing the powerful dukes who opposed his authority. In Italy, Frederick was much less successful. Having quarrelled with the pope, he set up popes of his own, but his attempts to maintain them met with only partial success. Other enemies rose up against him, and in 1176 his armies were beaten at Legnano, and in 1177 he signed a humiliating peace at Venice with Pope Alexander III. In 1189 he set out on a crusade, and he was drowned in Asia Minor on June 10, 1190.

Frederick II. Emperor of the Holy Roman Empire. Born in Italy, Dec 26, 1194, he was a son of the Emperor Henry VI. In 1196 he was chosen German king, and in 1197 became King of Sicily. His extraordinary abilities won for him the title of *stupor mundi*, the wonder of the world.

In 1212 Frederick went to Germany and was crowned king, but he had a hard fight to establish his position there, which was never very secure. In 1220 the pope crowned him Emperor in Rome, and in 1228, after some years in Sicily, he went as a crusader to Palestine and was crowned King of Jerusalem. On his return he quarrelled with the pope, and the latter was beaten and humiliated. Frederick's sons, Henry and Conrad, in turn rose in rebellion against him, and by 1239 he was faced with a very formidable circle of enemies, both in Germany and Italy.

With these the pope made an alliance, and the war that broke out continued during the rest of his reign. Time and again Frederick's cause seemed hopeless, but with remarkable perseverance he kept up the fight to the end.

On Dec. 15, 1250, the emperor died. He was buried in Palermo, the seat of his magnificent court.

Frederick German emperor. He was born at Potsdam, Oct. 18, 1831. Son of the Emperor William I. He commanded an army in the war against Austria in 1866, and another in the struggle with France, 1870-71, and was Crown Prince of Germany from that time until he became Emperor in 1888. He only reigned a few weeks as on June 15, 1888, he died of cancer of the throat. Frederick married Victoria, eldest daughter of Queen Victoria of England. They had two sons and four daughters. The sons were William II. and Prince Henry of Prussia.

Frederick King of Bohemia. Born Aug. 26, 1596 he was a son of Frederick IV., elector palatine of the Rhine, and became elector as Frederick V. in 1610. In 1613 he married Elizabeth daughter of James I., and in 1619, being a Protestant he was elected king of Bohemia. His enemies, however, were too strong for him. He was called derisively "the winter king," and driven from the land. His enemies also took from him his electorate, and although James sent help he could not recover it. From 1623 until his death Nov. 29, 1632, Frederick was an exile. One of his children was Sophia electress of Hanover, he was thus an ancestor of King Edward VIII. Prince Rupert was one of his sons.

Frederick Name of eight kings of Denmark. The most important are Frederick VII. and Frederick VIII. The former, who reigned from 1848 to 1863, was the last king of the Oldenburg family. He died Nov. 15, 1863.

Frederick VIII. was a son of Christian IX. and a brother of Queen Alexandra. He became king in 1906, and died in Hamburg, May 14, 1912. His wife was a daughter of Charles XV. King of Sweden, and he was succeeded by his eldest son Christian X.

Frederick II. King of Prussia, called the Great. Born in Berlin, Jan. 24, 1712, the son of Frederick William I. he soon showed that he possessed exceptional intellectual powers. For various reasons his father made his life a burden to him and in 1730 he tried to escape from court. This was prevented, and for some years he was little better than a prisoner. Then, the restriction being less pronounced he married a princess of Brunswick, corresponded with Voltaire, read much French literature and wrote in that language *Anti-Machiavel* an expression of his belief that a king must be the first servant of his people.

On May 31, 1740 Frederick became king and almost at once made war on Austria. His aim was to obtain Silesia which was given to Prussia by treaty in 1742. The war was soon renewed, but when it was ended in 1745 the Prussian king was known as a very capable soldier, if a cynical politician. For the next eleven years he was able to put his ideas of paternal government into practice, but he also kept his army efficient for he foresaw a recurrence of war.

In 1756 the Seven Years' War began

The odds against Prussia aided only by Britain, were immense, but her king performed miracles both as general and administrator. In this period he earned the title of great, and a place among the masters of the art of war. His people, however, suffered terribly, and his country was utterly exhausted when peace was made in 1763. For the rest of his reign, ruling as an absolute monarch, he did a good deal to restore its prosperity, whilst by sharing in the partition of Poland in 1772, he added more territory to Prussia. In 1778 he again made war on Austria and again enlarged his realm.

Frederick died, without sons, at Potsdam, Aug. 17, 1786, and his nephew, Frederick William II. followed him on the throne. The king wrote a great deal, always in French, and his writings have been published in 33 volumes, while further volumes are filled with his political correspondence. There are many *Lives* of the king, notably the massive one by Carlyle to whom, in spite of his flagrant breaches of faith Frederick was a hero.

Frederick Prince of Wales. The oldest son of George II., he was born Jan. 6, 1707, before his grandfather became King of Great Britain. In 1714 he was made Duke of Gloucester and in 1729, Prince of Wales. He married Augusta, a daughter of the Prince of Saxe-Coburg, and was the father of George III. He is chiefly known because of his quarrels with his father which led him to make his house a kind of court for all who disliked George II. and Sir Robert Walpole. He died March 20, 1751.

Frederick Charles Prussian prince and soldier, called the Red Prince. Born Mar. 20, 1828, he was a grandson of King Frederick William III. and a nephew of William I. He entered the army, and in 1864 commanded the Prussians in the war against Denmark, and led an army in the campaign against Austria in 1866, winning fame at Sadowa. He commanded one of the three armies that invaded France in 1870 when he was again successful in the field, especially at Metz. In the intervals of peace he held several high commands. The prince died June 15, 1885. One of his daughters became the wife of the Duke of Connaught. His name of the Red Prince was due to the fact that he frequently wore the red uniform of one of the Russian regiments.

Fredericksburg City of Virginia, U.S.A. It stands on the Rappahannock river 60 m. from Richmond. It is well served by railways and has some industries. Pop., 6000.

A great battle in the American Civil War took place near Fredericksburg in Dec., 1862. The Confederates, or Southerners, under Lee, were defending the road to Richmond, when the Northerners or Federals under Burnside appeared on the N. bank of the Rappahannock. For about a month there was artillery fighting across the river. On Dec. 12, the Northerners made a crossing and seized Fredericksburg. A three days battle ended in a complete victory for the Southerners. On Dec. 15, Burnside took his men back across the river having lost over 12,500 men. The Southerners lost about 4000.

Frederick William Name of an elector of Brandenburg and four kings of Prussia.

The elector, Frederick William, called the Great Elector, began to reign in 1640, and ruled until his death, May 9, 1688. He was responsible for making Brandenburg much larger and stronger so that it became a power in Europe, and his son, Frederick, was able to obtain the title of king of Prussia.

Frederick William I, the second king of Prussia, reigned from 1713 to 1740. He is famous as the king who collected giants for his army, and was the father of Frederick the Great. Frederick William II succeeded his uncle, Frederick the Great, in 1786 and reigned until 1797. His son, Frederick William III, was king from 1797 to 1810. He led his people when they rose against Napoleon and was ruler during the European settlement that followed the peace of 1815. Frederick William IV succeeded in 1840, but lost his reason in 1857. He lived until June, 1861, his brother William, afterwards emperor, acting as regent.

Fredericton Capital of New Brunswick, Canada. It stands on the river St. John, 80 m from its mouth and 68 from St. John its seaport. It is served by two branches of the C.N. Rlys. The University of New Brunswick is situated here. The industries include lumbering and some manufactures, and there is some shipping along the river. At first named St. Ann's, Fredericton was made the capital in 1788. Pop (1931) 8,238.

Frederiksborg Palace of Denmark. It stands on some islands in a lake in Zealand, about 21 m from Copenhagen. The early kings had a castle here, but the present building, which stands in a large park, was erected by Christian IV about 1620. In 1839 it was largely rebuilt and is now a national museum.

Frederiksborg must be distinguished from Fredericksburg. The latter is a western suburb of Copenhagen where there is also a palace, now used for public purposes. It stands in extensive grounds, part of which are used as a zoological garden.

Freeboard In a vessel the distance between the upper or main deck and the load-water line. It should provide an amount of reserve buoyancy that will keep a ship afloat if two of its compartments have been holed.

Free Church Protestant evangelical communion that is not an established church. Based on individual freedom in matters of doctrine, church government and ministerial appointment, the free churches include the Congregational, Baptist and Methodist churches, the Presbyterian Church of England, the Free Episcopal churches, the Society of Friends and cognate communions abroad. The National Council of the Evangelical Free Churches holds an annual conference. Its headquarters are at the Memorial Hall, 11 Arlington Street, London E.C.

FREE CHURCH OF ENGLAND Religious body called also the Reformed Episcopal Church. It was founded in 1844 in Devonshire by some members of the Church of England who objected to High Church teaching. It is governed by bishops and has a small membership, chiefly in the W. of England.

FREE CHURCH OF SCOTLAND Presbyterian communion. It was formed by members of the Established Church of Scotland who, claiming for parishioners the right of choosing their own ministers, seceded from the estab-

lished church in 1843, the Rev. Thos. Chalmers being their leader. They formed a new church, which was joined in 1876 by the Reformed Presbyterian Church, and was second only to the established church in numbers and influence. In 1900 the Free Church and the United Presbyterian Church were united as the United Free Church of Scotland, and in 1930 there was a union of this body and the established church. Just before the union the Free Church had a membership of over 500,000. See SCOTLAND, Church of.

Free City City that is independent. A modern instance is Danzig, a free city since 1919. In the Middle Ages there were many free cities in Italy and Germany. These were part of the Holy Roman Empire, and owed allegiance to the emperor but to no one else. In Italy they threw off, after a time, even this authority, but in Germany they remained imperial free cities until the dissolution of the empire in 1806. At one time there were nearly 100 of them, including such famous places as Nuremberg, Frankfurt and Augsburg. Gradually their number was reduced, as they were taken by one or other of the German rulers until, after the Napoleonic wars, there were only four. Of these Frankfurt lost its freedom in 1866. Hamburg, Bremen and Lübeck continued free cities of the German Empire, and are now free cities of the German republic.

Freehold In England and other countries a form of holding land. It is the most complete form of ownership known to the law, and a freehold estate is one with the fewest possible burdens on it. Since the changes made in 1925 all land in England has been either freehold or leasehold.

Freeman One who is not a slave. In early society there was a sharp distinction between freemen and slaves, this being the case in Greece and Rome, as well as among the Anglo-Saxon and other Teutonic tribes, the freemen forming the fighting and governing class. Gradually, as slaves became free the distinction disappeared. In England a serf or villein could, among other ways of winning it, obtain his freedom by residing for a year and a day in a chartered town. By the end of the 15th century serfdom had entirely disappeared in Britain, and the word freedom had lost its special meaning. In other European countries the same process took place but at a slower rate.

The word freeman was then used in England for a man who had the right to take part in the government of the city or borough in which he lived. These privileges were greatly abused, and in 1835 they were swept away, the municipal corporations being reformed. London, however, was an exception, and there freemen still remain and take part to a slight extent in the city's government. This freedom is usually obtained by heredity, or by apprenticeship, although the latter is only nominal and all freemen are members of one or the other of the city companies.

A third kind of freeman came into existence in the 19th century. These are men of distinction, such as a Prime Minister or a leading soldier, who are given the honorary freedom of a city or borough, now a popular way of recognising distinguished services to the state.

Freeman Edward Augustus English historian. Born at Harborne, Staffs., Aug. 2, 1823, he entered Trinity

College, Oxford, in 1841, being elected a fellow in 1845. His first published book was a *History of Architecture*, 1849, and he was a constant contributor to *The Saturday Review*. He made his reputation as an historian by his *History of Federal Government*, which he did not finish, and his *History of the Norman Conquest*. In 1884 he was made Professor of Modern History at Oxford, and he died March 16 1892.

Freemason Member of a great international organisation. The earliest records of British freemasonry are in Scotland, but a much longer history is claimed for it, one going back to the days of the Greeks and their mysteries. There were societies, or lodges, in Scotland in the 16th century, the oldest being in Edinburgh. A little later there was a lodge in Newcastle on Tyne, and soon one or more in London. In 1717 four London lodges united to form the Grand Lodge of England. The Grand Lodge of Ireland dates from 1729, and the Grand Lodge of Scotland from 1736. From these lodges members have carried the ideas of freemasonry into all parts of the world inhabited by white men. The movement grew rapidly during the 19th century, and there are now nearly 4500 lodges on the register of the United Grand Lodge of England and a total membership in excess of 4 000 000.

The organisation consists of a number of lodges, each with its own officials elected by the members. Members are admitted very much as to a club, and many lodges are confined to men with similar interests or occupations. Each lodge has its master, treasurer, warden and secretary. Regular meetings and dinners are held, and at these a good deal of ceremonial is observed. Special robes and jewels are worn by the masters. The lodges are united under provincial Grand Masters, and abroad under district Grand Masters. Over all is the united grand lodge with the Duke of Connaught as grand master.

Apart from masons proper, who are called craft masons, there are other societies of masons, associated more or less closely with the parent body. Such include the Royal Arch masons, the Mark Masons and several others. The offices of the United Grand Lodge are in Freemasons' Hall, Great Queen St., London, where a fine building has been erected as a war memorial. The Scottish Grand Lodge has its headquarters at Freemasons' Hall, Edinburgh, and the Irish one in Molesworth St., Dublin. In Great Queen St., London also, is the hall of the Grand Lodge of Mark Master Masons.

Freemasons are noted for their charities. There is a Masonic Benevolent Institution for assisting impoverished masons and their dependents. For orphans they maintain schools—at Busby for boys and at Clapham Junction and Wybridge for girls. Similar schools are also supported by the Irish masons. In addition there are many other benevolent funds and associations maintained by the lodges in Great Britain and abroad.

Free Port Port at which no duties are charged on goods entering it. In the Middle Ages and later there were a number of such ports, but with the increasing use of tariffs they have disappeared. Some seaports, however, have a free port, to which goods are brought in order to be shipped and sent to another country. There is one at Hamburg, and other European seaports have them. Flume is a free port.

Freestone Building stone, other a sandstone or limestone, which can be easily dressed by the hammer and chisel. Beer freestone from the middle chalk of Beer near Seaton, Devon, was much used in the old churches of Devonshire and in the restoration of Exeter Cathedral.

Freethought Term associated with disbelief in the doctrines of the Christian or any other religion. It came into use about 1700, and was a popular term in the days when Charles Bradlaugh was attacking Christianity, when, in the minds of most people, it was synonymous with atheism. Its adherents however, assert that it does not imply necessarily hostility to any form of religious belief but is simply the right to examine their beliefs in a scientific spirit, testing them by the accepted rules of evidence and declining to accept any document or tradition simply because it is classed as sacred. Freethought to day is more generally known as rationalism (q v).

Freetown Seaport and capital of Sierra Leone. British W. Africa. It stands on the estuary of the Rokel river, is a second-class Imperial coaling station, and has an excellent harbour. The port is connected by railway with the interior. Freetown, as the name suggests, was founded as a home for freed slaves. Pop. 44 000.

Free Trade Primarily the absence of restrictions on trade, especially between nations. The doctrine is due mainly to the teaching of Adam Smith's *Wealth of Nations*, which was popularised by Richard Cobden. Under it most goods are admitted into the country free of duty, but, if for revenue purposes, a duty is put upon any class of imports a corresponding tax must be put upon the same goods produced within the country. Great Britain was one of the whole a free trade country from the days of Sir Robert Peel until the introduction of a tariff in 1931-32, but other countries, with a few exceptions, refused to follow her example. See IMPERIAL FERRIER (1).

Free Will Idea that man can control his own actions that they are not controlled by an external force or power. It is both a philosophical and a religious idea, and in both spheres there are two schools of thought. The philosophers who deny the existence of free will in man who believe that every action is determined by some previous action and therefore ultimately by the forces that control the universe, are called determinists. In religion the great opponent of free will was John Calvin, whilst Arminius took the other side and for long, religious bodies especially Protestants, were sharply divided into Arminians and Calvinists. To day the religious difference is much less prominent.

Freezing Point Temperature at which a liquid changes to the solid state. In the case of water it is 0°C (32°F). The freezing point is affected by pressure and as in the case of water, expansion takes place on freezing the increased pressure lowers the freezing point. The presence of a salt in the liquid also lowers the freezing point which together with the heat absorbed during the solution of the salt explains the use of freezing mixtures of salt and ice.

Freiburg im-Breisgau City and Archdiocese

episcopal see of Germany. Situated in Baden, on the Dreisam, 40 m N of Basle, it has a university founded in 1457, and a fine Gothic cathedral of the 12th century. The manufactures include surgical and musical instruments. It has a broadcasting station (570 M, 0 25 kW. Pop (1925) 90,175

Freight Term applied to the cargo of a ship, also to the charges for transport of goods by sea. Goods are grouped into four classes for transport purposes, the first class having the highest rate. In addition a special class includes all goods of a special or dangerous character, such as jewellery, cement or gunpowder. In the United States the word is much used in connection with goods carried by railway.

Fremantle Town and seaport of W Australia. It stands at the mouth of the Swan river, 12 m from Perth, and has a fine harbour. There are some manufactures, but shipping is the chief industry. A pleasure resort, Fremantle has several beaches for bathing, while a little farther away is the popular Point Walter. Electric tramways serve the town and district. Pop 35,141.

French Africa French Equatorial Africa. Name given by decree in 1906 to the French Congo, Gabon, Ubangi Shari and Chad colonies. The area is approximately 912,049 sq. m., and the population 3,192,282 (1931), with 3,300 Europeans. It exports ivory, rubber, timber, palm oil, coffee and cocoa. The annual rainfall in parts reaches 120 in. Much of the country is still undeveloped.

French West Africa French colonial possessions. It comprises the Ivory Coast, French Guinea, Dahomé, Niger, French Sudan, Senegal, Haute-Volta and Mauritania. The capital is Dakar, area 1,799,039 sq. m., and the population 14,576,973 (1931). The chief products are vegetable oils, timber, rubber and cattle. Cotton and cocoa are increasing in importance.

French Guinea See GUINEA

French Polish Preparation used in producing a high polish on furniture woods. Shellac is dissolved in methylated spirit, colour being given either by using different grades of the gum resin or by adding pigments. The polish is rubbed on the wood, linseed oil being used to ensure smoothness of action.

French Revolution Movement that began in France in 1789 and exercised an enormous influence in Europe. The condition of the French people, especially in the rural districts was very bad, the system of government being thoroughly corrupt. Power was concentrated in the hands of the king and the nobles, and on it there were no effective checks. The upper classes paid no taxation, which consequently fell with great severity upon the poor. The country's finances had got into a condition of hopeless confusion.

Side by side with this state of affairs, Voltaire, Rousseau and others were teaching the people new ideas, which especially in the towns, found ready acceptance. Voltaire cast contempt upon the religions and other conventions which, hitherto, had helped many to acquiesce in their wretched lot. Rousseau preached the natural rights of man, and the idea of a state in which the general will was supreme. People began to see that there was no warrant, either in divine or human law,

for the hideous inequalities which prevailed on every side.

The actual movement began in 1789 when the States General, the nearest approach to a representative body existing in France, was called together, for the first time since 1614. When it met the commons, or third estate, took the lead, and a National Assembly was called.

On July 14, 1789, the mob destroyed the Bastille, and there were risings all over the country. The tricolour was adopted as the flag of the revolution and talk of a republic began.

The National Assembly decided that all privileges should be abolished, and turned itself into an assembly for the preparation of a constitution. Many of the nobles fled to England and elsewhere, but the king still had many supporters, although he was little better than a prisoner.

In June, 1791, the king, Louis XVI, escaped from Paris, but was stopped at Varennes and brought back. The assembly then decided to make France a constitutional monarchy, but for several reasons this was not consummated. Several foreign rulers and large numbers of their subjects were now thoroughly alarmed at the course of events in France, and the exiled French nobles were urging them to interfere. Prominent here was the Emperor of Austria, a brother of Marie Antoinette, the wife of Louis XVI. With the King of Prussia, he had issued a declaration, demanding that France should restore Louis XVI.

The republican party, chiefly Jacobins and another group called Girondins were, however, gaining strength, and the efforts to bring about foreign interference only added to their influence. The outcome was that, in March, 1792, France declared war on Austria. Prussia hastened to the side of Austria, but in spite of riots and disorders the French troops defeated the Prussians at Valmy.

A National Convention now took over the control of affairs, and the most terrible part of the revolution began. The extremists were now absolutely supreme, their leaders being Danton, Robespierre and Marat. A republic was established and on Jan 21 1793, after a trial, Louis was executed. Treaties with foreign countries were repudiated, and it was declared that France would help all Europe to overthrow their hereditary rulers. Thousands were put into prison. Meanwhile the republican armies were winning success after success.

In 1793 a Committee of Public Safety was established, Robespierre being its dominating spirit, and the Reign of Terror began. Hundreds of aristocrats and politicians were sent to the guillotine. On Oct. 16 1793, Marie Antoinette was executed and then the aristocrats turned on one another. Robespierre brought about the execution of Danton on April 5, 1794, and he himself suffered the same fate on July 28. The Reign of Terror came quickly to an end, but it was not until Oct. 1795, that the Directory was established, and the period described as that of the French Revolution was over.

The number of books written on the period is legion, but Carlyle's *History of the French Revolution* still stands out.

French Revolutionary Wars

Wars caused by and contemporary with the French Revolution (q.v.). On April 20, 1792, Louis XVI was compelled by his Girondist

ministers to declare war on Prussia and Austria. Early in 1793 Britain, Holland and Spain joined them in a coalition fighting against tremendous odds, the French armies overran Holland in the winter of 1794-95, compelled Prussia and Spain to withdraw (1795), and the command of Napoleon Bonaparte brought Sardinia (1796) and Austria (1797) to submission. The French attempt at an invasion of England was foiled by the British victories at St. Vincent and Camperdown (1797) while Napoleon's eastern campaign was frustrated by Nelson's victory in Aboukir Bay (1798) and Smith's defence of Acre (1799). The formation by Pitt of a second coalition (with Austria and Russia) was followed by the return of Napoleon to Europe, the withdrawal of Russia (1800) and Austria (1801), and the Peace of Amiens (March, 1802).

Frensham Village of Surrey. It is nearly 4 m. to the S. of Farnham. The common is used by the military, being convenient for Aldershot. On it are three mounds called the Devil's Jumps. Frensham is noted for its ponds, used for boating, bathing and fishing. There are two, the larger covering 90 acres.

Frere Sir Henry Bartle Edward, English administrator. Born at Clydach, Brecknockshire, May 29, 1815, he entered the Bombay Civil Service in 1834. In 1859 he was created K.C.B. for services rendered during the Indian Mutiny. Governor of Bombay, 1862-67, he was made a baronet in 1870. In 1877 he was appointed Governor of Cape Colony and as High Commissioner of British S. Africa, he was deputed to arrange the confederation of the S. African Colonies, but before attaining his purpose he was recalled in 1880, owing to a change of Government. Frere died May 29, 1884.

Fresco Method of painting upon a freshly prepared ground of stucco or plaster. Mineral pigments are used, with size, yolk or white of egg as a medium. Since the pigments quickly combine with the freshly made plaster, rapidity of work and considerable skill is necessary as retouching is impossible. This method was the usual form of mural painting before the use of oil pigments, but if exposed to damp the colours were liable to fade. Among notable frescoes are those in the monastery of S. Mark, Florence, painted by Fra Angelico.

Freshfield Douglas William, English traveller. He was born April 27, 1845, educated at Eton and Oxford, and in 1870 called to the bar. He was the first man to make the ascent in 1863 of Mt. Kasbek in the Caucasus. During the next 30 years Freshfield visited many parts of the world and made himself one of the foremost travellers of his age. From 1893-95 he was President of the Alpine Club and from 1914-16 of the Royal Geographical Society. His many writings include *Mount Kanchenjunga* 1903, and *Lelote the Snow Line*, 1923. A promontory on the coast of King George V Land, discovered in 1911, has been named after him.

Freshwater Watering place in the west of the Isle of Wight on the Yare 1½ m. from Yarmouth. Some distance from the village is Freshwater Bay. Pop. 3400.

Near Freshwater is Farringford, long the residence of Lord Tennyson. A landmark is High Down, 485 ft. high, on which there is a

memorial cross to the poet. Part of this is the property of the National Trust and has been renamed Tennyson Down.

Fresnel Augustin Jean, French scientist. Born, May 10, 1788, he became an engineer, later studying the subject of light. His work has been of great value in the development of lighthouses. He introduced the lenses named after him and was responsible for the first practicable revolving lights. He died July 14, 1827.

Fretwork In architecture, decorative carved work for ceilings, consisting of geometrical designs in relief. In wood working, the term is used for the art of sawing out designs in thin, fine grained wood, such as satinwood, walnut, sycamore, limo or three ply wood. The essential tools are the saw, drill and handawl. The fretwork consists of a light steel frame holding thin saw blades of varying grades of fineness.

Freud Sigmund, Austrian scientist. Born at Freiberg, Moravia, May 6, 1856, he was educated in Vienna and Paris. His investigations into neurotic diseases early studies on hysteria and dreams led to his becoming Professor of the Thorapontics of Neurotic Diseases and of Neurology in Vienna in 1902. He explained such phenomena as being influenced by repressions in the unconscious mind subconsciously seeking an outlet. His method of approach, called psychoanalysis, is propounded in many works for example, *Delusion and Dream*, *Three Contributions to the Theory of Sex*, *Totem and Taboo* and in *The International Journal of Psychoanalysis*, edited by him.

Frey Norse god, also called Freyr. He was the god of sunshine and fertility and possessed a famous sword. In order to win the love of Gerda he gave away this weapon and so was conquered in his last fight.

Freyja In Norse mythology, especially in Sweden, the goddess of love and pleasure. Sister of Frey and wife of Odin, she traversed the heavens in a chariot drawn by two white cats, and received at her Asgard home the souls of half those slain in battle. She is distinct from Odin's wife Frigg.

Friar Member of a Roman Catholic mendicant religious order. Friars are not monks, although they take vows. The four great orders are Franciscans or Grey Friars, Dominicans or Black Friars, Carmelites or White Friars, and Austin Friars or Hermits. Trinity or Red Friars, 1198, and Crutched or Crossed Friars, 1169, were actually canons regular.

Friar's Crag Beauty spot on the banks of Dorwentwater. It is on the east side of the lake, about a mile from Keswick. Since 1921 it has been the property of the National Trust. Here is a Ruskin memorial.

Fribourg Town of Switzerland. It stands on the river Saône 20 m. from Bern and is the chief town of the canton of Fribourg. It has a university founded in 1589. Pop. (1940), 21,557.

Fricton Resistance to motion when two bodies in contact are moved over one another. Fricton may be sliding or rolling; the former being seen in the action of slide valves of engines, and the latter in wheels, ball or roller bearings. Static friction is the frictional resistance of a body at rest and is greater than the friction of motion, or kinetic

friction, when the body has been set in motion. The use of lubricants tends to reduce friction.

Frideswide English saint. Daughter of Eddan, ealdorman of Oxford under Ethelbald she fled from a Mercian noble's importunities to Binsey and built an oratory. She died about 735. Her well is still visited. Becoming abbess of an Oxford nunnery, which was appropriated by Austin canons in 1004, she has been Oxford's patron saint since 1180 and was canonised in 1481. Her day, Oct. 19, which was removed from the calendar at the Reformation, is still commemorated locally. On the site of her chapel in Oxford, Wolsey erected Christ Church cathedral.

Friedland Town of Germany. It stands on the Alle, 26 m. from Königsberg, and is famous for the victory gained here by Napoleon over the Russians and Prussians, June 14, 1807. The battle was stubbornly contested but in the end the French drove their enemies in flight across the river. Napoleon was present in person and Nev had a good deal to do with the French success. The Allies lost 20,000 men out of 55,000 on the field. The French lost fewer out of 70,000. The battle was followed by the Treaty of Tilsit.

Friedrichshafen Town and lake port of Württemberg, Germany. It stands on the Lake of Constance. It is a pleasure resort, but is chiefly famous as the headquarters of the Zeppelins, which were built here and made their trial flights over the lake. There is a harbour and steamers ply between the various places on the lake. Pop. 11,700.

Friendly Islands Group of islands in the Pacific Ocean, now called the Tonga Islands. They lie to the south-east of the Fiji Islands and cover 385 sq. m. They are about 150 in number, divided into three groups. Nukualofa is the capital, copra is the chief product. The islands form a British protectorate, having their own ruler, a king or queen, assisted by a parliament or legislative council and a privy council and advised by the high commissioner. British coins and weights and measures are used. Tasman discovered the islands in 1643, but they were named by Captain Cook, when he visited them in 1773. They remained independent, until 1900 when they came under British protection. Pop. (1931) 28,839.

Friendly Society Voluntary organisation for the relief of members in time of old age, illness, unemployment or other contingencies. The root principle is that members contribute a certain sum, usually weekly, and in case of need receive certain benefits.

In Great Britain friendly societies were started about 1790 and an Act authorising these was passed in 1793. Other Acts followed the last being in 1923 and now their activities are closely controlled by the state. Each society must be registered with the Chief Registrar of Friendly Societies, who examines its accounts. His offices are at 17 N. Andler Street, London W.1, and in Scotland at 19 Hertiot Row, Edinburgh.

The societies can issue insurance policies not in excess of £300 on the lives of their members, who can also insure the lives of their children and other dependents, but in the case of children the amount is limited to £15. They can also insure for burial expenses, sickness

and other matters. Members can dispose of sums not exceeding £100 by written nomination instead of by will. The societies can hold property and they enjoy freedom from income tax. Since 1911 they have had a good deal to do with the working of the National Health Insurance scheme. They do this work through approved societies formed by them.

The term friendly societies is used sometimes only for the Friendly Societies proper, such as the Independent Order of Oddfellows, but sometimes for all societies that come under the eye of the registrar, such as those associated with trade unions, the very strong group known as industrial insurance societies. Those, known also as collecting societies, employ paid collectors to visit the members and collect the premiums, usually weekly. The total invested funds of the friendly societies amount to over £100,000,000.

In Great Britain the largest societies are:

Independent Order of Oddfellows (Manchester Unit), 97 Grosvenor St., Chorlton-on-Medlock, Manchester.

Ancient Order of Foresters, 17 Russell Square, London W.C.

Royal Liver Friendly Society, Pier Head, Liverpool.

Hearts of Oak Benefit Society, Euston Road, London N.W.

National Deposit Friendly Society, 37 Queen St., London, W.C.

Independent Order of Rechabites, 1 North Parade, Deansgate, Manchester.

United Ancient Order of Druids.

Loyal Order of Ancient Shepherds, 132 High St., Chorlton-on-Medlock, Manchester.

Grand United Order of Oddfellows, 24 Devonshire St., Manchester.

Friends, Society of See SOCIETY OF FRIENDS.

Friesland District of northwest Europe. Most of it is in the Netherlands, where it forms the province of Friesland, a low-lying district bounded by the North Sea and the Zuider Zee on the north and west and covering 1250 sq. m. Leeuwarden is the capital, and the province includes Terschelling and other islands. Many of the people speak the Frisian dialect. East Friesland is in Hanover where that country touches the Netherlands. Aurich is the chief town and it has an area of 1200 sq. m.

Frieze In architecture the portion of the entablature lying between the architrave and the cornice. It forms a continuous band, often sculptured in low relief. In the Doric Order the frieze is adorned with alternate projections (triglyphs) and recesses (metopes), the latter usually finely sculptured as seen in the famous Parthenon frieze. In the Ionic and Corinthian entablatures the frieze is devoid of triglyphs, but is enriched by figures in relief. Other types of friezes were developed in later architecture.

The use of the word has spread to a strip of ornamentation placed round the walls of a room, usually to harmonise with the paper.

Frigate Originally a small swift naked Mediterranean vessel using oars or sails. Adopted by Portugal in the 16th and 17th centuries for naval purposes in the Indies, it became a fast three masted, full-rigged scouting and cruising craft, carrying from 24 to 50 guns on the main deck, or on a raised quarter-deck and fore-castle. The cruiser is the modern equivalent of the frigate.

Frigate Bird Genus of tropical sea fowl, *fregata*, allied to the gannets. The common *F. aquila* has a small, slender, short-necked body, a straight bill with a hooked tip and a dilatible throat pouch. Its swallow-like tail and great wing spread make it very swift in flight. It eats fish caught at the surface or snatched from other birds.

Frimley Village of Surrey. It is 33 m from London, on the S. Rly. It is in near proximity to Aldershot and three miles from Bagshot and is mainly residential. Bret Harte is buried in the churchyard. A colony for tuberculous ex-soldiers and sailors was inaugurated here after the Great War. Pop. 16,472.

Frinton Watering place and urban district of Essex. It is 2 m from Walton on the Naze and 69 from London, on the L.N.E. Rly. Of late it has become a fashionable seaside resort. Pop. (1931) 2106.

Frisian Islands Chain of islands off the west coast of Europe from Denmark to Holland. Long subjected to marine erosion, their diminution, observed since Roman geographers first described them, has been retarded in part by sand dunes, earthen embankments and dykes. There are north, east and west groups, respectively Danish, German and Dutch. The N. Frisians, mostly off N. Schleswig, include Fanø, Sylt, Föhr, Amrum, Pellworm and Nordstrand. The E. Frisians include Nordernev, Berkum, Wangeroog, Spiekeroog and others, all favourite summer resorts and bathing stations. The W. Frisians include Rottum, Schiermonnikoog, Ameland, Terschelling, Vlieland and Texel, screening the Zuider Zee.

They derived their name from the Frisians, a Teutonic people inhabiting the neighbouring territory of Frisia in the Christian era.

Frit Imperfectly fused mixture of minerals from which glass is made. Calcined until the silica begins to act on the bases, it awaits complete fusion. Similar vitrifiable mixtures occur in the manufacture of artificial or soft paste porcelain.

The name is also given to a small, black two-winged fly destructive to cereal crops, especially European barley (*Chlorops frit*).

Frith William Powell, English painter. Born at Aldfield, Yorkshire, Jan. 9, 1819, he studied at the Royal Academy Schools and first exhibited in the R.A. in 1840. He was elected A.R.A. in 1844 and R.A. in 1852. His works represent historical and anecdotal painting executed with extraordinary charm and attention to detail yet preserving a broad effect. His *Derby Day* in the National Gallery, London, was his master piece, and many of his pictures achieved great popularity. He died Nov. 2, 1909.

Fritillary Word meaning a dice box. It is used for a genus of flowering plants and a species of butterfly. See BUTTERFLY.

Frobisher Sir Martin, English sailor. Born in Yorkshire about 1535, he made his first voyage to Guinea before he was 20 years of age. In 1576 he set out on the first of his three unsuccessful voyages in search of a northwest passage to China. In 1586 he sailed as vice admiral in Drake's expedition to the West Indies and in 1588 was in command of a ship that helped to defeat the Armada and so distinguished himself that he was knighted on board his own ship. He

took part in other expeditions and fights and died Jan. 14, 1605, as the result of a wound received during the attack on Brest.

Frodsham Market town of Cheshire. It is 10 m from Chester, on the L.M.S. Rly. Chemicals and cotton are manufactured. Near the town the Weaver falls into the Mersey and the district around is known as Frodsham Marshes. Pop. 3000.

Froebel Friedrich, German educational reformer. Born at Oberweissbach, April 21, 1782, he studied at Jena and Göttingen and in 1816 opened a school. His influential book translated as *The Education of Man*, appeared in 1826 and from 1833-37 he spent his time training teachers at Burgdorf in Switzerland. In 1837 he started a school for young children in which his theories were put into practice. He died June 21, 1852.

Froebel held that children should grow up naturally, in happy surroundings, that play was of the utmost importance and that a child's natural creativeness should be encouraged. His ideas were largely adopted in England and a *Froebel Society* was founded to forward them. Its headquarters are at 1 Bloomsbury Square, London, W.C.1. There is also a National Froebel Union at 18 Adam St., London, W.C.2.

Frog Genus of amphibians, (*Rana*). Of the tailless order, it also includes toads and is widely distributed in temperate and tropical regions. The eggs, usually laid in fresh water, adhere together in jelly-like masses. They develop into tailed, legless tadpoles which breathe aquatic air through gills. There is then a gradual growth into the four-legged tailless adult form with lungs for breathing atmospheric air. Through soft skins which are periodically shed entire, moisture is imbibed. The tongue, rooted in the front of the mouth, is sticky and used for seizing the slugs and insects upon which it feeds.

Besides the common *R. temporaria*, the edible *R. esculenta* and the N. American bull frog, are the large guppy frog, 8½ in. long of the Solomon Islands and the goliath frog, 11 in. of the Cameroons. Other genera include horned, flying, peeping, pouched and tree frogs.

Frog In engineering, two short pieces of rail. They are joined together to form an angle between the railway lines at a railway crossing or at a point where the rails lead to a siding, serving to guide the wheels of a train from one set of lines to another. When used at a crossing the contrivance is termed a cross frog.

Frogbit Small, floating aquatic herb (*hydrocharis morsus ranae*). Native to Europe and N. Asia, it has roundish, kidney-shaped leaves reddish beneath, which support the male and female flowers on separate plants. The bulbs sink to the pond floor in the autumn, rising to the surface again to throw out leaves in the spring.

Frog Hopper Family of homopterous insects (*Cerropidae*). The greyish or greenish adults have four stiff opaque wings and hind legs strengthened for vigorous leaping. They constantly prick the young leaves for sucking. The prickles enlarge and wither the leaves. The larva surround themselves with white froth. See COCK-ON-SIT.

Frogmore Residence near Windsor. It is in Windsor Park, about a mile from the castle and became a royal residence in the time of George III. The

mansoleum here was built by Queen Victoria over the tomb of Prince Albert and here the queen herself was hurried in 1901. The building is open to the public at stated times.

Froissart Jean French historian Born at Valenciennes about 1333, he went to England at the age of 18 and entered the household of Edward III's queen, Philippa. After a leave of absence that lasted five years, he returned to her in 1361, bearing with him a rhymed chronicle of the wars of the time, and was made her secretary. He travelled considerably through England, France, Flanders and Italy, gathering material for his great history. After Philippa's death he became curé of Lestines in Flanders, and later Canon of Chimay. Again in 1386 he travelled, visiting Gaston Phœbus, Count of Foix, and then England once more. He died about 1405 at Chimay.

Froissart lives to-day in his *Chronicles*, a history in four books of the main events of Western Europe from 1325 to 1400. It is one of the greatest historical works of that period, being an invaluable and vivid description of the life of his time. It was translated into English by Lord Berners in 1525 and there are several later translations.

Frome Market town and urban district of Somerset. It is on the River Frome, 24 m from Bristol, on the G.W. Rly. The industries include printing and brewing. Woollen cloth is manufactured, but this is less prosperous than formerly; there is also an agricultural trade. Pop (1931) 10,738.

Fronde French word meaning a small sling and used for the civil war that took place in France between 1648-1653. The first Fronde was due to a quarrel between Mazarin and the Parliament of Paris about taxation. Some of the leaders of the parliament having been put into prison, street fighting broke out. Helped by troops under the great Condé, Mazarin put down the rising and peace was made in March, 1649.

The second Fronde was a rising in 1652-53. Condé and Mazarin had quarrelled and the former, with other princes, raised a revolt. He was soon victorious and for a short time master of Paris. The fighting, however, was chiefly in the south-west of the country and in the end Mazarin put down the insurgents and attained his object.

Frontenac Comte de French statesman Louis de Buade was born in 1620, of a family holding land in Bearn. He became a soldier and in 1672 went to Canada as governor. He remained there until 1682 and was again governor from 1689 to 1698. Frontenac died in Quebec Nov. 28, 1698. His harsh methods of rule made him unpopular, but he ranks as one of the makers of Canada.

Frost Term used for the deposition of small ice crystals on exposed objects on or near the ground. Sometimes known as hoar frost it is due to the freezing of water which condenses out of the atmosphere on objects which have a temperature below that of freezing point. When prolonged severe frosts may have a harmful effect upon vegetation, and even a short frost, coming in late spring or early autumn may injure crops. Frost plays an important part in the disintegration of rocks and the formation of soils.

Frostbite is the name given to a localised inflammation and gangrene of the tissues, caused by extreme cold.

Froth or Foam The collection of small bubbles caused by fermentation or by boiling or agitating a liquid.

The Ancient Order of Froth Blowers was a charitable organisation formed in 1923. Its song was "The more we are together, the happier we shall be."

Froude James Anthony English historian Born at Dartington, Devon, April 23, 1818, he was educated at Westminster School and Oriel College, Oxford, becoming a Fellow of Exeter College in 1842. His first work, *Shadows of the Clouds*, appeared in 1847, under the pseudonym Zeta, then came, in 1849, *The Nemesis of Faith*, which was widely read, but, like most of his books, raised controversy. His greatest work is his *History of England from the Fall of Wolsey to the Spanish Armada, 1556-70*, a fine piece of writing but distinctly unreliable. He also wrote *Lectures on the Council of Trent* and other books dealing with events of the 16th century. Other works include *The English in Ireland*, *Oceana, or England and her Colonies*, the most popular of all, *Short Studies on Great Subjects* and *The Life and Letters of Erasmus*. Froude was very intimate with Carlyle, but much controversy followed his books on Carlyle and his wife. In 1892 Froude was chosen Professor of Modern History at Oxford, but he died shortly afterwards, on Oct. 20, 1894.

Fruit Part of a flowering plant that contains the seed, especially such as is used for human food.

It may be divided into tree fruit, such as apples, and bush fruit or small fruit, such as strawberries. It may also be classified as pip fruit, e.g., oranges, apples, pears, melons and medlars, stone fruit, e.g., plums, cherries, apricots, peaches and dates, berries e.g., currants, strawberries and raspberries, or shell fruit, e.g., walnuts. Grapes belong to the berry class, bananas and pineapples are allied to it. It may further be divided into fresh fruit which will only keep for a few days and preserved fruit, which may be either tinned, bottled or dried, such as figs and raisins.

Fruit is a popular and important article of food, especially in hot weather and hot climates. It contains much water, but also acids which are good for health. Sugar is an important content and many fruits, the orange for instance contain vitamins. Fruit is essential for good health, and it plays a great part in keeping the body in good condition.

The grape is cultivated on an enormous scale in the warmer part of the world. Oranges are largely grown in the Mediterranean region for export. California, South Africa, British Columbia and Australia are great fruit-growing countries, much of it being tinned for export. Figs, raisins and other fruits are dried and exported from Greece and neighbouring lands, also from Australia. Great Britain imports much tinned and dried fruit, but of the harder fruit a good deal is produced at home, especially in the counties of Kent, Worcester and Hampshire. In all, some 91,000 acres are under small fruit. In addition there are many apple and cherry orchards and in Somerset, Devon and Hereford a special kind of apple and pear is grown for making cider and perry. The blackberry still grows wild on a considerable scale.

To encourage the growing of fruit at home various measures have been adopted by the Ministry of Agriculture, such as the establishment of stations for grading and packing of

fruit Much of it is bottled, so that it can be kept for winter use and a great deal is made into jam. There are factories for canning fruit at Wishbach and Paddock Wood in Kent. Certain fruits, among them apples and pears, must bear the national mark to show that they have been grown at home. Dried fruits imported from the Empire are given a preference as regards import duties.

A station for research into fruit storage problems has been opened at East Melling, Kent, and experiments have shown that it is possible by the use of carbon dioxide to keep fruit fresh for a long period.

The chief English market for fresh fruit is Covent Garden. Thence it passes into the shops of the fruiterers or greengrocers. The Fruiterers' Company is one of the London livery companies.

Fry Charles Burgess English athlete. Born at Croydon, April 25, 1872, he was educated at Repton, Oxford, where he excelled as an athlete. He represented his university at cricket, athletics and Association football and held the world record for the long jump. Afterwards he played cricket for Sussex and for years was one of the leading batsmen in the country. In 1900 he scored 3147 runs and he played for England on several occasions. Fry devoted his energies to training boys for the sea and conducted an establishment at Hamble. He has written books on cricket and on the League of Nations, and has come forward as a Liberal politician.

Fry Elizabeth English prison reformer. Born in Norfolk, May 21, 1780, the daughter of John Gurney the Quaker banker, in 1800 she married Joseph Fry and settled in London. In 1813 she visited Newgate Prison, and, horrified by the terrible conditions, at once set to work to reform them. An association was started and under her guidance a great deal of good was accomplished. Mrs. Fry, who brought up a large family, died Oct. 12, 1845, at Ramegate.

The family to which Joseph Fry belonged is known for its association with the cocoa business in Bristol. This was founded in the 18th century by an earlier Joseph Fry, who died in 1787.

Fryatt Charles English sailor. He was born at Harwich, Dec. 2, 1872, and entered the mercantile marine. When the Great War broke out he was captain of the G. E. R. steamer *Brussels*, plying between England and Holland. On March 28, 1915 he succeeded in ramming a German submarine, and the following year was captured by a German destroyer, tried by court martial at Bruges and shot, July 27, 1916. Later his body was brought to England and buried at Dovercourt.

Fuad King of Egypt. A son of Ismail, the Khedive, he was born in Cairo, March 26, 1868. In Oct. 1917 he became Sultan of Egypt in succession to his brother Hussein, and in 1922 he was made the first king of the country.

Fuchsia Genus of flowering shrubs and small trees, named after the 16th century botanist, Leonhard Fuchs. There are some 50 species, mostly natives of Mexico and the Andes region. Since Kew gardens first received *F. coccinea* in 1788, many other species have reached Britain, yielding hardy and half-hardy varieties, including dwarfs with crimson, violet, coral, cream and white blooms.

Fuchsine Coal tar derivative also known as magenta or roseine. It consists of rosaniline hydrochloride and is an important direct dyestuff for wool, silk and leather, and with a mordant, for cotton. It occurs as brilliant iridescent crystals which form a deep red solution in water and are also very soluble in alcohol.

Fuegiens S. American Indian tribes inhabiting Tierra del Fuego. The Fuegiens of the centre are a stunted primitive race who use wind shelters, and heave and scull implements. The tall Onas of the East are descendants from Patagonian immigrants, the western Alakalts come from Oblique Arancarians.

Fuel Any combustible materials used as a source of heat. All fuels consist largely of some form of carbon or of hydrocarbon. Coal is the most important solid fuel, but other carbonaceous material such as peat, wood, straw and vegetable waste are largely used. Petroleum, the chief liquid fuel, is the source of many fuel derivatives, and in addition oils distilled from coal, shale and other substances are used in oil engines of the Diesel type.

Gasous fuels include natural gas, coal gas, water gas, producer and blast furnace gases. Of recent years much has been done to use fuel resources, particularly coal in this country, more advantageously. Pulverised fuel is largely replacing ordinary coal, and extensive plants have been erected for the carbonisation, and careful control, of that material whereby the maximum quantity of certain desired products can be obtained. Attempts have been made to commercialise the production of refined oil fuel (petrol) from coal, and recently a mixture of oil and finely powdered coal has been used with success. The government has a Board of Fuel Research and maintains at Greenwich a Fuel Research station, which has laboratories at Stoke, Glasgow, Nottingham, Newcastle on Tyne and elsewhere. In 1931 a world fuel conference met in London.

Fuenterrabia City of Spain. It stands on the Bidas, near its mouth, 10 m. from San Sebastian, on the railway line from Paris to Madrid. The old town, still surrounded by its walls, has a castle and other buildings dating from the Middle Ages. Near it is a new town, a fishing centre and a watering place. Pop. 5000.

Fuentes d'Onoro Village of Spain, 15 m. from Ciudad Rodrigo and near the frontier of Portugal. Here, on May 3-5, 1811, a battle was fought between the British and the French. Wellington was trying to take Ciudad Rodrigo and a French army came to relieve it. The result was indecisive but the French had somewhat the better of the encounter.

Fugger Famous German family of traders. They lived at Augsburg, where Johann Fugger became a banker and merchant about 1390. The business was carried on by his sons, grandsons and other descendants and its members became enormously wealthy. They had interests all over Europe and later in America, and lent money to the Emperor Charles V and other rulers. There are memorials of the Fuggers in Augsburg (q.v.).

Fugue Form of musical composition. Its essential condition is the development of a melody from four to eight bars in length, announcing the subject. This is done

by each voice, or part, in turn, being immediately taken up by another, which is called the answer. To this the first part supplies an accompaniment. J S Bach was a master of the fugue. Handel and Mozart also made good use of it.

Fugue is also used as a psychological term, signifying a "wandering attack," due to the activity of the unconscious mind.

Fujiyama Loftiest mountain of Japan. Situated on the main island, 60 m. south-west of Tokyo, overlooking Suruga Bay, it is 12,395 ft. high. An extinct or quiescent volcano, it has a crater 2000 ft across and 500 or 600 ft. deep, which is now filled with water. The last eruption occurred in 1707. It is a sacred mountain and many Buddhist pilgrims ascend each August to pray at rock-built shrines. It is also known as Fujisan.

Fulda City and river of Germany. The city stands on the Fulda, being in the Prussian province of Hesse-Nassau, 69 m. from Frankfurt. There are some industries and an agricultural trade. The city had a university from 1734 to 1804. Fulda is famous for its abber, founded in 744 by Boniface and once one of the richest in Europe. Pop 17,500.

Fulgurite Name given to a vitreous tube in sand due to the action of lightning in fusing the loose sand grains together. These tubes are sometimes more than two inches in diameter and in the blown sand of Cumberland extend to a depth of 40 feet and near Macclesfield to 22 feet.

Fulham One of the 28 boroughs of the County of London. It lies along the Thames on the north side with a very long frontage to the river and includes the district of Parsons Green. The chief building is Fulham Palace, the residence of the bishops of London. The courtyard dates from the 15th century, the main building from the 18th. Part of the grounds, Bishop's Park, is open to the public. There is a large power station here. In the borough are the football grounds of the Chelsea and Fulham clubs.

Fulham Ware is a fine stoneware which was first made at Fulham by John Dwight. It is remarkable for the brilliancy of its colour. Pop (1931) 150,940.

Fuller Name given to one engaged in fulling or milling woollen cloth. The process of fulling is carried out on heavy materials for overcoats and suitings, to cause the yarns to shrink and felt together. The material, after being soaked in soap and water, is twisted into a rope and passed through vertical rollers, and whilst still in a wet state, it is stored to complete the shrinkage along both the warp and the weft.

Fuller Thomas English divine and author. Born at Aldwinkle, Northants in 1608, he was educated at Cambridge. He was chaplain to the king's forces during the Civil War and held in succession several livings, including that of Cranford in Middlesex, where he is buried, but he is chiefly known by his books. He wrote *The Church History of Britain*, but his wit is seen to better advantage in *The Worthies of England*. He died in London in Aug., 1661.

Fuller's Earth Soft dull, greenish-brown or grey variety of clay. It consists of impure hydrous silicate of alumina. Unlike ordinary clays, it falls to a powder in water, lacking plasticity. It is still used as an absorbent for grease, although

not so much to-day as formerly, also in oil filtration. It is used medicinally for irritated skins. It is worked at Nutfield, in Surrey, also near Bath and at Woburn.

Fulminate Word meaning to explode and used in that sense by scientists. Fulminate of mercury is a powerful explosive used in percussion caps and detonators. Fulminic acid is found with mercury and other metals, but never alone.

Fulton Robert. American engineer, born in 1765, in Pennsylvania. He worked on canal improvements and then conceived the idea of using steam engines for driving ships. He worked on this in Paris and eventually in 1803 built a small steamship on the Seine. He then returned to America and built another which he called the *Clermont*. This and its successor, the *Fulton*, made successful voyages on the Hudson, and their invention marks a stage in the history of the steamship. Fulton died Feb 24, 1815.

Fulwood Urban district of Lancashire. It is just outside the borough of Preston and its industries are those of that town. Pop (1931) 7387.

Fumigation Method of disinfection by the use of fumes or gases. In cases of contagious diseases, fumigation is carried out for disinfecting the sick room and the clothes etc., of patients, and may be done by means of burning sulphur, often in the form of a sulphur candle which gives off sulphur dioxide. Paraform, a solid form of formaldehyde, is a powerful fumigant for rooms. Fumigation is also resorted to by gardeners for destroying insect pests upon plants. For this smoke, sometimes tobacco smoke, is used. The extremely poisonous gas, hydrocyanic acid, is used for fumigating ships' holds and also for fruit trees, especially in America, and the vapour of carbon disulphide is used to fumigate maize, grain elevators, etc.

Fumitory Small annual plant (*Fumaria officinalis*). It is common in fields and waste places. The rose-coloured flowers are borne in loose, erect spikes upon slender brittle stems bearing much divided leaves. The plant has a somewhat bitter saline taste and was used formerly as a medicinal herb in eye and skin diseases.

Funchal Capital of the Madeira Islands. Situated on the south coast of Madeira Is. It is a salubrious winter resort. Steamships anchor in the roadstead, which is protected from all but south winds. There is a substantial trade in coal and wines. It has a broadcasting station (24 M., 0.05 kW). Pop 19,000.

Fundamentalism Religious movement in the U.S.A. It arose about 1910 when a number of Christians in Tennessee and other states decided to require from those professing their faith the acceptance of the fundamental doctrines of Christianity, not only the virgin birth, the atonement and the resurrection, but the verbal inspiration of the Bible.

Fundy Bay of Opening of the Atlantic Ocean off the coast of Canada. It penetrates about 100 m. into the land and divides Nova Scotia from New Brunswick. It receives the St John and other rivers. The bay is divided into two parts called Chignecto Channel and Minas Channel. Grand Manan Island stands at the entrance of the bay, which is noted for its high tides.

Fünen Island of Denmark, also called Fyen It is in the Baltic Sea between Jutland and Zealand, with the Little Belt on one side and the Great Belt on the other 1130 sq m in area Its soil is fertile and agriculture flourishes The chief river is the Odense, and Odense is the name of the chief town

Fungus Large group of the lowest division of cellular plants, the thallophyta They are distinguished by an absence of chlorophyll and starch and the special characters in their structure and life history The plant body, or mycelium, consists of a much branched mass of filaments, or hyphae, sometimes forming false tissues, the cell walls being composed of fungus cellulose

In their nutrition, unlike green plants, fungi obtain their food materials from dead or living organic matter, and consequently some are parasites, such as rust and mildews others are saprophytes, living on decaying matter, as represented by toadstools and mushrooms Fungi have no flowers, but reproduce by asexual spores or, in some by a sexual process Some are edible, especially the mushroom, others are highly poisonous

Fur Undercoat of short, fine, soft hair intermingled with longer overhair, found on the skin of certain animals It is used for clothing in very cold countries and largely used elsewhere in cold weather, especially by women The animals chiefly valued for their fur are the musquash, chinchilla, ermine, skunk, mink, wolverine, sable, beaver, seal and bear The skins of the mole, fox, rabbit and squirrel are also used

Most of these animals are caught in the wild state in Canada and Siberia and to a lesser extent in Australia, but foxes are now bred for the purpose on special farms After being taken the skins need careful preparation The chief fur market is London The Hudson's Bay Co has for over 200 years been engaged in the fur trade in Canada which was long a source of livelihood to the Indians

Furies The (Latin, *Furiae*) Goddesses of ancient Greece and Rome They are represented as snake haired and it was believed that they were sent from Tartarus to punish the crimes of perjury murder, etc They are also known by the Greek names Erinyes and Eumenides

Furlough Leave of absence The term denotes specifically the absence from military duty of the rank and file by permission of the commanding officer for periods exceeding six days on full pay passes may be endorsed with permission to wear civilian clothes

Furnace Structure for the production of heat It is employed in chemical and metallurgical processes and in steam boilers Many kinds of furnaces are in use, from the simple hearth to the electrical furnace Usually the inner part of the structure is lined with some refractory material while the outer part is strengthened to give stability

Combustion depends upon a supply of air in the hearth type this is usually a natural draught, whilst in others some form of forced draught is necessary, i.e. in the shaft furnace of the blast and cupola types In the reverberatory furnace for roasting ores the draught is carried over the heated material The crucible, muffle and retort furnaces are of the closed vessel type and are used in many

metallurgical and allied processes In some solid fuel is used in others gas is employed while furnaces using the electric arc are necessary for very high temperatures

Furness District of Lancashire In the north west of the county, it is divided from the main part by Morecambe Bay The district contains great quantities of iron ore and this has led to the growth of Burrow in Furness The Furness Ry is now part of the LMS system Furness covers about 250 sq m

Furness Baron English shipowner Born April 23, 1852, Christopher Furness entered business life and in 1877 established at West Hartlepool his own line of steamers This became the great firm of Furness Withy & Co, and later he was associated with others of the large industrial undertakings of Durham In 1895 he was knighted and in 1910 was made a peer He had been Liberal M P for Hartlepool, 1891-93 and 1900-10 He died Nov 10, 1912 His son, Marjanduko, who succeeded to his title, was made a viscount in 1918

Furness Abbey Ruined abbey in Furness, Lancashire Near Dalton in Furness on the L.M.S. Ry, it was founded in 1127 and was, until the Reformation, a great and wealthy Cistercian abbey The parts remaining are considerable and preservation work has been done since they became national property in 1920 The remains include part of the chapter house the cloisters and the chapel

Furniss Harry British caricaturist and writer He was born at Wexford in 1854 and came to London at the age of 19 In 1880 he joined the staff of *Punch* to which paper and *The Illustrated London News* he contributed illustrations for many years As a humorous lecturer he toured America and Australia, and in 1894 founded a weekly paper, *Lila Joke* He also illustrated the works of Dickens and Thackeray and wrote a number of books, including *Confessions of a Caricaturist*, 1901 He died Jan 16, 1925

Furniture General term denoting equipment It designates specifically the movable and fittings disposed for use or ornament in a dwelling or other building

From its prehistoric beginnings the development of furniture has involved incessant change in material, form and use The convenience of raised surfaces for the various demands of work and repose, and of enclosed receptacles for holding things, was recognised at the outset Hence the history of style gathers round that of the table stool, bedstead and chest Ornament was utilised from the first as in the carved or moulded animal feet of Babylonian and Egyptian A 20th century development is the much greater use of glass and the introduction of steel tubes in place of wood

Of furnishings in Anglo Saxon, Norman and Mediaeval England, including wall hangings and floor coverings little remains The furniture styles of the modern world date from the Renaissance The revived interest in period furniture concerns chiefly the sequence characterised as Tudor Jacobean, Stuart, Queen Anne Georgian and Victorian with their continental contemporaries, notably Louis XIV XV, and XVI Directory and Empire Some produced outstanding craftsmen e.g., Chippendale Sheraton, Adam and Boulle have given their names to distinctive styles of furniture

The furniture making industry is a large one its chief English centre being London. Much of it is turned out by mass production, but the better pieces are made by hand, often being copies of old models.

There are fine collections of old or period furniture in the Victoria and Albert Museums as well as in the Wallace Collection. The selling of antique furniture is a large business, many shops existing for this purpose, though not all the pieces offered are genuine.

Furnivall Baron English title Created in 1295 for Thomas de Furnivall, it has since been held by several families. Thomas Neville and John Talbot gained the title through marriage. Late John Talbot became Earl of Shrewsbury which title was held by his successors until 1616. After a period of abeyance it descended to the daughter of the 7th earl in 1651, who marrying the Earl of Arundel, caused it to be linked with the Howard family. Again in 1777 it became extinct, until in 1913, it was revived for Mary Frances Katherine Petre, daughter of the 14th Baron Petre, and a descendant of the Howard family.

Furtwaengler Wilhelm German musician. Born in Berlin, Jan. 25 1886, the son of Adolf Furtwaengler (1853-1907) the archaeologist he early gained a musical reputation and while yet a young man conducted operas and concerts at Breslau, Zurich, Munich, Strasbourg, Lubbeck, Mannheim, Berlin, Frankfurt and Vienna. In 1922 he became Director of the Berlin Philharmonic Concerts, and from 1922 to 28 directed Gewandhaus concerts at Leipzig. He conducted the Philharmonic Orchestra in New York, 1925-27, and Philharmonic concerts in Vienna, 1927-30. He has also conducted in London.

Furze Genus of spiny, leguminous plants (*Ulex*). They are native to central and western Europe and north-western Africa. The common species (*U. europaeus*) also called rose or whin, grows from 2 to 6 ft. in height, has terminal spines besides branched spines on the stems and bears sweet-scented, two-lipped yellow flowers. The young shoots serve as fodder, the old stems as fuel.

Fusan Town and seaport of Korea. It stands at the south-eastern end of the peninsula and is connected by railway with Seoul. It has a good harbour with ample accommodation for modern shipping and under Japanese rule its trade has developed greatly. Pop. (1930) 113,000.

Fuse Device for igniting an explosive charge, such as a hollow tube filled with combustible material one form being the quickmatch used for instantaneous firing. In heavy blasting operations, the charges are now usually fired by electricity.

The term is also used for an electrical safety device for breaking a circuit automatically when the current becomes too heavy.

Fusilier Name first given to a soldier who carried a fusil, which was a light musket fitted with a flint lock. The name first appeared about 1649 and in the 17th century the French and other armies organised companies of fusiliers to protect the artillery. Later the practice was abandoned and with the change in the nature of firearms the fusiliers became ordinary infantrymen. The name is retained in the British and other armies, and certain regiments are still called

fusiliers. In the British Army these are distinguished by a bearskin cap. The oldest of them is the Royal Fusiliers (City of London Regiment). Others are the Royal Scots Fusiliers, the Royal Inniskilling Fusiliers and the Royal Welch Fusiliers. The Royal Munster and Royal Irish Fusiliers were disbanded after the World War.

Fusion Process of melting a solid such as metal by the application of heat. The melting is accompanied by an absorption of heat, which is converted into kinetic energy, and by a change in volume. The degree of fusibility of metals varies greatly, from the melting point of solid mercury (-39°C) to that of tungsten (3267°C).

Fust Johann. German printer. A goldsmith of Mainz he entered into partnership with Gutenberg in 1450, to found a printing press, which he financed. In 1455 they separated, and Fust set up another works with Peter Schöffer. The chief production of the first press was the *Mazarin Bible*, and of the second, a *Latin Psalter*. Fust died of the plague in Paris in 1466.

Fustian Stout cotton fabric used chiefly for men's wear. It may be a plain twilled jean or a short-napped, velvet-like cloth, also called corduroy, moleskin or velveteen. Similar cut fabrics were made of wool under Edward III, and early forms had cotton wefts and linen warps. It is produced also in Spain and Italy the fustian of Naples being renowned. It apparently originated at Fustat near Cairo.

Future In business a word meaning goods not yet on the market. There is a good deal of buying and selling of futures especially in N. America principally in cotton and wheat, though Liverpool is the largest centre for "futures" in the former commodity. They are, of course, highly speculative transactions.

Futurism Form of art which arose in Italy about 1910. It was due to the influence of the poet F. T. Marinetti, upon a group of Italian artists, amongst whom were Balla, Boccioni, Carrà, Rosso and Severina. Marinetti and his disciples repudiated the older ideas of art, and claimed that the new movement introduced into painting a dynamic state, whereby a picture not only depicted a scene, but also indicated the emotions and ideas of the artist together with the thoughts and mental state of the person portrayed. An exhibition of futurist paintings was held in Paris in 1911 and in London in 1912.

Fylde District of Lancashire. Situated between the estuaries of the rivers Ribble and Wyre, it is mainly an agricultural area.

Fyne Inlet of Argyllshire. It extends S.W. and S. for 44 m. from the loch head, 6 m. above Inveraray, to the Kyles of Bute. Vessels using the Crinan Canal traverse it to Lochalsh. Its branches form Loch Tarbet, Loch Gilp, Loch Shira and Loch Gair. Loch Fyne herrings fetch high prices in the fish markets.

Fyvie Village of Aberdeenshire. It has a station on the L.N.E. Ry. 38 m. from Aberdeen, and was once a burgh. Here is Fyvie Castle one of the finest houses in Scotland, restored on a grand scale by Lord Leith of Fyvie. It occupies the site of a castle built in the 12th century or earlier.

GABA TEPE Hill in Gallipoli. On April 25, 1915, whilst the main British force was being landed on the beaches of Gallipoli, the Australian and New Zealand corps landed near Gaba Tepe in order to create a diversion. After fierce fighting the hill was captured from the Turks. See GALLIPOLI.

Gabelle French word for a tax on any commodity. It was gradually limited to the tax on salt. Imposed in 1286 and made permanent by Charles V (1364-80), its unequal incidence made it unpopular and the grievance rankled until its abolition during the Revolution in 1790. In some Eastern countries the word is still used for a tax on salt.

Gabes City and port of Tunis. It stands on the Gulf of Gabes, an opening of the Mediterranean Sea, and is about 200 m from the city of Tunis. Nearby are enormous salt lakes. Its ancient name was Tacapo. Pop. 20,000.

Gable Pointed or triangular part of the outer wall of a building at the end of the steeply pitched roof of the Gothic style. It corresponds to the pediment of classical architecture. In many examples of secular Gothic buildings, in Belgium for example, the gable end of the roof is adorned with numerous pinnacles and ornamented barge boards are added to the decorative design. Fine examples of ornamented gables are seen also in Tudor buildings.

Gaboriau Emile French novelist. Born at Saulon, Nov. 9, 1833. He was the originator of a certain type of sensational crime fiction. His first book of this kind *L'Affaire Lerouge*, 1866, was instantly successful and was dramatised in 1872. Other works are *Le Dossier No. 113* 1867, and *Monsieur Lecoq* 1869. He died Sept. 28, 1873. His imaginary detective, Lecoq, was the first detective of fiction.

Gabun River of Africa, also a French colony there. The river falls into the Atlantic Ocean by an estuary 40 m long and 10 m wide. Near its mouth is Libreville, the capital of the colony, which is one of the four divisions of French Equatorial Africa. Its area is 104,320 sq m. Pop. (1931) 387,283.

Gad Name of several Biblical characters — (1) Jacob's seventh son by Zilpah, Leah's handmaid. He founded an Israelite tribe localised chiefly in Gilead. David's eleven men of Gad were traditionally famous (1 Chron. xxi). (2) Prophet who was David's early companion and counsellor (2 Sam. xxiv).

Gadara Ancient town of Palestine. Situated 6 m S.E. of the Sea of Galilee, in the Syrian Decapolis. It was a Greek city. Captured by Antiochus III in 218 B.C. it was rebuilt by Pompey, 64-63 B.C. Its ruins adjoin the modern village of Umm Kals.

Gad Fly Two-winged insect *Tabanus borinus* belonging to the order *Diptera*. It is about 1 in. in length, is of a blackish colour above and reddish beneath and on the sides of the abdomen. Its larvae

live in damp soil. The female gad fly is blood sucker, and is particularly troublesome to horses and cattle in hot weather.

Gad's Hill District in Kent. It is 2½ m from Rochester, on the Gravesend road, and was the scene of Falstaff's encounter with "rogues in buckram" in Shakespeare's play, *1 King Henry IV*, in which a character called Gadshill appears. Charles Dickens lived in Gad's Hill Place, near the Sir John Falstaff inn.

Gaekwar Hereditary title borne by the rulers of Baroda, India. It comes from a native word meaning cow, and is the family name of the dynasty that has ruled since about 1720.

Gael Member of the Gaelic branch of the Celtic speaking peoples. The Gaels, who arrived in Scotland and Ireland from the continent of Europe, used an older form of speech characterised by the Q sound, which survives in Erse or Irish Gaelic, Scottish Gaelic, and Manx. A younger form, using P, appears in Welsh, Cornish, and Breton which are not Gaelic tongues.

The term Gaelic is used for the national speech, literature, customs, etc. that are peculiar to the Gaelic peoples in Ireland and the Scottish Highlands. In both countries efforts are being made to keep alive the language and to maintain, or revive, an interest in Gaelic things, and societies exist for this purpose. Some of the universities have professorships and lectureships in Gaelic. In Ireland the government of the Irish Free State has done a good deal to make Erse or Irish Gaelic a compulsory language. In Scotland 7,069 people speak Gaelic only.

Gaff Light form of fishing spear or landing hook. It consists of a stout rod ending in a fork or hook and is employed in salmon fishing, although its use is prohibited at certain seasons on the Tweed and other rivers.

The term gaff is also applied to a kind of boom or spar used for extending the upper end of a sail and to the topmasts above the mainsail.

Gainsborough Market town, urban district and river port of Lincolnshire. It stands on the Trent, 18 m from Lincoln and 146 from London, on the L.N.E. Ry. Machinery is manufactured and there is a good deal of trade in agricultural produce by canal or along the river. A fair is held twice a year. An acre or more comes up the Trent here twice a day. Gainsborough is described as S. Oggs in George Elliot's *Mill on the Floss*. Pop. (1931) 18,684.

Gainsborough Thomas English painter. Born at Sudbury, Suffolk, in 1727, he was self-educated until the age of 14, he came to London in 1743, he married and settled at Ipswich. He moved to Bath in 1759, and there successfully practised portrait painting, but in 1774 returned to London and took a house in Pall Mall. In 1768 he was elected an original member of the Royal Academy. He died Aug. 2, 1788.

Gainsborough's paintings show a remarkable lightness of touch and luminosity of colour. He is remarkable both for his portraits and his landscapes. Of the former may be mentioned,

The Market Cart and *The Harvest Waggon*, and of the latter, *Mrs Siddons* and *The Blue Boy* (which latter in 1921 was sold by the Duke of Westminster for £150,000)

Gairdner Lake of Australia. It is in the south of the state of South Australia, and is a salt water lake. It is about 100 m long, and its extreme breadth about 40 m.

Gairloch Opening of the Atlantic on the west coast of Scotland. It runs for about 6 m into the county of Ross and Cromarty. At its head is the village of Gairloch, a tourist resort.

Galahad Knight of King Arthur's Round Table. Son of Lancelot and Elaine, he was reared by nuns, and knighted on his arrival at Camelot on the eve of Pentecost. He set forth on the quest of the Holy Grail, and to him alone, as the knight of purity, was vouchsafed the vision of the mystic cup from which Christ drank at the Last Supper. Malory and Tennyson tell the story, and G. F. Watts has painted him.

Galapagos Group of volcanic islands in the Pacific. They belong to Ecuador, and were officially renamed the Colon Archipelago in 1892. Situated on the equator, about 500 m west of Ecuador, the 13 islands bear the names of English buccanniers, including the largest, Albemarle, 1650 sq m. and Charles, the oldest settlement. The fauna and flora contain many peculiar species. Giant tortoises formerly abounded, Galapagos being the Spanish for tortoise. Cattle and fruits introduced by early colonists are now naturalised. Guano, sulphur, sugar products, and archil are exported. The area is 2868 sq m. Pop (1931) 2000.

Galashiels Burgh and market town of Selkirkshire. It stands on Gala Water, 33 m from Edinburgh, on the L.N.E. Ry. It is a centre of the woollen industry, its tweed being famous. Pop (1931) 13,102.

Galatea In Greek legend a sea nymph, a daughter of Nereus and Doris. She loved a beautiful Sicilian youth Acis, son of Faunus, who was slain by his unsuccessful rival, the Cyclops Polyphemus.

Galatea was the name given to an ivory statue fashioned by Pygmalion, the sculptor king of Cyprus, who successfully besought Aphrodite to endow it with life.

Galatia Old name of a district in Asia Minor. It was named from the Galatae, a Gaulish people who settled therein about 300 B.C. They came soon under Greek influence, and later some of them became Christians. At the time of Augustus, Galatia became part of the Roman Empire.

Galatians Epistle to the Ninth book of the New Testament. In it the apostle Paul vigorously deplores the wholesale defections from Gospel freedom among his Galatian readers in favour of Jewish formalism.

Galatz Town and river port of Rumania. It stands on the north side of the Danube, about 80 m from Bucharest. It has large docks. Pop (1930) 101,148.

Gala Water River of Scotland. It rises in Midlothian, and flows S from the Moorfoot hills, for 21 m through Roxburghshire and Selkirkshire. It joins the Tweed just below Galashiels.

Galba Roman emperor. Servius Sulpicius Galba was born in 3 B.C., and became a soldier. He held many important positions, being praetor in the year 20 and consul in 33. He was governor of Gaul, later governor of Africa, and later still governor of Spain, showing ability both as soldier and administrator. In 68, on the murder of Nero, his troops declared him emperor, and he marched to Rome. He was murdered in 69.

Galen Greek physician. He was born about A.D. 130 at Pergamum, and studied medicine in Greece and Egypt. About 163 he went to Rome, where he was made physician to the emperors Marcus Aurelius and Commodus, and to many eminent Romans. He died in 200, either in Sicily or his native Pergamum. Galen wrote a great deal on medicine, and though most of his writings have been lost, those that remain were studied by medical men for centuries, and proved him to have been, after Hippocrates, the greatest of Greek physicians.

Galena Chief ore of lead. It is a sulphide of the metal and occurs, in veins and pockets, in rocks of many formations, associated with quartz, fluor, and ores of copper, zinc and silver. Its cubical, lead grey crystals with a metallic lustre, contain 86 per cent of lead and usually some silver.

Galicia District of Europe. It is to the north of the Carpathians, and since 1919 has been a part of Poland. It is rich in oil and salt. Lemberg is the chief town, and the Bug, Dniester, Pruth, and other rivers pass through it. Its area is about 30,000 sq m.

Galicia Former kingdom of Spain. Situated north of Portugal, the kingdom comprises the modern provinces of Corunna, Lugo, Orense, and Pontevedra, occupying an area of 11,000 sq m. The name is retained by the district which is traversed by the Minho and other streams, and the indented coastline includes the harbours of Ferrol, Corunna, and Vigo. The Gallegos are a hardy people devoted to agriculture and fishing. Their dialect forms, with Portuguese, a branch of Romance speech distinct from Castilian Spanish.

Galilee Roman province of Palestine in New Testament times. It lies north of Samaria and west of the Jordan, its capital being Tiberias. It was Christ's home in boyhood, and witnessed much of his active ministry. A Neanderthal skull was unearthed there in 1925, proving it to have been occupied in prehistoric times. It now forms part of the district of Palestine mandated to Britain.

A cathedral porch of unusual size is called a Galilee porch.

Galilee Sea of Lake of Palestine (alternately named after Tiberias, Chinnereth, and Gennesaret). An expansion of the Jordan, 13 m long by 8 m broad, it has an area of 64 sq m, and lies 680 ft below the Mediterranean level, having a maximum depth of 150 ft. Like the Dead Sea, it is a rift depression with tropical vegetation. Eastward the hills of Bashan, 2000 ft high, cause sudden and violent storms (Matthew viii, xiv). Tiberias and Capernaum, on its shores, then densely populated, were the scene of much of Christ's ministry.

Galilei Galileo Italian astronomer. Born at Pisa, Feb. 18, 1564; he entered the university there, became a professor, and made some valuable discoveries in physical science, but was soon compelled to resign. In

1692 he became Professor of Mathematics at Padua, where he remained until 1610, when he moved to Florence. He died in Florence, Jan. 8, 1642, and is there buried.

Galileo erected a telescope, and so was able to discover the satellites of Jupiter, and some spots on the sun. After further observations on the heavens, he declared that the Copernican system of the planets moving round the sun was true, as this gave offence to the Church, however, he withdrew it—but only for a time. In 1632 he stated it again in his great Latin work on the solar system, and was in consequence put in prison. The Pope released him, and he continued his astronomical work almost until his death, although for 5 years he was blind. Galileo's discoveries place him in the front rank of the world's scientists.

Gall Nut like outgrowth on the gall oak, *quercus tinctoria*. It is often known as an oak apple. Galls, the result of the attacks of the gall fly, contain about 40 per cent. of tannic acid and 5 per cent. of gallic acid, these acids form, with iron salts, dark blue or black compounds, hence the use of galls in ink manufacture.

The word **gall** is also a name given to the bile secreted by the liver and for a sore on a horse's back, the result of chafing.

Galle Seaport of Ceylon. It stands on the south west coast of the island and at one time was its chief port. Its full name is Punta Galle. Pop. (1931) 38,424.

Galleon Large Spanish vessel of the 15th-17th centuries. With a lofty stern and stern, and often with three or four gun decks, it served both for warfare, as in the Spanish Armada, and for transporting treasure from the Indies.

Gallery In architecture a passage constructed in the upper part of a building, and giving a view of the lower part of the interior. Later the term was extended to any large room of greater length than breadth. In the Norman castle the great hall often had a gallery surrounding it, and in later times the gallery accommodated the family paintings and works of art. Another form of gallery is the minstrel's gallery. Galleries are present in many mediaeval churches, and wooden ones became common after the Reformation.

The word is now used for a building to hold a collection of pictures as the National Galleries and National Portrait Galleries in London, Edinburgh, and elsewhere.

Galley Long, narrow boat propelled by oars. Such vessels were largely employed in the Mediterranean until the 16th century. They had, as a rule, about 50 oars, each worked by six men, usually captives or convicts. A galley is now the six oared boat on a warship devoted to the captain's use. The word is also used for the place on a vessel where the cooking is done.

The term is used in printing for the wooden or metal frames used for receiving the type after it has been set. Proofs taken from this are called galley proofs.

Galliard An old dance for two persons. In triple time, it was very popular in the 16th and 17th centuries. The minuet is said to have sprung from it.

Gallican Church Branch of the Roman Catholic Church in France. Of 3rd century origin, it persistently rejected ultramontanist refusal to submit the temporal state and its head to

papal control. Its liberties were defined by the pragmatic sanctions of Louis IX., 1269, and Charles VII., 1438, and by the declaration of the clergy drawn up by Bossuet in 1682, which Napoleon I. embodied in a statute in 1802. The Concordat, established in 1801, terminated in 1905, and the Gallican Church is no longer a state establishment.

Galli-Curci Amelita. Italian singer. Born in Milan, Nov. 18, 1890, her pure soprano voice was largely self-trained. She made her debut as Gilda in *Rigoletto* in Rome 1900, and has appeared at the Chicago Opera House and the Metropolitan Opera House, New York. In 1924-25 she toured Great Britain, where she had previously attained a great reputation on the strength of her gramophone records. She toured Australia in 1932.

Gallieni Joseph Simon. French soldier. Born at St. Béné, April 24, 1849, he saw service in the Franco-Prussian War and also in Senegambia, the Sudan, and Indo-China. As Governor of Madagascar 1896-1905, he proved himself a great administrator. Appointed Military Governor of Paris in 1911, his plans substantially assisted towards the victory of the Marne. He died May 27, 1916, and was posthumously made a Marshal of France, 1921.

Gallipoli Peninsula of south east Europe. It is part of the Turkish Republic, but is in the zone that is ruled by a commission under the League of Nations. The peninsula lies between two openings of the Aegean Sea, the Gulf of Saros and the Dardanelles, and its importance is due to its position on the way to Istanbul. The most important places are Gallipoli, a small seaport, and Kilit Bahr.

GALLIPOLI CAMPAIGN In 1915, soon after Turkey had entered the World War as an ally of Germany, the Allies decided to force a way to Constantinople. A fleet entered the Dardanelles, but was unable to make much progress, and suffered severe losses. It was then resolved to proceed by land through Gallipoli. A British army, called the Mediterranean Expeditionary Force, was assembled in Egypt and the islands of the Aegean under Sir Ian Hamilton. It included Australian and New Zealand troops, and numbered about 120,000 men. A French force was also assembled, but the British were entrusted with the main attack, the French making feints on the other side of the peninsula.

On April 25, 1915, the troops landed at several places on the peninsula. The losses were fairly heavy, as the Turkish resistance was stubborn and progress was difficult. The Turks had positions strongly fortified on the hills, and from these hard fighting could not dislodge them. The struggle centred chiefly around Krithia under Achi Baba at the Aegean end, and at Gaba Tepe (q.v.), called Anzac, where the Australians and New Zealanders were assembled. A little assistance was given by the French on the Dardanelles side of the peninsula, but after three months the campaign had failed to achieve its object.

In August fresh forces were collected, and another landing was made. These new troops got ashore at Suvla Bay and attacks were made elsewhere, but there was no considerable success. The British forces could do nothing but hold on under climatic and other conditions which tested their moral and physical stamina to the very utmost. Towards the end of the year it was decided to evacuate Gallipoli, and

on Jan. 6-8, 1916, this was done, almost without loss—a remarkable feat of arms. The British lost over 33,000 men, and some 7000 were reported missing.

Gallium Hard, white, sectile and malleable metal. It was discovered in 1875 by Lecoq de Boisbaudran in zinc-blende from Pierrefitte in the Pyrenees. Its symbol is Ga, atomic weight 69.9, and melting point 86° F. It softens by pressure of the fingers, and once melted remains in liquid form at low temperatures.

Galloway District in the south-west of Scotland, consisting of the counties of Kirkcubright and Wigtown. The Mull of Galloway is the most southerly point of Scotland and on it is a lighthouse and some ancient remains. Galloway is famed for its breed of horses and its hornless cattle, and is associated with the story of the Covenanters.

The title of Earl of Galloway has been borne by the family of Stuart since 1623. The earl's eldest son is called Lord Garlies.

Gallows Wooden frame used for executing sentence of death by hanging. It is formed of two upright posts and a cross-beam, from which depends the execution rope, or, of a single upright with a projecting beam. The latter form served more particularly for the gibbet, upon which bodies of criminals, after execution, were suspended.

Until 1808, gallows were erected in public places, as at Newgate and Tyburn. See EXECUTION.

Gall Stones Hard concretions formed in the gall bladder. Also called biliary calculi, they may comprise the crystalline substance called cholesterol, or bile pigment encrusted with cholesterol or lime salts. Colour varies from golden brown to white. There may be several hundreds of gravel sized, or a single stone sometimes as big as a goose's egg. Usually arising from catarrh of the bile passages, bile sand is deposited and gradually massed and encrusted. Sedentary occupations and over eating are predisposing causes. See BILE.

Gallus Roman emperor. Trebonianus Gallus first became prominent as the leader of a Roman army in the region of the Danube. After Decius had been killed in battle in that area, in A.D. 251, Gallus was proclaimed Emperor. He made peace with the Goths and marched to Rome. In 253 he was killed by his own soldiers.

Galston Burgh and market town of Ayrshire. It is on the River Irvine, 5 m. from Kilmarnock, on the L.M.S. Ry. There are some industries, and in the neighbourhood are coal mines. Pop. (1931) 4601.

Galsworthy John. English author. Born at Coombe, Surrey, in 1867, he was educated at Harrow and New College, Oxford. He became a barrister in 1890, but gave his time to literary work, and as John Sinjohn published some tales and a novel called *Jocelyn*, 1898. During the next 30 years he made his way steadily into the front rank, winning distinction both as a dramatist and novelist and to a lesser degree as poet and essayist. His honours included an honorary fellowship at his old college and the Order of Merit. In 1931 he was Romanes Lecturer at Oxford. He died in 1933.

Galsworthy's plays deal largely with social problems, and include *The Silver Box*, *Strife*,

Loyalities, *The Skin Game*, *The Pigeon*, *Escape*, and many others. As a novelist his great work is the stories written about the family of Forsyte, a series of books which depicts the history of several generations of an imaginary London family. Beginning in Victorian days they trace the family history up to the disturbed period of the war and after. These books and tales appeared at first separately, but they have been collected into three large volumes entitled *The Forsyte Saga*, *A Modern Comedy*, and *On Forsyte Change*. Other novels are *The Island Pharisees*, *The Freelanders*, *The Dark Flowers*, *The Country House*, *Maid in Waiting*, and *Flowering Wilderness*. Over the River appeared in 1933, after the author's death.

Galt City of Ontario, Canada. It is 24 m. from Hamilton, and is situated on the Grand River, in an agricultural district. It is an industrial centre, having flour and woollen mills, and iron works, for which electric power is supplied by Niagara Falls, and is served by the C.N. and C.P. Ry's. The city is named after John Galt. Pop. 13,200.

Galt John. Scottish novelist. Born in Ayrshire, May 2, 1779, he went to London in 1803. In 1809 his business took him to the Continent, and on his return he took to writing for a livelihood, but met with no great success until *The Ayrshire Legacies* came out in 1820. It was followed by *The Annals of the Parish*, *Sir Andrew Wythe*, and others. In Canada 1820-29 he founded the town of Guelph, and wrote *Laurie Todd*, a *Life of Byron*, and an *Autobiography*. He died at Greenock, April 11, 1839.

His son, Sir Alexander Tillicoch Galt (1817-93), was a prominent politician between 1849 and his death.

Galton Sir Francis. English scientist. Born at Birmingham, Feb. 10, 1822, a cousin of Charles Darwin, he was educated at Birmingham and Trinity College, Cambridge. He graduated in medicine, but did not practise. After travelling in unexplored parts of S. Africa, he wrote a *Narrative of an Explorer in Tropical S. Africa*, 1853, and *The Art of Travel*, 1855. In 1863 he produced *Meteorographica*, notes on meteorology, but his fame rests on his studies in heredity. He wrote *Hereditary Genius* and the more popular *Inquiries into Human Faculty*, and made possible the use of finger-prints for detecting criminals. In 1904 he endowed a professorship for the study of eugenics at the University of London, and he also established a laboratory for the same purpose. In 1909 he was knighted, and he died on Jan. 17, 1911.

Galtymore Mountain of Ireland. In the county of Tipperary. It is the highest summit of the Galtee range, having an altitude of 3015 ft.

Galvani Luigi. Italian physiologist. Born at Bologna, Sept. 9, 1737, he became a professor at the university there, and investigated, chiefly by experiments on frogs, his theory of animal electricity, on which he wrote a treatise *On the Force of Electricity in Muscular Movement*, 1791, thus becoming one of the pioneers of the science of electricity. He died Dec. 4, 1798. The galvanometer perpetuates his name.

Galvanising Process of coating iron or steel with a thin film of zinc. This is done by dipping the iron into a bath of molten zinc, ammonium chloride (sal ammoniac), being used as a flux to promote the union of the two metals. The process was

invented in 1742 by the French chemist, Jean P. Malouin. Galvanised iron or steel withstands the action of air and moisture better than tinplate, hence its use for wire, tanks, and roofing.

Galvanometer Instrument for the strength of electric currents or the potential difference in a circuit. In its simplest form as in the linesman's detector, a magnet, fitted with a pointer, is supported in the centre of a coil of one or more rounds of wire. The magnetic needle is deflected in proportion to the strength of the current.

Galveston City and port of the United States. In the state of Texas, it stands on an island at the entrance to Galveston Bay, and is connected with the mainland by a causeway over 2 m long. Galveston's main industry is shipping, a vast quantity of cotton being exported. Pop (1930) 52,938.

Galway Seaport market town, and urban district of the Irish Free State, also the county town of Co. Galway. It stands on Galway Bay, and is 130 m from Dublin, on the G.S. Ryrs. Shipping and fishing are among the industries, which also include flour milling, marble polishing, and distilling. Pop (1928) 14,300.

The Irish title of Viscount Galway has been borne since 1727 by the family of Monckton Arundell. In 1930, Serlby Hall, near Bawtry, long the family seat, was sold.

Galway County of the Irish Free State. In the province of Connaught, it covers 2370 sq m, and is the second largest in the country. With a coastline of about 400 m on the Atlantic, it is famed for its wild and mountainous scenery of extraordinary beauty, and the Aran Islands, Connemara, and Joyce's Country. There are many lakes, the largest being Lough Corrib.

Galway is an agricultural county, cattle being reared and potatoes and oats grown, but many of the inhabitants are fishermen. Limestone and marble are quarried. Galway is the county town, while others are Tuam, Ballinasloe, Loughrea, Clifden, Athlone, Gort, and Clontarf. Pop (1926) 169,400.

Galway Bay, between the counties of Clare and Galway, is 30 m long and 22 m broad. The Aran Islands protect it from the sea.

Gama Vasco da. Portuguese navigator. Born at Sines about 1460, he became a sailor and in 1497 attempted the difficult voyage round the Cape. He succeeded and crossed the Indian Ocean to Calicut, where he established a settlement, returning to Portugal in 1499. An attempt was made to establish a colony at Calicut but the natives rebelled and Gama was sent to quell them, returning to Portugal in 1503. In 1524 there were more native atrocities at Calicut, and Gama again voyaged there and re-established Portuguese prestige, but died at Cochin on his return journey, Dec 24, 1524.

Gamaliel Jewish rabbi who taught the Apostle Paul (Acts xxii). He was noted for his tolerant spirit towards our Lord's disciples. Although his conversion to Christianity is only a legend, he appears in the saints' calendar on Aug 3.

Gambetta Léon. French statesman. Born at Cahors April 2, 1838, he studied law in Paris, but turning to politics was elected to the Chamber of Deputies in 1869. An ardent republican he became,

after the emperor's surrender at Sedan in 1870 Minister of the Interior and of War in the Government of National Defence. He escaped in a balloon from Paris, and at Tours did great deal to rouse France to action against the invading Germans. In 1871 he founded the newspaper *La République Française*, and his efforts to strengthen the new republic have made him regarded, rightly, as one of its founders. He was elected President of the Chamber in 1879, and from 1881-82 was Premier. He died Dec 31, 1882, as the result of a pistol accident.

Gambia River of West Africa, which gives its name to a British colony. It rises in French Guinea, and flows into the Atlantic Ocean near Bathurst. It is 600 m long and much of its course is navigable.

The British Protectorate of Gambia is a district with an area of 4130 sq m, and includes the colony of Gambia (crown colony, 1888), consisting only of St. Mary's Island, 4 sq m in extent. Ground nuts, palm kernels and hides and skins are the chief exports.

Gambier Baron. English sailor. Born at New Providence, Bahamas, Oct. 13, 1766, James Gambier joined the navy at the age of 11, and received rapid promotion. He distinguished himself in command of the *Defence* on June 1, 1794, and next year became one of the Lords of the Admiralty. He commanded the fleet which bombarded Copenhagen in 1807, and for that was raised to the peerage. In command of the Channel fleet in 1809 he refused to support Lord Cochrane in his attempt to destroy the French fleet in the Basque Roads by fireships. For this he was court-martialled, but was acquitted. He died April 19, 1833.

Gambling Staking money on a sporting of which is undecided and uncertain. It is done chiefly in connection with horse, dog and other forms of racing, but also on games of chance, especially with cards. Players staking money on a game in which skill plays a part (billiards, bridge or golf for example) are not, however, gambling—the definition should be confined to pure chance.

REGULATIONS AND CONTROL In every country and in every age gambling has been prevalent. In Great Britain the law on the subject is conflicting and obscure, persons cannot recover in a law court any debt incurred by gambling agreements dealing with it cannot be enforced, persons who keep gambling houses or persons who take bets in the street, are liable to fine and imprisonment, but on the other hand the licensing of book-makers and the establishment of totalisators on racetracks have given a certain amount of legality to the practice. The position with regard to lotteries and sweepstakes is equally obscure and the law is publicly flouted every day. See **STREPTAKI**.

Gamboge Yellow gum resin, obtained by incision from the bark of a tree, *garcinia cambogia* and other species growing in Ceylon and Siam. Gamboge forms a bright yellow, but fugitive pigment. It is used as a watercolour, and is employed in medicine as a purgative.

Game Name used for certain wild animals which are hunted or shot and to their flesh when used as food. These include in Great Britain hares, pheasants, partridges, red grouse, black game, and bustards. For some purposes the law makes rabbits, snipe,

and woodcock game. Tigers, lions, and other wild beasts, hunted in India and Africa and elsewhere, are called Big Game. Game fowls are fowls of a special kind, bred for their fighting qualities.

GAME LAWS In Great Britain many laws have been passed to protect game, and under these very severe punishments were at one time meted out. This severity has now been mitigated to some extent, but it is still an offence to take or shoot game without the consent of the owner of the land. It is also an offence for anyone to shoot or hunt game on Sundays, Christmas Day, or during the close season (a period, fixed by law, during which the species must be left unmolested in order to breed). See CLOSE TIME.

Gamete Biological term for the cell which takes part in reproduction. Typically gametes consist of the ovum, a comparatively large cell containing food material, and the spermatozoon, smaller and frequently active. The individual bearing the former is the female, the latter, the male.

Gamma Rays One of the emanations from certain radioactive substances. They include electromagnetic waves more penetrating than X-rays and of smaller wave length. They are given out by some forms of radium, thorium and actinium.

Gandak Name of two rivers of India. The Great Gandak (also called the Salagrami), rises in the Himalayas and flows for about 400 m. in a south-easterly direction until it falls into the Ganges near Patna. The Little Gandak also rises in the Himalayas, and takes a very similar course until it joins the Gogra.

Gandhi Mohandas Karamchand Indian Nationalist. Born in India, Oct. 2, 1869, he studied law in London, and then returned to practise as a barrister in Bombay. In 1893 he was in S. Africa, where he led his fellow countrymen in their opposition to the legislation directed against them. His methods were successful, and he became known as a leader of the nationalist movement, which gained a good deal of strength after the World War.

In 1919 Gandhi acted as the spokesman of those who objected to British rule in India, and was soon recognised as their leader. He organised a boycott of British goods, and started the movement known as non-co operation. In 1922 he was arrested for sedition and sentenced to a term of imprisonment, but in 1924, having still four years to serve, he was released. After a period of quiet he renewed his agitation in 1930, his violent speeches, in which he urged the expulsion of the British from India, leading again to his arrest. He was, however, soon released, and at Delhi he made an agreement with the Viceroy, promising in return for a large measure of self government for India, to call off the boycott. In spite of this, he continued to make demands for India which to Englishmen seemed impossible. In 1931 he came to London to attend the Round Table Conference, but was arrested and imprisoned shortly after his return to India. In Sept., 1932, Gandhi by a prolonged fast endeavoured to force the hand of the Government. In 1933 he again fasted, on this occasion as a protest against the religious tabu of "untouchability." To his followers Gandhi is the mahatma, or master.

Ganges River of India. It rises in the Himalayas, having its source in a cave in the state of Garhwal, 14,000 ft. above sea level. It is first called the Bhagirathi, taking the name of Ganges only after the Alaknanda joins it, 133 m. from its source, near where it enters British India. It passes Cawnpore, and flows to Allahabad, where it receives the Jumna and becomes a great river, having now traversed 670 m. It turns eastward and passes Benares, Patna and other towns, receiving the Gumti, Gogra, Gandak and other streams. Farther on the Brahmaputra joins it, and the vast delta begins. It enters the sea by several mouths, one being the Hoogli on which Calcutta stands.

The Ganges is 1557 m. long and drains an area of about 300,000 sq. m. It is navigable for about 700 m., and barges can reach Cawnpore. It is subject to floods which in the wet season cover an immense area. The Ganges' canals irrigate an enormous area between the main river and the Jumna, and help to make the valley one of the most fertile in the world.

To the Hindus the Ganges is a sacred river, *Mother Gunga*, and at Benares and elsewhere they come in thousands to bathe in her waters. In 1931 its sources were explored by an expedition composed of British scientists.

Ganglion In anatomy, a swelling upon the course of a nerve, composed of nerve cells. The sympathetic system of man and other vertebrates comprises essentially chains of ganglia. Others occur on the posterior roots of the spinal nerves, and one, called Gasserian, on the fifth cranial nerve's sensory root. In pathology, a ganglion is an encysted tumour, containing fluid, on a tendon sheath, particularly in the sinews before and behind the wrists. It arises from disorder of the synovial membrane.

Gangrene Mortification or death of part of the body large enough to be seen—thus distinct from ulceration, which is slow successive death of microscopic parts, and from necrosis, death of internal parts, particularly bones. Dry gangrene, a process of mummification, may attack the aged. Moist gangrene is accompanied by putrefaction, the part becoming swollen with fluid, and when dead forming a slough. Gangrene may arise from burning, crushing, frost-bite, ergot-poisoning or bacterial infection. Hospital gangrene succumbed to Lister's antiseptic treatment.

Gannet Widespread genus of web-footed sea-fowl (*Sula*). The northern solan goose, *S. bassana*, which is 34 in. long, with a 6 ft. wing-spread, haunts the Atlantic coasts of Europe and N. Africa and feeds on fish. It is white plumaged, with a yellow-tipped neck, and black wing feathers. Its breeding grounds include the Hebrides, Ailsa Craig, Lundy Island, and Bass Rock. One egg only is laid. Smaller species inhabit the Cape of Good Hope and Australia. See BOOBY.

Ganymede Character in Greek legend. A beautiful youth, he attracted the notice of Zeus, who sent an eagle to carry him to Olympus, where he became his cup-bearer. He was supposed to be a son of Troos, King of Troy.

Gapes Disease of poultry. It is caused by the presence in the windpipe of a parasitic threadworm, *syngamus trachealis*. The eggs, picked up from infected ground, develop into mature worms, which cling to the mucous membrane of the windpipe, causing

great irritation and weakness. The annual mortality from suffocation is large.

Garbo Greta Swedish film actress. Greta Gustafsson was born Sept 18, 1900, in Stockholm, and at the age of fourteen began work in a department store. In 1922 she began to work in films, and later joined a Dramatic School. She played in *Gosta Berling's Saga* under the direction of Mauritz Stiller, and changed her name to Garbo. After a picture in Germany she went to Hollywood with Stiller, and made her first picture, *The Talent*. There followed *The Temptress*, *The Flesh and the Devil*, *Love*, *The Divine Woman*, *Anna Christie*, *Romance*, *Inspiration*, *Mala Hari* and *Grand Hotel*.

Garda Lake of Italy. In the north of the country, it is one of the "Italian Lakes," famous for their beauty. It is about 15 m long and covers 180 sq m, being the largest lake in Italy. Gardone Riviera is one of the resorts on the lake which has been immortalised in the poetry of Virgil and Dante.

Gardelegen Town of Germany. It stands on the Muldo and on the railway line from Hanover to Berlin. Here, during the Great War, the Germans set up a camp for prisoners of war. In 1915 about 11,000 men were interned, and great distress was caused by epidemics of typhus and other diseases. The German treatment of the prisoners in this camp was the subject of a special report drawn up by the British Government in 1916.

Gardening (AS A CAREER) The possibilities of employment after a horticultural training include nursery gardening, landscape gardening, positions with fruit, flower and vegetable growers, occasional openings in connection with public parks and botanical gardens and sub-inspectorships under the Ministry of Agriculture. To begin market gardening in a small way capital amounting to about £1000 to £1500 is required.

The highest qualifications to be obtained are the London B.Sc. in Horticulture, and the National Diploma in Horticulture held by the Royal Horticultural Society with the approval of the Board of Agriculture. Other examinations held by the Royal Horticultural Society are:

The General Examination (Juniors and Seniors)

The Teachers' Examination in School and Cottage Gardening (Preliminary and Advanced)

Training for the horticultural examinations is best taken at a college such as the Royal Horticultural Society's School at Wisley, Surrey, for men (two years course). Practical experience with a horticulturist is extremely helpful, a premium usually being required. Both sexes are admitted to University College Reading and the Royal Botanic Society's School of Gardening in London.

A list of Horticultural Colleges for both men and women, and a syllabus of examinations may be obtained from The Secretary Royal Horticultural Society, Vincent Square, Westminster, S.W. 1.

Garden City Residential district in which the houses are built with plenty of space for gardens and open spaces. The first garden city in England was planned at Letchworth in 1904. On 6 sq m of land a town to house 35,000 people was planned. Other garden cities followed one being at Welwyn and another the Hampstead

Garden Suburb. Bourneville and Earswick, built for industrial workers, are also garden suburbs. The movement has spread to the British Dominions, and there are also garden cities in France, Germany, the United States and other countries. To promote the movement, the Garden City and Town Planning Association was founded in 1899, with offices at 3 Gray's Inn Place, London, W.C. 1.

Garden City, on Long Island (U.S.A.), is 20 m from New York.

Gardenia Genus of evergreen trees and shrubs, named by Linnaeus after the botanist Alexander Garden, F.R.S. Native to S. Africa and tropical Asia, several species are cultivated, especially the Chinese *G. florida* popularly called Cape jasmine, and the Japanese, *G. radicans*. The handsome white or yellowish flowers are often delicately perfumed.

Gardiner Samuel Rawson English historian. Born at Ropley, Hampshire Mar. 4, 1820, his most important work is the *History of England from the Accession of James I. to the Outbreak of the Great Civil War*, 1863-82, and he also wrote *The Great Civil War*, 1886-91, *The Commonwealth and Protectorate* 1804-1003 and many other historical works all marked by pains taking accuracy, including *A Student's History of England*. He died Feb. 14, 1902.

Gardiner Stephen English prelate and statesman. Born at Bryn S. Edmunds about 1403, he was elected Master of Trinity Hall, Cambridge, in 1525. In 1528 he was sent by Henry VIII to Italy to secure the consent of the Pope to the divorce of Catherine of Aragon, and though he failed in his mission he was made Secretary of State the next year and in 1531 Bishop of Winchester. When Edward VI. ascended the throne he was deprived of his see and imprisoned, but on the accession of Mary in 1553 was released, reinstated to his bishopric and made Lord Chancellor. He died Nov. 12, 1555.

Gareloch Opening of the Firth of Clyde. It penetrates the land for about 7 m from Helensburgh to Garelochhead, a pleasure resort. Another watering place on its banks is Roseacath.

Garfield James Abram American statesman. Born at Orange, Ohio, Nov. 10, 1831, he distinguished himself as a soldier during the Civil War, and in 1863 was elected as a republican to the House of Representatives at Washington, being for the next 18 years a leader of his party. In 1880 he was chosen President but in July, 1881, he was shot at Washington. He lived until Sept. 19, 1881.

Garforth Urban district of Yorkshire (W.R.). It is 7 m from Leeds on the L.N.E. Ry. The principal industry is coal mining. Pop. (1931) 3774.

Garibaldi Giuseppe Italian patriot. Born at Nizza, July 4, 1807, the son of a fisherman he early came under the influence of Mazzini, then organising the Young Italy movement, and joined the insurrection of 1831. Forced to flee the country, he was from 1836-48 in S. America, fighting for the Montevideans against Rosas. On his return to Europe in 1848 he fought for the King of Sardinia and a member of the revolutionary government, defended Rome against the French. In 1850 he again fought for Sardinia against the Austrians.

After the peace of Villafranca, making a united Italy his aim, he led a small army of volunteers, his "red shirts," into Sicily, which he captured from the Bourbon King of Naples. He then captured the Neapolitan territory on the mainland and handed both to Victor Emmanuel, thus helping him to become the first King of united Italy. In 1862, and again in 1867, Garibaldi made unsuccessful attempts to take Rome, being forced after each to go into retirement at Caprera. In 1870 he gave his services to France against Germany. He died June 2, 1882.

Garlic Pungent perennial bulbous herb (*Allium sativum*) of the lily order. A native of Asia, and widespread anciently in the Mediterranean region. It has long been a favourite condiment in S. Europe and most Oriental countries, and was introduced into England in Tudor times. The bulb has membranous scales whose axils bear 10 or 12 smaller bulbs called cloves of garlic. Medically, it is a stimulant and stomachic. *A. ursinum* is bear's garlic or ramsoms, other British species are crow, wild, and field garlic.

Garnet Group of gemstones of varying composition and colour, but possessing certain characteristics in common. The garnets crystallise in 12 or 24 sided forms, have a greasy lustre and imperfect cleavage. They are complex silicates of various oxides. Lime-alumina garnets are red, yellow, or green, a gemstone of this class being the cinnamon stone of Ceylon. Iron alumina garnet, or almandine, is purplish red, the common red garnet is a magnesia-alumina variety.

Garonne River of France. It rises in Spain in the Pyrenees, but soon enters France. It passes Toulouse and Agen, and reaches Bordeaux, near which city it unites with the Dordogne to make the estuary called the Gironde. The tributaries include the Lot, Tarn, Save, Gers, Ariège, and Salat, and its length is about 350 m. The Canal du Midi links it with the Mediterranean.

Garrick David English actor. The son of an officer, he was born in Hereford, Feb. 19, 1717, and educated at Lichfield. He there met Johnson, who took him as a pupil, and in 1737 the pair set out together for London. Engaged for a time, unsuccessfully, in the wine trade, Garrick first appeared on the stage in London in 1741, and won an instant success. He played at Drury Lane, in Dublin, and at Covent Garden, and in 1747 became joint manager of Drury Lane, where he remained until 1776. He died, Jan. 20, 1779.

Garrick ranks as one of the greatest, if not the greatest, of English actors. His name is perpetuated by the Garrick Club, founded in 1831. The house is at 15 Garrick Street, London, W.C.

Garrison Armed force stationed in a fort, castle, or fortified town to defend or guard it, or to control the inhabitants. Towns in which garrisons, for convenience or precaution, are habitually stationed, are called garrison towns. These usually include companies of the Royal Artillery.

Garrison William Lloyd American abolitionist. Born at Newburyport, Mass., Dec. 10, 1805, in 1826 he became editor of a newspaper in his native town, and came out as an advocate of the abolition of slavery. In 1831 he started *The Liberator* at Boston, which he continued to

edit in spite of grave danger and difficulties. As the foremost opponent of slavery Garrison lectured in England, and was President of the Anti-Slavery Society. In 1865, on the abolition of slavery, he was presented with 30,000 dollars. He died in New York, May 24, 1879.

Garrotte Appliance used in Spain and Portugal for executing sentences of death. The seated criminal is secured to an upright post by a hinged metal collar, a screw or lever dislocating the spinal column. Originally the collar was a cord, strangulation being effected by twisting the cord with a ougel.

Garry Lake of Canada. In the North-West Territories, it is only just outside the Arctic regions, and covers nearly 1000 sq. m. The Great Fish River flows through it to take its waters to the Arctic Ocean. Garry Island is an island at the mouth of the Mackenzie River in the Arctic Ocean. Fort Garry is the old name of Winnipeg.

Garter Order of the Senior English order of knighthood. It dates from 1348, when it was founded by King Edward III. Its motto, *honi soit qui mal y pense*, is inscribed on the garter of dark blue velvet which knights wear just below the left knee. They also wear a mantle, surcoat and hood, with a collar of Tudor roses, from which the George, a figure of S. George, and a star, are suspended.

The head of the order is the Sovereign, and there are 26 knights in addition to members of the royal family and foreign rulers and princes. Each knight has a stall in S. George's Chapel, Windsor. The garter king of arms is the herald of the order. For years membership was confined to peers, but in the 20th century the garter was given to Sir Edward Grey, later Viscount Grey, and Sir Austen Chamberlain. Knights are distinguished by the letters K.G., and rank above all other knights.

Gas State of matter in which the cohesion between the material particles is at its minimum, producing a condition of perfect fluidity. Consequently a gas has no definite size or shape except that given by a containing vessel. By the application of cold, gases pass into the liquid or solid state, and similarly heat will change a solid or liquid into a gas.

Gases readily diffuse into one another, are soluble in many liquids, and their properties of viscosity in flow and compressibility are well marked characters. They show characteristic absorption bands in the spectrum.

The commonest gases are the constituents of air and water, viz., oxygen, nitrogen, and hydrogen, coal gas, from the distillation of coal, is used as an illuminant and source of heat. Water gas, produced by passing steam through a mass of incandescent coke, is also employed as an illuminant.

Gas for lighting and heating houses, shops, factories and the like, is supplied by companies which obtain their powers from Acts of Parliament and are supervised by the Board of Trade.

POISON GAS In modern warfare toxic and irritant gases are discharged against hostile troops by means of cylinders or special shells. They were first introduced during the Great War. The employment of shells containing an irritant gas (dianisidine chlorosulphonate) at Neuve Chapelle was followed by the use of a tear gas (xylyl bromide), and later by cylinders of chlorine and a mixture of chlorine and phosgene. In 1917 other toxic and irritant

gases were introduced, such as mustard gas (dichloroethylsulphide). The use of gas in warfare necessitated the employment of various types of anti gas respirators

Gascoigne Sir William English Judge Born about 1350, he was made Chief Justice of the King's Bench in 1400. In 1403 he was commissioned to levy forces against the rebellious Earl of Northumberland. He seems to have resigned his office soon after the accession of Henry V and he died in 1419. Two instances, both probably untrue, are cited to illustrate his impartiality and fearlessness, i.e., he refused to try Archbishop Scrope, since he had no jurisdiction over ecclesiastics, and he committed Prince Henry (later Henry V) for contempt of court.

Gascony District of France. In the south west of the country, in the angle formed by the Pyrenees and the Atlantic Ocean. It takes its name from a tribe called the Vascones. In the Middle Ages it was a dukedom but about 1100, or earlier, it became part of Aquitaine, and as such was included in the dowry of Eleanor, wife of Henry II of England. It remained an English possession until 1453. The men of Gascony—Gascons, as they were called—were proverbially braggarts and swaggerers, albeit not without courage. Their speech, a French dialect, is still heard in the district.

Gas Engine Type of internal combustion engine. The power is obtained from the combustion of an explosive mixture of gas and air in a cylinder. The first engine of this type was invented in 1860 by Lenoir, who used coal gas as fuel. It was improved upon by Otto introducing the four stroke cycle, in which there is one explosion for every four strokes of the piston, the cycle of operations being completed in two revolutions of the crank. Most gas engines are of this type and single acting, but a two stroke cycle is used for many large engines since it gives a greater output of power.

Gaskell Elizabeth Gleghearn English novelist Born in London, Sept. 29, 1810, she was brought up at Knutsford and Stratford on Avon. She married, in 1832, William Gaskell, a Unitarian minister in Manchester. Her first novel, *Mary Barton*, appeared in 1848, then came *Ruth*, and *Cranford*, her best known work. In 1853 she also wrote *North and South*, *Sylvia's Lovers*, *Wives and Daughters*, and *A Life of Charlotte Brontë*. She died Nov. 12, 1865.

Gas Mantle Device to give increased illumination. It was invented by Welsbach in 1885 for attachment to a burner of the Bunsen type. It consists of a tube of loosely woven fabric of ramie fibre rayon, or cotton impregnated with a solution of thorium and cerium nitrates obtained from the mineral monazite. The mantle when burned leaves an incandescent skeleton of the earthy oxides giving a brilliant light. The finished mantle is stiffened with collodion which is burned off on first lighting.

Gasometer Large gas holder used in the storage of coal gas. It consists of a cylinder, usually of telescopic construction, contained within a water tank in which the holder rises and falls but is held in position by roller guides on the top and bottom edges. The outlet is regulated by a governor controlling the pressure of gas.

Gasometry Method of measuring the volume of gases and gas

eous mixtures. This is done by means of the endiemeter (*qv*) and other apparatus. Hempel's apparatus, which is frequently used in industrial analysis, consists of a gas burette for measuring and an absorption apparatus of two or more bulbs in which the gas is brought into contact with reagents. The burette consists of two vertical glass tubes joined by flexible tubing, one tube being graduated in centimetres, the other open and not graduated.

Gaspé Peninsula of Canada. It lies to the south of the St Lawrence in the extreme east of the Province of Quebec. Mainly a forest area, it has a cold climate and is thinly peopled. At its eastern end and in the Gulf of St Lawrence are Gaspé Bay and Cape Gaspé.

Gastein Name of several villages of Austria. They stand in a beautiful valley near Salzburg and are visited by health and pleasure seekers. The River Ache flows through the valley. The most popular village for visitors is Wildbad Gastein, where there are some mineral springs.

The Convention of Gastein was an agreement signed between Austria and Prussia on Aug. 14, 1865. The two countries had just taken Schleswig and Holstein from Denmark and by this Convention they agreed that Prussia should possess Schleswig, and Austria, Holstein. The arrangement fell through very soon, as war broke out between them in 1866.

Gastritis Inflammation of the stomach. It is usually due to the irritation of its lining of mucous membrane and may be either acute or chronic in character. The former may arise from errors of diet or from an irritant poison; the symptoms being like those of bilious attacks. The chronic type especially attends persons addicted to alcoholic excess or to bolting food, and is often associated with heart disease or disordered liver. Pain, the sensation of fullness, flatulence, nausea and lassitude are experienced. See DYSPEPSIA.

Gastropoda Class of belly footed molluscs. They crawl on a broad, muscular disc like foot beneath the body. A univalve shell never a bivalve, is generally developed in the larval form, it is sometimes obsolete or absent in the adult. All gastropods possess rasping tongues, the mouth being situated in the foot. Over 16,000 species are known, and they are found on land, or in fresh or salt water. Many are gill breathing, e.g., whelks, periwinkles, limpets and cowries. Others are air breathing, such as slugs and snails or land shells.

Gastrostomy Operation of forming a permanent artificial opening into the stomach for introducing food. It becomes essential when food cannot traverse the gullet because of obstruction or stricture. Gastrostomy is the making of incisions through the abdominal walls. Gastrostomy is the operation for removing the stomach, in whole or part.

Gateshead Borough and seaport of Durham. It stands on the Tyne, just opposite Newcastle, on the L.N.E.R. 267 m from London. The industries include engineering works, railway shops and the manufacture of chemicals. Shipping and shipbuilding also give employment. Pop (1931) 122,379.

Gath One of five confederated Philistine cities. It was captured by Sargon of Assyria in 711 B.C. The birthplace of Goliath.

David conquered it. It was fortified by Rehoboam, annexed by Hazael of Damascus and destroyed by Uzziah.

Gatling Richard Jordan American inventor. Born in North Carolina, Sept. 12, 1818, he was educated at Ohio Medical College. In 1862 he invented the Gatling machine gun, and among his other inventions were a steam plough, a new gun metal and a hemp-breaking machine. The Gatling gun was of the revolving type with six barrels, a crank, worked by hand, feeding, firing and ejecting the cartridges. He died Feb. 26, 1903.

Gatton Village of Surrey, once a borough. It is 2 m. from Reigate. Pop. 236. **Gatton House**, the residence of Sir Jeremia Colman, was built in the 18th century. Recently burnt down, it has been rebuilt.

Gatun Town, lake and river of Central America. The town is in the Panama Canal Zone and belongs to the U.S.A. It is on the canal, where the rivers Gatun and Chagres meet, 7 m. by railway from Colon. Here are huge locks and a dam.

Gatwick English racecourse. It is near Horley, Surrey, about 26 m. from London, on the S. Rly. Several meetings are held here during the racing season. Gatwick is now an airport.

Gauchos Mounted herdsmen of the Uruguay and Argentine pampas. Although some are aboriginal Indians, those properly called Gauchos claim Spanish paternity. Their skillful horsemanship, innate courtesy and love of finery endow them with a notoriety not always untainted by brigandage.

Gaudeamus College students' merry-making, especially in Scotland. The word is derived from a German students' song in dog Latin, beginning *Gaudeamus igitur juvenes dum sumus, Then let us be merry while we are young*. A modified version of an adaptation dating from 1776 appears in *The Scottish Students' Song-book*.

Gauguin Paul French painter. Born in Paris, June 7, 1848, he spent his childhood in Peru and Orleans, and entered a banking firm in 1871. Soon after, encouraged by Pissarro, he began painting, joining the Post-Impressionist group, and later started the Synthetist movement, which treated colour in a new way. After painting in Brittany and Southern France, he worked in Tahiti from 1891-93, painting the natives, as in "Devant la Case," "Jours Délicieux." After visiting Paris, he returned to Tahiti in 1895, and died in Dominika May 9, 1903.

Gauge Term originally given to a measuring rod used in gauging the contents of casks, now used for many forms of measuring apparatus. In the measurement of wire and sheet metal, definite gauges of the diameter or thickness are adopted for purposes of standardisation, as in the Birmingham Wire Gauge (B.W.G.) for electrical wires, etc., or the Standard Wire Gauge (S.W.G.) for general purposes. Rain gauges, water and steam gauges are other forms of measuring instruments. A railway gauge is the width between the lines of the railroad. The standard gauge, which has been adopted over a great part of the civilised world, is 4 ft. 8½ in.

Gaul Old name for France. It is the modern form of the Roman name Gallia, which was given to the European region inhabited by Celtic-speaking peoples. This was at first divided into Cisalpine, South

of the Alps, and Transalpine, beyond the Alps, and besides France embraced various adjacent regions.

Gault Name given to a soft bluish clay. It is found between the Greensands upper and lower, in the south of England, and is used for making bricks and tiles.

Gauntlet In mediaeval armour, a protective glove, sometimes bearing metal knobs and spikes. It was introduced in the 13th century, later types were made of hammered steel, completely fingered and jointed. Nowadays the term denotes a long, stout glove, used mainly for riding or driving.

In running the gauntlet it is confused with an entirely distinct Swedish word, *galopp*, lane run.

Gautier Théophile French author. Born at Tarbes, Aug. 31, 1811, he was educated in Paris, where he studied art and literature. An ardent, and in his youth, an extravagant Romantic, he early became a disciple of Victor Hugo. In 1830 he published *Albertus*, a metrical romance, and in 1835, *Mille de Maupin*, a brilliant but immoral novel. A journalist and critic, he was also the author of a great number of novels and poems of great merit and real beauty. They include, *Les Jeunes-France*, *Le Capitaine Fracasse*, and *Ménagerie Intime*, and in verse, *Émaux et Camées* and *La Comédie de la Mort*. Gautier died in Paris, Oct. 23, 1872.

Gavelkind Form of land tenure. By it land descended to all the sons equally if the father died intestate. It was thus the opposite of primogeniture. Gavelkind was long the custom in Kent, but in 1925 all these relics of ancient land customs in England were abolished.

Gavotte Lively and graceful dance. Of French peasant origin, it is derived from the Gavots, or people of the Pays du Gap, Hautes Alpes. A French court dance in the 16th century, late in the 18th century it passed to the stage.

Gay John English poet and dramatist. Born in Devonshire in 1685, he was educated at Barnstaple and for a time was apprenticed to a silk mercer in London. Soon turning to literature he wrote poems, pamphlets and plays, scoring his first success in 1714 with a pastoral, *The Shepherd's Week*, suggested to him by Pope. This was followed by *Trivia*, a poem describing the London streets. In 1727 his *Fables* were published. His best work was *The Beggar's Opera*, produced the next year, the success of which was unprecedented. The production of a sequel, *Polly*, was prohibited, but in book form it was very successful. Gay died Dec. 4, 1732, and was buried in Westminster Abbey.

Gaza Town of Palestine, also called Guzzeb. It stands near the Mediterranean Sea. It was a Philistine city and owing to its position has always been a place of military importance. Pop. 17,500.

There was a good deal of fighting around Gaza during the World War. In 1917 the British forces invading Palestine twice attacked and failed to take Gaza, but succeeded on the third attack, under Allonby, in Nov. 1917.

In 1930 Sir Flinders Petrie unearthed the remains of an early and great city here. Many remarkable finds were reported.

Gazelle Genus of small antelopes. Native to N. Africa and Asia, they form large herds on the desert borders. They are

GDYNIA

graceful, swift and slender limbed, and are mostly under 30 ins high at the shoulder. The male of the Dorcas gazelle, often tamed in Arabia and Persia, has lyre shaped, ringed horns about 13 ins long.

Gdynia

Seaport of Poland. It stands on the Gulf of Danzig, 12 m from the free city of that name. Much of the trade of Poland now passes through it. Pop (1931) 30,210.

Gear

Toothed wheels used in transmitting motion in machinery. There are many forms of gears, differing in the size of the wheels and the form of the teeth according to the speed and direction of the motion transmitted. In spur gearing the teeth are cycloidal or involute, the bevel gearing is used where two shafts are set at an angle to one another, while in worm gearing the wheel works upon a screw like worm.

Geddes

Sir Auckland Campbell British politician. Born, June 21, 1879, he was educated at Edinburgh University. He became assistant professor of anatomy at McGill University, Montreal. He joined the army during the South African War, and again during the World War, being recalled from the front in 1916 to take up the post of director of recruiting. In 1917 he was knighted and successively became minister for national service, minister of the local government board (1918), and president of the board of trade (1919-20). He was for a short time head of McGill University, Montreal, a post he soon left to become ambassador at Washington (1920-24).

Geddes

Sir Eric Campbell. Born in India, Sept 26, 1875, he entered the railway service and gained experience in the United States and India. When the Great War began he held a high position in the North Eastern Railway, which he left in 1915 to enter the ministry of munitions. He was next made director general of military railways, where he made his mark, and passed on to become controller of the navy and then first lord of the admiralty. He was then chosen M.P. for Cambridge. In 1919, Geddes who had been knighted in 1916 left the admiralty in which was soon made minister of transport, in which capacity he carried out his life in 1921, and in 1922 was chairman of the committee that suggested reductions in national expenditure. In 1922 he was appointed chairman of the Dunlop Rubber Co. and of Imperial Airways.

Geddes

Jenny Scottish kilt-wife. She is known to fame as the woman who started a riot in St Giles' Edinburgh, July 23, 1837, by harling her stool at the head of the dean who was reading Laud's liturgy for the first time. Bishop and dean were forced to flee and the liturgy was not read again. In the Antiquarian Museum, Edinburgh, the stool is to be seen.

Geelong

City of Victoria Australia. It is 45 m from Melbourne and stands on Corio Bay, near the River Barwon. The industries include woollen mills, cement works and other manufactures. Shipping is an important industry. Greater Geelong covers 25 sq m and includes Newtown, Chillewell and Geelong West. Pop (1931) 42,760.

Gehenna

Greek form of the Hebrew name of the valley of Hinnom.

It is situated S.W. of Jerusalem. Solomon built there an altar to Moloch, and when Josiah dismantled it, the valley became the city's ash heap, with its insect life and perpetual fires. Becoming the symbol for hell, it was so employed by Christ (Mark ix).

Geikie

Sir Archibald Scottish geologist. Born in Edinburgh, Dec 28, 1835, and there educated, in 1855 he entered the geological survey in Scotland. In 1871 he was appointed to the Murchison professorship of geology and mineralogy at Edinburgh University, and from 1881-1901 was director general of the geological survey of the United Kingdom, and director of the Museum of Practical Geology, London. He was president of the Geological Society in 1891, and given the Order of Merit in 1914. He died Nov 10, 1924. His many works include *Scenery of Scotland, 1865*, *Outlines of Field Geology, 1882*, *Ancient Volcanoes of Great Britain, 1897*, and *Text Book of Geology*. He also wrote *Scottish Reminiscences*.

Geisha

Japanese girl educated from childhood to be a professional entertainer.

Gelatin

Purified form of glue. It is prepared from the parings of hides and skins, bones and other animal products. The purest form, isinglass, is a fish glue. It is used for culinary purposes, in the preparation of photographic plates and films, also in bacteriology, dyeing, and making a size for paper, and for various other purposes.

Gelderland

Province of the Netherlands. It lies between the Zuider Zee and Prussia and covers 1941 sq m. Arnhem is the capital, other towns are Zutphen and Apeldoorn. For long Gelderland, or Guelders, had its own rulers, who were first counts and then, from 1339, dukes. In 1563 it passed to the Emperor Charles V, and in 1678 became one of the United Provinces. It was added to Prussia in 1713, but in 1814 was included in the kingdom of the Netherlands. Pop (1931) 843,231.

Gelignite

High explosive. A modification of gelatin dynamite, it consists of a thin jelly containing about 65 per cent of nitro glycerine with varying proportions of collodion cotton, nitrate of potash and wood meal. It is regarded as the standard explosive for blasting rocks and other industrial purposes.

Gelligaer

Urban district and colliery centre of Glamorganshire, 14 m from Cardiff with stations at Bargoed, Hengoed and Pengam on the G.W. Ry. There are some interesting remains of a Roman camp. Pop (1931) 41,042.

Gelo

Tyrant of Syracuse. In 491 B.C. he was ruler of Gela in Sicily. In 485 B.C. he became tyrant of Syracuse and the city increased in size and importance. He won great fame by defeating a large army of Carthaginians in 480 B.C. He died in 478.

Gem

Term applied to precious stones after cutting and polishing. A number of semi-precious stones, such as agate, onyx and garnet, as well as cameos are included. In gem cutting there are many styles, the brilliant, rose and table-cut being examples of plane surfaces, while opals and certain other gems are cut with curved faces.

in cabochon

Gemsbok Species of antelope (*Oryx gazella*). A native of S W Africa. It abounds in the Kalahari desert and Damaraland. It is a stout, heavy animal, about the size of a stag, with maned neck, tufted tail and coat of grey, black and white. Its nearly straight horns, sometimes exceeding 3 ft. in length, enable it to beat off lions.

Gendarme French term denoting at first a man at-arms mounted and armed at all points. Afterwards the word was used for a mounted soldier employed in maintaining the royal authority. This system, dissolved in 1788, was replaced in 1791 by military police, organised, uniformed and drilled like soldiers, who act under the civil authority. Similar forces exist in other European countries, being called in Spain the *guardia civil* and in Italy *carabinieri*.

Gender Distinction between nouns corresponding directly or metaphorically to the natural distinction of sex. Names denoting male sex are of masculine, those denoting female of feminine gender. Latin and other Indo-European languages recognised also names of neither or neuter gender, although many inanimate objects bore masculine or feminine names. French and other Romance languages have dropped the neuter gender. English has discarded grammatical gender entirely, natural gender being often indicated by variants, e.g., drake, duck.

Genealogy History of the descent of a person or family. It may form a pedigree or family tree. Genealogical records are investigated specially by the College of Arms in London. Lines of descent in the evolution of animals and plants constitute biological genealogies. There is a Society of Genealogists at 5 Bloomsbury Square, London, W C 1.

General Name given to a military officer of high rank. It was first used in England for Cromwell, who was the lord general and who appointed major generals. In the British army the four kinds of general, all ranking between colonel and field-marshal, general, lieutenant-general, major-general and the temporary rank of brigadier-general.

In the Roman Catholic Church the Jesuits and some other orders call their head the general. He is elected by the provincials and lives in Rome, being subject only to the Pope.

General Assembly Name given to the governing body of the Church of Scotland and other Presbyterian churches in Ireland, Canada, Australia and elsewhere. The Scottish general assembly meets every year in Edinburgh in May, and consists of ministers and laymen sent as representatives by the presbyteries in the Church. The king is represented by a High Commissioner appointed each year. The assembly is presided over by a minister elected to the office, called the moderator. Until the union of the free churches with the established church, each had its own general assembly, which also met in Edinburgh in May.

General Strike. See STRIKE

Generator In electricity a machine for the conversion of mechanical energy into electrical energy. This is done by the rotation of an armature, or other form of conductor, in a magnetic field. Generators are either of the direct current type, in which

the current flows in one direction, or of the alternating current type.

Genesis First book of the Old Testament. Its Greek name, meaning "origin," is that of the Septuagint version. After an account of the creation of the world it surveys the early history of mankind (i-xi), and in fuller detail that of the patriarchs Abraham, Isaac and Jacob (xii-1). Traditionally ascribed to Moses, and forming, with four succeeding books, the Pentateuch, it is now recognised as including contributions from four principal sources, having been finally revised after the Jews returned from exile in the 6th century.

Genetics Study of the problems of heredity and variation in types of organisms related by descent. The term is also used for the various problems of development of the individual, and of organic evolution. It covers such subjects as the nature and structure of the germ plasma, the relation of heredity to sex and the behaviour in inheritance of variations. Genetics has a practical application in the breeding of plants and animals and in eugenics.

Geneva Lake of France and Switzerland. It is 45 m long and covers 225 sq m, larger than any of the other Swiss Lakes. The southern shore is French territory. On its banks are Geneva, Lausanne, Montreux, Vevey and other pleasure resorts. The Rhône flows into the lake and emerges from its southern end. Steamers traverse the lake, which is called by the French Lac Léman.

Geneva City and river port of Switzerland, and the headquarters of the League of Nations. The capital of a Swiss canton of the same name, it stands at the S W end of Lake Geneva, where the Arve joins the Rhône, and is 388 m by railway from Paris. On both banks of the Rhône, the older part lies on the left bank, and there are several bridges between the two. John Calvin's house still stands. An educational centre, Geneva has a university and several technical schools. The chapel of the Maccabees and the tower of the bishop's palace are interesting old buildings, the Palace of the Nations the headquarters of the League of Nations, is modern. The International Labour Office possesses a fine edifice, and a building for the secretariat and library of the League of Nations has been planned in Ariana Park.

Geneva has a harbour in the river and quays for the shipping. Other industries include the manufacture of clocks, watches, jewellery, chocolate and motor cars. It has a broadcasting station (760 M. 15 kW).

Geneva owes much of its importance to John Calvin, who settled here in 1536, and was for some years the city's autocrat. Previously it had been under its bishops, who were princes of the Empire, it then became a republic and remained so until the time of the French Revolution. In 1815 it became part of Switzerland. In the 19th century it was made the headquarters of the Red Cross Organisation, and in the 20th the seat of the League of Nations. Pop 126,700.

The Geneva Convention is an agreement signed by the chief nations of the world in 1906. It provides for better treatment of the wounded in war than was previously the case, and forbids any misuse of the Red Cross flag.

Geneviève Patron saint of Paris. A shepherd's daughter, born about 422, she encouraged the citizens when

threatened by Attila and the Huns, and brought them aid when Childeric attacked the city. She founded the church of S Denis, and was buried in the church of S Etienne du Mont. Her festival day is Jan 3.

Genie In Oriental mythology, a class of subservient spirits, lower than the angels. Made of fire and capable of appearing in human or animal guise, they sometimes exercise over mankind a supernatural influence for good or evil thus bearing a casual and confusing likeness to the ancient Roman genii. The word is a corruption of the Arabic *jinn*, plural *jinnee*.

Genista See BROOM

Genius God of Roman mythology. He was the god of productivity and especially of marriage. Each man or woman had his or her own genius, who acted as a protector throughout life, influencing the one protected towards good. Evil deeds were later said to be caused by the influence of an evil genius. Localities, cities, families, etc., also had their tutelary genius, the *genius loci* of the Romans.

From this it came to mean a person's inborn faculties. Still later, it was used for faculties or abilities of an exceptional kind, and so to day a genius is a person endowed with unusual talent of a certain kind, e.g., a musical or literary genius.

Genoa City and seaport of Italy. The capital of a province of the same name, it stands on the Gulf of Genoa an opening of the Ligurian Sea, 74 m from Turin. It is well served by railways, and is the country's chief commercial seaport, and also a naval station. It consists of an old city, with narrow streets, and a modern part. Suburbs extend up the hills that overlook the sea. The little River Bisagno flows through the city.

BUILDINGS AND INSTITUTIONS—The 10th century cathedral is small and has been much altered, but is full of interest. Among the churches mention may be made of S Maria di Castello, S Maria di Carignano, with its wonderful dome, S Siro, originally a cathedral, S Matteo, the church of the great Doria family, and S Donato.

The palaces include the municipal palace, the palace of the doges, the Doria palace, the Palazzo Rosso and the Palazzo Bianco, the red and the white palaces. The Palazzo di S Giorgio is used by the harbour authorities. The city is still surrounded by walls, these being 12 m in circumference and having eight gates.

Genoa has a university founded in 1243 and many colleges and schools, technical and otherwise. The cemetery or Campo Santo is a feature of the city. The central square is the Piazza di Ferrari but there are many others, as well as parks and public gardens. The Corso d'Italia, a promenade along the sea front, is of recent date. A war memorial in the form of an arch was unveiled in 1931. The theatre Carlo Felice is noteworthy, as is the Verdi Institute of music. There is an excellent service of electric tramways and circular railways go up the hills at the back of the city. There are many memorials of Columbus, Genoa's greatest son.

Shipping is Genoa's chief industry and for this there are large harbours and docks equipped on the most modern lines. A vast trade passes through the port, and to deal with it the harbour accommodation was extended

after the Great War. The manufactures include steel, motor cars and hats, the ship-building yards are important. There is a naval harbour, and Genoa is also an air port and a broadcasting station (312.8 M 10kW).

HISTORY—About the year 1000 Genoa became a flourishing seaport and grew rapidly in wealth. It was practically a little republic, ruling over a considerable area around the city, but its chief fame arose from the fact that, with Venice, it almost monopolised the sea trade between Asia and Europe. In 1339 the first doge was elected. In 1380 the Venetians defeated the Genoese in a sea fight, and until 1528 the city was under French protection. It then became again independent and so remained until the French Revolution when it was the capital of the short-lived Ligurian Republic. In 1815 it was given to Sardinia and thus became part of Italy. Pop. 624,600.

In 1922, a European conference was held here, at which for the first time Soviet Russia was represented.

Genserik King of the Vandals. Some times called Gaiseric, he became king in A.D. 428. He conquered parts of Africa where he set up a Vandal Kingdom with Carthage as its capital. He then took Sicily, Sardinia and Corsica, and ravaged the coasts of the Mediterranean. In 456 he led his men to Rome, which he took and sacked. He died Jan. 25, 477. In religion Genserik was an Arian Christian.

Gentian Genus of annual or perennial herbs (*gentiana*). The funnel-shaped corollas, usually blue, are adapted for various kinds of insect visitors, the small vernal gentian for butterflies, the marsh gentian for humble bees, etc. The yellow *G. lutea* contains a bitter principle, utilised medicinally for promoting digestion. Native of temperate and alpine regions of the 300 species, only five are British: several yield ornamental garden varieties, notably *G. asclepiadea*, the stemless gentianella and a white-throated form.

Gentiles In the English Bible term usually denoting persons not of Jewish race. In the Old Testament, gentile, the Hebrew word for nation, was sometimes used generally, but in other instances implied their inferiority as heathens. In the New Testament the word was used for Greeks and other non-Jewish nations. S. Paul was the apostle of the Gentiles (Ro. xi).

Genus Grouping of a number of species of plants or animals having certain constant characters in common. Thus among plants the raspberry and blackberry form distinct species but yet having certain common characteristics, together form the genus *rubus*. In their nomenclature the generic name precedes the specific one, thus the blackberry is *rubus fruticosus*.

Geodesy Science dealing with the measurement of the earth's surface on a large scale. Surviving for this purpose consists of triangulation, in which an area is divided into a series of triangles whose sides and angles are measured. A suitable base line of known length is taken and from it by angular measurement other distant points are measured. In geodetic surveying special types of theodolites, levels and other instruments are used.

Geography Science dealing with the surface configuration of

the earth in relation to man. Geography is indebted to other branches of knowledge for facts which explain or help to elucidate the problems of the physical conditions of a country and its inhabitants. For example, the study of existing land forms is aided by geological evidence of former land masses, and meteorology helps in studying the effects of climatic conditions on a country. Commercial geography deals with economic products of the earth, their discovery, production and effects upon mankind. Oceanography, the study of the sea, has advanced greatly during recent years and gives us knowledge of currents, etc., which have their effect upon transport and commerce. Historical geography is concerned with the changes in the delimitation of countries at different times in history.

The Royal Geographical Society is devoted to the study of the science and, in addition to a valuable library and map room, issues a monthly *Journal*. It has fine premises at Lowther Lodge, Kensington Gore, London, S.W. There is a Royal Scottish Geographical Society in Edinburgh, which also publishes a *Journal*, and the United States has influential and rich societies of the same kind. *The National Geographic Magazine* is one of the most valuable of American publications.

Geology Science dealing with the constitution and history of the earth's crust. Having so wide a range of investigation, geology has many subdivisions, and of necessity is linked to the other natural sciences. Mineralogy, the study of the mineral constituents, and petrology, the study of rock structure, form important sections of the science. The study of the relations of rock masses and strata constitutes tectonic or structural geology, while dynamic or physical geology is concerned with the effects of volcanic action and the forces of denudation. Stratigraphical geology deals with the historical sequence of the rocks and strata, and palaeontology with the fossil contents of the beds. In the study of the nature of minerals and rocks, geology is linked on to chemistry and physics, while in palaeontology a knowledge of both zoology and botany is necessary. The microscope has become an important aid in interpreting the minute structure of rocks and minerals. The foundation of modern geology dates from the publication of James Hutton's *Theory of the Earth* in 1788, supplemented by the work in Britain in later years of William Smith, Sedgwick, Murchison, Geikie, Lyell and others.

Geology has its economic aspect in relation to various engineering operations, the study of building stones and the search for ores. To foster the interests of this science there is the Geological Society at Burlington House, London. There is also a Geological Survey, a public department, which exists to map out the strata in Great Britain. Connected with it is the Museum of Practical Geology in Jermyn Street, London, W. For India there is a Geological Survey with similar duties.

Geometry Science dealing with measurement and the properties of space. Plane or two-dimensional geometry is concerned with the properties of plane figures, while solid geometry deals with solid figures of three dimensions. Some knowledge of the science was known in ancient times but it was on Greek soil and especially at Alexandria that geometry flourished.

Thales, "the father of geometry" was followed by Pythagoras, Hippocrates and later Euclid as early exponents of the science.

George Name of three lakes. One in Uganda is connected by a narrow channel with Lake Edward and has an area of about 160 sq. m. It was formerly called Albert Edward Nyanza. Another Lake George is a salt lake in New South Wales. This is 55 m. long and is often dry.

A third lake of this name is in New York State, in the Adirondack Mts., and is 33 m. long. In it are many islands, and on its shores are several pleasure resorts. It is connected with Lake Champlain, and is sometimes called Horicon.

George Patron saint of England and Portugal. Little is known of him. He was probably a soldier in Cappadocia, who, as a Christian, was put to death at Nicomedia on April 23, 303, which is kept as his day. The popular legend about him is that he killed a dragon and then became a preacher of Christianity. In the Middle Ages he became associated with England and since the 13th century, or earlier, his festival has been kept. In 1349 he was recognised as the country's patron saint and the badge of the order of the garter, as it bore his figure, is called the George. Later his feat of killing the dragon was pictured on coins and medals. He is commemorated by St. George's chapel at Windsor and the order of St. Michael and St. George.

George Town of the Cape Province, S. Africa. It is 32 m. from Messel Bay, the seat of an Anglican bishop and an important educational centre. Pop. (1931) 4,249.

George I. King of Great Britain and Ireland. Born in Hanover, March 28, 1660, he succeeded his father, Ernest Augustus, as elector of Hanover, 1698. His mother, Sophia, daughter of the elector palatine and granddaughter of James I., was made heir to the throne of Great Britain in 1701. She died, however, before Queen Anne, so when, in 1714, that sovereign's life ended, George became king. He took little part in the affairs of Britain, and in this way contributed much to the development of the modern idea of government by ministers with the king as figure head. He died at Osnabrück, June 11, 1727. George married a cousin, Sophia Dorothea, but in 1694 he divorced her and kept her in prison.

George II. King of Great Britain and Ireland. Born in Hanover, Nov. 10, 1683, and only son of the electoral Prince of Hanover who in 1714 became George I. of Great Britain. He spent most of his early life in Hanover. In 1706 he was made Earl of Cambridge, and in 1714 he settled in England, being created Prince of Wales. He was on bad terms with his father, who refused to have him at court, so he set up a court of his own, and those who disliked George I. and his ministers, gathered round the prince and his wife, Caroline, a princess of Brunswick, whom he had married in 1705.

In June, 1727, George became king, and he ruled for nearly 33 years. He did not interfere much with politics, especially when he had Sir Robert Walpole as prime minister, although he was by no means a cipher and from time to time exerted himself effectively. In 1743 he led an army in the field against the French at Dettingen. His reign was notable for the Jacobite rising in 1745 and for war with

France, and it ended in a blaze of glory, with victories (1759) in three continents. George died, Oct. 25, 1760. His family consisted of two sons, Frederick, Prince of Wales, and the Duke of Gloucester and five daughters. Frederick died before his father, who was therefore succeeded by his grandson, George III.

George III King of Great Britain and Ireland. Born June 4, 1738, he was the son of Frederick Prince of Wales, and his wife, Augusta, a Princess of Saxe-Coburg. His father died in 1751, and he was educated under the care of his mother and the Earl of Bute.

In Oct. 1760, George succeeded his grandfather, George II. In 1762 he made Bute prime minister, but in 1763 the earl resigned an office which he had made thoroughly unpopular. After this failure George found it difficult to secure a prime minister who was sufficiently docile, but he persevered, and in 1770, having formed in Parliament a party known as the king's friends, he was able to put Lord North at the head of affairs. For twelve years George and North were responsible for the government a period marked by the loss of the American colonies. In 1788, the king's mind gave way and his son George was appointed regent. He soon recovered, but after several further attacks he became permanently insane in 1811, and for the rest of the reign his place was taken by his son as regent. He died Jan. 29, 1820.

George married, in 1761 Charlotte, princess of Mecklenburg-Strelitz, and had 15 children. Seven of the nine sons grew up to manhood. They were George IV, William IV, and the Dukes of York, Kent, Cumberland, Sussex and Cambridge.

George IV. King of Great Britain and Ireland. Born in London Aug. 12, 1762, he was the eldest son of George III, his full name being George Augustus Frederick. He was made Prince of Wales in the same year. In 1795 he married Caroline of Brunswick, and they had one child, Charlotte, who died in 1817. The prince soon quarrelled with his wife and for some years the relations between them were the subject of general discussion, whilst there was fresh trouble when George became king.

As Prince of Wales, George was notorious for his extravagance and his love of questionable pleasures generally. He was not on good terms with his father and became the central figure of the Whig opposition to the government, Fox and Sheridan being among his friends. He acted as regent during his father's insanity in 1788. In 1811 he was again regent, and this time he retained the office until he became king in Jan. 1820. He reigned for ten years but exercised no great influence on public affairs. He died at Windsor June 20, 1830. George created the popularity of Brighton, where he built the royal pavilion as a residence. Mrs. Fitzherbert was hismorganatic wife from 1785 until her death in 1813.

George V King of Great Britain, Ireland and the British Dominions beyond the Seas, and Emperor of India. Born in London, June 3, 1865, he was the second son of Edward VII, then Prince of Wales, and his wife Alexandra and was baptised as George Frederick Ernest Albert. In 1877 he entered the navy and there he served until 1892 when the death of his elder brother, the Duke of Clarence, made him heir

to the throne. He was created Duke of York, and in 1893 married Mary, the only daughter of the Duke of Teck. He was Duke of Cornwall when his father succeeded to the throne in 1901, and at the end of that year was made Prince of Wales. In the meantime he went to Australia to open the first parliament of the new Commonwealth. He had previously travelled a good deal and between 1901 and 1910 he made other journeys through the Empire, notably to India and Canada.

On May 6, 1910, George became king, and on June 22, 1911, he was crowned in Westminster Abbey. In 1911 he was hailed as Emperor at the Durbar at Delhi. On his return he took up the heavy duties of his position, which for 26 years he discharged with remarkable skill and success not the least of his services being those rendered during the Great War. A serious illness befell him in 1928-29. In May, 1935, the Silver Jubilee of his reign was marked by much rejoicing throughout Britain and the Empire. He died after a short illness on 20th Jan., 1936.

The King and Queen had six children of whom five survive. Four are sons, viz., the King Edward VIII, Albert, Duke of York, Henry, Duke of Gloucester, and George, Duke of Kent. The only daughter is Mary, Countess of Harewood, who in 1932 became Princess Royal.

George V. King of Hanover. Born in Berlin, May 27, 1819, he was the son of Ernest Augustus, Duke of Cumberland, fifth son of George III. In 1851 George succeeded his father as King of Hanover, and he reigned until 1866 when, having sided with Austria against Prussia, he was expelled from his country. He made his home in Austria, where he mainly lived until his death, June 12, 1878.

George Name of two kings of the Hellenes. George I was born at Copenhagen, Dec. 24, 1845, being a son of King Christian IX, and a brother of Queen Alexandra. He was chosen King of Greece in 1892, and reigned over that country for 60 years. On March 18, 1913, he was murdered at Salonika.

George II was a grandson of George I. He became king in Jan. 1922 on the death of his father Constantine but abdicated in 1923. In 1935 he was recalled by his people and the monarchy restored.

George British prince. The fourth and youngest son of King George V, he was born at Sandringham, Dec. 20, 1902, his full name being George Edward Alexander Edmund. Having passed through Osborne and Dartmouth, he entered the navy and served with it for some years. This was followed by a spell in the Foreign Office but much of his time has been taken up with public functions. In 1931 he went with the Prince of Wales to South America. In 1934 he married Princess Marina, daughter of Prince Nicolas of Greece and was made Duke of Kent. A son was born in 1935.

George David Lloyd. British statesman. Born at Charlton on Medlock, Manchester, Jan. 17, 1863, he was the son of William George, a schoolmaster. Owing to his father's early death he was brought up by his uncle Richard Lloyd at Llanystumdwy, N. Wales. He was articled to a solicitor at Portmadoc and in 1884 began to practise on his own account at Caernarvon. In 1890, having taken a leading part in local politics, he was elected MP for the Caernarvon Boroughs and in the House of Commons soon showed himself a clever debater. His opposi-

tion to Joseph Chamberlain and the Boer War made him a national figure

In 1905 Lloyd George entered the Liberal Cabinet as president of the board of trade. In 1908 he succeeded Asquith as chancellor of the exchequer. In 1909 he introduced a budget that aroused bitter controversy, especially by its proposals for taxing land, which provoked a quarrel with the House of Lords by whom the budget was rejected. The upshot was two general elections in one year (1910) and the passing of the Parliament Act. The chancellor was then responsible for a great scheme of national insurance.

THE WAR YEARS In August, 1914, Lloyd George supported the policy of declaring war. Early in 1915 he left the exchequer to become minister of munitions and soon afterwards helped to form the first coalition ministry. In July, 1916, he became secretary for war, and in December, dissatisfied with the way the struggle was conducted, he resigned and so brought the coalition ministry to an end. After negotiations, he himself became prime minister, with the Unionists under Mr Bonar Law as his chief colleagues. As premier Lloyd George introduced certain innovations into the government. He handed over the leadership of the House of Commons to a deputy, filled some of the chief offices of state with business men and formed a small cabinet, inside the larger one, to conduct the war. In 1919 he was Britain's chief representative at the peace conference at Versailles. He was supported by the verdict of the country given at an election in which women voted for the first time, a policy for which he was responsible.

POST-WAR His premiership ended in Oct., 1922, when the Unionists withdrew from the coalition. Now estranged from the main body of the Liberals, but possessing party funds of considerable size, Lloyd George with a few followers occupied a detached position until a reunion with the other Liberals was effected in 1923. In 1926 he was chosen as the party leader, but there were Liberals, both inside and outside parliament, who refused to accept him. The election of 1929 placed the balance of power in the hands of the Liberals, but it was found impossible to secure complete unity among them. He published his *War Memoirs* in 1933-35. Early in 1935 he launched his "New Deal" proposals, an extensive scheme for national reconstruction, and in July inaugurated a "National Council of Peace and Reconstruction."

In 1888 Lloyd George married Margaret Owen. A son, Gwilym, and a daughter, Megan, were elected to Parliament in 1929 and again in 1931 and 1935.

George Henry, American economist. Born at Philadelphia, Sept. 2, 1830, he started his career as a printer, but later took to journalism. He made a study of economical questions, and in 1871 published *Our Land Policy*. It was amplified in *Progress and Poverty*, 1879, in which he advocates land nationalisation to be effected by means of a single tax. He died Oct. 29, 1897.

Georgetown Seaport and capital of British Guiana. It is near the mouth of the Demerara River. There is a railway for some 78 miles along the coast. There is a good harbour and shipping is the main industry. Georgetown is sometimes called Demerara. Its old name is Stabroek. Pop. (1931) 62,690.

George Town Capital and seaport of Penang, Straits Settlements. It stands on the Island of Penang, a British possession, and has an excellent harbour. Shipping forms the chief industry. Pop. 101,000.

Georgia Soviet republic, linked with the Soviet Union at Moscow. In the Caucasus area, it lies between the Black Sea, the Caucasus Mts and Armenia, and covers 26,386 sq m. Tiflis is the capital, other places are Batumi and Poti. Agriculture is the chief industry, but the production of manganese and other minerals is important. Much land is covered with forests. There is a railway system of about 600 m owned by the state.

In early days Georgia was conquered by Alexander the Great, but in 302 it became an independent country and a little later adopted Christianity. In spite of invasions, its people retained their independence until, in 1801, to save themselves from the Turks, they placed themselves under the protection of Russia. Their last king soon disappeared, and the country became a part of Russia.

In 1918 a republic was set up in Georgia, and in 1921 the Soviet form of government was adopted. In 1922 it united with Azerbaijan and Armenia to form the Transcaucasian Federation of Socialist Soviet Republics. It includes the little Soviet republics of Abkhazia and Adjara. Pop. (1931) 2,883,200.

Georgia Southern state of the United States, one of the 13 original members of the union. It has a coastline on the Atlantic Ocean, fringed by a number of islands. It covers 59,265 sq m. Atlanta is the capital, other places are Savannah, the chief seaport, Augusta, Macon and Columbus. The state produces cotton and maize, tobacco and fruit. Much of the land is covered with forests, and there are important fisheries and mines. The chief rivers are the Savannah, Altamaha and Ogeechee.

Georgia was settled by George Oglethorpe who made it a home for debtors, the first band arriving in 1733. He named it after George II. It entered the union in 1788. In 1861 the state seceded, but it was admitted again in 1870. It is governed by a legislature of two houses, and sends two members to the Senate and 10 to the House of Representatives at Washington. Pop. (1930) 2,908,506.

Georgian Architectural style adopted in Great Britain during the Georgian period, 1714-1820. It was due largely to the influence of Sir Christopher Wren. While following the classical tradition as transmitted through the Renaissance, Georgian architecture developed its own special treatment seen in its simplicity of plan and elevation, and among other things the usual addition of a Greek portico to a building.

Georgian Bay North-eastern area of Lake Huron. Its waters are entirely Canadian and parts of the province of Ontario cut it off almost wholly from the main part of the lake. It is 120 m long and 50 m across and some of the rivers of Ontario flow into it. The Trent Valley canal connects it with Lake Ontario.

The Georgian Bay Canal, as yet incomplete, is intended to unite Georgian Bay with the St. Lawrence at Montreal, thus bringing the Great Lakes 800 m nearer to that city and to Europe.

Georgics Poem by Virgil. In Greek the word means husbandry, and the poem deals with pastoral life. It was written about 40 B.C., and is in four books.

Scholars regard it as a perfect example of style and thought.

Geranium Genus of herbs native to temperate regions. They have regular flowers generally rosy, purplish red or blue in colour, and divided leaves, eleven native British species are popularly called crane's bill. Many exotic forms are favourite garden varieties. Allied herbs, with irregular flowers, varying in colour from scarlet to white, form the distinct genus *pelargonium*. In popular and nurserymen's usage such discarded names as scarlet and ivy-leaved geranium are used for cultivated varieties of *pelargoniums* brought from S Africa. See CRANE'S BILL, PELARGONIUM

Germ Rudimentary form of a living thing, whether plant or animal, the vital particle from which an organism may develop. It is also used for the origin or first principle of anything. Some germs, those from decaying matter, for instance, are injurious to health and preparations used to destroy these are called germicides.

German Catholics Religious community separated from the Roman Catholic Church in 1844. Led by two ex-priests, Johann Ronge and Johann Czorak, it repudiated clerical celibacy and aimed at breaking the papal power in Germany. Restrictions were placed upon the dissidents, internal dissensions arose, and a dwindling remnant joined the rationalistic body of Free Congregations in 1859.

Germanicus Caesar Roman soldier. Born in 15 B.C., he was nephew of the Emperor Tiberius and was early put in command of an army. He fought against the Gaulish and Germanic tribes, winning a great victory over Arminius in A.D. 16. Afterwards he was sent to Asia and he was at Antioch when he died in A.D. 19, perhaps by poison. Germanicus was the father of Caligula and the grandfather of Nero.

German Measles Contagious disorder occurring mostly in children. Also called rubella, it is usually mild and is characterised by a pink eruption. Although somewhat resembling both measles and scarlet fever, it bears no organic relation to them. Its cause, bacterial or otherwise is undiscovered. There may be headache, shivering, a little catarrh and rise of temperature, not above 100°F, followed by a slight rash which disappears within a week, during which confinement to bed and thorough isolation are necessary.

German Silver Silver white alloy. Also known as nickel silver, it is composed of varying proportions of copper, nickel and zinc. When first prepared it has a crystalline structure but after careful annealing it becomes malleable and can be worked like brass. It is harder than silver and takes a high polish, but acquires a yellow tarnish after exposure to air. German silver is used largely as a basis for electroplated goods such as spoons, forks, etc.

German Volga Republic

Soviet Republic. One of eleven autonomous republics in the Russian Socialist Federal Soviet Republics. It was created in 1924. It is enclosed by the Lower Volga Area except in the south-east. The government is by Central Executive Committee and Council of Peoples'

Commissaries, the capital being Pokrovsk on the Volga, with a population of 34,352. There are railways running from Moscow to Astrakhan and Ural'sk, with a junction at Urbakh. The chief crops are wheat, barley and rye, and there are agricultural and peasant industries.

Germany Federal republic of Europe. It occupies an area of 181,699 sq. m. in the central part of the continent, its boundaries being settled by the treaty of Versailles. Its coastline on the Baltic Sea and a shorter one on the North Sea, together amount to some 1200 m. Its land frontiers touch France, Belgium, the Netherlands, Denmark, Poland, Czechoslovakia, Austria and Switzerland. Much of the country is a great plain, but in the centre, south-east and west are ranges of mountains, the Harz, the Black Forest, the Erzgebirge and the Taunus. The highest peaks are in the south-west, where are some Alpine ranges. There a few exceed 9000 ft. in height. The chief rivers are the Rhine, Elbe, Weser, Oder and Main, but there are many others, for the land is well watered. There are lakes the largest being Bodensee. The land includes Rügen and other islands in the Baltic, and the Frisian Islands in the North Sea.

TERRITORIAL DIVISIONS The German federation consists of 17 states. Much the largest is Prussia, which occupies more than half the total area. Next in order of size are Bavaria, Württemberg, Baden, Saxony, Mecklenburg, Thuringia, Hesse, Oldenburg and Brunswick. The others, which include three free cities, Hamburg, Lübeck and Bremen, are all less than 1000 sq. m. in extent. Berlin is the federal capital but the supreme court sits at Leipzig.

The area includes the Saar district, which in 1935 by a plebiscite vote returned to Germany. Berlin is the most populous city and Hamburg the greatest seaport. There are no fewer than 51 other cities with over 100,000 inhabitants, and eight of these, Cologne, Munich, Leipzig, Essen, Dresden, Breslau, Frankfurt on Main and Dortmund, have each over 500,000. The total population is 60,044,161 or 363 to the square mile. Of these 40,000,000 are Protestants, mainly Lutherans, and 20,000,000 Roman Catholics. Since 1918 there has been no state church. The education is of a high standard. There are 23 universities and many technical and other colleges.

CONSTITUTION The constitution provides for a president and two houses of parliament, the Bundesrat and the Reichstag. The former consists of 66 members representing the states, Prussia electing 26. The latter consists of a varying number of members elected by all adult males and females. A cabinet that carries on the work of government is responsible to the legislature. The president is elected by all voters and holds office for seven years. The republican flag is black, white and red.

ECONOMICS Germany is an agricultural country and a large part of it is well farmed. Rye, oats, wheat, barley and potatoes are produced on a large scale and great numbers of cattle are kept. Pigs are reared but sheep are less plentiful. The vine is grown in the warmer districts as is tobacco. Large areas are left to forests, and forestry is conducted on scientific lines. The fisheries, especially in the North Sea, are important.

Certain parts of Germany are rich in coal and other minerals and there the great manufacturing centres have sprung up. Westphalia

and Silesia contain the coal mines. Iron ore is produced in Silesia and in the Harz, where silver is also mined. Iron and steel are manufactured in the great towns of Westphalia and the lower Rhineland, part of Prussia and to a lesser extent, in Thuringia. Saxony is the chief centre for the production of cotton, woollen and other textiles. Berlin is famous for its production of electric appliances. The chemical industry is flourishing and the production of clothing and foodstuffs employs a large number of people.

Germany has an extensive and unified railway system, owned by the state but managed by a private company. Its canals have a length of 4,684 m (1933). Shipping is another great industry. Hamburg is the largest port with Bremen, Stettin and Emden next in importance. Owing to the size of the rivers there are many flourishing river ports. Germany has a central bank, the Reichsbank, and four other banks have the right to issue notes. Since 1924 the currency has been on a gold basis, with the reichsmark as the unit. The metric system of weights and measures is used.

HISTORY For centuries Germany was little more than a geographical expression. It was divided into some hundreds of states, each with its own ruler. They owed allegiance to the head of the Holy Roman Empire, who was also German king, but as the years went on he became less and less concerned with Germany. In the 17th century this area of Europe was ravaged by the Thirty Years' War. In 1815 a federation of the German states was established but this only lasted until 1866. Its place was then taken by the North German Confederation, in which Bavaria and the states of the south had no part.

In 1871 the German Empire was founded, the king of Prussia becoming emperor. This included all the German states except Austria. After a flourishing career, it fell to pieces as a result of the Great War, when Germany, by the Treaty of Versailles, surrendered Alsace-Lorraine to France, parts of Silesia, Prussia and Posen to Poland and Czechoslovakia, and small areas to Denmark and Belgium. Danzig was formed into a free state. Altogether Germany ceded 27,252 sq m and 6,500,000 people. She also surrendered her colonies in Africa and the South Seas.

The first president of the republic was Friedrich Ebert, under whom the country was in a deplorable condition, both politically and financially. The mark fell to nothing and the failure to pay reparations led to the occupation of the Ruhr district by the French.

An improvement began in 1923 when Gustav Stresemann became chancellor. Reform of the currency was followed by the signing of the Pact of Locarno and the entry of Germany into the League of Nations. In 1925 Hindenburg was elected president and the Dawes plan for the payment of reparations worked for a time. The death of Stresemann in Oct., 1929, marked the beginning of a change for the worse. Like other countries Germany was badly hit by the economic depression. She declared herself quite unable to make reparation payments and there was a good deal of political unrest. Under Adolf Hitler a party called the Nazis became very strong and there was talk of a restoration of the monarchy. The Nazis came into conflict with the authorities about the wearing of their uniform, etc., and Bavaria threatened to leave the federation. In 1932 Hindenburg was re-elected president but Brüning, who had proved a capable chancellor, was forced to resign. His

successor, von Papen, represented the country at Lansanne in July, 1932, when the question of reparations was settled. Germany undertaking in return for their abandonment to make a payment of £150,000,000 to a fund for European reconstruction. In the presidential election of 1932 Hitler and his party won great successes at the elections in Bavaria and other parts of Germany. From that time the Nazis gradually gained ascendancy until March, 1933, when Hitler (qv) became dictator. Germany resigned from the League of Nations and from the Disarmament Conference in 1933 owing to the refusal on the part of the other Powers to grant equality of status in armaments. In Feb., 1934, Germany was completely unified by a law remodelling the constitution, and vesting in the Reich the sovereign rights hitherto belonging to the Federal states. In Aug. of the same year Hindenburg died, and Hitler became President as well as Chancellor. In 1935 Germany's policy was censured by the League of Nations.

Germiston Town of the Transvaal, S Africa. It is 36 m from Pretoria and 9 from Johannesburg. On the Rand, it is an important mining centre, with gold refineries and manufactures of chemicals, cereal products, etc. Here is the station which supplies electric power to the mines. Pop (1931) 23,953 whites.

Gerrard's Cross Village of Buckinghamshire. It is 11 m from Beaconsfield and 18 from London. There is a fine common. Pop 2200.

Gerrymander American expression, which has been adopted into the English language, and denotes the arrangement of election districts in such a way that an unfair advantage is given to the party in power. The word is derived from Elbridge Gerry, an American politician, and "mander" in "salamander," one of the districts in Massachusetts formed when Gerry was governor, having an alleged resemblance to a salamander.

Gesso Form of applied decoration. It is used to ornament small boxes, bowls and other household articles, but can also be used, as it was in the Queen Anne period, for mirrors and chairs. Gesso powder is a paste composed of plaster of Paris and glue.

Gethsemane Plantation at the foot of the Mount of Olives. Thither our Lord retired across the Kidron after the Last Supper with His disciples, it witnessed the agony and the betrayal. The traditional site is now in Franciscan hands, an ancient cave adjoining being the reputed Grotto of the Agony.

Gettysburg Town of Pennsylvania, USA. It is on the railway 70 m from Washington and was named after James Gettys, a general in the War of Independence. Near here, on July 1-3, 1863, one of the decisive battles of the American Civil War was fought, when the Southern general, Robert E. Lee, was defeated by the Northerners under Meade. The battle was fiercely contested for three days, and in the end Lee was forced to retreat, but his genius enabled him to get his army across the Potomac. In Nov., 1863, part of the battlefield was dedicated as a national cemetery, and in this are several memorials. On this occasion Lincoln made the speech, which, although short, is one of the jewels of English prose.

GEUM

Genus of hardy rosaceous perennials. It is of dwarf growth, and contains many species. The variety *G. avens*, largely grown in gardens, has handsome showy flowers, Mrs. Bradshaw (scarlet) and Lady Stratheden (yellow), being popular varieties. Several species including *G. reptans* and *G. montanum* are useful in the rock garden. The wild herb bennet, or wood avens, *G. urbanum*, has small yellow flowers and its aromatic root possesses medicinal qualities.

Geyser

Type of siliceous hot spring and explosive eruptions of steam and holling water alternating with quiet periods. Geysers occur in volcanic areas in New Zealand, in the Yellowstone Park, Wyoming, U.S.A. and in Iceland. They are due to the gradual heating of water in cavities and fissures in the rock, the hot water under high pressure dissolving out large quantities of silica. When a sufficiently high temperature is reached, a violent ebullition of steam is produced.

Also a domestic apparatus for obtaining a quick supply of hot water. It consists of a cylinder containing a coil of copper or brass tubing connected with the water supply, and beneath the container is an arrangement of atmospheric gas jets by which the water stream through the coil is heated rapidly.

Ghats

Mountain ranges of India, enclosing the Deccan tableland. The East Ghats average 1500 ft in height and comprise granite and gneiss spurs and range along the Madras coast from Orissa to the Nilgiri hills. The West Ghats, averaging 3000 ft in height, comprise the more precipitous Sahyadri range of trap rocks, and stretch from the Tapi valley south for 800 m to the Palghat gap.

A Hindu word meaning landing, stairs or passes, the term ghat is also applied in India to flights of steps along a river's bank. Such are frequently seen along the Ganges notably at Benares, where are the burning ghats, the Hindu cremation ground.

Ghazi

Turkish title of honour. Derived from an Arabic word meaning "warrior," a ghazi is a Mohammedan who has vowed to exterminate unbelievers by the sword. The Turks use it, meaning "The Victorious," as a title of honour for military officers who have distinguished themselves against non Mohammedan foes. It is especially applied to Mustapha Kemal (q.v.).

Ghazni

City of Afghanistan. It stands in the mountains, about 80 m from Kabul, and is on the caravan route between Persia and India through the Gomal Pass. The old city, which is now in ruins, was once the capital of a great empire. It was destroyed about 1220 by the Mongols and near it the new city, was built. It has many shrines visited by pilgrims, two towers and other features of interest. During the Afghan Wars Ghazni was taken by the British in 1839 and in 1842.

The dynasty of the Ghaznevids was founded in 902 and ruled at Ghazni until 1184 when the Ghor dynasty took its place. The Ghaznevid Empire covered a great part of Asia, its most famous member was Mahmud, whose court was renowned for its culture and magnificence.

Gheel

Town of Belgium 28 m from Antwerp. It is a centre to which insane persons have been sent since the 13th century. The mentally afflicted are quartered on the inhabitants, who make a living by

548

caring for them. The whole business is under official direction, with medical men and other inspectors in attendance. Pop (1932) 18,545.

Gheluvelt

Village of Flanders, 4 m from Ypres, on the road to Menin. Being in the Ypres salient there was almost constant fighting here from 1914 to 1918. This was especially desperate during the first battle of Ypres, towards the end of 1914, and in the spring of 1915. The village was taken and retaken also in 1917 and 1918. Here on Oct. 31, 1914, the 2nd battalion of Worcestershire Regiment made its famous stand.

Ghent

City and river port of Belgium 32 m from Brussels, at the junction of the Rivers Lys and Schelde. It is also a railway junction, and a ship canal connects it with the sea. Branches of the rivers and canals flow through the city, adding much to its picturesque appearance, and over these there are more than 200 bridges. The chief buildings are the cathedral, with its altar piece, the law by the Van Eycks, the hotel de ville, the courts, a modern building and the belfry, an old one. There are several museums. Other historic buildings are the Chateau du Diable, a 13th century building, the Great Beguinage, and the Little Beguinage. There is a castle, once the residence of the Counts of Flanders. The university, founded in 1316, is a centre of Flemish culture. The French call the city Gand.

Ghent has cotton, linen and other manufactures, and its industries include also engineering works and sugar refining. The market is famous and there is a large transit trade in the neighbourhood many flowers are grown for export.

In the 13th century Ghent became a flourishing trading centre, and, for the next 300 years, was one of the richest in Europe. Its citizenry being among the most independent. Here the Emperor Charles V was born. In the 16th century its prosperity was destroyed by the Spaniards, who entered it as conquerors in 1584, but it recovered in the 19th. In 1814 a treaty was signed here between Great Britain and the United States. The city was in the possession of the Germans from Oct. 1914, to Oct. 1918. Pop (1931) 170,576.

Ghetto

Part of a city or town inhabited by Jews. The English equivalent is Jewry.

Ghibelline

Political party, that flourished in Germany and Italy in the Middle Ages. It is a corruption of Walbelling, the name of a castle owned by Conrad III, the German king and a member of the Hohenstaufen family. Conrad's followers, in a fight against Welf of Bavaria, used Walbelling as a battle cry. In opposition to the enemy's cry of Welf. These names became corrupted by the Italians to Ghibelline and Gueiph. The Ghibellines became the name of the party opposed to the Guelfs, on whose side the Pope was usually found. The feuds between the Guelfs and the Ghibellines lasted for over 200 years.

Ghiberti

Lorenzo Italian sculptor. Born at Florence in 1378, he became a goldsmith. He is famous, however, for the bronze gates, the finest of their kind in the world, which he designed for the baptistery at Florence. On these he worked for over 40 years. He died in 1455.

Ghirlandajo

Domenico Italian painter. Born at Florence.

in 1449, Ghirlandajo, whose full name was Domenico Tommaso Corrado Bigordi, was apprenticed to a goldsmith and studied painting under Baldovinetti. He was for a time the master of Michelangelo. He painted many excellent frescoes and also works in mosaic. He died Jan 11, 1494.

His best frescoes are in the Sassetti Chapel in S. Trinità and the choir of Sta. Maria Novella, Florence. Other works of his are in Rome and the Louvre, Paris.

Ghost Disembodied spirit said to appear to the living. The belief in ghosts is widespread and is found in all ages and amongst almost all peoples. Some are attached to a particular house, perhaps associated with a particular crime and appear at a particular hour. Certain families have their ghosts. Some of these appearances are apparently well authenticated, but the explanation must be sought in the mental condition of the person visited by the ghost.

Ghoul Malignant Oriental spirit supposed to frequent burial grounds for the purpose of feeding on corpses. The word, derived from the Arabic *ghul*, is used also to describe one who delights unnaturally in horrors.

Giant Human being of abnormally great stature. Greek mythology describes beings of monstrous size and strength, e.g., Briareus and Polyphemus. Giants appear in the Old Testament, notable ones being Og and Goliath, and their exploits are a favourite subject in the folklore of most European countries, where giants are usually wicked and come to an ignoble end. Bunyan introduces giants into his immortal allegory.

Charles Byrne, an Irishman, who lived in the 18th century, was 7 ft 9 in in height. In 1905 a Russian named Maehnov, was exhibited in London, he measured 9 ft 3 in.

Giant's Causeway Columnar basalt formation on the north coast of Co. Antrim, Ireland. Situated 2½ m. N.E. of Bushmills, it is divided by whin dykes into the Little, Middle and Grand Causeway, and simulates a pier 700 ft long, 350 ft. broad, and 30 ft. high, and composed of 40,000 perfectly-fitting, accurately-jointed polygonal pillars from 15 to 20 in across. The so-called Giant's Organ adjoins. It is said to have been caused by cooling and cracking lava.

Giant's Kettle, or giant's cauldron, is the popular name for a glacial pot-hole. These cylindrical holes were caused in rocks by sub-glacial streams, laden with gravel, etc. There are examples in the Alps and Germany.

Gibbet Wooden upright with projecting beam for hanging malefactors in chains or irons after execution. Recognised by law in 1752, the practice ceased in 1834. Gibbet law entitled Halifax, in Yorkshire, to execute thieves on a primitive gullotine called the Halifax gibbet, this operated between 1541 and 1650. See GALLOWES.

Gibbon Genus of manlike or anthropoid apes (*hylobates*). Native to the Indo-Malay region and normally about 3 ft. high, they are slenderly built and tailless, with naked callosities on the buttocks, and arms reaching to the ankles. Though frequently walking upright on the ground, they are tree dwellers and are gregarious, noisy and extraordinarily agile. The largest is the Sumatran siamang, others are the Burmese white-handed gibbon, the Assamese hoolock, the

Siamese crowned or tufted gibbon, and the Javanese silver won-won. Although readily tamed, they do not live long in Europe.

Gibbon Edward English historian. He was born at Putney, April 27, 1737, and educated at a private school, then at Westminster, and in 1752 he went to Oxford for a short time. From 1753-58 he lived at Lausanne. Returning to England he lived in Hampshire, where he served in the militia, and in 1761 wrote in French his *Essay on the Study of Literature*.

In 1763 Gibbon visited Rome and there decided to write his immortal work which he called *The Decline and Fall of the Roman Empire*. He did not actually begin it, however, until 1772, and the first volume was not published until 1776. For eleven further years the last four in Switzerland, he worked at it and finished it on June 27, 1787, a passage in his *Autobiography* describing his emotion on that memorable night. The last three volumes were published in 1788. In 1793 he returned to England, and died in London, Jan. 16, 1794.

Gibbon's *Decline and Fall* is one of the world's great books. Its stately and sonorous style would, alone, make it worth reading, but it is equally notable for the brilliant epigrams in which the writer generalises, from time to time, on the events he is relating. As history, it is by no means obsolete, although on some points its facts have been corrected by more recent scholarship. It remains, however, a unique and memorable piece of work of a kind which will, in all probability, never again be attempted. The best edition is edited by J. B. Bury.

Gibbons Grinling English wood carver. Born April 4, 1648, in Rotterdam, he early came to London. John Evelyn introduced him to Charles II, and his work soon became widely known. He worked for Wren, carving the choir stalls in St. Paul's Cathedral, and other work by him is in Canterbury Cathedral, Windsor Castle, Chatsworth and elsewhere. His carvings in many churches and large houses show great delicacy of work and truthfulness of imitation, his designs being chiefly of foliage, flowers, fruits and birds. He died in London, Aug. 3, 1721.

Gibbons Orlando English composer. Born at Cambridge in 1583, he became a chorister at King's College there. In 1604 he was appointed organist of the Chapel Royal and in 1623 became organist of Westminster Abbey. He died June 5, 1625, at Canterbury, where he had gone, with some music composed by him for the occasion, to attend the reception of Henrietta Maria, the wife of Charles I. He wrote some beautiful chamber music and madrigals, but is best known for his church music, some compositions of which are still in general use.

Gibeon Ancient town in Palestine. Situated on a solitary hill, 5 m. N.W. of Jerusalem, it was an important Hivite stronghold, whose inhabitants tricked Joshua into granting a truce (Jos. ix). Here David's and Ishbosheth's champions fought, here Joab murdered Amasa, and here Solomon offered sacrifices and obtained the gift of wisdom. The town is now known as El-Jib.

Gibraltar Town and fortress of Spain, belonging to Great Britain. It stands on the peninsula at the end of which is Europa Point and is connected with the mainland by an isthmus. It covers just under

GIBSON

2 sq. m. The town is divided into the north town and the south town. The chief buildings are the Anglican Cathedral, several churches and the castle, there are also barracks, residences for the officials, and other buildings for the public service, as well as a racecourse and other sporting attractions. Gibraltar is strongly fortified and has a large and safe harbour, which is a station of the British fleet. The colony is under a governor, who is assisted by an executive council. Pop. (1931) 21,372. Facing the sea is the Rock of Gibraltar, and on the African coast opposite is Mount Abila, the two being known to the ancients as the pillars of Hercules. Between them are the Straits of Gibraltar which lead from the Atlantic Ocean into the Mediterranean Sea. At the narrowest point the Straits are only 9 m. across.

Owing to its position, Gibraltar has always been a coveted stronghold. For some centuries after 711 it belonged to the Moors. In 1462 it was taken by the Castilians, and was part of Spain until captured in 1704 by a British and Dutch fleet under Sir George Rooke. The French and Spaniards tried hard to regain it in 1704-05, but in vain and in 1713 it was surrendered to Great Britain. In 1736 the Spaniards rendered to Great Britain. In 1736 the Spaniards again besieged it, and made another and greater attempt in 1779 when they began a siege that lasted for over 3 years, ending in Feb. 1783.

Gibson Charles Dana, American artist. Born at Roxbury, Mass. Sept. 14, 1867, he studied in New York and Paris and began his artistic career by contributing illustrations to various periodicals. His drawings of a type of American girl, later he turned to portrait painting in oils. In 1920 he pursued the controlling interest in *Life*.

Gibson John, British sculptor. Born in 1790 near Conway his early years were passed in Liverpool where he began to carve. In 1816 he exhibited his first piece of sculpture in London and then studied in Rome as a pupil of Canova. He spent most of his life in that city and died there Jan. 27, 1866. He was elected R.A. in 1833 and R.A. in 1836. Gibson left his money and they are now in the Gibson Gallery at Burlington House, London.

Gide André Paul Guillaume, French novelist and critic. Born in Paris Nov. 21, 1869, his first book was *Les Cahiers d'André Walter* (1889), and was followed by *Paludes* (1895) and *Les Vauriennes Terrestres* (1897). His first novel *L'Immoraliste*, was a masterpiece, and *Le Parle Etrange* (1909) and *Isabelle* (1911) were characterised by the same sureness of touch. *Cares du Jeune Monnoyeur* (1927) and *Si le Grain ne Meurt* (1924) are unequalled. *Le Retour du Tchad* appeared in 1928.

Gidea Park District of Essex near Romford, of 13 m. from London on the L.N.E. Ry. It was long the park around a residence called Gidea Hall which in 1910 was sold and laid out as a garden city. Raphael Park is an open space.

Gideon Hebrew warrior and judge. The son of Joash he dwelt at Ophrah near Shechem. He routed the Midianites and overthrew the altars of Baal. Although deplining the throne he judged the people for 40 years. The textual inconsistencies concerning him may denote unsilful revision of the

Old Testament, and a consequent confusion of two heroes, Gideon and Jerubbaal (Judges, vi-viii).

Giggleswick

Village of Yorkshire (W.R.), 14 m. from Skipton, on the L.M.S. Ry. The Ribbles flows by it. It is famous for its school founded in 1507, and now a large public school. It has a beautiful chapel designed by Sir T. G. Jackson.

Gilbert

Group of islands in the Pacific Ocean. They belong to Great Britain which annexed them in 1915 and are part of the Gilbert and Ellice Islands Colony and lie on the equator. There are many islands but only 18 are inhabited. They cover 166 sq. m. and produce copra, phosphates and fruit. The government is in the hands of a resident commissioner, who is responsible to the high commissioner of the Western Pacific. Pop. (1930) 24,800.

Gilbert

Sir Alfred, English sculptor. Born in London, Aug. 12, 1854, he studied in London, Paris and Rome, first exhibiting at the Royal Academy in 1882. In 1892 he was elected a Royal Academician, and 1900-09 was Professor of Sculpture at the Royal Academy. Gilbert is considered one of the greatest of modern English sculptors. Among his many works are the Eros font in Piccadilly, the Kiss of Victory, and the statues of Queen Victoria at Winchester, of John Bright at Westminster, and of Queen Alexandria at Marlborough House. Gilbert was knighted by the King in June, 1932. He died on 4th Nov. 1934.

Gilbert

Sir Humphrey, English navigator. He was born about 1539 at Dartmouth and was educated at Eton and Oxford. He fought against the French in 1563 and in Ireland in 1566, being given a command in Munster in 1569. In 1570 he was knighted, he was M.P. for Plymouth in 1571, and in 1572 led an unsuccessful expedition into the Netherlands. In 1578 he was granted a charter by the queen to discover and establish a colony. His first expedition was a failure but in 1583 he took possession of Newfoundland where he founded a settlement. The *Squirrel*, the smaller of his vessels in which he was returning to England, foundered, Sept. 9, 1583, and all were lost.

Gilbert

John, American film actor. Born at Logan, Utah, July 30, 1897, he worked as a writer, director and editor of motion pictures. He achieved fame as an exponent of passion in *Big Parade*, *The Merry Widow*, *Flesh and the Devil*, and other pictures. He died in 1936.

Gilbert

Sir John, English painter and illustrator. Born at Blackheath, July 21, 1817, he entered a city office but soon abandoned business to teach himself art. In 1871 he was knighted and 5 years later was elected R.A. Another honour was the presidency of the Royal Society of Painters in Watercolour. He died Oct. 5, 1897. Gilbert worked both in oils and watercolours but his best work was done as an illustrator of periodicals and books, notably Shakespeare's plays and the works of Corrales and Scott. Many of his pictures are in the Guildhall, London.

Gilbert

Sir William, English dramatist. Born in London, Nov. 18, 1836, he graduated at London University, was a clerk in the Privy Council office, 1862-62, and in 1864 was called to the bar. He contributed to *Fun*, for which he wrote his

Bab Ballads, and produced, in 1866, his first play, a burlesque, *Dulcamara*, which was followed by many others. These include the comedies *Pygmalion and Galatea* and *The Wicked World*, also several dramas of a more serious kind. In 1871 he began to work with Sir Arthur Sullivan (q.v.), the composer, and from 1875 to 1896 they produced a series of topical comic operas, which had an instant and sustained success. They include *Patience*, *Iolanthe*, *The Mikado*, *H.M.S. Pinafore*, *Trial by Jury*, *The Pirates of Penzance*, *The Yeomen of the Guard* and *The Gondoliers*. For these Gilbert wrote the words which contain many references to the law. Gilbert was knighted in 1907, and was drowned May 29, 1911.

A Gilbert and Sullivan Society has been founded to keep alive the interest of the plays.

Gilbertines

English monastic order. Founded by S. Gilbert at Sempringham, Lincolnshire, in 1135, it comprised nuns following the Cistercian form of the Benedictine rule, and Augustinian canons regular. They lived in double monasteries, stringently segregated, and received papal approbation in 1148. Their habit was black with lamb's-wool lining and a white cloak. The superior was called the Master of Sempringham. At the founder's death in 1189 there were 13 monasteries, with 1700 members, at the Dissolution in 1537 there were 25.

Gilbey Sir Walter. British merchant. Born at Bishop's Stortford, May 2, 1831, he began his career in an estate agent's office at Tring. Later he and his brother entered business as wine merchants. In 1867 the firm acquired possession of the Pantheon in Oxford Street, London, and in 1875 purchased vineyards in the Médoc district of France and two whisky distilleries in Scotland. Gilbey, who became a baronet in 1893, was also interested in the breeding of shire and other horses, and was President of the Royal Agricultural Society in 1895. On his death, Nov. 12, 1914, the baronetcy passed to his son.

Gildersome Urban district of Yorkshire (W.R.). It is 5 m. from Leeds, on the L.N.E. Ry. Coal mining is the main industry. Pop. (1931) 3041.

Gilead Mountainous region east of the Jordan. Separated from Moab on the south by the Arnon, its usual northern boundary was the Yarmuk, but the Old Testament sometimes extends Gilead to Hermon.

Giles Patron saint of beggars, cripples and lepers. He is said to have been born towards the end of the 7th century and to have been of a noble Athenian family. Emigrating to France, he lived the life of a hermit, and founded an abbey near Nîmes. His day is celebrated on Sept. 1.

Gilgal Several places in Palestine mentioned in the Old Testament. One, 3 m. east of Jericho, was Israel's first camping place after entering Canaan. Another, 7 m. north of Bethel, was Elisha's abode.

Gilgamesh Hero of a Babylonian epic. This important and popular literary work comprises 12 cuneiform tablets. Each covers an adventure directly or indirectly associated with the hero and remarkably paralleling the labours of Hercules. One tablet narrates the Babylonian version of the Biblical flood. The epic is fragmentary.

Gill Organ of respiration in water-dwelling animals. Gills consist of simple or

branched processes richly supplied with blood-vessels and covered by a delicate membrane, thus giving a larger surface for the absorption of the oxygen dissolved in the water. They are present in crustaceans, molluscs and fishes, and in the larval stage of the frog and its allies. In fishes the gill system is complex and is contained either in separate pouches or in one branchial chamber.

Gill English measure of capacity. It contains 7.219 cubic in., and 4 gills go to a pint. Formerly in Scotland and the north of England, a gill was half a pint.

Gill Sir David. Scottish astronomer. Born in Aberdeen, June 12, 1843, he studied at Aberdeen University, soon developing an interest in astronomy. After having had charge of a private observatory he was, in 1879, appointed Astronomer Royal at the Cape of Good Hope. He published a number of star catalogues and works on astronomical subjects, and his work in connection with various geodetic surveys, together with many important investigations, greatly enhanced his reputation. His organising ability was well shown in his expedition to Ascension Island to determine the solar parallax in 1877. In 1900 he was knighted, and died Aug. 27, 1914.

Gill Eric Rowland. English sculptor. Born at Brighton, Feb. 22, 1882, he was apprenticed to an architect, but preferred letter carving, and in 1910 produced his first sculpture, "Madonna and Child." He became a Roman Catholic in 1913, and was commissioned to execute the Stations of the Cross for Westminster Cathedral. After the War he carved "Christ driving the Moneylenders from the Temple" for Leeds University War Memorial, and has done many other sculptures, including "S. Sebastian," "Torso," "Adam and Eve" (headless), and "Deposition." He published *Art Nonsense* (1929), and *Clothes* (1931).

Gillingham Borough of Kent. It adjoins Chatham, 36 m. from London, by the S. Ry. An industrial area, bricks and cement are made, the dockyard at Chatham providing other employment. Gillingham was a market town in the 14th century and was long a naval station. Pop. (1931) 60,983.

Gillingham Market town of Dorsetshire. An agricultural centre, it is situated on the Stour, 10½ m. from London, by the S. Ry. Pop. 3570.

Gillott Joseph. English pen maker. Born at Sheffield, Oct. 11, 1799, he commenced work as a cutler, moving to Birmingham in 1821. In 1830 he started experimenting in the making of steel pens, obtaining flexibility combined with hardness by cutting central and side slits and cross graining the point. After a time he established a factory, which brought him a fortune, much of which he spent on art. He died Jan. 5, 1873.

Gillow Robert. English craftsman. About 1730 he began to make furniture in Lancaster. Later he moved to London where he carried on business with his sons until his death in 1773. The sons, Robert, Thomas, and Richard, continued the business, which became Gillow & Barton, and were the leading furniture makers of the time. Hepplewhite and Sheraton furnished designs for pieces which were made by the Gillows.

Gillray James. British caricaturist. Born 1757, he was apprenticed to an

engraver and later studied at the R A schools in London and under Bartolozzi. In 1779 appeared his first signed caricature, and for over a quarter of a century his political satires continued to delight a wide public. He died insane on June 1, 1815.

Gillyflower Name applied by Chancer, Spenser, Shakespeare and old writers generally to the clove pink or clove gillyflower (*dianthus caryophyllus*). It is an adaptation of the French *gloire*. Later writers and nurserymen apply it to the stock or stock gillyflower, *matthiola*, the wallflower or wall gillyflower, *cheiranthus*, the damo's violant, or night-scented gillyflower, *hesperis*, and others.

Gilmour Sir John. Scottish politician. Born May 27, 1876, the son of a baronet, he was educated at Trinity College, Glenalmond, and Trinity College Cambridge. After serving in S Africa, he entered politics and was elected Unionist member for East Renfrewshire. In 1918 he was elected for the Pollok division of Glasgow, and in 1919 became a Unionist whip. In 1921-22 he was a junior Lord of the Treasury, and from 1924-29 Secretary for Scotland. In 1931 he became Minister for Agriculture, and as such attended the Ottawa Conference. In Sept. 1932, he succeeded Sir Herbert Samuel as Home Secretary, giving place to Sir John Simon in June, 1935.

Gimcrack Name of a famous English racehorse. In its honour a racing club was founded in 1767 and a race the Gimcrack Stakes, is run every August at York.

Gin Spirit distilled from malt and malzo grain in a patent still, and flavoured with juniper berries. Other aromatic substances, such as orris root, cardamoms, cassia and coriander seeds, are also used to flavour it. The percentage of alcohol varies from 40 to 50, and what medicinal value gin has is due to the oil of juniper. Dutch gin, one variety being schnapps or hollands, is made chiefly at Schiedam, Holland.

Ginchy Village of France. It is 7 m from Albert and was the scene of heavy fighting during the battle of the Somme in 1916. The British took it on Sept. 10, 1916, but it was recovered in March, 1918 by the Germans who held it until the final advance of the Allies. There is a memorial to the Guards who were in action here in Sept. 1916.

Ginger Rootstock of a perennial reed like herb (*Zingiber officinale*). Cultivated in antiquity, as a spice, it is grown now days throughout the tropics, the best varieties coming from China and Jamaica. The irregular hand like pieces, washed and dried, form coated or black ginger, washed, scraped and bleached they become uncoated or white ginger. The aromatic volatile oil and pungent resin are used medicinally. Young green rootstocks are preserved in syrup, or in crystallised sugar. In powdered form it is widely employed to flavour cakes (gingerbread), and it is also employed in the manufacture of ginger ale.

Ginning Process by which cotton fibres are separated from the seeds. It is performed by means of a machine known as a gin, of which there are several types, adapted for use with long or short stapled cotton. The word is a corruption of engine.

Ginseng Root of a shrub of the Ivy order (*Oraia ginseng*). It is reputed by the Chinese to possess rejuvenating properties. Wild plants from Manchuria are preferred to those cultivated in Korea. Americans export

the variety called *A. quinquefolia* to China as a substitute.

Giolitti Giovanni. Italian politician. Born Oct. 27, 1842, he was educated at Turin. In 1882 he was elected to the Chamber of Deputies, and in 1889 was made Minister of Finance. In 1892 he became Premier, but in 1894 he was obliged to resign. He later became Minister of the Interior, and in 1903 Premier for the second time. He resigned in 1906, but returned as Premier 1906-07 and 1911-14. During the Great War he advocated a policy of neutrality. Giolitti was again Premier in 1920-21. In 1922 he published an autobiography. He died July 17, 1928.

Giorgione Giorgio. Venetian painter. Born at Castelfranco in 1477, he was a pupil of Giovanni Bellini, and at 21 years of age painted the altar piece in the cathedral of his native place. This was followed by a number of other works of great beauty, but only a few of the many paintings attributed to him are authentic. Three are shown in the National Gallery, London. He died in Venice in 1510.

Giotto di Bondone Italian artist. Born near Florence about 1266, he was the son of a peasant landowner. Tradition says he was found drawing his father's sheep by Cimabue, who recognising his genius made him his pupil. The whole life of Giotto is similarly obscured by legend and much of his work has been lost, but it is known that he executed for S Peter's Rome, in 1298, a mosaic and altar piece. A series of his frescoes are preserved in the Church of S Francis at Assisi and at Padua. He also designed the beautiful campanile at Florence called Giotto's Tower. He died Jan. 8, 1336.

Gippsland District of S.E. Victoria, Australia. It covers about 14,000 sq m and on its fertile soil cattle are grazed, chiefly for their milk. The district is also rich in coal and other minerals. Sugar beet is cultivated. Sale is the chief town.

Gipsy Hill District of S.E. London. It is in the borough of Lambeth and the district of Norwood, and on the S. River. At one time the place was frequented by gipsies.

Giraffe Ruminant hoofed mammal (*giraffa camelopardalis*). It is a native of Africa south of the Sahara. The tallest of all animals, it attains to a height of 18 or 19 ft and is tawny coloured with brown blotches. It has a short body and long limbs and neck, which nevertheless has only the same seven neck bones as man. Its ears are large and pointed, and it has skin covered horn like appendages, and a tufted tail. It feeds on leaves plucked slowly from branches by its long flexible tongue. Timid and swift moving, giraffes are rapidly disappearing, especially from S Africa.

Girder In engineering, a beam of wrought iron, rolled steel or reinforced concrete supported at both ends. Designed to bear a heavy weight and resist transverse stresses girders are used for floors and roofs of buildings and in the construction of bridges. In the simple H girder, the longitudinal bars or flanges are united by a transverse plate or web, the flanges resisting the stresses put upon the girder. Steel girders are much used in modern business buildings, of which they form the framework.

Girgenti City of Sicily. It is 84 m from Palermo and the capital of Girgenti province. It is chiefly famous for the remains of its temples, which are among the most notable of their kind. It occupies the site of the Greek city of Agrigentum. The city has a trade in sulphur, fruit, oil, etc., which is shipped from Porto Empedocle, 3 m away. Pop (1931) 30,032.

Girl Word used for a female who is not yet a woman. There is no legal age, but in Great Britain females remain girls until they are 18 or 19. Institutions for the welfare of girls include the Girls' Friendly Society at Townsend House, Greycoat Place, London, S.W., and the Girls' Life Brigade, 56 Old Bailey, London, E.C. 4. Both have branches all over the country. The hours of labour of girls are limited in Great Britain and other countries by law.

Girl Guides Organisation for training girls, the counterpart of the Boy Scouts. It was started by Lord Baden-Powell and his sister, Miss Agnes Baden-Powell, in 1910. Girls between 8 and 16 years of age may become members, those under 11 being known as Brownies. They are grouped in companies, each under a captain and lieutenant, and a company is divided into patrols. Entrants are at first tenderfoots. To become guides proper they must pass tests in a number of subjects and so obtain proficiency badges. Camps are held in the summer for the guides. The headquarters are in Buckingham Palace Road, London, S.W. 1, where a new building was opened in 1931. The world membership is over 1,000,000.

Gironde River estuary in France formed by the union of the rivers Dordogne and Garonne. It is about 50 m long and is navigable. Bordeaux stands on the Garonne near the head of it. Gironde is also the name of a department famous for its wines, of which Bordeaux is the capital.

Girondins (Girondists) Name given to a political party in the French Revolution (*q.v.*), so called because some of its members came from the department of the Gironde. Its leader was Brissot, other leading members were Vergniaud and Condorcet. The Girondins were an offshoot of the Jacobins, but were more moderate. They were in control of affairs from March, 1792, to June, 1793, when they were overthrown by Robespierre. Many of them were arrested and executed.

Girtin Thomas English painter. Born in London, Feb. 18, 1775. He produced a number of water colours which gave him a high place amongst artists in that medium, but he was only 27 when he died, Nov. 9, 1802. Turner, with whom he worked for a time, paid a great tribute to his powers. His work may be seen in the British Museum.

Girton College for women at Cambridge. It was founded at Hitchin in 1869, and was moved to Cambridge in 1873, the buildings being erected near the village of Girton.

Girvan Burgh, watering place and market town of Ayrshire. It is at the mouth of the River Girvan, 21 m from Ayr and 43 m from Glasgow. There is a harbour for the fishing industry. Pop (1931) 5,292.

The river Girvan is 35 m long. It rises in a small lake and flows through the vale of Girvan.

Gisborne Town and port of New Zealand. It stands on Poverty Bay, on the west coast of North Island. The chief industry is the shipping of wool and mutton for which there are good harbour facilities. The town has freezing works and associated industries. Pop (1932) 16,400.

Gish Name of two American actresses. Lillian was born at Springfield, Ohio, in 1896 and appeared on the stage at the age of five. In 1914, with her younger sister, Dorothy, she took up film work, appearing in *The Birth of a Nation*, *Broken Blossoms*, *Way Down East*, *The Scarlet Letter*, etc.

Dorothy was born at Dayton, Ohio, March 11, 1898, and first appeared on the stage in 1903. Her chief screen successes have been *Nell Gwynne* and *Madame Pompadour*. Together the sisters appeared in *Hearts of the World*, and *Orphans of the Storm*.

Gissing George Robert. English novelist. Born at Wakefield, Nov. 22, 1857, he was educated at Owens College, Manchester. For a time he worked as a teacher in America, Germany and London. His first novel, *Workers in the Dawn*, appeared in 1880. He died Dec. 28, 1903.

Among Gissing's novels are *The Unclassed*, 1884, *Demos*, 1886, *Thyrza*, 1887, *New Grub Street*, 1891, *Born in Exile*, 1892, and *The Old Woman*, 1893. *The Private Papers of Henry Ryecroft*, 1903, is largely autobiographical. He wrote also a monograph on Charles Dickens, 1898, and a travel book *By the Ionian Sea*, 1901.

Givenchy Village of N France. It lies between Béthune and La Bassée, and was the scene of fighting during the Great War, as the line held by the British ran through it.

Another Givenchy is Givency-en-Gobello. This village, about 4 m south of Lens, was also the scene of fighting during the Great War.

Gizeh Town of Egypt. It is on the left bank of the Nile, here crossed by a bridge, three miles from Cairo. To the west, connected by an electric railway, are the pyramids and the sphinx. In 1931 a fourth pyramid was discovered. The town has a palace built by one of the khedives. Pop. 26,921.

Glace Bay Town and seaport of Nova Scotia, Canada, situated on Cape Breton Island, 14 m from Sydney, with which it is connected by railway. It stands on the Cape Breton coalfield and its industries include railway workshops. Fishing is carried on. Pop (1931) 20,706.

Glacier Stream of ice. Glaciers slowly flow down mountain valleys from above the snowline, where the lower layers of the accumulated snow become, by pressure, converted into ice. The rate of movement in Alpine glaciers is about one foot per day, the centre moving faster than the sides, which are retarded by friction, but since, when the glacier reaches a certain level, the ice melts about as fast as it advances, the base, or snout, of these glaciers are usually nearly stationary. From the base a torrent emerges, opaque and milky looking. Much of now temperate Europe is marked by signs of retreating glaciers, evidence of the last Glacial or Ice Age (*q.v.*).

In Arctic and Antarctic regions great masses of ice break off the glaciers when they reach the sea, and thus form icebergs.

Gladiator In ancient Rome a professional swordsman fighting for public

entertainment. The practice, arising at Etruscan funerals, where perhaps, it replaced human sacrifices, reached Rome in 284 B.C., and became an official diversion in 105 B.C. Various types existed such as those who fought blindfolded, those using net and trident, or sword and huckler. There were also gladiators who fought in oharlots, on horseback, or with wild beasts. Theodoric abolished gladiatorial spectacles in A.D. 500.

Gladiolus Genus of flowering plants of the Iris order. They are native mostly to the Mediterranean region and S. Africa. The first species reached English gardens in the 16th century. The handsomest are hybridised varieties, largely S. African, which were introduced during the 18th century. They grow from seed or from bulbous offsets of old corms, and yield one-sided spikes of large carmine, salmon, yellow and purple blooms.

Gladstone Viscount. English politician. Born Jan. 7, 1854, Herbert John Gladstone was the youngest son of W. E. Gladstone. He was educated at Eton and Oxford, being in 1877 appointed history lecturer at Keble College. In 1880 he was elected M.P. for Leeds. He served in several minor offices before 1894 when he became Chief Commissioner of Works. From 1899-1905, he was chief whip of the Liberal Party then in opposition and was Home Secretary 1905-06. In the latter year he was appointed Governor-General of S. Africa holding that office for five years, and was made a viscount. On his death May 6, 1930, the viscountcy became extinct. In 1928 he published *After Thirty Years*, a book dealing with his father's life.

Gladstone William Ewart. English statesman. Born in Liverpool, Dec. 29, 1809, he was the youngest son of Sir John Gladstone, Bart., M.P. He was educated at Eton and Oxford. In 1832, as a Tory, he was elected M.P. for Newark, and during his long career in the House of Commons, interrupted for a few months in 1846-47, he sat for Oxford University, 1847-65, S. Lancashire, 1865-68, Greenwich 1868-80, and Midlothian, 1880-95. His official career began in 1834 as a junior Lord of the Treasury, then as Under Secretary for the Colonies a year later. He left office with Sir Robert Peel his leader but in 1841 he returned to office, as Vice President of the Board of Trade, and in 1843 he was made President with cabinet rank. In 1845 he resigned rather than agree to a grant of public money for Roman Catholic education, but he came back in less than a year as Secretary for War and the Colonies.

From 1852 to 1855, as one of the Peelite Gladstones was Chancellor of the Exchequer. In 1856 he was again Chancellor this time definitely as a Liberal. During the next six years, with Palmerston as Prime Minister, he was responsible for the great financial reforms on which his fame partly rests. On Palmerston's death, 1865, he became leader of the Liberal Party in the House of Commons, and in 1867 leader of the whole party.

In 1868 Gladstone was Prime Minister for the first time and before he left office in 1874, he had disestablished the Irish Church, reformed the education system and introduced other reforms. In 1875, having lost the General Election of 1874, he retired from public life, but returned in 1878 to denounce the misdeeds of the Sultan. In 1880 under his inspiration, the Liberals won the General Election and he

again became Premier. His second term of office was less successful than the first, Ireland and Egypt presenting difficult problems which were not handled too well. Having passed a large measure of electoral reform he resigned office in 1885, and after the General Election declared Home Rule for Ireland. He took office for the third time as Premier, but the defection of Bright, Hartington, Chamberlain and others led to the defeat of his proposals for Home Rule, and failing in an appeal to the country, he went out of office. For six years he led the Liberals in opposition, but the election of 1892 saw him Prime Minister for the fourth time. Again his effort to give Home Rule to Ireland failed, the ministry was divided on important issues and in March, 1894, he resigned. He kept his seat, however, until 1895. He died on May 19, 1898, at Hawarden, and was buried in Westminster Abbey.

In 1839 Gladstone married Catherine Glynne, who inherited from her brother, Sir Stephen Glynne, Hawarden Castle and estates. They had four sons and four daughters. Mrs. Gladstone died in June, 1906. The Hawarden estate was inherited by his oldest grandson, W. C. Gladstone, M.P., who was killed in action in April, 1916. In 1932 Gladstone's only surviving son Henry Neville Gladstone, was created a baron.

Gladstone was a great parliamentarian and his record as an administrator will not easily be surpassed. He was a magnificent orator, and his career was helped, too, by his boundless energy, his ability to master detail and, to a lesser extent, by his imperious will. He was a profoundly religious man, devotedly attached to the Church of England. His *Life* has been written by John (Lord) Morley.

Glamis Village of Angus (Forfarshire), Scotland, 6 m. from Forfar. Near is Glamis Castle, the chief seat of the Earl of Strathmore. This is a 17th century building, but it contains fragments of a much older one. Many stories cling to it, one being that it was the residence of Macbeth. In the village there is an old sculptured cross, associated with the name of King Malcolm.

Glamorganshire County of Wales. The second largest and the most populous in the principality, with a long coast line on the Bristol Channel its area is 600 sq. m. It is in parts mountainous, and the scenery is very beautiful. Cardiff is the county town. Other large towns are Swansea, Merthyr Tydfil, Rhondda, Port Talbot and Pontypridd. Neath, Bridgend and Cowbridge. Porthcawl, Penarth and Ogystermouth are three of several watering places.

The east of the county is an important coal mining area. In the centre is the vale of Glamorgan, a fertile area, and in the west is the district of Gower, at one time outside the county. The rivers include the Taff, Tawe, Rhymnoe, Rhondda and Ogwr. Glamorgan sends seven members to Parliament and is in the Dioceses of Llandaff and of Swansea and Brecon. Pop. (1931) 1,225,700.

Gland Cell or group of cells which secrete a substance of value in the metabolism of an animal or plant. The secretion collects in the cavity of the gland and usually passes to the exterior by means of a duct. Examples are the salivary glands and sweat glands.

Glands, Ductless See Endocrine Glands.

Glanders Infectious disease, caused by a specific bacillus, in certain

animals, especially horses, mules and donkeys. It is communicable by contagion to certain other animals and to man. It produces pustular discharges in the nasal mucous membrane, and in the horse the lungs are affected. When it is cutaneous, with inflamed and ulcerated lymphatic glands it is called farcy (*q v*).

Glanvill Ranulf De English lawyer. Born at Stratford, Suffolk. A judge in 1175, he was chief justiciar of England, 1180-89, being a valued counsellor of Henry II. Richard I, however, deprived him of office and imprisoned him. He died, while on crusade, at Acre, 1190. He wrote a valuable treatise on English law, and on this his reputation rests.

Glasgow City and seaport of Scotland, the largest in the country. It stands on the Clyde, chiefly on the north of the river, and in the county of Lanark, the suburbs extending into the county of Renfrew. It covers nearly 50 sq. m. and its population in 1931 was 1,088,417, an increase of 30,000 in ten years. It includes Partick and Govan, once distinct municipalities, great industrial areas such as St. Rollox, Cambachle, Tradeston and Springburn, and the residential districts of Kelvingrove and Hillhead. Glasgow is the seat of an Anglican bishop and a Roman Catholic archbishop.

The buildings are mainly modern, the cathedral, which is sacred to St. Mungo, the city's patron saint, being an exception, parts dating from the 12th century. The municipal buildings form a magnificent pile in George Square. Near are the county buildings. The Mitchell Library and the Art Gallery are notable. Other public buildings are the Law Courts, the Exchange, the Post Office, St. Andrew's Hall and the Merchants' House. The infirmaries and hospitals are fine buildings. There is an observatory and a modern cemetery, the Necropolis. The university occupies a fine range of buildings on Gilmohrhill. It was founded in 1450 and is second to none in its scientific and other equipment. There are fine bridges over the river, the King's Bridge being opened in Oct., 1933. Crossing may also be accomplished by ferries and tunnels.

There are many public parks and a botanic garden, the former including Kelvingrove, Bellahouston, Cathkin Braes and Queen's. Glasgow Green has historic associations.

The industries, apart from shipping, include the manufacture of machinery, locomotives and other forms of iron and steel ware, chemicals, tobacco and textiles. Printing, distilling and dyeing are others. Shipbuilding is important. For the shipping there are extensive docks, wharves and warehouses, controlled by the Clyde Navigation Trust. The largest vessels can enter the harbour. Glasgow obtains a good supply of water from Lochs Katrine and Arkit. There are many golf courses, football grounds and other facilities for sport and recreation. Glasgow is famous as an art centre and a group of painters have made famous the Glasgow School.

Glasnevin District of Dublin. It is 2 m. from the city and is famous for its cemetery, in which many great Irishmen are buried. Here, too, are the botanical gardens of the Royal Irish Society.

Glass Non crystalline, transparent or semi-transparent inorganic substance. Certain minerals occur in a glassy state, but the glass of commerce is obtained by the fusion of silica with alkalis. Glass was

known to the ancients and certainly in Egypt from remote times.

Modern glass varies in composition according to the purpose for which it is intended. Bottle glass is made from sand, soda and lime with the addition of marl, baryta or basalt, sheet and plate glass are mixtures of sand, soda and lime, whilst flint glass is composed of potash, sand and lead oxide, for toughened glass boron acid and borates are added. Glass formed of two or three plates is used for the screens of motor cars. It is claimed that some forms of this glass will resist a rifle bullet.

The Glass Sellers' Company is a London city livery company with offices at 13 Queen Anne's Gate.

Glasswort Genus of leafless herbs (*Salicornia*) of the goose-foot order. It is a native of saline soils throughout the world. The succulent, jointed stems of the marsh samphire, *S. herbacea*, are eaten by cattle, when burnt they formerly produced barilla for soap and glass making. The allied saltwort *Salsola kali*, or prickly glasswort, served similar ends.

Glastonbury Borough and market town of Somerset. It stands on the River Brue, 37 m. from Bath. The chief buildings are the churches of St. John and St. Benedict, a museum, the George Inn, once the abbot's guest house, and another building, once his court house. Near the town is a hill called Glastonbury Tor. A musical and dramatic festival is held in the town every year, by the Glastonbury Players. Pop. (1931) 4515.

Glastonbury's great claim to fame is its ruined abbey, once one of the largest and richest in England. The abbey is said to have been founded by Joseph of Arimathea, who planted here the thorn that bloomed on Christmas Day. Actually it was founded in 601 and was rebuilt in the 13th century, being then a Benedictine house. It was destroyed at the Reformation. The ruins belong to the Church of England and a good deal of excavation work has been done on them.

Glauber Johann Rudolf German chemist. Born at Karlstadt, about 1604. His experimental work resulted in many valuable discoveries. He first prepared hydrochloric acid by treating salt with sulphuric acid and the sodium sulphate (Glauber's salt) produced during the operation he held to be a universal medicine. Nitric acid from nitre, the preparation of tartar emetic, and many metallic salts were among his discoveries. He died in 1668.

Glaucoma Disease of the eyeball. It is marked by increased tension or fluid pressure causing the crystalline lens to assume a greenish grey hue. The condition is partly mechanical, partly congestive, resulting from the iris's outer margin being pushed against the cornea. It occurs mostly after middle life, leading to ever-increasing loss of sight, unless remedied in time by an operation upon the iris or sclerotic. Acute attacks involve much pain.

Glebe Cultivable land belonging to a parish church or ecclesiastical benefice. Initially, no church could be consecrated until parsonage and glebe were provided. Parsons may farm their own glebes or let them on farming, building or mining leases under limiting conditions, but most glebelands are now managed by the Ecclesiastical Commissioners.

Glenalmond Valley in Porthshire, through which flows the River Almond. In the glen is Trinity College, a public school opened in 1841.

Glencairn Earl of Scottish title borne by the family of Cunningham, 1488 to 1798. Alexander Cunningham, the 1st earl, was killed in battle in 1488, the year in which James III granted him his earldom. Alexander, the 5th earl, was a friend of Knox, and alternately a supporter and antagonist of Mary, Queen of Scots. The 9th earl, William, was, after the Restoration, appointed High Chancellor of Scotland, having led a rising in favour of Charles II in 1653. James, the 14th earl, was the patron and friend of Burns, who wrote a *Lament* on his death. At the death of his brother, John, the 15th earl, in 1798, the title became extinct.

Glencoe Pass in Argyllshire. It is 10 m long, lies amid the mountains and runs to the sea at Loch Leven. The scenery is beautiful and wild. Here, in 1692, the MacDonalds of Glencoe were massacred by the Campbells. The order for the extermination of the MacDonalds was signed by William III, but the extent of his responsibility for the foul deed is a matter of controversy. Glencoe, which means the glen of weeping, is associated with Ossian. Part of the glen was sold in 1936.

Glencoe Village of Natal, S Africa. It is 130 m from Durban, on the line to Johannesburg, and is a railway junction. Near are some coal mines. The place is known because there was fighting here between the British and the Boers in Oct., 1899.

Glendalough Valley and lake in Wicklow, Irish Free State. It is noted for its ruins, among the finest in Ireland.

Glendower Owen Welsh rebel. Born about 1349, he claimed descent from the old Welsh princes. He studied law at Westminster and in 1385 fought for Richard II against the Scots. After the accession of Henry IV he proclaimed Welsh independence, with himself as Prince of Wales and for the remainder of his life was in active warfare with England. He made an alliance with France against England, but after 1405 he suffered a series of defeats. He died 1415.

Gleneagles Pleasure resort of Perthshire. It is 9 m from Crieff, with a station on the L.N.S. Ry. The company here built a fine hotel, near which are good golf links.

Glenfinnan Glen in Invernessshire. In it is a spot called Glenfinnan, where on Aug. 19, 1745, Charles Edward set up his standard. It is 18 m from Fort William at the head of Loch Shiel. A memorial marks the spot.

Glengariff Village of Cork, Irish Free State. It stands on Glengarriff Harbour, an opening off Bantry Bay, and is noted for its beauty.

Glengarry Glen of Invernessshire. The valley of the River Garry, it lies between Lochs Oich and Garry. It gives its name to a bonnet worn by some of the Scottish regiments.

Glenlivet Glen of Banffshire, Scotland. It is in the south of the county, and the little River Livet flows through it.

Glenmore Valley of Invernessshire. Known as the Great Glen of Scotland, it extends across Scotland for over 60 m, from the Moray Firth, S.W. of Inverness, to Loch Eil, near Fort William. The Caledonian Canal runs through it, uniting the three lochs, Ness, Lochy and Oich. There are several other valleys of this name in Scotland, including one in Perthshire.

Glenshiel Glen or pass in the country of Ross and Cromarty. It is 28 m long and is formed by the little River Shiel. In June, 1719, a force of Jacobites, with about 300 Spanish soldiers, marched into the glen where they were attacked and defeated by some English and Dutch troops.

Glider Name given to a kind of air vessel. It is heavier than air and has no motor, being designed to descend gradually from a height to the ground. Experiments with gliders were of considerable help in developing the aeroplane. As a sport, gliding has been taken up a good deal in Germany since the Great War and to some extent in Great Britain. Gliding clubs have been established and there is a British Gliding Association at 44a, Dover Street, London W.1. In 1931 an Austrian expert made a flight of over 70 miles in just over three hours, a record for England.

Globe Fish Various tropical and sub-tropical genera of fish. Allied to the eel fishes, they have the power of swallowing air, thereby making themselves more or less globular. Varying in length up to 2 ft. they include the small spined, brilliantly coloured and poisonous *tetodon*, which is found in the Nile, in Brazilian and Indian rivers and occasionally in British seas. In the large spined sea hedgehogs, *diodon*, bristly spines stand out defensively.

Globe Flower Genus of perennial herbs (*trollius*) of the buttercup order. Native to temperate and arctic regions, the British *T. europaeus* bears flowers formed of incurved, yellow, petal-like sepals with tiny linear petals. *T. asiaticus* is cultivated in gardens. The American spreading globe flower, *T. luteus*, is not globular.

Globe Theatre London playhouse, famous for its association with Shakespeare. It stood on Bank side, Southwark, and was built in 1599. It held 1200 spectators. This theatre was burned down in 1613, but another was built on or near the site and existed until 1644. In 1668 a third Globe Theatre was erected in Newcastle Street, Strand. This was pulled down in 1902.

Globularia Name of a genus of herbs and shrubs. They grow around the shores of the Mediterranean and in greenhouses in Britain. They bear small flowers gathered into flattish heads and are sometimes called ball flowers.

Globulin Group of primary proteins occurring in animals and plants. They are distinguished by insolubility in water and solubility in dilute saline solutions. They are precipitated from their solutions by excessive dilution with water or by saturation with magnesium sulphate, and are coagulated by heating.

Gloss Explanatory remark inserted between the lines or in the margin of a literary work. It refers especially to those inserted by manuscript copyists. Ancient

manuscripts abound in such annotations, which, when collected and classified, form glossaries. A glossographer writes explanatory comments on obscure texts

Glossitis

Inflammation of the tongue. It may arise from an insect bite or sting, or the entry of septic germs through a wound, and may occasion an abscess. Chronic inflammation may occur from syphilis, from the irritation caused by decayed teeth or badly fitted dentures, or from excessive smoking. It may lead to cancer.

Glossop

Borough and market town of Derbyshire. It is 13 m from Manchester and 24 m from Sheffield, with a station on the L N E Rly. The principal industries are the manufacture of cotton and paper and the associated ones of dyeing and bleaching. Glossop Hall was, until 1929, the seat of Lord Howard of Glossop, who owned much of the town. Pop (1931) 19,510.

Gloucester

City and market town of Gloucestershire, also the county town. It stands on the Severn, 114 m from London, and is served by the G W and L M S Rlys. It is also a river port, and a canal links it with Sharpness on the estuary of the Severn. The finest building in the city is the cathedral, which has many notable features, of which the cloisters and the stained glass may be mentioned. Other churches are S Mary de Crypt, S Mary de Lede and S Michael's. Secular buildings include the guildhall and the New Inn, one of the oldest in England. The industries of Gloucester are carriage building works, engineering works, flour mills and manufactures of other kinds. Its cattle market is important. There is a large public park and the city has a famous Rugby football club.

Owing to its position on the Severn, Gloucester has been, from early times, an important place. Here William I wore his crown, and here parliaments were held. It became a bishop's seat in 1641. Pop (1931), 52,937.

Gloucester

Duke of English title borne by several members of the royal family. Robert, an illegitimate son of Henry I, was Earl of Gloucester and the Clare family held the earldom for about 100 years before 1314, when the last earl was killed at Bannockburn.

Thomas of Woodstock, a son of Edward III, was Duke of Gloucester from 1385 to 1397. He was a leading figure during the reign of his nephew, Richard II, who had him arrested and executed in 1397. Humphrey, a son of Henry IV, was made duke in 1414. He is remembered as a benefactor to the University of Oxford. He died in 1447. The next duke was the prince who became Richard III.

There was no other Duke of Gloucester until Stuart times. Henry, son of Charles I, and William, son of Anne, were both given the title, but neither attained manhood. In 1764, William Henry, a son of Frederick, Prince of Wales, and a brother of George III, was made duke. He died in 1805.

Henry, third son of King George V, became Duke of Gloucester in 1928. Born March 21, 1900, at Sandringham, he was educated at Broadstairs and then at Eton. In 1919 he entered the army, serving first with the King's Royal Rifles and later with a cavalry regiment. He is knight of the Garter and Privy Councillor. In 1935 he married Lady Alice Scott, daughter of the seventh Duke of Buccleuch.

Gloucestershire County of England. In the west of the country, it is of very irregular shape and has an area of 1243 sq. m. Notable features are the Forest of Dean, between the Wye and the Severn, and the Cotswold Hills, one of the most beautiful parts of England. The Severn, the Wye and the Avon are the chief rivers, and the Thames rises in the county. Gloucester is the county town, but Bristol is the largest city. Other towns of importance are Cheltenham, Tewkesbury, Cirencester and Stroud. It is chiefly an agricultural area and in the vale of Gloucester the soil is very fertile. Coal is mined in the Forest of Dean and sheep are pastured on the hills.

At one time Gloucestershire, as a centre of the woollen industry, was one of the richest parts of England, and there are evidences of this in its fine churches and its picturesque market towns, such as Minchinhampton and Chipping Campden. It is served by the G W and L M S Rlys. It sends four members to Parliament and contains two bishoprics. Gloucester and Bristol. Berkeley Castle is perhaps the finest of its historic buildings. It is noted as a crickoting and hunting county. Pop (1931), 785,700.

The Gloucester Regiment was formerly the 28th and 61st regiments of foot, battalions with records of service going back nearly 200 years. The depot is at Bristol.

Glowworm

Name given to beetles of the genus *Lampyrus*. Two species are found in Britain. The body is soft, and while the male has the usual shape of a beetle, the female is wingless and resembles a larva. Both the adult insect and the larva of the female possess phosphorescent organs on the underside of the abdomen, hence the name.

Gloxinia

(*Sinningia speciosa*) Popular variety of sinningia, a genus of the order *Sesuviales*. A tuberous rooted plant with abundant leaves, it bears bell-like blossoms of pink, purple, crimson or white, some blooms being delicately spotted.

Glozel

Hamlet, near Vichy, France. There, in 1924, a peasant, Fradin, professed to unearth some prehistoric finds. Further excavations were made by Dr Morlet, a local amateur archaeologist, and a good deal of material, said to be ancient, was produced. For a time controversy ran high, but official investigations, both national and international, disposed of the "finds" as spurious, the outcome of a palpable fraud.

Gluck

Christoph Willibald German composer. Born July 2, 1714, in Bavaria, he received his musical education at Prague and Milan. In Italy he produced many successful operas but, visiting London in 1745, he was not there successful, being overshadowed by Handel. Humiliated by his failure, he returned to Vienna, where he produced *Orfeo ed Euridice*, 1762, and *Alceste*, 1767, operas unlike any that had formerly been produced in the harmonious relation between words and music. Through the influence of Marie Antoinette, his former pupil, *Iphigénie en Aulide* was produced in Paris in 1774, and there Gluck lived for some years. It was followed by *Armide*, *Iphigénie en Tauride* and *Echo et Narcisse*. He died in Vienna, Nov 15, 1787.

Glucose

Form of sugar also known as grape sugar or dextrose. It is present in many ripe fruits and in honey, and is prepared commercially by boiling the starch.

of potatoes, maize, etc. with dilute sulphuric acid, afterwards removing the acid with lime and evaporating the liquid. Glucose is used by confectioners, jam manufacturers and brewers.

Glucosides Vegetable substances which are combinations of glucose with other organic compounds, especially those belonging to the aromatic series. By the action of special enzymes (ferments) or by hydrolysing with weak acids, the glucosides yield glucose among other products of decomposition. Amygdalin occurring in almonds and the leaves of the cherry laurel is decomposed by the enzyme, emulsin, into glucose, prussic acid and benzaldehyde. Other glucosides are salicin from the willow, and digitalin from the foxglove.

Glue Impure form of gelatine (*qv*). Made from the skins and bones of animals, the finer qualities of brown glue are prepared from the hides of oxen and lighter coloured grades from the skins of sheep. For the wear or glues bones are used, and the skins of codfish and other fishes yield a tenacious fish glue. A liquid glue is made by treating ordinary glue with nitric or acetic acid to prevent the formation of a jelly.

Gluten Mixture of proteins, forming a tough elastic substance. It is obtained by washing and kneading wheat flour in water to remove the starch. Gluten forms from 10 to 12 per cent. of wheat flour and from it two proteins, gliadin and glutenin may be extracted. The hard wheats are especially rich in gluten and from them are made the French *pâtes alimentaires*, macaroni, spaghetti and vermicelli.

Glutton Largest carnivorous mammal (*Gulo luscus*), of the weasel family. Found in north Europe, north Asia and North America where it is usually called the wolverine. It is extinct in Britain, where its fossil bones occur in cave earths. Like a bear in shape with short bushy tail it is strong and voracious. Its shaggy brown black fur serves for rugs and carriage aprons.

Glycerin Trihydric alcohol having the formula $C_3H_8(OH)_3$. It forms a thick colourless liquid with a sweet taste. The decomposition product of oils and fats, it is manufactured on a large scale as a by-product of candle and soap works. It is used in the pure state in medicine also in the manufacture of explosives and for many other industrial purposes.

Glyptodon Typical genus of an extinct family of giant, long tailed armadillos. Fossil remains of them have been found in S. American pleistocene deposits. A specimen from the Buenos Aires Pampa formation *G. clavipes* is now at the Natural History Museum, Kensington. This has a rigid dome shaped tortoise like carapace 7 ft. by 9 ft. its total length measured over the back being 11½ ft. The carapace was covered with bony rosettes fully 1 in. thick which were once skin covered and the head had fluted teeth. The tail had overlapping bony rings.

Gnat English name for various two winged insects of a family collectively called mosquitoes (*Culex* *dae*). The female has a piercing and sucking proboscis. The several British species include the common house *Culex pipiens* and the larger banded *C. annulatus*. All have aquatic larvae.

Gneiss Metamorphic rock having practically the same mineral composition as granite. Thus it contains quartz, felspar and mica as essential constituents, the minerals are arranged in alternate layers, although in some varieties the foliation is obscure. The varieties of gneiss are named after the corresponding igneous rocks, such as granite gneiss, diorite gneiss, etc.

Gnosticism Spiritual and metaphysical system, antecedent to Christianity. It sought to combine Oriental religious cults with Greek philosophy. Gnostic Christianity developed gnostic heresies and gnosticism assumed Christian forms. A mystery religion, it claimed, not intellectual knowledge, but esoteric "gnosis," attributing virtue to talismans and amulets. Characterised by theories of cosmic emanation and Zoroastrian dualism, its vigour in the 2nd century influenced much Christian literature, causing rivalries whence orthodox Catholicism emerged triumphant. By A.D. 600 gnosticism had lost its hold.

Gnu Hottentot name of the large, white-tailed antelope (*Connochales gnu*). It is called by the Boers the bino, wildbeest. It is 4 ft. high and heavy headed with a wide muzzle and a long mane something like a grotesque buffalo with a pony's hind quarters and tail. Both sexes have cylindrical horns, curving downward and then upward. Force and fast it is now nearly extinct. The allied brindbill gnu or bino wildbeest, *C. taurinus* ranges E. Africa in herds from Lake Victoria to the Orange River.

Goa District of India. A Portuguese possession, it is on the west coast, about 250 m. south of Bombay. It has a coastline of about 40 m. and covers 1470 sq. m. It is a fertile region, bounded by the presidency of Bombay, and is connected by railway with British India. It has been Portuguese since 1510. Pop. (1931) 569,187.

On the coast is Panjim, also called New Goa, the capital of Portuguese India. Near are the ruins of Old Goa. At one time it had a population of 200,000 and was the chief town of the great Portuguese empire in the East.

Goat Genus of hollow horned ruminants (*capra*). The bucks, which emit a peculiar odour called hircine are usually chin bearded. They lack the face glands of the sheep and those between the hind hoofs. Their strongly wrinkled horns are usually straighter, but otherwise they are difficult to differentiate from some wild sheep. Domesticated in neolithic times by lake dwellers the ancestral form came from the Mediterranean region and Persia. Some wild species are the ibex and markhor. The so-called Itokoy Mountain goat is a goat antelope, the goat proper is not found in the now world.

Goats are kept for their milk and also because their hair, wool and skin have commercial value. To foster their keeping there is a British Goat Society in London.

Goathland Village of Yorkshire (N. E.). It is 8 m. from Whitby on the N. E. Ry. The place has a hydro and a colony for disabled officers was founded here after the Great War. Near is Goathland Moor on which are some waterfalls. Pop. 712.

Goat's Beard Biennial herb (*Trago-
pogon pratensis*) of the composite order, it is common in England and Wales. Its erect stem bears solitary yellow

flower heads, which close at midday after pollination, hence the colloquial name John-go-to-bed-at noon.

Goat's Rue Tall perennial leguminous herb (*Galega officinalis*). It is hardy, with feathery leaves and sprays of miniature pinkish-purple or white pea-like flowers. Cultivated for fodder, it is also a garden favourite and grows to a height of 5 ft. It was formerly used in medicine for promoting perspiration, and as a stimulant.

Goatsucker See NIGHTJAR

Gob (and Gob Fires). Technical term for waste coal left in mines and the spontaneous fires arising in it. The latter were once a serious matter, but under modern methods little such coal is left in the mine and the fire danger is correspondingly reduced.

Gobelin Jean French dyer. He was born probably in Rhelms and became a dyer in Paris, where he is said to have invented a vivid scarlet dye. He died in 1476 and his business was for a time carried on by his descendants.

By mere chance Gobelin's name was given to famous tapestry. In 1603 Henry IV bought some land from the Gobelins and thereon built workshops in which tapestry was made for him, and was called Gobelin, although Gobelin had nothing to do with it. The works remained royal property until the Revolution and are now a state establishment.

Gobi Desert of Asia, in E and S Mongolia. It forms a plateau nearly 4000 ft high and covers some 300,000 sq m. Sven Hedin, Sir Aurel Stein and others have explored it. Buried towns and the fossils of mighty prehistoric creatures prove it to have once been a more habitable area than it is to-day. The Chinese name is Shamo.

Goby Name for various genera of spiny-finned fishes. Their ventral fins form a sucker-like disk for clinging to rocks. Dwelling off tropical and temperate coasts, the largest British species, the black *gobius niger*, 10 in. long, is common in rock pools. The spotted *G. minutus*, a smaller fish, abounds in the Thames estuary, making shell protected nests in sand.

God Divine being. Every religion has its gods and goddesses and many of them were associated with a particular branch of human activity. In Christianity, and also to the Jews and Mohammedans, God is the Supreme Being, the creator of the world, omnipotent and eternal.

The development in human thought of the idea of God is the fundamental study of comparative religion. It has two general tendencies. One is towards theism—passing through polytheism to monotheism—and believes in personal moral forces being distinct from, and ruling, the universe; the other is towards pantheism and holds that impersonal forces are immanent in, and identifiable with, the universe. The popular etymology deriving God from good is erroneous, but the Christian doctrine of God, as reaffirmed at the Lambeth Conference in 1930, emphasises His universal love.

Godalming Borough of Surrey. It stands on the Wey, 35 m. from London on the S Ry. There are some small industries, at one time it was famed for its cloth. It is a good centre for tourists, as around is much beautiful scenery. The Hog's

Back runs past the town and near it are the buildings of the Charterhouse School. Pop (1931), 10,400.

Godetia Annual plant (*Oenothera*) related to the evening primrose. Varying in height from one to two feet, it includes both double and single varieties. The flowers are white, pink, crimson, and white or cream. The godetia blooms freely in sunshine and is a gay and ornamental plant for the border. It is a native of California and Chile.

Godfrey Count of Bouillon. Born about 1061, the son of the Count of Boulogne, he became famous as a soldier. In 1096 he set out on crusade, leading his men across Europe to the Holy Land, where he played a distinguished part in the siege and capture of Jerusalem. He was offered the title of king, but this he refused, although he was ruler of the city until his death in July, 1100.

Godiva Lady. Wife of Leofric, Earl of Mercia. She lived in the 11th century, and legend described her as having ridden naked through Coventry's streets, a condition imposed by her husband for securing to its citizens relief from his exactions. The legend first appeared in 1235, the peeping Tom episode, in which a tailor who disobeyed her request to the householders to refrain from looking forth was afflicted with blindness, was unknown before 1678, when a commemorative procession was instituted in Coventry. This was repeated annually at the fair until 1826. It was revived in 1848 and has been held fairly regularly since then.

Godley Sir Alexander John. English soldier. Born Feb. 4, 1867, and educated at Haileybury and Sandhurst, he entered the Royal Dublin Fusiliers and served in the South African War. In 1910, after experiences on the staff, he was sent to command the New Zealand defence force and was there until 1914. During the Great War he commanded a division of Australians and New Zealanders in Egypt and Gallipoli and was then in charge of an army corps on the Western Front. He was commander-in-chief of the British army on the Rhine, 1922-24. From 1924-28 he held the Southern command, and in 1929 he was made Governor of Gibraltar.

Godmanchester Borough and market town of Huntingdonshire. It stands on the Ouse, just outside Huntingdon, 59 m. from London, by the L N E Ry. There is a trade in agricultural produce. Pop (1931) 1991.

Godolphin Earl. English title borne by the family of Godolphin from 1706 to 1766. Sidney Godolphin, born in June, 1645, was a member of an old Cornish family. In 1678 he was made a peer, and in 1681 First Lord of the Treasury and he retained that position under James II and William III. During the reign of Anne, Godolphin was Lord High Treasurer from 1702 to 1710, during which time he gave valuable support to Marlborough. He died Sept. 15, 1712.

On the death of his son Francis, in 1760, the title became extinct. His estates passed to his daughter who married the 4th Duke of Leeds.

Godparent Sponsor for an infant at its baptism. Sponsors arose in Christendom in the 2nd century, as guarantors of character for pagan converts. The Roman Catholic and Anglican churches

require godparents or sponsors at the baptism of a child and, according to an old custom a child is often given a name or names belonging to the godparents

Godunov Boris Federovich Tsar of Muscovy Born about 1552, he was the most famous member of an ancient Tatar family. He became important at court, and on the death of Ivan the Terrible was appointed as guardian of his son and successor Godunov put down all rebellion, and by 1586 was omnipotent. He had a strong and wise foreign policy encouraged foreign trade and education and re-colonised Siberia. On the death of Theodore he was elected Tsar. He died on April 13, 1605

Godwin English earl. He was one of the chief supporters of Canute in whose reign he first came into prominence becoming Earl of the West Saxons in 1020. He helped to secure the succession of Harold Godwinson in 1035, and of Edward the Confessor who had married his daughter in 1042, and until 1051 was the most powerful man in England. In that year he quarrelled with Edward and was exiled with his sons. He returned in 1053, but died April 15 of the same year. Harold and Tostig were two of his sons.

Godwin Mary Wollstonecraft English writer. Born April 27, 1759. In 1786 she published *Thoughts on the Education of Daughters* which was followed by other original works and translations, including a reply to Burke's *Reflections on the French Revolution*, and a *Vindication of the Rights of Women*. In Paris during the reign of terror she met Gilbert Imlay to whom she bore a daughter. On his desertion she attempted suicide but in 1797 married William Godwin. Their daughter Mary married Shelley. She died Sept. 10, 1797.

William Godwin husband of the above was first a minister then a free thinker and writer. His chief books are *Enquiry Concerning Political Justice* and *The Adventures of Caleb Williams*. In 1801 he married Mrs. Clairmont and became the stepfather of Claire Clairmont the mistress of Byron. He died in London April 7, 1836.

Godwin-Austen Mountain in the western section of the Himalayas. Its height is 25,250 ft. It was named in 1888 after Lieut. Col. H. H. Godwin-Austen (1834-1923), who surveyed the district.

Goeben German battle cruiser. She was built at Hamburg in 1911 and carried eight 14 in. guns besides lesser armament. On Aug. 6, 1914 the *Goeben* with a light cruiser the *Breslau* steamed through the Mediterranean Sea into the Dardanelles and so to Constantinople. Their escape from the British ships off Messina was the subject of an inquiry. Probably their bold arrival helped to persuade Turkey to enter the war on the German side. Later the *Goeben* became active in Turkish waters and was still afloat although much damaged at the armistice when she was taken over by the British fleet.

Goethals George Washington American soldier and engineer. Born at Brooklyn June 29, 1839. In 1893 was chief engineer of the First Army Corps in the Spanish-American War. In 1907 he was put in charge of the construction of Panama Canal and on its completion in 1914 became first governor of the canal zone. On the entry

of the U.S.A. into the Great War he held various posts. He died Jan. 21, 1928.

Goethe Johann Wolfgang von German poet. Born at Frankfurt, Aug. 28, 1749 the son of a lawyer, was educated at home and at the universities of Leipzig and Strasbourg. He began to practice law, but the greater interests of literature, art and science mastered him, and in 1775 he settled at Weimar, where he became the trusted advisor of the Duke of Saxe-Weimar. After a while he gave more time to literature and less to the public service but he directed the court theatre and in 1792 went with the duke's army to fight the revolutionary army of France. The great love of Goethe's life was Charlotte von Stein but there were others, among them Christiana Vulpius, whom he married in 1806, long after she had borne him a son August. Another influence in his life was the friendship of Schiller. On March 22, 1832, he died at Weimar. His house there like his birthplace in Frankfurt is a public memorial. Centenary celebrations were held all over the world in 1932, in his honour.

Goethe wrote much both in prose and verse, also some beautiful lyrics and ballads. His supreme work is *Faust* which he began when quite young but did not finish till 1832. Of his dramas *Götter und Helden*, *Iphigenia* and *Egmont* may be mentioned. *Wilhelm Meister's Lehrjahre* is his greatest novel, followed after a time by *Wilhelm Meister's Wanderjahre*. Others are *Werther* and *Hermann und Dorothea* and his autobiography *Aus meinem Leben Dichtung und Wahrheit*. Goethe also did notable work in physics and biology.

Gog and Magog Two biblical names. Magog is mentioned in Gen. x meaning apparently Gog land perhaps Armenia. Ezekiel (xxxviii, xxxix) regards Gog of the land of Magog as Israel's enemy. Rev. xx describes Gog and Magog as co-ordinating worldly powers.

Medieval chronicles describe two giants acting as palace porters in London of whom gigantic wickerwork images, Gog and Magog, figured in mayoral processions. These were lost in the Great Fire, but Saunders' images 14 ft. high, carved in 1708 still stand in the Guildhall, London.

The Gogmagog Hills lie to the SW of Cambridge. The highest point is only 222 ft. high but the flatness of the surrounding country makes them noticeable.

Gogh Vincent Van Dutch painter. Born in Holland in 1853 he early showed artistic genius. First influenced by Millet, then by the Impressionist School, he later became, with Cézanne and Gauguin one of the leaders of the Post Impressionists. A victim of a stroke he painted many of his best pictures in an asylum at Arles. In 1890 he died by his own hand.

Gogol Nikolai Vassilievitch Russian novelist. Born March 31, 1809. In 1828 he went to St. Petersburg where for a time lectured at the university and in 1831, brought out *Evenings at a Farmhouse near Dikanika* a popular series of tales of South Russia. A second series, *Mirgorod* including his famous story *Taras Bulba* followed in 1831. A comedy *Revizor* translated into English as *The Government Inspector* was produced in 1836 and *Dead Souls* in 1842. Gogol died in Moscow Feb. 21, 1852.

Goidel Old Irish name of the early branch of the continental peoples.

who reached Britain before or with the culture of the bronze age. Their speech survives in Irish, Scottish, Gaelic and Manx. John Rhys introduced the name to replace *Gadhel* in 1882.

Goitre Swelling on the neck, due to enlarged thyroid glands. Simple goitre, or bronchocoele, is endemic in certain mountain valleys throughout the world, e.g., parts of Switzerland, Dorsetshire (where it is called Derbyshire neck) and Himalayas. Women are more susceptible to it than men. Iodides are often successfully administered while the tumour may be removed surgically. Exophthalmic goitre or Graves's disease, is quite distinct. See also **CRETINISM**.

Golborne Market town and urban district of Lancashire. It is 189 m from London by the L.M.S. Rly. Here are cotton mills, and in the neighbourhood are collieries. Pop (1931) 7322.

Golcar Urban district of Yorkshire, W.R. It is 200 m from London by the L.M.S. Rly, and 3 m from Huddersfield. The manufacture of woollen goods is carried on. Pop (1931) 9812.

Golconda Ancient city of India. It is about 7 m from Hyderabad, and now a ruin. Near by were rich diamond fields, hence the proverbial references to the vast wealth of Golconda.

Gold One of the elementary metals. Its chemical symbol is Au, from the Latin *aurum*, its atomic weight is 197.2, its specific gravity 19.32, and its melting point 1063°C. One of the precious metals.

The increase in the use of gold was made easier by the discoveries of rich supplies first in Australia and then in South Africa. Before the Great War much gold was coined, but during the war paper money took its place and gold coins have almost ceased to circulate. This paper coinage, however, is based upon gold, consequently a large amount of gold is held by the state and other banks as security or cover for the paper money in circulation.

Gold is found nearly all over the world, but usually in such small quantities that it does not pay to work it. The main supply comes from quartz, others from dredging certain rivers, where the gold is found in sand and gravel. The amount of gold in a ton of gold-bearing quartz is often small, but by the use of improved methods mines are worked which a few years ago would have been unprofitable. The world's output of gold remains fairly steady at about £90,000,000 a year. Of this the Transvaal mines produce about half. In 1930 the production of these mines reached the record figure of £45,558,980. Other producing countries are the United States, Canada, which is rapidly increasing its output, Russia, Mexico, Australia, Rhodesia and India.

Of the gold mined, about three quarters is used in the arts, gold being always in great demand for ornamental purposes, e.g., for rings, watches, brooches and other articles of jewellery and personal wear, whilst much is beaten out to form gold leaf. When used in the arts, it is mixed with basic metals to a varying extent. Its purity is indicated by the number of carats, pure gold being taken as 24 carats. Gold articles are stamped by the assay offices as being of so many carats.

Gold, being the accepted standard of value nearly all over the world, has a marked effect on prices, although the nature of this is a matter of debate among economists. A good

deal was said about this matter during the trade depression of 1929-31. Some argued that by making more use of the stocks of gold in the central banks, the bankers could do much to restore prosperous conditions, they could use the huge stocks of gold to create credit and so bring about a trade revival. Others argued that this would only mean the raising of prices without any corresponding benefit. Another theory is that the annual output of gold is not sufficient to finance the increasing amount of trade in other words it does not keep pace with the output of other commodities. There seems indeed, an extraordinary ignorance, even amongst experts, of the influence of gold under the changed conditions that followed the Great War. The only certain fact is that the value of gold increases with falling prices and falls when prices rise.

The Gold Standard is in existence when a country will export gold when there is no other way of discharging its balance of debts abroad. Great Britain, by providing for the free export of gold, placed herself in this position in 1826, but abandoned it in 1931. Gold point is the point in the foreign exchanges when it pays a country to export gold.

In April, 1931, the amount of gold held by the treasuries and banks of four countries was as follows:

United States	--	£969,000,000
France		447,700,000
Great Britain		146,800,000
Germany		115,100,000

Since Dec. 1929, the United States had added £89,000,000 to its stock and France had added £112,000,000. The market price of gold varies considerably, it is usually just about £3 17s 10½d per oz.

Gold Coast British colony in West Africa (so called because gold was found in its river beds in the 14th century or earlier), with a coastline of 334 m. on the Gulf of Guinea. Covering about 24,000 sq. m., or, with Asbanti and the so-called Northern Territories, is 78,802 sq. m. in extent (the three are under the same government, which consists of a governor assisted by a legislative and an executive council). Cocoa, gold, diamonds, mahogany, and palm oil are produced and exported. Accra, a seaport, is the capital.

The Portuguese visited the coast in the 15th century and during the 19th the district became British, partly by purchase and partly by cession.

Goldcrest See **WREN**.

Golden Age Hesiod's mythical period of patriarchal simplicity and innocence. It was the period when Saturn, or Cronos, reigned in Latium. The phrase is applied to the culminating age of a country's prosperity, literature, or art.

Golden Bull Term used for a charter of exceptional importance, such as was sealed with a golden seal or bull. The chief of these was that drawn up by the Emperor Charles IV. in 1356, providing a constitution for the Holy Roman Empire.

Golden Calf Molten image made by instigation, Aaron converted the ornaments brought from Egypt into a calf for worship, when Moses was receiving the Law on the sacred mount (Ex. xxxii). Jeroboam established similar images at Dan and Bethel (1 Kings xii).

Golden Fleece Fabled skin of a golden ram. By it the children of the King of Thebes, Phrixus and Helle, were carried off from their enemies. Helle fell into the sea, but Phrixus reached Colchis, where he sacrificed the ram. Aëtes, King of Colchis, hung up its skin in the temple of Arctos and this was the golden fleece. Later, Jason and his Argonauts brought it back with them to Thessaly.

Golden Fleece Order of the European order of knight hood, one of the oldest and most famous in the world. Founded in 1429 by Philip, Duke of Burgundy, it was dedicated to the Virgin and St Andrew, and was kept in being by the succeeding Hapsburg and Bourbon dynasties, both in Spain and in Austria until these countries became republics. The badge contained a representation of the golden fleece.

Golden Gate Channel that leads from the Pacific Ocean into San Francisco Bay. It is about 5 m long and is so-called because of its beauty. A bridge is (1936) in course of construction to cross the Golden Gate. The main span will be over 4000 feet and the total length 6640 feet.

Golden Horn Opening of the Bosphorus. It separates the city of Istanbul, or Constantinople, from the suburbs of Pera and Galata. It is famed for its beauty.

Golden Number Chronological term used in determining the date of Easter and the Epact (q.v.). It represents the number of the year in the metonic or lunar cycle of 19 years, therefore the numbers range from 1 to 19. In the early calendars the number was marked in gold after each year, hence the name.

Golden Rod Genus of composite herbs (*Solidago*). The wide spread *S. virgaurea* common on British waysides bears a wandlike spike of tiny yellow flowerheads. All the other species of which there are about 100, are American, but *S. canadensis* with pyramidal sprays of yellow flowers is cultivated in British gardens.

Golden Rose Emblem of wrought gold blessed by the Pope on the fourth Sunday in Lent. It is then often presented to a church distinguished person or community. At first a single rose it became a thorny spray with leaves and jewelled petals, a costly piece of goldsmith's work.

Golden Rule Christ's precept. It is found in the Sermon on the Mount: "Whatsoever ye would that men should do unto you, even so do ye also unto them" (Matt. vii. 12).

Golders' Green Residential district of London. It lies to the N.W. of the city adjoining Hampstead. Its growth took place entirely during the 20th century.

Goldfinch Common British resident song bird (*Carduelis ele. gans*). Its length is about 5 in and it has black, yellow and white wings and bright red throat. It builds a moss-lined nest and lays two broods of 4 or 5 reddish-spotted blue and white eggs.

Goldfish Small fish allied to the carp. It was brought to England from China or Japan about 1700 and has since been

universally kept in aquaria (and, as a child's plaything, in tiny bowls). The original fish was brown, the gold tints having since been produced by breeding. Under favourable conditions it will live and breed in tanks and ponds of small size. The water must be well aerated and weeds should grow in it.

Gold Leaf Thin sheet of gold used for gilding. Each is $\frac{1}{1000}$ of an inch in thickness, and $3\frac{1}{2}$ in square. Small gold ingots are rolled out to form a strip not more than $\frac{1}{100}$ of an inch in thickness. The strip is cut into pieces an inch square, and these are placed first, between pieces of vellum, or prepared paper, and then goldbeater's skin and beaten until the required thickness is obtained.

Goldbeater's skin is specially prepared from a part of the large intestines of the ox.

Goldsborough Village of Yorkshire (W.R.). It is 3 m from Knaresborough, on the L.N.E. Ry. It is noted for its hall, which is on the estate of the Earl of Harewood.

Goldsmith Worker in gold and precious metals, or dealer in gold and silver plate.

The Goldsmiths' Company is one of the oldest city companies of London and has its hall in Foster Lane E.C., where plate is assayed and hall marked.

Goldsmith Oliver, Irish writer. Born Nov. 10, 1728, the son of a clergyman, he went from school to Trinity College, Dublin, but refused to take up any profession although he dabbled in medicine. He passed some years in wanderings over Europe before (1756) settling in London. He tried several ways of getting a living, but the only one that brought any reward was that of a bookseller's hack. In 1759 he published his *Inquiry into the State of Polite Learning* and his fortunes began to mend. He started a paper called *The Bee*. In 1760-61 he wrote his 'Chinese Letters' in *The Public Ledger*—afterwards issued as *A Citizen of the World*—they are the imaginary reflections of a Chinese philosopher on visiting England.

In 1761 he became friendly with Johnson and was one of the original members of the Johnson circle. Johnson was pleased to approve of *The Traveller* published in 1764 and in 1766 Goldsmith followed up this success with a much greater one, his immortal novel *The Vicar of Wakefield*. In 1770, much miscellaneous work having filled the intervening years, appeared his best poem, *The Deserted Village*, and in 1773 his dramatic masterpiece *She Stoops to Conquer*. A less successful play was *The Good-natured Man*. Goldsmith died in his chambers in the Temple, London April 4, 1774, and his grave is marked by a statue outside the Temple Church.

Gold Stick Official at the British court. The office is held in turn by the colonels of the regiments of household cavalry, and the duties are to attend the sovereign on state occasions. There is also a gold stick for Scotland this being the captain general of the Royal Company of Archers.

Gold Stripe Mark worn by soldiers of the British army who were wounded in the Great War. It was introduced in 1916 and took the form of a strip of gold lace worn on the left sleeve of the

coat. The French army has a similar decoration.

Goldwyn Samuel American film producer and business organiser Born in Warsaw in 1882, his parents (named Goldfish) took him in 1896 to America, where he was naturalised in 1902 He was a pioneer in urging American authors to write directly for the screen He organised the Jesse Lasky Photoplay Company and was associated for a time with the great Metro-Goldwyn combine at Los Angeles He was the subject of a *Life* by John Drinkwater

Golf Popular outdoor game It is played upon links, or open spaces, on which there are obstacles, or "bunkers," such as a sandhill or a pool of water If these are not provided by nature they are usually made for the purpose Each course consists of a number of stretches, usually 18, at the end of each of which is a green with a small hole in the middle of it The aim of each player is to drive his ball into this hole in fewer strokes than his opponent The ball is of wound elastic, coated with rubber Each player has a number of clubs, each adapted for a particular kind of stroke e.g., the driver, brassie, iron, mashie, putter and niblick, and variations of these A game is generally played by two players, one against one, but the foursome, in which two players play against two, is a popular variation

All over Great Britain there are golf courses, and the game has taken a great hold in the United States The oldest club is the Royal and Ancient Golf Club at St. Andrews, which is accepted as the ruling authority of the game Clubs hold competitions amongst their members, medals being given and for these there is a system of handicapping, a certain number of strokes being given or received

There are various competitions, for women as well as men The chief of these is the men's open championships, for amateurs and professionals There are also amateur championships for men and women, for England, Scotland, Ireland, France and other countries Matches are played between the universities, and between Great Britain and the United States In these the teams are usually eight-a-side

Goliath Phillistine of Gath A gigantic man, he challenged Saul's hosts to single combat, whereupon David slew him with a stone from his shepherd's sling (1 Sam xvii)

Gomersal Urban district of Yorkshire (W.R.) It is 5½ m from Bradford, and 214 m from London by the L.N.E.R. Ry Here are textile manufactures, and there are collieries near Pop 3800

Gomorrah Ancient city near the Dead Sea. Its actual site is unknown Situated, like Sodom, in the Vale of Siddim (Gen xiv), it was the abode of Abram's nephew, Lot Because of their wickedness the inhabitants were destroyed by fire and brimstone

Goncourt De Name of two French novelists Edmond Louis Antoine Huot was born at Nanov, May 26, 1822, and his brother, Jules Alfred Huot, in Paris, Dec 17, 1830 Until the death of the younger (June 20, 1870), they wrote all their works in collaboration, beginning with books on special history and on art, such as *Histoire de la Société Française pendant la Révolution*, 1854, *L'Art du XVIIIe Siècle*, 1859-75 and *La Maison d'un Artiste* Among their novels

may be mentioned *Sœur Philomène*, *Manette Salomon* and *Madame Gerçais* Alone, Edmond wrote on art and also produced several novels including *La Fille Elisa*, he edited the letters of his brother and their combined *Journal* He died July 16, 1896, leaving money to found the Goncourt Academy

Gondola Boat used on the canals and lagoons of Venice. It has a prow and stern high above the water, and in the middle is a cabin It is propelled by gondoliers, who stand up for their work, and is used for conveyance of passengers all over the city Many persons have their own gondolas.

The car, or nacelle, fitted to an airship is also known as a gondola

Gonzaga Famous Italian family One of its members became ruler of Mantua in 1328, and his descendants were persons of importance in Italy for 300 years Luigi Gonzaga (1568-91) a member of the Society of Jesus was canonised as S Aloysius. About 1705 the Emperor Joseph I took Mantua, and annexed it to Austria, while Montserrat, another possession of the family, was given to Savoy The duke went into exile, and in 1708 the family became extinct

Good Hope Cape of S Africa This southerly point of the continent, is about 30 m from Capetown and is often called simply the Cape It is about 190 ft. high

Goodrich Village of Herefordshire. About 3 m from Ross, it has an old and interesting church Near are the ruins of a castle, which was built to protect England against the Welsh, probably in the 12th century

Goodwill Connection or reputation attached to a business It is an asset, and considerable sums are paid for the goodwill of a sound business When a business passes at death, a price is usually put upon the goodwill for purposes of probate Many limited companies have goodwill as an asset in the balance sheet, but prudent finance provides for its gradual extinction In some businesses of great value goodwill has been written down to nothing, thus providing the shareholders with a hidden reserve of great value The professional connection of a doctor, lawyer or architect has also a value for its goodwill

Goodwin Sands Sandbank off the coast of Kent. Named after the Saxon Earl Godwin, legend says it was once an island on which he had a house The sands are about 6 m from the coast at Deal, and extend for about 10 m from north to south They have a bad reputation with seamen, as many vessels have been wrecked thereon, and are protected by four lightships

Goodwood Seat of the dukes of Richmond and Gordon. It is 3 m from Chichester and is chiefly celebrated for its racecourse, where races take place at the end of July each year, as they have done since 1802

Goole Urban district, market town and river port of Yorkshire (W.R.) It stands at the junction of the Ouse and the Don, 25 m from Hull, and is served by the L.N.E.R. Ry The Aire and Calder navigation system also links it with the towns of Lancashire and Yorkshire There are good docks for the shipping of coal and other products, and steamers go regularly from here to the ports of

Scandinavia and the Netherlands. Other industries are flour milling and engineering.

Goose Web footed bird of the family *anatidae*. The male is called the gander, the young goslings. There are about 40 species, among them being the grey lag goose, the bean goose, laughing goose, Brent goose, and barnacle goose. Of these, the grey lag breeds in Scotland and Ireland, but other varieties are only visitors to Great Britain.

The domesticated goose is descended from the grey lag, and has been bred for the table (particularly for Christmas fare) in the British Islands for some centuries. In former days the quills of the goose were in great demand for writing, and its down is still of value.

A flat iron used by tailors is called a goose.

Gooseberry Fruit of a shrub of the *saxifrage* order (*ribes grossularia*). It grows wild in many parts of the world, and is also cultivated for its fruit. Fruit growers have produced many varieties and some gooseberries are very large. The fruit is somewhat acid, but is eaten both raw and cooked and makes an agreeable preserve.

The Cape gooseberry is allied to the tomato. It comes from Peru, and is cultivated in India and elsewhere.

Goose Step Popular name of a military balancing exercise. The body rests upon each leg alternately, the other leg swinging to and fro with straight knee, toe pointed outward, and shoulder squared. In ceremonial parades the goose step march averages 75 paces to the minute.

Goossens Eugene English conductor and composer. Born in London, May 26, 1893, he was a son of Eugene Goossens, at one time conductor of the Carl Rosa Opera Company. He was educated in Liverpool and at the Royal College of Music, London, and in 1915, after four years as a member of the orchestra at the Queen's Hall, London, became associated with the Beecham Opera Co. He founded an orchestra and gave concerts of his works in London and other centres. His opera *Judith* was produced in 1920.

Gopher Various small N. American rodents. They include ground squirrels allied to the Old World muskies, prairie dogs, and pocket gophers or pouched rats. The name is also applied to a N. American land tortoise (*testudo polyphemus*), which is destructive to potato crops, but its flesh is esteemed.

Gopher Wood Untranslated and unidentified Hebrew name of the timber of which Noah built the ark (Gen. vi). The word denotes a resin yielding tree, of those suggested cedar, pine, and cypress, the last is likeliest to be the gopher. The name applies also to the N. American leguminous yellow wood tree, cultivated for the shade it gives.

Gorbals District of Glasgow, once a separate burgh. It is on the Clyde and on the L.M.S. Rly. The industries are those of Glasgow with which it was incorporated in 1816.

Gordian Knot In Greek legend a knot tied in the tail of an ox cart by Gordius a Phrygian who founded Gordium. An oracle declared that he who loosed the knot would master Asia. Alexander the Great cut the knot with his sword. The phrase cutting the Gordian knot therefore denotes bold solutions of knotty points.

Gordon Scottish family. Its founder is said to have been a Norman who settled at Gordon in Berwickshire. Sir Adam Gordon fought for Robert Bruce, and was rewarded with lands in Aberdeenshire, where the family became very powerful and which still remains the centre of its influence. In 1445 one of the Gordons was made Earl of Huntly, and in 1599 the 6th earl was made a marquis George, the 4th marquis, was made Duke of Gordon in 1684, and there was a Duke of Gordon until the 5th duke died in 1836. Gordon Castle, near Forcubers, and his estates passed to the Duke of Richmond, who in 1876 was made also Duke of Gordon. Another branch of the Gordon family is represented by the Marquess of Aberdeen.

The Gordon Highlanders is one of the most famous regiments of the British Army. It consists of the old 75th and 92nd regiments of the line. The former was raised in 1788 among the Gordons, and the latter in 1794 by the 4th Duke of Gordon and his beautiful wife, Jane Moxwell. The regimental depot is at Aberdeen.

Gordon Charles George British soldier, born at Woolwich, Jan. 28, 1833. He saw service in the Crimean War in 1855, and in China in 1860 and 1863-64, in command of Chinese troops, successfully crushed the Taping Rebellion, thereby gaining the nickname of "Chinese" Gordon. At the request of the Khedive, he was, in 1874, sent to organise the Egyptian Sudan of which from 1877 to 1880 he was governor. Sent to the Sudan again in 1884 to organise the withdrawal of troops before the Mahdi's advance, he was besieged in Khartoum. After an heroic defence of nearly 12 months the city was captured, Gordon being slain, Jan. 26, 1885.

The Gordon Bore Home, near Brookwood Surrey, was erected in memory of General Gordon. It accommodates 250 homeless and destitute boys, who are trained for civil life and the services. There are homes of a similar kind in other places.

Gordon Riots Rising that took place in London June, 1780. The Roman Catholics in Great Britain lived under serious disabilities, some of which were removed in England in 1778, though it was found impossible to do the same in Scotland, public opinion being too strong. In 1779, to oppose this removal, a Protestant Association was formed, and Lord George Gordon, a younger son of the 3rd Duke of Gordon, became its leader. On June 2, 1780, he marched with a petition from St. George's Fields to Westminster at the head of 60,000 persons. There was a good deal of disorder, and some Roman Catholic places of worship were damaged. There was further rioting on the 4th, when the Bank of England was attacked and the prisoners forced. The ministers alarmed at the strength of the movement feared to act but George III. ordered the military to put down the rioters by force. This was quickly done. The riots are described in Dickens' *Barnaby Rudge*.

Lord George Gordon was tried and acquitted as being insane but 21 others were executed. Later he was concerned in other exploits, and died in Newgate Nov. 1, 1793.

Gore Charles English prelate and theologian. Born Jan. 20, 1853, he was made Bishop of Worcester in 1902. He was largely responsible for creating the new Diocese of Birmingham and was bishop there from 1905 to 1911, when he became Bishop of Oxford, which post he resigned in 1910. He

was one of the authors of *Lux Mundi*, and has written a number of theological works, being known also as a worker for social reform. He died Jan 17, 1932.

Gorgons In Greek mythology, three-winged female monsters. According to Hesiod they were named Stheno, Euryale, and Medusa; they had snakes for hair, and turned all who looked upon them to stone. Medusa, who alone was mortal, was slain by Perseus, watching her mirrored in his shield, so that he need not look upon her. The Gorgoneion, or Gorgon's head, is a favourite door ornament.

Gorgonzola Town of Italy. It is about 12 m NE of Milan, and is famous for the cheese bearing its name.

Gorhambury Estate in Hertfordshire. Once the property of Lord Bacon, it is 2 m from St. Albans. The present house was built late in the 18th century, in the park are the ruins of one in which Bacon lived. In 1626 it passed out of the possession of the Bacons. In the 19th century it became the seat of the Earl of Verulam, but he sold it in 1931.

Gorilla Largest of the man-like or anthropoid apes. It is a native of Equatorial Africa. Allied to the chimpanzee, it differs in having small ears, an elongated head, nasal grooves, arms reaching to the knee, small thumbs, and beeting brow ridges. Its coarse hair is generally blackish in colour, with a chestnut head. The males are as much as 6½ ft. the females 4½ ft. in height. Unable to walk erect, they support themselves on the fore knuckles. They are practically untamable, and seldom live long in captivity. In 1930 a sanctuary for gorillas was made in Uganda.

Goring Village of Oxfordshire. It stands on the Thames, 9 m from Reading, opposite Sreatley in Berkshire, on the G.W. Rly. It is much visited for boating, being one of the beauty spots of the Thames. Goring Gap is the depression in the chalk hills through which the Thames flows.

Another Goring is the seaside resort in Sussex, now part of the borough of Worthing.

Gorizia City of Italy, much visited by tourists. It stands on the Isonzo, 23 m from Trieste. The old town retains its walls, outside which a new town has been built. There are some manufactures and a trade in agricultural produce.

Gorky Maxim. Russian author. Born at Nijni Novgorod, Mar 14, 1868, and christened Alexei Maximovitch Peshkov, at the age of nine he was apprenticed to a shoemaker. In 1884, failing to enter Kasan University, he took up a wandering life, the experiences of which served as useful material for his pen. In 1892 he published *Maikar Chudra*, and in 1893 *Chelkash*, his first success. This was followed by many other works, including *Foma Gordyev*, *Konovarov*, and a drama, called in English, *At the Lowest Depths*. Dealing in arresting fashion with the sordid side of life, Gorky is one of the greatest and most realistic of the Russian writers. During the Great War he served with the Red Cross service after which he joined the Bolsheviks. In 1924 he published an autobiography, *Fragments from My Diary*.

Gorleston Watering place of Suffolk. It stands at the mouth of the Yare, 122 m from London, on the L.N.E. Rly. The sands are very good and there are

golf links. Gorleston is included in the Borough of Great Yarmouth.

Gorse Alternative name for furze (q.v.), a prickly evergreen flowering shrub.

Gorsedd Name used in Wales and Cornwall for a national assembly. At these, bards contend for prizes, and they are almost identical with the elisteddods. One was held near Penzance in 1931, this being a revival of a ceremony a thousand years old.

Gorst Sir John Eldon. English politician. Born at Preston, May 24, 1835, he was educated there and at Cambridge. In 1866 he entered Parliament as Conservative M.P. for Cambridge town, from 1875-92 he represented Chatham and from 1892-1906 his own university. In 1885-86 he was Solicitor-General, in 1886-91 Under-Secretary for India, and in 1891-92 Financial Secretary to the Treasury. He was Minister for Education, 1895-1902. He died April 4, 1916. His son, Sir John Eldon Gorst, was British Consul-General in Egypt 1907-11.

Goschen Viscount. English title borne by the family of Goschen. George Joachim Goschen was born in London Aug. 10, 1831, the son of a banker who had settled in England. In 1863 he was elected M.P. for the city of London, in 1865 Vice-President of the Board of Trade in the Liberal ministry, and in 1866 he became Chancellor of the Duchy of Lancaster and a Cabinet minister. Between 1868-74 he served under Gladstone, first as President of the Poor Law Board, and then First Lord of the Admiralty, and in 1880 he went to Turkey as ambassador.

Never an advanced Liberal, Goschen opposed Home Rule, and as a Unionist succeeded Lord Randolph Churchill, 1886, as Chancellor of the Exchequer, when he carried through the conversion scheme of 2½ per cent consols. He retained office until 1892 and from 1900 to 1905 was First Lord of the Admiralty. In 1900 he was made a viscount and left the House of Commons where he had sat, with slight intervals, for a succession of constituencies since 1863. He died Feb 7, 1907.

Gosforth Urban district of Northumberland. It is 3 m from Newcastle-on-Tyne, on the L.N.E. Rly. In Gosforth Park race meetings are held. Pop. (1931) 18,042.

Another Gosforth is a village in Cumberland, 12 m from Whitehaven.

Goshawk Bird of prey (*Astur*), of the falcon family. The European goshawk, *A. palmarius*, is the largest, short-winged hawk used in falconry, the female being flown at rabbits, and the male which is smaller, at partridges. Once common, it rarely comes nowadays to Britain.

Goshen Fertile region in ancient Egypt. Allotted to the patriarch Joseph and his kinsmen, the Hebrews occupied it for the several centuries of their sojourn in Egypt. It lay east of the Nile.

Gospel Oak London street. It runs between Haverstock Hill and Rochford Street, and is so named because under an oak tree, between the parishes of Hampstead and St. Pancras the gospel was read when the bounds were beaten. The name was given to the district around.

Gospel Word meaning good tidings. It is used especially for the first four books of the New Testament that are known collectively as the Gospels. Together

they give practically all the known facts about the life and teaching of Jesus Christ. The first three, written by Matthew, Mark and Luke, are called, from their similar structure, the synoptic gospels. The fourth ascribed to John, emphasises certain other aspects. The synoplists are interdependent because they used common sources. Mark the earliest, utilised Peter's personal knowledge. Matthew probably penned his own memoranda, which may be the conjectural source sometimes called Q, whence the first and third evangelists derived the additional matter engrafted upon Mark. Of Mark's 661 verses all but 30 are in Matthew or Luke or both. Matthew and Luke collectively contain 200 more.

Wycliffe's followers were called gossellers and later the term hot gossellers was given to fanatical preachers.

Gosport Seaport and borough of Hampshire. It is 86 m from London, on the S. Riv., and stands on the west side of Portsmouth Harbour. A ferry and a floating bridge connect it with Portsmouth. The Royal Clarence Victualling yard and barracks are here. Near is the Haslar Hospital. The urban district includes Alverstoke and Stokes Bay. Pop (1931) 37,928.

Goss Name of a make of ivory porcelain invented by William Henry Goss. Produced first at his Stoke pottery in 1858, its best known form is armorial china in quaint shapes, bearing the arms of towns, colleges and other places of interest. His Parian busts and large, jewelled, Sevres-like vases are also famed.

Goss Sir John English organist and composer. Born at Fareham, Hants, Dec 27, 1800. In 1811 he became a chorister of the Chapel Royal, London. He was made organist of St Luke's, Chelsea, 1824, and in 1838 succeeded his master, Attwood, as organist of St Paul's, London, being knighted on his resignation in 1872. He died May 10, 1880. Goss was the composer of some fine anthems and other church music.

Gosse Sir Edmund William English writer. The only son of Philip Henry Gosse, the naturalist, he was born in London Sept 21, 1819. He was educated privately under the eyes of his father and acquired a remarkable fund of knowledge. In 1867 he became an assistant in the British Museum. In 1875 translator to the Board of Trade and in 1904 librarian to the House of Lords. In 1911 he retired. He was knighted in 1925 and died Mar 16, 1928, leaving a son Philip, also a writer.

Gosse found time for much reading and writing as well as for association with other scholars and was one of the leading literary men of his day. He wrote on English and foreign literature, his writings being marked off by a charm of style that added to their value. As a poet he wrote *Madrigals, Songs and Sonnets* and *On Fiol and Flide*, and his collected poems appeared in 1911. Criticism and biography are represented by *Gosse in a Library*, *Critical Art Kats*, *Portraits and Studies* and lives of Donne, Gray, Swinburne, Patmore and others. In 1913 he issued five volumes of *Collected Essays* and in 1919 *Directions of a Man of Letters*. He also wrote a drama *King Lick* and a novel *The Dream of Narcissus*, but to many his greatest certainly his most intimate book is *Father and Son* in which with remarkable restraint and power he tells the story of his own childhood.

Gosso also wrote a good deal on French and Scandinavian literature.

Goteborg City and seaport of Sweden, formerly called Gothenburg. It stands near the mouth of the river Göta, on the S.W. coast of the country and is its largest seaport. It is 285 m from Stockholm, and is an important railway centre. Canals flow through the streets. The cathedral was rebuilt early in the 19th century. There is a university.

Göteborg has a fine harbour, and does a very large trade in timber and other products. It has also some manufactures including shipbuilding, and is a fishing centre. It has a broadcasting station (322 M 10 kW). It was founded by Gustavus Adolphus in 1619. Pop 233,300.

The Gothenburg System is one for the control of the liquor traffic. It was started in the city in 1871, and has been copied by other places. Under it, the liquor is sold in houses which are managed by a company under the control of the municipality. This can only make a small profit on its capital and those in charge of the houses have no interest in promoting the sales of drink. The system is practically the same as that of the Public House Trust in Great Britain.

The Göta Canal is a ship canal that goes from Göteborg to the Baltic at Mem. It is 240 m long, but for much of its course uses the river Göta and the Lakes Wener and Vättern.

Gotha Town of Thuringia, Germany. It is 15 m from Erfurt, and before 1918 was one of the capitals of the State of Saxo-Coburg-Gotha. The town has an observatory. Gotha is celebrated as a publishing centre, especially for maps, and the *Almanach de Gotha* was long published here. There are some manufactures. Pop 46,800.

The Gotha is the name of a German aeroplane. It is a small, swift biplane, many of which were built and used during the Great War for raids on England.

Gotham Village of Nottinghamshire. It is 6 m from Nottingham. Its main interest is its connection with the stories of the wise men of Gotham. These are said to have performed the most foolish actions, such as building a hedge round a onokoo to imprison the bird. The collection of 20 stories about them is called *Merry Tales of the Mad Men of Gotham* and their exploits are mentioned in books and plays of the 15th and 16th centuries.

Gothic Term denoting association with the Goths (gö). It indicates successively their unpollished manners and art, their language which was once widespread is now known mostly from Ulphilas's 4th century Bible translation, in which he uses an alphabet of Greek, Latin and runic characters, and the pointed black faced letter used in the earliest printed books.

GOTHIC ARCHITECTURE Its most popular use is for the form of architecture called Gothic, although this has no connection with the Goths. It arose in France about 1150, and was much used for cathedrals and churches in that country. Its distinguishing feature is a pointed arch, which has made possible great beauty of design. It was soon brought to England where it flourished until about 1550, in periods known as Early English, Decorated and Perpendicular. There was a revival of Gothic architecture in the 19th century, but it is less suitable for secular than for ecclesiastical.

astical buildings, and at that time most new buildings were secular

By common consent the Gothic Cathedral is one of the greatest products of the human mind. England and France contain many, Chartres, Canterbury and Salisbury for example. Westminster Abbey, London, the Sainte Chapelle in Paris and King's College, Cambridge, are other examples of its unsurpassed beauty.

Goths Name of a Teutonic people. They probably came from the N of Europe, where Gothland perpetuates their name, they were, anyhow, dwelling on the shores of the Baltic in the 1st century. In the 3rd century they were in the SE of Europe, and were fighting the Romans. Soon they were divided into two branches, the eastern being the Ostrogoths and those in the western, the Visigoths. Owing to the preaching of Ulphilas they became Christians.

For a time the Goths lived in Dacia at peace with the Romans, but about 400, having in Alaric a warlike and ambitious leader, the Visigoths began to move. They marched westwards, reached Italy and in 410 captured and plundered Rome. In a short time, however, they left Italy and established a Gothic kingdom in France and Spain, its capital being Toulouse and its first king Theodoric. In Spain they conquered the Vandals and occupied a dominant position until their last king, Roderic, was killed in battle with the Moors in 711. In France they had been overthrown by the Franks under Clovis early in the 6th century. Such was the end of the Visigoths.

After the Visigoths had moved westward, the Ostrogoths were conquered by the Huns, but this subjection was only of brief duration. About 520 they, too, marched into Italy, where they appeared as the emissaries of the Empire at Byzantium. They established themselves there under their leader, Theodoric, who made Ravenna his capital, and, although, professing allegiance to the emperor, ruled as an independent sovereign. Soon after his death, in 526, Justinian sent Belisarius against the Ostrogoths. A long struggle took place, its end coming when Narses, the successor of Belisarius, destroyed the power of the Ostrogoths who, like their fellows, disappeared from history.

Göttingen Town of Germany. It stands on the Leine, 67 m from Hanover, and has many objects of interest. In the old town the chief buildings are the Rathaus and the Church of St John, while in the market place is the goose girl fountain. The industries include the manufacture of chemicals and scientific instruments, another is publishing. The university, founded by George II in 1734, has a fine range of buildings, including a library, laboratories, museums and an observatory. Pop 37,000.

Gotland Island in the Baltic Sea, also called Gothland. It belongs to Sweden, being about 60 m from the SE coast of that country. The largest Baltic island, it is 70 m long and covers 1230 sq m. Visby is the capital, and there are some smaller towns. The soil is fertile and agriculture flourishes. Railways serve the island. In the Middle Ages, Gotland belonged to the Hanseatic League, being annexed by Sweden in 1645. Pop (1931) 57,450.

Another Gotland is one of the three provinces into which Sweden was formerly divided. It included the S part of the country.

Gouda Town of the Netherlands. It stands where the River Yssel joins the Gouwe, 12 m from Rotterdam. Canals flow through the town, which is famous for its cheese. Pop (1932) 29,832.

Gough Viscount. Irish soldier. Born Nov 3, 1779, Hugh Gough entered the British Army, seeing service during the French wars, notably in the Peninsular War. Sent to India in 1837, he was given command in China, 1841-42. In 1843 he was made Commander-in-Chief in India, in which capacity he successfully fought the Maharrattas in 1843 and the Sikhs in 1845 and 1848. He was then superseded by Sir Charles Napier, and retired. In 1842 he was made a baronet, in 1846 a baron and in 1849 a viscount. He died March 2, 1869. The title is still held by his descendant.

Gough Sir Hubert de la Poer. British soldier. Born Aug 12, 1870, he was educated at Eton and Sandhurst, joining the 16th Lancers in 1889. He served in the Tirah Expedition, 1897-98, and the S. African War, 1899-1902. In Ireland in 1914, being then in charge of a Lancer regiment, he resigned his commission rather than fight against Ulster. However he commanded the 3rd Cavalry Brigade in France in 1914, and was soon appointed to a division and then to an army corps. In July, 1916, he was selected to command the 5th army. His conduct of the operations at the third Battle of Ypres in 1917 was severely criticised, and when his troops fell back before the Germans in March, 1918, he was recalled. In 1919 he was appointed chief of the Allied Mission to the Baltic States, and he retired from the army in 1922. He received his knighthood in 1916. In 1931 Gough wrote his own account of the events of 1918.

Goulburn City of New South Wales. It stands on the river Wellandilly in an agricultural region and is connected by rail with Sydney, which is about 115 m distant, and is a railway junction. Its industries include brewing, tanning and beet-making. There are two cathedrals. Pop (1931) 12,570.

There is a river Goulburn in Victoria. This is a tributary of the Murray, and is 345 m long.

Gould Sir Francis Carruthers. English caricaturist. Born at Barnstaple, Dec 2, 1844, he was for some 20 years a member of the London Stock Exchange. In 1879 he first illustrated the Christmas number of *Truth*, and in 1887 he contributed cartoons to *The Pall Mall Gazette*. He later became assistant editor and cartoonist of *The Westminster Gazette* for which he did some of his best work. His publications include *Who Killed Cock Robin?* 1897, *Froissart's Modern Chronicles*, 1902-03, and *Picture Politics*, which were periodical collections of his *Westminster* cartoons. He was knighted in 1906, and died Jan 1, 1925. Gould was the most popular caricaturist of his day. His pictures were clever, and without any trace of malice.

Gould Jay. American capitalist. Born at Roxbury, New York, May 27, 1836, he left his father's farm in 1852 to work in an ironmongery store, learning surveying in his spare time. After a short period in the timber trade, he took advantage of the railway panic in 1857 to buy railroad shares, becoming president and manager of the Rut-

land and Washington line. He became a broker in New York in 1859. Acquiring interests in railway lines he obtained control of several, and so amassed a great fortune. In 1881 he formed the Western Union Telegraph system. He died Dec. 2, 1892, his son George Jay Gould (1864-1923), succeeding to his railway and other interests.

Gounod Charles François, French composer. Born in Paris, June 17, 1818, he was admitted to the Conservatoire in 1836, and in 1839 won the Grand Prix de Rome. His first opera *Sappho*, was produced in 1851 and a year later *Ulysse* was played. In 1858 his operatic version of Molière's *Le Médecin Malgré Lui* was performed at the Théâtre Lyrique, and at this theatre his masterpiece, *Faust*, based on Goethe's play, was produced on March 19, 1859. It was followed by numerous others, including *Romeo and Juliet*, 1867. He also composed beautiful church music, masses and oratorios. He died Oct. 18, 1893.

Gouraud Henri Joseph Eugène, French soldier. Born in Paris, Nov. 17, 1867, he entered the army in 1890 and saw service in the Sudan and Morocco. In May, 1915, having until then been at the head of a colonial army corps, he was given command of the French forces in Gallipoli, where he was severely wounded, losing his right arm. In Dec. 1915, and again, 1917-19, he commanded the 4th Army. In 1919 he was appointed High Commissioner in Syria and Commander in Chief in the Levant. In 1922 he became a member of the Supreme Council of War, and in 1924 was appointed Military Governor of Paris.

Gourd Succulent fruit of various trailing herbs (*Cucurbitaceae*) of the pumpkin kind. Mostly of Asian or Mexican origin they were cultivated in antiquity, and are mentioned in the Bible. The most valuable is the S. European globular yellow gourd derived from the genus *Cucurbita maxima* which sometimes reaches 240 lbs. in weight. Other edible forms are the pumpkin and the marrow. Various genera include the snake gourds, bitter gourds or colocynths, winter melons, musk melons and calabashes.

Gourock Burgh and watering place of Renfrewshire. It is 3 m. from Greenock on the S. side of the Firth of Clyde on the L.N.S.R. There is some shipping, and it is a yachting centre. The Gambia Institute is the chief building. Pop. (1931) 8844.

Gout Constitutional disorder. It is manifested by acute inflammation of the smaller joints, especially of the great toe and is characterised by increase of uric acid in the blood and deposition of sodium urate in the joints. It is dominated by a specific but unknown cause, called the gouty diathesis or predisposition and is affected by heredity, inadequate exercise and over indulgence in rich foods and alcohol. It only attacks adults, is commoner in men than in women, and may be acute, chronic or irregular.

Treatment. In an acute attack a bland and opium fomentation should be applied to the affected joint which should then be wrapped in cotton wool and kept at rest in an elevated position. Three grains of colomel followed by a saline aperient should be given and a milk diet adopted with frequent draughts of alkaline mineral water. Wine of colchicum will ease the pain during an attack. In chronic Gout attention should be paid to the

diet and general hygiene, and alcohol should be avoided.

Govan District of Glasgow. It stands on the S. side of the Clyde, opposite the city proper. Its industries are ship building and engineering. There is also some shipping. Elder Park is an open space. Until 1912, when it was included in Glasgow, Govan was a burgh with its own council and a population of about 90,000.

Government System or method of governing, also the persons who form the governing body of a country. Governments were classified by Aristotle according to whether they were directed by the one, the few or the many, there being in good and bad form of each. We may call these monarchy or tyranny, autocracy or oligarchy and democracy there were examples of all in the ancient world, though not perhaps many of democracy. In addition there were governments, the Jewish, for instance, in which the priests played a large part, these being called theocracies. Centuries earlier, as scholars are proving, early man had his forms of government, which were neither so primitive nor so uniform as was at one time supposed.

The Greeks experimented with democracy but for some centuries most of the world's governments were autocracies or oligarchies, the people having little or no voice therein. Under the influence of the Church, the Middle Ages discovered the idea of representative government, and in developing this idea England took the lead. In the course of time representative government became the rule throughout the civilised world, but it was not yet democracy, for the representation was that of only a small class in the community. Government rested, however, as it must always do among intelligent people, on the consent of the governed, though that consent was passive rather than active. The next step was to make those who controlled affairs responsible to the representatives. Here again England took the lead.

The great age of democracy proper began with Rousseau and the ideas of the French Revolution. Gradually it gained ground, and it may be said to have reached its apogee when in the 20th century, women were given the vote in many countries. This made these governments for the first time real democracies, as all adults had a part therein. Government by the people, of the people, for the people was realised. After the Great War two new forms of Government arose, with far reaching and important implications. One was the Soviet Government set up in Russia in 1922 by the Communist Party, and based on the idea of a series of local elective bodies sending delegates to higher bodies, from the village and town Soviets at the base to the All Russian Congress of Soviets at the top. From this Congress is elected the Central Executive Committee which elects the Council of People's Commissars whose Chairman is President of the U.S.S.R.

Diametrically opposed to this form of Government is the dictatorship which has arisen in Italy and Austria under the Fascist regime and in Germany and the Danzig Free State under the Nazi system. Both systems are contrary to all ideas of constitutional government and their effects are so far problematic.

As a term for the men responsible for the affairs of the country, the government means the politicians who occupy the offices of

state These are united by some bond, usually a similarity of political opinions, and at their head is a Premier, or Prime Minister, called in some countries the President of the Council The government may be called after the country, and we hear of the French or Italian Governments, meaning the men in charge, for the time being, of the affairs of that country, or it may be known as a Liberal or Socialist Government, according to the opinions of the men who comprise it, or it may be known by the name of its leader, as the Baldwin or the Briand Government A change of government comes about in various ways, but is usually due to a loss of confidence

Governor Official who governs a colony or dependency in the name of the king or other head of a state In the British Empire, the governors of the self-governing dominions, Australia, Canada, etc., are called Governors-General They represent the king, and like him keep quite outside party politics Other colonies and dependencies, such as Ceylon and Fiji, have governors, and in some, Nigeria for example, there are lieutenant-governors, who under a governor look after a part of a colony The governor also acts usually as Commander-in-Chief The six states of the Australian Commonwealth have each a governor, but the provinces of the Dominion of Canada have lieutenant-governors appointed by the authorities there

France and other countries with colonial possessions send out governors In the United States each state has a governor, who is elected for two or four years, and paid a salary

Governor Appliance on an engine for maintaining a uniform working speed under varying resistance The ball governor introduced by James Watt is the usual type on stationary steam engines, and consists of two balls so attached to a vertical shaft rotated by the engine as to fly outward by their centrifugal force The outward movement of the balls opens the throttle valve, thus reducing the amount of steam pressure

Gowbarrow Hill or fell near Ullswater in the Lake District It is on the N side of the lake and on it is Gowbarrow Park, which, in 1906, was bought by the National Trust The fell is 1580 ft high

Gower District of Glamorganshire It forms a distinct part of the county, being almost surrounded by the Bristol Channel It is 15 m long and about 6 broad, and has Mumbles Head at one end and Worms Head at the other Swansea and Oystermouth are the chief towns Gower, or Gwyr, is famous for its romantic scenery and its castles These were built by the Normans, who conquered the district in the 12th century For long it had its own earl and sheriff, and was English rather than Welsh In 1535 it was made part of Glamorganshire

Gower John English poet Apart from the allusions to his sober and moral character made by his friend, Chaucer, little is known of his life He was born about 1326, dwelt mostly in Kent, went blind shortly before his death in 1408, and was buried in St Saviour's, Southwark His three works are *Speculum Meditantis*, in French, *Vox Clamantis*, in Latin, which

tells of Wat Tyler's rebellion, and *Confessio Amantis*, in English, a collection of tales

Gowrie Earl of Scottish title borne from 1581 to 1600, by the family of Ruthven The 1st earl, William, 4th Lord Ruthven, was executed for treason in 1584, being succeeded by his son William, who died in 1588 His brother John, 3rd and last Earl of Gowrie, was concerned in the mysterious Gowrie Conspiracy This occurred in Gowrie House, Perth, Aug 5, 1600 According to James VI, he was enticed there by Alexander Ruthven, brother to the earl, and by him led to a secluded wing, his life being then threatened The king's followers arriving, Alexander was killed, and so was the Earl of Gowrie, who now appeared

Goya Y Lucientes Francisco José do Spanish painter Born of peasant stock in a village of Aragon in 1746, he went to Saragossa to study art His lawlessness made a flight to Madrid necessary, and thence he went to Italy Returning to Madrid in 1775, he designed many tapestries for the royal tapestry factory at Santa Barbara, and was commissioned by the king to paint frescoes He became court painter, and painted portraits of four of the Spanish sovereigns, as well as numerous members of the court It is in his portraits that Goya's genius is best revealed He also produced remarkably fine etchings He died at Bordeaux, April 16, 1828

Gozo Island in the Mediterranean Sea Belonging to Great Britain, it is 8 m long and covers 26 sq m It is 4 m from Malta, from which it is governed The chief towns are Victoria and Fort Chambray Pop 20,000

Gracchus Name of three famous Romans Tiberius Sempronius Gracchus, Governor of a province of Roman Spain, and twice consul in the 2nd century B.C., married Cornelia, daughter of Scipio Africanus They had two sons, and Cornelia's devotion to them, together with her high character, have made her one of the most renowned of Roman matrons The elder son, named like his father, having been elected tribune in 133 B.C., tried to secure some part of the public lands for the poor His proposals led to serious trouble, and during some fighting he was killed In 123 his younger brother, Gaius Sempronius Gracchus, was elected tribune and took up the same cause only to meet with the same fate as his brother His death took place in 121 B.C.

Grace Favour of one kind or another In this sense a grace is the opposite of a right Days of grace are days, usually three, allowed for the payment of bills of exchange beyond the specified time Permission to take a degree at the older universities is called a grace An archbishop and a duke are addressed as your grace

Another kind of grace is the thanksgiving said before and after meals, it is said in schools and college halls, and sometimes at public dinners Many forms of grace are in Latin, this being the case at Oxford and Cambridge and at the older public schools Popular short graces are *Benedictus benedict* (May the Blessed bless), and *Benedictio benedicatur* (May the blessed be blessed)

In theology, grace is the term used for the favour shown by God to mankind Its essence is that it is undeserved Man has sinned,

but salvation is possible, not through his own merits, but by the grace or favour of God. It is expressed in the famous saying attributed to Bunyan when he saw a criminal going to execution: "There, but for the grace of God goes John Bunyan."

In mythology three goddesses (Aglala, brightness Euphrosyne, joyfulness, and Thalia, bloom), daughters of Zeus, were called the graces.

Grace William Gilbert English cricketer Born at Downend Gloucestershire, July 18, 1848 he was the son of a doctor and himself entered that profession. In 1863 he began to play in first-class cricket matches and in 1870 he joined the Gloucestershire team. He remained a member of it, for much of the time as its captain, until 1899. He then became manager of the London County Cricket Club, continuing to play cricket almost until his death, Oct 23, 1915.

Great as batsman, bowler and fieldman, Grace played cricket for 50 years, and for over 30 was a leading figure in first-class cricket, in which his exploits won for him the title of champion. Some of his feats have been surpassed by others, but when all is taken into account, he remains the greatest cricketer who ever lived. In first class cricket he scored over 50,000 runs and took over 2800 wickets. In 1871 he scored 2739 runs in the season and in 1895 he scored 2346. His highest score was 344. In addition to being captain of Gloucestershire, he captained England in a number of test matches against Australia and was for long the recognised leader of the Gentlemen in their matches against the Players, one such occasion being on his 50th birthday. In 1891-92 he captained the team that went to Australia.

Grace's knowledge of the game was unrivalled. For years his massive figure and black beard dominated every cricket field on which he played whilst his name was familiar in every quarter of the land. To mark his services *The Daily Telegraph*, in 1896, raised a shilling fund for him. Grace wrote a book on cricket. Two of his brothers, Henry Mills Grace and George Frederick Grace, were also noted cricketers.

Gradient Term applied to the degree of slope on a road or railway. As a steep rise affects the hauling power of an engine the gradient on most railroads seldom rises above 1 in 80.

The term is applied also to the difference in barometric pressure between two places at a distance from one another the gradient being measured by $\frac{1}{25}$ ths of an inch difference between the barometer readings at a distance of 15 nautical miles.

Grading Method of marking and arranging agricultural produce so as to show its quality. In 1928 a national scheme of grading was introduced into Great Britain. It is used for apples, eggs, potatoes and other foodstuffs. At certain places there are stations for grading the fruits and vegetable.

Graeco-Persian Wars. See GREEK THERMOPYLAE MARATHON SALAMIS.

Grafting In gardening the removal of a bud or branch (scion) to the stem (stock) of a more vigorous tree. By this method the graft or scion becomes invigorated by its union with the stock thus resulting in earlier and increased production of flowers and fruits.

Different methods are followed, such as tongue wedge, saddle and cleft grafting. In tongue grafting a wedge shaped opening is made in the stock, and the scion is cut to fit it and embedded firmly. The graft is protected by wax or clay until a union of the tissues is effected.

Grafting is also used in surgery. A piece of skin or bone is grafted on to another piece in order to engraft a wound or for some other curative purpose.

Grafton City and river port of New South Wales. It stands near the mouth of the River Clarence, 310 m from Sydney and 45 from the sea. There is a trade in the produce of the surrounding district. shipping is carried on and there are sugar mills. Pop with South Grafton (1931), 6,560.

Grafton Duke of English title borne by the family of Fitzroy since 1675. Henry Fitzroy, son of Charles II., and Barbara Villiers, Duchess of Cleveland, was made Duke of Grafton in 1675. Lord High Constable under James II, he transferred his allegiance to William III, and died fighting for him in Cork in 1690. Augustus Henry, the 3rd duke (1735-1811), was a prominent statesman of his time. A supporter of Chatham he was 1st Lord of the Treasury and nominally Prime Minister in 1760-67 and Lord Privy Seal in 1771-75 and 1782-83. The 7th duke, a general, who fought at Inkerman, died in 1918, and was succeeded by his son. His eldest son is known as Viscount Ipswich and the family seat is Easton Hall, Thetford.

The Grafton Gallery is a picture gallery in Grafton Street Piccadilly, London W, where exhibitions are held from time to time.

Graham Sir James Robert George Eng. Irish politician. Born June 1, 1792, at Netherby he was educated at Westminster School and Oxford. He received a training in diplomacy when in 1813 he acted as private secretary to the British minister in Sicily. In 1818 he entered the House of Commons as a Whig and after an absence returned to it in 1826. In 1824 he succeeded to the family baronetcy. In 1830 Sir Robert was made First Lord of the Admiralty, but he resigned in 1834. From 1841-46, he was Home Secretary in the ministry of Sir Robert Peel. He succeeded Peel as leader of his party in 1850, and from 1852-55 was again 1st Lord of the Admiralty. He died Oct 25 1861.

Graham Peter Scottish painter. Born in Edinburgh in 1836, he studied art and soon began to exhibit. In 1860 he settled in London. He was elected R.A. in 1881 and died Oct 19, 1921. Graham is known for his pictures of scenery in the Scottish Highlands and especially for his cattle. "A Rainy Day" is in the Tate Gallery London.

Graham Stephen English writer. Born in 1884, he spent many of his early years in Russia living among the peasants. He also travelled over a large part of Europe and Asia. As a writer he made his name with his books on Russia notably *A Yagabond in the Caucasus* and *Changing Russia*. Having been also in America and Africa, Graham joined the Scots Guards, and served in France in 1917-18, recounting his experience in *A Private in the Guards*. After the war he returned to his wandering life, and as a result wrote, among other books,

Children of the Slaves, Russia in Division, The Gentle Art of Tramping, The Death of Yesterday (1930), and *Boris Godunov* (1933)

Graham William British politician Born at Peebles, July 29, 1887 he was for a time in the civil service In 1913 he was elected to the city Council of Edinburgh and, having become a figure in the Labour movement, he entered the House of Commons as MP for Central Edinburgh in 1918 He was Financial Secretary to the Treasury in 1924, and from 1929 to 1931 was President of the Board of Trade In Aug 1931, he resigned office and was chosen deputy leader of the Labour Party in Parliament, but lost his seat at the general election in Oct His writings include *The Wages of Labour* He died Jan. 8, 1932

Grahame-White Claude British aviator and aeronautical engineer Born Aug 21, 1879, he was educated at Bedford Grammar School Starting in business as a motor engineer, he soon turned to aviation, becoming the first Englishman to be granted an aviation certificate In 1909 he started an aviation school in Paris, and the next year won the Gordon Bennett Cup He established the Grahame-White Aviation Company which owned Hendon Aerodrome, and during the Great War built aeroplanes for the government He wrote *The Story of the Aeroplane*, 1911, and other works on the same subject

Graham's Land British Island in the Antarctic Ocean It lies S of Tierra del Fuego and N of Alexander I Land, and is a dependency of the Falkland Islands It was discovered in 1832, but not until 1928 was it found to be an island On it the Argentine Government has built a meteorological station

Grahamstown City of the Cape Province, S Africa In the E of the Province, it is the capital of the Albany district, and is 40 m from the sea at Port Alfred Grahamstown possesses Rhodes University College and S Andrew's College, one of the leading public schools in the country There is a trade in wool and other produce Eur pop (1931), 7592

Grail Word for a vessel or a cup The Holy Grail is the vessel out of which Jesus Christ drank at the Last Supper Many legends have grown up around it One is that Joseph of Arimathea used it to collect the blood from the wounds of Christ, and later carried it to England Romances were written about the Grail, notable ones being by Chrétien de Troves and Robert de Borron The Grail figures largely in the Arthurian legends In Malory's *Morte d'Arthur* a sight of the Grail is the reward of the stainless knight, and the knights go off in pursuit of it Tennyson follows out the idea, and for a moment Galahad sees the Grail It also figures largely in Wagner's *Parsifal*

Grain Unit of weight It is supposed to be the weight of a grain of corn as it comes from the middle of a ripe ear 7000 grains make a lb avoirdupois, 5760 grains make a lb Troy and 24 grains make a pennyweight.

Grain Cereals grown for food. There are five principal grains, wheat, maize, barley, oats and rye The dealers in them are known as the grain market, its centre being Chicago, but much grain is dealt with in Liverpool. To store it immense elevators have

been erected, chiefly at the ports In 1932 the world's grain crop was estimated at 1,915,000,000 quarters See WHEAT

Graining Art of producing a grain, pattern or fibrous surface upon a material In painting it refers to the imitation of the natural grain and colour of one wood upon another In leather-work the term is applied to the treatment of skins to imitate morocco and other leathers, in paper making to the embossing of papers to resemble leather and in bookbinding to the production of a pattern on calf bindings.

Grammar Science of the right use of language, or a book which teaches it. Each language has its own grammar, which teaches the right use of words in relation to one another

In England, schools for boys, set up at the time of the revival of learning, especially during the time of Edward VI, were called grammar schools, because Latin grammar was taught therein Many of them e.g., Leeds Grammar School and Bodford Grammar School, still retain this name

Gramont Philibert de French courtier Born in 1621, he joined the army and served with distinction in Flanders and Spain For an intrigue with a mistress of Louis XIV he was exiled to England, 1662-64, where he attended the court of Charles II, and where he married Elizabeth Hamilton. He several times revisited England on diplomatic missions, and died in Paris, Jan 10, 1707 In 1713, what purported to be his dictated *Memoirs* were published Really written by his brother-in-law, Anthony Hamilton, they give a lively and vivid picture of the time

Gramme Metric unit of weight It is equivalent to approximately 15 432 grains and is equal in weight to one thousandth of a litre of distilled water See METRIC SYSTEM.

Gramophone Machine for recording sound It is constructed on the same principle as the phonograph invented by T A Edison in 1876, but has a recording disk instead of a cylinder, the sound record being cut in the form of a spiral groove on the disk The record is mounted on a spindle which is rotated by means of a clockwork mechanism wound by hand or by an electric motor, the movement being controlled by a governor The reproducer holding the sensitive diaphragm and needle is attached to a movable tubular arm which readily swings round to follow the course of the needle upon the record In recent models the old sound box, tone arm and horn have been replaced by an electro-magnetic system of reproduction, with valve amplification as in wireless

The manufacture of gramophones and records is a large industry, the word "gramophone" itself being a protected trade name

Grampians Mountain range of Scotland. It stretches across the country from Aberdeenshire to Dumfrieshire and Argyllshire, and forms a natural boundary between the N and the S The highest point is Ben Nevis, but there are others over 4000 ft high and many over 3000 ft. Among these are Ben Macduill, Ben Cruachan, Ben Lawers, Ben Lomond, Cairngorm, Cairntoul and Ben Alder From the range, many rivers flow to the north and south.

A mountain range in Victoria, Australia, is called the **Gramplains**. It lies in the west of the state, and has Mount William as its highest point.

Grampus Cetacean of the dolphin family (orca gladiator). Ranging from Greenland to the Antarctic, it sometimes attains a length of 21 ft., is black above and white beneath, with rounded flippers and formidable teeth. *Florce* and voracious it is called the killer. It swallows live porpoises, seals and small dolphins, and packs of them hunt fully grown whales.

Granada City of Spain. The capital of the province of the same name, it is 63 m from Malaga and is famous as an old Moorish stronghold. Near it is the Alhambra (q.v.). The chief buildings are the cathedral with a chapel in which Ferdinand and Isabella are buried, the university buildings and some picturesque remains of Moorish days, including parts of the city walls. The city has some manufactures and does a considerable trade. Its golden age was for some centuries before 1492, when it was the capital of the Moorish kingdom of the same name. Pop (1931) 118,905.

A city of Nicaragua is called **Granada**. It stands on the Nicaragua, 28 m from Managua, 18,066.

Granada Moorish kingdom in Spain. It grew up around the city of Granada, and having been part of the district ruled by the caliphs of Cordova became independent about 1238. It remained with its own rulers for about 200 years. The land was conquered by the Spaniards and in 1492 the last king of Granada, Boabdil, gave up his throne and went into exile. The kingdom was in the extreme south of the country, in the district now called Andalusia. It included Malaga as well as Granada.

Granby Marquess of. Title borne by the eldest son of the Duke of Rutland. The most famous holder was John Manners, the eldest son of the 3rd duke. Born Aug. 2, 1721, he was educated at Eton and Cambridge and assisted in the suppression of the Jacobite rebellion in 1745. In command of the British forces in Germany during the Seven Years War 1759, he did brilliant work in several battles including Warburg in 1760. In 1766 he became Commander in Chief of the British Army. He had a seat in parliament from 1741 until his death, Oct. 18, 1770.

Grand Sarah English novelist whose real name was Frances Fitzhugh M'Fall. A daughter of a naval officer, Edward Clarke, she married at the age of 16 an army surgeon named M'Fall who became a colonel in the R.A.M.C. Her first novel was *Ideala*, but the most famous was *The Heavenly Twins*, 1893, which made somewhat of a sensation in its day. Later she wrote *The Beth Book*, *The Winged Victory*, *Adam's Orchard* and *Variety*. Madeline Grand took some part in the movement for women's rights, and in the municipal affairs of Bath, of which city she was mayor in 1923 and 1925-29.

Grand Alliance War of the Known also as the war of the League of Augsburg. It was the third of the wars waged by Louis XIV against Spain, the Empire, Great Britain and Holland. In 1688 Louis sent his troops into Germany more as a diplomatic threat than for war, and they plundered the country round Augs- burg. The

League of Augsburg took up the challenge and, converted into the "Grand Alliance" by the addition of new members in 1689, waged war against Louis.

The war was fought on the Rhine, in the Low Countries, in Ireland and on the sea. The outstanding personalities were Luxembourg, William of Orange, Vauban and Catinau. The chief occurrences were the Siege of Limerick (1690), Fleury (1690), Staffarda in Piedmont (1690) and the Siege of Namur (1692), and in 1693 were Neerwinden and Marsaglia. At sea the Battle of La Hogue was won by Admiral Rooke in 1691.

Grand Bank Part of the N Atlantic Ocean. It lies off Newfoundland and covers about 500,000 sq m. The bank is really a ridge or elevation of the ocean bed, its greatest depth being only 160 fathoms. It is noted for the cod which abound here.

Grand Canal Name given to several canals. The most notable is the one which forms the chief highway of Venice. It runs right through the city with palaces on its banks. Another Grand Canal is in China. This goes from Hangchow to Tientsin a distance of 850 m. The Yangtze-Kiang divides it into two parts, the section between the Yangtze Kiang and the Yellow River was cut, perhaps as early as 600 B.C. The last part dates from about 1280.

The Grand Canal of the Irish Free State goes from Dublin to Ballinasloe. It is 80 m long and has branches which add another 65 m to its length.

Grand Canyon See CANYON, COLORADO, ARIZONA.

Grand Duke European title. It first appeared in 1507 when Pius V made the Duke of Tuscany a grand duke. This title was kept by his successors until 1859. In 1815 several of the German rulers were given this title, and from that time until 1918 it was borne by the rulers of Hesse, Baden, Oldenburg and Mecklenburg. It was also the title borne by members of the imperial family of Russia. To-day the only bearer of the title is the ruler of Luxemburg, who is the grand duchess.

Grand Falls Town of Newfoundland. It stands on the Exploits River, about 20 m from its mouth. A railway connects it with Botwood, its port. It takes its name from falls in the river, which provide power for the large paper mills to which the town owes its existence. Pop 3800.

Another Grand Falls is in Labrador. This is a waterfall, one of the finest in the world, on the Hamilton or Grand River, over 300 ft high.

A third Grand Falls is on the St John river in New Brunswick. Here 200 m from St John is a small town called Grand Falls or Colchrooke. Pop (1931) 1556.

Grand Fleet Name given to Great Britain's main naval force in the World War. It consisted of about 400 ships there being several squadrons of battleships with their attendant cruisers, destroyers and submarines. It was based at Scapa Flow, Invergordon and Rosyth and made periodical sweeps through the North Sea. It fought only one action, Jutland, but its presence on the seas had a great influence on the course of the war. It was commanded at first by Sir John (later Earl)

Jollicoe, and after Nov., 1916, by Sir David (later Earl) Beattie.

Grand Jury Superior kind of jury between 12 and 23, and its duties are, at the opening of the assizes, to see if there is adequate reason for sending the cases for trial. Except for the indictment of certain specified offences, before Grand Juries of London and Middlesex grand juries were abolished in 1933.

Grand National English steeplechase. It takes place in March or April at Aintree, near Liverpool, and is one of the sporting events of the year. The course is about $\frac{1}{4}$ m long and there are something like 30 jumps. The race has been run regularly, except during 1916-18, since 1839.

Grand Pré Village of Nova Scotia. It is 46 m from Halifax and is associated with the expulsion of the Acadians by the British in 1755. This is the subject of Longfellow's poem *Evangeline*.

Grand Prix International horse race, run in summer at Longchamps, France. The course is 1 mile, 7 furlongs in length, and the stakes are 250,000 francs, the largest in Europe. This race was won three years in succession by English owners, from 1919-21, and again in 1928 by Lord Derby's horse, "Crl de Guerre".

Grand Rapids City of Michigan. It stands on the Grand River, and is an important railway centre. There are some manufactures and a trade in fruit and grain. Pop 168,592.

Grand Union Canal Canal system in England. It was formed in 1928 when the Grand Junction Canal was united with the Regent and other canals. In 1931 the Leicester and Loughborough navigation and the Erewash Canal were acquired. The system thus provides water communication between the Thames and the Trent, and includes nearly all the canals between these two rivers.

Grange-over-Sands Watering place and urban district of Lancashire. It is situated on Morecambe Bay, 245 $\frac{1}{2}$ m from London by the LMS Rly. Pop (1931) 2648.

Grangemouth Burgh and seaport of Stirlingshire. It stands on the S side of the Firth of Forth, at the terminus of the Forth and Clyde Canal, and is served by both the LMS and LNE Rlys. There are large docks, and its trade is chiefly in coal, iron ore and oil. Pop (1931) 11,798.

Granger James English writer and print collector. Born in Dorset in 1723, he studied at Christ Church, Oxford, and became Vicar of Shipplake in Oxfordshire. His best work is *The Biographical History of England, from Egbert the Great to the Revolution, 1769*. This was lavishly illustrated with portraits that he had collected from other sources, hence the term grangerising. He died April 4, 1776.

Granite Igneous rock of a crystalline and granular character. It is composed typically of quartz, felspar and mica, the latter mineral being in some granites replaced by hornblende. Minute quantities of other minerals such as zircon, apatite and rutile are usually present. Granites vary greatly in texture and colour, and

are used largely as building stones and for paving, etc. They form large intrusive masses generally near the centres of mountain ranges, and occur in Cornwall, Devon, Wales and Aberdeenshire.

Grant James Scottish novelist. Born in Edinburgh, Aug. 1, 1822, he served as ensign in the army, 1840 to 1843, when he resigned and entered an architect's office. He soon, however, devoted himself to literary work, producing his first novel, *The Romance of War*, in 1845. *Adventures of an Aide-de-Camp*, *The Yellow Frigate*, and *Playing with Fire* were others among his 56 novels. He also wrote historical works, including *Old and New Edinburgh* and *Scottish Soldiers of Fortune*. He died in London, May 5, 1887.

Grant Ulysses Simpson American soldier and statesman. Born in Ohio, April 27, 1822, the son of a farmer, he was educated for the army at West Point. He served in the war against Mexico, 1845-48, but left the army in 1854 and became a farmer. He rejoined on the outbreak of the Civil War, and soon came to the front. Given a command, he took Fort Henry and Fort Donelson, and in 1862 fought the Battle of Shiloh. At the head of an army he took Vicksburg, after a long resistance won the Battle of Chattanooga and gained other victories. In 1864 he was appointed Commander-in-Chief, and the duel between him and Lee was the concluding stage of the struggle. Helped by superior resources, Grant was able to wear down his opponent and in April 1865 Lee surrendered.

In 1868 Grant, as a republican, was elected president, and in 1872 he was again chosen. His terms of office saw the settlement of the Alabama dispute with Great Britain. He retired from public life in 1876 but lived until July 23, 1885. In 1884 he lost his money through a banking failure, so earned something by writing his *Personal Memoirs*. Grant's tomb, overlooking the Hudson, is a prominent New York landmark.

Grantchester Village of Cambridgeshire. It stands on the Cam, once called the Granta, 2 $\frac{1}{2}$ m from Cambridge. Before its old mill was burned down in 1928, it was a very picturesque place. It owes some of its fame to Rupert Brooke's references to it.

Grantham Borough and market town of Lincolnshire. It stands on the Witham, 25 m from Lincoln and 105 m from London. It is a junction on the LNE Rly, and is connected by canal with Nottingham and elsewhere. The chief building is St Wulfstan's Church, a large edifice with a fine spire. The Angel Inn was once the property of the Knights Templars. There is a market cross in the market place. The principal industries are engineering works and the making of agricultural implements. Grantham has associations with Sir Isaac Newton. Pop (1931) 19,709.

Grant Land District in the Arctic Circle. It belongs to Great Britain and forms the N part of Ellesmere Island. It was discovered in 1875.

Granton Seaport of Midlothian. It is part of the city of Edinburgh, and is situated on the Firth of Forth. There is trade in coal, timber and grain. The harbour is used by the North Sea fishing fleet.

Grantown Market town of Moray, or Elginshire. It is on the

Spey, 23 m from Forres, on the LMS Rly It is the chief town of the district called Strath spey, and owing to its beautiful scenery is a holiday and health resort. Near is Castle Grant, the seat of the Countess of Seafield

Granville-Barker Harley Granville English dramatist Born in London, Nov 25, 1877 he took up the profession of actor, but turned to writing plays his first *The Marrying of Anne Leele*, being produced in 1901 This was followed by *The Voysey Inheritance*, 1905 *Waste*, 1907 and *The Madras House*, 1910, etc He has also written plays in collaboration with other authors, e.g., Laurence Housman Bert Thomas and Dion Clayton Calthrop His non dramatic works include *A National Theatre* (with William Archer), 1907, and *The Red Cross in France*, 1916 For a time in 1907 he was a successful manager of the Savoy Theatre with J E Vedrenne, with whom he had earlier in 1904, managed the Court Theatre His wife Helen was the authoress of *Come Julia* (1931), and, in collaboration with her husband, wrote several plays and translated plays from the Spanish

Granville Earl See CARTERET, JOHN

Granville Earl English title borne since 1833 by the family of Lovesson Gower The 1st earl was Lord Granville Lovesson-Gower (1773-1846) a son of the Marquess of Stafford He was ambassador in St Petersburg and Paris The title is still held by his descendants The family seat is Stone Hall, Stafford

The 2nd earl, Granville George Lovesson-Gower, was born May 11, 1816 and was educated at Eton and Christ Church Oxford He entered the House of Commons in 1836, and in 1846 succeeded to the earldom For the next 35 years he was a leader of the Liberal party, which he led in the House of Lords from 1855 until his death In 1851 he was Foreign Minister and in 1853 Lord President of the Council He was again Lord President 1855-58 and 1859-66 Under Gladstone he was Colonial Secretary 1868-70 Foreign Secretary 1870-74 and 1880-85 and Colonial Secretary, 1886 Granville died March 31, 1891

Grape Fruit of various shrubs of the vine family The grape vine (*Vitis vinifera*) indigenous to the Mediterranean region has been cultivated throughout historic times for its clustered, edible berries There are 1500 varieties most of them grown for wine making Some are seedless, e.g. sultanae They are raised under glass in Britain and in the open in Europe especially France, Italy, Africa, Australia, Canada, Argentina and the United States Several native American vines are cultivated e.g. *V. labrusca* some have been introduced into France See VINE, WINE

Grape Fruit Fruit of an evergreen tree (*Citrus decumana*), also called the shaddock It has oval leaves and white flowers and bears fruit like a large yellow orange It is cultivated in California and parts of Asia and has become very popular on the dinner table where its slightly acid taste makes it a pleasant opening to the meal

Graph Diagram or chart used to interpret formulae and statements in science and commerce In mathematics the use of graphs is of value in solving problems in engineering and statistics the graphical method

has long been employed During recent years graphs have been introduced for expressing related facts in commerce such as the rise and fall of sales or of exports The ordinary weather chart showing the variations in atmospheric pressure is a form of graph

Graphite Form of carbon It occurs as a soft, black mineral, greasy to the touch with a metallic lustre, and it usually contains iron oxide and other impurities Known also as plumbago or black-lead it is used as a lubricant, for stove polish and for making pencils and crucibles Graphite occurs in veins or cavities in schistose slaty and igneous rocks in Cumberland, Ceylon, Madagascar and Canada Synthetic graphite from coal or coke is now in use for the lubrication of machinery

Grapple Small anchor It has four or five claws or flukes and is used to hold small boats or vessels It is also called a grappling iron

Grapple Plant Flowering herb of the natural order Pedalinee It grows in South Africa and bears purple flowers The fruit has on it strong hooks which cling to the skin of animals, thus giving the plant its name Great pain is caused if the fruit gets entangled in the mouth of the animal

Grasmere Lake and urban district of Westmorland The lake, which is about a mile long, is situated amid beautiful scenery in the middle of the Lake District Grasmere stands on the Rothay where it enters the lake and is 4 m from Ambleside and 12 from Keswick It is reached by road from either The chief building is St Oswald's Church, with the tomb of Wordsworth in the churchyard Dove Cottage, where he lived is near A rush gathering festival is held here every summer, and the sports in August attract many visitors Pop (1931) 988

Grass In its widest sense all plants belonging to the natural order gramineae It thus includes wheat and other cereals More usually, however, it is confined to the herbage that grows in fields and on open spaces and farmers distinguish between grassland which is used for pasture, and arable which is sown with wheat and other crops They also distinguish between permanent and temporary grassland the latter is sown with grass seed and after a year or so when hay has been produced, is ploughed up again For this purpose the kinds of grass which grow quickly are sown Nurseries supply a special seed for garden and other lawns for they require a much finer grass than the ordinary field variety

In Great Britain in 1932 about 17,448,000 acres were under grass, apart from what are called rough grazings on hillsides (16,761,000) Of this some 6,645,000 acres were sown with grass for hay making

Grasshopper Name of various straight-winged insects whose hindmost legs are adapted for leaping In the long horned or green grasshopper the chirp of the male is made by friction of the wings In the green or brown short-horned family which includes the locust, the chirp is produced by rubbing the hind legs against the wings. See CRICKET, LOCUST

Grass of Parnassus Genus of perennial herbs of the saxifrage order The British species (*Parnassia palustris*) is distributed all

over Europe, Asia and North America. Its several solitary white flowers contain a circle of scales fringed with a comb of yellow, knotted hairs.

Grass Snake Snake of a non-venomous kind, found in Europe and occasionally in Great Britain, especially in the south. In colour it is olive-brown greyish brown beneath, with light and then dark neckbands, hence it is sometimes called the ring snake. It averages 3 or 4 ft. in length and lives on frogs and fish.

Gratian Roman emperor. A son of Valentinian I, he was born in A.D. 359 and in 367 was given a share of the imperial authority. In 375, on his father's death, he and his infant brother, Valentinian II, became joint rulers of the Western Empire. During this reign the Goths were very dangerous, winning their great victory at Adrianople in 378. In 383 Gratian was defeated in battle by a rival, Maximus, after which he was killed by his own soldiers.

Another Gratian, Francis Gratian, was a mediaeval priest. He lived between about 1090 and 1150, and was, for the most of that time, a Benedictine monk. He collected the canons of the church into a work called *Decretum Gratiani* and is therefore regarded as the founder of canon law.

Grattan Henry Irish statesman and orator. Born in Dublin, July 3, 1746, he was educated at Trinity College, Dublin, and became a barrister. In 1775 he entered the Irish House of Commons as M.P. for Charlemont and soon came to the front as an orator. He had much to do with securing legislative independence for Ireland in 1782 and urged the cause of Ireland in other directions. In 1805 he was elected M.P. for Malton and sat in the English Parliament until his death in London, June 6, 1820. He was buried in Westminster Abbey.

Grave Place of burial. In England most persons are buried in cemeteries, where a piece of ground is bought for the purpose. Some, however, are buried in churchyards, where a parishioner has a right to be buried if the churchyard is still open. Many graves dating from prehistoric times have been found and examined, and from them much valuable information has been obtained about the manners and customs of early man.

To look after the graves of the soldiers who fell in the Great War a commission has been set up. This has offices at 82 Baker St., London, W.1, and is responsible for about 600,000 graves in France, Mesopotamia, Gallipoli and other theatres of war. These are in 1690 cemeteries and, as far as possible, a record is kept of each man buried there. The graves have uniform headstones.

Gravel Deposits of small rock fragments. They occur in river valleys, or on the seashore, usually mixed with more or less sand or clay. The pebbles vary very much in size, angularity and composition. When composed of small angular fragments, a gravel is termed a grit, and this may pass into a coarse, sharp sand. Gravels are worked in the Thames and Trent valleys and at Doncaster, for making concrete aggregates, paving and rough-casting walls.

Gravelines Scaup of France. It stands on the little river Aa, about 1 m. from its mouth, and is 15 m. from Dunkirk and 13 from Calais. There is a

large harbour from which timber and coal are shipped. Pop 2000.

Just outside Gravelines a battle was fought between the English and Spanish on the one side, and the French on the other, on July 13 1553, in which the French were routed.

Gravelotte Village of France. It is in Lorraine, about 6 m. from Metz, and famous because of the battle fought here between the French and the Germans, Aug. 6, 1870. The Germans, 150,000 strong, attacked a French army of 100,000 men under Bazaine, and, after some hard fighting, forced them to take refuge in the fortress of Metz. The Germans had over 20,000 men killed and wounded. The French lost about 13,000.

Graves Alfred Perceval Irish poet. Born in Dublin, July 22, 1846, son of Charles Graves, Bishop of Limerick, he was educated at Trinity College, Dublin. In 1869 he entered the civil service and was an inspector of schools from 1875 to 1910. He helped to found the Irish Literary Society, of which he was twice president, and did much to promote the revival of interest in folk songs and music. His many works include *Songs of Old Ireland*, *Irish Songs and Ballads*, *Songs of Irish Wit and Humour*, *Songs of Erin*, *Welsh Poetry Old and New* and *To Return to All That* an autobiography. He wrote the popular song "Father O'Flynn." He died Dec. 26, 1931, two days after completing the MS. of a book for children on *The Lives of British and Irish Saints*.

Graves had four sons who were known as writers. Philip Perceval Graves became a member of the staff of *The Times*, which he represented at Constantinople. Robert Ranke Graves served in the Great War and became Professor of English in Cairo in 1926. He wrote several volumes of poems and an autobiography, *Good-bye to All That*, 1929. Charles Graves became a journalist and published *The Argentine and the Greek*. John Graves published *The Boys' Book of Football* in 1931.

Charles Lacom Graves, a brother of Alfred Graves, was assistant editor of *The Spectator*, 1899-1917. In 1902 he joined the staff of *Punch*, for which he wrote a great deal, including *Punch's History of Modern England*. He also wrote *Wisdom While You Wait*, *Hustled History* and other books with E. V. Lucas, as well as the *Life of Sir Hubert Parry* and *New Times and Old Rhymes*.

Gravesend River port, market town and urban district of Kent. It stands on the south side of the Thames, 24 m. from London and is reached by the Southern Rly. A ferry connects it with Tilbury, north of the river. Shipping is the principal industry and the port is an important pilot centre. Here are paper mills and printing works. Gravesend is also a yachting centre. Pop (1931) 35,490.

Gravitation Law relating to the attractive force between material bodies. It was defined by Newton in the statement that every body attracts or tends to approach every other body with a force proportional to the masses and inversely as the square of the distance. This applies equally to the planets as to the smallest particle of matter. As an outcome of gravitation we have weight as a property of matter, giving the tendency of a body to fall towards the earth. Gravitation also accounts for the orbital move-

ments of the planets round the sun and the movements of satellites round the planets

Gray Thomas English poet. Born in London Dec 26 1716, he was educated at Eton and Cambridge meeting at Eton Horace Walpole with whom he toured the Continent 1739-41. On his return he settled in Cambridge becoming in 1768 Professor of Modern History. His output of poetry was small, but of a very high standard and marked with a depth of feeling uncommon in his age. His first poem *Ode to Spring* appeared in 1742. In 1750 came his most famous *Elegy Written in a Country Churchyard*. He also wrote *Progress of Poesy*, *The Bard*, *The Fatal Sisters* and *The Descent of Odin*. In 1757 he was offered, and refused, the laureateship. He died July 30, 1771. He was buried at Stoke Poges.

Grayling Genus of freshwater fishes (*Thymallus*) of the salmon family. It is a small mouthed large scaled fish and its enlarged dorsal fin has from 20 to 24 rays. The beautifully iridescent *T. vulgaris* which frequents clear English streams has been introduced into Scotland. It rarely attains 4 lbs in weight and spawns in spring time. March to June is the close season.

Grays Urban district of Essex, in full Grays Thurrock. It is 20 m from London and stands on the Thames. Bricks and cement are made here. Pop. (1931) 18,172.

Gray's Inn One of the four Inns of court in London. The buildings are in the angle formed by Holborn and Gray's Inn Road. The finest of these are the hall, erected in the time of Elizabeth and the chapel. The library has a valuable collection of books and manuscripts and consists of the old library and a new one opened in 1929. Behind the two squares are gardens covering 30 acres which were laid out by Francis Bacon. The name comes from the fact that the land belonged to Lord Gray de Wilton, who had a house here. In 1733 the Honourable Society of Gray's Inn acquired it and it has since been closely associated with the practice of the law. The sign of the Inn is a griffin.

Graz City of Austria. It stands on the River Mur 90 m from Vienna and is the chief town of the district of Styria. There is a university and overlooking the city is the citadel. It is a manufacturing centre and has a broadcasting station (252.1 M, 7 kW). Pop. 152,700.

Great Barrier Reef Coral reef off the coast of Australia. It is 1200 m long and covers 100,000 sq m, and it serves to protect the coast of Queensland. Between the reef and the mainland is a channel in some places 10 m wide, in which are numerous islands. There are a number of sea passages through the reef which was crossed by Captain Cook.

Great Bear Lake and river of Canada. Both are in the North West Territories within the Arctic Circle. The lake has a length of 176 m and covers 11,200 sq m. The river flows from the lake to the Mackenzie River about 100 m away. The Great Bear is also a constellation in the Northern Hemisphere. It is also known as the Plough or more correctly, Ursa Major.

Great Britain Name in general use for the island that contains England, Wales and Scotland. It is thus the larger part of the United Kingdom

of Great Britain and Northern Ireland, and the headquarters of the British Empire. It was used to distinguish this island from Brittany or little Britain and was first used officially in 1603 when James I called himself King of Great Britain. See ENGLAND, SCOTLAND, WALES.

Great Dane Breed of dog. Classified as a German Bear hound and probably containing greyhound blood. It is the largest European mastiff, and stands about 30 in high weighing from 120 to 170 lb. Gracefully built it carries the head high and is crop eared, long tailed and sleek coated. In colour it is bluish grey, black or black and yellow. Formerly used in deer hunting it has developed in Britain since 1870 as companion and show dog. It is amenable to discipline when trained to indoor manners, but should never be chained.

Great Eastern Name of a British steamship. She was built in 1850. Isambard Brunel being her designer and was called the Leviathan. She was 992 ft long and her tonnage was 18,000, making her the largest vessel in the world. She was built on the Thames at Millwall but was not a success, and after a time she was used for laying the Atlantic and other cables.

Great Fire London conflagration. Starting Sept 2, 1666. Starting in a bakery in Pudding Lane in four days it devastated 400 streets and lanes, 13,200 houses, St Paul's Cathedral, 80 parish churches, the Guildhall and other public buildings, gaols, markets and 52 halls. The area affected comprised 373 acres within and 63 acres without the walls from the Tower to the Temple Church. The loss of property was put at £10,730,500. 200,000 people were made homeless, but casualties were very few.

Great Fish Canadian river. Rising in Lake Simcoe, north of Lake Huron. It flows N.E. for 560 m into the Arctic Ocean at Elliot Bay. Rapids and rocks impede navigation. Sir George Back, whose name it sometimes bears, discovered and explored it in 1834. Franklin's expedition perished near its mouth in 1848.

Another Great Fish is a river of Cape Province S Africa. It rises in the Sneeuwbergen Mts., and after a course of 230 m, reaches the Indian Ocean. Great Fish Bay is an inlet of the Atlantic in the S.W. of Portuguese E Africa.

Great Gable Mountain of Cumberland. It is about 7 m from Keswick near Scafell. It is 2050 ft high and its ascent is a favourite climb. Green Gable a hill near, is 2500 ft high. There is a memorial on the summit from which one of the finest views in the country is obtained.

Great Harry English warship. She was built by Henry VIII in or about 1514 and named after him. Her tonnage was 1000 and she had two decks with guns on each. A painting of the vessel by Holbein still exists.

Great Lakes Name given to the five great lakes that lie between Canada and the United States. They are Superior, Michigan, Huron, Erie and Ontario and cover over 94,000 sq m. The international boundary runs through four of them, Michigan being wholly American. The lakes form a series of steps one below the other and, by means of canals, vessels can go from

the head of Lake Superior to the St Lawrence and Montreal, or to New York by way of Buffalo. The Sault Ste Marie Canals connect Superior with Huron. From Huron to Erie Lake St. Clair and the Detroit River are utilised, between Erie and Ontario the Welland Canal (q.v.) has been cut in order to avoid the obstacles at Niagara. Since the Great War a new Welland canal has been constructed. The St Lawrence carries the waters of the lakes to the ocean.

Great Plague Epidemic of bubonic plague which ravaged London in 1665. Many periodical visitations occurred after Saxon times—including the Black Death. Cases occurred in the winter of 1664-5 and the total number of deaths for 1665 reached 68,596, two thirds of the population of 460,000 having fled from the city. The Great Fire of 1666 (q.v.) helped to purify London.

Great Powers Term used for the leading countries of the world. It came into use soon after the Peace of 1815, when the affairs of Europe were settled by conferences between the leading powers. At this time they were Great Britain, France, Austria and Russia. After 1871 Germany became a great power and soon Italy joined the circle. These were all European powers, but with the growth of world politics, Japan and the United States became recognised as Great Powers. The World War destroyed the position of the three empires, Germany, Russia and Austria. The peace of 1919 was arranged by five great powers, Great Britain, France, Italy, the United States and Japan.

Great Rebellion Name given to the civil war between the Royalists, under Charles I and the Parliament. It began in 1642 and ended with the execution of the king in Jan., 1649. It is usually divided into two parts, one ending with the King's defeat at Naseby in 1645, the other being the renewal of the struggle with the aid of the Scots in 1648.

Great Salt Lake Shallow saline lake in Utah, U.S.A. Three rivers enter it, but there is no outlet, hence salts have accumulated, principally sodium chloride, less sodium sulphate and carbonate, reaching at times over 20 per cent. Salts are deposited on the shores. The area is 1500 sq. m. and depth about 20 feet.

Great Schism Name given to the period from 1378 to 1417, when there were two or more popes. It ended in 1417, when the Council of Constance elected Martin V, who was generally recognised.

Great Seal Sign of the sovereign used to signify his approval. In Great Britain it is kept by the Lord Chancellor, and is affixed by him to documents of state. A new seal was made in 1930, owing to the altered status of Ireland. Until 1707 there was a separate great seal for Scotland.

Great Slave Lake and river of Canada. The lake is in the North-West Territories, covers 10,700 sq. m., is 300 m. long, and is frozen over for about half the year. The Mackenzie River flows from the lake into the Arctic Ocean.

Grebe Family of diving birds (*Podiceps*). They are found in temperate regions and two species are found in lakes and ponds in Great Britain. These are the great crested grebe, which is nearly 2 ft. in length

and has a coloured ruff in the breeding season, and the little grebe or dabchick, which may be 10 in. long. The red-necked, horned and black-necked grebes visit Great Britain for breeding. See DABCHICK.

Greece Monarchy of Europe. It is at the southern end of the Balkan Peninsula and consists of a mainland area and a great number of islands. Its land boundaries are Albania, Yugoslavia, Bulgaria and Turkey, but it is chiefly remarkable for its enormous coastline, due to the land being deeply indented by the sea, especially on the east side, where is the Aegean Sea. The area is 50,257 sq. m.—about the size of England. This total includes Crete and the islands Scyros, Chios and many others dotted over the Aegean and fringing the coast on the other side, where is the Ionian Sea.

The north of the country was ceded by Turkey after the Great War. The centre, where are Thessaly and Attica, and the south, which is almost cut off from the rest by the Gulf of Corinth, form the historic Greece. The land is mountainous almost everywhere, but in the valleys the soil is very fertile. Wheat, barley and maize are grown, as are olives, tobacco and currants. Minerals are fairly plentiful. Athens is the capital with a population of 452,919. There are many ports including the Piræus, Salonika and Patras.

From 1924 to 1935 Greece was governed by a president and a ministry responsible to a parliament of two Houses. In 1935, however, a *plébiscite* vote decided in favour of the restoration of the monarchy, and the king, George II, was recalled to Greece. The people belong mainly to the Greek Church. There is an army recruited by compulsory service and a small navy. The unit of currency is the drachma stabilised at 375 to the £ sterling, but the stabilisation has been suspended since April, 1933. Pop. (1931) 6,480,000.

HISTORY Greece is famous as the home of the world's greatest civilisation. Many centuries before Christ Mycenæ was a powerful city with wonderful buildings, and there were doubtless others in the land. These were the work of the Minoans, who were succeeded by the Achæans and then came the Dorians. Later still, about 1000 B.C., these people were called Hellenes and from Greece their settlements spread to Asia Minor, Italy and Sicily, the islands of the Aegean Sea, and, indeed, almost all round the European and Asiatic coasts of the Mediterranean Sea. The Greece of this time is the Greece pictured by Homer.

By the 6th century B.C., Greece, or Hellas, consisted of a number of city states, each independent. The kings who doubtless ruled in many of these had disappeared, their places were taken by rulers called tyrants and each city had its slave population. Wars between them were frequent, but these were on a very small scale. Trade was active, and owing to the situation of the cities, most of this was done by sea. Among the city states Athens, Sparta, Corinth, Thebes were, or were soon to be, prominent.

Among these people there was a high degree of intelligence and soon art and literature began to flourish as they had never flourished before. From Hellas the world has received its greatest works of art in building and sculpture, some of its greatest dramatic and poetic literature, its fundamental ideas on acting and dancing, its philosophy and its politics, and a certain amount of scientific knowledge.

This civilisation reached its greatest development in Athens in the time of Pericles, the 5th century B.C., an age which, for intellectual activity, has never been equalled. This was also the time when Greece was engaged in the unequal struggle with Persia. In this the Greeks won undying fame for their valour. At Marathon on land and at Salamis on sea, they beat the Persian hosts. These victories did not, indeed, save Greece from invasion, but in the end the Persians were utterly defeated.

Only with great difficulty and in the presence of great danger had the little city states united together, and the union was never very lasting or very real. The smaller and weaker cities came under the protection of Athens, or another of the more powerful ones, and leagues, such as the Delian League were formed, but jealousies were too strong for a single country to arise. Instead, in 431 B.C., Athens and Sparta entered upon the great struggle called the Peloponnesian War. This was ended in 404 with the defeat of Athens and the loss of her dominant position. Sparta for a short time, and then Thebes, were the most powerful of the city states.

Macedonia, a kingdom in the north of Greece and hardly regarded as part of Hellas proper, passed, in 350, under the rule of a certain Philip. He became the most powerful man in Greece and was so when he died, and was succeeded by Alexander the Great. He exercised a kind of sovereignty over Greece but interfered very little indeed with the affairs of its little states. The position of Macedonia in the 2nd century B.C. was challenged by Rome and in 146 B.C. Greece, its glory gone, became part of the great Roman Empire which borrowed greatly from its civilisation.

Now comparatively unimportant, Greece remained in the Roman Empire, and when this was divided, was included in the Eastern Empire which was Greek and not Latin in speech and customs. In 1204 on the collapse of the Byzantine Empire Greece became part of the Latin kingdom of Romania, but it had been recovered by the emperor at Constantinople by about 1300. In the 15th century it was conquered by the Turks, who dominated it until the 19th century, although from time to time this authority was disputed by Venice.

In 1821 the Greeks revolted against Turkish misrule and, aided by Great Britain and France, Greece was erected an independent kingdom in 1830. In 1837 Otto a prince of Bavaria became its king, but he was expelled in 1862. The throne was then offered to a Danish prince who, in 1833, became George I, King of Hellenes. He was killed in 1913 and his son and successor, Constantine, was dethroned in 1917. Constantine's son Alexander, then had a short reign which ended in his death and in his father's return. In 1922 Constantine abdicated and in 1923 his son George II was exiled. In 1924 Greece became a republic with Venizelos as its foremost figure. In 1935 the monarchy was restored and the king recalled from exile.

GREEK LANGUAGE. There are two forms of the Greek language—one is the language which was spoken at Constantinople and throughout much of the Eastern Empire. It lost its official status as an imperial tongue in 1453 but it continued to be spoken although in an altered form and is to-day the language of Greece and the adjacent lands. It differs a great deal from ancient or classical Greek. The last Greek in which the

masterpieces of Greek literature are written, was a dormant tongue for over 1000 years. At the revival of learning its wonderful treasures were discovered by scholars and since then it has been one of the two classical languages of the universities and schools of Europe. In most of these the study has now ceased to be compulsory but it remains part of the education of the scholar.

The Greek alphabet consists of the following letters—

Α Β Γ Δ Ε Ζ Η Θ Ι Κ Λ Μ

Ν Ξ Ο Π Ρ Σ Τ Υ Φ Χ Ψ Ω

α β γ δ ε ζ η θ ι κ λ μ

ν ξ ο π ρ σ τ υ φ χ ψ ω

Greek Church. Names sometimes used for the Eastern or Orthodox Church. During the first centuries of the Christian era the church, like the Empire, was divided into two branches, the Eastern and Western. The division came about gradually, but by the 9th century it was complete, as the two churches then differed about a clause in the Nicene Creed. The Eastern Church used the Greek language and is therefore known as the Greek Church.

This church does not recognise a single head, but is under several patriarchs, the chief authority being the synod, of which each country has its own. It allows the clergy to marry and gives communion in both kinds to the laity, while there are other differences in faith and ritual between it and the Roman Church. The Church has about 144,000,000 adherents, but since 1917 its position in Russia, where the majority of its followers are, has been very precarious. The Anglican Church maintains friendly relations with the Greek Church. In England there are Greek churches in Bayswater, London, Manchester, Liverpool and Cardiff.

Greek Fire. Inflammable composition used in mediaeval warfare. It was especially employed by the Byzantine Greeks in their wars against the Saracens. It is supposed to have been composed of resin or pitch, sulphur, nitre and naphtha, with other inflammable substances and, probably, quicklime. The formula was guarded jealously by the Byzantines and the composition was said to be able to burn under water.

Green. John Richard, English historian. Born in Oxford, Dec. 12, 1837, he was educated at Magdalen College School and Jesus College, Oxford. He was ordained and held a living in Stepney for a short time. In 1865 he was appointed librarian at Lambeth Palace but poor health soon compelled his retirement. In spite of this handicap he did a good deal of historical work and "died working" at Mentone, March 7, 1883.

Green's work is the attractive and popular *Short History of the English People*, of which many editions have appeared. He also wrote *The Making of England* and *The Conquest of England*, books in much greater detail, and articles in periodicals. In 1877 Green married an Irish lady, Alice Sophia Amelia Stopford. She also wrote on historical subjects her books including *Henry II* and *Town Life in the 15th Century*. Later she wrote a good deal on Irish history and politics. Mrs. Green died in 1929.

Green. Thomas Hill, English philosopher. Born at Birkin, Yorkshire, April 7, 1835, the son of a clergyman, he was educated

at Rugby and Balliol College, Oxford. In 1860 he was chosen a fellow of Balliol and there he served as tutor and lecturer for the next 22 years. From 1878 until his death, March 26, 1882, he was also Whyte Professor of Moral Philosophy.

Green taught an idealistic philosophy which he had learned from Aristotle, Kant and Hegel. Owing to the number of able men who came under his influence and to other causes, his teaching has been remarkably influential, especially in the sphere of politics. It led him to advocate social reforms, such as the causes of temperance, education and housing, and to come forward as a Liberal politician. His chief writings are *Lectures on the Principles of Political Obligation* and *Prolegomena to Ethics*. Green, as Mr Gray, is a character in *Robert Elsmere*.

Greenaway Kate English artist. Born in London, Mar 17, 1846, she studied art at South Kensington, Heatherley's Academy and the Slade School, and in 1868 exhibited a number of water-colour drawings. In 1877 she exhibited at the Royal Academy. Her illustrations of children dressed in the quaint costumes of the early 19th century became very popular. One of her books, *Under the Window*, 1879, had a large sale in English, French and German editions. She died Nov 6, 1901.

Green Cross Society formed in 1930. Its objects are to protect the countryside and prevent litter. In 1933 it started a fund for planting trees in Palestine. During the Great War the Green Cross Society was the popular name of the Women's Reserve Ambulance.

Greene Harry Plunket Irish singer. Born in Dublin, June 24, 1865, he was the son of R J Greene, a barrister, and a grandson of the 3rd Lord Plunket. He studied law, but the excellent quality of his voice made him abandon it for music. Studying in Stuttgart and Florence, he made his London debut as a baritone singer in Handel's *Messiah*, Jan 21, 1888. He excels in oratorio and the interpretation of *Lieder*, and maintains that interpretation, diction and dramatic sincerity are more requisite in a singer than vocal excellence. He has written a book *Interpretation in Song*, and was for some years Professor of Singing at the Royal Academy of Music and the Royal College of Music.

Greene Robert English poet and dramatist. Born at Norwich in 1556, he was educated at Cambridge. Settling in London, he soon became known as a writer of plays and lyrics. His principal works are the dramas *Orlando Furioso*, *The Scottish History of James IV*, *Friar Bacon and Friar Bungay* and *Pandosto*. He also wrote a pamphlet called *Greene's Groatsworth of Wit Bought with a Million of Repentance*, in which he speaks slightly of Shakespeare and other contemporary dramatists. On his own showing he led a wild and dissolute life, and he died in poverty, Sept 3, 1592.

Greenfinch Common British resident song bird (*Ligurinus chloris*). A stoutly-built bird, it is about 6 in long and in colour is yellowish-green and yellow, with black wing and tail tips, the hen is of soberer hue. Its untidy, hair-lined nest shelters two broods of from 5 to 6 reddish-spotted white eggs.

Greenfly Popular name for various insects of the aphid or plant louse family. Besides green blight, black, grey and brown forms occur. Several generations of living young develop asexually, without immediate male agency. Some infest one plant species only, others migrate from host to host according to season, thus the hop aphid passes the winter on the damson. The seven British apple aphides include American blight. Five kinds attack currants and gooseberries, others affect roses and geraniums as well as corn and timber trees.

Greenford District of Middlesex, part of the borough of Ealing. It is 8 m from London with a station on the G.W. Rly. Since the Great War, the district has been greatly developed, and various industries have been established here, including works owned by Messrs J Lyons & Co. The Grand Union Canal passes through the district.

Greengage Small, round, dessert variety of plum. It is a native of France and large supplies come thence each season. It is named after Sir William Gage, of Hengrave Hall Bury St. Edmunds, who introduced it into England about 1725. The honour is also claimed for one of the Gages of Fife in Sussex, and for a Jesuit, John Gage.

Greenheart Valuable timber tree (*Nectandra rodiaei*) of the laurel order. A native of British Guiana, it reached 60 or 70 ft in height. The close textured heart wood, greenish-yellow to greenish-brown in colour, is heavier than teak, and, as it contains an oil obnoxious to marine worms, it is extensively used in shipbuilding. Its ash-coloured bark, known as bibira bark, is used as a fibriluge.

Greenhithe District of Kent. It stands on the Thames, 3 m from Dartford, on the Southern Rly. The chief industry is shipping.

Greenland Island in the Arctic Ocean, one of the largest in the world. It covers 826,000 sq m. Its length is 1600 sq m., its extreme breadth 700 m and only its southern part, which terminates in Cape Farewell, is outside the Arctic regions. Davis Strait lies between it and Canadian territory. The island belongs to Denmark, but nearly all the inhabitants are Eskimos. The coast is very rugged and the interior mountains with many glaciers. The people live in a few settlements on the S and W coasts, the largest being Sydproven. Godhavn, on Disco Island, is the capital. The climate is very cold except for a short period each year, and the only products are whale and seal oil and furs. The trade is a state monopoly. Cod and other fish are found off the shores and coal of poor quality has been found. Pop 14,400.

Greenland was discovered in the 10th century and was settled by Norsemen. Presumably the climate was then more equable than it became later and this would account for the name given to the place. About 1400 the settlements were destroyed or vacated owing to increasing cold. Remains of churches and other buildings have been found. In the 19th and 20th centuries Nansen and other explorers have examined the interior of the country.

In June, 1930, some Norwegians hoisted their country's flag at a spot on the east coast of Greenland. The Danish Government raised objections to this and negotiations followed.

In 1929, 1930 and 1931 several expeditions

This civilisation reached its greatest development in Athens in the time of Pericles, the 5th century B.C., an age which, for intellectual activity, has never been equalled. This was also the time when Greece was engaged in the unequal struggle with Persia. In this the Greeks won undying fame for their valour. At Marathon on land and at Salamis on sea, they beat the Persian hosts. These victories did not, indeed, save Greece from invasion, but in the end the Persians were utterly defeated.

Only with great difficulty and in the presence of great danger had the little city states united together, and the union was never very lasting or very real. The smaller and weaker cities came under the protection of Athens, or another of the more powerful ones, and leagues, such as the Delian League, were formed, but jealousies were too strong for a single country to arise. Instead, in 431 B.C., Athens and Sparta entered upon the great struggle called the Peloponnesian War. This was ended in 404 with the defeat of Athens and the loss of her dominant position. Sparta for a short time, and then Thebes, were the most powerful of the city states.

Macedonia a kingdom in the north of Greece and hardly regarded as part of Hellas proper, passed, in 350, under the rule of a certain Philip. He became the most powerful man in Greece and was so when he died and was succeeded by Alexander the Great. He exercised a kind of sovereignty over Greece but interfered very little indeed with the affairs of its little states. The position of Macedonia in the 2nd century B.C. was challenged by Rome and in 146 B.C. Greece, its glory gone, became part of the great Roman Empire which borrowed greatly from its civilisation.

Now comparatively unimportant Greece remained in the Roman Empire and when this was divided was included in the Eastern Empire, which was Greek, and not Latin in speech and customs. In 1204 on the collapse of the Byzantine Empire Greece became part of the Latin kingdom of Romania, but it had been recovered by the emperor at Constantinople by about 1300. In the 15th century it was conquered by the Turks, who dominated it until the 19th century, although from time to time this authority was disputed by Venice.

In 1821 the Greeks revolted against Turkish misrule and, aided by Great Britain and France, Greece was created an independent kingdom in 1830. In 1833 Otto a prince of Bavaria became its king but he was expelled in 1862. The throne was then offered to a Danish prince who, in 1833, became George I, King of Hellenes. He was killed in 1913 and his son and successor, Constantine, was deposed in 1917. Constantine's son Alexander, then had a short reign which ended in his death and in his father's return. In 1922 Constantine abdicated and in 1923 his son George II was exiled. In 1924 Greece became a republic with Venizelos as its foremost figure. In 1935 the monarchy was restored and the king recalled from exile.

GREEK LANGUAGE There are two forms of the Greek language—one is the language which was spoken at Constantinople and throughout much of the Eastern Empire. It lost its official status as an imperial tongue in 1453 but it continued to be spoken although in an altered form and is to day the language of Greece and the adjacent lands. It differs a great deal from ancient or classical Greek.

Classical Greek the Greek in which the

masterpieces of Greek literature are written was a dormant tongue for over 1000 years. At the revival of learning its wonderful treasures were discovered by scholars and since then it has been one of the two classical languages of the universities and schools of Europe. In most of these the study has now ceased to be compulsory but it remains part of the education of the scholar.

The Greek alphabet consists of the following letters—

Α Β Γ Δ Ε Ζ Η Θ Ι Κ Λ Μ

Ν Ξ Ο Π Ρ Σ Τ Υ Φ Χ Ψ Ω

α β γ δ ε ζ η θ ι κ λ μ

ν ξ ο π ρ σ τ υ φ χ ψ ω

Greek Church Names sometimes used Orthodox Church. During the first centuries of the Christian era the church, like the Empire, was divided into two branches, the Eastern and Western. The division came about gradually, but by the 9th century it was complete, as the two churches then differed about a clause in the Nicene Creed. The Eastern Church used the Greek language and is therefore known as the Greek Church.

This church does not recognise a single head but is under several patriarchs, the chief authority being the synod, of which each country has its own. It allows the clergy to marry and gives communion in both kinds to the laity, while there are other differences in faith and ritual between it and the Roman Church. The Church has about 144,000,000 adherents, but since 1917 its position in Russia, where the majority of its followers are, has been very precarious. The Anglican Church maintains friendly relations with the Greek Church. In England there are Greek churches in Bayswater, London, Manchester, Liverpool and Cardiff.

Greek Fire Inflammable composition used in mediæval warfare. It was especially employed by the Byzantine Greeks in their wars against the Saracens. It is supposed to have been composed of resin or pitch, sulphur nitre and naphtha, with other inflammable substances, and probably, quicklime. The formula was guarded jealously by the Byzantines and the composition was said to be able to burn under water.

Green John Richard. English historian. Born in Oxford Dec. 12, 1837. He was educated at Magdalen College School and Jesus College, Oxford. He was ordained and held a living in Stepney for a short time. In 1866 he was appointed librarian at Lambeth Palace but poor health soon compelled his retirement. In spite of this handicap he did a good deal of historical work and died working "at Montone, March 7, 1883.

Green's work is the attractive and popular *Short History of the English People* of which many editions have appeared. He also wrote *The Making of England* and *The Conquest of England*, books in much greater detail, and articles in periodicals. In 1877 Green married an Irish lady, Alice Sophia Amelia Stopford. She also wrote on historical subjects her books including *Henry II* and *Town Life in the 15th Century*. Later she wrote a good deal on Irish history and politics. Mrs. Green died in 1929.

Green Thomas Hill. English philosopher. Born at Birkin, Yorkshire, April 7, 1836 the son of a clergyman who was educated

at Rugby and Balliol College, Oxford. In 1860 he was chosen a fellow of Balliol and there he served as tutor and lecturer for the next 22 years. From 1878 until his death, March 26, 1882, he was also Whyte Professor of Moral Philosophy.

Green taught an idealistic philosophy which he had learned from Aristotle, Kant and Hegel. Owing to the number of able men who came under his influence and to other causes, his teaching has been remarkably influential, especially in the sphere of politics. It led him to advocate social reforms, such as the causes of temperance, education and housing, and to come forward as a Liberal politician. His chief writings are *Lectures on the Principles of Political Obligation* and *Prolegomena to Ethics*. Green, as Mr Gray, is a character in *Robert Elsmere*.

Greenaway Kate English artist. Born in London, Mar 17, 1846, she studied art at South Kensington, Heatherley's Academy and the Slado School, and in 1868 exhibited a number of water-colour drawings. In 1877 she exhibited at the Royal Academy. Her illustrations of children dressed in the quaint costumes of the early 19th century became very popular. One of her books, *Under the Window*, 1879, had a large sale in English, French and German editions. She died Nov 6, 1901.

Green Cross Society formed in 1930. Its objects are to protect the countryside and prevent litter. In 1933 it started a fund for planting trees in Palestine. During the Great War the Green Cross Society was the popular name of the Women's Reserve Ambulance.

Greene Harry Plunket Irish singer. Born in Dublin, June 24, 1865, he was the son of R. J. Greene, a barrister, and a grandson of the 3rd Lord Plunket. He studied law, but the excellent quality of his voice made him abandon it for music. Studying in Stuttgart and Florence, he made his London debut as a baritone singer in Handel's *Messiah*, Jan 21, 1888. He excels in oratorio and the interpretation of *Lieder*, and maintains that interpretation, diction and dramatic sincerity are more requisite in a singer than vocal excellence. He has written a book *Interpretation in Song*, and was for some years Professor of Singing at the Royal Academy of Music and the Royal College of Music.

Greene Robert. English poet and dramatist. Born at Norwich in 1558, he was educated at Cambridge. Settling in London, he soon became known as a writer of plays and lyrics. His principal works are the dramas *Orlando Furioso*, *The Scottish History of James IV*, *Friar Bacon and Friar Bungay* and *Pandosto*. He also wrote a pamphlet called *Greene's Groatsworth of Wit Bought with a Million of Repentance*, in which he speaks slightly of Shakespeare and other contemporary dramatists. On his own showing he led a wild and dissolute life, and he died in poverty, Sept. 3, 1592.

Greenfinch Common British resident song bird (*Figurinus chloris*). A stoutly-built bird, it is about 6 in. long and in colour is yellowish-green and yellow, with black wing and tail tips; the hen is of soberer hue. Its untidy, hair-lined nest shelters two broods of from 5 to 6 reddish-spotted white eggs.

Greenfly Popular name for various insects of the aphid or plant louse family. Besides green blight, black, grey and brown forms occur. Several generations of living young develop asexually, without immediate male agency. Some infest one plant species only, others migrate from host to host according to season, thus the hop aphid passes the winter on the damson. The seven British apple aphides include American blight. Five kinds attack currants and gooseberries, others affect roses and geraniums as well as corn and timber trees.

Greenford District of Middlesex, part of the borough of Ealing. It is 8 m. from London with a station on the G.W. Rly. Since the Great War, the district has been greatly developed, and various industries have been established here, including works owned by Messrs J. Lyons & Co. The Grand Union Canal passes through the district.

Greengage Small, round, dessert variety of plum. It is a native of France and large supplies come thence each season. It is named after Sir William Gage, of Hengrave Hall, Bury St. Edmunds, who introduced it into England about 1725. The honour is also claimed for one of the Gages of Fife in Sussex, and for a Jesuit, John Gage.

Greenheart Valuable timber tree (*Nectandra rodiaei*) of the laurel order. A native of British Guiana, it reached 60 or 70 ft. in height. The close textured heart wood, greenish-yellow to greenish-brown in colour, is heavier than teak, and, as it contains an oil obnoxious to marine worms, it is extensively used in shipbuilding. Its ash-coloured bark, known as bibiru bark, is used as a febrifuge.

Greenhithe District of Kent. It stands on the Thames, 3 m. from Dartford, on the Southern Rly. The chief industry is shipping.

Greenland Island in the Arctic Ocean, one of the largest in the world. It covers 826,000 sq. m. Its length is 1600 sq. m., its extreme breadth 700 m. and only its southern part, which terminates in Cape Farewell, is outside the Arctic regions. Davis Strait lies between it and Canadian territory. The island belongs to Denmark, but nearly all the inhabitants are Eskimos. The coast is very rugged and the interior mountainous with many glaciers. The people live in a few settlements on the S and W coasts, the largest being Sydproven, Godhavn, on Disco Island, is the capital. The climate is very cold except for a short period each year, and the only products are whale and seal oil and furs. The trade is a state monopoly. Cod and other fish are found off the shores and coal of poor quality has been found. Pop. 14,400.

Greenland was discovered in the 10th century and was settled by Norsemen. Presumably the climate was then more equable than it became later and this would account for the name given to the place. About 1400 the settlements were destroyed or vacated owing to increasing cold. Remains of churches and other buildings have been found. In the 19th and 20th centuries Nansen and other explorers have examined the interior of the country.

In June, 1930, some Norwegians hoisted their country's flag at a spot on the east coast of Greenland. The Danish Government raised objections to this and negotiations followed. In 1929, 1930 and 1931 several expeditions

set out to explore the interior of Greenland. One was the British Arctic Air Route expedition under H. G. Winkles. The aim of this was to find if an air route across Greenland to Canada from England was possible. A German expedition under Alfred Wegener went out and Wegener lost his life and a relief expedition was sent to search for him. Another expedition was organised by some Danes.

Greenock Burgh and seaport of Renfrewshire. It stands on the south side of the Firth of Clyde, 22 m from Glasgow, and is served by the L.M.S. Rly. The old west church, founded in 1580, has been removed to Seafield Parade to make room for the extension of a shipbuilding yard. The church contains some fine glass. Highland Mary is buried in the churchyard. The Watt Institution, which has a fine library, is named after James Watt, who was born here. Greenock's industries include shipbuilding, engineering and sugar refining. There is also a good deal of shipping, for which there are large docks and quays. Pop. (1931) 78,948.

Greenore Seaport and watering place of Co. Louth, Irish Free State. It is on the east side of Carlingford Lough and has a regular service of steamers with Holyhead.

Green Park London park. It lies between Piccadilly, St. James's Park and Constitution Hill, with Buckingham Palace looking on to it, and covers 53 acres. It is Crown property and has been a park since the 17th century.

Greensand In geology, a formation of the Cretaceous system. It consists of sand mixed with glauconite, which gives it the greenish colour. It is divided into the Upper and Lower Greensands, between which lies the clay called Gault. It is found in Kent and Sussex. In the Isle of Wight and in the west of England. A belt of it stretches across the country from Dorset and Wiltshire to the east coast. There is also greensand in Scotland, Ireland and France. In it are sandstones that make good building stones, and sand used in glass making.

Greenshank (*Totanus canescens*) of the snipe family. Allied to the sandpipers. It is slenderly built and is about 14 in. long with long olive-tinted legs, a long neck and slightly upturned black bill. It migrates in summer to Britain and breeds in Scotland. Its primitive ground-nest shelters four dark blotched greyish eggs. Its winter wanderings embrace India, South Africa and Australia.

Greenstone In geology, a convenient name for more or less greenish-coloured rocks which have a dark greenish colour. The colour is due to the formation of chlorite and allied minerals. Greenstones occur as dykes and intrusive masses in many parts of Great Britain and comprise such rocks as diabase and diorite.

Greenwich Borough of London. One of the 28 in the county. It lies on the south side of the Thames 6 m from the city and has stations on the Southern Rly. The Blackwall Tunnel and a tunnel for foot passengers link it with the north side of the river. Apart from Greenwich Hospital, its chief buildings are St. Alphege Church, the observatory and hospital. Some of the Inns, the Ship and the Trafalgar, for instance, are noteworthy. The industries include engineering works and the making of cables and linoleum. Near the river is an enormous power station

for generating electricity. A new town hall overlooking the river is being planned. Pop. (1931) 100,879.

Greenwich is famous for its associations with royalty. Here, Humphrey, Duke of Gloucester, built a castle, and in a palace that succeeded it the Tudor sovereigns passed a good deal of time. Henry VIII., Mary and Elizabeth were born here. The present buildings facing the river form a fine pile. They were begun in 1667 and finished in 1705 when they were opened as a home or hospital for sailors. They comprise several blocks, one of which was designed by Wren. The most famous apartments are the painted hall, which contains Nelson relics, and the chapel with its fine carvings. Other parts are occupied by the Royal Naval College and the Naval Staff College. The Royal Hospital School has been removed to new buildings at Holbrook, in Suffolk. A house near, formerly owned by Anne of Denmark, is now a Naval Museum.

Behind the hospital is Greenwich Park, now public property, which covers about 200 acres and is beautifully laid out. In it is the Royal Observatory. This was opened in 1676 and here the Astronomer Royal lives and works. Standard time is reckoned from this observatory, which stands on the first meridian—hence Greenwich time.

Greenwich Village is a district of New York. It is frequented by artists, literary men and others of Bohemian tastes.

Greenwood Arthur, English politician. He studied at the University of Manchester and became a writer and lecturer on economic subjects. He held a post in the University of Leeds before 1917 when he was made Secretary to the Ministry of Reconstruction. Having joined the Labour Party, he became head of its Information Bureau and in 1922 was elected M.P. for the Nelson and Colne division of Lancashire. In 1924 he was Parliamentary Secretary to the Ministry of Health and in 1929 Minister of Health in the Labour Government. He resigned in Aug. 1931 and lost his seat in the following Oct. In 1932 and again in 1935 he was elected for Wokingham.

Greenwood Frederick, English journalist. Born in London. Mar. 25, 1830. He became first editor of *The Queen*, 1861-63; and later was editor of *The Cornhill Magazine*, 1864-68 and *The Pall Mall Gazette*, 1865. When the latter paper changed its politics 1880, Greenwood resigned and the same year started a new paper, *The St. James's Gazette*. He held strong views as to foreign affairs and suggested the purchase by Great Britain of the Suez Canal shores (1875). His works include *Margaret Dencils's History*, *The Lover's Lexicon* and *Imagination in Dreams*. He died Dec. 14, 1909.

Gregorian Chant Plain-song, a system of antiphonal psalmody as devised by St. Gregory. Flight groups of chants correspond to the eight modes or tones. They are represented on the piano by the white notes only. The four authentic modes

No. 1	Dorian	D to D
No. 2	Dorian	E to E
No. 3	Dorian	F to F
No. 4	Dorian	G to G

are paired with a plagal mode giving a perfect 4th lower than each of them. This gives Nos. 2, 4, 6 and 8 named as are their authentic partners plus the prefix hypo.

The chant begins with an intoning note and

continues with a reciting note, which is followed by the meditation, marking the half of the chant, a reciting note and an ending conclude

Gregory Name of 16 popes. The two most important are Gregory I and Gregory VII noticed below. The five who came between these two are of little account. Of the others Gregory IX was pope from 1227-41 and his reign was chiefly occupied by a struggle with Emperor Frederick II. Gregory X was pope from 1271-76, Gregory XI, 1370-78, and Gregory XII, 1406-15, when he abdicated as ordered by the Council of Constance and thus helped to end the Great Schism in the church. Gregory XIII, pope from 1572-85, was the pope who reformed the calendar, called after him the Gregorian Calendar, and celebrated the massacre of St Bartholomew with a *Te Deum*. Gregory XIV was pope 1590-91 and Gregory XV, 1621-23. Gregory XVI, pope from 1831-46, was known for his opposition to the liberal ideas of that time.

Gregory I. Pope, called the Great. He was born in Rome about 540, a member of a wealthy family, and became a prominent official of the city. In 574 he became a monk and later was one of the seven deacons who looked after the Christians in Rome, and became secretary to the pope, who sent him on an important mission to Constantinople. In 590 he was elected pope, and during his fourteen years of office he did a good deal for the temporal power of the papacy, by improved management of its great estates and in other ways. He was equally successful as the temporal ruler of Rome and as the spiritual ruler of a great part of Christendom, in both cases asserting his rights, but equally zealous in spreading the faith and caring for the unfortunate. His best known actions are the sending of Augustine to England in 596 and the invention of the Gregorian system of chanting. Gregory wrote a great deal, and many volumes of his writings have been published. He died March 12, 604, and was soon afterwards canonised.

Gregory VII. Pope from 1073 to 1085, also known as Hildebrand. Born about 1020, probably at Siena, he was educated in a monastery at Rome and became a monk and chaplain to Pope Gregory VI. Pope Leo IX made him a cardinal deacon and appointed him to look after the estates of the church. In this capacity he proved himself a man of exceptional ability and he was soon the dominant member of the papal court. In 1054 he declined to become pope, securing the election of Victor II. The next two popes, Nicholas II and Alexander II were also his nominees, but there was a good deal of opposition to both, especially to Alexander. However, in the end Hildebrand's determination won through.

In 1073 Hildebrand himself was elected and he took the name of Gregory VII. He reigned for 12 years, perhaps the most thrilling in the long history of the Papacy. His two great aims were to reform the church and to assert its authority over the temporal power, represented by the emperor. He fought hard to put down simony and he strongly favoured celibacy for the clergy. Following out his reforming policy, the pope forbade the investiture of clerics by lay rulers, and this brought on his famous quarrel with the Emperor Henry IV, who submitted at Canossa in 1077. The pope's victory lasted for three years, at the end of

which time the quarrel was renewed. Henry took possession of Rome, after a long siege in 1084, and set up a rival pope. Gregory escaped to Monte Cassino, and then went to Salerno, where he died May 25, 1085.

Gregory Augusta, Lady. Irish dramatist. Born Mar. 5, 1852, in 1881 she married Sir William Gregory, an Irish M.P. who died in 1892. Deeply interested in the Irish literary revival, she became a director of the Abbey Theatre Dublin, about which she wrote *Our Irish Theatre*, 1924. She translated three of Molière's plays for production there, but is better known by her own dramas. These include *The Bitter Coolade*, *The Rising of the Moon*, *The Gaol Gate*, *The Full Moon*, and many others. She died May 22, 1932.

Greiffenhagen Maurice. English artist. Born Dec 15, 1862, he studied at the Royal Academy Schools, London. In 1906 he was made head of the Life Department at the Glasgow School of Art, but after a time settled in London. In 1916 he was elected A.R.A. and in 1922 R.A. His works include "The Judgment of Paris" in Sydney, and "Dawn" and "Women by a Lake," bought by the Chantry trustees. He died December 26, 1931.

Grenada Island of the West Indies. It belongs to Great Britain, being one of the Windward Islands, and is 86 m. from Trinidad. It covers 133 sq. m. Its mountain range contains several extinct volcanoes, with lakes formed in their craters. St George's is the capital and chief port. Cocoa, nutmegs, mace, cotton, sugar and other tropical products are grown and exported, rum is another important export. The island is under a governor and a legislative council. It was discovered by Columbus in 1493, settled by the French and became English in 1762. Pop (1931) 78,662.

Grenade Small shell or bomb that is thrown by hand. In its earliest form the grenade was made of brass or earthenware, was filled with gunpowder and pieces of iron, and exploded by means of a fuse. The use of grenades died out about the beginning of the last century, but revived again in a new form in recent years.

A grenadier was originally a picked soldier, trained in the use of hand grenades. France allotted four to each company of the Royal Regiment in 1667, and grenadier companies to three others. England followed suit in 1678. The Premier Battalions of the Guards, having appropriated the name, an army order, in 1915 decreed that men trained to use hand grenades would henceforward be called bombers.

Grenadier Guards Regiment of the British Army. It was raised in 1660 and ranks as the first regiment of foot guards, although the Coldstream Guards are older. It forms part of the brigade of guards, and may march through the City of London with fixed bayonets. Their record of service is a fine one, including Quatre Bras and Waterloo. In the Great War the Grenadiers sent four battalions to France, and their total casualties were nearly 12,000. The regiment has now three battalions.

Grenadines Group of small islands in the Caribbean Sea. They lie between St Vincent and Grenada, and belong to Great Britain. They cover 14 sq. m. Three only, including Carriacou, the largest, are inhabited. They are administered partly from St Vincent and partly from Grenada. Pop 8000.

Grenfell Julian Henry Francis English soldier and poet. Born War 30, 1888, the oldest son of Lord Desborough, he was educated at Eton and Balliol College Oxford. In 1910 he joined the Royal Dragoons and in the Great War was awarded the D S O. Wounded at Ypres on May 3, he died at Boulogne, May 13, 1915. His verses *Into Battle* were published in *The Times* and he wrote other poems. He was also a fine boxer and something of a scholar. His brother, Gerald William Grenfell (b 1890) was killed at Hooge, July 30, 1915.

Grenfell Sir Wilfred Thomsen English medical missionary. Born Feb 28, 1865, and educated at Marlborough and Oxford, he became house surgeon of the London Hospital and Sir Frederick Treves. In 1889 he joined the Royal National Mission for Deep Sea Fishermen, and cruised the North Sea in the first hospital ship. In 1892 he went as medical missionary to Labrador and established hospitals, missions, homes, etc. there and in Newfoundland. He was attached to the Harvard Surgical Unit in France early in the Great War. In 1927 he was knighted. His works include *The Harvest of the Sea*, 1905, and *A Labrador Doctor* 1918.

Grenoble City and river port of France from Lyons. It stands on the Isère, 75 m from Lyons in the midst of magnificent mountain scenery. There is a university. The city has some manufactures including the making of gloves, paper and fancy goods and there is a trade along the river. It has a broadcasting station (566 M 2 kW). Before the French Revolution Grenoble was the chief town of Dauphiné. Pop (1931) 90 748.

Grenville George English statesman. Born Oct 14, 1712, he was a younger brother of Richard Grenville Earl Temple. He was educated at Eton and Oxford and in 1741 became M.P. for Buckingham. Having held several minor positions in the government, he was made a Secretary of State and First Lord of the Admiralty in 1762. In 1765 he became Prime Minister a post he retained for two years. His government was responsible for the prosecution of John Wilkes and for the Stamp Act of 1766. He died in London Nov 13 1770. In his early days Grenville was allied politically with Pitt, who was related to the Grenvilles by marriage, but later the two parted.

Grenville's son William Wyndham Grenville (1759-1834) was also a statesman. He entered the House of Commons in 1782 and having been Speaker in 1789 was made Home Secretary. From 1791 to 1801 he was Foreign Secretary and as such closely associated with his kinsman William Pitt. In 1806 he was premier of a coalition ministry. In 1790 he was made a baron but the title became extinct when he died at Dropmore Jan 12 1834.

Grenville Sir Richard English sailor. Born about 1541 a member of an old Cornish family he was M.P. for Cornwall, 1571 and 1584 and sheriff of Cornwall in 1571. In 1581, when a squadron under Sir Thomas Howard was sent to the Azores to intercept the treasure fleet of Spain Grenville as vice admiral was second in command. The Spanish fleet received warning and a fleet of 20 vessels attacked Howard's sixteen off Flores. His Howard's men being ill of the scurvy, he led before them Grenville in his flagship the *Greenwich* somehow separated. Attempting to break through the Spanish line, the valiant

ship fought the entire fleet for 16 hours, but was eventually captured, Grenville dying of his wounds a few hours later, Aug 31 1591. The story is told in Tompkins's *The Revenge*.

Gresham Sir Thomas English merchant and financier. Born in London about 1519, he was educated at Cambridge and then entered Gray's Inn. In 1543 he became a member of the Mercers Company. Going to the Netherlands he amassed a large fortune as a merchant and was also financial advisor to the government. He was knighted by Queen Elizabeth in 1559, before becoming ambassador to the Duchy of Parma. He died Nov 21 1579.

Gresham built the Royal Exchange in London and left his house in Bishopsgate and a sum of money to the Mercers Company, to found the Gresham College, in which every year courses of lectures in seven subjects are delivered by seven professors. Rooms in the Royal Exchange were used for the lectures until 1843, then Gresham College was built for this and other educational work.

Gresham's name is associated with the principle called Gresham's law, that good money drives out bad.

Greta River of Cumberland. It flows west into the Derwent near Derwent water, and is 4 m long. Greta Hall which stands on the river was the home of Southey for forty years. Other Gretas are tributaries of the Lune and Tees.

Gretna Village of Cumberland. It is near Carlisle and has a station on the LMS Rly. Enormous munition works were erected here during the Great War.

Gretna Green Village of Dumfriesshire. It is 9 m from Carlisle just across the River Sark that divides England from Scotland. Owing to its position it was a favourite place for runaway marriages, since the law of Scotland was much more lax in this matter than the law of England. The marriages were celebrated in the village smithy by the blacksmith, or in the inn by the innkeeper.

Greuze Jean Baptiste French artist. Born near Mâcon Aug 21, 1725 he early showed promise as a painter, and when 30 years of age was elected to the Paris Academy. His paintings are of a sentimental and somewhat conventional character though the homeliness of his themes and his close study of nature gave them a certain charm and secured him great popularity. He died in poverty, Mar 21, 1805. Several of his works such as *A Girl with Doves*, are in the Wallace Collection.

Greville Charles Cavendish Fulke English diarist. Born Apr 2, 1791, he was educated at Eton and Oxford and early became secretary to Earl Bathurst and non-resident secretary of Jamaica. From 1821 to 1829 he was Clerk of the Privy Council. Throughout his official career he kept a diary, and this was published in seven volumes, 1876-87, as *The Greville Memoirs*, a valuable and outspoken contribution to the history of his time. He died Jan 18 1865.

Grévy François Paul Jules French statesman. Born at Mont sous Vaudrey, Aug 15 1807 he studied law in Paris becoming an advocate in 1837. He was elected deputy to the Constituent Assembly and sat in the Legislative Assembly, 1849-51, when for a time he returned to his legal practice. In 1869 he was elected to the Chamber, and having

made a reputation as an orator, was chosen President of the National Assembly in 1871, as he was in 1876, 1877 and 1879. In 1879 he was elected President of the Republic and at the end of his seven years of office was again chosen. In 1887 he resigned and on Sept. 9, 1891, he died.

Grey Earl. English title borne since 1806 by the family of Grey. The first holder, Charles Grey, fought with distinction in the Seven Years' War and the American War of Independence, rising to the rank of general. In 1801 he became Baron Grey, and in 1806 Earl Grey and Viscount Howick. He was succeeded, when he died in 1807, by his son Charles, the statesman.

Charles Grey, born Mar. 10, 1764, was elected M.P. for Northumberland in 1786. Associating himself with Fox, for many years he was an opponent of the policy of Pitt and an advocate of political and social reform. He became First Lord of the Admiralty and then Foreign Secretary in the coalition ministry of 1806-07. From 1807 to 1830 he was leader of the Whigs, then in opposition. In 1830 he became Premier and his ministry was responsible for the great Reform Act of 1832. He resigned in 1834 and died, July 17, 1845.

Henry George Grey (1802-94) his eldest son, succeeded him as 3rd earl. He entered the House of Commons in 1826 and held office in several Whig ministries. From 1846 to 1852 he was Secretary for War and the Colonies. He was succeeded by his nephew, Albert Henry George Grey, 4th earl (1851-1917) who, a great traveller in his early life, was administrator of Rhodesia, 1896-97 and Governor-General of Canada, 1904-11. His son, Charles Robert Grey (b. 1879), succeeded him as 5th earl. The family seat is Howick Hall near Lesbury.

Grey Lady Jane. Queen of England for nine days. Born at Bradgate Park, Leicester, in Oct., 1537, she was the eldest daughter of Henry Grey, Duke of Suffolk, her mother being a granddaughter of Henry VII. Of remarkable intellectual attainments, she received a thorough education, and when she had barely reached womanhood astounded with her learning the greatest scholars of the day, including Roger Ascham. The Duke of Northumberland, desiring the aggrandisement of his family, married her in May, 1553, to his son Lord Guildford Dudley, and then sought to alter the succession in her favour. After the death of Edward on July 6, 1553, she was proclaimed queen, but Mary's friends were too strong for her, and on the 19th she was arrested. She was tried, sentenced to death for high treason and on Feb. 12, 1554, together with her husband, was beheaded on Tower Hill.

Grey Sir George. English official. Born April 12, 1812, he was the son of an officer, and himself entered the army. In 1839 he retired, and in 1841 was made Governor of S. Australia. In 1845 he went as Governor to New Zealand, and there he did a great work. He left it in 1853 to become Governor of Cape Colony, but returned in 1861, and was again Governor until 1867. From 1877 to 1884, Grey, who was knighted in 1848, was Prime Minister of New Zealand. He wrote accounts of two expeditions along the coasts of Australia in which he took part, and books on the early inhabitants of New Zealand. He died in London Sept. 20, 1898.

Another Sir George Grey was a Whig politi-

cian. Born in 1799, a grandson of the 1st Earl Grey, he was elected M.P. for Devonport in 1832, and sat in Parliament until 1874. Having filled minor positions he was Home Secretary in 1846 to 1852, 1855-58 and 1861-66. He died, Sept. 9, 1882, his baronetcy passing to his grandson, who later became Viscount Grey of Fallodon (q.v.).

Grey of Fallodon Viscount. English statesman. Born April 25, 1862, Edward Grey was the eldest son of Lieut.-Col. C. H. Grey and a member of the old Northumberland family. He went to Winchester and then to Balliol College, Oxford. While there, in 1882, he became a baronet on the death of his grandfather, Sir George Grey. At the same time he inherited Fallodon Hall and the family estates.

In 1885 Grey was elected M.P. for Berwick-on-Tweed. From 1892-95 he was Under-Secretary for Foreign Affairs, and during the ten years 1895-1905 he came to the front as one of the leaders of the Liberal party. In 1905 he became Foreign Secretary, and he held that post until 1916. He was responsible for the policy of Great Britain during the fateful years that preceded the Great War, and it was his lot to conduct the negotiations that ended in his country's participation in the struggle. He remained at the Foreign Office until Dec., 1916, when he resigned with Asquith and other Liberals. He was then made a viscount. Partly owing to failing eyesight Grey took little further part in public life, but occasionally he appeared as a moderate Liberal on the public platform. He died in 1933.

On his two hobbies, fly-fishing and the observation of bird life, he wrote books, including *The Charm of Birds*, and in 1925 he issued his memoirs *Twenty-Five Years*. Later he edited *The Fallodon Papers*. His honours include the Order of the Garter and the Chanceryship of the University of Oxford, to which he was elected in 1928. He was twice married, his second wife, formerly the wife of Lord Glenconner, dying in 1928. In early life Grey was amateur tennis champion.

Greyfriars Name given, from the colour of their dress, to the members of the Franciscan order. The most famous house of the order was in Edinburgh, and the name is still borne by two churches there. The monastery of the Greyfriars was founded in 1436 and destroyed in 1547. In 1614 the church called the Greyfriars was built, and in its churchyard the National Covenant was signed in 1638. It contains many memorials, including one to the Scottish martyrs.

Greyhound Breed of dog. A tall, slenderly built, long-limbed hound, it is smooth-haired and in colour uniformly grey or sandy. Being very fleet it is kept for coursing hares by sight. The old English greyhounds, sometimes used for hunting, were heavier than the modern breed. Rough-haired Scotch, Persian, Afghan and Russian breeds exist and Italian greyhounds are miniature pets.

Greyhound Racing Outdoorsport. It is a form of coursing, the chief difference being that mechanical, not real, hares are used. It began in the United States and since about 1926 has become very popular in Great Britain. The hare is worked by electricity, and as soon as it is set in motion the dogs are released by opening a trap door. The sport affords ample opportunity

In Parliament until 1841. He was active in establishing London University and was interested in philanthropic and educational work of other kinds. Grote is known however, as the historian of Greece. His *History of Greece* in 12 volumes was long a standard work for students, and is not yet entirely superseded. He died June, 18, 1871.

Grotius Hugo Dutch jurist. Born at Delft, April 10, 1583; he studied at Leyden and practised as a lawyer. His remarkable abilities attracted attention, and he was made Pensionary of Rotterdam and Historiographer of the United Provinces. In 1619, having taken some part in politics, he was put in prison but in 1620 he escaped to France and lived for some years in Paris. In 1634 he entered the Swedish service, and was sent to Paris as ambassador. He died Aug. 29, 1645.

Grotius is known as the author of *De Jure Belli et Pacis* (Concerning the Law of War and Peace), a masterly work, published in 1625, which laid the foundations of international law. In 1915 a Grotius Society was founded in London for the study of international law.

Grotto Underground chamber either natural, artificially enlarged, or entirely artificial. Among natural grottoes is the picturesque Blue Grotto on the island of Capri which has been hollowed out by the sea and extends 176 ft. Near Naples is the Grotto del Cano, remarkable for its vapours, and in the Greek island of Antiparos, one of the Cyclades, there is a grotto with a fine stalactite formation.

Grouchy Emmanuel French soldier. Born in Paris, Sept. 5, 1766, he entered the army. He helped to suppress the rising in La Vendée in 1793, and took part in the expedition to Ireland in 1798. He served with distinction in Italy and against Austria. He went with Napoleon to Russia and was with him during the retreat from Moscow, and at the Battle of Leipzig. He led the beaten French armies back to Paris after Waterloo but on the return of the Bourbons escaped to the United States. In 1819 he returned to France, and in 1830 regained his rank as a marshal. He died May 29, 1847.

Ground-hog See **WOODCHUCK**

Ground-Nut Fruit of an annual leguminous herb (*Arachis hypogaea*). A native of S. America, it is now cultivated in most warm countries for its valuable oil. The flower stalk twists downward and buries the immature fruits in the soil where they ripen becoming wrinkled pods which contain one or two seeds. These are called monkey or pea nuts in Britain, and pea nuts in the United States.

Ground Rent Name given to the rent paid for the ground on which a house or other building stands, as distinct from the rent paid for the building itself. Ground rent is paid for all leasehold land and the owner who receives it is called the ground landlord. Freehold land does not pay ground rent.

Groundsel Common herbaceous plant (*Senecio vulgaris*) of the order Compositae. Found in all parts of the British Isles, it has deeply cut leaves and small yellow flowers succeeded by a white fluffy seed head. A sprig of groundsel in the cage is greatly appreciated by canaries and other cage birds.

Ground-squirrel See **CHIPMUNK**

Group Captain Rank in the Royal Air Force. It is below air commodore and above wing commander. It corresponds to that of colonel in the army and captain in the navy.

Grouse Name of a family of game birds. In Great Britain it is used for the red grouse or moor fowl (*Lagopus scoticus*), a form of the willow grouse. The grouse is preserved for shooting, and in Scotland and the north of England large moorland areas are devoted to it. The season lasts from Aug. 12 to Dec. 10. The bird is a table delicacy and weighs from 20 to 30 oz. The hen bird lays from 7 to 10 eggs. Other species of grouse are the wood grouse or capercaillie, the snow grouse, or ptarmigan, the spruce or Canadian grouse and the sage grouse. The sand grouse belongs to another family.

Groyne Low wall, built on the seashore and running seaward to check the lateral drift of sand and shingle. It is made of masonry, concrete or heavy timber bolted to piles. Sand and shingle tend to accumulate on one side of the groyne, and so raise the general level of the foreshore, thus forming a barrier against the encroachment of the sea. Groynes are also constructed on rivers to regulate the flow of water and to prevent erosion of the banks.

Grub Street Name of an old London street. It ran from Foredock Street to Chiswell Street and since 1830 has been called Milton Street. Here, in the 18th century, literary hacks of the poorest kind are said to have made their homes. Since that time the term has been used to denote writers who eke out a precarious living.

Grundy Mrs. Personification, in Great Britain, of propriety, respectability and convention. "What would Mrs. Grundy say?" was the frequent remark of Dame Ashford, a character in *Speed the Plough*, a play written by Thomas Morton in 1798. It became a catchword and still persists.

Gruyere District of Switzerland. It is in the canton of Fribourg around the little town of Gruyères. It gives its name to a kind of cheese made here.

Guaco Name of a plant of the order *eupatoriaceae*. It grows in S. America, where it is believed that any one who eats it cannot be harmed by snake bite.

Guadalajara City of Mexico. It is 280 m. from Mexico City and lies on the coast. The chief building is the cathedral, an enormous and magnificent structure, dating from the early 17th century. There is a university. The city is a prosperous manufacturing and trading centre. Pop. 143,400. An older Guadalajara is a town of Spain, 33 m. from Madrid.

Guadalquivir River of Spain. It rises in the mountains in the south of the country and flows mainly in a westerly direction, to the Atlantic Ocean, which it enters about 20 m. north of Cadiz. It is navigable as far as Seville, while barges can reach Cordova. Its length is 370 miles.

Guadeloupe Two islands of the W. Indies belonging to France. Called Grande Terre and Petite Terre they form part of the Lesser Antilles and lie between Antigua and Dominica, being divided by a narrow channel. The two cover 522 sq. m.

but with their dependencies, five smaller islands, the total is 688 sq m. Coffee, sugar, bananas, cocon and other tropical products are exported, as is rum. Basse Terre is the capital, but Pointe-à-Pitre is the chief port and much the largest place. The affairs are managed by a governor and a council. Pop (1932) 267,407.

Guaiacum See LIGNUM VITAE

Guam Island of the Pacific Ocean. It belongs to the United States and is the largest of the Marianas Islands. It is 32 m long and covers 206 sq m. Agaña is the capital and Pita the chief port. Coconuts, copra, sugar and other tropical products grow, and there are large forest areas. Guam was taken from Spain in 1893. Pop 18,509.

Guanaco Animal found in S. America. It is really a wild llama and lives in large herds in the mountains. It is about 4 ft. high at the shoulder.

Guano Accumulated excrement of sea-fowl. Deposits 50 or 60 ft thick, found on islands of Peru, have been utilised for manure since about 1841. It owes its value to its content of ammonia and phosphorus. The deposits are now much depleted, but have been supplemented by others in W. Africa.

Guarantee Promise or undertaking to make good any default by another person. An overdraft at a bank is often guaranteed. In such a case the person guaranteeing it will make good any loss the bank may sustain through the failure of the borrower. Similarly, debts owing to individuals and firms are sometimes guaranteed.

Sometimes a guarantee is required from a person who is appointed to a position of trust, a cashier for instance. To give such, guarantee associations exist. The employee, or employer, makes an annual or other payment to such a society which, in return, will make good any loss the employer may suffer through the employee's misdeeds.

Guardian Person who looks after another, usually a minor or a person of weak intelligence. A child's natural guardian is the father or mother, but when they are dead one or two guardians are usually appointed by will. The powers of the guardian are very much the same as those of the parent. Sometimes, when disputes arise, a guardian is appointed by the Court of Chancery, and to this court a guardian can appeal if in a serious difficulty with his ward.

Another kind of guardian was the person elected in England and Wales to look after the administration of the Poor Law. In each union of parishes there was a Board of Guardians. They were abolished in 1929 and their duties transferred to Public Assistance Committees appointed by the county and county borough councils.

Guards Name given to military units with special physical and other qualifications. The first guards were the picked soldiers who were selected for the honourable duty of guarding the person of the king or leader. The Roman emperor had the Praetorian Guard and the Kings of France had regiments of guards. Napoleon had his old and his young guard, and there were guards in other armies, notably the Prussian.

In England, apart from the Yeomen of the Guard, guards first appeared in the time of Charles II. Regiments of them were then formed, and these, soon divided into horse and foot, are the ancestors of the guards of to-day.

There are two regiments of horse guards in the British Army, the Life Guards and the Royal Horse Guards, they form the sovereign's escort on ceremonial occasions. Of foot guards there are five regiments, Grenadiers, Coldstream, Scots, Irish and Welsh. Together they form the brigade of guards, with a depot at Caterham, Surrey.

Guatemala Republic of Central America. It lies to the south-west of Mexico, and touches both the Atlantic and the Pacific Oceans, although it has only a short coastline on the former. Much of the area is mountainous and there are some volcanoes, whilst earthquakes are frequent. The area is 42,353 sq m. Guatemala is the capital. Other places are Quetzaltenango, Cobán and Zacapa. The chief ports are Puerto Barrios and Livingston on the Atlantic, and San José and Champerico on the Pacific. The chief products are coffee and sugar, bananas and other tropical plants and fruits. From here the United States gets most of its chicle from which chewing gum is made. There are considerable forests, especially of mahogany and dyewoods, rich deposits of minerals, though little is mined.

Guatemala is governed by a president elected for six years, a national assembly, elected by universal suffrage for four years, and a council of state. The people are chiefly Roman Catholics. Military service is compulsory. There is a central bank, and the unit of currency is the quetzal equal to the American dollar. The population is about 2,000,000, of whom over half are Indians. In the land are many remains of Maya civilisation.

Guatemala was a Spanish possession for about 300 years before 1821 when it became free. From 1821 to 1847 it was part of the confederation of Central America, it then became an independent republic. Early in the 20th century the United States interfered to put down civil war, which had been raging for some years.

Guatemala City of Central America, the largest and most important capital of the republic of the same name. It is 80 m from San José, its port on the Pacific, and is also connected by railway with the Gulf of Honduras on the Atlantic. There have been four cities of this name, three being destroyed by earthquakes the third in Jan., 1918. The new city is laid out on spacious lines about 12 m south of the old site. There are some manufactures and a considerable trade. Pop 165,928.

Guava Small tree that grows in the W. Indies. It bears white flowers and the fruit, shaped somewhat like a pear, is edible. It has an acid taste, but is sweeter than the lemon. It is made into jelly and into a kind of cheese.

Guayaquil City and seaport of Ecuador. It stands on the estuary of the River Guayas and is 150 m from Quito, the capital of the republic. The industries are shipping, for which there is a good harbour, and a number of manufactures. It is the terminus of the railway line to Quito. Pop. (1932) 120,000.

The Gulf of Guayaquil is an opening of the Pacific Ocean. It is 100 m. wide at the mouth and contains the island of Puna.

Gudgeon Genus of small fresh water fish (*Gobio fluviatilis*). Common throughout Europe it is found in rivers and streams of the British Isles. The angles of the mouth have barbels like the carp, to which

It is related. The flesh has a delicate flavour. It is very easily caught by anglers.

Guedalla Philip British author. Born March 12, 1889. He was educated at Rugby and Balliol College Oxford, where he was President of the Union. He became a harrist and was legal advisor to certain government departments during the Great War. He won a reputation by his historical writings, notably *The Partition of Europe*, 1715-1815, 1914, and *The Second Empire*, 1922, and increased it by his sketches and essays, such as those in the volumes *Supers and Supermen*, 1920, and *A Gallery*, 1924, and by his biography of Lord Palmerston, 1926. In 1931 his life of the Duke of Wellington appeared. In 1933 he published *Letters of Queen Victoria and Gladstone*, and in 1934 *The Hundred Days*.

Guelder Rose (*Tiburnum opulus*) Small tree of the honeysuckle order. A native of Britain. It is distributed in temperate and colder northern regions. Its roundish clusters of small creamy flowers are ringed by larger white sterile corollas, and are succeeded by scarlet fruits. It grows to a height of 7 or 8 ft. A cultivated variety, with all flowers sterile, is called the snowball tree.

Guelph City of Ontario, Canada. It is 46 m from Toronto on the O.N.R. and C.P.R. There are some manufactures and a trade in agricultural produce. Here is the Ontario Agricultural College. Pop. 21,075.

Guelph Family. See WINDSOR.

Guernsey One of the Channel Islands. It is 9 m long and covers 244 sq m, being the second largest of the group. St. Peter Port is the capital. St. Sampson's is next in size, the others being villages only. There are some old churches and manor houses in the island, as well as prehistoric remains. The chief industry is market gardening, fruit, flowers, and vegetables being largely grown. Its breed of cattle is famous and fishing is carried on. Many persons earn a living by catering for the numerous visitors. There is a regular service from Southampton both by air and sea.

The island has its own government under the lieutenant-governor and bailiffs and for this purpose includes Herm and Sark. The royal court is the court of justice, and the legislature is called the States. It consists of both elected and official members. Guernsey is in the diocese of Winchester. Pop. 33,315.

Guerilla Spanish word meaning a little war and used for irregular warfare. Guerilla warfare consists in attacks upon a regular army by bands of irregular troops usually the inhabitants of an invaded country. There was a good deal of guerilla warfare when the French troops were in the Spanish Peninsula between 1808-1812. The Boers resorted to guerilla warfare in 1901-02, and in the 20th century the French and Spanish forces in Morocco suffered a good deal from it.

Guesclin Bertrand du Constable of France. Born in Brittany in 1330. He made a name for himself by his exploits in fighting the English in Brittany. In 1364 he defeated the King of Navarre's army at Cocherel and four months later he was taken prisoner by the English at Auray. On being set free he took part in the war against Pedro the Cruel in Spain, and in 1367, at the battle at

Navarrete, he was again taken prisoner by the Black Prince. He captured Pedro in 1369, however, and in 1370 was made constable of France by Charles V, later recovering much territory from the English. He died July 13, 1380.

Guest Sir Josiah John Welsh ironmaster. Born Feb. 2, 1785, at Dowlands, Glamorganshire, he was the grandson of John Guest, founder of the Dowlands Iron Works. Of these works he became manager in 1816 and made them the largest of their kind in Great Britain. He was M.P. for Houghton, 1826-31 and for Merthyr Tydfil, 1832-52, and was made a baronet in 1838. He died Nov. 26, 1852. His eldest son was made Baron Wilmorine, and one of his grandsons, Frederick Edward Guest (b. 1875), is a soldier and politician. The Dowlands Iron Works now belong to the firm of Guest, Keen and Nettlefolds.

Sir Josiah Guest married Lady Charlotte, daughter of the Earl of Lindsey. She published the collection of Welsh tales called *The Mabinogion*. She married a second time, and died Jan. 15, 1895.

Guiana District in the north-east of S. America. It is divided into three portions, belonging to Great Britain, France and the Netherlands. To the south is a district belonging to Brazil sometimes called Brazilian Guiana. Its area is about 175,000 sq m.

Guiana British. British crown colony. It is on the north coast of the continent and covers 89,500 sq m, its neighbours being Venezuela, Brazil and Dutch Guiana. It is largely forest, only a small portion of the soil being cultivated. Georgetown is the capital. The three rivers are the Berbice, Essequibo and Demerara. Sugar, rice and other tropical products are grown, and the exports include timber and balsa. The colony is under a governor and an executive council, since 1928 there has been a legislative council. English law prevails. English and American coins circulate. Having been a Dutch possession for many years, this part of Guiana was taken by Great Britain in 1796 and ceded to her in 1814. Pop. (1931) 318,312.

Guiana Dutch. Colony of the Netherlands. It is on the north coast of South America between British and French Guiana with Brazil to the south. It covers 54,300 sq m and is known also as Surinam. Paramaribo is the capital. Pop. (1931) 165,888.

Guiana French. French colony. It lies on the north coast with Dutch Guiana on the west and Brazil to the east and south. At Maroni there is a penal settlement. Sugar, rice and other tropical products are grown and there are immense areas covered with timber. The colony is under a governor and a council. It sends a deputy to the chamber in Paris. Cayenne is the capital. The area is 34,740 sq m. Pop. (1931) 22,169.

Guides Corps of Corps in the Indian Army. It was first raised in 1846 for service on the frontiers by Sir Henry Lawrence, and was called the Queen's Own Corps of Guides. The corps includes both cavalry and infantry, and its headquarters are at Mardan. The guides have a fine record of service, which is recorded in *The Story of the Guides*, by Sir G. J. Youngblood.

An earlier corps was a force in the French Army in the time of Napoleon.

Guienne Name of one of the old provinces of France. It was in the south.

west of the country and was at first part of Aquitaine. It soon became a separate province with Bordeaux as its capital and from 1154 to 1451 was an English possession. After its recovery by France it was united with Gascony.

Guilbert Yvette French lyric artist. Born in Paris in 1869, she worked for a dressmaker and on a newspaper. In 1893 she appeared on the stage in Paris, and was for many years the chief French actress in her own line. She appeared in London and other capitals, and passed some time in the United States. She has written two novels, volumes of autobiography and a book on how to sing a song, which has been translated into English. In private life she is the wife of Dr M. Schiller.

Guild Association of men in a common employment or cause. The word means a payment, and comes from the Anglo-Saxon *gild*. The members subscribed to the guild, the money being used for the assistance of the poorer brethren, also for feasts and Masses for the dead. The earliest guilds appeared in the 12th century, and in a short time as trade and industry grew, they became very powerful. In some cases they secured a charter, and became the council or governing body of the town; this accounts for the use of the word guildhall for a town hall.

Other guilds remained craft guilds, or associations of workers in the same trade. These controlled the trade, regulated the supply of apprentices and acted very much as modern trade unions do. The guilds began to decay about the 16th century, and disappeared with the coming of the industrial revolution. In London, however, the guilds remain as the city livery companies, of which there are 77, although their original functions have ceased. In the 19th century the word was revived for a voluntary association of workers and also for a religious association. Guilds were established, for instance, in the building trade.

Guildford City and market town of Surrey. It is 29 m from London and is reached by two branches of the S. Ry. The Wey flows past the town. There are remains of the castle, including the keep and the gatehouse in which is a museum. Abbot's Hospital, an almshouse, founded by George Abbot, Archbishop of Canterbury, is also worthy of mention. In 1927 Guildford was made the seat of a bishop and a new cathedral has been planned. There is an agricultural trade, flour mills and breweries are among the chief industries. The town has extensive caves which have been lit and opened to the public. Pop. 30,800.

A small town of Western Australia is called Guildford. It is 9 m from Perth. Pop. 2500.

Guildhall Hall erected by a mediaeval guild to house its meetings. As in many towns the guilds and the governing body of the town were identical, guildhalls became the headquarters of the municipal corporations, and this word is still used for some of them. Of existing guildhalls the finest is the one in London, the headquarters of the city corporation. It is at the end of King Street, E.C., and was built in the 15th century. It was damaged in the Great Fire, since when much restoration work has been done. A thorough restoration was carried out in 1864. The chief room is the Great Hall, in which the city banquets are held. Connected with the Guildhall is a library and reading-room, an art gallery and a museum. Additional buildings for the work of the corporation, including a court

room, were erected in the 20th century. The Guildhall School of Music is in John Carpenter Street, London, E.C. 4.

There are guildhalls in Exeter, York, Rochester and other cities and towns, and some modern buildings, the one at Nottingham, for instance, have been given this name.

Guild Socialism School of Socialist thought which became prominent after 1910 in Great Britain. Its main idea is one of self-government in industry and the organisation of the economic life of a community on a functional basis. In 1915 the National Guilds League was formed by G. D. H. Cole and others, and in the course of the war, the shops' stewards movement was begun, and the workers gained more control. After the war Guild Socialism spread, and the National Building Guild executed many important housing contracts. The National Guilds League is now dissolved, but some of its ideas have become embodied in the Socialist scheme, notably the belief that power with responsibility should be as widely diffused as possible throughout the mass of the people.

Guillemot Genus of long-billed, short-tailed diving birds (*Uria*) of the auk family. They are abundant on rocky British coasts in the breeding season, being there represented by the common *U. troile*, and the black guillemot. Both lay eggs on the cliffs. The birds are found also in the northern parts of Europe.

Guillotine Instrument for decapitating criminals. It was adopted in France during the French Revolution and was named after Ignace Guillotin, a physician who recommended its use to the Assembly in 1789. It consists of an upright frame in which is suspended a heavy triangular blade which, when released by a cord, falls upon the neck of the victim.

The word is applied also to various types of machine used for cutting paper and cardboard.

Guinea English gold coin. It was first minted in 1663 from gold from the Guinea coast and was then worth 20s. In 1717 its value was fixed at 21s. Coins for five and two guineas were minted, and half and quarter guineas were issued. In 1817 the minting of the guinea ceased, but professional fees are still usually paid in guineas.

Guinea Name given in the 15th century to much of W. Africa. The Guinea coast lies between the Senegal River and Cape Negro, that is, along the coast of the great Gulf of Guinea.

The Gulf of Guinea is part of the Atlantic on the west coast of Africa. In it are a number of bays including the Bights of Benin and Biafra.

Guinea French French colony in W. Africa. It is situated between Sierra Leone and Portuguese Guinea, its remaining boundaries being other French possessions, and has a coast line on the Atlantic Ocean. It covers 89,436 sq m. Conakry is the capital and chief seaport. Rubber, palm oil, rice, cotton, bananas and coffee are the chief products. Many cattle, sheep and goats are kept. The colony has a railway line from Conakry to the Niger, and some good roads. Pop. (1931) 2,236,968.

Guinea Portuguese Portuguese colony in W. Africa. It lies between Senegal and other territories belonging to France, with a coastline on the Atlantic Ocean. Its area is 13,944 sq m. It includes the archipelago of

Bijagoz and the island of Bolama. Bolama, on the island, is the capital, and Bissau is the chief port. The colony exports rubber, ivory, oil and hides. Pop (1930) 364,929.

Guinea Spanish Colony of Spain in W Africa. It consists of Rio Muni on the mainland and the islands of Fernando Po, Annohon, Corisco and Great and Little Elobey. The capital is Santa Isabel (pop 8345) on Fernando Po. There is very little export trade. The area is 10,036 sq m. Pop 140,000.

Guinea Fowl Game bird (*Amdida melanogaster*). It has a short bill, a red wattle and a fleshy casque. The Portuguese brought it from Africa to Europe in the 16th century. It lives in large flocks in Africa and parts of Europe. The bird is used for the table and its eggs are eaten. It was a delicacy to the Greeks and Romans.

Guinea Pig Small domesticated rodent. It is a descendant of the cavy of Peru, and was introduced from Guinea into Europe in the 16th century. There are many varieties. The animals, which are very prolific, are kept as pets and are much used by scientists for experiments.

Guinevere Wife of King Arthur. According to the story as told in the *Morte d'Arthur*, she was a daughter of the King of Camlloyd. She married Arthur, but was unfaithful to him and accepted the love of Lancelot. This led to the break up of Arthur's court and the death of the king. Guinevere then went into a nunnery at Amesbury where she died. In other versions of the story the queen's lover was Modred.

Guinness Name of an Irish family of brewers. Arthur Guinness, who owned a brewery at Leixlip in the 18th century, transferred it to Dublin where it became famous for its stout known as porter. His grandson, Benjamin Lee Guinness (1798-1868), greatly enlarged the business, which in 1856 became a limited company. He was made a baronet in 1867. His oldest son, Sir Arthur Edward Guinness, was, in 1880, created Baron Ardilaun. He died in 1915 without sons. Another son, Edward Cecil Guinness, was made Earl of Iveagh in 1919.

Guisborough Urban district and market town of Yorkshire (N.R.). It is 9 m from Middlesbrough with a station on the L.N.E. Rly. The industries are connected with the iron ore deposits near The town has ruins of a priory. Pop (1931) 6006.

Guiscard Robert Norman soldier. Born in Normandy about 1020, he was one of the many sons of Tancred of Hauteville some of whom had captured Apulia from the Greeks. Following his elder brothers to Italy about 1016 in 1057 he succeeded as Count of Apulia being recognised by the Pope as duke. Invading Greece he won the Battle of Dyrrachio in 1051 then returning to Italy to the aid of Pope Gregory VII, he drove the emperor Henry IV from the country. He died in July 1085.

Guise Town of France. It is on the Oise, 30 m from Laon and is a manufacturing centre. It is chiefly famous however for giving its name to a family that played a large part in the affairs of France. The chief building is the castle. Pop (1931) 7,370.

Early in the Great War Guise was occupied by the Germans and on Aug 23 1914 there was a battle near here between the

French and the Germans. The French 5th Army, led by Lanrezac, stopped in its retreat and turned on the pursuing Germans, who were driven back across the Oise, but the arrival of reinforcements to them, and the failure of support to the French, turned the tide, and on the 30th, Lanrezac broke off the engagement and continued his retreat. In the autumn of 1918 the Germans were driven from Guise.

Guise Famous French family. The countship of Guise was held by a junior branch of the ruling family of Lorraine. Clauds (1496-1550), second son of Rene II, Duke of Lorraine inherited it and the Duchy of Aumale in 1508, and in 1513 married Antoinette de Bonrhone, a member of the royal family. He fought with distinction in several campaigns, and in 1526 became Governor of Champagne and Duke of Guise.

The 2nd duke was Francis (1519-63) who, after a distinguished career as a soldier, became, under Francis II, the virtual ruler of France. His brother, Charles (1524-74), Archbishop of Rheims and a cardinal shared his brother's power.

Henri, the 3rd duke (1550-88) was, like his father, a soldier, and played a conspicuous part in the massacre of St Bartholomew 1572. He conspired against Henry III, who had him murdered Dec 25, 1588.

These dukes and their relatives were the Guises who were so prominent in French history in the 16th century. The later dukes were less important. Henri, the 5th duke, was Archbishop of Rheims before he succeeded to the title. The last duke was Francis who died in 1675. A member of the family, Mary, married James V of Scotland and was the mother of Mary, Queen of Scots.

Guiseley Urban district of Yorkshire (N.R.). It is 2 m from Otley, on the L.M.S. Rly., and the woollen industry is the main occupation of the inhabitants. Pop (1931) 5607.

Guitar Musical instrument with a long neck and fretted fingerboard. Its music is written an octave higher than it is sounded and on the treble staff. The guitar is Spanish, and possibly a descendant of a bowed instrument.

Guitry Lucien Germain French actor. Born in Paris in 1860, he first appeared on the stage in *La Dame aux Camélias*, 1878. Then after some years at St Petersburg, he returned to Paris where he was a producer at the Comédie Française and manager of the Renaissance Theatre. He was the foremost French actor of his time. He died June 1, 1925.

His son Sacha was born at St Petersburg, Feb 21, 1885 and made a name both as actor and as dramatist. Among his successful plays are *Le Page*, *Nono*, *La Ciel*, *Deburau*, *Jacqueline* and *Mozart*. His wife was the actress Yvonne Printemps.

Guizot François Pierre Guillaume French scholar and politician. Born at Nîmes Oct. 4 1787 he was educated being a Huguenot in Geneva. Later he studied law in Paris and began to write. In 1812 he was made Professor of Modern History at the university and in 1814 he entered the public service as Secretary of the Interior. In 1830 he entered the Chamber of Deputies, and was made a minister. At this time he did a great work for education establishing schools all over the country. In 1840 Guizot was sent as Ambassador to London but he soon returned

to France as Foreign Minister and then Prime Minister to Louis Philippe. His conduct of affairs, both at home and abroad, was far from successful and very unlike the liberal ideas he had advocated in his early days. In 1848 he shared his master's fate and escaped to England. He returned in 1849 and gave his concluding years to writing. He died Sept 12, 1874.

Guyot's writings are chiefly historical and some deal with the history of England, of which country he was a great admirer. His *History of Civilisation in Europe*, long a classic, is perhaps the best.

Gujarat Town of India. It is in the Punjab, 75 m from Lahore and is the capital of Gujarat district. It is also a manufacturing town. Here, on Feb 21, 1849, Lord Gough defeated an army of Sikhs, 60,000 strong. The victory led to the capture of Gujarat, then one of their fortresses, and the surrender of the Punjab.

Gules One of the seven heraldic colours. It means red and is shown on heraldic drawings by vertical lines drawn closely together.

Gulf Stream Oceanic current in the North Atlantic. A warm north current, driven by the N.E. trade winds, divides at the W Indies, one part passing through the Caribbean Sea and the Gulf of Mexico, the other skirting the N.E. shores of the islands. Near Florida, these currents meet and flow N.E. as the Gulf Stream, at first 30 m wide and with a speed of 4 knots. It gradually becomes shallower and cooler, and where it encounters the prevailing west winds of the N. Atlantic, spreads out into the Gulf Stream drift which reaches Great Britain and W Europe, where, still warmer than the surrounding water, it raises the temperature of W Europe considerably.

Gulfweed Coarse, olive-brown sea weed (*Sargassum bacciferum*) of the bladderwrack family. It grows in the Gulf of Mexico and is carried northwards by the Gulf Stream, sometimes reaching British waters and even Malta. It collects in the Atlantic, in what is known as the Sargasso Sea, where Columbus saw it in 1492, and covers enormous areas. Its branches bear stalked berry-like air bladders which keep it afloat.

Gull Family of web-footed sea birds, *Larnee*. The upper bill tends down over the lower; the tail is usually squared. They are white or grey in colour and are strong swimmers and powerful and swift in flight. They move in flocks and their nests are usually in cliffs. Their eggs are edible. Of regular British residents the sea-mew (*L. canus*), misnamed the common gull, is frequently seen inland. The bird Londoners see from the Thames bridges in winter is the black-headed gull (*L. radibundus*), the one familiar to visitors on the south coast is the herring gull (*L. argentatus*).

Gullane Watering place of East Lothian, or Haddingtonshire. It stands on Gullane Bay, part of the Firth of Forth, and is 20 m. from Edinburgh, on the L.N.E. Rly. Gullane figures in R. L. Stevenson's *Catriona*. Pop 1440.

Gum Name of various trees. Chiefly found in Australia, they grow to an enormous height with a corresponding girth, and specimens over 500 ft high and 80 ft in circumference have been known. The timber and the bark are both valuable, they also produce a resinous juice. The blue gum tree,

which grows in Europe, produces a powerful antiseptic oil. Gum trees also grow in N. America, species being the sweet gum, cotton gum and black gum.

Gum Substance exuding from certain plants and hardening on exposure to the air. It is a tasteless, odourless, amorphous carbohydrate, yielding an adhesive liquid, and is either soluble in water, as gum arabic, swelling up and forming a mucilage, as gum tragacanth, or partly soluble, partly mucilaginous, as cherry gum. The basic ingredient of oshwing gum is chicle gum, obtained from a tropical American tree. British gum, used on postage stamps, is dextrine prepared artificially by roasting starch. Gum resins are vegetable juices combining gum, soluble in water, and resin, soluble in alcohol. When powdered they form emulsions in water, e.g., ammoniacum and myrrh.

Gum Flesh tissue, covered by mucous membrane, connected with the membrane enveloping the jaw bones. It forms a raised collar round the base of each tooth's crown. Scurvy or neglected teeth may cause inflammation, abscesses, resulting from carious teeth or chill, may break through and form gumboils. Should the abscess produce pus in the socket between tooth and gum its discharge is called pyorrhoea.

Gumbinnen Town of East Prussia, Germany. It is an industrial town, 65 m by rail from Königsberg, and stands at the junction of two little rivers, the Plessa and the Romana. Pop 19,500.

Near Gumbinnen, on Aug 20, 1914, a large Russian army, having advanced into East Prussia, met a smaller German force which had retreated before it. The Germans made a good fight, holding their entrenched positions throughout the day, but in the end they were compelled to retreat to Königsberg.

Gun General term for various kinds of firearms. It includes all varieties from the sporting gun and rifle to the heavy cannon of artillery and naval ordnance. The sporting guns are all breechloaders, and most are double barrelled with a smooth bore of varied dimensions. In artillery and naval ordnance guns vary greatly in size, calibre and character, from the field and machine gun to the long range and heavy cannon of warships.

According to the Firearms Act of 1920, no person is allowed to possess, use or carry any firearms unless a licence has been granted by the police, and further, no sale of firearms by a registered dealer may be made unless a licence is produced. The licence costs 10s a year. In addition every person who possesses a gun, with some few exceptions, must take out a certificate which costs 5s for the first year, and 2s 6d a year afterwards. It is renewable every three years. See ARTILLERY.

The Gunmakers' Company is one of the smallest livery companies of the City of London.

Gunboat Small type of vessel carrying heavy guns. From its light draught, it is intended for operations in shallow coastal waters or rivers. Gunboats were formerly of value for patrolling the large rivers of China and Africa, but they have been superseded by larger and more efficient craft. In the Great War a number of river or coast service monitors, originally intended for Brazil, were used for operations in Mesopotamia, and were officially classed as gunboats.

Guncotton Explosive compound, also known as pyroxylin or nitro cellulose. It consists of highly nitrated cellulose prepared from cotton waste, which is soaked in a mixture of sulphuric and nitric acids diluted with about 8 per cent of water and afterwards washed and dried. It is used with nitroglycerine in making smokeless powders and cordite, also in blasting explosives. Guncotton has the advantage over gunpowder in its smokeless combustion, rapidity of action and resistance to moisture.

Gunmetal Bronze alloy. Consisting typically of 90 per cent of copper and 10 per cent of tin, it thus approximates to the composition of ancient bronze. It was used formerly for making cannon, hence the name, and is employed now for castings of bearings and other parts of machinery, bolts and fittings, and some kinds of pumps. Usually the composition of modern gun metal averages about 88 per cent of copper, 10 per cent of tin and 4 per cent of zinc, the latter being sometimes replaced by lead for bearings.

Gunnerybury District of Middlesex. It is 13 m from London, on the L M S and District Rlys. Gunnerybury House was the residence of Amelia, daughter of George II. Later the estate, on which a new house was built, became the property of the Rothschild family. After the Great War it was bought by the councils of Acton and Ealing, and made into a public park.

Gunpowder Oldest known explosive. It consists of a mixture of saltpetre, charcoal and sulphur, in varying proportions according to the purpose for which it is required. For firearms it has been largely superseded by smokeless powders, but it is still used for blasting purposes and in some kinds of sporting cartridges. The charcoal used in making gunpowder is obtained from dogwood, alder or willow but in Germany coke from lignite has been used instead of the dearer charcoal.

Gunpowder Plot Plot to blow up the Houses of Parliament on Nov 5 1605, the day on which James I was to open Parliament. The plot had been concocted by a group of discontented Roman Catholics, but one of these, Francis Tresham, had sent a warning to a friend in Parliament, Lord Mountague. This led to the discovery of Guy Fawkes, a brave but desperate soldier in the cellar. Fawkes was tortured and executed, and the other conspirators, including Robert Catesby, were captured later and executed. Many books and pamphlets have been written about the plot.

The plot made a great impression in the country and since then Nov 5 has been commemorated by the lighting of bonfires and by fireworks displays. Since then, too, the vaults under the Houses of Parliament are always searched before the opening ceremony.

Gunter Edmund. English mathematician. Born in Hertfordshire in 1551 he was educated at Westminster School and Oxford and in 1615 was made vicar of St George's Southwark. Appointed Professor of Astronomy at Gresham College 1610 he was the inventor of several useful mathematical devices known by his name. These include Gunter's chain 22 yds long and of 100 links which is used in surveying. Gunter's scale used in trigonometry and navigation, Gunter's quadrant for estimating altitudes,

and time, and Gunter's line, a logarithmic line. He died Dec 10, 1626.

Gurkha Name used for certain tribes who live in Nepal. They appear to have settled in Nepal in the 16th century. Owing to their fighting qualities they are recruited for the Indian army, in which there are several Gurkha regiments. Their enlistment is regulated by an agreement between Nepal and the Government of India. Their chief weapon is a heavy curved knife called the kukri.

Gurnard Family of fishes allied to the hullheads. They have spiny, armoured heads, crawl over the sea floor on six sensitive, finger like feelers, and emit grunt like sounds when captured. British coasts yield the red gurnard, the grey gurnard, and, less commonly the streaked and lantern gurnards, besides the great sapphire and piper gurnards, which sometimes weigh as much as 5 lb.

Gurney Name of a famous family of bankers. It appeared in Norfolk in the 12th century and in the 17th became associated with the Quaker movement. John Gurney became a merchant in Norwich and his sons, John and Henry, became bankers in that city. A later member of the family was Joseph John Gurney famous as a pious theologist. He was the brother of Elizabeth Fry and his home life at Earham Hall is described in *The Gurneys of Earham* by A Haro. He died Jan 4, 1847.

Joseph J. Gurney had a brother, Samuel, who was associated with the London banking firm of Overend, Gurney & Co which failed in 1866. This did not include the bank in Norwich, which, in 1866, was amalgamated with Barclay's Bank.

Gurney Name of a family of shorthand writers. Thomas Gurney (1705-1770) was born in Bedfordshire and was for a time a schoolmaster. In 1737 he was appointed shorthand writer at the Old Bailey, London, the first appointment of its kind. He also became shorthand writer in other courts of justice and in the House of Commons. He published, in *Brachygraphy*, a description of his system. He died June 22, 1770, and was succeeded by his son, Joseph (1744-1815), who carried on the business.

Joseph's younger son, William Brodie Gurney (1777-1855) was, in 1813 appointed official shorthand writer in the Houses of Parliament, and the family retained that position until the 20th century. His son, Joseph Gurney (1804-79) took over the work in 1849, and, on his resignation in 1872, the post passed to his nephew, W H Gurney Salter. On the latter's retirement the position passed away from the family.

Gusher Term used for an oil well. From these the oil spurts out without assistance as soon as the supply has been struck. The flow from some of the American gushers is enormous sometimes as much as 50,000 barrels in a day. If it is desired to stop the flow, the wells are closed by an elaborate process called capping.

Gustavus Name of five kings of Sweden the second being known as Gustavus Adolphus. The first two belonged to the house of Vasa a name given to Gustavus a son of Eric, a Swedish nobleman. Born May 12 1496, he won fame in fights with the Danes who under his leadership were driven from Sweden. The people then chose him as their king in 1523 and later made the crown

hereditary. He did a good deal for his country which, under him, adopted the reformed religion. Gustavus died Sept 29, 1560

Gustavus III. was king from 1771 to 1792 Owing to his love of French customs and his extravagance, he was very unpopular and was shot in Stockholm, March 29, 1792 **Gustavus IV.**, a son of Gustavus III, became king when only 14 years old After an unprosperous reign, he was dethroned in 1809 He lived mainly in Switzerland until his death, Feb 9, 1837

Gustavus II. King of Sweden, known as Gustavus Adolphus A son of King Charles IX, he was born in Stockholm, Dec 9, 1594 When quite young he began to share in the government and, in 1611, on his father's death he became the third king of the Vasa family Much of his reign was spent in warfare, but he found time to improve the state of his country, which was poor in every way

Gustavus is chiefly famous as a soldier Under his direction the Swedish army became remarkably efficient, proving its worth in wars conducted by the king, who forced Denmark to surrender territory taken from Sweden, and compelled Russia to give him part of Finland and Livonia Later he was equally successful in his struggle with Poland. In 1630, having won for himself the reputation of the first soldier in Europe, Gustavus led his experienced army into Germany to assist the Protestants in the Thirty Years' War For two years he dominated the scene, winning one victory after another, and changing the fortunes of the struggle His two greatest victories were Breitenfeld, Sept. 17, 1631, and Lützen, Nov 16, 1632 At Lützen he was killed. Gustavus left his throne to his only child, a daughter, Christina

Gustavus V. King of Sweden A son of Oscar II, he was born July 16, 1858, and served for a time in the army In 1907 he became king Gustavus married in 1881 a daughter of the Grand Duke of Baden Their family consists of two sons, the Crown Prince Gustavus Adolphus, and William, Duke of Södermanland. The former married, firstly, Margaret, daughter of the Duke of Connaught, and secondly, in 1923, Lady Louise Mountbatten. By his first wife he had five sons

Gut Tough, semi-transparent material prepared from the intestines of sheep and other animals It is used for various purposes The intestines, after being cleaned, scraped and washed, form the coverings for sausages, or, cut into strips which are spun or twisted, are used for violin strings, cords for tennis rackets, etc Silkworm gut, employed for dressing the hook ends of fishing tackle, is prepared from the glutinous secretion of the silk glands of the silkworm.

Gutenberg Johann German printer who became an artisan at Strasbourg, where he worked on an idea that had come to him, nothing less than the printing of books from movable type Returning to Mainz in 1448, he obtained money from Johann Fust and set up a printing press Some work was done, but it is not certain that all the books attributed to Gutenberg were from his press. Indeed, printing was probably done in rough fashion before his day, but the value of his work cannot be overestimated He died about 1468 In 1901 a Gutenberg Museum was opened at Mainz

Guthrie Sir James Scottish painter. Born at Greenock, June 10, 1859, and educated at Glasgow University, he studied art in London and Paris He became a member of the Glasgow School of Painters and in 1902 was elected president of the Royal Scottish Academy. He had been an associate since 1888 and a member since 1892 At first a painter of subject pictures, he later concentrated on portraits *The Funeral in the Highlands, To Pastures New and Schoolmates* are among the best known of his subject paintings He died Sept 6, 1930

Guthrie Thomas Scottish divine Born July 12, 1803, he was educated at the University of Edinburgh and in Paris He became a minister in an Aberdeenshire village, and was chosen minister of the Old Grevillars Church in Edinburgh in 1837 In 1840 he moved to S John's Church In 1843 Guthrie followed Chalmers in leaving the established church A church, Free S John's was opened for him and there he remained until his retirement in 1864 He was moderator of the church in 1862 and for some years edited *The Sunday Magazine* He died Feb 24, 1875 His son, Charles John Guthrie (1849-1920) became a Judge of the Court of Session as Lord Guthrie

Guthrum Leader of the Danes In 871 England, where he won several successes over Alfred the Great In 878, however, Alfred was victorious at Ethandun, and he and Guthrum made the Treaty of Wedmore by which England was divided between them Guthrum became a Christian and reigned over the Danelagh until his death in 890

Gutta Percha Brownish red substance which exudes from the stems of certain Maayan trees Formerly *Palaequum gutta* was the chief source of supply, but, owing to reckless destruction, it is now only met with in botanic gardens, gutta percha being obtained from other species and the allied *payena leeri* Gutta percha is tough, inelastic, plastic at 149°F, and less resilient and durable than rubber It is used for insulating cables, for belting and for acid-proof vessels

Guy Thomas English bookseller and founder of Gny's Hospital Born in Southwark, about 1645, and educated at Tamworth, he was apprenticed to a London bookseller In 1669 he started in business for himself He was MP for Tamworth, 1695-1707 He died Dec 27, 1724

Gny was very successful in his business and increased his fortune by the judicious buying and selling of South Sea shares His charities included gifts to Tamworth, where he built a town hall and some almshouses, and gifts of money to S Thomas' Hospital and Christ's Hospital, London He set apart nearly a quarter of a million for the building and endowment of the hospital in Southwark that bears his name This is one of the largest of the London hospitals It has over 600 beds and is equipped with everything to make it a medical school of the first rank

Guyon Madame French mystic Jean Marie Bouvier de la Mothe was born April 13, 1648, and in 1664 married Jacques Guyon He died in 1676 and his widow, now wealthy, gave her time to philanthropic work She began also to study and practise the doctrine of quietism, a kind of mysticism For this she was expelled from

Geneva, so, in 1886, she settled in Paris where she exercised a good deal of influence. She was, on account of her teaching, imprisoned in 1888 for a short time, and was again a prisoner from 1895 to 1902. She died at Blois, June 9, 1917. Madame Guyon wrote a good many books explaining her doctrine. She ranks as one of the leaders of modern mysticism.

Gwalior State of India. It is in the Central India Agency and is ruled by a maharajah. It covers 26,350 sq m. and much of it is forest. The capital is Lashkar. Pop. (1931) 3,523,070, nearly all Hindus. The state, which was once part of the great Maratha empire, came first under British influence in 1782.

Near Lashkar is Gwalior city, the old capital. This has ruins of Jain and other temples, a palace, and several other buildings of historic interest. Overlooking it is the fort of Gwalior, restored in 1886. It is 65 m. from Agra with which it is connected by railway.

Gwynn Nell, English actress, mistress of Charles II. Born probably in London, Feb. 2 1650, Elcanor, or Nell, Gwynn became an orange girl at the Theatre Royal, Drury Lane, London. She first appeared as an actress in 1665, and continued on the stage until 1682, being very successful in comedies of a somewhat vulgar kind. In 1669 she became the mistress of Charles II., and gave birth, May 8, 1670 to a son, Charles, who was later created Duke of St Albans. A second son, James, was born in 1671. She died of apoplexy in 1687, and was buried at St Martin's in the Fields, London.

Gymkhana Miscellaneous sports played in Indian military stations, apparently about 1861, to relieve the monotony of station life for both officers and men. It began with pony races at catch weights and afterwards included other competitions, serious and amusing, on foot, bicycle and horseback.

Gymnastics Athletic exercises for strengthening the body. They were practised by the Greeks, who attained a level of physical excellence never since surpassed. After a period of decline, the practice of gymnastics was revived in many European countries early in the 19th century and under one form or other is now part of the educational system, for both boys and girls in Great Britain and other countries. It is also an important part of the training of men in the fighting services.

There are in the main two kinds of gymnastics: in one apparatus, such as parallel and horizontal bars, vaulting horses, Indian clubs, ladders, ropes, rings, etc., is required. In the other, which is known as Swedish drill or the Swedish system, from its origin in that country, little or no apparatus is needed. Eurythmics is a form of gymnastics in which music plays a part.

A **gymnasium** is a place fitted with apparatus for gymnastic exercises. To day these are provided in most schools and are found in training centres of all kinds. The Germans used the word for a school for higher education.

Gympie Town of Queensland. It is on the railway, 90 m. from Brisbane and is the centre of a mining district in which gold and other metals are produced. Its port is Maryborough, about 40 m. away. Pop. (1931) 9,932.

Gynaecology Branch of medical science covering the

special ailments of women. Ancient records show that it was a specialised branch of medicine over 3000 years ago. Improvements are largely due to Sir J. Y. Simpson (1811-1870) of Edinburgh (who introduced chloroform), and it has since benefited by modern methods of operative surgery.

Gyp In the university of Cambridge the usual name for a college servant. The Oxford equivalent is scot.

Gypsies Nomad people. They are believed to be of Indian origin, and entered Europe early in the 15th century. They are now found in most of the countries of southern Europe, especially, perhaps, in Hungary, the Balkan countries, Italy and Spain. There are some thousands of them in England. In 1931 a permanent camp for the gypsies was opened in Surrey. They live in caravans and earn a livelihood as tinkers, makers and sellers of basketware and in other ways. Many of the women tell fortunes. The true gypsy has a tawny skin, black hair, lustrous eyes and gleaming teeth. They have their own customs and speech and are very superstitious. They call themselves Remani and in Italy are known as Zingari.

Gypsophila Hardy plant also known as chalk plant or gauze flower. With slender stems and sprays of tiny white flowers, it is grown chiefly for cutting, being in table decoration, or bouquets, frequently mingled with other flowers, e.g., sweet peas.

Gypsum Mineral, a hydrous sulphate of lime, occurring in nature in several different forms. In the massive state, it is a soft, white material, or reddish-brown in impure varieties. It occurs in England in large beds in Triassic marls, associated with rock salt, and in Tertiary strata near Paris. It also occurs as alabaster, a semi-crystalline variety, or in fine crystals, as selenite, and in fibrous form, as satin spar. Gypsum is used for making plaster of Paris and as a top dressing for soils.

Gypsy Moth European moth, *Porthetria dispar*. Introduced into the U.S.A., it became a pest in woods and orchards around Massachusetts about 1885. The larvae sometimes defoliate the plants but are controlled by suitable poisons, while parasites and predators from Europe have proved beneficial.

Gyroplane Form of aeroplane. In the gyro, invented by Sr. de la Cierwa, the fixed wings of the normal aeroplane are replaced by wings set round in vertical axis about which they are free to revolve while the plane is in motion. This machine cannot remain stationary in the air, but cannot stall, and lands at a low speed.

Gyroscope Mechanical device designed to illustrate the dynamics of rotating bodies. The name was given by Foucault in 1852. The commonest example is the gyroscope top which consists of a heavy fly wheel revolving about an axle at right angles to the plane of the wheel within a brass ring. The wheel is set spinning rapidly, the direction of its axis remaining unchanged unless some other force intervenes. Many gyroscope devices are used for stabilising purposes, such as the gyro compass, the gyro-directing mechanism for torpedoes, and the gyro-governor, in which a gyroscope regulator controls the speed of an engine.

HAakon Name of seven kings of Norway. The first reigned from about 940 to 961 and was called the Good. He passed his early life in England. The succeeding five were comparatively unimportant.

Haakon VII was a son of Frederick VIII, King of Denmark. Born Aug. 3, 1872, he married in 1893 Maud, daughter of King Edward VII. In 1905, on the separation of Norway from Sweden, he was chosen king and he took the name of Haakon instead of his own name, Charles. He was crowned, June 22, 1906. His heir is his son, Olaf, who married a princess of Sweden.

Haarlem Town and river port of the Netherlands. In the province of North Holland, it is 11 m. from Amsterdam, with which it is connected by railway. The chief buildings are the old church, with its lofty tower, the meat market, now used for municipal purposes, the weigh house and several nurseries. The town hall contains a valuable collection of paintings. The River Spaaren flows through the town and is used for shipping. Haarlem is a centre of the bulb growing industry, and from here millions of bulbs are exported. Printing is another industry. Pop. (1932) 122,386.

Habakkuk One of the minor prophets of the Bible. He lived about 600 B.C., and one tradition about him is that he was carried to Babylon by an angel in order that he might furnish Daniel with food. His book consists of a prophecy directed against the Babylonians, for whom he pleads with God, and a lyrical poem about the divine majesty.

Habeas Corpus Term meaning "you may have the body" used in English law. Several Acts of Parliament begin with these words, the most famous being the one of 1679. Its object was to prevent persons being kept in prison without being brought to trial, a practice frequently resorted to in the 16th and 17th centuries. Under the Act of 1679, if a person is so detained, a writ can be issued to his gaoler ordering him to bring the prisoner for trial to a certain place on a certain day. The writ can also be issued if a child is kept forcibly away from its parent or guardian. In times of disorder the Habeas Corpus has been suspended so that suspected persons could be imprisoned and kept without trial.

Haberdasher Name of a retail trader who sells small wares and articles accessory to dress and furniture. He is usually a draper also, and the tendency is for that term alone to be used.

The Haberdashers' Company is one of the twelve livery companies of London. Its hall is in Gresham St., and it has a large income much of which is set aside for the maintenance of schools and almshouses. The company has schools for boys at Hatcham and Hampstead, and for girls at Acton and Hatcham.

Hackenschmidt Georges, Russian wrestler. He was born in 1878, and soon became famed for his strength and skill as a wrestler. After defeating many rivals in catch-as-catch-can con-

tests on the Continent, he came to England in 1901 and on the music hall stage met some of the foremost wrestlers of the day. On April 4, 1908, in a bout with Gutch at Chicago, after wrestling for two hours, Hackenschmidt refused to continue and forfeited the world's championship.

Hackney Breed of horse. It mingles shire or cart horse strains, and is used for riding and driving. Sometimes it is kept for hire. The name is often shortened to hack. Compact, 14 hands and over, it has good action and disposition. There is a Hackney Horse Society for promoting the breed and shows are held.

The Hackney cab, now almost obsolete, was so named because it was drawn by horses of this kind.

Hackney Borough of London, one of the 28 in the county. It lies to the north east of the city. The open spaces include Hackney Marshes, Hackney Downs and part of Victoria Park. Pop. (1931) 215,380.

Haddington Burgh of East Lothian (Haddingtonshire), also the county town. It is on the Tyne, 18 m. from Edinburgh, on the L.N.E. Rly. Mrs. Carlyle is buried in the churchyard. John Knox, who was born near, gives his name to the Knox Institute. A 15th century bridge crosses the river. Pop. (1931) 4,405.

Haddingtonshire County of Scotland, also called East Lothian. In the south-east of the country it has a coastline on the North Sea and the Firth of Forth. Its area is 267 sq. m. Haddington is the county town. Other places are North Berwick, Dunbar and Gullane. The county is chiefly an agricultural area, but it has some coal mines. In the south are the Lammermuir Hills. Pop. (1931) 47,369.

Haddock Food fish of the cod genus (*Gadus aeglefinus*). Ranging the North Atlantic, it is recognised by the black patches above the breast fins and the black lateral lines. It averages 4 lb. in weight, but may reach 17 lb. and exceed 3 ft. in length. It hugs British coasts in winter, spawning in spring, and is taken by mussel bait or trawling. It is eaten either fresh, cooked or split, dried and smoked, when it is called Findon, or Flinnan haddock. Norway haddock and Jerusalem haddock, both spiny-finned, are quite distinct varieties.

Haddon Hall Derbyshire residence of the Duke of Rutland. It stands on the Wye, 2 m. from Bakewell, and is one of the most historic houses in England. Part of it dates from the 12th century. The chief rooms are the long gallery and the banquet hall. The chapel is also noteworthy. Haddon belonged to the Vernons before passing to the Mannors family after the elopement of the heiress, Dorothy Vernon, with Sir John Mannors about 1580. Soon after 1700 the Mannors family ceased to reside there, but after the Great War it was again made habitable and is now used as a residence by the Duke of Rutland. Sir Arthur Sullivan wrote an opera, *Haddon Hall*.

Hades In Greek mythology the god of the underworld, also called

Pluto Later, the word denoted the invisible underworld itself, the abode of the departed conceived as situated within the earth, and bounded by the river Styx, over which Charon ferried the dead. The Greek New Testament uses it for the Hebrew Sheol, or Gehenna, translated hell in the authorised version of the Bible, but frequently retained as Hades in the revised version, e.g., Luke xvi.

Hadfield Town of Dorsetshire. It is 187 m from London by the L N E Rly., and is 13 m from Manchester. There are cotton manufactures. The Derwent rises near here. Pop. 6371.

Hadfield Sir Robert Ahcott, English scientist. Born at Sheffield Nov. 20, 1859, he entered business there, and in the iron and steel industry he soon became a leading figure. He built up the business of Hadfields, Ltd. and was master cutler in 1899. He devoted much time to the technical side of the industry and his inventions were of the highest importance. For these he was elected F.R.S., and received numerous other honours both at home and abroad. In 1903 he was made a knight, and in 1917 a baronet. Hadfield has written a great deal on metallurgy.

Hadham Two villages of Hertfordshire, Great and Little. Great or Much Hadham is 4 m from Bishop Stortford and 26 from London, on the L N E Rly. The Bishop of London had a palace here at one time. Little Hadham, which is quite near, possesses a 12th century church. Here is Hadham Hall, an Elizabethan building.

Hadleigh Village of Essex. It is 5 m from Southend and is notable because of the farm colony founded here by the Salvation Army in 1891.

Hadleigh Urban district of Suffolk. It is 9 m from Ipswich, and 70 m from London by the L N E Rly., and stands on the River Brett. There are flour mills and malting works. Pop. (1931) 2952.

Hadley Wood District of Middlesex. It is 10 m from London on the L N E Rly. It is part of the urban district of Barnet.

Hadrian Roman emperor. Publius Aelius Hadrianus was born of Roman parents in A.D. 76. He became known as a soldier and an administrator and having been consul in 105, he was selected by his friend and patron the Emperor Trajan as his successor. He reigned from 117 to 138, on the whole successfully. He abolished the farming of taxes and was responsible for other salutary reforms. He made no additions to the empire through which he travelled extensively. He visited Britain where he was responsible for the wall called after him, and erected the famous villa near Tivoli of which the ruins still exist. He died in 138, having written a poem to his soul.

Hadrian's Wall Defensive wall extending from the Solway Firth across England to Wallsend on Tyne. It was built about A.D. 122 by Hadrian and repaired by Severus in the 3rd century. It was garrisoned by about 11,000 soldiers and possessed a number of large and small forts. The wall was 73 m long and its course may still be traced. Excavations along it have revealed Roman coins, pottery, etc. in great abundance. Here and there are substantial remains in the shape of forts and camps. It was classed as

an ancient monument in 1928 and parts of it, those near Chesters and Housesteads, for example, are national property. See CHESTERS.

Haeckel Ernst Heinrich Gorman scientist. Born at Potsdam, Feb. 16, 1834, he was educated at Würzburg, Berlin and Vienna, and became a doctor. After practising for a few years, he settled at Jena as Professor of Comparative Anatomy and Director of the Zoological Institute. His fame rests upon his writings on evolution, in which he firmly believed. He wrote a book translated into English as *The Natural History of Creation*, in which he showed that the descent of man from the ape was unbroken. His most popular work, *The Riddle of the Universe*, explains the universe as brought about by purely natural causes, without the intervention of any divine power. He died Aug. 8, 1910.

Haematite Most widely distributed of the iron oxides. Haematite is a peroxide of iron containing in its purest forms 70 per cent of iron. It is distinguished by giving a reddish streak when scratched, and occurs in black metallic crystals as 'specular iron,' dull red fibrous masses, or reniform masses with a radiate structure, and as red ochre, an earthy variety. Haematite is an important iron ore and is found in sedimentary rocks in many parts of the world.

Haemophilia Congenital tendency to bleed immediately from slight wounds or even spontaneously, as from the nose. It is almost entirely confined to males, called bleeders, and is transmitted solely through the female line. On this account tooth drawing and other operations are dreaded as the excessive bleeding is difficult to arrest and may prove fatal.

Haemorrhage Escape of blood from a blood vessel. It is arterial when an artery is injured, bright red blood flowing in spurts rhythmically with the beating of the heart; venous when a dark and steady stream flows from a vein and capillary when blood oozes gently out of the torn surfaces of wounds from the minute vessels connecting arteries and veins. Bleeding can be controlled by pressing on the bleeding point, pressing on the main artery supplying it, or applying a styptic according to the type of bleeding.

Treatment Medical aid should be obtained at once. The patient should be kept lying down near an open window with all tight clothing loosened. No stimulants should be given until the bleeding is checked, but if he can swallow, he may be given ice to suck. The body must be kept warm as for collapse (see Shock).

External haemorrhage can usually be checked by firm bandaging or by pressure on the artery on the side of the wound near the heart. Never give stimulants until haemorrhage has ceased.

In haemorrhage from the socket of an extracted tooth make the patient rinse out the mouth with very hot water. If the bleeding does not cease, add to the tumblerful of hot water a teaspoonful of powdered alum. The socket can be plugged with clean cotton wool leaving a surplus of wool outside the plugged part and the mouth should then be closed by means of a bandage under the chin and tied on top of the head.

Hafiz Persian poet. He was born in Shiraz and lived in the 14th century. His real name being Shams ad-Din Mohammed. He taught philosophy at Shiraz.

until his death about 1388 His tomb may still be seen near the city

The poems of Hafiz are short lyrics, somewhat sensuous, and embody the mystic philosophy of the Sufi sect. They have been translated into English

Hafnium Very rare metallic element It has the atomic weight 178.6 and the symbol Hf It is related in many ways to the metal zirconium, and was discovered in 1923 in the mineral zircon, a natural silicate of zirconium Little is known of its properties and compounds

Hagar Sarah's Egyptian handmaid. She became Abraham's concubine and the mother of Ishmael Sarah caused her banishment to the wilderness, whence later she returned to Abraham She was finally sent away (Gen xxi, 9-21)

Hagen Walter American golfer Born at Rochester, New York, in 1893, he became a professional golfer In 1914 and 1919 he won the open championship of the U.S.A., and in 1922 he won the open championship of Great Britain, as he did also in 1924, 1928 and 1929 One of the world's greatest golfers, he won the world open championship in 1928 and 1929, the open championship of France in 1920, of Belgium in 1924, and of Canada in 1931 In U.S.A. Hagen won the open championship in 1921, and in 1924, 1925, 1926, and 1927, and the professional championship in 1914 and 1919 He was in the successful Ryder Cup team in 1935

Hagenbeck Carl German trainer of animals He was born at Hamburg in 1844, the son of a man who did a little business in buying and selling wild animals Carl took this up with avidity, travelled a good deal and showed in public animals he had trained In 1897, at Stellingen, near Hamburg, he opened a zoological garden on new principles, keeping the animals, as far as possible, in the open Hagenbeck died in 1913, but the gardens still bear his name

Haggai One of the minor prophets of the Old Testament His book contains four prophecies, designed to encourage Zerubbabel and his compatriots to rebuild the temple at Jerusalem Their keynotes are the reiterated counsels, "be strong" and "consider" They are dated in the second year of Darius Hystaspis, 520 B.C.

Haggard Sir Henry Rider English novelist Born at Bradenham, Norfolk, June 22, 1856, he was educated at Ipswich Grammar School He began his career as an official in the Transvaal, whither he went in 1875 In 1879, having returned to England, he became a barrister, and in 1882 he published *Celestino and his White Neighbours* In 1884 he published *Dawn*, the first of his novels, and this was followed by others, most of which were very successful The best known are *She*, 1887, which created quite a sensation, *King Solomon's Mines*, *Jess* and those associated with the name of Allan Quatermain Others are *Colonel Quaritch*, *V.C.*, *Nada the Lily*, *Montezuma's Daughter*, *People of the Mist*, *Joan Haste*, and *Ayesha* With Andrew Lang he wrote *The World's Desire* Haggard, himself a landowner in Suffolk, took a great interest in agricultural problems, on which he wrote several books In 1910 he was knighted, and he died Mar 14, 1925

Haggis Scottish dish of French origin It consists of the heart, lungs and liver, finely minced and half the liver grated,

of a sheep, to which are added two chopped onions, one pound of suet, the juice of one lemon, half a pint of oatmeal, two teaspoonsful of salt, one teaspoonful of pepper, half a grated nutmeg, and half a pint of gravy This mixture is placed in a cleansed sheep's stomach (called the *haggis bag*) which is then sewn up and left to boil for three hours During the first half-hour it should be pricked with a needle

Hagiology Historical research and criticism specially applied to the lives of saints Hagiology includes all biographies of saints and martyrs The oldest is that of Eusebius The Jesuit, Heribert Rosweyde, revised existing hagiologies and started the great collection called the *Acta Sanctorum*.

Hagley Village of Worcestershire It is 13 m. from Wolverhampton, on the G.W. Ry. Hagley Hall has been for some centuries the seat of the Lytteltons

Hague The Capital of the Netherlands. It is situated about 3 m. from the sea, and 14 m. from Rotterdam, and is well served by railway lines The legislature meets in the Binnenhof, in which is the famous Hall of the Knights The Palace of Peace is an imposing block. The Maurits-Huis contains a fine collection of pictures once owned by the house of Orange There are many museums among them the famous Mesdag, and several libraries, including the valuable royal library The Vryer is an ornamental lake in the middle of the city Near it is a large tower, formerly a prison There are some fine squares and spacious parks, notably the Willem's Park where is an imposing national monument

In the city the sovereign has a palace, enlarged early in the 19th century, with large gardens To the east is the palace called the Huizen Bosch in a large park Near are the zoological gardens The Hague has an industrial quarter, and here are printing works and manufactures of earthenware, motor-cars, furniture, etc Pop (1932) 449,614

For some centuries the Hague was a residence of the counts of Holland In 1814, after it had been in French possession for a few years, it was made the capital of the new kingdom of the Netherlands

HAGUE CONFERENCES In the 19th century the Hague became popular as the seat of international conferences The most important was the peace conference called by the Tsar Nicholas II in 1899, and the one that followed it in 1907 At the earlier of these the Hague Tribunal was established

Hague Tribunal Short name for the Permanent Court of International Justice which sits at the Hague It was founded in 1899, and a building, the Palace of Peace, was erected for its work by Andrew Carnegie and others Its judges are now appointed by the League of Nations for 9 years and hear cases between sovereign states that are referred to them

Hahnemann Samuel Christian Friedrich German physician Born at Meissen, April 10, 1755, and educated at Leipzig, he maintained that like must be cured by like drugs must be used in small quantities to produce in the sick person the same results that they would produce in a healthy one This was called homeopathy He died in Paris, July 2, 1843 Hahnemann's chief books have been translated into English as *The Friend of Health* and *The Organon of the Rational Art of Healing*.

Haifa Seaport city of Palestine, situated on the Bay of Acre, at the foot of Mt. Carmel. Under British mandatory rule it has developed a flourishing export trade in Hauran wheat and Trans Jordanian products. One of the two ocean terminals of the Iraq Petroleum Company's pipeline is at Haifa. Its fine modern harbour was opened to shipping in 1933. Pop (1931) 50,533.

Haig Earl British soldier. Born June 19, 1861. Douglas Haig belonged to a Fifeshire family engaged in the distilling business. He went to Chifton College and Brasenose College, Oxford, afterwards passing through Sandhurst into the army, 7th Hussars. He took a course at the staff college and served in the Sudan in 1908. In 1900-02 he was in South Africa, where he was Chief of the Staff to Sir John French, and later commanded some columns in the guerrilla warfare.

By now Haig had made a reputation and during the next 10 years he filled important posts. From 1903-06 he was Inspector General of Cavalry in India, from 1906-07 Director of Military Training in England, from 1907-09 Director of Staff Duties, and from 1909-12 again in India, this time as Chief of the Staff.

In 1912 Sir Douglas Haig as he had now become, was appointed to the Aldershot Command. This meant the leadership of the army corps there and in Aug., 1914 he went with it to France. He commanded the first corps at Mons and through the terrible winter months, leaving it in Jan., 1915, to take over the first army. He led this at Loos, after which, in Dec., he succeeded French as Commander-in-Chief on the western front. This onerous position he held to the end of the war, being responsible for the Battle of the Somme (1916) the indecisive engagements of 1917, and, in 1918, the final offensive which drove back the Germans and finished the struggle.

Honours were showered upon Haig at the peace. He was made an earl given the Order of Merit and voted £100,000. Bemerseyde the old home of the Haigs was presented to him unofficially. He died in London Jan. 20, 1928, and was buried in Dryburgh Abbey. Since 1917 he had been a field marshal. He married the Hon. Dorothy Vivian and left an only son who succeeded to his title, Earl Haig of Bemerseyde. Memorials to Haig took the form of houses for ex-service men to cost £500,000, a statue in Whitehall and Haig House at Ypres.

Haileybury English public school. It is just outside Hertford and originated as a college, opened in 1806 by the East India Co. for educating boys for its service. In 1862 the company having been dissolved the buildings were acquired for a public school and have since been much enlarged. There is accommodation for over 500 boys.

Hailsham Market town of Sussex. It is 54 m. from London by the S. Ry and 7 m. from Eastbourne. It is an agricultural centre. Pop 4600.

Hailsham Viscount. English lawyer. Born in 1872. Douglas McGarel Hogg was the eldest son of the philanthropist Quintin Hogg. He was educated at Eton and after some years in business became a barrister in 1902. In 1922 he was elected Conservative M.P. for Marylebone, was made Attorney General and was knighted. He left office in 1923 but returned in 1924 and was Attorney General until made Lord Chancellor and a peer in 1928. In 1929 he

resigned with the Unionist Government and acted as one of the Opposition leaders in the House of Lords. In 1920 he was made a viscount, in 1931 joined the National Government as Secretary for War and became Lord Chancellor again in Baldwin's Ministry in June and Nov., 1935.

Hainault Province of Belgium, once an independent country. It is the district around Mons and Charleroi. The inhabitants are chiefly Walloons. For some centuries Hainault had its own counts, the first appearing about 900. Later it became part of Burgundy and then of the Netherlands. An open space in Essex is called Hainault Forest. It adjoins Epping Forest and covers 800 acres, but only about 250 acres are forest proper. It was bought for the public and opened by the London County Council in 1905 and on it is a golf course.

Hair Filamentous outgrowth from the skin, forming the coat of mammals, and corresponding to the feather in birds. The word applies also to analogous outgrowths from the bodies of plants, insects and other organisms. Each hair is secreted by a single papilla in a skin follicle, with fat-forming glands, and comprises a bulbous root, shaft and point. It contains neither blood vessels nor nerves, but coloured pigment, the failure of which produces grey hair. The absence of hair is known as baldness (*g r*).

Commercially hair is much used. The finer kinds, such as the hair of goats etc. are used for making shawls and other garments. The hair of horses, being coarser, is used as a stuffing and padding for furniture. Other kinds of hair are also used for upholstery and hair forms the stuffing of a great number of mattresses. The hair of the cow is used for making felt for roofing and similar purposes.

Hairstressing Method of dressing the hair. The word is used chiefly in connection with women's hair, but to a lesser extent men's hair is dressed, although the traders who attend to this are usually called barbers, because their duties include attention to the beard.

Fashion in hairstressing has varied very much with various countries and ages, but amongst civilised and semi-civilised peoples attention has always been paid to it. The Great War was partly responsible for a drastic change in the method of dressing women's hair, principally owing to the fact that the majority of women began to wear the hair short. This meant more frequent visits to the hairdresser and in consequence the women's side of the business enjoyed unprecedented prosperity.

In Great Britain hairstressing is an organised calling. It has its trade organisations and papers including *The Hairdressers' Weekly Journal*. There is a Hairdressers' Registration Council at 20 Cranbourne Gardens, London, N.W. 11 and a Hairdressers' Parliamentary Committee for looking after its interests. Since 1930 hairdressers have been compelled by law to close their shops on Sunday.

Haiti Island of the West Indies. Sometimes called Hayti or San Domingo, it lies between Porto Rico and Cuba, the three dividing the Atlantic Ocean from the Caribbean Sea. It is 400 m. long and covers 20,500 sq. m. The area is mountainous, but the soil is generally fertile. Much of the land is forest. The island is divided into two republics, Haiti in the west and San Domingo in the east. Columbus who discovered it in 1492, called it

Hispaniola In 1640 France took possession of the island, and it remained French until 1804 when a negro republic was established. In 1811 the negroes of the east broke away and formed the republic of San Domingo. The slaves were freed in 1789, an attempt by Napoleon to revive the old system failed.

Haiti Republic of the West Indies. It occupies the western part of the island of the same name. It covers 10,204 sq m. Port au Prince is the capital and chief seaport, other towns are Cape Haitien, Caves and Jacmel. Cocoa, coffee, sugar and other tropical products are grown. The people are chiefly negroes and mulattoes; they speak a dialect called Creole French and in religion are Roman Catholics.

Since 1915 the republic has been under the protection of the United States. It is ruled by a president and a council of state, the executive being in the hands of secretaries of state, except certain branches, finance and the constabulary, for instance, which are under American advisers. The banking system is also in American hands. The unit of currency is the gourde, a gourde being equal to one fifth of the American dollar. There are some good roads and a few miles of railway in the republic. Pop 2,500,000.

Hake Fish of the cod family (*merluccius vulgaris*). Having no barbels and fewer dorsal and anal fins than cod, it may reach 3 ft. in length and surpass 30 lb. in weight. It is caught in pilchard nets, especially at night, and in trawlers in the North Atlantic, where is its chief home. It is a food fish.

Hakluyt Richard, English writer. Born in Herefordshire about 1552, he was educated at Westminster School and Oxford. He lectured on cosmography at Oxford and began to collect information about the voyages of English and other sailors. In 1583 he published *Divers Voyages Touching the Discovery of America*. Having been ordained, he was a chaplain in Paris from 1583 to 1588. In 1590 he was chosen rector of Netherlingsett in Suffolk and in 1602 Prebendary of Westminster. He died Nov 23, 1616, and was buried in Westminster Abbey.

Hakluyt's chief work is the collection called *Principal Navigations, Voyages and Discoveries of the English Nation*. He left many manuscripts, some of which have been published by the Hakluyt Society, which was founded in his honour in 1846.

Halbert Weapon used by soldiers in the 14th and 15th centuries. It was a combination of the pike and the axe and had a staff about 5 ft. long. The Yeoman of the Guard still carry halberts, but they have not been used in warfare since early in the 16th century. Another form of the word is halberd. The soldiers using it were called halberdiers.

Haldane Name of a famous Scottish family. Robert Haldane of Cloan, a lawyer, married Mary Burdon Sanderson, a remarkable woman who lived to be almost a centenarian. Their eldest son was Viscount Haldane (qv). Other sons were John Scott Haldane, an eminent scientist, especially interested in mining matters, and Sir William Stowell Haldane, a lawyer and one of the Development Commissioners. Their daughter, Elizabeth Sanderson Haldane, wrote books, and in 1918 was made a Companion of Honour.

John S. Haldane's son, John Burdon Sanderson Haldane, made a reputation as a scientist.

In 1922 he was appointed reader in biochemistry in the University of Cambridge, and in 1927 head of the genetical department of the John Innes Horticultural Institution.

A distant relative was Sir James Aylmer Lowthrop Haldane (b 1862). He was a soldier who served on the western front during the Great War in command of a division and an armv corps, and was Commander-in-Chief in Mesopotamia, 1920-21.

Haldane Viscount. British statesman. Born, July 30, 1856, he was Richard Burdon Haldane, a son of Robert Haldane of Cloanden, Perthshire. For his education he went to Edinburgh Academy and then to universities in that city and in Germany. He became a barrister in 1879 and practised in London; he was never a popular advocate, but his mental gifts made him very successful in chancery cases.

In 1885 Haldane was elected Liberal M.P. for Haddingtonshire and for 20 years, although a private member only, was a political force. In 1905 he was made Secretary for War, and in that capacity he did great work; he created the Territorial Army, and organised the force that took the field in Aug 1914. In 1912 he became Lord Chancellor and a peer, but early in 1915 he resigned. His acquaintance with Germany and the Germans made him suspect to many, and his retirement was inevitable.

After the war Haldane appeared on Labour platforms and was soon a member of that party. In 1924 he became again Lord Chancellor and also leader of the Labour Government in the House of Lords. When the Government resigned he remained the party leader in the Lords, and he held that position until his death, Aug 10, 1928. Haldane never married.

Strenuous as was Haldane's political and professional life, it by no means occupied the whole of his versatile mind. He kept up the study of philosophy and ranked among the leading philosophers of the day. His ideas are expressed in *The Pathway to Reality* and other writings. Education was another of his interests. He was chairman of the Royal Commission on the university of London and helped to found the newer English universities. In 1929 his *Autobiography* appeared, in his lifetime he had published *Before the War*, a defence of his activities.

Hale Urban district of Lancashire. It is 10 m. from Manchester, on the Cheshire Lines Rly., and is practically a residential suburb of that city. In the churchyard is the grave of John Middleton, who was said to be 9 ft 3 ins high. He died in 1623. Pop (1931) 10,669.

Hale George Ellery. American astronomer. Born in Chicago, June 29, 1868, he was educated at Boston. His first experience of astronomical work was gained in the observatory at Harvard, and he soon became a director of an astrophysical observatory and professor of astrophysics. In 1895 he became director of the Yerkes Observatory, and in 1897 Professor of Astrophysics at Chicago. He invented the spectroheliograph and in 1901 was appointed director of the great observatory at Mount Wilson, California. He has edited *The Astrophysical Journal*, and written a good deal on his particular subject, astrophysics.

Halesowen Urban district and market town of Worcestershire. It is 6 m. from Birmingham, on the joint line of the L.M.S. and G.W. Rlys. Iron and steel goods are manufactured. William Shenstone,

the poet, was born here. Near are the remains of an abbey. Pop (1931) 31,058

Halévy Name of a family of French scholars. Ludovico Halévy made his reputation as a dramatist. He died May 8, 1908 leaving a son, Elie Halévy. He was born at Etretat, Sept 6 1879, and became a professor in Paris. He is known as a student of English history and institutions and his works include *The Formation of Philosophic Radicalism*, *The History of the English People in the 19th Century*, and *The World Crisis of 1914-18*, (1930), to give them their English titles.

The composer, Jacques François Fromental Elie Halévy, was a professor of music in Paris and wrote many operas. He died March 17, 1862.

Halibut Fish the largest of the flatfish family (*hippoglossus vulgaris*). It is distributed round the northern coasts of Great Britain but is infrequent in the English Channel. It is longer than the flounder sometimes surpassing 8 ft in length and 200 lbs in weight. The eyes and dark colouration are on the right side. The fish is a popular article of food and was at one time much eaten on holy days. Its old name is holbut.

Halicarnassus Ancient city of Asia Minor. Situated on the Carian coast opposite the island of Cos. It was a Dorian colony, reaching its acme under Mausolus, who died in 353 B.C. It was the birthplace of Herodotus and Dionysius.

Halidon Hill Hill near Berwick on Tweed. Here on July 19 1333 the Scots were defeated by an English army under Edward III that was marching to take Berwick. The English, on the hill, were attacked by the Scots who were driven back. The forces on each side were small.

Halifax County borough and market town of Yorkshire. It is 7 m from Bradford and 194 from London standing at the union of the rivers Hobble and Calder. It can be reached by both the L.N.S. and L.N.E. Ryds. The Piece Hall, or market hall, dates from the 13th century.

The industries of Halifax are the making of carpets, woollengoods, chemicals, machinery and textile. Pop (1931) 98,122. The Halifax Building Society is one of the largest in the country.

Halifax City and seaport of Nova Scotia and the capital of the province. It stands on a harbour named after it, one of the finest in the world and owes its importance to its site. It is 837 m from Montreal and here both the C.N.R. and the C.P.R. have terminals. Dalhousie University is the chief of several colleges and schools.

The chief winter port of Canada, Halifax has extensive docks from here ships go to the West Indies and across the Atlantic as well as to other American ports. Since 1758 it has been a naval station and a garrison town. Here the Canadian Government which took over the naval dockyard in 1906 has accommodation and stores for warships. Apart from shipping the chief industries are ship building, oil refining and certain manufactures. There is some fishing and it has a broadcasting station (1939 M.) Pop (1931) 59,275.

Halifax Marquess of English statesman and writer. Born in 1633, George Savile was a son of Sir William Savile Hart. In 1660 he was elected M.P. for Pontefract and in 1668 he was made Viscount Halifax. The family estates belong in Yorkshire.

He took part in business of state and became prominent as the leader of those who objected to the proposed exclusion of James II from the throne and for about four years (1681-85) was the chief adviser of Charles II. When James became king he was made Lord President of the Council, but he soon resigned and used his influence to check the sovereign's arbitrary acts to nullify the Declaration of Indulgence. He wrote his famous *Letter to a Dissenter*.

He did not share in the invitation to William of Orange, but as he presided over the Council and the House of Lords at this time, he it was who formally offered the crown to William and Mary. He was made Lord Privy Seal by William but in 1689 he resigned and returned to his seat Rufford Abbey, occasionally appearing in Parliament. In 1679 he had been made an earl and in 1682 a marquess. He died April 5, 1695. His title became extinct when his son, William, the 2nd marquess died in 1700. A grandson was the great Earl of Chesterfield, (q.v.).

Halifax was a fine orator, but his chief fame is due to his writings and his position as the great advocate of moderation and compromise in politics. His ideas on this subject are expressed in his greatest work, *The Character of a Trimmer*, the hero being himself. He also wrote *Maxims of State*, the *Anatomy of an Equivocal*, a life of Charles II and other books, including a collection of aphorisms.

Halifax Earl of English title, now extinct. The first earl was George Savile who was made earl in 1679 and marquess in 1682, but these titles became extinct when his son died in 1709. In 1714 Charles Montagu was made Earl of Halifax but in the next year the title again became extinct. At once, however, it was given to his nephew, George Montagu, who was succeeded in 1739 by his son who married an heiress and took the name of Dunk. He was Lord Lieutenant of Ireland, First Lord of the Admiralty and Secretary of State under George II and George III. When he died, June 8, 1771, the earldom again became extinct.

Halifax Earl of English statesman born April 16 1661 a member of the family of the Earl of Manchester. He went to Westminster School and Trinity College, Cambridge and in 1689 was elected M.P. for Maldon. He was Chancellor of the Exchequer 1694-97, and First Lord of the Treasury, 1697-99. He was one of William III's most trusted advisers, and was concerned in the reform of the coinage and the foundation of the Bank of England. Being a Whig he was in retirement during Anne's reign but he was again First Lord of the Treasury when George I came to the throne. In 1701 he had been made a baron, and in 1714 he was made an earl, but very soon, May 19, 1715 he died without sons.

Halifax Viscount English title borne since 1866 by the family of Wood. Sir Charles Wood Bart., was elected an M.P. in 1826. From 1846 to 1852 he was Chancellor of the Exchequer in the Liberal ministry. From 1855-58 he was First Lord of the Admiralty and from 1859-66 Secretary for India. In 1866 he was made a viscount, and he died Aug 8, 1885.

His son Charles Lindley Wood, who became the 2nd viscount, was born June 7, 1837, and educated at Eton and Christ Church, Oxford. He was long president of the English Church Union and leader of the Anglo-Catholic party.

His son Edward created Baron Irwin was viceroy of India 1926-31 and made K G in 1931 In Jan 1934 he became Viscount on his father's death

Hall Oliver English artist Born in London in 1869, he studied art there He became known by his etchings, and then by his landscape paintings, one of which "Shap Moors," is in the Tate Gallery, London In 1920 he was elected A R A, and in 1927 became an R A

Hallam Henry English historian A son of Rev John Hallam, he was born at Windsor, July 9, 1777, and educated at Eton and Christ Church, Oxford He entered the civil service, but found much time for writing His *View of the State of Europe during the Middle Ages*, is still valuable, but his *Constitutional History of England*, once a text book, is now obsolete This shows the author's Whig beliefs, also expressed in the articles he wrote for *The Edinburgh Review* A third book is his *Introduction to the Literature of Europe in the 15th, 16th and 17th centuries* He died at Penshurst, Jan 21, 1859

Hallam's son, Arthur Henry Hallam, is known for his friendship with Tennyson He died in Vienna, Sept 15, 1833, being only 22 years old In his memory Tennyson wrote *In Memoriam*

Hallamshire District of Yorkshire It is the area around Sheffield One of the divisions into which that city is divided for sending members to Parliament is the Hallam division

Halle City of Germany It stands on the Saale, 21 m from Leipzig and is an important railway junction It is perhaps chiefly famous for its university, but in the 19th century it became a great industrial centre and new quarters sprang up all around the old town The university, founded in 1694, possesses a fine range of buildings which include a large library and an observatory Its medical school is notable The town's oldest industry is salt mining Other industries include the manufacture of machinery and confectionery, sugar refining, printing and malting Pop 194,600

Hallé Sir Charles English musician Born in Germany, April 11, 1819, he studied music in Paris and elsewhere In 1848 he settled in London and became a naturalised Englishman Hallé won a reputation by the concerts he gave in London and by his work for music in Manchester, where he founded the Royal College of Music and conducted a fine orchestra In 1888 he was knighted and he died Oct 25, 1895

In 1888 Hallé married Wilma Neruda, the widow of Ludwig Normann She, too, was a German by birth, and having studied music, became one of the leading violinists of the day Lady Hallé died April 15, 1911

Hallelujah Hebrew word of praise identical with *Aleluia* It is a doxology in the synagogues, occurs in the Psalms and in the Jewish hymns and in the Mass (except in times of mourning) It was also in the first Prayer Book of Edward VI The Hallelujah Chorus is part of Handel's *Messiah* Since 1743 it has been the custom for audiences to stand during its performance

Halley Edmund English astronomer Born in London, Oct 29, 1686, he was educated at St Paul's School and Queen's College, Oxford Interested in astronomy, he went on voyages and journeys with

the object of extending his knowledge of that subject Having returned to England he wrote on sun spots, magnetism, and other phenomena, and worked with Newton, whilst another interest was surveying to ascertain the nature of the tides In 1703 he was made Savilian Professor of Geometry at Oxford, and in 1720 Astronomer-Royal at Greenwich From 1713 to 1721 Halley was secretary of the Royal Society He died at Greenwich, where he had done valuable work on the planets, Jan 14, 1742, and was buried at Lee

HALLEY'S COMET In 1682 Halley observed the movement of the comet which since then has been named after him This returned in 1759, in 1835 and in 1910 Its period is therefore 75 or 76 years Its earlier appearances have been noted since 240 B C

Hall Mark Mark stamped upon articles of gold and silver plate It is done at the Goldsmiths' Hall, London, or other assay offices to indicate the quality of the metal and other details The hall mark, in addition to showing the standard of quality, indicates the place where the assay has been done by some emblem such as a leopard's head for London It also gives the date, the year being shown by a letter of the alphabet, and the maker's initials Plate made between 1784 and 1890 also has a duty mark

Hallowe'en Scottish name for All Hallows Eve, October 31, the vigil of All Hallows, or All Saints' Day It is one of many Christian festivals grafted on ancient pagan ceremonies, and its superstitious practices, e.g., divination by nuts, or by mystic midnight rites, are survivals of spirit and nature worship

Hallstatt Village of Austria It is on the lake of the same name, 32 m from Salzburg The chief industry is the working of the salt mines Hallstatt owes its main interest to the prehistoric cemetery unearthed in 1846 No fewer than 3000 graves were found and an examination of the articles therein, which were of gold, bronze, iron and amber, showed that their occupants were men and women who enjoyed a fairly high measure of civilisation They worked the salt mines, grew crops and possessed cattle Their implements were of iron and the name has been given to the first part of the Iron Age The early Hallstattian Age is from 850-600 B C and the later 600-400 B C

Hallucination Apparent perception of which does not exist It differs from illusion, in which a sensation is misinterpreted In either case belief in the reality of the object involves delusion It usually affects sight or hearing or both, and may attend persons who are normally sane, through sleeplessness or other brain derangement It may also indicate insanity The seeing of ghosts is best explained as an hallucination

Halo Term in meteorology applied to the coloured ring, red inside and blue outside, sometimes seen round the sun or moon It is due to the refraction of light by small ice crystals in cirro-stratus clouds

In art a halo, or nimbus, is a disc or other symbolic form shown round the head of saints and divine personages

Halogens Chemical term for the elements fluorine, chlorine, bromine and iodine, which produce salts similar to common salt These elements form a well-defined series of increasing atomic weights—

190, 35 475 79 916 and 126 932 respectively, and their affinities for other elements increase or decrease in the same order

Hals Franz Dutch painter He was born at Antwerp between 1580 and 1584 His life was spent mainly at Haarlem, where he painted and taught painting and where he died in August, 1606

One of the greatest masters of portraiture, especially in the realistic and life like painting of the head and hands, his work greatly influenced the style of the Dutch school of painting His well known picture, "The Laughing Cavalier," is in the Wallace Collection, London, and others are in the National Gallery, London Most of them, however, are in the Netherlands, especially at Haarlem, but there are others in the Louvre, Paris

Halsbury Earl of English lawyer Hardinge Stanley Giffard was born Sept. 3, 1823, in London, his father, Stanley Lees Giffard, being a writer He was educated at Morton College, Oxford, and became a barrister In 1875 he was made Solicitor General in the Conservative ministry and in 1877 he was elected M.P. for Launceston In 1885 he was made Lord Chancellor and a baron He was again Lord Chancellor, 1886-92 and 1895-1905 In 1898 he was made Earl of Halsbury He died Dec 11 1921 He was succeeded by his son, hitherto known as Viscount Tiverton Halsbury was noted for his physical vigour, which enabled him to live nearly a century, and for his unending Toryism He edited *The Encyclopaedia of the Laws of England*

Another Halton is a village of Cheshire It is 11 m from Chester, on the L.M.S. Rly Here are the ruins of a castle Pop 1250

Ham Son of Noah Gen x makes him the ancestor of peoples occupying Ethiopia, Egypt and other parts of northern Africa whom modern ethnologists class as Hamitic, in contrast with Semitic.

Ham Urban district of Surrey It is about 10 m to the west of London lying between Twickenham and Teddington There is a common at Ham Near are Richmond Park and Ham House built early in the 17th century and a seat of the Earl of Dysart It is famous for its art treasures and its meadows called Ham Walks Pop (1931) 2206

Hamadan Town of Persia It is 180 m to the south west of Tcheran and is an important trading centre, as it has been for many centuries The caravan roads to Bagdad and the Caspian Sea pass through it There are some manufactures In April, 1918 the town was occupied by the British It covers the site of the ancient Ecbatana. Pop 30,000

Hamadryad According to Greek mythology a nymph presiding over and living in a tree Her life began and ended with that of the tree

Another hamadryad is a large species of cobra called also the king cobra It feeds largely on other snakes

Haman Character in the Biblical book of Esther He was the grand vizier of Ahasuerus King of Persia He formed a plot to avenge himself on Mordecai

by extirpating the Jewish race This was exposed by Esther and he was hanged upon the lofty gallows prepared for Mordecai, who succeeded him His effigy formerly appeared at the commemorative feast of Purim.

Hamble River of Hampshire. It falls into the sea near Southampton where it forms Hambledon Creek At its mouth on Southampton Water, 5 m. south of Southampton, is a station for flying boats and seaplanes, also called Hamble. In 1931 a flying school was opened here

Hambleden Viscount. English title borne by the family of Smith The statesman, W. H. Smith, left a widow who in 1891 was created Viscountess Hambleden This title was inherited on her death in 1913 by their son William Frederick Danvers Smith Born Aug 12, 1868 he was educated at Eton and New College, Oxford. From 1891 to 1910 he was Unionist M.P. for the Strand division of London and until his death head of the firm of W. H. Smith and Son, the distributors of newspapers. He was known as an oarsman and a benefactor of King's College Hospital He died June 16, 1928, his title passing to his elder son

Hambleden is the name of a village in Buckinghamshire

Hambledon Village of Hampshire It is 6 m from Fareham and is famous as the early home of cricket in England About 1750 the Hambledon Club was formed and this played the game on Windmill and Broad Halfpenny Downs. William Beldham, called Silver Billy, and other famous cricketers of that time were among the Hambledon men

Hamburg City and seaport of Germany also a state of the German republic It stands on the Elbe, 75 m from its mouth at Cuxhaven and 180 from Berlin The second largest city in the land, it covers a large area and includes suburbs that were once separate towns The Bille flows through it to join the Elbe It is also traversed by canals Another river the Alster, has been dammed up to form two lakes, outer and inner, which are a feature of the city It is connected by railway with all parts of Germany has a service of electric trains and is an airport

The city hall and the law courts are fine modern buildings There is a university, opened just after the Great War, and an institute of tropical medicine The city has botanical gardens, two observatories, several museums and near, at Stellingen, is Hagenbeck's famous zoological park The Lombards bridge divides the two Alsters The Hall of Art contains a collection of modern German pictures It has a broadcasting station (372 M., 1.5 kW.)

The extensive docks accommodate the largest vessels They include miles of sheds and quays near them are the great ship building and ship repairing yards of one of the world's largest seaports Part of it constitutes a free port which has an enormous transit trade, the whole is over 6 m long Of the many lines that have their headquarters here the greatest is the Hamburg Amerika founded in 1847

Apart from the shipping which has now recovered from the paralysis of the Great War Hamburg is a great manufacturing town Beer, spirits chemicals and machinery are made The preparation of foodstuffs is a large industry and others are the refining of oil and sugar

In the Middle Ages Hamburg was a leading member of the Hanseatic League. In 1510 it was made, and it still is, a free city. In 1815 it joined the German Confederation, in 1866 the North German Confederation, and in 1871 the German Empire. In 1918 it became a state of the new republic. Pop (1920) 1,143,079.

The state of Hamburg covers 160 sq. m., and includes, in addition to the city, some detached portions of land, several being islands in the Elbe. Cuxhaven, its outport, and Ritzbüttel are also included. It is governed by a house of burgesses elected by all adults and an executive chosen by the house. Pop (1929) 1,226,111.

Hameln (or Hameln) Prussian town in the province of Hanover. It stands on the Weser and dates as a town from the 11th century. Pop (1925) 25,633. It is chiefly notable as the town of Browning's legend of the Pied Piper, who in 1284 rid the town of a plague of rats. The inhabitants refusing to pay him, he charmed the children of the town to follow him into a door in the Koppelberg hill, whence none returned.

Hamilcar Name of three noted Carthaginian soldiers. The most famous was Hamilcar Barca, or lightning, the father of Hannibal. He lived in the 3rd century B.C., and spent his life in warfare. He commanded the Carthaginians in Sicily during the first Punic War and made peace with the Romans in 241 B.C. He then returned to Carthage and put down a rising of the mercenaries. His last year was passed in Spain where he built up the power of Carthage. He was killed in battle in 228 B.C.

Hamilton Burgh and market town of Lanarkshire. It is 11 m. from Glasgow and is served by the LMS and L.N.E. Ryhs. Here are barracks, as the burgh is the depot of the Cameronians (Scottish Rifles). The chief industry is coal mining and around are market gardens. Pop (1931) 50,400.

Near the town is a park of 1500 acres, in which Hamilton Palace, the residence of the Dukes of Hamilton, stood until it was demolished. The park is used as a race-course. The burgh of Netherton stood here before 1600. Hamilton was then called Cadzow, and there are still ruins of Cadzow Castle. In Cadzow Park is a famous herd of white cattle.

Hamilton City and port of Ontario, Canada. It stands on Burlington Bay, a branch of Lake Ontario, 39 m. from Toronto. It has stations on the two great railway lines, the C.N.R. and C.P.R., and from here electric railways radiate. Iron and steel goods are made and other industries include the making of furniture, textiles, etc. There is also some shipping to other ports of the Great Lakes. Electrical energy is obtained from water power. Burlington Beach is a strip of land in front of the city. It is used as a pleasure resort, whilst a canal passes through it. Pop (1931) 151,914.

Hamilton Capital of the Bermudas. It is on Great Bermuda, and has a good harbour, although somewhat difficult of approach. Since prohibition was introduced in the United States it has become popular with Americans. Pop (1931) 3259.

Hamilton Town of New Zealand. In North Island, it is 86 m. from Auckland. It is served by a railway line and is the centre of a farming district. Pop 18,250.

Hamilton Town of Victoria. It is 198 m. by railway from Melbourne.

It is the centre of a large grazing district where butter is made. Races are held here. Pop (1931) 5300.

Another Hamilton is a town of New South Wales. It is 75 m. from Sydney. Pop 6000.

Hamilton Alexander American statesman. Born in the West Indies, Jan. 11, 1757, he was the child of a Scottish father and a native mother. He was educated in New York, became a lawyer and was assistant to Washington during the War of Independence. In 1782 he was chosen a member of Congress and he had a large share in framing the constitution of the country. He was the leader of the party that stood for a strong central government and he put forward his ideas in *The Federalist*. From 1789 to 1795 he was Secretary to the Treasury and did a great work in organising the country's finances. In 1799, Washington being dead, he was appointed to command the army raised to resist a threatened French invasion. On July 11, 1804, Aaron Burr wounded him in a duel and he died on the following day.

Hamilton Duke of Scottish title, the senior of its kind. Sir James Hamilton of Cadzow in Lanarkshire married a daughter of James III., and their son was made Earl of Arran in 1503. His son was regent of Scotland and was made Duke of Châtelleraut by the King of France in 1549. His son, John, was made Marquess of Hamilton in 1599. James, the 2nd marquess, was made a duke in 1643. In 1648 he led an army into England to help Charles I., but was defeated at Preston, and in 1649 was executed. His brother, William, the 2nd duke, was killed at the Battle of Worcester in Sept. 1651, and the title became extinct. In 1680, William Douglas, Earl of Selkirk, having married the heiress of the last duke, was made Duke of Hamilton, and this title still remains with the family of Douglas-Hamilton.

James Douglas, who in 1698 succeeded to the dukedom, was allowed to take precedence from 1643. He ranks therefore as the 4th duke. He was made Duke of Brandon in 1711, and was killed in a duel with Lord Mohun, as described by Thackeray in *Esmond*. James, the 6th duke, married Elizabeth Gunning. James, the 7th duke, inherited the title of Marquess of Douglas. Alexander, the 10th duke, was ambassador at St. Petersburg. William, the 11th duke, married a daughter of the Grand Duke of Baden and spent much of his time at the court of Napoleon III. His son, Alexander, the 12th duke, died without sons in 1895, when a kinsman, Alfred, inherited the titles and the estates in Lanarkshire. Other estates, including the island of Arran with Brodick Castle, passed to the daughter of the 12th duke, who later became Duchess of Montrose.

The duke's seat is now Dungavel, Lanarkshire. His eldest son is the Marquess of Douglas and Clydesdale, a noted airman and boxer, elected Unionist M.P. for East Renfrewshire in 1930. In 1933 he flew over Mount Everest (see Everest).

Hamilton Emma, Lady. Mistress of Lord Nelson. She was born, it is said, at Great Neston, in Cheshire, April 26, 1765, the daughter of a labourer, and was known as Emily Lyon. She lived for a time at Hawarden and then went to London as a servant. She had several lovers, and in 1781 became the mistress of the Hon. Charles Greville, leaving him in 1786 for Sir William Hamilton,

British minister at Naples. In 1791 Hamilton married her and she became very friendly with the Queen of Naples. At Naples in 1793 she met Nelson, but their intimacy did not begin until 1798. Their child, Horatia, was born in 1801. Left a widow in 1803, Lady Hamilton's extravagance soon landed her in debt and in prison. She died Jan 15, 1815.

Lady Hamilton's beauty attracted the attention of George Romney, who painted her more than 20 times. Sir Joshua Reynolds also painted her. A number of books have been written about her.

Hamilton Sir Ian Standish Monteth British soldier. Born at Corfu, Jan 16, 1853, the son of a soldier, he was educated at Cheam and Wellington College, entering the Gordon Highlanders in 1872. In Afghanistan in 1878 he began a long career of active service. He was wounded and taken prisoner at Majuha in 1880, and was later in Egypt and Burma, as well as in the Chitral and Tirah campaigns on the Indian Frontier. In 1899 he was Chief of the Staff in Ladysmith, and served against the Boers to the end of the struggle, either as Chief of the Staff to Kitchener, or in command of a force during the guerrilla warfare from 1902 to 1915, he was, in succession, Quartermaster General, Commander of the Southern District, Adjutant General and Inspector General of Oversea Forces. In 1904-05 he was with the Japanese armies in Manchuria.

In 1915 Hamilton was appointed to the command of the force that attacked the Turks in Gallipoli, and he conducted this costly campaign almost to the end. He retired from the army in 1920, being then a general and the recipient of numerous honours.

Hamilton is a graceful writer in prose and verse, and by no means a soldier of the conventional type. His books include *A Staff Officer's Scrapbook* and *A Gallipoli Diary*.

Hamilton Patrick. Scottish martyr. Born in Lanarkshire about 1504, he was descended through his mother from King James II. He was sent to Paris for his university education and at Louvain he learned something of the reformed teaching. Having returned to Scotland he was accused of heresy, but escaped punishment by going to Germany, where he was influenced by Luther. He went back to Scotland in 1527 and was soon taken and put on trial for heresy. He was found guilty and on Feb 29 1528, was burned at St Andrews. In Germany, Hamilton wrote *Loca Communes*, or *Patrick's Places*, a statement of his religious faith.

Hammerfest Town and port of Norway. It is on an island in the north of the country, 675 m from Trondheim. There is a harbour and the port is a centre of the whale fishery. It exports cod liver oil and other products of the northern seas and has the reputation of being the most northerly town in the world. Pop 2700.

Hammerhead Large bird found in Africa. It belongs to the stork family, is brown in colour and is about 2 ft long. It is found near lakes as it feeds on fish and frogs. The feathers on the head give it a certain resemblance to a hammer, hence its name. It is also called hammerkop and umbrette.

Hammersmith Borough of the county of London. To the west of the city. It has the Thames on its southern side and here a bridge crosses

the river. It adjoins Chiswick and Kensington, and part of it is called West Kensington. The borough includes Wormwood Scrubs with the prison. The Lyric Theatre is famous for its association with the revival of *The Beggar's Opera* and the performance of other successful plays. In the borough are Olympia, a vast building used for exhibitions and the like, and the White City at Shepherd's Bush. Pop (1931) 135,021.

Hammond Walter Reginald. English cricketer, born at Dover June 3, 1903. Having become a professional cricketer he played first for Gloucestershire. His performance in 1927, both as a batsman and bowler, made his reputation and he became one of the leading cricketers in England. He visited Australia and in 1930 played in the test matches in England.

Hammurabi King of Babylon. The sixth monarch of the 1st dynasty of Babylon and the son and successor of Sin muballidh, he has been identifiable with Amraphel King of Shinar (Gen xiv). He threw off Chodorlaomer's supremacy, dominated the Sumerian and Akkadian city states and made Babylon a single monarchy. His brilliant reign of 43 years was marked by much building and canal construction, he left valuable letters and a Semitic code of laws. His date is about 2100 B.C. A stele in the British Museum bears his sculptured representation.

Hampden Name of two villages in Buckinghamshire, Great and Little Great Hampden is three miles from Missenden and in its church is a memorial to John Hampden who was buried here. Near is Hampden House, once his residence. This was rebuilt in 1754 and is now the seat of the Earl of Buckinghamshire.

The title of Viscount Hampden has been borne since 1884 by the family of Brand. Henry Bourville William Brand was a Liberal M.P. from 1852 to 1884. From 1872 to 1884 he was Speaker of the House of Commons. He died March 14, 1892.

Hampden John. English statesman. Born at Hampden in 1594, he was a son of William Hampden, and was related through his mother to Oliver Cromwell. He was educated at Magdalen College, Oxford, and studied law. In 1621 he was elected to the House of Commons for Gram-pound, then for Wondover and then for Buckinghamshire. In 1627 he was imprisoned for refusing to contribute to a forced loan but his fame rests on his opposition to Ship Money. He refused to pay this tax and in the end won his case. Hampden was one of those who impeached Strafford and one of the five members whom Charles I. tried to arrest. He raised a regiment when the Civil War began and led it at Edgehill and in other fights. On June 18 1643 he was wounded at Chalgrove Field, and died on June 24, 1643.

Hampshire County of England. Its full name is the county of Southampton. It is in the south of the country with a coastline on the English Channel. It includes the Isle of Wight, which however, has its own county council. The total area is 1623 sq m. Winchester is the county town, but Southampton, Portsmouth and Bournemouth are larger. Other towns are Aldershot, Basingstoke and Eastleigh and there are several interesting markets and other towns. Alton, Farnham, Petersfield, Stockbridge and Andover among them. Lymington, Havant and Bosham

are small seaports. Portsmouth Harbour is the headquarters of the navy, Southampton Water is a great commercial harbour.

The rivers include the Itchen, Test, Hamble, Avon and Lymington. There are Downs in the north and around Winchester, sheep farming is one of the chief industries. The county contains the New Forest and remains of Wolmer and other forest areas. Places of historic interest, in addition to Winchester, are Beaulieu and Christchurch, Basing House and Hurst Castle. It is served by the Southern and G.W. Ry's. Hampshire is famous for its early association with the game of cricket, and is now a first class county. Pop (1931) 1,014,115.

The Hampshire Regiment was formerly the 37th and 67th Foot. These were raised in 1702 and 1758 respectively and have since had a long and honourable record of service. The depot is at Winchester.

Several British warships have been named the Hampshire. One existed in the time of the Commonwealth. Another, a cruiser of 11,000 tons, was lost off the Orkneys on June 5, 1916. Lord Kitchener and 600 officers and men were drowned.

Hampstead Borough of the county of London. It lies to the north-west of the city, about 6 m. away. The borough includes, in addition to Hampstead proper, Haverstock Hill and West Hampstead stretching along the Edgware Road. Here are Westfield College for women, Hackney and New College, a theological institution, and University College School.

In old Hampstead some delightful houses still stand. A notable thoroughfare is Well Walk, named when there was a spa here. At one time Keats lived therein, another house he occupied, Lawn Bank, is now a memorial to him. To the north of Hampstead Heath is the Hampstead Garden Suburb. This was laid out in 1907, and is one of the most successful enterprises of its kind. The land is owned by a trust. Pop (1931) 88,914.

Hampstead Heath Public recreation ground in the north of London. On high ground about 430 ft. above sea level, it covers altogether some 600 acres, part of it being known as Parliament Hill. It was once noted for its fairs and is still a popular resort on bank holidays. On or near it are the famous inns known as The Spaniards, Jack Straw's Castle and The Bull and Bush.

Hampton Urban district of Middlesex. It stands on the Thames, 15 m. from London, on the S. Ry., and contains Hampton Court. A ferry goes from here to the other side of the river. A house here is called Garrick's Villa, because the great actor lived in it for a time. Pop (1931) 13,053.

About 3 m. from Hampton is Hampton Wick, also an urban district. The chief building is the church of St. John the Baptist. A bridge over the Thames connects Hampton with Kingston. Pop 2957.

Another Hampton is Hampton-in-Arden, Warwickshire. This is 102 m. from London, on the L.M.S. Ry. Pop 1100.

Hampton Court Palace on the Thames near London. It is at Hampton, 15 m. from London, and is one of the finest buildings of its kind. It was erected by Cardinal Wolsey and enlarged by Henry VIII, who took it from his fallen minister. Later, further additions

were designed by Wren. It contains over 1000 rooms. George III was the last king to reside here. Parts of the palace are occupied as residences by private persons, but the larger apartments are open to the public. These include the great hall, the haunted gallery and the chapel royal. Other interesting features are the gateways, the great vine, the old clock and the maze. There is a valuable collection of pictures. The park covers 600 acres and there are over 40 acres of beautiful gardens. Adjacent is Bushy Park.

In 1604 the Hampton Court Conference was held here. This was convened by James I. in order to compose the differences between the Anglican clergy and the Puritans. It had no definite result.

Hamsun Knut Norwegian novelist. Born Ang 4 1859, he became a clerk and then tried various other occupations, farming and teaching among them. He went to the United States, but was equally unsuccessful. In 1888 his first novel, *Sult*, was published in a Danish magazine, and this made his reputation. He wrote other novels which have been translated into English and other languages. The English titles of some are, *Shallow Soil*, *Growth of the Soil*, *The Women at the Well*, *Mysteries* and *Vagabonds* (1931). In 1920 he received a Nobel Prize.

Han River of China. A tributary of the Yang-tse Kiang, it is about 1800 m. long. It rises in the mountains in the province of Shensi and flows to join the Yang-tse at Hankow. It is navigable for large vessels for about 450 m., and for small ones for almost the whole of its course.

Hand Prehensile extremity of the fore limb. Beyond the eight carpal bones of the wrist are the five metacarpal bones of the palm, and 14 phalanges serving one two-jointed thumb and four three-jointed fingers. The hands are a fundamental distinction between mankind and the lower animals. They arose from withdrawing the fore limbs from the office of support and locomotion, leaving this to be discharged solely by the hind limbs, and endowing them with the faculty of grasping by means of perfectly mobile fingers and opposable thumbs.

Hand Unit of length, used in the measurement of horses. Originally roughly the breadth of the palm of a man's hand, it has been standardised at four inches.

Handel George Frederick, English musician. Born at Halle in Lower Saxony, Feb. 23, 1685, he was the son of a surgeon there. Despite parental opposition, he studied music and after a time became organist of the church in his native town. In 1703 he joined an orchestra at Hamburg and there his first opera, *Almira*, was composed. After three years in Italy, he became, in 1710, chapel master to George, Elector of Hanover, and in 1712 he settled in England, two years before his master became king. He produced *Rinaldo* in London, and in 1713 his famous Utrecht *Te Deum* appeared. He became organist to the Duke of Chandos at Edgware and in 1726 was naturalised. From then until 1750 he was busy composing operas and oratorios. In 1751 he became blind and he died April 14, 1759. He was buried in Westminster Abbey.

Handel is best known by his oratorios. His masterpiece, *The Messiah*, was produced in Dublin in 1742. *Esther*, *Alexander's Feast*, *Samson*, *Judas Maccabaeus* and *Jephtha* are

other famous pieces. He composed much other music, sacred and secular, the latter including operas written for the Royal Academy of Music. For the coronation of George II he composed *Zadok the Priest* and he wrote *Anthems and Lessons* for the Duke of Chandos.

Handicap Method of treating competitors in a race or other sporting event so that each shall have a fair chance of success. The method of handicapping varies with the kind of sport. In horse racing the horses must carry certain weights, these being fixed by officials of the Jockey Club and other organisations. In golf the weaker competitors are given a certain number of strokes. In lawn tennis the players owe or receive 15 points or some other score. In foot races and hilliards a handicap takes the form of a start to the weaker competitor.

Handsworth District of Yorkshire (W.R.) It is 4 m. from Sheffield. Here are collieries, nursery gardens and quarries.

Another Handsworth is a district of Birmingham. It is in Staffordshire to the north-west of the city, and until 1911 was a separate urban district. It is an industrial area. Handsworth College is a centre for training Wesleyan ministers.

Hangar Large shed used for housing aircraft. It may be of a temporary or permanent character. Large hangars often of concrete construction form an important part of the buildings of an aerodrome.

Hanging Gardens Gardens at Babylon one of the Seven Wonders of the World. They were arranged in terraces the highest being 300 ft. above the plain and contained halls and other buildings placed amidst luxuriant tropical flowers and trees. It is said that they were laid out by Semiramis but it is more probable that Nebuchadnezzar was responsible for them.

Hankey Sir Maurice Pascal Ales, English administrator. Born April 1, 1877, he was educated at Rugby and entered the marines. In 1902 he became an official in the Naval Intelligence Department at the Admiralty and was soon associated with the Committee of Imperial Defence. In 1912 he became its secretary and in 1916 Secretary to the War Cabinet. In 1919, when a secretariat for the cabinet was formally established he was placed at its head. In 1916 he was knighted and in 1919 he was awarded £25,000, presumably for his work at the Peace Conference.

Hankow Treaty port of China. It stands on the north bank of the Yangtze River where it is joined by the Han, about 600 m. from its mouth. It is connected by railway with Heping nearly 800 m. away. There is a harbour with accommodation for large steamers but they can only ascend the river during the summer.

Opposite on the south bank of the Yangtze is Wuchang and across the Han is Hanyang. Through these cities much of the commerce of the centre of the country passes. In Hankow the British, French and Japanese have settlements and near it are some of the richest deposits of iron ore in the world. The population of the three cities in 1931 was 777,993.

Hanley District of Stoke-on-Trent, once a separate borough and market town. It is 13 m. from Stafford and 146 m. from London and is reached by the L.M.S. Rly. The main industry is the manufacture

of pottery. In 1910 Hanley was made part of the city of Stoke-on-Trent (q.v.).

Hannah Wife of Elkanah and the prophet Samuel's mother (1 Sam. 1-11). Receiving her son in answer to prayer, she dedicated him to the service of the temple under the high priest, Eli. Her song is a prototype of the Magnificat.

Hannibal Carthaginian soldier and one of the world's great captains. A son of Hamilcar Barca, he was born about 247 B.C. His boyhood and youth were passed partly in Spain in military surroundings, and there he learned that hatred of Rome that dominated his life. When, in 229, Hamilcar died, his young son was hailed as his successor, and soon entered upon his wonderful career. He brought parts of Spain under the authority of Carthage and took Saguntum in 218, thus bringing on a war with Rome.

In the same year Hannibal set out for Italy. He crossed the Pyrenees, defeated a Roman army in Gaul and made his memorable passage of the Alps, which cost thousands of lives and himself the loss of an eye. He won a first victory over the Romans at Ticinus and then a much greater success at Trebia. Marching towards Rome he almost annihilated one great Roman army at the Trasimene Lake (217) and another at Cannae (216). In 216 he passed a memorable winter in Capua, from which he emerged to carry on a predatory and indecisive warfare that lasted for nearly ten years. Victory seemed impossible and his skill avoided defeat until the disaster at the Metaurus in 207. His brother, Hasdrubal, in that year succeeded in reaching Italy with an army, but before he could join the other Carthaginian force he was defeated and killed in battle. His head was cut off and thrown into the camp of Hannibal who thus learned his fate. For four more years Hannibal carried on the hopeless struggle and then in 203 returned to Carthage which was being invaded by the Romans. At Zama he met his old enemy, Scipio, in battle but this time Hannibal was utterly beaten. He left his country as an exile and lived for a time in Asia Minor. The Romans demanded his surrender, to avoid which he took poison in 183.

Hanno Carthaginian sailor. He lived about 500 B.C. and is famous for the voyage he made along the west coast of Africa. He wrote an account of this which has been translated into English and is one of the earliest extant writings of his kind.

Another Hanno, who flourished about 250 B.C., is known as the opponent of the party in Carthage led by Hamilcar and his sons. His policy was to keep at peace with Rome. Hanno was governor of Libya where his rule led to serious trouble.

Hanoi City and river port of Asia, the capital of Tongking and of French Indo-China. It stands on the Seng Koi or Red River about 80 m. from its mouth. It is laid out on modern lines with all modern conveniences. There is a university. Near the city is the Great Lake on the side of which is built a Buddhist temple with a famous statue of Buddha. The city is well served by railways and has some manufactures. Small steamers can reach it. The river is here crossed by a bridge a mile long. Pop. (1932) 123,240.

Hanotaux Albert Auguste Gabriel, French statesman and scholar. Born Nov. 19, 1853, he became an official in the foreign office. From 1886 to 1889

he was a member of the Chamber of Deputies from 1894-98, with a brief interval in 1895-96, no was Minister for Foreign Affairs, his policy being one of friendship with Russia and advance in Africa. He resigned after the French rebuff at Fashoda and devoted the rest of his life to literary work. In 1897 he was elected to the Academy.

Hanotaux has written some monumental works, including his *Histoire de la France Contemporaine*, which has been translated into English, and his *Histoire de la Guerre de 1914* in 18 volumes. His *Histoire de la Nation française* is in 15 volumes, he wrote a notable book on Richelieu.

Hanover District of Germany, once a separate kingdom. It is now a province of Prussia having Hanover as its capital, and covers 14,897 sq. m. The duchy of Lüneburg-Celle was ruled in 1692 by Ernest Augustus, who was made an elector as a reward for helping the Emperor Leopold I and styled himself Elector of Hanover, this being the name of his capital. Hanover remained an electorate until the dissolution of the Empire in 1806. In 1814 it was made a kingdom. Its rulers from 1714 to 1837 were also Kings of Great Britain and Ireland.

In 1837 Hanover was separated from Great Britain and Ernest Augustus, Duke of Cumberland, became the king. He died in 1857 and was succeeded by his son George V. In 1866 George took the side of Austria in the war against Prussia. The Prussians, therefore, invaded Hanover and annexed it. The king and then his son, the Duke of Cumberland, maintained their rights to the throne, but these were never recognised, and Hanover has since remained part of Prussia.

Hanover Town of Germany, once the capital of the kingdom of Hanover. It is 116 m. from Hamburg and 163 from Berlin, and is an important railway junction, standing at the junction of the rivers Leine and Ihme. It is also an airport and is connected with the Rhine by a canal.

The town consists of an old town, a new town and suburbs around them. There are some fine squares and beautiful public gardens, including a zoological garden. The opera house and several theatres may be mentioned, and there is a hall seating 6000 people. Near the town are some extensive woods owned by the municipality, and Herrenhausen, formerly the residence of the rulers of Hanover. The suburbs include Calenberg and Linden. Machinery, rubber, textiles and chemicals are the chief industries, also printing. It has a broadcasting station (566 M., 0.25 kW). Pop. (1925) 425,274.

Hansard Name given to the official reports of the proceedings of Parliament. In 1803, Thomas Curson Hansard, a printer, began to issue accounts of the debates. After his death in 1828 the work was continued by his family, and in 1857 a grant of money was made to help them in the work.

In 1835 the Hansards ceased to do this work, which was taken over by the staff of *The Times*. In 1908 this arrangement ended and the debates are now reported by a staff engaged by the Government. The name Hansard is, however, retained for the volumes that contain the debates and speeches. A verbatim report of the proceedings of each sitting is issued each day that Parliament meets.

Hanseatic League Union of towns, chiefly in the north of Europe, for trading purposes.

In the 12th century, in some of the cities that took the lead in developing trade with foreign countries, merchants formed themselves into a hansa or association for the purpose of securing privileges. Later, two or more of these hansa united themselves together for the same purpose and in this way the great Hanseatic League began. In forming this league Lübeck, Hamburg and Bremen took the leading part, and in the 14th century they had made it into a great confederation, equal in power, and more than equal in wealth, to many of the European states. Most of the seaports on the Baltic and the eastern side of the North Sea were members. Its headquarters were at Lübeck.

The 14th century, when the Baltic was a great highway of trade, was the most flourishing period of the League's history. Its membership meant valuable privileges for merchants in England and other lands, not the least being protection, for the League kept an army. From 1340 to 1370 it carried on a war with Denmark, in which it was victorious. In the 15th century, the power of the League declined. Various causes contributed to this, one being the growth of nationality. The discovery of America was another blow, and the Thirty Years' War brought the League to an end. For long after, however, the towns of the League were called Hanse Towns.

Hansom Name of a type of cab now rarely seen. It was named after J. A. Hansom, a Yorkshireman, who registered the first one as a patent. The earliest hansom had the driver's seat at the side and was fitted with two enormous wheels. Later the seat was placed at the back.

Hanway Jonas. English philanthropist. Born at Portsmouth, Aug. 12, 1712, he entered business at Lisbon. Later he was a merchant in Russia and Persia. He settled in London and was from 1762 to 1783 a civil servant. He died Sept. 5, 1786. Hanway was the first man to carry an umbrella in London, he founded a hospital for fallen women, and attacked the habit of drinking tea.

Hanwell District of Middlesex, part of the borough of Ealing, and 7 m. from London. The Brent and the Grand Union Canal flow through the district which includes Eilthorne.

Hanworth District of Middlesex. It is 16 m. from London, and its station is Feltham on the S. Rly. Here is the London Air Park.

Hapsburg Name of great European family. It is taken from a castle near the union of the Aar and the Rhine, where the early Hapsburgs lived. They were counts, and in 1273 one of them, Rudolph, was chosen German King. He secured Austria and Styria, and his descendants were dukes and then archdukes of Austria. Rudolph's son, Albert, was German King, as was another member of the family, Frederick, but only for short periods.

In 1438 Albert, Archduke of Austria, a descendant of Rudolph, was chosen German King. He had just inherited by right of his wife the kingdoms of Bohemia and Hungary, and with Austria and the duchies associated with it he ruled over a fairly extensive territory. From this time until 1806, the Hapsburgs were German kings and Roman emperors, though they were descended not from Albert but from a relative, Frederick, who became German King in 1440.

Frederick's son was Maximilian I, who was succeeded by a grandson, Charles V. Charles had a brother, Ferdinand, who became King of Bohemia and Hungary and who succeeded as emperor on his brother's abdication. From this time the Hapsburgs were divided into two branches, the Austrian Hapsburgs descended from Ferdinand and the Spanish Hapsburgs descended from Charles's son, Philip II. The Spanish Hapsburgs became extinct when Charles II died in 1700, the Austrian Hapsburgs when Charles VI died in 1740.

The later Hapsburgs are descended from the marriage of the Empress Maria Theresa, the daughter of Charles VI and Francis, Duke of Lorraine, and are sometimes called the house of Hapsburg-Lorraine. Francis II, a grandson of Maria Theresa and Francis, resigned the imperial crown in 1806 and the Holy Roman Empire came to an end. In 1804 he had declared himself Emperor of Austria, and his descendants, notably Francis Joseph, kept this dignity until 1918, being also Kings of Hungary and Bohemia and until 1859 having lands in Italy. The last emperor was Charles, who abdicated in 1918 and died in 1922, leaving his son, Francis Joseph Otto, as head of the house.

Hara-Kiri Japanese practice of self-dismemberment. As an honourable atonement for wrongs done by nobles and officials, it was formally recognised in the 14th century and was effected ceremonially with a jewelled dagger sent by the Mikado. For centuries about 1500 such suicides half of them voluntary, occurred annually. Obligatory hara-kiri ceased in 1868, the voluntary form remains. General Nogi observed it, his wife simultaneously cutting her throat, when the Mikado Mitsuhito died in 1912.

Harbin Town and river port of Manchuria. It stands on the Sungari River, 125 m from Mukden and is a junction on the Chinese Eastern Ry. It is a treaty port and has an international settlement. Pop. 330,436.

Harbour Stretch of water where ships can anchor in safety. There are natural harbours and artificial harbours. The best natural harbours are found where the sea penetrates the land by a somewhat narrow entrance as is the case with Sydney and Cork harbours which are among the finest in the world. The entrance to New York makes a fine natural harbour. Other good examples are Milford Haven and Portsmouth. The mouths of rivers may make harbours but these are less protected than are landlocked arms of the sea and are more liable to be silted up with sand or debris.

Artificial harbours are made in suitable places by the construction of breakwaters and other works of that kind, some of these being marvels of engineering skill. Dover, Southampton and Buenos Aires are examples. Every civilised maritime country has harbours of this kind constantly being improved to accommodate larger and larger vessels. Many small harbours which made prosperous seaports are now useless because they cannot accommodate the larger vessels of today.

A modern harbour is equipped with docks of all kinds and appliances for expediting the handling of cargo. Some harbours, those at Dover, Rosyth and Cherbourg, for instance, have been built for naval purposes.

In most large ports such as London, Liverpool and Glasgow the harbour is owned and managed by a special authority appointed for that purpose. In other ports the docks belong

to a railway company, Southampton being an example. In some small ports they are the property of the local authority.

Harbour Grace Town and port of Newfoundland. On the shores of Conception Bay, in the east coast of the island, it has a harbour of considerable size. Here is a Roman Catholic cathedral. It is connected by railway with St. John's. Pop. 3825.

Harcourt Viscount. Title held by the family of Harcourt. The first viscount was Simon Harcourt, who was made Lord Keeper of the Great Seal in 1710. He was made a baron in 1711 and a viscount in 1721. He died July 23, 1727. His son, Simon, the 2nd viscount, was made an earl in 1749, and was Lord Lieutenant of Ireland, 1772-77. When he died in 1777 the titles passed in turn to his two sons. When in 1830, William the 3rd earl, who was a distinguished soldier, died, the Harcourt titles became extinct.

In 1916 the title of Viscount Harcourt was revived for Lewis Vernon Harcourt. Born Feb. 1, 1863, he was the elder son of Sir William Harcourt who had inherited the family estates, including the manor house of Stanton Harcourt and Nuneham Park, both in Oxfordshire. The former had been a family residence for 600 years. Lewis Harcourt was an M.P. from 1904 to 1916. From 1905 to 1910 he was First Commissioner of Works, and from 1910 to 1915 Secretary for the Colonies. He died Feb. 24, 1922, leaving an only son to inherit his title.

Harcourt Sir William. English statesman. William George Granville Venables Vernon Harcourt, born Oct. 14, 1827, was a grandson of Edward Harcourt, Archbishop of York. He went to Trinity College, Cambridge, and became a barrister. His powerful intellect soon showed itself in his contributions to *The Saturday Review* and in the letters which signed *Historicus*, he wrote to *The Times*. From 1867 to 1877 he was Whewell Professor of International Law at Cambridge.

Harcourt, true to the Whig creed of his family, joined the Liberal party, and in 1868 was elected M.P. for the city of Oxford. From 1880 to 1895 he represented Derby and from 1895 to 1904 a division of Monmouthshire. In 1873-74 he was Solicitor General and from 1880-85 was Home Secretary under Gladstone, whom he followed when Home Rule split the Liberal party. In 1880 he was Chancellor of the Exchequer for a few months, and he returned to that position in 1892. In 1894 he succeeded Gladstone as leader in the House of Commons but not, to his disappointment, as Premier. He was responsible for the introduction of the death duties. He left office in 1895 and led the party in opposition until 1898 when he resigned, but he kept his seat in the Commons until his death, Oct. 1, 1904. In his later years he lived at Nuneham, near Oxford, the old seat of the Harcourts which he inherited from a kinsman. He left two sons, Lewis (qv) created a viscount, and Robert. His life has been written by A. G. Gardiner.

Although a thorough aristocrat, Harcourt became more radical in his political opinions as he advanced through life. A man of commanding presence he was recognised as one of the first debaters of his time, he had an equally high reputation as a wit.

Hardanger Fjord or inlet of the coast of Norway. It extends for about 70 m inland, Vik being at its head, and

has a branch which goes to Odde. The fjord is much visited by tourists who are attracted by the wonderful mountain and other scenery. Near is the waterfall called the Vöringfos.

Hardie James Keir, Scottish politician. Born April 15, 1856, he became a coal miner in Lanarkshire. In 1880 he was chosen secretary of a trade union there, and he soon appeared as an ardent socialist. From 1882-86 he edited *The Cumnock News*, and from 1900 to 1915 *The Labour Leader*. In 1892 he entered the House of Commons as M.P. for South West Ham. He lost his seat in 1895, but in 1900 he was elected for Merthyr Tydfil, which he represented until his death, Sept. 26, 1915. Hardie is best remembered, perhaps, as the founder of the Independent Labour Party.

Harding Warren Gamaliel, American president. The son of a doctor, he was born in Ohio, Nov. 2, 1865. He started life, after an education in a local school and college, as a schoolmaster, but soon became a printer. In 1884 he became the owner of *The Marion Star* and was soon an influential person in that town. He was a member of the Senate of Ohio, 1900-04, and was Lieutenant-Governor of the State, 1904-06. As a republican he was elected to the Senate of the U.S.A. in 1914, and he became prominent as an opponent of President Wilson's policy in the early days of the World War. In 1920 Harding was nominated for the presidency and he won a signal victory over his Democrat opponent. The chief event of his term of office was the calling of the Washington Conference, but he died before the expiration of his four years, Aug. 2, 1923.

Hardinge Name of a noted Kentish family. Henry Hardinge, born at Wrotham, March 30, 1785, became a soldier and served in the Peninsular War. He then turned to politics and in 1820 was elected an M.P. In 1828 he was made Secretary for War, and in 1830, and again 1834-35, he was Chief Secretary for Ireland. In 1841-44 he was again Secretary for War. From 1844-48 he was Governor General of India where he was responsible for the war against the Sikhs and the annexation of the Punjab. In 1852 he succeeded Wellington as Commander in Chief of the British army. He died Sept. 24, 1856.

In 1846 Hardinge was made a viscount and the title is still held by his descendants. Charles Hardinge, a younger son of the 2nd viscount, entered the diplomatic service in 1880. In 1904-06 he was ambassador at St. Petersburg and 1906-10 was Under-Secretary at the Foreign Office. From 1910 to 1916 he was Viceroy of India, and in 1910 was made Baron Hardinge of Penshurst. When he left India he resumed his former position at the Foreign Office, remaining there until 1920, when he became ambassador in Paris, a post he vacated in 1922.

A railway bridge across the Ganges at Sara, opened in 1917, is named the Hardinge Bridge.

Hardingstone Village of Northamptonshire. It is about a mile south of Northampton. Here is one of the crosses erected by Edward I. to mark the resting place of his wife's body on its way to London. On Hardingstone Fields the Battle of Northampton was fought in 1459.

Hard Labour Particular kind of imprisonment. In Great Britain, under certain conditions, judges can sentence those convicted of crime to a term

of imprisonment with hard labour. This means solitary confinement and the discharge of some heavy task, making sacks or picking oakum. This lasts for the first 28 days of the term of imprisonment, after that time unless they are unruly, the prisoners are given easier tasks, similar to those given to prisoners who are not sentenced to hard labour.

Hardwick Hall Seat of the Duke of Devonshire. It is in Derbyshire, 6 m. from Chesterfield, and is reached from Rowtham station on the L.M.S. Rly. It was built by Elizabeth, Countess of Shrewsbury, about 1600, and from her it passed to the Cavendish family who have since retained it. The long gallery is a fine apartment, but the house is chiefly famous for its windows (whence the saying, "Hardwick Hall more glass than wall") and its tapestries. Near are the ruins of an earlier hall.

Hardwicke Sir Cedric, English actor. Born in 1893 at Lye in Worcestershire, he was educated at Bridgnorth. He made his first appearance on the stage in London and in 1914 was touring in South Africa with F. R. Benson's Shakespearean Company. In 1924 he settled in London and during the next few years made a great reputation. His successes included parts in *Back to Methuselah*, *The Apple Cart* and others of G. B. Shaw's plays, as well as in *The Farmer's Wife*, *Yellow Sands* and *The Barretts of Wimpole Street*. He has also acted for the films in the characters of Nelson and Dreyfus. In 1932 he published an autobiography, *Let's Pretend*. Knighted New Year's Day, 1934.

Hardwicke Earl of, English title borne since 1754 by the family of Yorke. Philip Yorke, the son of a lawyer at Dover, was born Dec. 1, 1690, and became a barrister. In 1719 he was elected M.P. for Lewes, later becoming Solicitor-General and then Attorney-General. In 1733 he was made Lord Chief Justice, and from 1737 to 1756 was Lord Chancellor. From 1757 to 1762 he was a member of the Cabinet without office. He died March 6, 1764. In 1733 he had been made a baron and in 1754 an earl. The title is still held by a descendant, and the earl's eldest son is called Viscount Royston. A younger son of the 1st earl, Charles Yorke, also became Lord Chancellor. Hardwicke ranks as one of the greatest of British lawyers. The Hardwicke Society, a debating society of London barristers, is named after him.

Hardwood Name used for the timber of broad leaved deciduous trees. It includes mahogany, rosewood, ebony and ironwood, as well as oak, walnut and ash. The world's hardwoods occupy 1200 million acres in temperate regions, and 3600 million acres in the tropics.

Hardy Thomas, English writer. Born at Uppor Bockhampton, near Dorchester, Dorset, June 2, 1840, he was educated at the grammar school there. He went to London to study architecture, winning prizes from the professional associations and working under Sir Arthur Blomfield. Hardy's real interest, however, was in literature, and he soon began to write. His first novel *Desperate Remedies*, appeared in 1871 and *Under the Greenwood Tree* in 1872. Then came in quick succession, *A Pair of Blue Eyes* (1873), *Far from the Madding Crowd* (1874), *The Hand of Ethelberta* (1876), *The Return of the Native* (1878), *The Trumpet Major* (1880), *A Laodicean* (1881), *Tico on a Tower* (1882),

The Mayor of Casterbridge (1886), *The Woodlanders* (1887), *Tess of the D'Urbervilles* (1891), *Jude the Obscure* (1895), and *The Well Beloved* (1897). Volumes of short stories are *Wessex Tales* (1888), *A Group of Noble Dames* (1891), and *Life's Little Ironies* (1894).

Hardy was also a poet and published several volumes of verse. His last great work was a dramatic poem of the Napoleonic wars, *The Dynasts*, regarded by some as the supreme achievement of his genius. In 1910 he was given the Order of Merit. He died at his residence, Max Gate, Dorchester, Jan. 12, 1928. He was twice married, but left no children. His *Life* was written by his widow. In 1931 a statue to him was erected in Dorchester.

To Hardy recognition came slowly, but for many years before his death he was regarded as one of the great English writers. His style is remarkably incisive and his powers of description, especially of scenes of rural life, have rarely, if ever, been excelled. Two other qualities help to assure him a place amongst the immortals. One is his philosophy of life and the other the intense local colour which permeates his works. His philosophy is that of fate, indifferent to suffering, caring nothing for either good or evil, playing with the lives of men and women as it will. His books are full of the history and folklore of the country which he knew and about which he wrote with such detail. He calls it Wessex, but to many it is the Hardy country, and its towns and villages can be easily recognised beneath the pseudonyms which he has given them.

Hardy Sir Thomas Masterman English sailor. Born at Kingston, Dorset, April 5, 1769, he entered the navy in 1793, having previously been in the merchant service. In 1799 began the friendship with Nelson for which he is known. They fought at the Battle of the Nile in the same ship, and at Trafalgar. Hardy was captain of the *Fictory* when Nelson's last address to him his dying words. In 1806 he was made a baronet and he held naval commands for the rest of his life. He was Commander in Chief in South America and First Sea Lord of the Admiralty before 1834 when he was made Governor of Greenwich Hospital. He died at Greenwich, Sept. 20, 1839.

Hare Name of a family of rodents which includes the rabbit. It is found in most parts of the world except Australia. In Great Britain the word is used for the brown hare (*Lepus europaeus*). It is about 2 ft long and weighs 7 or 8 lb. It has a short tail long ears and a cleft upper lip. It runs swiftly by leaps and lives in grassy furrows. The young of the hare is called the leveret. The hare is used in coursing and is also hunted by harriers and beagles.

Hare and Hounds is the name given to runs across country. One or two runners called the hares go in front and scatter pieces of paper to show the way they have taken. The others follow the trail and try to catch the hares.

Hare Sir John English actor. Born in London May 16, 1844, he was educated at Glasgow. He began to act in 1866, appearing in T. W. Robertson's comedies where he was a great success in the parts of old men. In 1875 he undertook the management of the Court Theatre from 1879-88 and W. H. Kendal named the St James's and from 1889-93 he controlled the Garrick Theatre. He produced some of A. W. Pinero's dramas including *The Gay Lord Quex* at the

Globe Theatre in 1899, and played in them personally. Hare had many successes, notably as Spencer Jermyn in *The Hobby Horse* and as Benjamin Goldfinch in *A Pair of Spectacles*. Knighted in 1907, he died Dec. 28, 1921.

Harebell Name of the Scottish hiehell (*Campanula rotundifolia*) as distinct from the wild hyacinth, or English hiehell. The stems are slender, and the lower leaves heart shaped, the upper being slighter and narrower in shape. The flowers are bell like and of a clear blue colour, nodding on stiff angled stems. It is found on heaths and meadow land from July to September.

Harefield Village of Middlesex. It stands on the Colne, 5 m from Uxbridge. The village is famous because here, at Harefield Place, now pulled down, Alice Spenser, Dowager Countess of Derby (b. 1637), with her second husband, Lord Egerton, lived. She was the Amaryllis of Spenser and for her Milton wrote *Arcades*. Some almshouses founded by the Countess still stand.

Harelip Vertical fissure, present at birth, on one or both sides of the middle line of the upper lip, so called from a fancied resemblance to the hare's cleft lip. It often accompanies the imperfect development of the roof of the mouth called cleft palate, and is amenable to surgical treatment.

Harem Name applied collectively to the quarter assigned to the females of a Mohammedan household and to the occupants. Haroms are found in Turkey, Persia and other Mohammedan countries, but the rules about the seclusion of women have been modified since the Great War. In former days haroms on a magnificent scale were maintained at Constantinople by the Sultan and elsewhere by other Mohammedan princes.

Haresfield Hill or heathen of Gloucestershire. It is one of the Cotswold Hills and is near Gloucester. It commands a magnificent view, and on it the Romans had a watch station. In 1931 200 acres of the heath became the property of the National Trust.

Harewood Earl of English title held by the family of Lascelles. In 1706 Edward Lascelles, the head of a Yorkshire family, residing at Harewood House near Leeds, was made a baron and in 1812 an earl. The title passed from one descendant to another until it came in 1929 to Henry George Charles Lascelles as the 6th earl. He was born Sept. 9, 1882, and educated at Eton and Sandhurst. During the Great War he served with the Grenadier Guards, winning the D.S.O. On Feb. 28, 1922, he became Viscount Lascelles, he married Princess Mary. Their family consists of two sons the elder bearing the courtesy title of Viscount Lascelles. The earl inherited a large fortune from his uncle, the Marquess of Claremont who died in 1916.

Harewood House, about 12 m from Leeds, is a fine building dating from the 18th century. The church has some interesting monuments.

Harfleur Seaport of France. It is 6 m. from Havre and stands near the junction of the little river Lézarde and the Seine. At one time Harfleur was the most important port in Normandy, and as such it was captured by Henry V. In 1415, the English keeping it until 1449. Later the river became choked with sand and the port lost its trade. In the 19th century this was revived by cutting a canal to the Seine. Along this a new harbor

was built, and there is now a certain amount of fishing and shipping Pop 2700

Hargreaves James English inventor He was born in Lancashire about 1745 and became a weaver at Standhill near Blackburn There, about 1764, he invented and built a machine for spinning cotton much more quickly by using eight spindles in a row He called it the spinning jenny from the name of his wife It is one of the inventions which have made the great modern cotton industry possible In 1768 the machine was destroyed by those who found it would decrease the demand for labour, but Hargreaves erected another in Nottingham where he also built a mill His progress was handicapped by lawsuits due to difficulties about the patents He died April 22, 1778

Haricot French word originally denoting a stew of mutton and vegetables, including beans It is now used for the French or kidney bean In summer these are hulled in their pods and known as *haricots verts* In winter, when dried, a day's soaking in cold water is essential to make them tender

Harlech Town of Merionethshire It is 10 m from Barmouth, on the G W Rly At one time it was a borough and the county town, but now it is a small pleasure resort with golf links and sands The chief object of interest is the ruined castle built in the time of Edward I With it is associated the popular song, "March of the men of Harlech"

Harlequin Character in pantomime Clad in a many-coloured glittering garment, he generally represents Columbine's lover, and is a type of light-hearted gaily and the enemy of the clown When masked he is supposed to be invisible

Harlequins Name of a London Rugby football club It dates from 1871 and for long had a ground at Wandsworth Common Since 1908 the club has had its headquarters at Twickenham, on the ground of the Rugby Union

Harlesden District of north-west London It is part of the urban district of Willesden and is 7 m from the city

Harley Name of the family that once held the earldom of Oxford Robert, the 1st earl, and his son, Edward, the 2nd earl, made a valuable collection of books and manuscripts In 1753 this enormous collection, the Harleian Manuscripts, was bought for the nation and it is now in the British Museum The Harleian Society at 4 Trafalgar Square, London, W C, was founded in 1869

The London thoroughfare called Harley St. is named after this family It runs from Cavendish Square to Marblebone Road, and is famous for its association with the medical profession In or near Harley St. nearly all the leading physicians have their consulting rooms

Harlington Village of Middlesex. It is 13 m from London. Henry Bennet Earl of Arlington, a member of the Cabal, took his title from here Harlington has now become an industrial area, and is part of the urban district of Haves and Harlington

Harlow Town of Essex. It is 24 m. Rly from London, on the L N E Rly At one time Harlow was a market town and had manufactures of cloth and pottery In 1928 Roman remains, including those of a temple, were unearthed here Pop 2960

Harmattan Dry wind that blows from the Sahara during the months between October and March It carries a great quantity of dust to the jungles of the south It is sometimes called "the doctor," because of its healthy properties

Harmonica Set of water-filled glass vessels played with a wet finger and called sometimes the musical glasses The musical glasses were popular in the 17th century and were improved into a determinate instrument Benjamin Franklin mounted the glasses on a spindle revolving over a trough of water The word is also used for a toy dulcimer of glass or metal

Harmonium Musical instrument invented by Alexandre Debain (1809-77) In it vibrators or free reeds, which were tongues of metal, set in periodic motion by air pressure induced by bellows which the player works by treadles, produce the tones of the harmonium It has one or two keyboards and stops, which, by regulating the air supply, control the quality of tone

Harmony In popular musical phraseology harmony denotes any sequence of sounds that is pleasing to the ear Technically it is the science dealing with the concord of sounds of varying pitch, based on counterpoint Pythagoras was the originator of the science, but the Greeks seem to have made little actual use of their knowledge The modern development of harmony dates roughly from the Renaissance

Harmsworth Name of a family famous in journalism Alfred Harmsworth, a barrister, left seven sons Two became respectively Viscount Northcliffe (q.v.) and Viscount Rothermere (q.v.) Of the others two became baronets, Robert Leicester in 1918, and Hildebrand in 1922 Sir Robert was Liberal M.P. for Caithness, 1900-18

Cecil Bliss Hopp Harmsworth, another brother, was a Liberal M.P. from 1906-10 and again, 1911-22 He was Under Secretary to the Home Office, 1915 and to the Foreign Office, 1918-22 Viscount Rothermere's only surviving son, Esmond, was Unionist M.P. for the Thanet division, 1919-29 All the members of the family are interested in newspaper companies.

Harnack Adolf von German theologian A son of Theodosius Harnack, Professor of Theology at Dorpat, he was born there, May 7, 1851 He studied under his father, and in 1874 was made Lecturer in Church History at Leipzig In 1876 he became Professor of Ecclesiastical History at Leipzig: in 1879 at Giessen, in 1886 at Marburg, and in 1889, being now recognised as one of the world's foremost theologians, he was transferred to Berlin In 1905 he left his professorship to become Director of the Royal Library. He died at Heidelberg, June 10, 1930

A Protestant holding somewhat advanced views, Harnack wrote a great deal. Some of his books have been translated into English, these including *The History of Dogma*, *What is Christianity?* and *Studies in the New Testament*.

Harold I. King of the English, called Harefoot A son of Canute the Great, he claimed the throne on his father's death in 1035. It was also claimed by his half-brother, Hardicanute, but Harold, having an English mother, Algiwa, thought his claim was the stronger The country was divided between

them, Harold becoming king of the land north of the Thames, but in 1037, as Hardicanute was a continuous absentee, all England was put under Harold. He reigned until his death at Oxford, March 10, 1040.

Harold II King of the English. He was born about 1022, being a son of Earl Godwin. About 1046 he was made Earl of East Anglia by his brother in law, Edward the Confessor. In 1051 Godwin and his sons were banished, at this time we hear of Harold in Ireland and as ravaging the coasts of England. Soon he returned, and in 1053 succeeded his father as Earl of Wessex. By his wars against the Welsh he won a good deal of fame, and in 1066 on Edward's death, the Witan chose him as king and he was crowned at Westminster.

Some time before this, Harold had visited Normandy, had gone with William on a campaign into Brittany, and may have promised the English crown to the Norman duke. Just after he became king, Harold, King of Norway, and Tostig, a rebellious brother of the English king, invaded England, as did William of Normandy. Harold defeated the Norwegians at Stamford Bridge on Sept. 25, and then led his army south. At Hastings he met the Normans and there, on Oct. 14, 1066, he was killed with two of his brothers. Harold married the widow of a Welsh prince, but his chief love was Edith, called Swan neck, who bore him five children. She discovered his body on the field of battle and had it buried at Waltham in the church he had built.

Harold Name of three kings of Norway. Harold I reigned from 872 to 930. He was at first a chieftain, one of several, in Norway, but succeeded in driving out the others and bringing the whole land under his own rule. Harold II is unimportant. Harold III was the king who invaded England in 1066 and was killed at Stamford Bridge. Before becoming king in 1046, he had been leader of the Varangian guard at Byzantium. He was called Hardrada, or 'stern in council'.

Haroun Al-Raschid Caliph of Baghdad. A son of Mohammed Mahdi, he was born in Sept., 763 and when quite young conducted a successful war against the emperor at Byzantium. In 786 he became caliph in succession to his brother and he reigned until his death in March 809. Haroun's reign is marked by the murder of the Barmecides and another victory over Byzantium, which again paid him tribute. His real fame, however, is as living at Baghdad in great splendour, surrounded by wealth, learning and luxury as immortalised in *The Arabian Nights*.

Harp Musical instrument common to all races and periods and originating in the twang of a taut bowstring. The earliest harps were bow shaped and two sided. Later came three-sided harps and to day the harp is the only instrument with mechanical fixed tones and separate strings for sharps, flats and naturals. The sound board next to the player gives resonance the hollow pillars contain rods to work the mechanism the comb contains the transposing mechanism and on the pedestal are the pedals. The strings are of coloured catgut except the lowest, which are of wire. The compass of the harp is 64 octaves.

The harp is one of the oldest of musical instruments and from earliest times kings and leaders have had their harpers. They were

known in Egypt and there are many references to them in Greek literature.

Harpenden Urban district of Hertfordshire. It is 25 m from London, on both the L M S and L N E Ryas. Here is St George's co-educational school, and near by is Rothamsted. Pop (1931) 8340.

Harper's Ferry Town of West Virginia, U S A. It is 55 m from Washington, where the Rivers Potomac and Shenandoah meet. Here the United States had an arsenal, which, on Oct. 16, 1859 was captured by John Brown and a few followers but regained the following day. John Brown (q r) was hanged.

Harpoon Dart like barbed weapon used for killing whales. It was originally thrown by hand from an open boat. The older form is superseded now by the shot-harpoon invented in 1870 by a Norwegian, Sven Foyn. This is fired from a gun, and in the modern type carries an explosive charge which bursts in the whale's body.

Harpisichord Musical instrument. It is the most important of keyboard instruments preceding the piano. In the depression of the keys raised wooden 'jacks' in which were mounted quills, or leather plectra. These twitched, or plucked, the metal strings, giving a pleasing but unvarying sustained tone. In the 17th and 18th centuries the harpsichord accompanied recitatives as an orchestral instrument but was most effective when used as a solo instrument.

Harpy Mythical monster with the face of a woman and the body of a vulture. They doffed whatever they touched. Juno sent them to deprive the blind Phineus of food, but later the sons of Boreas rescued him. Aeolus met them on his voyage to Italy.

The harpy eagle is a large species of eagle found in South America.

Harrier Breed of dog maintained for hunting hares by scent. The dogs smaller than fox hounds, may be 20 in high and have large pointed ears. They are maintained in packs, of which there are about 50 in England, and a number in Ireland.

The name harrier is also used for men who run in cross country races. These form teams and matches are held, the competitors being six or some other number on each side.

Harrier also a genus of hawks. Slender with long legs and wings and short beaks they are usually found in marshy districts where they prey upon fish and frogs as well as small birds and mammals. Though rare three species occur in Great Britain, the hen harrier, Montagu's harrier and the marsh harrier.

Harrington Urban district of Cumberland. It stands on the coast 5 m from Whitehaven, and the chief industry is coal mining. Pop (1931) 4125.

Harrington Earl of English title borne since 1742 by the family of Stanhope. William Stanhope, a leading politician in the time of George II, was the first earl. A son of John Stanhope of Elvaston, Derbyshire, he served as a soldier and a diplomat, chiefly in Spain and in 1730 was made a baron. From 1730 to 1746 he was a Secretary of State and from 1747 to 1751 Lord Lieutenant of Ireland. In 1742 he was made an earl and died Dec. 8, 1756.

William, the 2nd earl and Charles, the 3rd earl, were both soldiers of note. Charles, the 4th

earl, was the eccentric being who married the actress, Mary Foote, and Leicester, the 5th earl, was a noted sportsman, being perhaps the most prominent master of the foxhounds in his day. He died in 1917. The earl's seat is Elvaston Castle, near Derby, and his eldest son is called Viscount Petersham.

Harris Southern part of the Island of Lewis. Off the west coast of Scotland, it is about 20 m long and forms part of the County of Inverness. The soil is very poor, fit for little more than the grazing of sheep. Fishing is an industry and the district gives its name to the tweed which is woven here. Tarbert on the coast is the chief town. Leverburgh is a fishing port made by Lord Leverhulme, who bought much of the land. Searasta is a small watering place.

The Sound of Harris, dividing Harris from North Uist is about 7 m wide and 10 m long. It is the only channel for large vessels in the Outer Hebrides.

Harris Baron English title. George Harris, born at Brasted, Kent, March 18, 1746, was the son of a clergyman and became a soldier. After service in America he went to India, where he made his reputation by his successes against Tipoo Sahib. He led the force that stormed Seringapatam and was instrumental in the acquisition of Mysore by Great Britain. In 1815 he was made Baron Harris. He died, May, 1829.

In 1872 the title came to George Robert Canning Harris, as 4th baron. Born Feb. 3, 1851, he went to Eton and Oxford, where he was famous as a cricketer. From 1875 to 1899 he was captain of Kent, and in 1930, when 80 years old, he played in a match at Eton. He had played also for England against Australia. He was Under Secretary for India and then for War, 1885-89, and from 1890-93 was Governor of Bombay. He is also known for his connection with the mining industry of South Africa. He died, March 21, 1932.

Harris Sir Augustus Henry Glossop. English actor manager. Born in Paris in 1852, he became an actor and appeared in Manchester in 1873. He is chiefly known as the manager of Drury Lane Theatre, London, which he took in 1879. There he produced melodramas and a popular series of Christmas pantomimes. He died June 22, 1896, having been a knight since 1891.

Harrismith Town of the Orange Free State. It stands on the River Wilge, 261 m from Durban and 60 from Ladysmith, being connected with both by railway. It is the trading centre for a large district and, standing some 5000 ft high, is a health resort. Pop. 6000.

Harrison Frederic. English scholar. Born in London, Oct. 18, 1831, he was educated at King's College, London and Wadham College, Oxford. For a time he was at Wadham as a tutor and fellow, and was one of the group who, taking up the teaching of Comte, founded the positivist movement in England. Having become a barrister he settled in London and from 1877-89 was Professor of Jurisprudence at the Inns of Court. He is chiefly known, however, as a graceful and forceful writer on a great variety of subjects. He was also what would now be called an uncompromising Victorian, as well as a stout individualist. He wrote *Lives of Cromwell*, *William the Silent* and *Ruskin: The Meaning of History*, *The Choice of Books*, *The Creed of a Layman* and *The German Peasants* are

others of his books. In 1908, always a great climber, he wrote *My Alpine Jubilee*, in 1911, *Autobiographical Memoirs*, and in 1920 *Novissima Verba*. He died at Bath, Jan. 14, 1923.

Harrogate Borough and inland watering place of Yorkshire. It is 203 m from London and 18 from Leeds and is reached by both the L.M.S. and L.N.E. Rlys. It is chiefly known for its mineral springs, the waters of which are efficacious for various complaints. They belong to the corporation. Visitors are also attracted by the beautiful surroundings. In the vicinity is some of the finest Yorkshire scenery, with Fountains Abbey, Bolton and other beauty spots. The chief buildings are the Royal Hall, the opera house, and the winter gardens, as well as the various pump rooms, baths and hotels. Harlow Moor and The Stray are open spaces. Pop. (1931) 39,785.

Harrow Agricultural implement for turning over the surface soil. It consists of a square or rhombic shaped frame bearing a number of fixed steel teeth, or "tines" projecting downwards. In the drag harrow the teeth are curved, but in the disc harrow they are replaced by saucer shaped cutting discs. In the spring-tined harrow the teeth are curved and non-rigid.

Harrow Urban district of Middlesex. It is 12 m from London and is served by the L.M.S., L.N.E., district and tube railways. Its full name is Harrow-on-the-Hill and it has grown enormously in the 20th century. Here is Harrow School (qv). A new hospital was opened here in 1931. Pop. (1931) 16,378.

Harrowby Earl of. English title borne by the family of Ryder. Sir Dudley Ryder, who was Lord Chief Justice, 1754-56 had a son, Nathaniel, who, in 1776, was made a baron. His son, Dudley, entered the House of Commons and took office under Pitt in 1789. In 1804-05 he was Secretary of State for Foreign Affairs, and from 1812-27 he was Lord President of the Council. In 1827, when he was made an earl, he refused the office of Prime Minister. In 1831-32 he had a good deal to do with the negotiations that led to the passing of the Reform Bill. Although a Tory, he was in favour of religious liberty and other reforms. He died Dec. 26, 1847, the last survivor of Pitt's colleagues.

His son, Dudley, the 2nd earl (1798-1882), and his grandson, Dudley, the 3rd earl (1831-1900), were both active politicians, the latter being Vice-President of the Council, 1874-78, and President of the Board of Trade, 1878-80. The present earl is descended from his brother who became the 4th earl. The earl's seat is Sandon Hall, Staffordshire, and his eldest son is called Viscount Sandon.

Harrowby is a village of Lincolnshire, just outside Grantham.

Harrow School English public school. Founded by John Lyon in 1571, it was for long a village school. Towards the end of the 18th century it became one of the chief schools in the land, rivalling Eton and Winchester. It accommodates about 700 boys and has a fine range of buildings and extensive playing fields. The buildings include the speech room, library and chapel, all modern. The old school, dating from 1611, with the fourth form room, still remains. A memorial hall was erected in honour of 619 Harrovians who fell in the Great War. The headmasters of Harrow have included

Christopher Wordsworth, C J Vaughan and H M Butler. Among its pupils were Byron, Peol, Palmerston and, more recently, Baldwin, Churchill and Galsworthy. For many years the school has been famous for its music.

Hartal Hindn word for a day of lamentation. In 1930 and at other times a hartal, or day of the kind, was proclaimed as part of the campaign against British rule.

Harte Francis Bret. American writer. Born Aug 25, 1839, in Albany, he went to California about 1854, where he gained experience but little else, as a minor and a schoolmaster. He then settled in San Francisco, where he worked as a compositor and then as a journalist on *The Golden Era*. From 1864 to he was secretary to the California mint, and from 1868 to he edited *The Overland Monthly*. He then lived in New York writing and lecturing until 1878 when he was appointed commercial agent at Crefeld in Germany. From 1880 to 85 he was American consul at Glasgow, and the rest of his days were passed in England. He died at Camberley, May 5, 1902.

Bret Harte won great fame by his humorous poems and prose, much of which appeared first in periodicals. Mention may be made of his *Condensed Novels*, *The Luck of Roaring Camp*, *The Outcasts of Poker Flat* and *Plain Language from Truthful James*, but there are many others. His verses are inimitable.

Hartebeest Genus of antelopes native to Africa. One of the swiftest of the antelopes, it is about 4 ft. high and reddish brown in colour. It is disappearing rapidly from South Africa. Of several species, the handsomest is Hunter's, found in Somaliland.

Hartford City and port of the United States. It is in Connecticut, being the capital of that state and is 125 m. from Boston. It stands on the Connecticut River and is served by several railway lines. There is a harbour and a good deal of shipping. Other industries are the making of motor-cars, typewriters and other kinds of machinery. It is also an insurance centre. Pop (1931) 164,072.

Hartington Marquess of Tittleborne, the eldest son of the Duke of Devonshire. Its most famous bearer was the statesman who became the 8th duke. Hartington is a village in Dovedale.

Hartland Village of Devonshire. In the north of the county, it is 4 m. from Clevedon. Four miles farther is Hartland Point, a cape on which a lighthouse stands.

Hartlebury Village of Worcestershire. It is 6 m. from Bowdley on the G W Ry. It is chiefly famous for its castle, the residence of the Bishops of Worcester since the 13th century. The present building dates from the 18th century.

Hartlepool Borough and seaport of Durham. It stands on the coast 18 m. from Durham and 247 from London on the L N E Ry. The principal industries are shipping, shipbuilding and fishing. There is a good harbour. The Sandwell Gate is a relic of the city's past. With West Hartlepool it was bombarded by the Germans Dec 16, 1914. A good deal of damage was done to property and 113 persons were killed, a further 300 being wounded. Pop (1931) 20,545.

Hartlepool West County borough and market town of Durham. It is 245 m. from London and 2 m. to the south of Hartlepool being served by the

L N E Ry. The industries are shipping and shipbuilding, much coal being exported from here and timber imported. There are also engineering works and flour mills. The extensive docks cover some 400 acres. The town, which is quite modern, includes the watering place of Seaton Carew, to the south and Stanton with an old church. Pop 68,134.

Hartshorn Old name for liquid ammonia and carbonate of ammonia. These were prepared originally by the destructive distillation of the horns and hoofs of deer and other animals, the impure ammonia solution being known as spirit of hartshorn and the carbonate as salt of hartshorn. See AMMONIA.

Harty Sir Herbert Hamilton. British conductor and composer. Born at Hillsborough Co Down, Dec 4, 1879, he studied music in London and elsewhere. He made a reputation with his piece, *An Irish Symphony*, which was followed by others. In 1920 he was appointed conductor of the Hallé Orchestra in Manchester, and in 1925 he was knighted. In 1931 he was prominent as a critic of the B B C programmes.

Harvard John. Founder of Harvard University. The son of a butcher, he was born in Southwark in 1607. He went from school at Southwark to Emmanuel College Cambridge. In 1637 he went to America and was chosen minister of a church at Charlestown, now part of Boston, but in the next year Sept. 14, 1638, he died. He left some property to a college which was named after him and developed into Harvard University. Memorials to Harvard in England are a chapel in the cathedral at Southwark and Harvard House at Stratford on Avon, which was built by his maternal grandfather.

Harvard University One of the chief universities of the United States. It is at Cambridge, now part of Boston. Some Cambridge graduates founded a college there, and in 1637 the first building was opened. Its first president was Nathaniel Eaton, and it was strongly sectarian, but all religious tests have now been abolished. It is governed by a board of overseers and a corporation, its head being the president.

To-day the university has a fine range of buildings in and near Boston and its activities cover every branch of learning. To the original Harvard College a medical school and a law school were added in 1782 and 1817 respectively. Schools of engineering and other branches of applied science were established later. In 1909 a school of business administration was opened. The university has an observatory in the Andes, a school of forestry and a school of agriculture. It has libraries and museums, halls of residence and many other buildings. In 1930 a sum of £600,000 was given to the university to build a college on the lines of those at Oxford and Cambridge. It is famous for its sporting activities. Its students, which include women number (1932) 8,536.

Harvest Mite Familiar name for six-legged larval forms of a family of velvet ticks, not insects, also called the harvest bug. In Britain the common crimson haired *microtrombidium autumnale*, infests grass and herbage and burrows into the skin of man and other animals. It may be destroyed by ammonia. The adults feed on insects.

Harvey Sir George. Scottish painter. Born at St Ninians in 1806, he

studied painting in Edinburgh and soon made a reputation. He was one of the original associates of the Royal Scottish Academy and in 1864 was made its president. His chief pictures deal with historical incidents such as "Covenanters Preaching" and "Bunyan in Bedford Gao!" He was knighted in 1867, and died, Jan. 22, 1876.

Harvey William English physician. He was born at Folkestone, April 1, 1878, and was educated at King's School, Canterbury. He studied medicine at Cambridge and Padua and settled down in London about 1903. He became physician to St. Bartholomew's Hospital, lecturer at the College of Physicians, and medical attendant to James I. and then to Charles I. He was in attendance on Charles at Oxford during the Civil War and was made warden of Merton College. He died in London, June 3, 1957.

Harvey is famous for discovering the circulation of the blood, which he explained in his lectures at the College of Physicians and afterwards in a book, published in 1628.

To commemorate Harvey's work the Harvelian Society was founded in 1931. In 1931 the centenary of its existence was celebrated.

Harwich Seaport and borough of Essex. It stands on the estuary formed by the Orwell and the Stour, 70 m. from London. There is a large harbour and from Parkestone Quay the L.N.E. Rly. runs a regular service of boats to Amsterdam, the Hook of Holland, Hamburg and elsewhere. It is also the terminus of the ferry service to Zeebrugge. Fishing is an industry and there are one or two manufactures. The borough includes Dovercourt and is a famous yachting centre. During the Great War Harwich was an important station for the navy. An old seaport, the town sent members to Parliament from 1604 to 1867. Pop (1931) 12,700.

Harwood Great. Urban district and market town of Lancashire. It is 5 m. from Blackburn, on the L.M.S. Rly. The principal industries are cotton manufacturing and coal mining. It is called Great Harwood to distinguish it from Little Harwood, a village 2 m. from Blackburn. Pop (1931) 12,787.

Harz Mountains Range of mountains in Germany. In the north-west of the country, they are chiefly in Brunswick, between the rivers Saale and Leine. They extend for about 60 m. from east to west and are about 20 m. broad. The average height of the range is about 2000 ft. and the highest, the Brocken, is 3750 ft. The Harz are famed as a pleasure resort and for their mineral wealth. Therein are Harzburg and other centres for tourists and pleasure-seekers. The scenery is very fine, and legends gather round almost every hill and valley. The minerals found include silver, lead and copper, the mining centres are Clausthal and Mansfeld.

Hasdrubal Carthaginian soldier. A son of Hamilcar Barca and a brother of Hannibal he lived in the 3rd century B.C. He went to Spain with Hannibal and in 218 was left in command there whilst his brother marched into Italy. For ten years he fought the Romans, and in 207 led his army into Italy. He was met and defeated by the Romans at the Battle of the Metaurus, where he was killed.

Another, Hasdrubal, became, in 228 B.C., commander of the Carthaginian Army in

Spain. There he made a treaty with the Romans, dividing the country between them. In 221 he was murdered.

Hashish Preparation of the hemp plant, especially the Indian variety, *cannabis indica*. It possesses narcotic and intoxicating principles. The dried leaves and small stalks are smoked, made into a confection, or infused for drinking. The most favoured forms come from the flowering and fruiting heads. The word assassin means really 'hashish eaters'.

Haslar District of Gosport. Here is a naval hospital, the largest in the country. Opened in 1753 it has since been enlarged. It accommodates over 2000 patients and the grounds cover 60 acres. On Haslar Point, at the entrance to Portsmouth Harbour, the Navy has a submarine depot.

Haslemere Borough and market town of Surrey. It is 43 m. from London, on the S. Rly. Near by are Hindhead and other beauty spots also Aldworth, once the residence of Lord Tennyson. Pop (1931) 4340.

Haslingden Borough and market town of Lancashire. It is 205 m. from London, by the L.M.S. Rly., and 19 m. from Manchester. There are collieries and quarries, and also textile manufactures. Pop (1931) 16,637.

Hastings County borough and watering place of Sussex. It is 62 m. from London, on the S. Rly. A fine promenade runs for 3 m. along the sea front to S. Leonards, which is within the borough. Apart from catering for visitors, fishing is the chief industry, there being a distinct fishing quarter and a fish market. An old town, Hastings is one of the Cinque Ports and was long a flourishing seaport. Pop (1931) 65,199.

Hastings Town of N. Island, New Zealand. It is 12 m. from Napier. The town, the business centre of a district where sheep are reared, has a refrigerating works and other industries. It was seriously damaged by the great earthquake of 1931. Pop (1932) 16,750.

Hastings Battle of. Battle fought between the Norman invaders of England and the Anglo-Saxons, on Oct. 14, 1066, and regarded as one of the decisive battles of the world. William, Duke of Normandy, who claimed the English crown on the death of Edward the Confessor, landed at Pevensey and marched inland. Having just defeated the Norwegians at Stamford Bridge Harold hurried south to meet him, collecting reinforcements on the way. He took up a position on a hill, about 6 m. from Hastings, and there the Normans found him. The battle was stubbornly contested, but after a time William tried a ruse. Some of his men pretended to fly. Many of the Saxons followed, thus breaking their ranks, but the *huscarles* stood firm around their king. Shooting in the air, the Norman archers killed a number of them, including Harold and his two brothers. The Saxon Army was destroyed, and William was free to march to London. This battle, which is sometimes called Senlac, is depicted on the Bayeux Tapestry.

Hastings Marquess of English title, now extinct. It was given in 1817 to Francis Rawdon-Hastings, Earl of Moira, a soldier. He married the Countess of Loudoun, and their son and grandsons inherited both titles. When Henry, the 4th

marquess, notorious as a spendthrift and a sportsman, died without sons (Nov., 1868), the title of Marquess of Hastings became extinct. The earldom of Londond, however, passed to his sister, who also inherited the estates. The seat of the Marquess was Denington Hall near Dorby.

The English Barony of Hastings is held by the family of Astley. It dates from 1925, but was in abeyance from 1391 to 1841. In that year it was given to Sir Jack Astley, a descendant of John Hastings, the 1st baron, who was a claimant to the Scottish throne.

Hastings Sir Patrick English lawyer. Born in 1880, he was educated at Charterhouse School and became a mining engineer. Soon he turned to the law, became a barrister and in a few years had a large practice. In 1919 he was made a K.C., and in 1922 he entered the House of Commons as Labour M.P. for the Wallaseid division. In the Labour Ministry of 1923 he was Attorney General but in 1926 he resigned and left political life. Sir Patrick has written two plays.

Hastings Warren English admiral. Born at Churhill, Oxfordshire, Dec. 6, 1732, he was a son of Rev. P. Hastings and was educated in London, finishing at Westminster School. In 1750 he went to India as a writer under the East India Co., and he was one of the little army that marched to Calcutta with Clive. He was made President at Murshidabad in 1758 and from 1761-64 was a member of the Council of Bengal. His imperious nature made him difficult to work with, and in 1764 he returned to England. In 1768 he was again in India as a member of the Council of Madras.

In 1772 Hastings was made President of the Council for Bengal, and in 1773 the first Governor General of India, a post which he held for 12 years. In spite of the opposition of Sir Philip Francis and other members of the Council, Hastings did a great work and the British authority in India is due in no small measure to his pioneer efforts. He was, however, unscrupulous in his methods of raising money, and in other ways acted in an arbitrary and perhaps unjust manner. The result was that, when in 1784 he resigned and returned to England, there was a loud and insistent demand for his impeachment.

The trial of Hastings before the House of Lords, in Westminster Hall, aroused great interest at the time, and has not ceased to be a subject of controversy. It began in Feb., 1788. Arrayed against him was the united eloquence of Burke, Fox and Sheridan and for seven years the proceedings continued. The chief charges were his share in the murder of Nuncumar, the robbery of the beggars of Oudh and the hiring out of British troops to make war on the Rohillas. The House of Lords acquitted him in April, 1795. The trial cost Hastings his fortune, but the East India Co. came to his rescue and he was able to buy Daylesford in Worcestershire, the old seat of the family. There he lived quietly until his death on Aug. 22, 1818.

Haswall Market town of Durham. It is 2.2 m. from London on the L.N.E. Ry. The chief industry is coal mining. Pop. 5860.

Hatcham District of London. About 4 m. to the S.E. of the city on the S. Ry., it is in the boroughs of Deptford, Lewisham and Camberwell.

Hatchment Panel displaying over his dwelling place a deceased person's armorial bearings. For unmarried or widowed persons the panels are painted black, should a husband or wife survive, the survivor's half of the achievement is painted white. The hatchment is shaped like a lozenge. The custom was for the hatchment, after the funeral, to be placed in the church and there are still many of them in country churches.

Hatfield Town of Hertfordshire, in full Bishop's Hatfield. It is on the Lea, 17½ m. from London on the L.N.E. Ry. Apart from Hatfield House (qv) there are the ruins of a palace, once the residence of the bishops of Ely. Before coming to the throne, Queen Elizabeth lived here. Pop. 5700.

Hatfield Village of Yorkshire (W.R.). It stands on the Don, 7 m. from Doncaster. The opening of coal mines has altered the nature of the village which is now a populous colliery centre. The district round Hatfield, called Hatfield Chase, was once a forest used by the kings for hunting. It lay between the rivers Don, Idle and Thorne. Much of it was a swamp and in 1626 it was drained by Dutch engineers.

Hatfield House Residence of the Marquess of Salisbury. It was built early in the 17th century by Robert Cecil, who had just acquired the estate, and is one of the finest Jacobean houses in England. The hall, the long gallery, the library and the chapel are fine apartments. The house has a valuable collection of portraits and other works of art, as well as of state papers. The park in which it stands is 10 mi. in circumference.

Hatfield Peverel Town of Essex. It is 6 m. from Chelmsford on the L.N.E. Ry. Pop. 1300.

Hathaway Anne Wife of William Shakespeare. The daughter of Richard Hathaway, a farmer at Shottery, Warwickshire, she was born in 1556. On Nov. 28, 1582 she married the poet whom she survived, dying in 1623. She had four children but only two, both daughters, attained maturity. Ann Hathaway's cottage at Shottery is public property, and the adjacent farm has been purchased and renamed Hathaway Farm.

Hathersage Village of Derbyshire. It is 34 m. from Manchester and 161 m. from London, on the L.M.S. Ry. Around the village is some of the finest of the Derbyshire scenery. Little John is said to have been buried in the churchyard. Pins and needles are made here. Pop. 1600.

Hathor Egyptian goddess. Originally a sky deity, she was often depicted as a cow, or with a cow-headed human face. A life-size statue of a cow in sandstone was shipped at Hathor in the 15th century B.C. was unearthed at Thebes in 1906. The Hathor Temple at Dendera still stands. The seven Hathors were kindly fates.

Hatry Clarence Charles English financier. Born in 1890, he went into business in London and became a successful company promoter. He founded the Commercial Bank of London and, until his fall in 1920, controlled a number of associated undertakings. In 1929, with his associates, he raised money by pledging securities with

the banks. It was soon discovered that some of the stock was forged, and the shares of his companies fell heavily. On Sept 19 he made a full confession and steps were taken to deal with the situation. In Jan, 1930, he and his associates were tried and found guilty. All were sentenced to penal servitude, his sentence being for 14 years. The amount of money involved in this failure was over £13,000,000, but the net loss was a much smaller sum.

Hatteras Island and cape of the United States. It is in N Carolina. Heavy seas render the cape dangerous to navigation.

Hatton Sir Christopher. English courtier. Born at Holdenby, Northamptonshire, in 1540, he became a lawyer. He is chiefly known as one of Elizabeth's favorites, her admiration being due, presumably, to his fine figure and gallant bearing. She employed him on public business, secured for him a seat in Parliament, and in 1587 made him Lord Chancellor. He died Nov 20, 1591.

Hatton Garden, a London thoroughfare between Holborn Circus and Clerkenwell Road, perpetuates his name, as his residence was therein.

Hauberk Piece of armour. The word was applied originally to chain mail protecting the neck. From about the 12th century onwards it was used for a tunic or coat of chain mail. A garment worn as panoply in the time of Chaucer was also known as a hauberk.

Hauptmann Gerhart. German author. Nov 15, 1862, his father being the keeper of the village inn. He was educated at Breslau, studied art in Italy and travelled. In 1889 he published his first notable work, a play, *For Sonnenaufgang* (Before Sunset), a realistic piece which had great influence in Germany and made him known abroad. A number of other dramas, comedies and tragedies, the latter including *The Weavers*, followed. He also wrote novels, including *The Island of the Great Mother*, 1924, which, like others of his works has been translated into English, and a poem *Imma*. In 1912 he received a Nobel prize for literature.

Hausa Negroid people mostly living in the Sudan and Nigeria, where they form a number of native states. Their language, spoken by about 15,000,000 people, is Hamitic and is the lingua franca of the Sudan. The Hausa, who are mainly Mohammedans, are physically a fine race.

Hautboy English way of spelling *hautbois*, a wooden high-toned musical instrument. In Handel's time it was written *hoboy* and is now *oboe*.

Havana City and capital of Cuba. It stands on the N coast on a bay which forms a fine natural harbour. There is an old town with narrow streets and a new town with fine thoroughfares and squares. It has a broadcasting station (49.5 M).

Havana is famous for its manufacture of tobacco and cigars, whilst sugar is another staple industry. There is much shipping, for which there are modern docks. Railways connect the city with the other towns of the island. Havana was founded in 1514 and still bears traces of its Spanish origin. Pop (1930) 589,079.

Havant Urban district and market town of Hampshire. It is 7 m from

Portsmouth and 67 from London on the S Rly. It stands on Langstone Harbour and was at one time a prosperous port. The industries are tanning, brewing and malting. Pop (1931) 4264.

Havel River of Germany. It rises in the state of Mecklenburg-Strelitz and flows chiefly S to Spandau where the Sprée falls into it. Having passed Potsdam it flows mainly W until it falls into the Elbe near Wittenberge. Its length is 220 m, and most of it is navigable, whilst canals connect it with other German rivers.

Havelock Sir Henry. English soldier. He was born in Sunderland April 5, 1795, and was educated at Charterhouse. In 1823 he went to India, and saw a good deal of active service against the Afghans and the Sikhs, rising to command a division in the Persian War of 1856 and to be Adjutant-General. When the Indian Mutiny began he led a force from Allahabad to Cawnpore, which he entered. He then advanced towards Lucknow, but after fighting eight battles was forced to fall back until reinforcements arrived. With these he made his way into Lucknow, but was besieged in the residency until relieved by Sir Colin Campbell. A week later, Nov 24, 1857, he died of dysentery. Havelock was made a knight and a baronetcy was conferred on his son, Sir Henry Havelock-Allan who won the V.C., and was for a time an M.P. He was killed by the Afghans in 1897.

Haverfordwest Borough, market town and river port of Pembrokeshire, also the county town. It stands on the West Cloddan River, 8 m from Milford Haven on the G.W. Rly. The old town is on one side of the river and the suburbs of Prendergast and Cartliot on the other, two bridges connecting them. A trade in agricultural produce is carried on. In the days when ships were small it was a prosperous port. Pop (1931) 6113.

Havergal Frances Ridley. English hymn writer. Born at Astley, Worcestershire, Dec 14, 1836, the daughter of a clergyman, she wrote an enormous quantity of verse of a religious character, including many hymns. She died June 3, 1879.

Haverhill Urban district and market town of Suffolk. It is 18 m from Cambridge and 55 from London, being served by the L.N.E. Rly. The chief industries are the making of clothing and hoots. There is an agricultural trade. Pop (1931) 3827.

Another Haverhill is a city of Massachusetts. It is on the Merrimack River, 32 m from Boston, and is a manufacturing centre. Pop 48,710.

Havre Seaport and important railway terminus of France, also called Le Havre. It is on the estuary of the Seine, 55 m from Rouen and 143 from Paris.

There is a regular steamer service with Southampton, and from here there is a large export trade to America and Britain. During the Great War it was a base for the British forces, and immense numbers of men and quantities of stores passed through it. Other industries are shipbuilding, the manufacture of machinery, oil refineries and engineering works. Havre was made a seaport in the 16th century. From 1914-18 it was the seat of the Belgian Government. Pop (1931) 165,078.

Hawaii Island of the Pacific Ocean, also called Owyhee. It belongs to the United States and lies 2000 m to the S.W. of San Francisco. Its area is 4016 sq. m.

Hilo is the capital. Sugar, coffee and other tropical products are grown and exported. On the island are Mauna Loa and Mauna Kea, two of the greatest volcanoes in the world, which form part of its greatest mass of volcanic material. They are nearly 14 000 ft high.

The group of islands of which Hawaii is the largest, are known as the Hawaiian or Sandwich Islands. The others are Maui, Oahu, Molokai, Kauai, Lanai, Nihaui and Kahoolawe. There are many smaller ones all uninhabited. Honolulu on Oahu is the capital of the group. Apart from Hawaii itself, they cover 2440 sq m. There is a naval station at Pearl Harbor and there are railways on the larger islands. Pop. (1930) 368,300.

The islands were discovered by Captain Cook in 1778 and were for many years independent. In 1893 the queen died and a republic came into being but this only lasted until 1898 as in that year the United States annexed the islands. The English called them the Sandwich Islands and by this name they were long known.

Hawarden Village of Flintshire. It is 0 m from Chester on the L.N.E. Rly. It has become a coal mining centre but its chief interest is the castle long the residence of W. E. Gladstone. This was built in the 18th century upon the site of an older building of which the ruins remain in the park. It was the seat of the Stanleys and then of the Glynnes, from whom it passed to the Gladstones. It still remains in the family. In Broadlands House is the Gladstone Museum. Pop. 6500.

Hawes Market town of Yorkshire (N.R.). It is 16 m from Leyburn, on the L.N.E. Rly. It is chiefly a market for agricultural produce and is also a good centre for tourists. Pop. 1500.

Hawes Junction An important junction on the L.M.S. system, is 0 m from the town. A terrible accident took place here on Christmas Eve, 1910.

Haweswater Lake of Westmorland. It is 14 m from Pon-
rith and 9 from Shap. In the E. of the Lake District. It is 2½ m long and is surrounded by somewhat desolate scenery.

Like Thirlmere the lake is used to supply Manchester with water and in 1930 it was decided to enlarge it for this purpose. The scheme includes raising the level of the lake by 90 ft and the destruction of a church, a vicarage, an inn and three farm houses at Wardale.

Hawfinch Stout-billed bird of the finch family (*Coccothraustes vulgaris*). It is distributed over Europe, Asia and N. Africa, and is common in England. It is 7 in long. The plumage of the male is deep brown on the back with blue-black wings and a white-tipped tail. The females lay four five or six black-spotted olive-green eggs.

Hawick Burgh and market town of Roxburghshire. It stands on the Tweed 51 m from Edinburgh on the L.N.E. Rly. The town is a centre of the wool industry and has a large cattle market. The common riding is a festival held here every year. A magnificent library institution was fitted to the town by Sir Thomas Henderson in 1913. Pop. (1931) 17,050.

Hawk Name denoting indefinitely all diurnal birds of prey not being vultures or eagles. Thus limited it comprises a sub-family including the harriers, represented in Britain by the goshawk and the

sparrow hawk besides the S. American caracara sub-family.

Hawkbait Genus of biennial or perennial herbs of the composite order (*Leontodon*). The yellow flower heads, all their florets being strap-shaped, appear on numerous simple or branched milk-julead stalks springing from the root stock. Unlike dandelions the pappus hairs are feathery. Two British species have leaves bearing forked hairs, one is smooth-leaved. The herb is found in Europe and parts of Asia.

Hawke Baron English title held by the family of Hawke. Edward Hawke a Londoner, was born in 1705 and entered the navy. In 1747 he commanded the fleet which defeated the French off Cape Finisterre. He was then knighted and elected M.P. for Bristol, but remained on active service. In 1756, when the Seven Years' War began, Hawke went to the Mediterranean, and in 1759 he won his greatest victory by crushing the French Fleet in Quiberon Bay. From 1760-71 he was First Lord of the Admiralty, and in 1770 was made a baron. He died Oct. 17, 1781.

Hawke's descendant Martin Bladen Hawke, the 7th baron, was born Aug. 16, 1800, and won fame as a cricketer. He played for Eton and Cambridge, and captained teams in Australia, 1891-92 and 1894-95, and in S. Africa, 1895-96, but he is best remembered as the captain of the Yorkshire team during its greatest days, 1883 to 1910.

The British cruiser Hawke was sunk by a German submarine, Oct. 16, 1914 off the E. coast of Scotland, over 500 officers and men being lost.

Hawkes Bay District of New Zealand. It covers some 4000 sq m in North Island, and is a region in which timber felling and sheep rearing are the chief industries. The chief ports are Napier, Gisborne and Hastings, all of which were severely damaged by an earthquake in 1931.

Hawkesbury River of New South Wales. It is 330 m long and falls into Broken Bay about 25 m from Sydney. It is formed by the Nepean and Grose rivers.

The English title of Baron Hawkesbury is borne by the Earl of Liverpool. In 1786 it was given to Charles Jenkinson, who was made earl in 1796. His son Robert Banks Jenkinson, the 2nd earl, was known as Lord Hawkesbury until he succeeded to the earldom in 1808. He was Foreign Secretary in 1801-02.

Hawkhurst Town of Kent. It is 47 m from London on the S. Rly. At one time Hawkhurst was a market town and a centre of the cloth manufacture. Pop. 3340.

Hawking Sport of hunting game with hawks or falcons, also called falconry. It is a very old pastime having been known in China and Greece before the Christian era. It is or has been practised in many of the countries of the world, Asiatic as well as European. In England falconry was practised by the Anglo-Saxons and for some seven centuries it was perhaps the chief sport of the richer classes.

Great care was taken in choosing and training the hawks and kites and nobles had for this purpose staffs of falconers. The birds used in hawking were the peregrine falcon, goshawk, merlin and others belonging to the long-winged class and the sparrow hawk.

goshawk and others of the short-winged class. The female bird, being much the larger, was usually taken, although the male bird, called the tiercel, was sometimes used.

When fully trained and ready for the field, the hawk's eyes were covered with a hood, and was carried on the wrist of the falconer, being attached thereto with straps called jesses. She was also provided with bells so that, having been flown, her whereabouts could be located. The falconer also carried a lure and a cadge, the former for the bird's food and the latter to carry her on. He wore a leather glove to protect the wrist. When the game was sighted the hawk was unhooded and topped by the falconer, who was on horseback and who was often accompanied by dogs to retrieve the fallen bird or animal. In the 20th century there was a revival of the sport, and a British Falconers' Club was founded.

Hawkins Sir John English seaman. Born at Plymouth in 1532, he was the son of a sailor and went to sea when a boy. In 1562 he obtained command of a ship, which was profitably engaged in carrying slaves from Africa to S America. In 1567 he led a small fleet on the same errand, Drake being one of his officers. He got a great deal of plunder but he lost this in a fight with the Spaniards and narrowly escaped with his life. He was later chosen MP for Plymouth in 1572, and served as comptroller of the navy whilst carrying on a shipbuilding business at Deptford. He fought his own ship the *Victory*, against the Spaniards in 1588, and was knighted. Then he took to the sea again, joining in plundering expeditions, and he was with Drake when he died off Porto Rico, Nov 12, 1595.

Hawkins had an only son, Richard. He, too, was a sailor, making voyages under Drake and fighting a ship against the Armada. In 1594, when plundering Spanish possessions in S America, he was beaten in a sea fight and taken prisoner. He was a captive until 1602, being knighted and elected MP soon after his release. He died April 17, 1622.

Hawkshead Village of Lancashire. It is situated in the Lake District, being about a mile from Bowness, and is chiefly interesting because Wordsworth was educated at the grammar school. This was closed in 1910.

Hawkstone Village of Shropshire. It is 4 m from Wem and is famed for its hall, long the seat of the Hill family. It dates from the early 18th century and stands in a fine park. The hills near are called the Hawkstone Hills.

Hawkweed Large genus of milk-juiced perennial herbs of the composite order (*Asteraceae*). They are native to N temperate and Arctic regions. The yellow or orange flower heads, sometimes brown striped, with all the florets strap shaped, are solitary or clustered, the pappus hairs are rough and brown. Among many British species is the mouse ear, *H pilosella*.

Hawkwood Sir John English soldier. Born about 1330, he became a soldier, and for his services at Crécy and Poitiers Edward III made him a knight. Soon after 1360 he went to Italy, where he gathered together a body of mercenaries called the White Company. Their services were hired out to rulers who wanted help, and at their head Hawkwood won renown as one of the most famous fighters of the day. He died in Florence in 1394.

Haworth Urban district of Yorkshire (W.R.). It is about 4 m. from Keighley on the L.M.S. Rly. The village is chiefly famed for its association with the Brontës. Patrick Brontë was curate here, 1820-61, and here his daughters lived, wrote, and, save one, are buried. The parsonage is now a Brontë Museum. Pop (1931), 5912.

Hawthorn Small tree found in Great Britain and other parts of the temperate regions. It bears white or red flowers which grow in large clusters and are very fragrant when they bloom in the spring. Hawthorn, also called the may and the white-thorn, bears berries called haws. It belongs to the natural order *rosaceae*.

Hawthornden Village of Midlothian. It is 8 m from Edinburgh on the L.N.E. Rly. The glen through which the Esk flows is a noted beauty spot, and the place is also famous as the home of William Drummond, the poet.

HAWTHORNDEN PRIZE In Drummond's memory the Hawthornden Prize was founded by Miss Alice Warrender. This is a sum of £100 given each year to the author of an imaginative work. The author selected must be under 41 years of age. It has been won by Siegfried Sassoon with *Memoirs of a Fox Hunting Man*, and Lord David Cecil with *The Stricken Deer*.

Hawthorne Nathaniel American writer. Born July 4, 1804, at Salem, Massachusetts, the son of a sailor, he went to Bowdoin College, Maine, but took up no regular profession. He wrote a good deal, but this was not very profitable, and in 1839 he was given a post in the custom house at Boston. In 1841 he left this to join the Brook Farm community, a Socialist experiment, but was forced to accept employment again, this time as a surveyor at Salem. He was there until 1850, and in 1852 he settled at Concord. From 1853-57 he was consul at Liverpool, after which he travelled in Europe before returning to Concord. He died at Plymouth, New Hampshire, May 18, 1864.

One of the greatest of American writers and certainly one of the most charming, Hawthorne writes delightfully of the New England he knew and of its Puritan people. His most notable book is *The Scarlet Letter*. Hardly less powerful in plot and attractive in style is *The House of the Seven Gables*. *Twice Told Tales* are short stories, as are the charming *Mosses from an Old Manse*. His other writings include *Fanshawe*, his first novel, some volumes of historical stories for children *The Wonder Book*, *The Snow Image*, *The Blithedale Romance* and *Tanglewood Tales*. His descriptions of England are in *Our Old Home*. His son, Julius Hawthorne, wrote a number of novels.

Hawtreys Sir Charles Henry English actor manager. Born Sept 21, 1858, he was a son of Rev John Hawtreys, a master at Eton and a grandson of Rev. Edward Craven Hawtreys, who was headmaster of that school, 1834-52. He went to Rugby and Oxford and became an actor, first appearing on the London stage in 1881. In 1883 he adopted a German play and calling it *The Private Secretary* produced it in London. A conspicuous success, it made Hawtreys's reputation, and for the next 30 years he was one of the most popular comedians on the stage, numerous successes standing to his credit. As a manager he controlled Her Majesty's

Theatre, and then *The Comedy*. He was knighted in 1922 and died July 30, 1923.

Haxey Village of Lincolnshire. It is in the Isle of Axholme, 7 m from Gainsborough and has a station on the L N E Rly. It is famed for the game called Haxey Hood that has been played there for over 600 years. It is a kind of football and in it hundreds of players take part. On the afternoon of Jan 6 the game begins with a procession of players to the base of an old village cross. The lord of the hood wears a red coat and a hat wreathed with flowers and carries a wand made of 13 willows tied 13 times with willow bands. He has a retinue of 12 men, called hoggans, and a fool dressed in motley, carrying a rod with bladder attached. The fool makes a speech standing upon the base of the cross and invites every one to take part in the ancient game. The lord then leads the way to a field on the top of the hill near where the game is played. It originated in a struggle for the possession of a hood lost by Lady Mowbray.

Hay Grass, clover and other herbage mown and dried for use as fodder. It is derived from rotation crops or permanent meadow and pasture. Sun-drying reduces the moisture from three-fourths in the green plants to one-fifth in the dry. Hay making, once done solely by manual labour, is now done by mowing machines, self-acting horse rakes and hay elevators. The British hay harvest for 1930 was 14,420,000 tons. A ton or load of hay comprises 36 trusses, each weighing 50 lb for old, or 60 lb for new hay.

Hay Town of Brecknockshire. It is on the Wyo, 21 m from Hereford on the G W Rly. It is a good centre for the Black Mountains. There are remains of a castle. Pop 1600.

Hay is the name of a town of New South Wales. In the Riverina district, it stands on the Murrumbidgee 460 m from Sydney. Pop 2500.

A river of Canada is called the Hay. It rises on the borders of Alberta and British Columbia and flows for 350 m. to the Great Slave Lake.

Hay Ian. Pen name of the British novelist. Ian Hay Belth. Born April 17, 1876, he was educated at Fettes College and St John's College, Cambridge. He became a schoolmaster and was for a time at Fettes. In 1907 he published *Pip* for a novel. This was a success and others followed including *A Man's Man*, *A Safety Match* and *A Knight on Wheels*. In 1914 he joined the Argyll and Sutherland Highlanders, and wrote *The First Hundred Thousand* one of the best books written on life in the training camps and at the front. It was followed by others. After the war Hay wrote other novels, but he made a greater success with his plays especially *Tilly of Bloomsbury* and *The Sport of Kings*. With P. G. Wodehouse he wrote *Ba Ba Black Sheep* and *The Damsel in Distress*, and with Stephen King Hall *The Midshipmaid*.

Hay John. American writer and politician. He entered the office of Abraham Lincoln and became a lawyer. In 1861 he was made private secretary to Lincoln. After Lincoln's murder in 1865 he was in the diplomatic service until 1870. He was then occupied as a journalist and a civil servant. In 1897 he was sent to London as ambassador, but in 1898 he returned to Washington to become Secretary of State and served under McKinley and Roosevelt until his death July 1, 1905.

Hay was prominently associated with the

foreign policy of his country, his work including the treaty with Great Britain about the Panama Canal called the Hay Pauncetote Treaty and the settlement of the boundary of Alaska. He wrote with J. G. Nicolai a long biography of Lincoln, and the popular and humorous *Pike County Ballads*.

Haydock Urban district of Lancashire. It is 227½ m from London by the L N E Rly and about 14 m from Liverpool. Here is Haydock Park race course. There are iron works and collieries. Pop (1931) 10,352.

Haydn Franz Josef. Austrian composer. He was born at Rohran, Lower Austria, March 31, 1732, and when a boy became a chorister in St Stephen's Cathedral, Vienna. Expelled for a prank in 1748, he studied music and supported himself until Motataslo introduced him to wealthy patrons. As chapel master to the Esterhazy family he became famous between 1762 and 1790 as a composer of quartets, symphonies, etc. In 1791 and 1794 he visited England, in 1797 he composed *The Emperor's Hymn*, and in 1798 and 1801 *The Creation and The Seasons*. He died in Vienna, March 27, 1809. 104 symphonies and numberless other works testify to Haydn's genius.

Haydon Benjamin Robert. English painter. Born at Plymouth, Jan 26, 1780, he was educated at Plymouth and then studied art in London. His paintings soon gained recognition, and he still has a place as an historical painter. Among them are "Dontatus," "Christ's Entry into Jerusalem," "The Banishment of Aristides," "Wellington at Waterloo," "The Judgment of Solomon," "Napoleon at St Helena" and "The Raising of Lazarus." Often in debt and other difficulties, he committed suicide, June 22, 1846.

Haydon's lectures on painting which were very popular, have been published. He also wrote an *Autobiography*. His *Correspondence* and *Table Talk* were also published.

Hayes Urban district of Middlesex. It is 13 m from London, and the Grand Union Canal passes through it. Of late Hayes has become an industrial centre, and here are works for making printing machines, gramophones, etc. Pop (1931) 23,646.

Hayes Village of Kent. It is 15 m from London, on the S Rly. Hayes Common is a fine open space covering over 200 acres. At Hayes Place the Earl of Chatham lived and died, and his son, William Pitt, was born. In 1930 the house was pulled down.

Hay Fever Complaint affecting the mucous membrane of the eyes, ears and throat. It takes the form of a violent cold and it may be associated with asthma. It is due to the irritation caused by inhaling the pollen or dust of plants and grasses in sensitive persons. Timothy grass being one of the worst, and attacks persons liable to it mainly during the hay making season. They should, therefore, avoid fields of hay. Sneezing, headache and a general feeling of lassitude are symptoms of the complaint which rarely attacks old people. To cure it an anti-toxin has been prepared.

Hayle Urban district and seaport of Cornwall. It is 7 m from Penzance on the G W Rly. It has a harbour and fishing is the chief industry. Pop (1931) 915.

Hayle is the name of a river 10 m long that flows into St Ives Bay.

Hayling Island of Hampshire It is situated between the harbours of Langstone and Chichester and covers about 10 sq. m., being about 4 m. long The island is a popular seaside resort, and on it are golf links Havant is the nearest town

Haymarket London thoroughfare It extends from Piccadilly to Pall Mall, and is so-called because a hay market was held here until 1830 In it is the Haymarket Theatre, built in 1821 as a successor to one dating from 1720 Here was erected in 1705 the Queen's Opera House, which gave way to the King's Theatre, named Her Majesty's from 1837 to 1901, when it took its present name, His Majesty's

Hayter Sir George English artist Born in London, Dec. 17, 1792, he studied at the R.A. schools there, and in Rome, later making a reputation by his portraits and miniatures. In 1841 he was appointed painter to Queen Victoria, and in 1842 was made a knight He died Jan. 18, 1871

Hayward Thomas English cricketer Born at Cambridge, March 29, 1871, he became a professional cricketer, and settling in London qualified to play for Surrey In 1893 he appeared first in the team, and of it he remained a prominent member until the Great War In 1906 he made 3518 runs in the season, and altogether he scored 104 centuries In 1898 he made 315 in a single innings, his highest score He represented England against Australia several times

Hayward's Heath Urban district and market town of Sussex It is 38 m. from London on the S. Ry. A large cattle market is held here Pop. (1931) 5382

Hazel Genus of shrubs or trees related to the birch family The common *Corylus avellana* yields a useful elastic wood Cultivated varieties furnish cobs, filberts and Barcelona nuts The tree is found in Europe and Asia, in England it may grow as high as 30 ft., but is usually much shorter A twig of the hazel is used by water diviners

Hazel Grove District of Cheshire It is 2 m. from Stockport on the L.M.S. Ry. With Bramhall it forms an urban district, and is a centre of the cotton industry Pop. (1931) 13,300

Hazlitt William English writer. The son of a Unitarian minister, he was born at Maidstone, April 10, 1778 He studied to become a minister, but forsook this career for that of an artist He lived in Paris and painted portraits, but soon, having become friendly with Coleridge, turned to writing settling in London in 1812 There he worked for *The Morning Chronicle* and other papers, including *The Edinburgh Review* and *The London Magazine* He died in Frith Street, London, Sept. 18, 1830

Hazlitt ranks as one of the great English essayists, and as a critic he is also in the first flight. Notable among his books are *Characters of Shakespeare's Plays*, *Lectures on the English Poets*, *Dramatic Literature of the Age of Elizabeth*, and *The Spirit of the Age* He wrote a long life of Napoleon and many other works His essays are in his *Table Talks* and *The Plain Speakers*

Hazlitt had a son, William Hazlitt (1811-93), a public official who found time for a good deal of literary work He left a son, William Carew Hazlitt (1834-1913), who wrote on many subjects, but notably on Shakespeare and Lamb

Headache Pain in the cranial part of the head, more deeply seated than that of superficial scalp irritation Either temporary or persistent, it may result from organic injury, e.g., haemorrhage from abnormal blood states, e.g., anaemia or from Bright's Disease or constipation It may be due to coal gas or other poisoning, exhaustion, due to overwork, excess, or nervous breakdown, including hysterical headache, peripheral irritation, from eye strain or alimentary disturbance, including bilious headache, or congestion of the brain and its envelopes

Aspirin tablets, two if necessary, will generally relieve a headache (though some people are unable to tolerate them), and a rest in bed in a darkened room is also helpful Sometimes a cup of tea will be enough to relieve a headache caused by fatigue, and bathing the forehead and eyelids with eau-de-cologne is very refreshing

A Bilious Headache is relieved by resting in bed and sipping water with $\frac{1}{2}$ teaspoonful of bicarbonate of soda If attacks are frequent a doctor should be consulted for individual treatment It should also be remembered that a headache is often the first symptom of some definite disease

Head Hunting Custom among some primitive peoples of making incursions for procuring human heads as trophies, or individually to qualify for manhood or marriage It formerly involved ceremonial expeditions It was largely practised in Borneo and Formosa, where there were cases as recently as 1930, and parts of India and Africa, but it has been to a large extent suppressed

Headlam Arthur Cayley English prelate. Born at Whorlton, Durham, Aug. 2, 1862, the son of a clergyman, he was educated at Winchester and Oxford He was ordained and for some years remained in Oxford as a lecturer In 1896 he was made rector of Wolwyn, and in 1903 Principal of King's College, London, where he remained until 1918 when he was appointed Regius Professor of Divinity at Oxford In 1923 he was made Bishop of Gloucester, having been for 20 years (1901-21) editor of *The Church Quarterly Review*

Heage Urban district of Derbyshire It is 3 m. from Belper and is an industrial centre Pop. (1931), 4054

Health Soundness of body, in general a condition of bodily efficiency, the opposite of disease Since about the middle of the 19th century great attention has been paid in Great Britain to all matters affecting the public health and the result is already apparent in increased longevity and other ways Medical men and women are appointed to look after the health of children Sanitation is a matter of national concern and in other ways the state does a good deal under the direction of the Ministry of Health For the same aim, there are several health societies

The drinking of healths, derived from ancient ceremonies of pouring libations to the gods and drinking to the departed at solemn feasts, survives in the social custom of drinking toasts at banquets See TOAST

Health Insurance Scheme for insuring workers against sickness and disablement It was introduced in Great Britain in 1911 and since 1926 has been linked with a scheme

of old age pensions. Manual workers, with some exceptions, and those non manual workers whose remuneration is less than £250 a year, must be insured, provided they are between the ages of 16 and 65. The payments are made weekly by affixing stamps to a card. Each person is provided with an insurance card which should be carefully kept.

The whole of the contribution is payable in the first instance by the employer, and must be paid by stamping a card at or before the time of payment of wages for the week for which the contribution is due. The employer is then entitled to recover, by deduction from the wages, the employee's share of the contribution so paid. The employee's share is ordinarily 9d in the case of men, and 6d in the case of women, but in certain cases of low wage earners the employee's share is less. It is also less for those under 14 years of age. The employer's share is 9d for men and 7d for women, and he must pay for employees over 65.

The ordinary benefits to which insured persons are entitled in return for contributions in respect of health insurance are—medical, sickness, disablement and maternity benefits.

Medical benefit consists of the provision of medical attendance and treatment, including treatment and attendance for tuberculosis and the provision of proper and sufficient medicines and such medical and surgical appliances (and chemical reagents) as are named in the regulations made by the Minister of Health.

The ordinary rates of sickness benefit are 15s 6d a week for men and 12s 6d for women, but until a person has been insured for 104 weeks and 104 weekly contributions have been paid in respect of him, sickness benefit is payable at the reduced rates of 9s 6d for men and 7s 6d for women. The normal rate of disablement benefit is 7s 6d a week for men and 6s 6d for women. All these rates are subject to reduction when the member is in arrears.

Disablement benefit is a continuation of the periodical payments at a lower rate in respect of incapacity after the period of sickness benefit has been exhausted. The normal rate is 7s 6d a week.

Maternity benefit consists of the payment of a sum of 40s 6d on the confinement of the wife or, in the case of a posthumous child, of the widow of an insured man or of a woman whether married or unmarried who is herself insured. Some women therefore, are entitled to a double maternity benefit.

Most insured persons belong to an approved society as in this way they obtain the full advantages of the scheme. These societies are formed by trade unions and friendly societies and payments are made by them. In addition each insured person must have his or her name on the panel of a medical man who receives a certain yearly sum for each patient.

In 1931 no fewer than 19,000,000 persons were insured under the scheme in Great Britain and Northern Ireland. The approximate income of the fund was £33,000,000 and about £32,000,000 was paid out in benefits.

Germany has a somewhat similar system of social insurance. This was in existence before the British one which in some respects was modelled upon it. In 1930 France introduced a national insurance scheme of a somewhat similar character.

Health Ministry of Department of the British Government that existed from 1848 to 1853. It was concerned with the

care of the public health, duties which were taken over by the Home Office, then by the Local Government Board and finally by the Ministry of Health.

Health Ministry of Department of the British Government. It was created in 1919 to supersede the Local Government Board and also take over duties performed by other departments of state, such as national health insurance. It deals with all matters affecting local government including rating and the public health. Its head is the minister, who is a member of the Cabinet and is paid £5000 a year. He is assisted by a parliamentary secretary and a large staff, on which are a number of medical men. The offices are Whitehall, London S.W.

The Ministry is only concerned directly with England. For Wales there is a Board of Health with headquarters at Cardiff. Scotland has a department of health at 125 George St., Edinburgh, which is under the Secretary for Scotland.

Healy Timothy Michael Irish politician, Born in Bantry, May 17, 1855, he was educated by the Christian Brothers. In 1871 he went to England and in London he worked as a clerk and then as a journalist. In 1880 he was elected M.P. for Wexford, in 1883 for Monaghan, in 1885 for Londonderry, South, in 1887 for Longford, North, in 1892 for Louth, North, and in 1910 for Cork, North-East. A seat he retained until 1918. Healy threw himself keenly into political work and was soon one of the most prominent members of the Nationalist Party and one of the few real orators in the House of Commons. Strongly attached to the Roman Catholic Faith, he was one of the small group who actively opposed Parnell in 1890, and in 1900, when the party was united again, he was expelled from it for his opposition to the United Irish League.

In 1922 Healy was selected as the first Governor General of the Irish Free State, a post he held for five years. He died March 26, 1931. Both an Irish and English barrister, Healy wrote *Letters and Leaders of My Day*.

Heanor Market town and urban district of Derbyshire. It is 141 m. from London by the L.N.E. Ry., and 3½ m. from Ilkeston. Hosiery is manufactured, and there are collieries. Pop. (1931) 22,386.

Hearing One of the five senses. It is awakened by exciting the auditory nerves by sound vibrations conducted from outside by the pair of organs called the ears. Man perceives vibrations ranging from 30 to 50,000 a second. When irregular in duration or intensity, they constitute noise, when regular and periodic they become musical. See DEAFNESS.

Hearst William Randolph American journalist. Born in California in 1863, his father was a rich mine owner and a senator. In 1886 young Hearst took over *The San Francisco Examiner*, which he developed on the lines of the so-called yellow press everything sacrificed to sensation. In 1895 he obtained a paper in New York which he called *The New York American* and round these two he gathered others until he was the owner of a powerful group, all showing the same features and all, at times, bitterly hostile to Britain. He also secured weekly and monthly papers including several in London.

Heart Main organ of blood circulation in man and many other animals. The human heart is a hollow, muscular, somewhat

conical four-chambered force pump enclosed in a fibrous bag. It is situated in the chest between the lungs and weighs from 10 to 12 oz. in men and from 8 to 10 oz. in women. The right and left auricles contract, pumping into their respective ventricles venous blood from the body and aerated blood from the lungs, the right and left ventricles contract, pumping venous blood into the lungs and aerated blood into the main blood vessels. These rhythmic contractions, or systole, and dilatations, or diastole, followed by an equivalent pause, constitute the pulse or heart beat, normally 60 to 90 times a minute. The heart is popularly regarded as the seat of the affections.

DISEASES OF THE HEART The heart is subject to a number of diseases, one of the worst being angina pectoris, which is very painful. Those affected are liable to sudden death, and should avoid extra exertion of any kind. There is a hospital for diseases of the heart in Marylebone, London.

Heartburn Burning sensation referred to the region of the heart and in the throat, caused by too much acid in the stomach, a similar condition to that known as acidity.

Treatment—A teaspoonful of bicarbonate of soda in water will give immediate relief, and essence of peppermint is also good. The cause of heartburn is often too much sugar and unsuitable starch (such as new bread). Some people find that fresh fruit or strong tea sets up this condition, the diet should therefore be studied with a view to the elimination of unsuitable foods.

Heartsease Popular and poetic name formerly shared by the wallflower with some species of violets, especially *V. tricolor* and its subspecies *V. lutea*. An infusion of them was deemed to ease the love sick heart. The word is now confined to the latter, whose mingling of purple, white and golden yellow in the same flower distinguishes it from one-coloured violets and two-coloured pansy violets. From the three-coloured cornfield weed, which is widely distributed in Britain, Europe, Asia and N Africa, have been produced many garden varieties, habitually called pansies.

Heat Form of energy. Formerly heat was regarded as a subtle substance which flowed in from an outside source, but it is now known to be a form of energy which is produced from other forms of energy by means of friction or chemical action, as in the case of combustion. Temperature may be regarded as heat potential and determines the transference of heat. It may be compared with level in relation to liquids, pressure in pneumatics and voltage in electricity.

The heat capacity of substances varies, and the amount of heat required to raise the temperature of a unit mass of a substance through one degree is known as specific heat. A rise in temperature of a substance causes expansion, and a further rise to a height varying with the substance causes a change of state from solid to liquid or liquid to gas. The amount of heat needed for such a change of state is known as latent heat.

Heath Rigid, overgreen shrub (*Erica*). It is native to Europe, N Asia and Africa. British species include the fine-leaved *E. cinerea*, the cross-leaved *E. tetralix* and others characteristic of S W Europe. Greenhouse favourites comprise the briar root, *E. arborea*, and many from South Africa,

besides some Australian heaths. They belong mainly to the order *Erica*, but partly to *Epacris*.

A stretch of open, uncultivated land is called a heath, especially in the south of England.

Heathcoat John English inventor. Born at Duffield, Derbyshire, Aug. 7, 1783, he finished his apprenticeship to a blacksmith and went to Nottingham. After a short spell in business in that town he began to manufacture lace in Loughborough, and there in 1808 he invented a machine for making lace, hitherto made by hand. In 1816 his factory was destroyed by the Luddites, so he transferred his business to Tiverton. From 1832 to 1859 Heathcoat was M P for Tiverton. He died Jan 18, 1861. His descendants, the family of Heathcoat-Amory, still carry on the business he founded.

Heather Shrub of the heath order. A native of Europe, Siberia and Greenland, it is also called ling. Unlike true heath (*Erica*) its coloured calyces are longer than the corollas. There is a great deal of it in Scotland and Ireland, where it is used for besoms, thatchwork and as outdoor bedding. The flowers are usually purple, but there is a variety that is white.

Heathfield Village of Sussex. It is on the Cuckmere, 15 m from Tunbridge Wells and 45 from London, on the S Rly. Near is Cade Street, where, in 1450, Jack Cade was killed. Pop 3150.

Heathfield Baron British soldier. George Augustus Elliott was born at Stobs, Dec 25, 1717, being a member of the famous border family of that name. He became a soldier and served with the Prussian Army in 1735-36 and then with the British at Dettingen and Fontenoy. In the Seven Years' War he obtained notice and promotion, but it was not until later that he became a national hero. In 1775 he commanded the troops at Gibraltar and was responsible for defending the fortress against French and Spanish attacks for four years (1779-83). In 1787 he was made a baron and he died July 6, 1790.

Heaton Norris District of Lancashire. It stands on the Mersey, adjoining Stookport, on the L.M.S. Rly. The chief industry is cotton manufacture. Near are the districts of Heaton Mersey, Heaton Chapel and Heaton Moor, in the Stookport area.

Heaton Park, Manchester, was at one time the seat of the Earl of Wilton. In 1902 it was bought by the city. The park is now a pleasure ground and the house a museum.

Another Heaton is a district of Newcastle-on-Tyne.

Heaven Name for the visible vault or firmament enveloping the earth in which the celestial bodies appear. Blended with this is the conception of heaven as God's dwelling-place, and the place or state of existence of the blessed after earthly life ends. The doctrine of a heavenly reward for earthly righteousness was found among the Jews and developed in Christian thought. Mohammedans associate heaven with a future of sensual delights. The Christian view is spiritual, not material, heaven being sometimes emphasised as a timeless state which may even accompany present experience.

Heaviside Oliver English scientist. Born May 13, 1850, he was

at first employed in telegraphy and subsequently devoted himself to electrical investigation, publishing in 1892 his *Electrical Papers*. His work had an important bearing on long distance telephony. He died Feb. 3, 1925.

The Heaviside layer is a conducting layer in the upper atmosphere suggested by him to explain various electro-magnetic phenomena including the reflection of wireless waves (especially short waves) towards the earth, giving unexpected reception strength at long distances.

Hebburn Urban district of Durham. It is near Jarrow, and stands on the Tyne, being 267 m. from London, by the L.N.E. Ry. Here are engineering works, shipbuilding yards, and other industries connected with shipping. Pop. (1931) 24,125.

Hebden Bridge Market town and urban district of Yorkshire (W.R.). It stands on the rivers Hebden and Calder, 7 m. from Halifax, on the L.M.S. Ry. Cotton goods and other textiles are made here. Near is Hardenstone Crag, a pleasure resort. Pop. (1931) 6,912.

Hebdomadal Council Body that governs the University of Oxford. It consists of the chancellor, vice-chancellor, proctors and 18 members elected by congregation.

Hebe In Greek mythology, the goddess of youth. Identical with Dia and Juventas. She was the daughter of Zeus and Hera and the cup bearer of the gods. She also attended to Hera's chariot and peacocks and, when Hercules was deified, became his bride.

Heber Reginald. English prelate. The son of a clergyman, he was born at Malpas, Cheshire, April 21, 1783. He went to Brasenose College, Oxford, and was ordained. For a time he was in Oxford as Fellow of All Souls College, but on his marriage he became Vicar of Hodnet in Shropshire. In 1823 he was chosen Bishop of Calcutta and he was there until his death, April 3, 1826. Heber is best known for his hymns. He was successful in writing prize poems at Oxford. He wrote among other hymns, *From Greenland's Icy Mountains and Holy, Holy, Holy, Lord God Almighty*.

Hebrew Name used for the Jewish race, especially to describe its language, literature and religion. The Hebrew language is Semitic. In the Old Testament was written. It developed into rabbinic or new Hebrew and then into modern Hebrew. The writing is from right to left.

Hebrews Epistle to the Book of the New Testament. Although the English Bible attributes it to S. Paul, it bears in the oldest manuscript the anonymous superscription 'to the Hebrews' and even that was a deduction by early copyists. Its vocabulary and formal rhetorical style distinguish it from letters admittedly Pauline, neither ancient authority nor modern scholarship accepts his authorship without question. Addressed to Jewish Christians perhaps in Rome, it has been at various times conjecturally attributed to Barnabas, Priscilla, Luke and others.

Hebrides Groups of islands off the west coast of Scotland. They number about 500 but only about 100 are inhabited and they are parts of the counties of Ross and Cromarty, Argyll and Inverness. They are divided into two groups, Outer and Inner. The Minch and Little Minch being a

channel between them. The Inner Hebrides include Skye, Islay, Jura, Mull, Colonsay, Rum, Tiree, as well as Staffa and Iona. The Outer Hebrides include Lewis, Harris, Taransay and Benbecula, the two Uists, North and South, Barra, the Flannan Islands, etc. St. Kilda, now uninhabited, is the most westerly of all. The soil is poor and only oats, barley and potatoes are grown. Sheep rearing and fishing are the main occupations. The total area is about 2850 sq. m. Pop. 75,000.

The islands were ruled by the kings of Norway until 1266, when they were ceded to Scotland. For two centuries they were the domains of the Lords of the Isles, a branch of the MacDonalds. Many of the islanders speak Gaelic and are Roman Catholics. The islands have a literature of their own.

Hebron Town of Palestine. Situated 20 m. south of Jerusalem, 3000 ft. above the Mediterranean, it is one of Palestine's oldest settlements. First called Kirjath-arba (Gen. xxiii) it was the home of Abraham, Isaac and Jacob. Mohammedans reverence it equally with Mecca and Medina. Captured by Saladin in 1187, the Turkish occupation ceased when the British entered it in 1917. Its walled enclosure of Herodian date shelters, according to tradition, the Cave of Machpelah and the patriarchal remains. Pop. (1931) 17,532.

Hecate In Greek mythology, the goddess of night, animal fertility, witchcraft and the underworld. Sometimes discharging the functions of Artemis, she appeared at first single formed, but afterwards triplicate, symbolising the moon's three phases. She was represented on pillars at cross roads, especially at Athens. Black ewe lambs and puppies were sacrificed to her.

Hecatomb In Greece, the sacrifice of 100 oxen or 100 other beasts of one kind. Particularly observed by Lacedaemonians on possessing a hundred cities. Early poets use the word more generally for a great but indefinite public sacrifice, e.g., one of 23 goats and lambs, and even of great destruction by physical visitation.

Heckmondwike Market town and urban district of Yorkshire (W.R.). It is 8 m. from Bradford and is served by the L.M.S. and L.N.E. Ry's. Its industries are the manufacture of carpets, machinery and textiles. Pop. (1931) 8,991.

Hecla Volcano of Iceland, in the south of the island, about 70 m. from Reykjavik. It is 5100 ft. high and has a crater over a mile round. The volcano is frequently in eruption and there are records of its activity as far back as the 11th century.

Hectare Measure of land in the metric system. It is equal to 2.471 acres. The word means 100 ares, an are being 100 metres.

Hectograph Apparatus for making numerous copies of a document. It consists of a shallow tray filled with a glycerine-gelatin mixture or a preparation of clay. The original written or typed in special ink is placed face downwards on the gelatin which absorbs the ink and from this impression copies may be made.

Hector In Greek legend the eldest son of the Trojan king, Priam, by Hecuba. He was Troy's outstanding champion during the war with the Greeks. After Hector slew Patroclus, Achilles emerged from retirement,

chased him thrice round the walls of Troy, slew him and dragged his body at his chariot wheels to the Greek camp. Entreated by the aged Priam, Achilles gave up the body for burial. Hector's wife was Andromache, and the description of their affection, with their little son, Astyanax, given by Homer in the *Iliad* is one of the finest passages in Greek or any literature.

Hecuba In Greek legend, wife of Priam, King of Troy, and mother of Hector, Paris, Cassandra and other children. It was her tragic lot, after losing her husband and favourite sons, to be made captive by the Greeks. In one story, utilised by Euripides in his tragedy, *Hecuba*, she wreaked vengeance on the children of Polyestor after he had murdered her son, Polydorus, in the Thracian Chersonese (Gallipoli), but was turned into a dog and threw herself into the sea.

Hedgehog Genus of insect-eating mammals (*Erinaceus*). They are natives of Europe and parts of Asia and Africa. All are able to roll themselves into balls by muscular layers beneath the skin, and also to erect a protective armour of short, prickly spines. The common urchin, *E. europaeus*, with short, naked tail, is a nocturnal feeder, hibernating in winter. Besides insects it consumes snakes, birds' eggs and small mammals. In the garden it is useful for destroying harmful insects.

Hedgeley Moor District in North-umberland. It is 8 m from Alnwick and is famed for the battle fought there during the Wars of the Roses. On April 25, 1464 a Lancastrian force was beaten by the Yorkists and one of their leaders, Sir Ralph Percy, was killed.

Hedge Mustard Large genus of annual or biennial herbs of the cruciferous order (*sisymbrium*). They are natives of temperate and cold regions. The common *S. officinale* has leaves variously incised and sprays of small, yellow flowers. Jack-by-the-hedge, *S. alliaria*, has larger white flowers, and a garlic-like odour. The hedge mustard was formerly used in medicine.

Hedin Sven Anders Swedish traveller. Born at Stockholm, Feb 19, 1865, the son of an architect, he went to several universities in his own land and in Germany. In 1885 he made his first considerable journey through Persia and Mesopotamia, and for the next 30 years he was almost constantly in the more unknown parts of the globe. His chief field was central Asia. During the Great War, Hedin showed marked German sympathies and returned the British knighthood conferred upon him in 1909. He has written many books which have been translated into English. These include *Through Asia*, 1898, *Adventures in Tibet*, 1904, *Overland to India*, 1910, *From Pole to Pole*, 1911, *The War Against Russia*, 1915, *Southern Tibet*, 9 vols., 1917-22, *Mount Everest*, 1922, *My Life as an Explorer*, 1928, *The Gobi Desert*, 1929 and *Log-nor, the Wandering Lake*, 1931.

Hedingham Name of two villages in Essex, Castle Hedingham and Sible Hedingham. Castle Hedingham is famed for its castle, the seat of the great family of De Vere. The keep remains. Pop 900.

Sible Hedingham, 60 m from London, has also a fine old church. It dates from the 14th century and has associations with the family of Hawkwood. Pop 1750.

Hednesford Market town of Staffordshire. It is 120 m from London by the L M S Rly., and is 10 m from Walsall. There are tile works and collieries.

Hedon Borough of Yorkshire (E R). It stands near the Humber, 5 m from Hull, and is served by the L N E Rly. At one time Hedon was a flourishing port. It is still a chartered town. Pop (1931) 1509.

Hedonism Ethical view of life which regards pleasure, bodily or mental, as the highest good. It developed into the philosophies of Aristippus and Epicurus. Influenced by Christian altruism, modern hedonistic doctrines, represented by Bentham, Mill and others, emphasise the claims of the community, and aim at the greatest happiness of the greatest number.

Heem Family of Dutch painters. David van Heem was born at Utrecht and painted pictures of still life. One is in the National Gallery, London. He died in 1632. His son, Jan David van Heem, was a much greater artist. He is represented in the Wallace Collection, London, and in other famous galleries. He died in 1683, leaving a son, Cornelis van Heem (1631-95) also a painter.

Heere Lucas de Flemish painter. Born at Ghent in 1534, from 1568 to 1577 he was in England, when he painted portraits of Queen Elizabeth, the Earl of Essex, and others. A curious and allegorical picture by him is at Hampton Court. He also painted in Paris, where he died in 1584.

Hegel George William Frederick German philosopher. Born at Stuttgart Aug 27, 1770, he was educated at Tübingen and began life as a teacher. In 1800 he settled at Jena, where he became a professor, but left that city in 1806 and edited a newspaper at Bamberg. In 1808 he became head of a school at Nuremberg, and in 1816, his reputation as a philosopher being now made, he was chosen Professor of Philosophy at Heidelberg. In 1818 he went to Berlin as professor at the university there and he died Nov 14, 1831.

Hegel's philosophy is contained in his books, some of which have been translated into English. He was one of the foremost exponents of idealism. He taught that the world of objects is not only related to an intelligence, but can be nothing more than the manifestation or revelation of that intelligence. The material world could not exist of itself. Matter is but the necessary counterpart of spirit and in it spirit reveals and realises itself. God himself is just the self-development of the absolute. The universal principle is the idea, being and the idea are identical. This philosophy was very influential in England and the philosophers who adopted it are sometimes known as the English Hegelians.

Heidelberg Town of Baden, Germany. It stands on the Neckar, 54 m from Frankfurt, and is a railway junction. For some centuries before 1721 it was the capital of the Rhenish Palatinate. On a hill above the town and the river is the castle, the sections of which are named after the princes who built them. The chapel is noteworthy and in the cellars is the great tun of Heidelberg, a vat capable of holding 17,000 gallons. Two bridges cross the river. Pop (1925) 73,034.

The University of Heidelberg was founded in 1385 and in the 17th century was a famous Protestant centre. It has a fine range of buildings, including a fine library and an

observatory One block, the gift of some Americans, was opened in 1931. There are some industries and Heidelberg, owing to its educational and other advantages, attracts residents. Pop (1933) 84,641.

The Heidelberg Catechism is a statement of the Protestant faith, drawn up in 1563. It was accepted at the time by both Lutherans and Calvinists.

The Heidelberg Jaw is a jawbone of an early type of man found near Heidelberg in 1907.

Heine Heinrich German poet. Born at Düsseldorf, Dec. 13, 1797, he went into business at Hamburg, but afterwards left it to study at several universities. In 1825 he took a degree at Göttingen and for the next six years he lived a desultory life, writing, travelling and giving vent to advanced and unpopular opinions. In 1831 he settled in Paris which was his home for the rest of his life. There he became a leader of the democratic movement and the centre of an admiring band of literary enthusiasts. After eight years as a complete invalid he died, Feb. 17, 1856. Heine was, by birth, a Jew, but in 1825 he became a Christian.

Heine's fame rests chiefly upon his lyrics, songs of unsurpassed beauty, but he also wrote a great deal of prose. His books on his journeys in the Harz Mountains and by the North Sea were followed by volumes on Corsica and Italy. His *Book of Songs (Lieder)* appeared in 1827, five years after the appearance of his first poems. He wrote on art and literature, especially French and some short stories. His last works were further volumes of poems, including *Atta Troll* and the volume called *New Poems*.

Heinsius Name of two famous Dutch men. The scholar, Daniel Heinsius, was born in Ghent June 9, 1580 and studied under the younger Scaliger. He was Professor of Greek and Latin at Leyden for many years and was regarded as one of the greatest scholars of the age. He edited some of the Latin classics and wrote poems. He died in 1655. His son Nicholas (1620-81), was also a famous classical scholar.

Antonius Heinsius was a Dutch statesman. Born Nov. 22, 1641, he entered the public service and became a trusted servant of William of Orange. When William became King of England Heinsius became Grand Pensionary of Holland. He was responsible for the conduct of foreign affairs in which he continued William's policy of hostility to France. He remained at the head of affairs in Holland after William's death and died Aug. 3, 1720.

Heir One who inherits anything. Heirs are usually created by will but in English law the heir is one who succeeds to an estate not by will but by a settlement. Before the changes in English law made in 1925, the heir was one who succeeded to real estate by intestacy or entail.

The heir to a title is usually the eldest son of the holder, but, if such does not exist, it may be a daughter or a nephew, according to the patent creating the title or the custom, if it is a very old one. An heir is called an heir apparent, an heir presumptive, if the heir provided a nearer heir is not born.

An heirloom is a piece of plate, jewellery, or furniture, or something else that descends with an estate to the heir.

Hejaz District of Arabia, sometimes spelt Hedjaz. It is on the Red Sea and with Nejd forms a kingdom. In it are Mecca the capital and Medina and the ports of Jeddah

and Yembo. It covers about 150,000 sq. m. Pop. 1,500,000.

Until 1914 Hejaz was part of the Turkish Empire. In 1916 Hussein, Grand Sherif of Mecca, was recognised as king and in return fought for Great Britain against Turkey. In 1919 he became involved in a struggle with his hereditary enemy, Ibn Sa'ud, the Chief of the Wahhabis. Defeated by the latter, Hussein abdicated in 1924. His son, Ali, did the same in 1925, as Ibn Sa'ud had by then captured Mecca. In 1927 Great Britain recognised Ibn Sa'ud as King of the united kingdom of Hejaz and Nejd (now known as the kingdom of Saudi Arabia). The Hejaz Railway runs from Medina to Amman. See NEJD.

Hejira Arabic word meaning flight. It is used for the flight of Mahomet from Mecca to Medina, which took place in 622. From it the Mohammedans date their era and their year, which begins on July 16.

Hel Goddess of Norse mythology. The daughter of Loki and Angurboda, she dwelt below the roots of Yggdrasil, ruled nine worlds and received all the dead. Later myths assigned to her only those who died of age or sickness, and gave her the attributes of darkness, hunger, starvation and misery.

Helen Greek heroine, famous for her beauty. She is said to have been the daughter of Leda, her father being either Zeus or Tyndareus. Castor and Pollux were her brothers. She became the wife of Menelaus, King of Sparta, whose she was visited by Paris. The pair fell in love with each other and Helen was carried off to Troy, the result being the Trojan War. When it was ended Helen returned to Sparta with Menelaus, whose Homer refers to them as living together in perfect unity.

Helena Saint and Roman empress. Flavia Julia Helena was born in Nicomedia and became the wife of the Emperor Constantine Chlorus. Her son was Constantine the Great. Helena was a Christian and in her old age made a pilgrimage to Jerusalem. A legend says that whilst there, she discovered the Holy Sepulchre and the wood of the true cross. Churches are dedicated to her.

Helensburgh Burgh and watering place of Dumbarton shire. It stands on the Firth of Clyde at the mouth of the Gareloch, 24 m. from Glasgow and 4 m. from Greenock on the L.N.E.R. line. There is a harbour and from here steamers go to places on the west coast of Scotland. Pop. (1931) 8893.

Helenus In Greek legend one of the sons of Priam, King of Troy. He was a soothsayer and was taken prisoner by the Greeks during the siege of Troy. When it was over he went to Epirus with Pyrrhus whom he succeeded as king.

Helicon Mountain range in Boeotia, Greece. Situated between the Corinthian Gulf and Lake Copais, now drained, its beauty made it the ancient home of the Muses which had on it a temple and sacred grove. Culminating in Parnassus 9,740 ft. high and Zagora, 5,010 ft. high, spurs overlooking the valley of the Muses contain the fountains, Aganippe and Hippocrene.

Helicopter Type of heavier than air craft. It is assumed that it can ascend vertically by means of an air screw of large diameter mounted on a vertical axis. Although many attempts have been

made with various forms of helicopter, none have proved a complete success as no air screw yet designed will give a forward movement or maintain a balance in variations of the wind. In the nearly related autogiro a forward movement is needed to raise the craft.

Heligoland Island of the North Sea. It is 46 m from the mouth of the Elbe, belongs to Prussia, and is about 130 acres in extent. At one time it is said to have been quite a large island, covering some hundreds of square miles. The name means Holy Island.

In 1807 the island was taken by Great Britain from Denmark. In 1890 it was ceded to Germany and was soon strongly fortified. The inhabitants were removed and works of enormous strength constructed, making it a base for both warships and aircraft. After the Great War the fortifications were all dismantled and the island became again a pleasure resort, noted for its sea bathing.

HELIGOLAND BIGHT The waters between the island and the German coast form the Bight of Heligoland. On Aug. 28, 1914, this was entered by a British force of light cruisers and destroyers. These attacked the German ships and there was some hard fighting without decisive results. Later in the day five British battle cruisers under Sir D. Beatty arrived in the bight and, with their aid, three German cruisers were sunk and the rest driven into port. The British lost 31 killed and one ship, the *Archusa*, badly damaged. The Germans had 712 killed and 37 taken prisoner.

Heliograph Instrument used for sending messages over long distances by reflecting the sun's rays or artificial light from a movable mirror. In this method of signalling long and short flashes in the Morse code are used. It was employed in the South African War in 1899.

Heliometer Instrument invented in the 18th century for the accurate measurement of heavenly bodies. It was later improved by Fraunhofer and Dollond. The object lens of the heliometer is in two separate halves, each forming a perfect image in the focus of the eyepiece; the images converging or diverging as the half-lenses are moved together or apart.

Heliopolis Ancient city of Egypt. It was the Biblical On (Gen. xli), and the modern Matariya, a suburb of Cairo. It was devoted to the worship of the falcon-headed sun god Ra. Its learned priestly schools attracted Plato and other philosophers. A XII-Dynasty obelisk, 66 ft. high, erected by Senusert I, still stands.

Heliostat Astronomical instrument by means of which a beam of light is reflected by a mirror in a fixed direction. In the heliostat, a mirror is mounted upon an axis which is placed parallel to the earth's axis, and a clockwork mechanism causes the mirror to rotate following the sun, thus reflecting the sun's rays in an invariable direction.

Heliotherapy Treatment by sunlight. An ancient practice adopted by Fluen (1861-1904) who, however, used artificial light for treating lupus with beneficial results. Recognition of the value of sunlight is now general and sun-bathing is common. Exposure should be gradual and the head should be protected. The effect is that of a general tonic valuable in children in cases of rickets, and to convalescents from debilitating diseases.

Heliotrope Large genus of herbs and shrubs of the horage order, (*Heliotropium*). Mostly natives of the warmer regions, they bear alternate leaves, and clusters of small, white or lilac salver shaped flowers. One species is a common European weed.

In Great Britain the heliotrope is an attractive garden plant. This plant is also known as cherry pie and was introduced into Europe in the 18th century.

Helipterum Everlasting flower including the rhodanthes and the acrocliniams. They grow in a light, rich soil and a warm, sheltered position.

Helium Colourless gaseous element resembling argon in its inert character. It is not inflammable and next to hydrogen is the lightest gas known. Consequently helium is used for inflating the envelopes of airships. To a small extent it is soluble in water—hence its presence in thermal springs. It occurs also as natural gas in Texas, and in many radio active minerals, especially those containing thorium and uranium. The radiations known as alpha-rays are electrically-charged helium atoms.

Helix Widely distributed genus of air-breathing, hilly-footed molluscs of the land snail family. They can withdraw entirely into their spiral shells which have no horny lids. Among 25 British species are the common garden snail *H. hortensis*, and the edible snail, *H. pomatia*. Exotic forms are often strikingly variegated. One in Sicily bores into rocks.

Hell Place or state of retribution for impenitent sinners after death or the last judgment. The authorised version of the English Bible frequently uses the word for the Hebrew *Sheol* and the Greek *Hades*, denoting the abode of the departed as well as for *Gehenna* and *Tartarus*. The doctrine of hell as a place of torment long figured in Christian theology, but has now been abandoned by most Christian people. It was based upon one or two passages in the New Testament, notably in the Parable of Dives and Lazarus and of the wise and foolish virgins.

Hellas Name used for Greece. It included all the districts occupied by Greeks, the Greek world of that day. In addition to Greece proper there were Greek cities in Asia Minor, Sicily and other parts of the Mediterranean coast. It was called Hellas because all were supposed to be descended from Hellen, the son of Deucalion.

Hellebore Genus of perennial herbs of the buttercup order possessing cathartic properties. They are natives of Europe and N and W Asia. The large, coloured sepals simulate petals, the true petals becoming honeyed tubes. The stinking hellebore, *H. foetidus* and the bear's foot (*H. viridis*) grow wild in Britain. The Mediterranean black hellebore (*H. niger*) is the Christmas rose of English gardens.

Hellenism Term used for the culture of ancient Greece. It aims at reproducing in modern life the artistic and literary ideals of the best age of Greece, ideals which in the opinion of many, represent the highest achievements of the human mind. In London there is a Society for the Promotion of Hellenic Studies. It was founded in 1879 and issues *The Journal of Hellenic Studies*. The address is 50 Bedford Square, London, W.C.1.

Helles Cape on the peninsula of Gallipoli (δν) It is on the southern ex-

tremity of the peninsula and guards the entrance to the Dardanelles Here, in April, 1915, British troops landed, in spite of fierce opposition

Hellespont Old name for the Dardanelles (q.v.) The story goes that Helle, fleeing from her stepfather, Iphigeneia, fell into the sea and was drowned Her name was then given to it

Helm In a ship the wheel or tiller by which a vessel's course is directed Orders about direction, called helm orders, are issued by those responsible for shipping, but a certain amount of inconvenience is caused by these being different in different countries The matter was discussed at international conferences in 1912, 14 and 1920, but no decision was reached In 1931, however, it was announced that Great Britain was willing to co-operate with other countries in establishing a uniform international system of helm orders

Helmholtz Hermann Ludwig Ferdinand von German scientist Born at Potsdam, Aug 31 1821, he became a doctor and as such served in the Prussian Army In 1849 he was made Professor of Physiology at Königsberg In 1855 he moved to Bonn and in 1858 to Heidelberg In 1871 he was appointed Professor of Physics at Berlin and in 1887 became Director of the Physico-Technical Institute at Charlottenburg He died there, Sept 8, 1894

Helmholtz ranks as one of the great scientists of the 19th century He was responsible for the invention of the ophthalmoscope He wrote valuable books on optics and acoustics and his researches into the problem of sight were of the highest importance He was also an authority on the nervous system As a physicist he developed the idea of the conservation of energy, and was a pioneer in examining some of the problems connected with electricity

Helmsley Market town of Yorkshire It is 32 m from York, on the L.N.E. Ry Near is a ruined castle and also Duncombe Park, once the seat of the Earl of Eversham whose eldest son is called Viscount Helmsley It is now a school for girls Pop 1400

Héloise French abbess She is known for her love for Abélard, her tutor to whom she wrote the now famous love letters, See ANGLAND

Helot Class of bondmen in Sparta They were a Greek people who were enslaved by the Spartans They worked on the landed estates paying a fixed portion of the produce but remaining state property Sometimes they were employed as light armed infantry or as rowers in the fleet Their cruel treatment occasioned a revolt in 461 B.C. The system disappeared in the 3rd century B.C.

Helsingfors Capital and seaport of Finland also called Helsinki It stands on the Gulf of Finland, 250 m from Leningrad The harbour is a good one fitted with docks and wharves and there is a considerable shipping trade In the harbour is a free port Other industries include sugar refining and tobacco preparing Pop (1931) 211,715

Helston Borough and market town of Cornwall It stands on the Cober 11 m from Falmouth and 303 from London and is reached by the G.W. Ry There

are some small industries, but the mines near are less prosperous than formerly An old place Helston is noted for its annual festival on May 8 On that date the Flora Danco is danced in the streets Pop (1931) 2544

Helvellyn Mountain of England The second highest in the country, being 3118 ft high, it is on the border of Cumberland and Westmorland and overlooks Ulswater The ascent, which is not difficult, is best made from Patterdale

Helvetii Name of a Teutonic tribe They lived in the district now called Switzerland and around Avranches In 58 B.C. they invaded Gaul, but were defeated by Julius Caesar The republic set up in Switzerland by the French in 1798 was called the Helvetic Republic Its capital was Lucerne, but it only lasted until 1803

Hemans Felicia Dorothea English poetess She was born Sept 25, 1793 Some of her poems were extremely popular, for, although never great poetry, they were written with feeling and a sense of harmony and dealt with subjects which everyone could understand *The Beller Land* was, perhaps, the best known Mrs Hemans died in Dublin, May 16, 1835

Hemel Hempstead Borough and market town of Hertfordshire It stands on the little River Gade, 32 m from London, on the L.M.S. Ry The industries include paper making, brewing and tanning The name is due to the fact that hemp was once grown in the neighbourhood Pop (1931) 15,122

Hemisphere Term literally meaning a half sphere, but applied in geography to the two equal divisions of the earth's surface These are separated by the equator and known as the northern and southern hemispheres In the northern hemisphere there is a greater distribution of land surface than in the southern

Hemlock Biennial umbelliferous herb It is native in Europe, Asia, and N. Africa, and is common in Britain Its stout, shining, furrowed, purple spotted stem bears triangular much divided leaves, and small white flowers in compound umbels It is poisonous, and in Greece a decoction of it was given to those sentenced to death, e.g., to Socrates To day the alkaloid prepared from it and called conine is used in medicine

Also a name given in North America to coniferous trees of the pine family

Hemp Name given to the fibre of a herb of the nettle order (*cannabis sativa*) The plant is cultivated for this fibre, which is used for making rope, belting and the like It grows in a cool, moist climate, and the stems when ripe, are pulled and subjected to much the same treatment as flax The best is grown in Italy, and a little in England and Ireland It also produces a resinous secretion, which is made into the drugs known as bhang and hashish, both being narcotics and hypnotics It is also used in medicine The oily seeds are used for bird food and cattle cake The name is also used for fibres of other plants e.g. Manila hemp and sisal hemp, while other trees yield Indian hemp and African hemp all being used for similar purposes

Two other plants bearing the name are the hemp agrimony and the hemp nettle Agrimony grows to a blight of 4 ft and bears clusters of purple flowers It belongs to the

order *compositae*. The nettle bears white or ivory flowers. It belongs to the order *labiales*.

Hemsworth Urban district of Yorkshire (W R). It is 8 m from Wakefield and 168 from London, by the L N E Rly. It is a coal mining centre. Pop (1931) 13,001.

Henbane Herb of the nightshade order (*hyoscyamus niger*). It is a native in warm and temperate Europe, Asia and Africa, and is poisonous to domestic fowls. It is foetid and viscid, with a stout stem, large leaves and funnel-shaped purple-veined yellow flowers. Besides this annual form a biennial one grows in the second season. Both leaves and seed yield alkaloid poisons, hyoscyamine and hyoscyne, used as sedatives and anodynes, large doses cause paralysis. The plant grows wild in England and Ireland.

Henderson Arthur. British politician. Born in Glasgow, Sept 15, 1863, he was apprenticed to an engineering firm in Newcastle-on-Tyne and soon became a leading trade unionist and a member of the city council and in 1895 was suggested as a candidate for parliament. Soon he moved to Darlington where he was equally active, being mayor in 1903. From 1903 till 1918 he was M P for the Barnard Castle Division. In 1919 he was elected for Widnes, in 1923 for Newcastle East, and in 1924 for Burnley, where he was defeated in 1931.

Henderson began his career as a minister when in 1915 he was made President of the Board of Education in the coalition ministry. In Dec 1916, he became minister without definite office, but in Aug 1917, after a visit to Russia, he resigned. In 1924 he was Home Secretary in the first Labour Ministry and in 1929 he became Foreign Minister, a post he filled with considerable success. He was Chairman of the Parliamentary Labour Party, 1908-10 and 1914-17 and its chief whip 1921-24 and 1925-27. In the second MacDonald ministry (1929-31) he was Secretary of State for Foreign Affairs, but in 1931 he resigned with the ministry and was defeated in the General Election. In 1932, 1933 and 1934 he presided at the disarmament conference at Geneva. He was awarded the Waterloo prize in 1933 and the Nobel prize in 1934 for his services to peace. He died in Oct 1935. A biography by E. Jenkins was published in 1933. In 1923-24 two of his sons sat in parliament. Arthur for Cardiff South, and William Watson for Enfield. They were re-elected in 1929, but lost their seats in 1931.

Hendon Urban district of Middlesex. It is 8 m to the north-west of the city and is served by the L M S., L N E and Tube Railways. Hendon has become a great flying centre. Here is a large air park, as well as aircraft works, and in June an annual air pageant is held. Pop (1931) 115,682.

Hendon is also the centre of a rural district and in 1929 the council of this bought Headstone Manor House, once a residence of the archbishops of Canterbury, for public purposes.

Hengist Anglo-Saxon leader. All that is known about him is that in A.D. 449, with his brother, Horsa, he landed at the head of some Angles at Ebbsfleet in Kent. He defeated the Britons and settled in Kent, where he reigned over a small kingdom until his death in 488. He is said to have been invited by the British king Vortigern, and is regarded as the founder of the Anglo-Saxon rule in England.

Hengistbury Head Headland on the coast of Hampshire. It is about 2 m to the south of Christchurch and from it magnificent views are obtained. In 1930 it became the property of the Borough of Bournemouth.

Hengoed District of Glamorganshire. It is 31 m from Neath and 160 from London, on the G W. Rly. It is a populous coal mining district.

Henley William Ernest. English writer. Born at Gloucester, Aug 23, 1849, he was educated at the grammar school there. After being in a hospital in Edinburgh, where he was treated for tuberculosis, he settled in London, where he soon made a position for himself. As editor of *The National Observer* he gathered round him a band of young writers, to whom he imparted something of his own virile personality and maintained, until broken, a close friendship with R. L. Stevenson. The two wrote four plays together. Henley's literary work was chiefly essays and criticisms in *The National Observer* and other papers and volumes of verse, *A Book of Verses*, *The Song of the Sword* and *For England's Sake*. He died at Woking, July 11, 1903.

Henley-on-Thames Borough and market town of Oxfordshire. It stands on the north side of the Thames, 36 m from London, on the G W. Rly. Henley is chiefly known for its boating facilities and the annual Henley Royal Regatta (q.v.). The headquarters of the Leander Club and the Phyllis Court Club are here. Browing is an industry. Pop (1931) 6618.

Henley-in-Arden is a little town in Warwickshire. It is 100 m from London and 17 from Birmingham, on the G W. Rly.

Henley Regatta Principal rowing event in England. It is held every July and attracts the best oarsmen from all over the world. The first meeting was held in 1839. The chief races are the Grand Challenge Cup, the Ladies' Challenge Plate and the Thames Challenge Cup for crews of eight. For crews of four there are the Stewards' and the Visitors' Challenge Cups. The Silver Goblets are for the best pair of oarsmen and the Diamond Sculls for single scullers. The Amateur Rowing Association controls the meeting.

Henna Cosmetic used for staining nails, eyelids and hair. It contains the powdered leaves of the Egyptian privet, *lawsomia inermis*, a tropical looscstrife.

Henrietta Maria English queen, wife of Charles I. A daughter of the French king, Henry IV, she was born in Paris, Nov 25, 1609. In 1624 a marriage was arranged between her and the English prince, Charles, and in May, 1625, they were married by proxy in Paris, Charles being then king. The young queen then came to England and for 20 years the pair lived together, on the whole quite happily.

A strong Roman Catholic, Henrietta took part in public affairs and her actions, especially in favouring members of her own faith, undoubtedly added to the many difficulties of her husband. At the outbreak of the Civil War, she got a little help for Charles in France and the Netherlands, but in 1642 she left England and the pair never met again. In spite of poverty and insecurity generally, she worked for his cause and later for that of her sons, but without any great success. After the

restoration of Charles II, she visited England, but she lived mainly in France, dying at Colombes Aug 31 1666

Henry Electrical unit. It is named after the American physicist, Joseph Henry (1799-1878) and is the practical unit of self inductance

Henry I King of England The third son of William I, he was born at Selby in 1068 In 1100, after his brother, William II's, death and when Robert was on crusade, he ascended the throne He reigned for 35 years on the whole successfully and is regarded as the founder, or at least the able developer, of the English system of justice

He carried on a war with Robert, whom he defeated at Tinchebray in 1100, afterwards keeping him in prison for the rest of his life Then he secured Normandy, but further fighting was necessary in order to keep it He also quarrelled with the church represented by Anselm over the question of investitures

Henry married Matilda, daughter of Malcolm king of Scotland and a descendant of the earlier English kings His only legitimate son, William, was drowned in the White Ship in 1120 consequently he left the throne to his daughter, Matilda or Maud Henry died Dec 1 1136

Henry II King of England He was born at Le Mans, March 25, 1133, his father being Geoffrey Count of Anjou and his mother Matilda, daughter of Henry I of England In 1143 a treaty was made by which Henry was recognised as Stephen's successor on the throne He became king of England in 1154, two years after he had married Eleanor Duchess of Aquitaine, the divorced wife of Louis VII of France

Henry reigned over England and his own elderable inheritance in France for the next 35 years In England he restored order after the anarchy under Stephen and taking up some of the ideas of his grandfather Henry I, gave the country a number of legal reforms which made for good government This led him into his famous quarrel with the church and Thomas à Becket whose murder one of the central facts of his reign led to the king's humiliation and to the thwarting of his plans for making the clergy amenable to civil law

In France Henry was chiefly occupied in fighting Louis of France and his own rebellious nobles In 1173 he had to face a rebellion in England In which his eldest son, Henry, took part His other three sons, Richard I, John and Geoffrey at one time or another rebelled against him He brought Ireland under the rule of England and was one of our greatest kings He died at Chinon July 6 1189

Henry III King of England Born at Winchester Oct. 1 1207 he was the son of King John and his wife Isabella of Angoulême He was only 9 years old when, in 1216 he became king and he reigned for the long period of 56 years Until 1217 he was a minor the land being ruled meanwhile by William Marshal Earl of Pembroke, and Hubert de Burgh His personal rule on the whole was disastrous He was influenced by favourites and his marriage in 1236 with Eleanor of Provence led to the arrival of many needy foreigners who were soon filling the chief positions in the land Already restless at these proceedings, the barons in 1258 compelled Henry to hand over the government to themselves with Simon de Montfort as their leader A little later war

broke out Henry was defeated and made prisoner at Lewes in 1264, but in 1265 his son, Edward, turned the tables on the barons at Evesham Henry lived on until Nov 10, 1272, with Edward as the real ruler of the country

Henry IV King of England The oldest son of John of Gaunt, Duke of Lancaster, he was born at Bolingbroke in Lincolnshire, April 3, 1367 He became Earl of Derby, and, as a cousin of the king, Richard II, began to take part in public life being one of the group called the lords appellant, who put a curb on the king's power In 1393, the year before he succeeded his father as Duke of Lancaster, he was sent into exile by Richard II and on Gaunt's death the king seized his lands Henry, therefore, returned collected a small army in Yorkshire, and, Richard being in Ireland, he had no difficulty in securing the throne His title to it was admitted by parliament and, as the first of the three Lancastrian kings, he began to reign in 1399

Henry's reign lasted for 13 years It was marked by rebellions, one quite serious, and the persecution of the Lollards He died at Westminster, March 20 1413 Shakespeare wrote two plays on Henry IV

Henry V King of England Born at Monmouth Aug 9, 1387, he was the eldest son of Henry IV He was made Prince of Wales in 1399 and soon began to take part in public affairs, including wars in Wales In 1413 he became king and, having put down a rising of the Lollards, he claimed the throne of France and went with an army to make good his imaginary right In Oct., 1416, he won the great victory of Agincourt, on which his fame as a soldier rests, and between then and 1420 he conquered the whole of Normandy, his task being made easy by the civil war in France In 1420 the French king agreed to the Treaty of Troyes, by which Henry was made regent or recognised as the next king On Aug 3, 1422, he died at Vincennes He married Catherine, a daughter of the King of France and left an only son, Henry VI

Henry VI King of England He was born at Windsor, Dec 6, 1421, the only son of Henry V, and became King of England and France in 1422 These lands were ruled for him by his uncles, the Dukes of Beaufort and Gloucester as regents, but after a long and costly warfare, his French realm was completely lost In 1446 he married Margaret of Anjou, but before then the faction fights which led to the Wars of the Roses had begun Henry was quite unable to keep order between the factions, especially after 1453 when he became insane Richard, Duke of York was named protector and in 1455 the civil war began The cause of Henry was bravely championed by his wife but in 1460 he was made a prisoner York then claimed the throne, but it was decided that Henry should rule during his lifetime, his rival and not his son succeeding when that event occurred

Under these conditions the war was quickly renewed York was killed at Wakefield and his son made himself king in 1461 as Edward IV In 1465 Henry, who had been deposed, was again taken prisoner, but in 1470 by a sudden reversal of fortune due to Warwick, he was restored but only for a few months Edward IV returned from his exile, crushed the Lancastrians and put the Prince of Wales and later his father, Henry VI, to death, May 21 1471

Henry is chiefly regarded as the founder of King's College, Cambridge, and of Eton College. It has been proposed to canonise him. On him Shakespeare based three of his plays.

Henry VII. King of England. Born at Pembroke, Jan. 28, 1457, his father was Edmund Tudor and his mother Margaret Beaufort, a descendant of John of Gaunt, Duke of Lancaster. He inherited from his father the caridom of Richmond and in 1485 claimed the throne. He collected an army, defeated Richard III at Bosworth and was crowned. Parliament accepted him and he married Elizabeth, daughter of Edward IV.

Henry, the first of the Tudor kings, reigned for 24 years. He crushed two pretenders to the throne, but his great work was to lay the foundation of the Tudor monarchy, which he did by husbanding carefully his revenues, keeping the peace, encouraging trade with the Netherlands and crushing the last remnants of baronial independence. He died at Richmond, April 22, 1509. His sons were Arthur and Henry VIII. His daughter, Margaret, married James IV of Scotland and so brought about the union of the crowns in 1603.

Henry VIII. King of England. The second son of Henry VII, he was born at Greenwich, June 28, 1491, and became heir to the throne when his brother, Arthur, died in 1502. Well educated, with abilities above the average, possessing an engaging and vigorous personality and wide human interests, he was destined to make his mark upon the history of England and the world. Moreover, these same qualities made him popular with his people and enabled him to carry out his autocratic ideas. He became king in 1509 and at once married Catherine, daughter of Ferdinand and Isabella of Spain, the widow of his brother, Arthur.

The first period of Henry's reign was occupied largely with foreign affairs. The emperor, Charles V, and Francis I of France both sought his aid, which he gave first to one and then to the other, but the wars in which he took part were not very serious matters, except, perhaps, for the defeat of the Scots at Flodden in 1513. At this time Henry had for his adviser Thomas Wolsey, archbishop and cardinal. In 1521 the king showed his interest in church matters by writing a book on the sacraments. This controverted the views of Luther and won for its author the title of Defender of the Faith.

The second period of his reign began about 1526, when Henry fell in love with a lady at court, Anne Boleyn. To marry her he decided to get a divorce from Catherine. This led to the rupture between the Church of England and Rome and to the fall of Wolsey. In 1529 a parliament met, which, at the behest of the king, carried out the necessary changes. Henry was made supreme head of the Church and the power of the pope in England was destroyed. Bishops were in future appointed by the king and payments to Rome were forbidden. The work of reform was completed by the dissolution of the monasteries, which provided money for the lavish expenditure of the sovereign. The dissolution of the monasteries led to the rising called the Pilgrimage of Grace, but this was soon suppressed. Meanwhile, in 1533, Henry had married Anne Boleyn, the earlier marriage being declared invalid by parliament.

In 1536 Anne Boleyn, charged with crimes against the king, was executed and Henry

married Jane Seymour. She died very soon, and now anxious to ally himself with the German Protestants, he took for his fourth wife Anne, a princess of Cleves. She did not please him and was soon put away, this leading to the execution of the king's adviser, Thomas Cromwell, in 1540. Henry's fifth wife was Catherine Howard, a niece of the Duke of Norfolk, who was beheaded for infidelity. The sixth was Catherine Parr, who survived him.

Henry died Jan. 28, 1547. He left three children, each by a different wife, each of whom succeeded to the throne. They were Edward VI., Mary and Elizabeth.

Henry Name of four kings of France. Henry I was a son of Robert I and a grandson of Hugh Capet. He ruled from 1031 to 1060, spending time and energy fighting William, Duke of Normandy, and other of his vassals.

Henry II, a son of Francis I, reigned from 1547 to 1559. He is known as the husband of Catherine de Medici and the father of three kings, Francis II, Charles IX and Henry III. His daughter married Philip of Spain and Henry IV of France. He was also the lover of Diane de Poitiers. Wounded in a tournament, Henry died July 10, 1559.

Henry III, the third son of Henry II, was chosen King of Poland in 1573, but he soon left that country and in 1574 became King of France. His reign was one of civil war and on Aug. 1, 1589, he was murdered.

Henry IV. King of France. Born at Pau, Dec. 14, 1553, he was a son of Anthony, a member of the Bourbon family, and his wife Jeanne d'Albret, Queen of Navarre. Although a Protestant he was educated at the court in Paris and in 1572, just before the Massacre of St. Bartholomew, he married Margaret, daughter of Henry II, King of France. In 1572, also, he became King of Navarre, but his time was chiefly spent in fighting for the Huguenot cause in France. In 1589, when Henry III was murdered, he was crowned King of France, but his kingdom remained to be conquered. He defeated his Roman Catholic enemies in battle at Ivry and Arques, took Paris and then declared himself a Roman Catholic. In 1598 he granted the Protestants toleration by the Edict of Nantes, and his position remained unshaken until he was murdered, May 14, 1610.

Henry Name of seven German kings. Duke of Saxony before he was chosen German King in A.D. 919. He reigned until his death in 936 and was succeeded by his son, Otto the Great. Henry II was a duke of Bavaria who was chosen king in 1002. He was crowned Emperor in Rome in 1014 and died in 1024, being canonised in 1146. Henry III succeeded his father, Conrad II, as emperor in 1039 and reigned until his death in 1056.

Henry IV, a son of Henry III, became king in 1056, when he was only six years of age. In 1069 he began to rule as well as reign, and he passed a long life mainly in a quarrel with the Church about investitures (*q.v.*). In 1074 he submitted to Gregory VII at Canossa, but the struggle was soon renewed and Henry was fighting his old enemies, which included his own sons when he died, Aug. 7, 1106.

Henry V, a son of Henry IV, continued the struggle about investitures until 1122, when he came to terms with the pope. He died in 1125. Henry VI was a member of the Hohenstaufen family, the son of Frederick I and the

father of Frederick II. He reigned from 1190 to 1197, his time being chiefly occupied in Sicily, which kingdom came to him through his wife, Constance. Henry VII, a count of Luxembourg, was king from 1308 to 1313.

Henry Prince of Portugal, called the Navigator. A son of John I and through his mother, a grandson of John of Gaunt, Duke of Lancaster, he was born in Oporto, March 4, 1394. He had a little experience of war, but most of his life was spent at Sagres. There he built an observatory and in other ways aided the infant science of navigation, as well as finding money for a succession of voyages of exploration to the Asian and African coasts. Some very important discoveries resulted from the voyages organised by him. He died Nov 13, 1460.

Henry Joseph American scientist. Born at Albany, Dec 17, 1797, he was educated there and became a teacher. He devoted a good deal of time to experiments with electricity, and in this way discovered the use of the electric current in telegraphy and for other purposes, whilst wireless telegraphy also owes something to him. In 1846 he was made secretary to the Smithsonian Institution at Washington. He died May 13, 1878.

Henry Matthew English divine. A son of Rev Philip Henry (1633-96), one of those who were rejected from their livings by the Act of Uniformity in 1602, he was born in Flintshire, Oct 8 1662. He became a Nonconformist minister at Chester in 1687 and in 1712 moved to London to a church in Mare Street, Hackney. He wrote a popular *Exposition of the Old and New Testaments*, and died June 22 1744.

Henry O Name taken by an American writer. Born in N. Carolina Sept 11, 1802, William Sydney Porter lived a varied life. He was editor of a humorous paper, *The Rolling Stone*, at Austin, Texas, and after a spell as a bank official returned to journalism at Houston. He was there sentenced to a term of imprisonment on a charge of embezzlement. By then he had begun to write, and during the next few years he made a name by his short stories. These have been published in a number of volumes many consider him one of the greatest of short story writers. His works include *The Four Million*, *Heart of the West*, *The Trimmed Lamp* and *The Gentle Grafter*. He died in New York, June 5, 1910.

Henry Patrick American statesman. Born in Virginia May 29, 1736 he became a lawyer after having tried store keeping and farming. His eloquence made him a success in his profession, and, as a member of the legislature of Virginia he advocated taking up the struggle against Great Britain. He took part in the events that led to the union of the Colonies and the Declaration of Independence. In 1788 he was chosen Governor of his state (Virginia). In 1791 he retired from public life and on June 6 1799 he died.

Henson Herbert Hensley English prelate. Born in London, Nov 4 1863 he was educated at Oxford, where he won a fellowship at All Souls College. He was ordained in the Church of England and in 1887-88 was head of Oxford House, Bethnal Green. From 1888 to 1893 he was vicar of Barling from 1893-1900, incumbent of St. Mary's Hospital, Ilford and from 1900

to 1912, canon of Westminster and rector of St Margaret's. In 1912 he was made Dean of Durham. In 1918, Bishop of Hereford, and in 1920, Bishop of Durham.

A broad churchman, deeply read in church history, a fearless thinker and a powerful controversialist, the bishop occupies a unique position in the Church of England. He has written a great deal, both books and articles, and has set forward clearly and incisively his ideas of the church in modern life, the relations between church and state and other matters. His powers were seen at their best during the debates on the revised prayer book in 1920.

27 After its rejection by the House of Commons he came forward as an advocate of disestablishment.

Henty George Alfred English writer. Born at Trumpton, near Cambridge, Dec 8, 1832, he went to school at Westminster, and then to Caius College, Cambridge. He was in the Crimea during the war in connection with the supply of food. Having become a correspondent for *The Standard*, he saw fighting in Italy with Garibaldi in 1859-60, in the Franco-German War, 1870-71, and in Serbia in 1876. He made his name, however, by his stories for boys, which were long the most popular of their kind. Most of them deal with adventures in one or the other of England's many wars. They include *The Lion of the North*, *The Cat of Bubastes*, *The Young Carthaginians*, *Out on the Pampas* and about 70 others. He died at Weymouth, Nov 16, 1902.

Hepatica Genus of ranunculoid plants, related to the anemone. They are natives of Europe and grow easily in Britain. They resemble a buttercup and flower in early spring, in several shades of colour, viz., white, blue and red. The leaves are thick, divided into thin oval lobes and often perist through the winter.

Hephaestus In Greek legend the god of fire and metal working. He thus corresponds to the Roman Vulcan. He was the son of Zeus and Hera and is always represented as being lame. The story is that his mother, disliking him, threw him off Olympus and so damaged his feet. The making of famous suits of armour, such as that worn by Achilles, is attributed to Hephaestus, who had his workshops in Lemnos or in Sicily.

Hepplewhite George English cabinet maker. He was apprenticed to George Gillow and after wards set up in business for himself in London. His work is characterised by delicacy, grace and lightness of workmanship and some of his effects were obtained more by inlaying than by carving. The Hopplewhite style of furniture was generally curvilinear, except in cabinets, in chairs the shield back was very common. He died in 1786.

Heptarchy Word meaning seven king doms, from the Greek *hepta*. It is used for the seven kingdoms into which England was at one time divided and also for the period between the arrival of the Anglo-Saxons in 410, and the 9th century. The seven were Kent, Essex, Wessex, Mercia, F. Anglia and Northumbria.

Hera Greek goddess. A daughter of Cronos and Rhea she was both sister and wife of Jupiter. She thus ranks as the queen of the gods. Her children included Mars (Ares), Hephaestus (Vulcan), and Hebe

Many other legends have gathered around her name. She was one of the three beauties who appeared before Paris, and her vengeful disposition, at the affront then put upon her by him, caused her to side with the Greeks against the Trojans. Hera, who is the Roman Juno, was the goddess of childbirth.

Heracclitus Greek philosopher. The founder of metaphysics, he pronounced the theory that fire, the first principle, is a rational element governing the universe, from which all things evolve and to which they ultimately return. He contended that change is the only stable thing and that not even the gods would escape destruction.

Heraclius Roman emperor. Born in Cappadocia about 575, the son of a high official, he was renowned as a soldier. In 610 he defeated the Emperor Phocas and made himself his successor at Byzantium. His reign was passed in warfare, first with the Avars and then with the Persians, in both of which he was successful, his greatest victory being over the Persians near Nineveh in 627. He then turned against the Arabs, but there he was less successful, and much of the empire in the west had been lost when he died in 642.

Herald Officer entrusted in time of war with messages to the enemy, challenges, peace offers and the like. Such existed in Greek and Roman times, and there are many references to their duties in classical literature. They were allowed to come and go unharmed, and to facilitate their work wore a distinctive mark of some kind.

Heralds were employed in the wars of the Middle Ages, and in the days when knight-hood flourished were given new duties, these being connected with the bearing of arms. All matters of this kind were settled by heralds, and in this capacity they exist to-day.

COLLEGE OF HERALDS In England, Richard III., in 1483, made the heralds into a college, also called the College of Arms. This still exists, and to it belong the six heralds, Windsor, Lancaster, York, Somerset, Chester and Richmond. There was a college of heralds in Ireland, and in other European countries, all being concerned with the bearing of arms.

To-day the word is used as the name of a newspaper, e.g., the *Glasgow Herald* and the *Daily Herald*.

Heraldry Term denoting generally all the business of heralds, specifically the art and science of genealogy, precedence, honorary distinctions and armorial bearings. In the Middle Ages, after knights assumed them, personal devices extended rapidly. The marshalling of badges, crests, coat armour, pennons, helmets and other distinctive devices became important.

Armorial insignia are traced upon a shield or escutcheon, in a tincture chosen from two metals, five colours and eight furs. The signs charged on the shield include various simple forms called ordinaries, e.g., bends, chevrons, together with subordinaries, e.g., orles, lozenges. Used at first to distinguish knights in the field, heraldic insignia came to appear on personal apparel, books, seals, signet rings, windows, furniture and tapestry hangings. Ten degrees of coats of arms are recognised: sovereign states, claims of dominion over another, communities, certain offices, e.g., bishops, succession, assumption, paternal inheritance, matrimonial alliance, adoption and concession. See **COAT OF ARMS**.

Herat City of Afghanistan. It stands in the mountains, being about 2500 ft. above sea level and at the junction of important trading routes between India, Russia and Persia, 400 m. W. of Kabul. Carpets and silks are made. Pop. 30,000.

Herb Plant whose stem, lacking permanent woody tissue like shrubs and trees, dies down annually. The stem grows from the root annually, biennially or perennially. Pot herbs are hollow, wholly or partly, in pots, e.g., the carrot and turnip.

In cooking and pharmacy the word denotes any plant, sometimes shrubby, used for flavouring, e.g., mint, parsley, or in domestic remedies, e.g., tansy, horehound. These are dealt in by herbalists, who are, however, diminishing in class.

Herbals are books describing the qualities and uses of these plants.

Herbarium Collection of preserved plants mounted on loose sheets of paper and systematically arranged, also called *hortus siccus*. The herbarium at Kew is unrivalled. The British Museum (Natural History Department), and many universities have one. After drying in absorbent paper, specimens are gummed to stout sheets and stored in shelved cabinets.

Herbart Johann Friedrich. German philosopher. Born at Oldenburg May 4, 1776, he was educated there. In 1805 he lectured in philosophy at Göttingen, and in 1809 at Königsberg, where he succeeded Kant. He remained there until 1833, and died at Göttingen, Aug. 14, 1841.

Herbart's philosophy was based on that of Kant. He is better known, however, for his influence on education. He imbibed the ideas of Pestalozzi, his friend, and did a good deal to make education and educational methods a science. His book has been translated into English as *Education and Science*.

Herbert English family. It came into prominence in the 15th century, when a Herbert became the owner of the great castle at Raglan. In 1468 Sir William Herbert became Earl of Pembroke, a title which soon became extinct. The existing Herberts are descended from him through an illegitimate son, Richard, whose descendants obtained at least five earldoms in addition to other titles. Of these the earldom of Torrington is extinct. The family still holds the united earldoms of Pembroke and Montgomery, the earldom of Carnarvon and the earldom of Powis. See **PEMBROKE**, Earl of.

Herbert Alan Patrick. English author. Born Sept. 24, 1890, the son of a civil servant, he was educated at Winchester and New College, Oxford, and became a barrister. He served during the Great War in Gallipoli and France with the Royal Naval Division, and when it was over made a name by his contributions to *Punch*. In 1924 he joined the regular staff of that paper. Herbert's books include *Sea Shanties*, *Plain Jane*, *Misleading Cases*, *The Trials of Topsy* and *The Water Gipsies*. In 1931, with T. F. Dunhill, he produced a successful musical comedy, *Tandem Towers*.

Herbert George. English poet. Born in Montgomery, April 3, 1893, he belonged to the famous horder family. He went to Westminster School and Trinity College, Cambridge, and was public orator at the university, 1919-27. Ordained, he held a living in Huntingdonshire, but in 1930

he went to Bemerton near Salisbury, with which place his name is always associated. He died there and was buried in the church, March 3, 1633. Herbert's poems are in a volume called *The Temple*, first printed in 1633. It had an extraordinary popularity, some of the verses are religious poetry at its best. He also wrote a manual, *A Priest to the Temple*, or *The Country Parson's Character and Rule of Holy Life*. Herbert won a great reputation by his saintly life. John Donne was among his friends.

Herbert of Cherbury Lord English philosopher. Born March 3, 1583, Edward Herbert belonged to the famous border family and was a brother of George Herbert. He studied at Oxford, saw military service in Germany and was much abroad. Later he was sent by James I as ambassador to France. He was made a baron in 1629, and in 1642 took the side of the king, but later joined the parliamentarians. He died Aug. 20, 1633. Herbert was a considerable scholar and put forward the system of natural religion, which caused him to be regarded as the first of the English deists. This is contained in his *De Religione Gentilium*. He also wrote an account of the reign of Henry VIII., an *Auto biography*, some poems and a treatise (*De Veritate*) on truth.

Herbert of Lea Baron English politician. Born Sept. 16 1810. Sidney Herbert was a younger son of the 11th Earl of Pembroke. He went from Harrow to Oriel College, Oxford, and in 1832 became M.P. for Wiltshire. In 1834 as a follower of Sir Robert Peel he was made Secretary to the Board of Control and from 1841-45 was Secretary to the Admiralty. In 1845-46, and again 1852-55, he was Secretary for War, and as such was held responsible for the mismanagement of the campaign in the Crimea. From 1859-61 he was again Secretary for War, when he carried through some important administrative reforms. He died Aug. 2, 1861 having just been made a baron. Two of his sons became earls of Pembroke, and his own barony is now merged in that title.

Herb Paris Herb of the lily family (*Paris quadrifolia*). It is indigenous to Europe and Asia and is found in woodlands in Great Britain. Its round smooth stem bears a whorl of four acutely oval leaves surmounted by a single male drous flower with green sepals and awl-shaped yellow petals, forming a black berry. It grows to a height of 12 ft.

Herb Robert Annual herb of the geranium order (*Geranium robertianum*). It is indigenous to temperate and Arctic Europe and Asia and Africa and is abundant on British waysides. Sometimes called stinking crane's bill it is hairy, often reddish with much divided leaves and dark streaked light red flowers. The name comes traditionally from Robert Duke of Normandy.

Herculaneum Ancient town of Italy. Situated on the coast between Naples and Pompeii beneath Vesuvius it was damaged by earthquake, A.D. 63, and buried under mud and lava during the eruption which also destroyed Pompeii in 79. Subsequent eruptions deepened the deposit beneath which it lies. Discovered in 1719 it was examined in the 18th and 19th

centuries. Excavations recovered a theatre, villa and other buildings, with a wealth of bronzes, portrait busts, wall paintings, mosaics, instruments, papyrus rolls and other objects. These are mostly in Naples Museum. The excavations were renewed in 1930.

Hercules Latinised name of the mythical Heracles, the chief national hero of Greece. Son of Zeus and Alcmone, he displayed prowess from his cradle. After he had slain his own children in mad fury, the Delphian oracle bade him serve King Eurystheus of Tiryns for twelve years, during which he performed his famous twelve labours. He is frequently represented in classical art with a club and a lion skin mantle. Hercules is sometimes identified, as a sun god, with the Babylonian Baal whose worship the Phoenicians introduced into Greece.

Hercules Pillars of Anolont name for Calpe (Gibraltar), and Abyla (Ceuta), the rocky headlands guarding the Mediterranean outlet into the Atlantic. Legend is uncertain whether Hercules joined them or tore them asunder.

Herd Group or collection of anything especially of cattle, sheep and pigs. A herd-book is a book in which the record of pedigree stock is kept for the use of breeders and others. Societies of breeders issue such books, usually every year.

Herder Johann Gottfried Von Gorman writer. He was born Aug. 25, 1744, and was educated at the University of Konigsberg. He became a teacher at Riga and then a Lutheran minister at Bukoburg and later at Weimar. At Weimar he remained until his death, Dec. 18, 1803.

Influenced by Kant and Goethe, Herder first made a reputation as a critic but subsequently turned to philosophy. In his greatest work *Ideas on the History of Mankind*, he puts forward in a tentative manner the theory of evolution. He was a collector of folk songs, and also wrote poems.

Hereditament Really a piece of real property that can pass to an heir. It is now rarely used except by lawyers when property is sold.

Heredity The organic relation between one generation and another especially between parents and children. It deals with the transmission of qualities from parents and remoter ancestors to their progeny.

Scientists have long accepted the main facts of heredity and all breeders of animals make use of their knowledge of heredity in mating one with another. Their object is to transmit those qualities which are most useful whether it is the milking qualities of a cow, the speed qualities of a racehorse, the fighting qualities of a gamecock, or the flesh producing qualities of a pig.

In man the transmission of hereditary qualities cannot be arranged in such simple fashion for obvious reasons. These, however, are transmitted and eugenicists and others have given a good deal of time to studying the value of such transmission. Although it is generally admitted that heredity is of great importance in the development of mental and physical characteristics, it is equally certain that these can be modified by the counteracting influence of environment. See *Eugenics*.

Hereford City, market and county town of Herefordshire. It stands on the Wye, 144 m from London,

and is reached by the G W Rly. The principal building is the cathedral, a magnificent example of Gothic architecture at various dates. It has a library of chained books which was re-opened after renovation in 1931. Other buildings are Coningsby Hospital and St Ethelbert's Hospital, the churches of All Saints and St Peter, the college of the vicars choral and the episcopal palace. Every three years a musical festival is held here, it is given by the choirs of Hereford, Gloucester and Worcester. These counties also hold an agricultural show, which comes to Hereford every third year. There is a racecourse. The industries include the making of beer and cider and the tanneries are important.

Hereford, owing to its position, was an important place in the Middle Ages, when it became a prosperous centre of the woollen industry. Its bishopric dates from 872. Pop (1931) 24,159.

The important earldom of Hereford was long held by the great family of Bohun. Before their day it was held by several Norman barons, one of whom left a daughter who married Humphrey Bohun. Their son was made earl in 1199, and the title remained in the family until 1373. In 1397 Henry, afterwards Henry IV, was made Duke of Hereford.

The existing title of Viscount Hereford dates from 1550, when it was given to Walter Devereux. For a time it was held by the earls of Essex, but later again became an independent title and is still held by the Devereux family. It ranks as the premier viscounty in the English peerage.

Herefordshire County of England. In the west of the country, it is on the borders of Wales. Its area is 842 sq. m. Hereford is the county town, other places are Leominster, Ross and Ledbury. The Wye flows through it and the scenery is very beautiful. Other rivers are the Lugg, Tern, Arrow and Frome. In the east are the Malvern Hills, in the south the Black Mountains. The county is almost entirely given up to agriculture, and is specially famous for its older and its cattle. Sheep are reared and hops are grown. Its historic interest centres round the border castles, now mainly ruins such as those at Goodrich and Wigmore. Pop (1931) 111,755.

The Herefordshire Regiment was founded in 1807 as a territorial or volunteer unit only. It served in the Great War, and was afterwards incorporated in the Shropshire Light Infantry.

Heresy Opinion or doctrine at variance with recognised standards, specifically of theological belief and procedure. It is distinct from schism. Heresy has appeared in Christendom since New Testament times (Tit. iii). The first heresies were largely of Gnostic origin, e.g., Arius, Manichean and Pelagian, and were vigorously contested in early church councils. Later the Albigenses, Lollards and others were treated as heretics, and many persons were put to death for holding heretical opinions. Nowadays heresy is a purely ecclesiastical offence. Any clergyman or minister proved guilty of heresy is deprived of his office. Notable heresy hunts were those of Bishop Colenso in S. Africa, and of W. Robertson Smith in Scotland.

Hereward English soldier called the Wake. He was a holder of land in Lincolnshire in 1066. He rebelled against the Normans and made his head-

quarters in the Isle of Ely, where he gathered a number of followers. In 1071 William I. broke up his camp and ended the rising. Nothing more is known of Hereward. Charles Kingsley wrote a novel on his exploits.

Hergesheimer Joseph American novelist. He was born in Philadelphia, Feb. 15, 1880, and for a time studied art. In 1915 he made a name with his novel, *Mountain Blood*, and rose to the front rank with *The Three Black Pennys*, 1917, *The Bright Shawl*, 1921. *The Presbyterian Child*, 1923, *Tampara*, 1926. *Swords and Roses*, 1929, and *The Limestone Tree*, 1931.

Heriot George Scottish goldsmith. Born in Edinburgh in June, 1563, he served James I. and his wife, presumably by buying jewels for them. He died in 1621. He figures as "Jingling Geordie" in *The Fortunes of Nigel*.

Heriot's name is commemorated in Edinburgh by Heriot's Hospital, a school erected in the 17th century, and the Heriot Watt College, a modern technical college. The estates left by Heriot are controlled by the Heriot Trust, and the income is used to finance the college and for bursaries.

Herkomer Sir Hubert English painter. Born in Bavaria, Mar. 20, 1849, he was brought to England by his father, a wood carver, and educated at Southampton. About 1869 he made a name with some sketches and later with his paintings, "The Last Muster" and "Found". In 1878 he was elected A.R.A. and in 1890 R.A., in 1907 he was knighted. Herkomer is best known for the school of art he founded and conducted at Bushey. He was Slade Professor of Fine Art at Oxford 88-94, and again in 914.

Herm Small island of the Channel Islands. After the Great War it was bought by an English company for development as a holiday resort, and can be visited in the summer from Guernsey, 3 m. distant. Pop. 33.

Hermaphrodite Individual capable of producing both spermatozoa and ova, and therefore possessing the function of both sexes. The condition is normal in plants whose flowers contain stamens and pistils, although self-fertilization is less usual than cross fertilization. Some invertebrates are normally self-fertilizing, e.g., the ovster and the clam. Earthworms are both hermaphroditic and copulative, two individuals simultaneously impregnating each other.

Hermes In Greek mythology one of the gods, a son of Zeus and the counterpart of the Latin Mercury. His early exploits included the theft of the girdle of Aphrodite and the trident of Poseidon. He became the messenger of the gods, and conducted the souls of the dead to the lower world. He was the god of eloquence and of luck, the patron of travellers and traders.

Hermitage Cell or home of a hermit. One survives at Warkworth and another on an island in Derwentwater. Hermitage Castle, now a ruin in Roxburghshire, was a famous border stronghold, held first by the Comyns and later by the Douglases.

A palace at Baireuth is called the Hermitage, but more famous is the one at Leningrad, built by Catherine II in 1765 and long a residence of the tsars. In the 19th century it was converted into a museum and art gallery. A famous French wine called Hermitage is produced at Valence, on the Rhone.

Hermon Mountain of Syria. At the end of the Anti Lebanon range, 9400 ft. high, it has remains of a temple built in honour of Baal. Its modern name is Jebel es Sheikh.

Herne Bay Seaside resort and urban district of Kent, 7 m from Canterbury and 62 m from London, on the S. Ry. Pop (1931), 11,244. Herne is a village 1 m inland.

Herne Hill District of London, about 5 m from the City, on the S. Ry. Brockwell Park is in the district, which also has a running track.

Hernia (or Rupture) Escape from the abdominal cavity of some part of the intestine or its appendages especially in the groin region, often the result of strain in predisposed persons. In children, and adults who wish to live an active life, operation is generally advisable. In elderly people the wearing of a truss to reduce the hernia is the more common treatment though in special cases an operation becomes absolutely essential.

Hero In classical legend a superior being or demigod, intermediate between gods and men. They appeared in the Heroic Age, an era preceding the Historic Age, e.g., Hercules, Theseus. The name includes also the principal personages in national epics, e.g., Achilles, Hector, Ulysses and Aeneas.

A Hero Fund, founded by Andrew Carnegie, exists to assist cases where loss of life or earning power has resulted from acts of heroism in saving human life under place conditions in the British Isles.

Hero Figure in Greek legend a priestess of Aphrodite at Sestos on the Hellespont. See LEANDER.

Herod Name borne by princes of a Judæan dynasty of Idumæan origin. Herod the Great, born 74 B.C., was for a time ruler of Galilee. On his father's death he was recognised by the Romans as King of the Jews in 40 B.C. and he was ruling when Jesus was born. He founded cities and rebuilt the temple at Jerusalem. The New Testament tells how he ordered the Massacre of the Innocents, and of his dreadful death in 4 B.C. (Matt. II).

Other Herods were Herod the Tetrarch, who headed John the Baptist (Matt. IV), Herod Agrippa I, who executed St. James (Acts XII), and Herod Agrippa II, before whom St. Paul appeared (Acts XXIII).

Herodians Political party, not a religious sect, which actively supported Herod the Great, Idumæan dynasty (Matt. XXII, Mark III). They shared the antagonism of the Pharisees to Christ, and were condemned by Him.

Herodotus Greek historian, born at Halicarnassus in Asia Minor about 484 B.C. He travelled extensively, and died probably in 424.

The history of Herodotus is in nine books written in the Ionic dialect. It deals with the early history of Persia, Lydia and Egypt, but its main theme is the struggle between the Greeks and the Persians. It ends in 478 B.C. from it we gain much of our knowledge about Marathon, Thermopylae and Salamis.

Heroin Drug obtained from morphine by the employment of acetic acid. It is used in medicine as a sedative and narcotic but can be bought or sold only by licence.

Heron Large subfamily of birds allied to the bitterns. The common grey

species, *Ardea cinerea*, with long legs and neck, great wings and pointed bill, is the only one now breeding in Britain. It is about 3 ft. long and its large, flat, moss lined nests shelter pale green eggs. Occasional visitants to Britain are the great and little white heron, or egrets, and the night heron, *nycticorax*.

Herons live together in heronries, and there are still a number of these in England, e.g., at Parham, in Sussex.

Herpes Inflammation of the skin. Vesicles are formed which later dry into a crust. Two forms are common, around the nose and lips and on the body (shingles). The former accompanies or follows certain fevers the latter chiefly affects elderly people.

Herrick Robert. English poet. Born in London in 1591, he was the son of a goldsmith, and apprenticed to that trade, but went to Cambridge and was ordained. In 1629 he became Vicar of Dean Prior in Devonshire, and there he remained until the Puritans turned him out in 1647. After the Restoration he went back to his Devonshire living and there he died, Oct. 15, 1674. He is buried at Dean Prior.

Herrick wrote many poems, including the collections called *Noble Numbers* and *The Hesperides*. Among them are the lyrics, perfect of their kind, that have made his fame, such as "Bide me to live," "Cherry Ripe," and "Gather ye Rosebuds."

Herries Lord Scottish title. First held by Robert Herries in 1490. It passed by marriage to the Maxwell family, whose descendants, earls of Nithsdale, forfeited their titles in 1715. In 1858 it was successfully claimed by William Constable Maxwell whose granddaughter, Baroness Herries, married the Duke of Norfolk.

Herring Fish allied to the pilchard. It is abundant in northern waters, especially in the North Sea. The fish, which is extraordinarily prolific, spawns twice a year, summer and autumn. The eggs are laid on weeds, etc., in comparatively shallow water, and hatch out in two or three weeks. The fish takes two or three years to become mature.

Herries move in shoals near the surface of the water and are caught mainly in drift nets. An enormous quantity is taken into the ports on the E. coast of Great Britain. Some of these are sold fresh, but the greater part are salted and dried to become blonkers, or smoked to become red herrings or kippers, giving rise to a large industry, especially in Yarmouth where, during the season, thousands of women are employed. The catch of herrings in Great Britain in 1939 tons 21,998,812, was represented by 276,274 tons of fish. Norway has also valuable herring fisheries.

Herring Bone Phrase used in architecture. It describes the design of courses of stone wherein oblique lines to the right in one alternates with obliqueness to the left in the other, so that the formation of a herring's backbone is imitated. There is also a herring bone stitch in needlework.

Herrings Battle of the. Fight between the English and the French Feb. 12 1429. The English were trying to take Orleans and a little force set out to bring provisions chiefly herrings for eating in Lent. The French and their Scottish allies met them at Rouvray and a battle took place in which the English were victorious.

Herriot Edouard French statesman Born July 5, 1872, at Troyes, he became a brilliant classical scholar In 1897 he wrote *Philon le Juif*, which was crowned by the Academy, and later *Madame Recamier et Ses Amis* and other books showing scholarship of a high order

In 1912 Herriot entered public life as a member of the Senate He was later chosen leader of the Radical party, in 1924 he became premier, but events compelled his resignation in 1925 He again became premier in May, 1932, and in July signed the Lausanne agreement for France Later he held cabinet rank and was engaged upon questions of reparation, war debts and economic peace

Herschel Sir Frederick William English astronomer Born in Hanover, Nov 15, 1738, he went to England in 1757 and after much hard work on making and improving telescopes, he discovered the planet Uranus His other discoveries included the planet's satellites, many double stars, and numerous nebulae In 1782 he was made astronomer to George III and in 1816 a knight He died at Slough, Aug 25, 1822

Herschel's sister, Carolina Lucretia Herschel (1750-1848), did valuable work as an astronomer, and also compiled a star catalogue

Herschel left an only son, John Frederick William Herschel, born March 7, 1792 At Cambridge he was senior wrangler and he there gave his time to studying astronomy He mapped out all the stars in the Northern Hemisphere, and founded an observatory at the Cape of Good Hope to do the same for the Southern Hemisphere In 1833 he was made a baronet, and he was president of the Royal Society From 1850-55 he was master of the mint, and he died May 12, 1871 His writings include *The Outline of Astronomy*

Herschell Baron English lawyer Born Nov 2, 1837, Farrer Herschell, the son of a Nonconformist minister, became a Q C in 1874, and was elected M P for Durham From 1880-85 he was Solicitor General in the Liberal ministry, and in 1886 Lord Chancellor and a peer He died in Washington, March 1, 1899, when engaged on the arbitration about the boundaries of Venezuela

Hertford Borough and market town of Hertfordshire It stands on the Lea, 24 m from London Its industries include brewing, printing and milling, and there is an agricultural trade Pop (1931) 11,376

Hertford Marquess of Title borne by the family of Seymour In 1537, Edward Seymour, uncle of King Edward VI, was made Earl of Hertford Later he became Duke of Somerset, and his grandson, William Seymour, was made Marquess of Hertford and Duke of Somerset, but the marquessate became extinct when the 4th duke died in 1675 In 1750, Francis Seymour, a descendant of the first Duke of Somerset, was made Earl of Hertford and in 1793, Marquess of Hertford, Francis Charles, the 3rd marquess (1777-1842), inherited much wealth from his mother, and was known for his gallantries and his extravagances He figures as the Marquess of Steyno in *Fanny Hill* The eldest son of the marquess is called the Earl of Yarmouth

Hertford House House in London containing the Wallace Collection It is in Manchester Square

and was built late in the 18th century The magnificent collection of pictures and works of art which it contained was left by the 4th Marquess of Hertford to Sir Richard Wallace, who added to it and bequeathed it to the nation The Government then bought Hertford House, and it was opened to the public in 1900

Hertfordshire County of England One of the home counties, it covers 632 sq m and lies between the shires of Cambridge, Middlesex, Bedford, Buckingham and Essex It is hilly in the west, where are spurs of the Chilterns The chief rivers are the Lea and the Colne The Grand Union canal and the New River pass through the county and the southern part is in the area of greater London Hertford is the county town Other places are St Albans, Letchworth and Watford Agriculture and market gardening are the chief industries Pop (1931) 401,159

The Hertfordshire Regiment was raised as a territorial unit in 1907 It sent battalions to the Great War and is now incorporated with the Bedfordshire Regiment

Hertz Heinrich Rudolf German scientist, born in Hamburg, Feb 22, 1857. Following in the wake of Clerk Maxwell, he studied the experimental production of electro-magnetic (or 'Hertzian') waves His discoveries were the first steps towards wireless communication He died Jan 1, 1894

Hertzog James Barry Munnik South African politician, born April 3, 1866, of Boer parents In the war of 1899-1902 he held an important command, and after the annexation of the republic appeared as a champion of the Boer cause In 1915 he was elected leader of the Nationalist party, and as such repeatedly claimed independence for South Africa In 1924 he became premier and was still in office in 1936

Hervey Name of an English family represented by the Marquess of Bristol Its members were specially prominent in the 18th century, and its most famous member was John, Lord Hervey (1696-1743), son of the Earl of Bristol, who wrote *Memoirs of the Court of George II*

Herzegovina District of Yugoslavia It covers 3560 sq m, and Mostar is the chief town For some centuries it was a Turkish possession, but in 1878 it was put under the protection of Austria In 1908 it was annexed, along with Bosnia, by that empire, and in 1918 it was included in the new kingdom of Yugoslavia

Hesione In Greek legend, daughter of Laomedon, King of Troy Poseidon, having been employed to build the city walls by Laomedon, was refused payment To avenge himself he sent a sea monster which could only be restrained by the sacrifice of a king's daughter, and Hesione was selected for the sacrifice Hercules rescued her, but Laomedon refusing him the promised reward, Hercules slew him and gave Hesione as a bride to Telamon

Hesperides In Greek mythology, maidens who guarded the golden apples which Earth gave Hera when she wedded Zeus Usually numbering three, Aegle, Erithia and Hesperus, their gardens bordered the ocean in the farthest west, and are sometimes located near Mt Atlas One of the twelve labours of Hercules was to procure the fruits after slaying their guardian, a dragon.

Hesse State of Germany, one of the members of the republic. In the west of the country, it covers 2983 sq m, and is partly an agricultural region, cereals and vines being grown, while in some districts coal and iron are mined. It is governed by a small cabinet responsible to a diet or landtag. Pop 1,347,300

Hessian Anything belonging to Hesse. A cloth made of jute is called Hessian.

The Hessian fly is an insect that, in its larva stage, is harmful to wheat, barley, rye, and other cereals.

Hessle Market town and urban district of Yorkshire (E R). It is on the Humber, 4 m from Hull and 192 m from London. It has industries similar to those of Hull. Pop (1931), 6430.

Heston District of Middlesex. It is 12 m from London, on the District Rly. It is a flying station with an air park. With Isleworth it forms a borough. Pop (1931), 75,446.

Heterodyne System of wireless reception. In it the incoming oscillations are combined with locally generated oscillations of slightly different frequency giving rise to a "beat" effect which is audible after rectification.

Hetton Urban district of Durham, 256 m from London and 7 m from Sunderland. Coal mining is the chief industry. Pop (1931), 17,672.

Hever Village of Kent, on the Eden, near Edenbridge, 27 m from London. Its castle where Anne Boleyn lived, was restored by the 1st Viscount Astor. Pop 700.

Hewart Lord English lawyer. Gordon Hewart was born at Bury Jan 7, 1870, and was called to the Bar in 1903. In 1913 he was elected M.P. for Leicester as a Liberal. In 1916 he became Solicitor General and in 1919 Attorney General in the coalition ministry. In 1922 he was made Lord Chief Justice and a baron. His book *The New Despotism* attracted a good deal of attention when published in 1929.

Hexameter Name given to a verse of six feet. In English poetry there are two kinds the iambic with the last syllable accented and the trochaic, with the accent on the first syllable.

Hexateuch Greek term meaning six books and coined by modern Bible scholars for the first six books of the Old Testament. It is analogous to Pentateuch or five books.

Hexham Market town and urban district of Northumberland, famous for its abbey church, once belonging to an Augustinian priory. It is a magnificent edifice the nave is modern. The industries are mainly connected with the agricultural interests of the district in which there are also coal mines. Pop (1931), 5588.

Outside Hexham on May 15 1464 a battle was fought between the Yorkists and the Lancastrians in which the Lancastrians were defeated.

Heysham Seaport and watering place of Lancashire on the south side of Morecambe Bay 3 m from Lancaster. From here steamers go regularly to Belfast, Douglas, London and elsewhere and for these the L.M.S. Rly Co. has built docks and enlarged the harbour. Pop 3350.

Heywood Borough and market town of Lancashire, 9 m from Manchester. Cotton, chemicals and machinery are made here. Pop (1931) 25,967.

Heywood Thomas English dramatist. A Lincolnshire man, he was born about 1670 and became an actor. His plays include *The Four Prejudices of London*, *A Woman Killed with Kindness*, *The English Traveller* and *The Captives*, or *The Lost Rectory*. He also wrote poems and pageants and was responsible for a *Life of Queen Elizabeth*. He died in 1641.

Hezekiah King of Judah known for his activities in two directions. He put down idolatry and restored the worship of Jehovah, destroying the brazen serpent and repairing the temple at Jerusalem. He refused to pay tribute to Sennacherib, King of Assyria who invaded his land twice, and whose army was utterly destroyed by a pestilence on the second occasion. Hezekiah reigned from 726 to 697 B.C. and his story is told in 2 Kings xviii, xxvi and 2 Chron xxix-xxxii. The prophet Isaiah also refers to him.

Hiawatha Name of a Red Indian chief of the Onondaga tribe. He lived about 1500 A.D. and reconciled warring tribes with his League of Six Nations. The name is also used for a miraculous legendary being who taught the arts of peace to the Red Indians, and his exploits are narrated in Longfellow's poem, *Hiawatha*.

Hibbert Trust Charitable foundation. In 1847 Robert Hibbert (1770-1849) gave money to found scholarships and fellowships for the study of religion, free from all sectarian and denominational considerations. This became the Hibbert Trust, which provides lectures, and since 1902 has supported *The Hibbert Journal* a monthly review.

Hibernation Dormant condition or winter sleep characteristic of certain animals such as bears, dormice, and insects. A similar resting stage occurs among tropical forms during the dry season, and in Britain a summer sleep is met with in certain reptiles, amphibians, and worms. Hibernation is usually due to lack of food, and during this period the temperature of the body falls, the activity of the organs lessens, respiration is feeble and the vitality is at a minimum.

Hibernia Latin name for Ireland, sometimes used to day. See IRELAND.

Hibiscus Herbaceous plant of the genus *Malvaceae* (mallows). They consist of about 200 varieties of tropical and sub-tropical herbs and shrubs and are prized as ornamental plants for their large and brilliantly coloured blossoms. Some are cultivated for their muilage.

Hiccough Involuntary spasmodic contractions of the diaphragm muscle common in children, and very often the result of eating or drinking too quickly. Give a pinch of bicarbonate of soda in water or 1 teaspoonful of milk of magnesia in water, sipped slowly. In the case of a baby, give 1 teaspoonful of dilute water and hold him firmly up against the shoulder while patting him on the back.

Hickory Genus of N. American trees of the walnut order (*Carya*). Cultivated for their elastic timber and cable nuts they include the shucknut, yielding the best nuts, the pecan, the white heart or mockernut, and the pig-nut. The timber serves for

axetrees, tool-handles, harrel-hoops and golf-clubs, and makes compact charcoal

Hicks Sir Edward Seymour English actor Born at St Helier, Jan 31, 1871, he first appeared on the stage in 1887 and in 1905 opened his own theatre, The Aldwych Hicks has written many plays including *The Man in Dress Clothes* and *The Beauty of Bath*, also several books, among them *Twenty-four Years of an Actor's Life*; *If I were your Father*, *Chestnuts Roasted* and *Hullo Australians* He married, in 1902, the actress, Ellalino Terries In 1931 he was made a Chevalier of the Legion of Honour and was knighted in June, 1935

Hidalgo In Spain, a title used by the lesser nobility. It seldom denotes, nowadays, more than gentle birth and gives no official status

Hierarchy Term denoting a body organised in ranks and orders for ruling over sacred things The Jewish hierarchy comprised high priest, priests and Levites The Council of Trent anathematised all who reject the divinely appointed hierarchy of bishops, priests and ministers The celestial hierarchy comprises "angels, archangels and all the company of heaven"

Hiero Name of two rulers, or tyrants, of Syracuse. Hiero I reigned from 478 to 467 B.C. His fleet won a victory over the Etruscans in 474, but he is better known for the hospitality he extended to Aeschylus, Pindar and other scholars

Hiero II was a soldier who lived from 270 to 216 B.C. He was made King of Syracuse and took part in the struggle between Rome and Carthage, first as the ally of Carthage and then of Rome

Hieroglyph Pictorial character employed in Egyptian and other records, including those of the Hittites and the Mayas This system began with pictographs outlining objects, e.g., an eagle, but always with conventional meanings, which might become ideographs if interpreted literally, e.g., a circle for the sun, or symbolically, e.g., a musical instrument for gladness

At first carved on stone or painted on wood this hieroglyphic or priestly writing was used for other materials, e.g., papyrus Egyptian writing passed by the 4th century A.D. into a Coptic alphabet

Higgins Edward John English preacher Born at Highbridge and educated at Bridgewater, he joined the Salvation Army in 1882 He was chosen, in 1929, general in succession to W. Bramwell Booth.

Higham Ferrers Borough of Northamptonshire, on the Non 62 m. from London and 5 m. from Wellingborough The staple industry is the making of boots and shoes Pop (1931), 2928

High Blood Pressure Pressure of the blood unhealthily in excess of the normal (about 120 mm. of mercury) It is most often due to the hardening of the arteries which is apt to occur with advancing years and the best prevention is healthy living during adult life

People with high blood pressure should adopt a simple and moderate diet, avoiding rich foods, and alcohol except in strict moderation plenty of water should be drunk between meals, moderate exercise taken and worry must be strictly avoided See ARTERIO SCLEROSIS

Highbridge Urban district of Somerset It is 144 m. from London and 27 m. from Bristol, and is on the little River Brue The G.W. Rly. has works here Pop (1931), 2584

Highbury District of London, about 4 m. N. of the city, in the borough of Islington Highbury Park is a pleasant residential district Highbury Fields is an open space At Highbury is the ground of the Arsenal Football Club

High Commissioner Name given to one who represents his country in another country From time to time men are sent out as high commissioners, an instance being Sir Alfred Milner who went to South Africa as high commissioner in 1897 The representatives of Canada, Australia, New Zealand, India, South Africa and the Irish Free State in London are Lord High Commissioners

A high commissioner is appointed by the King each year to represent him at the annual Assembly of the Church of Scotland.

The Court of High Commission was organised in England in the reign of Elizabeth to see that the services of the Church of England were conducted according to the Act of Uniformity It was abolished in 1641

High Court of Justice English court of law In 1873, when the judicial system was reformed, the high court was established. It is in three divisions, chancery, king's bench, probate, divorce, and admiralty Each division has its quota of judges who are appointed on the advice of the Lord Chancellor They are knighted and receive a salary of £1000 a year and a pension The judges sit in London, at the law courts in the Strand, except those who are on circuit Litigants can appeal against decisions of the high court to the court of appeal, which forms the higher branch of the supreme court of judicature

Higher Criticism Term used for the criticism of the books of the Bible It is directed rather against their historical accuracy than against their literary qualities or moral teaching, and so called to distinguish it from the lower criticism of the actual text.

Highgate District of London to the N. of the city The S. part is divided between the boroughs of St Pancras and Islington, with the N. part in the county of Middlesex Highgate Hill is a landmark, whilst Highgate Woods is an open space of 69 acres Whittington's Stone is here Highgate School is a large public school with accommodation for nearly 700 boys

Highlands Any elevated land, but especially that part of Scotland that lies N. of the Grampians, or N. of a line drawn from Ben Lomond to Aberdeen It includes the counties of Argyll, Inverness, Ross and Cromarty, Sutherland, Caithness, Banff, Nairn, and Aberdeen, although the coastlands of the last three shires are usually excluded. It is mountainous, the scenery in parts being of extraordinary beauty, especially where lochs lie amidst the mountains. With a poor soil, the Highlands are thinly peopled and much of the land is devoted to deer forests and grouse moors Inverness is usually regarded as the capital of the Highlands

The Highlands have their own language and customs, and form a distinct part of Scotland, although this distinction is now less marked

than it was before 1745, when the clan system was dominant. The language is Gaelic. The Highland dress consists of kilt, plaid and bonnet. Highland sports are seen at the various Highland games held every year in different centres. The district has its own music, in which the bagpipes play an important part.

The Highland regiments of the British Army are those that wear the Highland dress. They are the Black Watch, Cameron, Seaforth, Gordon, and Argyll and Sutherland Highlanders. The Highland Light Infantry does not wear the kilt and is not, strictly speaking, a Highland regiment.

The Highlands have a famous breed of cattle, and their cattle shows are notable.

The Highland Rly is now part of the LMS system.

High Priest Chief priest, specifically in the ancient Jewish church. Josephus enumerates 83 from Aaron to Phannias, A.D. 67. He kept the anointing oil, wore vestments of special magnificence, and entered alone, in white linen, into the Holy of Holies on the Day of Atonement.

High Sheriff Name used to day for the sheriff of a county in England and Wales. He is appointed for a year from among the landowners in the county, and discharges duties connected with the administration of justice. For the routine work he appoints a lawyer as under-sheriff. The sheriffs are named, or prokied, by the Chancellor of the Exchequer, three names from each county are submitted to him, but by custom he picks the first. For Lancaster and Cornwall, they are chosen by the King as Duke of Lancaster and the Prince of Wales as Duke of Cornwall.

High Tor Hill of Derbyshire. It overlooks the Derwent at Matlock and is 400 ft high. In it is a grotto, and opposite are the Heights of Abraham.

High Water Highest point to which a tide comes on the sea coast. It is usually every 12 hours, 25 min and is therefore 50 min later each day. There is similarly a high tide in tidal rivers.

Highway Main road. The care of the highways is in the hands of the various councils through whose territory they pass, their work being supervised to some extent by the Ministry of Transport. The Highway Code is the name given to the regulations for using the roads prepared under the important Road Traffic Act of 1930. See ROAD.

Highwayman Robber on the public highway. Highwaymen flourished in the 17th and 18th centuries, and in the 19th until the building of railway lines. They were usually mounted and masked and accosted travellers passing over heaths or in very desolate areas in the neighbourhood of London of other large centres. Hounslow Heath and Blackheath were noted haunts of highwaymen. Charles Darnley (1643-79) excelled in daring and gallantry. John Nevison (1639-84), and Dick Turpin (1706-39) were heroes of a ride to York, probably apocryphal.

High Willhays Hill of Devonshire the highest point on Dartmoor. It attains 2939 ft and is reached from Okehampton 4 m to the north.

High Wycombe Borough and market town of Buckinghamshire, also known as Chipping Wycombe, 27 m from London. The making

of furniture, especially chairs, is the chief industry, and there is an agricultural trade. Pop 22,000.

Near is the beautiful village of West Wycombe which it has been proposed to preserve to show what an English village was like.

Hilary Saint and bishop. Born about the year 390, he became a Christian, and about 350 was appointed Bishop of Poitiers. He opposed the Arians and was banished to Phrygia by the Emperor Constantine, whence he governed his diocese as before. Later Hilary went to Constantinople but again he attacked the Arians, and was sent back to Poitiers where he died in 368. He wrote various theological works, and his feast occurs on Jan 13.

Hilary is a term at the Inns of Court and the University of Oxford. It begins about Jan 13, and lasts for three or four weeks.

Hilda English saint and abbess. Born in 614, she was a relation of Edwin, King of Northumbria. She was baptized and became a nun. In 649 she was appointed abbess of a house at Hartlepool, and later she founded one at Whitby which became very famous and where the abbess received Caedmon. She died at Whitby Nov 17 680.

Hill Sir Rowland. English reformer. Born at Kidderminster, Dec 3, 1796, he is known for his services to postal reform, as it was mainly through his efforts that the penny post was introduced in 1840. He was knighted in 1800, and died Aug 27, 1879.

Another Rowland Hill was a famous preacher, who, in 1783, built the Surrey Chapel, now a boxing centre, in the Blackfriars Rd, London.

Hill Viscount. English soldier. Born in Shropshire, Aug 11, 1772, Rowland Hill held a high command in the Peninsular War and also at Waterloo. From 1828 to 1842 he was Commander in Chief. In 1814 he was made a baron, and in 1842 a viscount. He died Dec 10, 1842.

Hill Fort Stronghold or fortified place on a natural elevation. Many examples exist in Great Britain. English and Irish are usually earthworks, Welsh and Scottish are usually of stone. Many were utilised in Roman, Saxon and Norman times. Some occupy promontories or mountain crags, natural defences were supplemented by artificial ramparts sometimes concentric, and protected by ditches. Maiden Castle near Dorchester is a notable hill fort.

Hillsborough Town of Co. Down, Northern Ireland, 12 m from Belfast. Hillsborough Castle is the seat of the Marquess of Downshire, the head of the family of Hill. Pop 5,444.

Hilton Harold Horsfall. English golfer. Born Jan 12, 1869, in 1892 he won the English open championship, a feat he repeated in 1897. He was amateur champion 1890, 1901, 1911 and 1913, and he also won the Irish championship on four occasions. In 1911 he won the Amateur Championship of the United States. Since 1913 Hilton has been editor of *Golf Illustrated*.

Hilversum Town and watering place of the Netherlands. It is on the coast 18 m from Amsterdam, and is a railway junction. There are various attractions for visitors including a kursal. There is also a powerful broadcasting station (290.1 M, 20 (7) F.W.) Pop (1932) 59,632.

Himalaya Range of mountains in Asia containing the highest peak.

In the world They are between India and Tibet and stretch for nearly 1600 m from Afghanistan to Burma Their width is about 200 m The system consists of several ranges First are the foothills, perhaps 3000 ft high, then comes the outer Himalayas, perhaps 9000 ft. high, and finally the Himalayas proper, with an average height of 18,000 or 20,000 ft There are passes through the mountains, but these are difficult, as they are all above the snowline, which is 15,000 ft

The highest peak is Everest (*q v*), others are Kanchenjunga, Dhawalagiri and Kamet Most of the attempts to climb these peaks have failed, but in 1931 Kamet was conquered The Ganges, Indus, Brahmaputra, Sutlej and other rivers rise in the range Sometimes the Karakoram range is included in the Himalayan system The word Himalaya means, in Sanscrit, "the abode of snow"

Hinchingbrooke Village of Huntingdonshire It adjoins Huntingdon, and here is Hinchingsbrooke House, the seat of the Earl of Sandwich At one time the residence of Oliver Cromwell, it is a fine house dating from the 16th century

Hinchingbrooke is also the name of an island off the coast of Queensland

Hinckley Urban district and market town of Leicestershire, 14 m from Leicester, on the L M S Rly The chief industries are the manufacture of hosiery, boots and shoes Pop (1931) 16,030

Hindenburg Town of Silesia, Germany, formerly called Zabrze It is 66 m from Oppeln on the Silesian coalfield and is a railway junction as well as a manufacturing centre for machinery and chemicals Pop 106,900

Hindenburg Paul von German soldier He was born at Posen, Oct 1, 1847, and in 1865 entered the Prussian Army as an officer He served in the war against Austria in 1866, and in the war of 1870-71 against France During the years of peace he rose steadily in rank until he became a general at the head of an army corps In 1911 he retired, but in 1914 he was recalled to active service and given command of the German forces in E Prussia He won the Battle of Tannenberg, and drove the Russians out of Germany At this time he became the idol of the German people, a status he never wholly lost He then led an army into Poland, where he gained the victory at Kovno and captured Warsaw He became in Aug., 1916, head of all the German Armies, with Ludendorff as his Chief of Staff He remained in command throughout 1917 and 1918, and after the Armistice until 1919, when he retired In 1920 he published a volume of reminiscences translated into English under the title of *Out of my Life* In 1925, the old marshal was elected President of the Ropublic, and re-elected on April 10, 1932, after a second ballot When Hindenburg died in Aug., 1934, Herr Hitler combined the office of President with that of Chancellor in his own person

Hindenburg Line Name given to defensive positions made by the Germans in 1916-17 It ran from Vimy, near Arras, protecting Cambrai, St Quentin and other places, to Laon It was very strong, but shorter than the one held previously by the Germans and called the Siegfried line In Sept and Oct., 1918, the line was broken by the British and French advance

Hindhead District of Surrey, 2 m. from Haslemere and 39 from London Its common is a famous beauty spot and near it many literary men, including Tennyson, have lived The Devil's Punch Bowl, a glen below the Portsmouth Road, is notable Near is Gibbet Hill The common belongs to the National Trust

Hindley Urban district of Lancashire, 2½ m from Wigan, and 202 m. from London by the L M S and L N E Rlys. There are collieries and cotton mills. Pop. (1931) 21,629

Hindlip Village of Worcestershire, 4 m. from Droitwich The chief building is Hindlip Hall, the seat of Lord Hindlip In 1836 Sir Henry Ailsopp, head of a firm of brewers, was made Baron Hindlip

Hinduism Social and religious organisation in India It is a development of Brahmanism and is divided into a number of groups There were in 1931 altogether 239,195,140 Hindus in India, and they are thus the dominant people in the land Early Brahmanism was affected by Buddhism and both existed down to about A D 800, when the latter disappeared from the peninsula, leaving a new Brahmanism, the product of both philosophies This modern Hinduism, based on the Puranas, gives less prominence to Brahma than to his associates Vishnu, the preserver, and Shiva, the destroyer and reproducer They are worshipped in innumerable forms, both in their male and female aspects, the latter being emphasised by Saktism, which derives its teaching from the Tantras

Hindu Kush Mountain range of Central Asia, W of the Himalayas, mainly in Afghanistan Its length is 350 m and its breadth about 200 The highest point, Tirach Mir, is 25,400 ft high There are many others over 20,000 ft

Hinkler Chick Bert Australian airman, born at Bundaberg in Queensland in 1894 He entered the flying service and after the Great War made several notable flights The longest was his flight from Croydon to Port Darwin, 10,340 m in 15½ days, in Feb., 1927 In Nov., 1931 he crossed the Atlantic from Brazil to Africa In January, 1933, he set out from Britain on a flight to Australia He disappeared, and in April his body was found in the mountain wilds of Tuscany, where his machine had crashed.

Hip Projecting part of the human body, formed by the side of the pelvis and the top of the thigh bone, with the flesh covering them, in quadrupeds it is called the haunch The human hip extends from the waist to the upper part of the thigh The thigh bone's knobbed head forms with the cup-shaped hollow outside the pelvis a ball-and-socket hip joint, whose dislocation may be congenital or perhaps accidental Chronic tuberculosis in the hip joint is not infrequent in young children There are special hospitals in London and elsewhere for diseases of the hip

Hipparchus Greek astronomer Born at Nicaea, Bithynia, he worked mostly in Rhodes He discovered the procession of the equinoxes, calculated closely the mean lunar month, improved astronomical instruments, catalogued many hundreds of stars, and first determined terrestrial positions in terms of latitude and longitude He thus founded plane and spherical trigonometry, and

ranks as the greatest astronomer of antiquity. He wrote a good deal, but only one of his works survives.

Hippocrates Greek physician, born about 460 B.C. in the island of Cos. He belonged to a family of priests and doctors, and lived mainly at Cos and Chios practising his art. He died in 377.

Hippocrates is called the father of medicine and for centuries his oath was the one taken by medical graduates. He was much in advance of the ideas of his age, and in some ways anticipated the modern treatment of disease, his views on diet being equally sound. He believed in surgery and his mind was thoroughly scientific in its outlook. He left a number of writings which have been translated into English.

Hippodrome Ohlong place, more or less embellished by art, for running chariot races and subsequently horse races in Greece. The word is now used for a place of amusement, whether music hall, theatre or cinema house. The London Hippodrome is in Cranbourne St., W.C.

Hippolyte Legendary queen of the Amazons and the daughter of Ares. One story is that she invaded Attica, but was defeated by Theseus, who married her. Better known is the story of the girl who wore This was the gift of her father, and one of the labours of Hercules was to obtain it. In so doing he killed the queen.

Hippolytus Greek hero. The son of Theseus and according to one story, of Hippolyte, he was loved by Phaedra, his stepmother. As he did not return this love Phaedra killed herself and left Theseus to regard her son as the offender. Theseus called Poseidon to destroy Hippolytus who was thrown by his frightened horses into the sea. Aesculapius restored him to life. His fate is the subject of a play by Euripides.

Hippophagy Practice of eating horse flesh. In France palace litch man hunted wild horses for food before domestication began. The ancient Greeks called some Scythian nomads Hippophagi, and horse eating survives in Central Asia. Horseflesh was consumed in Paris during the terror in 1793, and the siege in 1870. It is regularly sold in Belgium and Germany, and forms an ingredient in some French sausages. In Great Britain the law forbids the sale of horseflesh unless it is distinctly stated what it is.

Hippopotamus Large mammal now only found in tropical Africa. The ordinary kind *H. amphibius*, is about 14 ft. long and may weigh 4 tons. It lives on land by the side of rivers, but can swim and remain under water for about 10 minutes. In colour its skin is brown or slate. It has oven toes, short limbs and large tusks. Its skin and ivory are valuable. Fossil remains of the hippopotamus have been found in England.

Hippo Regius Ancient city of N. Africa, on the coast, 220 m. W. of Carthage near the modern seaport of Bona. It was founded by the Carthaginians and was the residence of the Numidian Kings. Later it was one of the richest cities of the Roman Empire and here for 35 years S. Augustine was bishop. In the 7th century it was taken by the Arabs, and soon fell into ruin.

Hire Purchase System by which goods are bought and paid for by a series of instalments. In the

United States almost everything, except food stuffs, is bought in this way. It is used in selling motor cars, furniture, and gramophones, and, to some extent, for clothing. Its prevalence is regarded by some as responsible for the serious depression in trade that began in 1930.

The system has spread to Great Britain, where many motor cars and much furniture are bought by hire purchase. Some firms trade almost entirely in this way, whilst all the large firms make arrangements for payment by instalments.

English law on the subject is somewhat complicated. Goods bought on the hire purchase system remain the property of the seller until the last instalment is paid. This is usually laid down in an agreement signed by the buyer. The seller retains the right to take back the goods if an instalment is in arrears, and the buyer cannot sell them until they become legally his. In practice, however, firms do not act up to the limits of their power, but make an allowance for the money already paid if they take back the goods, whilst the courts are very inclined to show leniency to buyers when cases are brought before them. A hire purchase agreement must bear a sixpenny stamp.

Hirohito Emperor of Japan. Son of the Emperor Taisho, he was born April 29, 1901. He succeeded his father in 1926, but had been virtual ruler since 1921, when his father retired from public life owing to ill health. His great aim is peace and prosperity at home and abroad.

Hiroshima City and seaport of Japan. Overlooking a bay on the S. coast of the main island, it is 155 m. from Osaka. Ranking next to Kobe in commercial importance on the inland sea, it is a large cotton spinning centre and a depot for articles of manufactures. Multitudes flock to the bay annually to visit the ancient Shinto temple, one of Japan's three chief wonders on the Itoushima or Island of Light. Pop. (1930) 270,417.

Hirst George Herbert. English cricketer. Born at Kirkheaton, Yorkshire, Sept. 7, 1871, he became a professional cricketer and first played for his county in 1892. For nearly 30 years he was one of the mainstays of the team both as a batsman and a bowler, and on many occasions played for England against Australia. As an all round cricketer Hirst has probably only been surpassed by Grace and equalled by another Yorkshireman, Rhodes. From 1920 to 1930 he was cricket coach at Eton College.

Hispaniola Old name for the island of Haiti. It was given to it by Columbus and means "Little Spain".

Histon Village of Cambridgeshire, 4 m. from Cambridge, on the L.N.E. Ry. The village is a centre for jam making. Pop. 1400.

Historiographer Official historian since kings sometimes appointed a scholar as historiographer royal e.g. Boileau and Racine by Louis XIV., Voltaire by Louis XV. and James Howell by Charles II. The old office of King's Historiographer in Scotland was revived in 1763.

History Record of events. It is derived from a Greek word meaning knowledge and in its widest sense is a knowledge of past events in all fields of human activity. The more general use of the word is for the past activities of nations.

History is divided into ancient and modern.

or ancient, mediaeval and modern, the period before ancient history begins being either archaeology or anthropology. Ancient history lasts until the fall of the Roman Empire in the west, mediaeval history dates from 400 to 1453 or 1492, and modern history from then onwards.

The first great historian was Herodotus (q.v.), the father of history. Other great names among the ancients were Thucydides, Livy and Tacitus. Although Thucydides and Tacitus have never been surpassed as philosophic historians, they did not adopt the scientific method of testing all their statements, a method which began in the 18th century and received a great impetus from the labours of Ranke, whose only rival as the greatest of modern historians is Gibbon.

At Oxford, Cambridge, London and elsewhere history is one of the subjects in which courses and examinations for an honours degree are held. In London there are the Historical Association and the Royal Historical Society at 22 Russell Square. The University of London has opened an Institute of Historical Research, under Professor A. F. Pollard, at Malet St., Bloomsbury. The *English Historical Review* is published monthly.

Hit Town of Iraq, on the Euphrates, 33 m. N. of Ramadid and 85 from Bagdad. It may be the Abava mentioned in the Old Testament (Ezra viii). The Euphrates is navigable up to this point and from Hit caravans cross the desert on the way to Damascus. It is noted for its gardens, and near are rich supplies of bitumen. The town was occupied by the British in March, 1918.

Hitchin Market town and urban district of Hertfordshire, 32 m. from London, on the L N E Rly. Girton College was founded here in 1869. The chief industries are malting and dealing in agricultural produce. Pop (1931) 14,382.

Hitler Adolf German politician. Born in Austria, April 20, 1889, he was first an architect. Having settled in Germany he became prominent by raising a body of volunteers to oppose the social democrats. In 1923 his followers engineered a rising in Bavaria, but this was suppressed and Hitler was sent to prison for five years. Soon released, he joined the National Socialist Party and quickly came to the front. He organised the party, which was known as the Nazis, and this soon became a power in the land. In 1930 100 of its members were returned to the Reichstag, and in 1932 Hitler, having become a German citizen, stood at the presidential election against Hindenburg and polled several million votes. His party won great successes at the elections in Prussia and other parts of Germany. From that time the Nazis gradually gained ascendancy, and after becoming Chancellor in 1933 Hitler was virtual dictator. He confiscated the funds of the Communists, put down the Socialists, and drove the Jews from key positions in Germany. In Oct. he announced Germany's withdrawal from the Disarmament Conference, and in Aug. 1934, he succeeded to the Presidency on the death of Hindenburg, thus holding the chief offices of the state. He visited Saarbrücken after the transference of the Saar to Germany by plebiscite vote and made a famous declaration in May, 1935, on German armament policy. Four months later he invited the League of Nations to examine the Memel position. Hitler has written a book, *Mein Kampf* (*My Battle*),

and has put forward various schemes for reform, some of a very drastic kind.

Hittites Ancient people in Asia Minor. The Biblical names Heth and Hittite indicate a people almost unknown until modern exploration revealed, from 1870 onwards, various distinctive monuments. Prof. Sayce announced in 1880 the discovery of a forgotten Hittite empire once flourishing in Asia Minor. The people apparently used horsed chariots and pictographic characters of Indo-European affinity, which are still undeciphered. Established in Cappadocia, their federation took place about 1400 B.C. and their kings reduced the kingdom of Mitanni, fought and made treaties with Egypt, and maintained relations with Mesopotamia. They disappeared about 1200 B.C. Reviving subsequently at Carchemish, they were finally overthrown about 800 B.C.

Hoar Frost Term applied to the small crystals of ice formed on the surface of exposed objects when the dew-point or temperature of saturation of water vapour falls below 32° F. Hoar frost is seen especially on nights when the sky is clear and the atmosphere calm. A typical example is the ice pattern formed on a window.

Hobart Capital and seaport of Tasmania, on the S. side of the island. It has a fine harbour on the River Derwent and docks, wharves and warehouses. It is the commercial centre of the island and has fine university and parliament buildings. The industries are shipping, flour milling, fruit preserving and brewing. Pop (1932) 58,270.

Hobbema Meindert Dutch artist, born in Amsterdam in 1638 and died there Dec. 7, 1709. After his death he was recognised as one of the greatest of the painters of Dutch life. He is represented in the National Gallery, London, by "The Avenue of Middelharnis," "Showery Weather," and other works.

Hobbes John Oliver Pon name of the English novelist, Pearl Mary Teresa Craigie. The daughter of John Morgan Richards, an American business man who settled in London. She was born in Boston, Nov. 3, 1867. She made a reputation with *Some Emotions and a Moral*, 1891, and other novels. *The School for Saints*, 1897, and *Robert Orange*, 1900, are her best books. Her plays include *The Ambassador*. She died Aug. 13, 1906.

Hobbes Thomas English philosopher. Born at Malmesbury, April 5, 1588, the son of a clergyman, he was educated at Oxford. He spent some years as tutor with the Cavendish family, and travelled with his pupils. He associated with Bacon, Ben Jonson and other men of note, and passed a good deal of time in study, especially of mathematics and philosophy. In 1640 he went abroad and was for a short time tutor to Prince Charles, later Charles II. He returned to England in 1651 and lived quietly under the Commonwealth and then under Charles II, who gave him a pension. He died at Hardwicke Hall, Dec. 4, 1679.

The fame of Hobbes rests upon *The Leviathan*, published in 1651. It is a cogent argument for absolute sovereignty, Leviathan being the state, and it has had enormous influence on political thought. In 1640 he wrote a treatise in defence of the royal prerogative.

Hobbs John Berry. English cricketer. Born in Cambridge, Dec. 16, 1882, Hobbs became a professional cricketer and

played first for his native shire. In 1905 he joined the Surrey county eleven, for which he played for over 25 years. In 1925 he beat W G Grace's record of 126 centuries. Hobbs was for years one of the opening batsmen in all test matches and the captain of the Players against the Gentlemen. He played in the test matches for the last time in 1930. Hobbs has written several books on cricket, including *Playing for England*, 1931.

Hoboken City and river port of New Jersey, U S A, on the Hudson River opposite New York, the two cities being linked by ferry boats and railway tunnels. Shipping is an important industry and there are some manufactures. Pop (1930) 50,261.

Hobson Thomas Carrier at Cambridge. He kept a livery stable and attained notoriety by his stubborn refusal to let out his horses except in their proper order, hence the phrase "Hobson's choice," which means no choice at all.

Hoche Lazare French soldier. Born at Montreuil, June 25, 1708, in 1703 he was made a general. He defeated the Austrians and the Russians, but he is better known as the man who put down the Royalist rising in La Vendée, and as the leader of the force that landed in Ireland in 1706. He was made Minister of War, but died Sept 18, 1707.

Hock German white wine, especially Rhenish. The name is really Hochheim, a still or sparkling wine produced at Hochheim near Mainz. Similar Australian and Californian wines from the Riesling, or hock grape, are less acid.

Hockey Outdoor game played by men and women. The implements are a hard ball and a stick with a curved end, the object being to drive the ball through the goal which resembles the one used in association football. A side consists of eleven players, five being forwards, three half backs, two backs and a goalkeeper. The ground should be 100 yds long and 55 or 60 yds wide. In front of each goal is a striking circle, and to score a goal the ball must have been hit from this. The ball must not be played with any part of the body, but only with the stick which must not be raised above the shoulder.

There is a Hockey Association founded in 1886, and international matches are played.

The game is also played on ice where the number of players is seven or eight a side.

Hocking Joseph English author. Born in 1855, he became a minister of the United Methodist Free Church and, like his brother Silas Hocking, made a name as a novelist. His first book was *Jabez Esterbrook* 1891 followed by others in quick succession. *The Fernal Choice* appeared in 1932.

Hocking Silas Kitts English writer. Born in Cornwall, March 24, 1850, he was educated for the ministry of the United Methodist Free Church. From 1870 to 1896 he served as a minister. In 1878 he made a reputation with a story, *Her Benny* and many others followed most of them being very popular. In 1923 he published *My Book of Memory*. He died in Sept 1935.

Hocktide Mediaeval English festival kept on the second Monday and Tuesday after Easter day. Hock Tuesday and Michaelmas were rent days in rural England. A favourite diversion was for women on Hock Monday and men on Hock Tuesday to blind passers by of the opposite sex, the toll for

release being devoted to church or parish expenses.

Hodson William Stephen Raikes English soldier. Born March 19, 1821, he became an officer in the Indian Army, and as a leader of the Guides saw a good deal of service on the frontier. He is best known as the leader of Hodson's Horse irregular cavalry that did fine work during the Mutiny. After the fall of Delhi, he pursued the fugitive princes and shot them with his own hand. He was wounded at Lucknow, and died March 12, 1858.

Hoener God of Norse mythology. He is described as the Lord of the Ooze, and is represented with long legs like a stork. He is said to have given speech to man and woman when they were made, and to have first used the divining rod.

Hofer Andreas Tirolese patriot. Born Nov 22, 1797, he was an innkeeper when the French invaded the Tirol in 1797. He collected a body of his countrymen and led them in an irregular warfare until about 1805. In 1809 he took the side of Austria against France and won some victories for his beloved land, which for a few weeks he ruled. Peace, however, was soon made Austria giving up the country, but he continued to fight the French until his forces were beaten. He was then betrayed, and, after a trial, was shot at Mantua, Feb 20, 1810.

Hoffmann August Heinrich German poet. Born April 2, 1798, at Fallersleben in Lüneburg, he became librarian at the University of Breslau, and in 1835 was made Professor of German Literature there, but he lost his post in 1842 when he published a volume called *Unpolitical Songs*. In 1860 he became librarian at Corvet and there he died, Jan 10, 1874.

Hoffmann is one of Germany's national poets and his songs became very popular, especially in 1848 because they expressed the national sentiment. He was the author of *Deutschland, Deutschland über Alles*.

Hoffmann Ernest Theodor Wilhelm German writer. Born at Königsberg, Jan 24, 1776, he became a lawyer, but had also interests in literature, art and music. He held official positions in the public service from 1796 to 1806, after which he spent ten years as a wanderer. In 1810 he received an official post in Berlin, which he held until his death June 25, 1822. Hoffmann is famous for his fairy stories which have been translated into English. He also wrote short stories and novels in the romantic vein.

Hofmann Josef Casimir Polish musician. Born at Cracow, Jan 20, 1876, the son of a professor of music, he studied at Warsaw and appeared in public as a pianist when a boy. He gave recitals in London, New York and other capitals, composed concertos and sonatas and wrote on piano playing. In 1927 Hofmann was made director of the Curtis Institute of Music in Philadelphia.

Hogarth William English painter and engraver. He was born in London Nov 10, 1697, and was apprenticed to an engraver in silver but turned later to engraving for book illustration. Under Sir James Thornhill he studied painting, and his numerous portraits show remarkable technical skill sympathetic treatment and power of expression. His most famous pictures are those in which he satirized the life of his time as seen in "The Rake's Progress" in the *Swann*

adon, and "Marriage à la Mode" Gallery. He died Oct 26, 1764 house in Hogarth Lane, Chiswick, cum, where a number of his works

James Scottish poet. Called the Strick Shepherd, he was born in although without education, soon to verse. In 1801 he became known later Scott, who included in his *strelsy* several ballads supplied by 803 his first volume of verse, *The 3ard*, was published, and he wrote sheep. About 1810 he left the d settled in Edinburgh, where he cond volume, *The Forest Minstrel*, l a paper called *The Spy*. In 1813 d *The Queen's Wake*, his greatest then settled on a farm in Dumfries—a farmer he was a failure, but he eat deal, both in prose and verse, articles in *Blackwood's Magazine*. Ho 21, 1835

on Village of Lancashire, between Preston and Blackburn, 213 ondon, on the L.M.S. Rly. Hoghton 16th century house, is associated tory of James I, when visiting there, the loin of beef

anay Word used in Scotland for New Year's Eve. It is a erry making, and is marked by the presents
